Section 1. The City Manager or her designee is hereby authorized to execute a contract and any amendments with National Institute for Criminal Justice Reform to manage and lead a community engagement to develop a new paradigm for public safety in the City of Berkeley for a total contract not-to-exceed \$270,000 from the General Fund for the period beginning January 1, 2021 and ending June 30, 2022. A General Fund appropriation for this contract will be included in the First Amendment to the FY 2021 Annual Appropriations Ordinance.

Section 2. The City Manager will include in the Scope of Work for the National Institute of Criminal Justice Reform that they will work with the City Auditor's Office on the assessment of emergency and non-emergency calls-for-service to ensure that there is no duplication of work. The City Auditor has agreed to be available and review its work with the National Institute for Criminal Justice Reform.

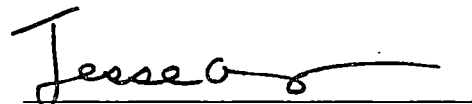

Section 3. A record signature copy of the contract and any amendments between the City and the National Institute for Criminal Justice Reform shall be on file in the Office of the City Clerk.

The foregoing Resolution was adopted by the Berkeley City Council on December 15, 2020 by the following vote:

Ayes: Bartlett, Droste, Hahn, Harrison, Kesarwani, Robinson, Taplin, Wengraf, and Arreguin.

Noes: None.

Absent: None.

Jesse Arreguin, Mayor

APPENDIX B

TASK FORCE MEMBERSHIP GOALS AND WRITTEN STATEMENT

All members must be active members of the Berkeley community and committed to the goals and success of the Task Force. Additionally, pursuant to the enabling legislation, in order to maintain the Council's commitment to centering the voices of those most impacted, appointments to the Task Force should reflect a diverse range of experiences, knowledge, expertise and representation, and be made with the goal of achieving a balance of the following criteria:

- Representation from Impacted Communities:
 - Formerly incarcerated individuals
 - Victims/family members of violent crime
 - Immigrant community
 - Communities impacted by high crime, over-policing and police violence
 - Individuals experiencing homelessness
 - Historically marginalized populations
- Faith-Based Community Leaders
- Expertise/Leadership in Violence Prevention, Youth Services, Crisis Intervention, and Restorative or Transformative Justice
- Health/Public Health Expertise
- City of Berkeley labor/union representation
- Law Enforcement Operation Knowledge
- City Budget Operations/Knowledge

Describe how your experience, education, attributes, and training qualify you for appointment to the Task Force, and which membership criteria listed above apply to you. Attach additional pages if needed.

City Manager's Office

Press Contact: [Matthai Chakko](#), (510) 981-7008

APPLY BY FEBRUARY 8: HELP SHAPE THE FUTURE OF PUBLIC SAFETY IN BERKELEY

Apply to join the Re-Imagining Public Safety Task Force

Berkeley, California (Wednesday, January 20, 2021) - Be part of Berkeley's efforts to create a new paradigm for public safety by applying to serve on a Task Force that will oversee the development of a plan to restructure the City's approach to violence prevention, crisis intervention, policing, and community safety.

Supported by consultants from the [National Institute for Criminal Justice Reform](#), the task force will serve as a hub for community engagement around the City's efforts to "reimagine public safety." Work will include holding public meetings, hearing testimony from community members, and providing input on new or redesigned programs and initiatives that will support an equitable, community-centered, anti-racist model of public safety.

The bulk of this work will take place in spring and summer of 2021, though terms of service may be extended beyond this date.

Community application process ensures those most impacted are included

Fourteen Task Force members are being appointed by elected officials, select City Commissions, and community stakeholder organizations. This group will then select three additional "at-large" members from a pool of applicants, looking specifically to fill gaps in representation or knowledge among appointed members.

They'll be seeking people active in the Berkeley community who can bring subject expertise in relevant topics or speak from their own experience as a member of a historically marginalized or impacted community, using [criteria identified by the City Council](#).

Representation from impacted communities might include victims of violent crime, formerly incarcerated individuals, or people experiencing homelessness. For subject expertise, they'll be looking to ensure the Task Force includes members with experience in violence prevention, youth services, crisis intervention, restorative justice, public health, law enforcement, and municipal budgeting.

How to apply

[Download the application](#) and submit the completed form by email to commission@cityofberkeley.info or mail it to:

City Clerk Department
2180 Milvia Street, 1st Floor
Berkeley, CA 94704

You'll be asked to provide contact and demographic information, two references, and a written statement explaining how your background qualifies you to serve on the Task Force.

Applications are due by Monday, February 8, 2021. Three at-large members will be selected from those who applied by the appointed Task Force members and confirmed by the City Council.

Reimagining Public Safety in Berkeley

The Task Force is part of a larger effort to create a new paradigm of public safety in Berkeley, which aims to re-focus Police Department work on violent and criminal matters while redirecting some funding currently spent on policing to violence prevention and diversion programs, including those targeted on domestic violence, youth outreach, mental health, housing and homeless services, and restorative justice.

Other components of this initiative, passed as an omnibus package by the City Council in the summer of 2020, include:

- a pilot program to reassign non-criminal police service calls to a Specialized Care Unit
- creating a Department of Transportation to administer parking regulations and traffic laws
- audits of 9-1-1 calls and the Police Department budget

These efforts build on the Berkeley longstanding commitment to creating a more equitable community and support the City's Strategic Plan goals to "champion and demonstrate social and racial equity" and to "create a resilient, safe, connected, and prepared City."

March 1, 2021

To: Honorable Mayor and Members of the City Council

From: Dee Williams-Ridley, City Manager

Re: Update on Re-Imagining Public Safety

On July 14, 2020, City Council adopted an omnibus package to re-imagine public safety and policing in the City of Berkeley. The omnibus package consisted of numerous elements including, but not limited to the following:

- Having the City Auditor perform an analysis of City's emergency 9-1-1 calls-for-service and responses, as well as analysis of the Berkeley Police Department's (BPD) budget.
- Analyzing and developing a pilot program to re-assign non-criminal police service calls to a Specialized Care Unit.
- Creating plans and protocols for calls for service to be routed and assigned to alternative preferred responding entities and consider placing dispatch in the Fire Department or elsewhere outside the Police Department.
- Analyzing litigation outcomes and exposure for city departments in order to guide the creation of City policy to reduce the impact of settlements on the General Fund.
- Engaging a qualified firm(s) or individual(s) to lead a robust, inclusive, and transparent community engagement process with the goal of achieving a new and transformative model of positive, equitable and community-centered safety for Berkeley.
- Pursuing the creation of a Berkeley Department of Transportation ("BerkDoT") to ensure a racial justice lens in traffic enforcement and the development of transportation policy, programs and infrastructure, and identify and implement approaches to reduce and/or eliminate the practice of pretextual stops based on minor traffic violations

Subsequent to the adoption of the omnibus package, the City established a multi-department working group to oversee and implement various components of the package. The working group consists of the following:

- City Manager;
- Deputy City Managers;
- City Attorney;
- Fire Chief;

- Health, Housing and Community Services (HHCS) Director;
- Human Resources Director;
- Police Chief; and
- Public Works Director.

We have established weekly meetings and have developed an organizational structure that will enable us to advance the various referrals in the omnibus package at the same time.

Our work to advance the omnibus package has been organized in the following manner:

- HHCS Director, Lisa Warhuus, is leading the work to develop a Specialized Care Unit pilot program.
- Fire Chief, David Brannigan, is leading the work to develop a plan for priority dispatching.
- City Attorney, Farimah Brown, is managing the analysis of litigation claims and settlements.
- The Public Safety / Police Re-Imagining and community engagement process will be led by Deputy City Manager David White. Deputy City Manager White will also be supporting the City Manager by providing overall project management support to the team.
- BerkDoT will be led by our Public Works Director, Liam Garland.

Current Updates (for the February 23, 2021 City Council Meeting)

The following provides a brief overview of what has been accomplished since the last update to City Council on February 9, 2021.

- City Auditor calls-for-service and budget analysis
 - City staff continue to meet with the City Auditor to coordinate and respond to any questions or needs that arise.
- Priority Dispatching
 - No new updates at this time. For the latest update, please see the [February 10, 2021 Reimagining Public Safety Update](#)¹.

¹ https://www.cityofberkeley.info/uploadedFiles/Clerk/Level_3_-_General/Reimagining%20Public%20Safety%20Update%20021021.pdf.

- Specialized Care Unit (SCU)
 - No new updates at this time. For the latest update, please see the [February 10, 2021 Reimagining Public Safety Update](#)².
- Analysis of Claims and Settlements
 - No updates to report.
- Public Safety and Police Re-imagining Community Engagement
 - On December 15, 2020, the City Council authorized the City Manager to enter into a contract with the [National Institute of Criminal Justice Reform](#) (NICJR) to conduct research, analysis, and use its expertise to develop reports and recommendations for community safety and police reform as well as plan, develop, and lead an inclusive and transparent community engagement process to help the City achieve a new and transformative model of positive, equitable and community-centered safety for Berkeley.
 - City staff from the City Manager's Office are meeting regularly with NICJR to coordinate project implementation.
 - NICJR has been meeting with the City Auditor to collaborate and coordinate on the calls-for-service analysis, is in the process of developing a project website and is developing the initial report on new and emerging models of community safety and policing. In addition to that, at the next Task Force meeting, NICJR will provide an overview of its contract and discuss its approach to community engagement.
 - [Reimagining Public Safety Task Force \(Task Force\)](#)³
 - (Enabling legislation for background only) On January 19, 2021, the City Council adopted [revisions to the enabling legislation for the Reimagining Public Safety Task Force](#)⁴.
 - The first meeting of the Task Force occurred on February 18, 2021. All fourteen (14) members of the Task Force were present. There were two action items on the agenda:
 - ◆ Selection of temporary chair. The Task Force selected Nathan Mizell to serve as Temporary Chair.

⁴ https://www.cityofberkeley.info/Clerk/City_Council/2021/01_Jan/Documents/2021-01-19_Item_18_Revisions_to_Enabling_Legislation_for_Reimagining.aspx

- ♦ Appointment of “At-Large” members to the Task Force. The Task Force selecting three individuals to serve as “At-Large” Task Force members:
 - Alex Diaz
 - Frances Ho
 - Liza Lutzker

Pursuant to the enabling legislation, these appointments are subject to City Council confirmation and will be presented to the City Council at the March 9, 2021 City Council meeting.

- The Task Force will next convene in March 2021 and a date is being finalized.
- BerkDoT
 - Staff presented to, and received input from, the Transportation Commission on BerkDoT. The staff report is listed as item B-1 on the [Transportation Commission Agenda](#)⁵ from February 18, 2021, and the presentation is attached.
 - At the Transportation Commission, staff discussed three possible approaches to City Council’s request to pursue a BerkDoT, shared analysis and information on the shifting of nearly 100 positions and up to \$50M in budget to a new BerkDoT under any of the three approaches, proposed two approaches to building a racial justice lens into the organization, and identified various short- and long-term actions. Staff is incorporating input from the Transportation Commission before returning to the Public Works Commission for input on March 4, 2021.
 - Staff continues to meet in an interdepartmental team every two weeks, consult with stakeholders regularly, and utilize consultants to help learn and apply lessons from other contexts.

Evaluating the Approaches

Racial Justice: Do any of these approaches uniquely advance our transportation policy, programs, and infrastructure to advance racial justice and equity?

Mission/Vision: Do any of the options present an opportunity clarify departmental mission or advance strategic priorities?

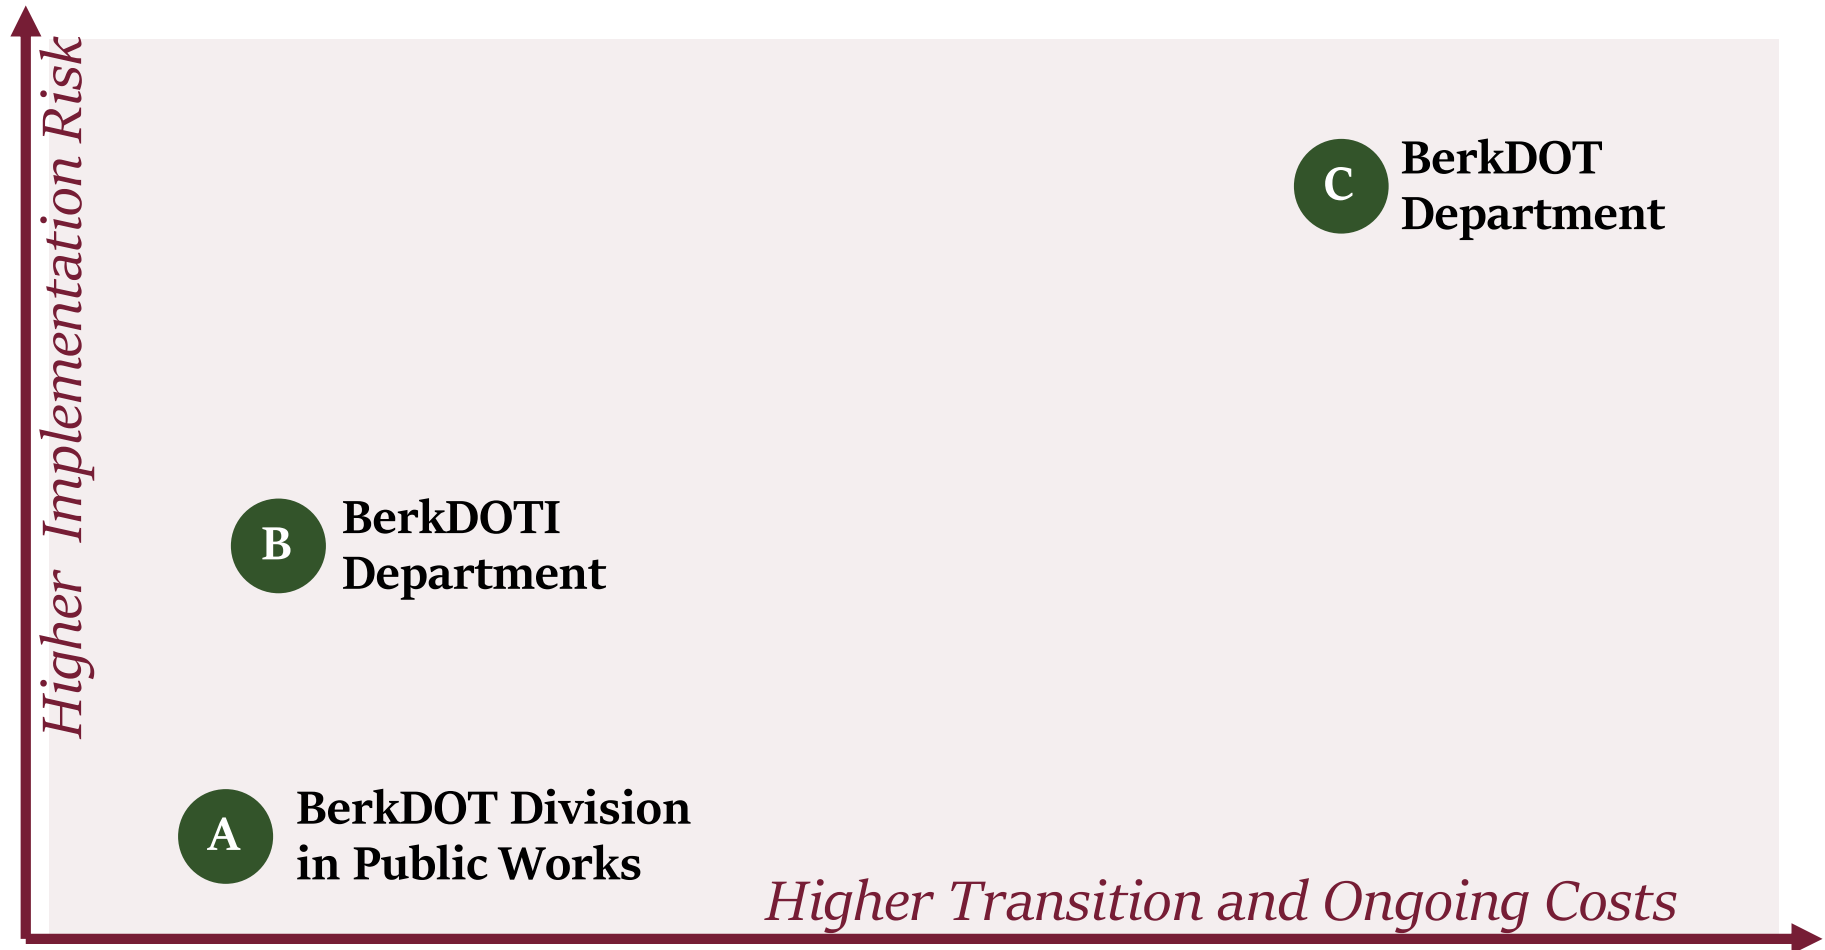

Prioritization/Coordination: Which approach balances these two important principles?

Shifting Functions: Do any of these approaches facilitate function shifting well?

Costs and Implementation Risk...

Evaluating the Approaches: Implementation Risk & Transition Costs

Functional Considerations & Opportunities

Current Police Function

Considerations & Opportunities

New Unarmed Traffic Unit

Subject to state law and City Council’s addressing Fair & Impartial Policing Working Group’s recommendations

Crossing Guards

3.7 FTEs = 15 part timers, possible FY 21/22

Parking Enforcement

24 FTEs, possible FY 22/23

Paving

2.5 FTEs....could be other PW functions, possible FY 22/23

Collision Investigation

Need an additional FTE for Vision Zero work

Traffic Control

Parking enforcement officers, sworn officers, PW staff

Functional Considerations & Opportunities

~100 positions,
\$50M

Racial Justice Lens

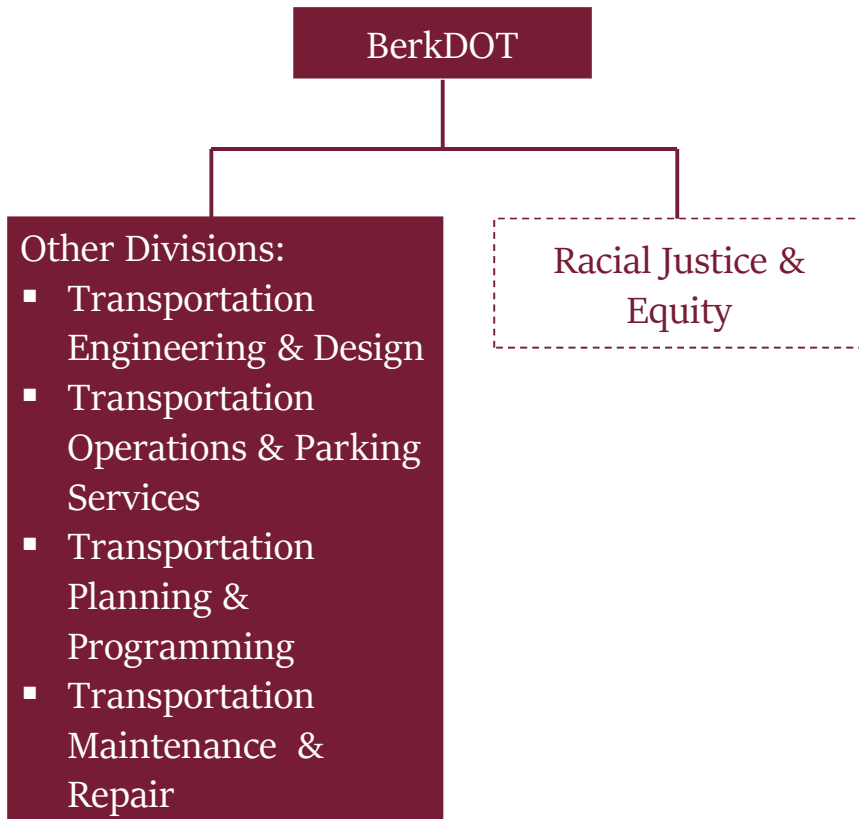

Working Definition

Ensuring a racial justice lens in transportation policy, programs, and infrastructure would mean that all decisions, procedures, and guidelines that govern transportation in this City would affirmatively work to reduce the burdens of racial inequities and mitigate structural harm put on people of color, and create streets where people are safe, experience belonging, and can thrive.

Racial Justice Lens in the Organizational Structure

A Racial Justice & Equity Division within BerkDOT

B Deputy Director of Transportation, Racial Justice, & Equity

Near-Term and Long-Term Actions

Near-Term

1. Determine the appropriate BerkDOT structure from the three organizational approaches above.
2. Determine what, if any, additional functions should be moved to whichever BerkDOT approach is determined. These functions could include:
 - A. Moving crossing guards to BerkDOT to focus on safe routes to school and Vision Zero,
 - B. Moving the Parking Enforcement function and staff into BerkDOT,
 - C. Shifting paving functions from the Engineering Division to BerkDOT, and
 - D. Adding staff to BerkDOT to improve collision investigation and Vision Zero efforts.
3. Clarify the preference for where the Racial Justice and Equity functions sit:
 - A. Within BerkDOT as a division,
 - B. Within BerkDOT assigned to a deputy director position with possible support from a specialist.

Near-Term and Long-Term Actions

Long-Term

1. Continue to support, advocate, and plan for state law changes that permit flexibility in local traffic enforcement.
2. Continue to research and develop recommendations on traffic enforcement, focus stops on traffic safety (not minor violations), and distinguish between major and minor traffic violations.
3. Continue to support and advocate for state changes to allow automated enforcement, reform speed limit setting, etc.
4. Continue to explore fines, fees, and towing policies that promote racial justice and equity.

Questions for Commission Input

1. Which of the three organizational approaches to a BerkDOT align best with the City Council's referral and the City's adopted strategic and other plans?
2. What near term actions should be prioritized?
3. What areas of future research and/or due diligence should staff focus on?
4. What is missing from the analysis and possible actions to date?

Office of the City Manager

March 24, 2021

To: Honorable Mayor and Members of the City Council
From: Dee Williams-Ridley, City Manager
Re: Update on Re-Imagining Public Safety

On July 14, 2020, City Council adopted an omnibus package to re-imagine public safety and policing in the City of Berkeley. The omnibus package consisted of numerous elements including, but not limited to the following:

- Having the City Auditor perform an analysis of City's emergency 9-1-1 calls-for-service and responses, as well as analysis of the Berkeley Police Department's (BPD) budget.
- Analyzing and developing a pilot program to re-assign non-criminal police service calls to a Specialized Care Unit.
- Creating plans and protocols for calls for service to be routed and assigned to alternative preferred responding entities and consider placing dispatch in the Fire Department or elsewhere outside the Police Department.
- Analyzing litigation outcomes and exposure for city departments in order to guide the creation of City policy to reduce the impact of settlements on the General Fund.
- Engaging a qualified firm(s) or individual(s) to lead a robust, inclusive, and transparent community engagement process with the goal of achieving a new and transformative model of positive, equitable and community-centered safety for Berkeley.
- Pursuing the creation of a Berkeley Department of Transportation ("BerkDoT") to ensure a racial justice lens in traffic enforcement and the development of transportation policy, programs and infrastructure, and identify and implement approaches to reduce and/or eliminate the practice of pretextual stops based on minor traffic violations

Subsequent to the adoption of the omnibus package, the City established a multi-department working group to oversee and implement various components of the package. The working group consists of the following:

- City Manager;
- Deputy City Managers;

- City Attorney;
- Fire Chief;
- Health, Housing and Community Services (HHCS) Director;
- Human Resources Director;
- Police Chief; and
- Public Works Director.

We have established weekly meetings and have developed an organizational structure that will enable us to advance the various referrals in the omnibus package at the same time.

Our work to advance the omnibus package has been organized in the following manner:

- HHCS Director, Lisa Warhuus, is leading the work to develop a Specialized Care Unit pilot program.
- Fire Chief, David Brannigan, is leading the work to develop a plan for priority dispatching.
- City Attorney, Farimah Brown, is managing the analysis of litigation claims and settlements.
- The Public Safety / Police Re-Imagining and community engagement process will be led by Deputy City Manager David White. Deputy City Manager White will also be supporting the City Manager by providing overall project management support to the team.
- BerkDoT will be led by our Public Works Director, Liam Garland.

Current Updates (*for the March 9, 2021 City Council Meeting*)

The following provides a brief overview of what has been accomplished since the last update to City Council on February 23, 2021.

- City Auditor calls-for-service and budget analysis
 - City staff continue to meet with the City Auditor to coordinate and respond to any questions or needs that arise.
 - It is anticipated that the City Auditor will present the results of the calls-for-service analysis to the Reimagining Public Safety Task Force in April / May 2021.
- Priority Dispatching
 - The final draft of the Request for Proposal for a consultant to develop an implementation plan for prioritized dispatch is being sent to the Finance Department for release.

- Selection of a vendor will occur in late March / April 2021 with an anticipated start on or around May 1, 2021.
- The consultant will consolidate options and system needs as well as recommend a project plan and budget for implementation.
- Specialized Care Unit (SCU)
 - The steering committee, in partnership with several community members, has compiled a comprehensive list of organizations and individuals who the consultant (RDA) will include in the community engagement process.
 - RDA is working on a draft community outreach plan that includes the aforementioned organizations and individuals, and also ensures an inclusive and safe engagement process. It is anticipated that the outreach process will begin before the end of March.
 - RDA is also pulling together research conducted on effective crisis response models that do not involve police engagement.
- Analysis of Claims and Settlements
 - No updates to report.
- Public safety and Police Re-imagining Community Engagement
 - (Background) On December 15, 2020, the City Council authorized the City Manager to enter into a contract with the [National Institute of Criminal Justice Reform](#) (NICJR) to conduct research, analysis, and use its expertise to develop reports and recommendations for community safety and police reform as well as plan, develop, and lead an inclusive and transparent community engagement process to help the City achieve a new and transformative model of positive, equitable and community-centered safety for Berkeley.
 - City staff from the City Manager's Office are meeting regularly with NICJR to coordinate project implementation.
 - NICJR continues to collaborate and coordinate with the City Auditor on the calls-for-service analysis and continues to make progress on the initial report addressing new and emerging models of community safety and policing, which is anticipated to be presented to the Task Force in April/May 2021. Subsequent to the upcoming Task Force meeting, NICJR will finalize and launch the community engagement process.

- [Reimagining Public Safety Task Force \(Task Force\)](#)¹
 - (Enabling legislation for background only) On January 19, 2021, the City Council adopted [revisions to the enabling legislation for the Reimagining Public Safety Task Force](#)².
 - At the March 9, 2021 City Council meeting, the City Council will be asked to confirm the appointments of the three “At-Large” Task Force members that were appointed by the [Task Force](#)³. The three individuals recommended by the Task Force are:
 - Alex Diaz
 - Frances Ho
 - Liza Lutzker
 - The second meeting of the Task Force will occur on March 11, 2021, and the Agenda has been published and is available on the [City’s website](#)⁴. The Agenda for the upcoming meeting includes:
 - Public Safety Reimagining process overview and all the work that is being accomplished throughout the organization.
 - An overview of the National Institute for Criminal Justice Reform’s workplan.
 - An overview of the community engagement process.

In addition, the Task Force will be asked to select a regular meeting date, elect a permanent Chair and Vice Chair, and the City Attorney’s Office will be providing an overview of the Brown Act.
- BerkDoT
 - Staff presented to the Public Works Commission on [March 4](#)⁵. The staff report is listed as item 1 under the Commission’s Action Items, and the presentation is attached.
 - The attached presentation, which was previously discussed with the Transportation Commission, and revised based on their feedback, included the following:
 - Purpose and vision;

¹ <https://www.cityofberkeley.info/RIPST.aspx>.

² https://www.cityofberkeley.info/Clerk/City_Council/2021/01_Jan/Documents/2021-01-19_Item_18_Revisions_to_Enabling_Legislation_for_Reimagining.aspx

⁵ https://www.cityofberkeley.info/uploadedFiles/Public_Works/Commissions/Commission_for_Public_Works/PWC%20Agenda%20Packet%202021.3.4.pdf

- Three organizational approaches to a BerkDOT;
- Shared analysis and information on the shifting of nearly 100 positions and up to \$50M in budget to a new BerkDoT under any of the three approaches;
- Proposed two approaches to building a racial justice lens into the organization; and
- Identified various short- and long-term actions.

Several parking enforcement officers spoke under public comment and expressed their desire to stay within the Berkeley Police Department rather than transition to a new BerkDOT.

Staff will incorporate the Public Works Commission's and public speakers' input into a report shared with the Reimagining Public Safety Task Force at one of its upcoming meetings.

- Staff continues to meet in an interdepartmental team every two weeks, consult with stakeholders regularly, and utilize consultants to help learn and apply lessons from other contexts.

Public Safety Reimagining: BerkDOT

Agenda

1. Why BerkDOT
2. Timeline
3. Three Organizational Approaches
4. Assessing Functions
5. Getting Input

Why BerkDOT: Goals Beyond Transportation

1. **Racial Justice** in services, staffing, and outcomes
2. **Equitable Mobility** regardless of race, age, gender, wealth, or ability
3. **Safety** from:
 1. Traffic Violence
 2. Institutional Violence
 3. Economic Violence
4. **Public and Environmental Health**

Why BerkDOT: Structure to House New Functions

1. Consolidate existing functions from other Departments or Divisions.
2. Add functions that are not currently done anywhere in the organization.
3. Provide unified leadership with the authority and capacity to deliver all aspects of the BerkDOT vision.
4. Eliminate silos in the organization that have different goals and responsibilities, but which rely on each other for success.
5. Keep what is working.

Racial Justice Lens

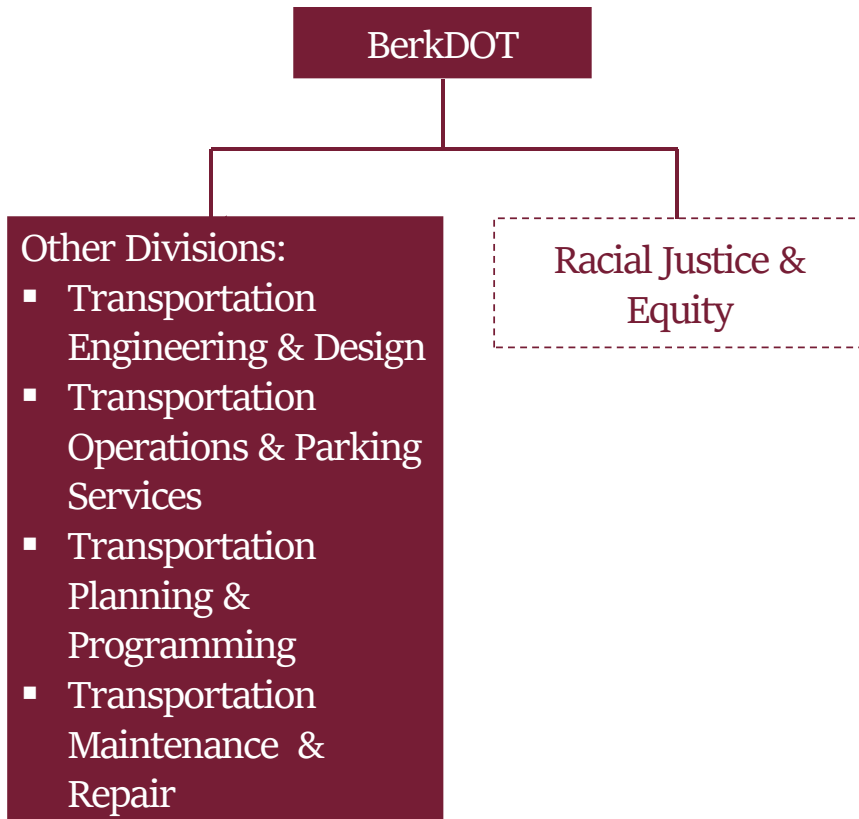

Working Definition

Ensuring a racial justice lens in transportation policy, programs, and infrastructure would mean that all decisions, procedures, and guidelines that govern transportation in this City would affirmatively work to reduce the burdens of racial inequities and mitigate structural harm put on people of color, and create streets where people are safe, experience belonging, and can thrive.

Racial Justice Lens in the Organizational Structure

A Racial Justice & Equity Division within BerkDOT

B Deputy Director of Transportation, Racial Justice, & Equity

Near-Term and Long-Term Actions

Near-Term

1. Determine near term actions Public Works and Transportation can take to advance racial justice and equity. Explain what this means for our transportation work's mission, vision, programs, projects, and services
2. Clarify the preference for where the Racial Justice and Equity functions sit:
 - A. Within BerkDOT as a division,
 - B. Within BerkDOT assigned to a deputy director position with possible support from a specialist.
3. Determine what, if any, additional functions should be moved to whichever BerkDOT approach is determined.
4. Continue to support, advocate, and plan for state law changes that permit flexibility in local traffic enforcement (civilian unit, automated enforcement).
5. Determine the appropriate BerkDOT structure from the three organizational approaches above.

Near-Term and Long-Term Actions

Long-Term

1. Continue to research and develop recommendations on traffic enforcement, focus stops on traffic safety (not minor violations), and distinguish between major and minor traffic violations.
2. Continue to support and advocate for state changes to allow automated enforcement, reform speed limit setting, etc.
3. Continue to explore fines, fees, and towing policies that promote racial justice and equity.

Questions for Commission Input

1. What near term actions should be prioritized?
2. What areas of future research and/or due diligence should staff focus on?
3. What is missing from the analysis and possible actions to date?
4. Which of the three organizational approaches to a BerkDOT align best with the City Council's referral and the City's adopted strategic and other plans?

Office of the City Manager

April 13, 2021

To: Honorable Mayor and Members of the City Council
From: Dee Williams-Ridley, City Manager
Re: Update on Re-Imagining Public Safety

On July 14, 2020, City Council adopted an omnibus package to re-imagine public safety and policing in the City of Berkeley. The omnibus package consisted of numerous elements including, but not limited to the following:

- Having the City Auditor perform an analysis of City's emergency 9-1-1 calls-for-service and responses, as well as analysis of the Berkeley Police Department's (BPD) budget.
- Analyzing and developing a pilot program to re-assign non-criminal police service calls to a Specialized Care Unit.
- Creating plans and protocols for calls for service to be routed and assigned to alternative preferred responding entities and consider placing dispatch in the Fire Department or elsewhere outside the Police Department.
- Analyzing litigation outcomes and exposure for city departments in order to guide the creation of City policy to reduce the impact of settlements on the General Fund.
- Engaging a qualified firm(s) or individual(s) to lead a robust, inclusive, and transparent community engagement process with the goal of achieving a new and transformative model of positive, equitable and community-centered safety for Berkeley.
- Pursuing the creation of a Berkeley Department of Transportation ("BerkDoT") to ensure a racial justice lens in traffic enforcement and the development of transportation policy, programs and infrastructure, and identify and implement approaches to reduce and/or eliminate the practice of pretextual stops based on minor traffic violations

Subsequent to the adoption of the omnibus package, the City established a multi-department working group to oversee and implement various components of the package. The working group consists of the following:

- City Manager;
- Deputy City Managers;

- City Attorney;
- Fire Chief;
- Health, Housing and Community Services (HHCS) Director;
- Human Resources Director;
- Police Chief; and
- Public Works Director.

Weekly coordinating meetings have been established, as well as an organizational structure that will enable city staff to advance the various referrals in the omnibus package at the same time.

Our work to advance the omnibus package has been organized in the following manner:

- HHCS Director, Lisa Warhuus, is leading the work to develop a Specialized Care Unit pilot program.
- Fire Chief, David Brannigan, is leading the work to develop a plan for priority dispatching.
- City Attorney, Farimah Brown, is managing the analysis of litigation claims and settlements.
- The Public Safety / Police Re-Imagining and community engagement process will be led by Deputy City Manager David White. Deputy City Manager White will also be supporting the City Manager by providing overall project management support to the team.
- BerkDoT will be led by our Public Works Director, Liam Garland.

Current Updates (for the March 30, 2021 City Council Meeting)

The following provides a brief overview of what has been accomplished since the last update to City Council on March 9, 2021.

- City Auditor calls-for-service and budget analysis
 - City staff continue to meet with the City Auditor to coordinate and respond to any questions or needs that arise.
 - It is anticipated that the City Auditor will present the results of the calls-for-service analysis to the Reimagining Public Safety Task Force at a special meeting of the Task Force on April 29, 2021.
- Priority Dispatching
 - No new updates at this time.

- Specialized Care Unit (SCU)
 - The steering committee convened on March 23, 2021, to review the detailed project plan and timeline developed by Resource Development Associates (RDA), review an extensive list of stakeholder groups to reach out to, and to finalize core questions that will be asked in the community engagement process.
 - RDA is developing a landing page on its website where the public will be able to access information about the SCU, sign up for participation in community engagement meetings, and access multiple ways in which they can participate.
 - Representatives of the SCU project met with the Police Re-imagining consultant NICJR to coordinate their outreach plans to reduce duplication of effort and to honor and respect the time and wisdom of community members providing input.
- Analysis of Claims and Settlements
 - No updates to report.
- Public safety and Police Re-imagining Community Engagement
 - (Background) On December 15, 2020, the City Council authorized the City Manager to enter into a contract with the [National Institute of Criminal Justice Reform](#) (NICJR) to conduct research, analysis, and use its expertise to develop reports and recommendations for community safety and police reform as well as plan, develop, and lead an inclusive and transparent community engagement process to help the City achieve a new and transformative model of positive, equitable and community-centered safety for Berkeley.
 - City staff from the City Manager’s Office are meeting regularly with NICJR with a focused effort on coordinating the various elements of the reimagining public safety initiative that are being implemented throughout the organization.
 - NICJR and their team has developed an initial draft community survey that is being reviewed by city staff. It is anticipated that the community survey will be reviewed and discussed at the upcoming meeting of the Reimagining Public Safety Task Force that is scheduled for April 8, 2021. Once the survey is completed, there will be a strong push to solicit input from the entire community and City Council will be asked to help promote the survey.
 - NICJR is also making progress on their initial report addressing new and emerging models of community safety and policing, which is anticipated to be presented to the Task Force at a special meeting on April 29, 2021.

- [Reimagining Public Safety Task Force \(Task Force\)](#)¹
 - (Enabling legislation for background only) On January 19, 2021, the City Council adopted [revisions to the enabling legislation for the Reimagining Public Safety Task Force](#)².
 - City staff assigned to the Task Force have been reaching out to each Task Force member and scheduling time for formal introductions, to understand their priorities/interests, to discuss the roles and responsibilities of the Task Force, and to address any questions that have arisen in early meetings of the Task Force.
 - In response to questions and concerns raised in these meetings, at the April 8, 2021 Task Force meeting, city staff will present for discussion purposes a schedule of upcoming meetings over the next few months and a document designed to facilitate a discussion on the pivotal role of the Task Force in the reimagining public safety process.
- With respect to the Task Force, their last meeting occurred on March 11, 2021. The minutes from the meeting along with video from the meeting is available on the City's [website](#)³. At the March 11, 2021, meeting, the Task Force took the following action / discussed the following items:
 - Selected a Chair and Vice Chair. Nathan Mizell was selected as the Chair and boon cheema was selected as the Vice Chair.
 - Established the 2nd Thursday of the month as a regular meeting date.
 - Discussed a presentation providing an overview of the Public Safety Reimagining process, which has been attached.
 - Discussed the National Institute for Criminal Justice Reform's contract and scope of work. NICJR's presentation has been attached.
 - Received and discussed a presentation on the community engagement process, which has been attached.
- BerkDoT
 - No new updates at this time.

Re-Imagining Public Safety

Interdepartmental Coordination

Residents of Berkeley

Mayor & City Council

City Manager

NICJR

Re-Imagining Public Safety Task Force

Council Appt.'s (9)

PRC

Youth Commission

Mental Health

BCSC

ASUC

At-Large (3)

Task Force Purpose:

- Serve as the hub for a broad, deep and representative process
- Uplift the community's input into a new positive, equitable, anti-racist system of community safety

Task Force Work:

- Review calls for service analysis
- Provide input /participate in community engagement
- Discuss new and emerging models of community safety
- Shape / provide input into recommendations that go to City Council
- Review / provide input on Final Report & Implementation Plan

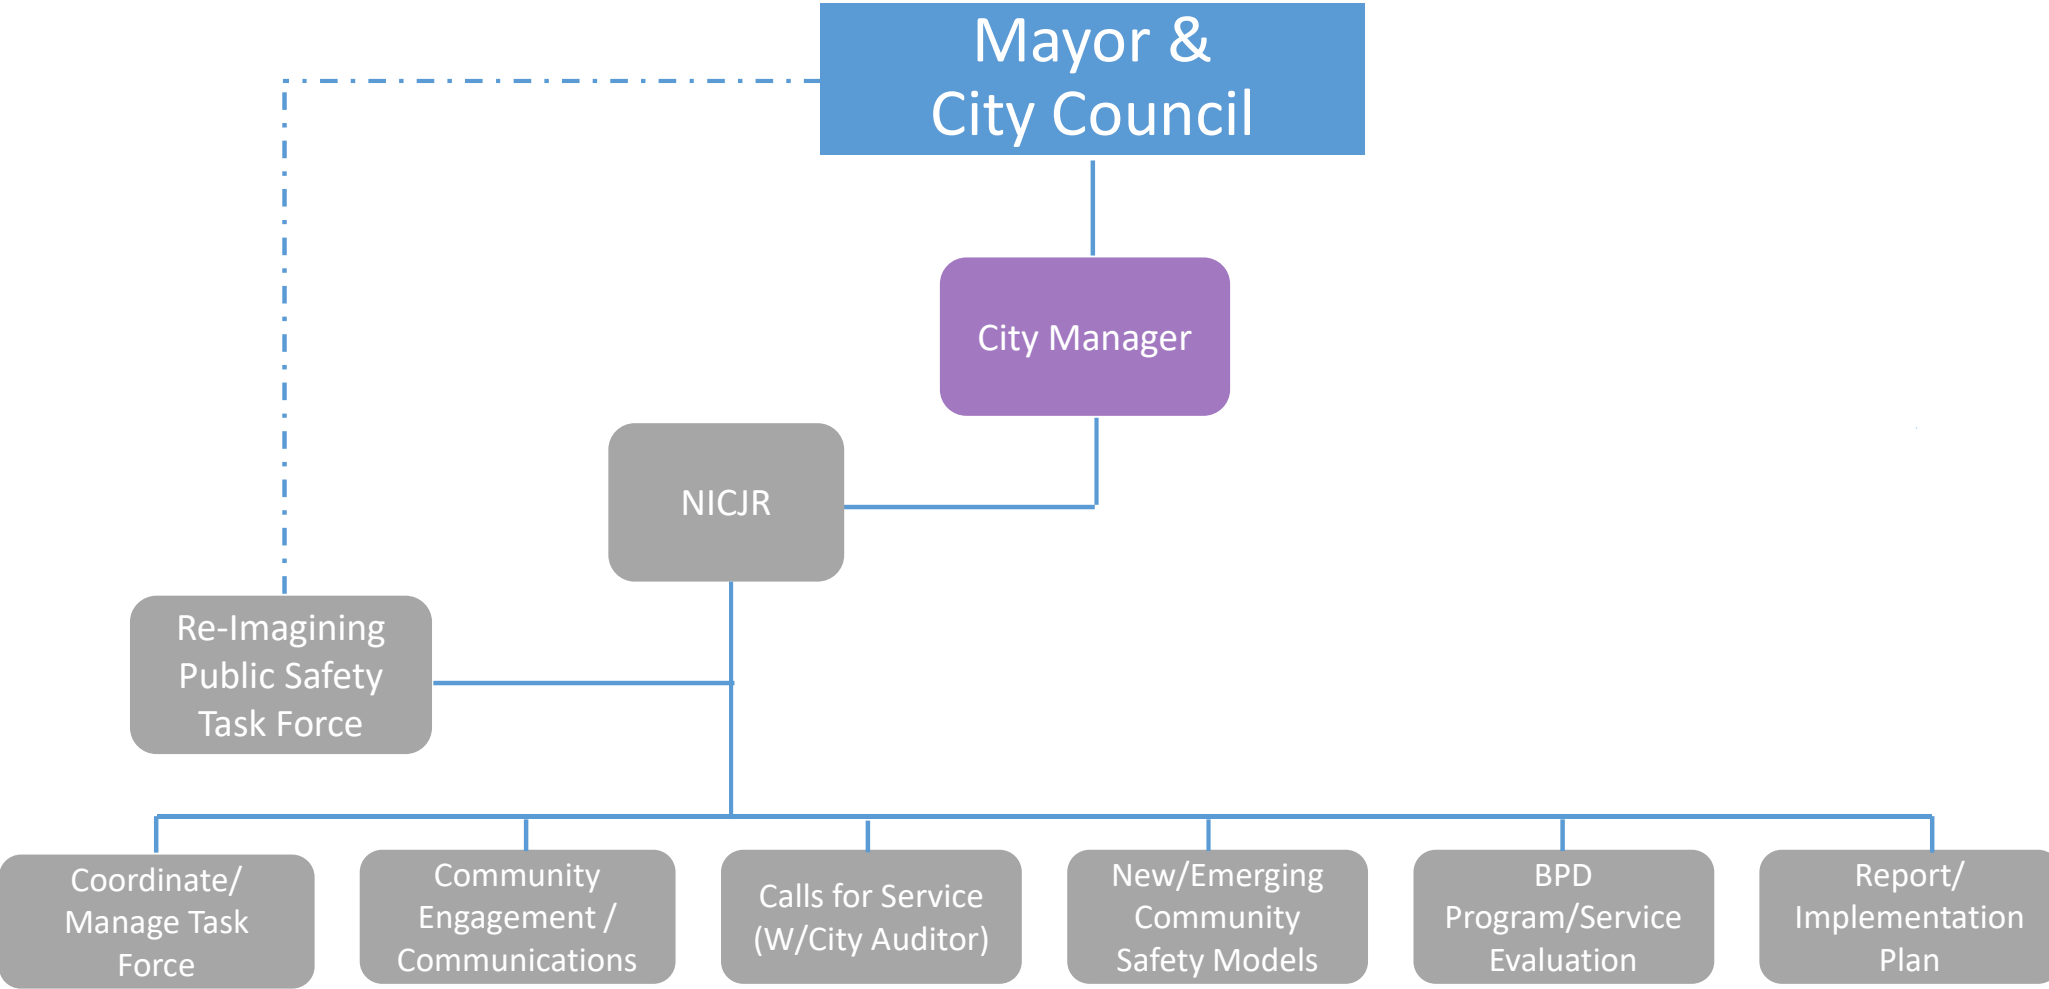

National Institute for Criminal Justice Reform (NICJR)

Purpose:

Manage and Lead a Community Engagement Process to Develop a New Paradigm of Public Safety in Berkeley

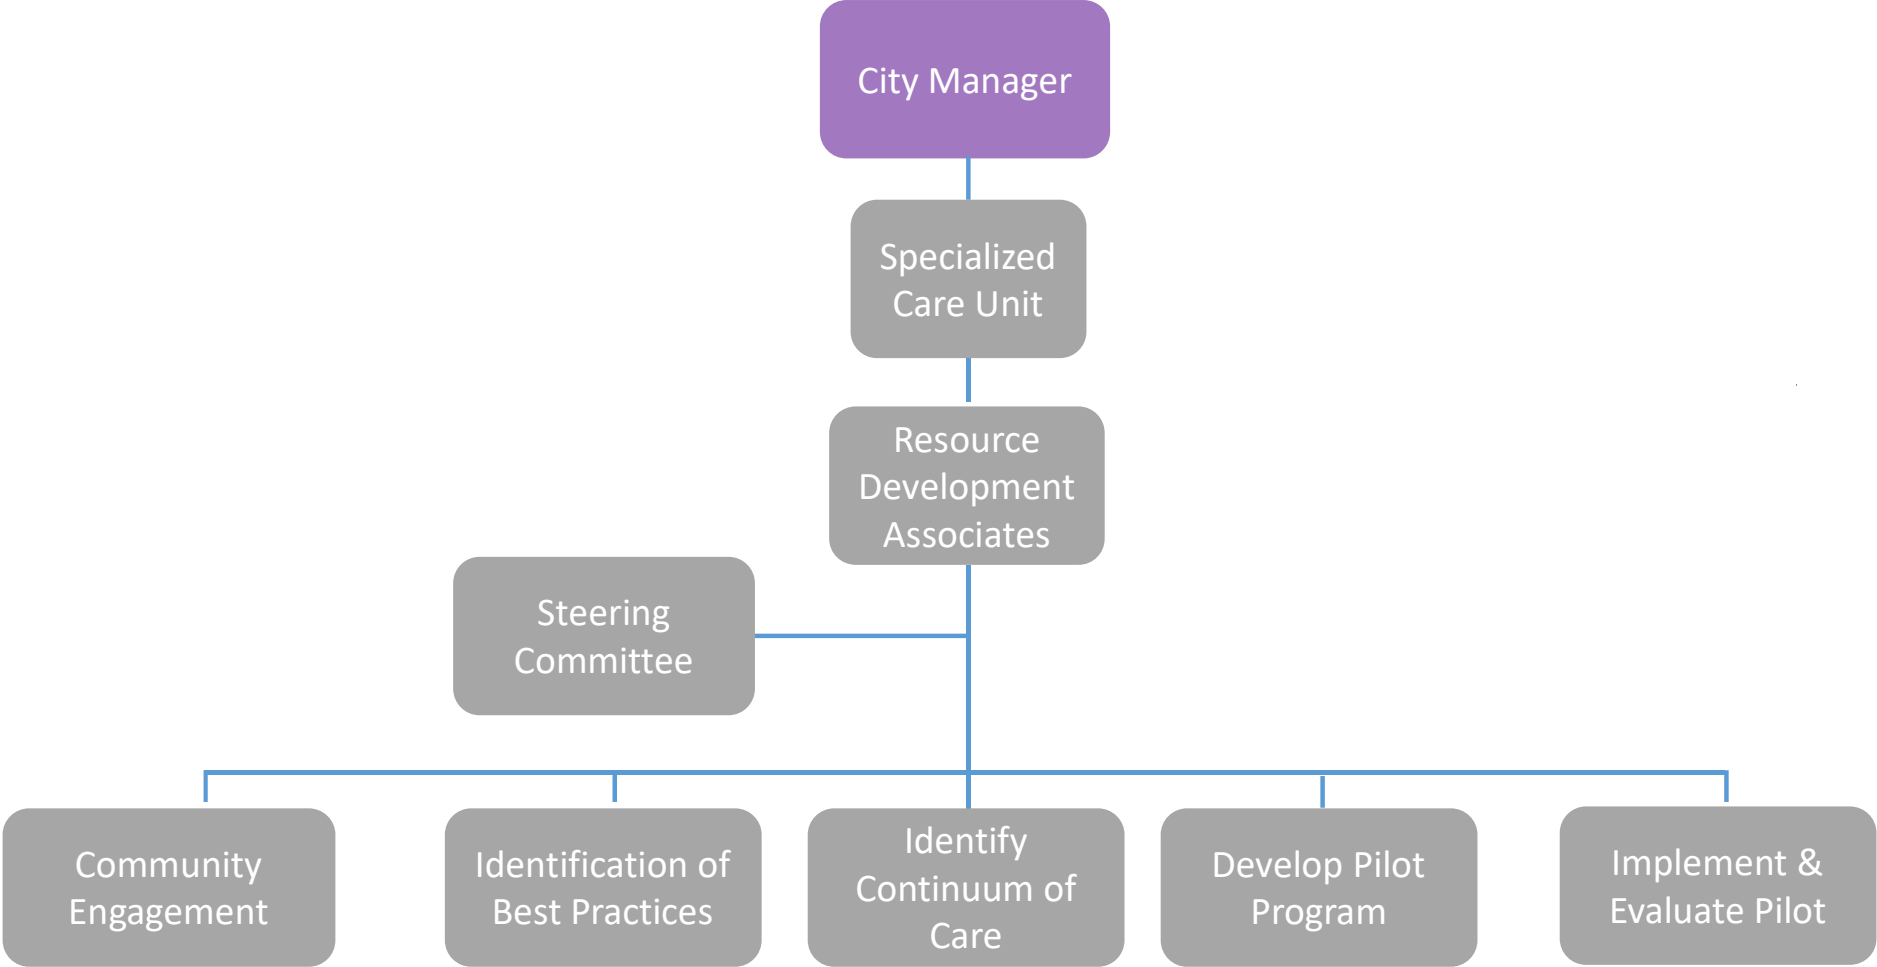

NICJR's work includes:

- Coordinate and manage the Re-Imagining Public Safety Task Force
- Calls for Service Analysis (*in collaboration with the City Auditor*)
- Research new and emerging models of community safety
- Coordinate with the City Manager's Office for administrative assistance and organizational point of contact
- Develop and implement a communications strategy to ensure that the community is well informed
- Design and lead a robust community engagement process
- Identify programs and/or services that are currently provided by the Berkeley Police Department that can be provided by other City departments and / or organizations
- Final report and Implementation Plan

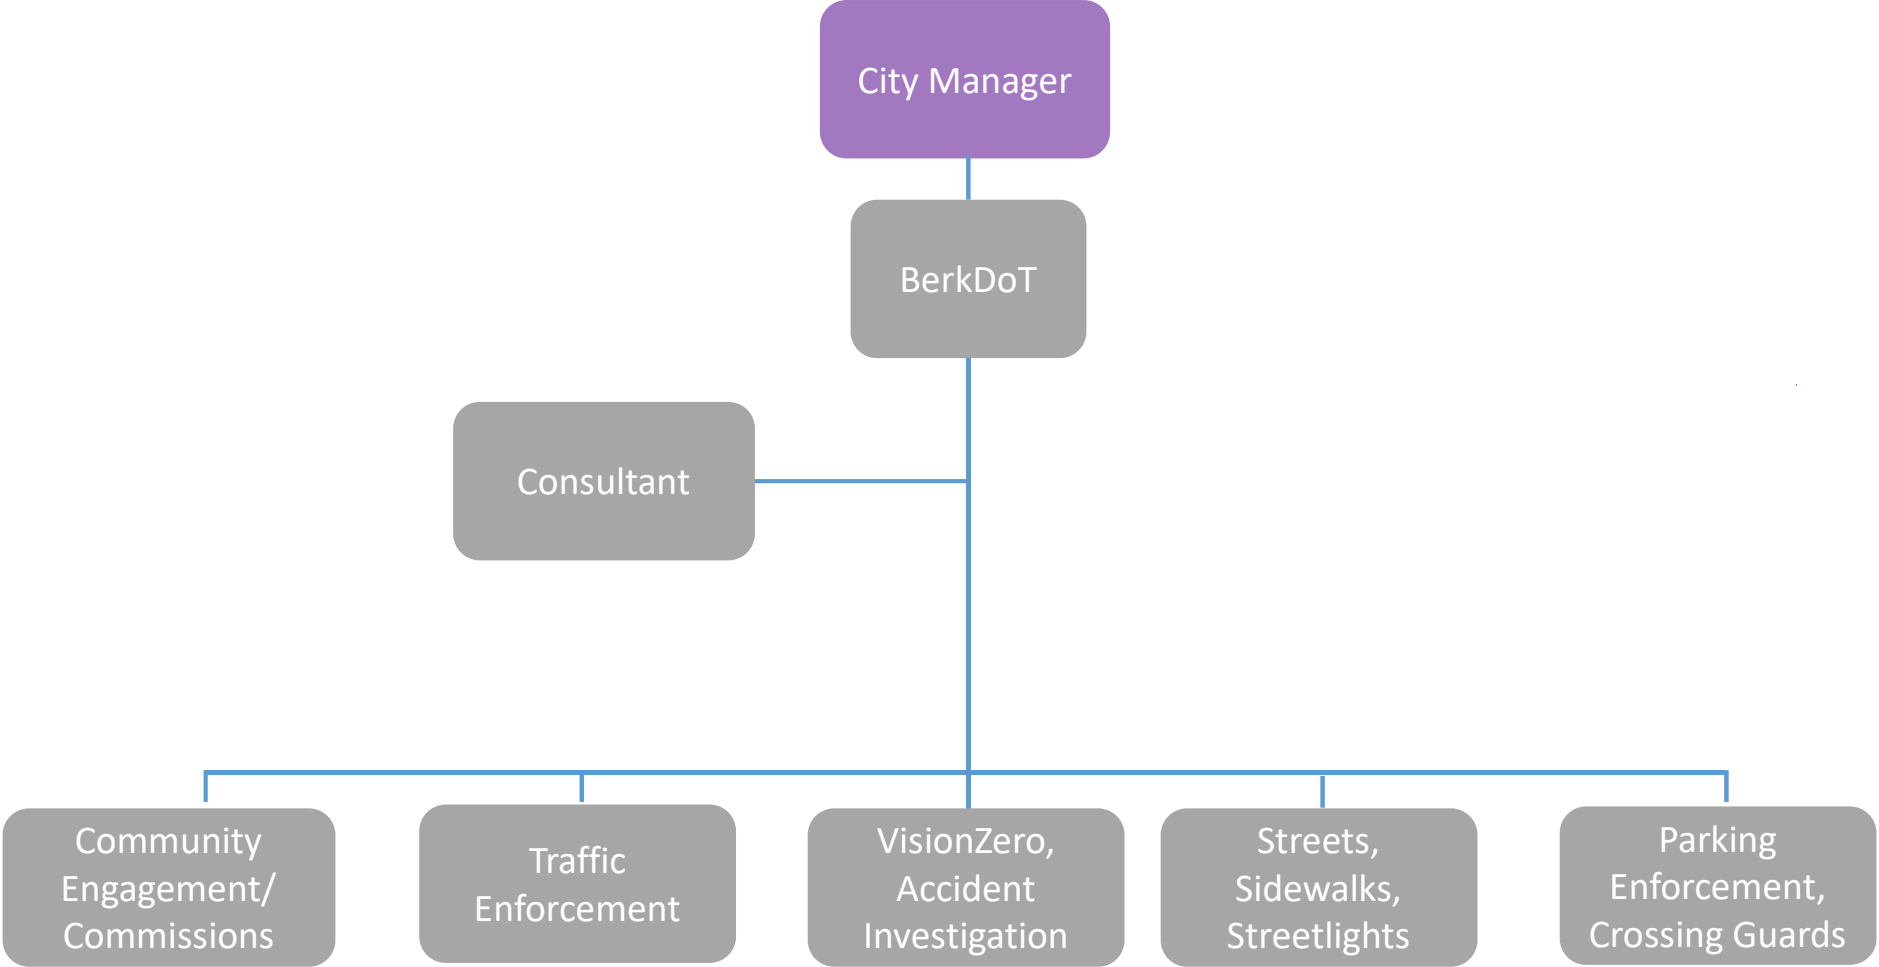

Specialized Care Unit

- Analyze and develop a pilot program to re-assign non-criminal police service calls to a Specialized Care Unit (SCU)
- Analyze the current mental health crisis system, engage community members in visioning an improved system, research best practice models and gather local data
- Develop a pilot model that will inform long term implementation of the program

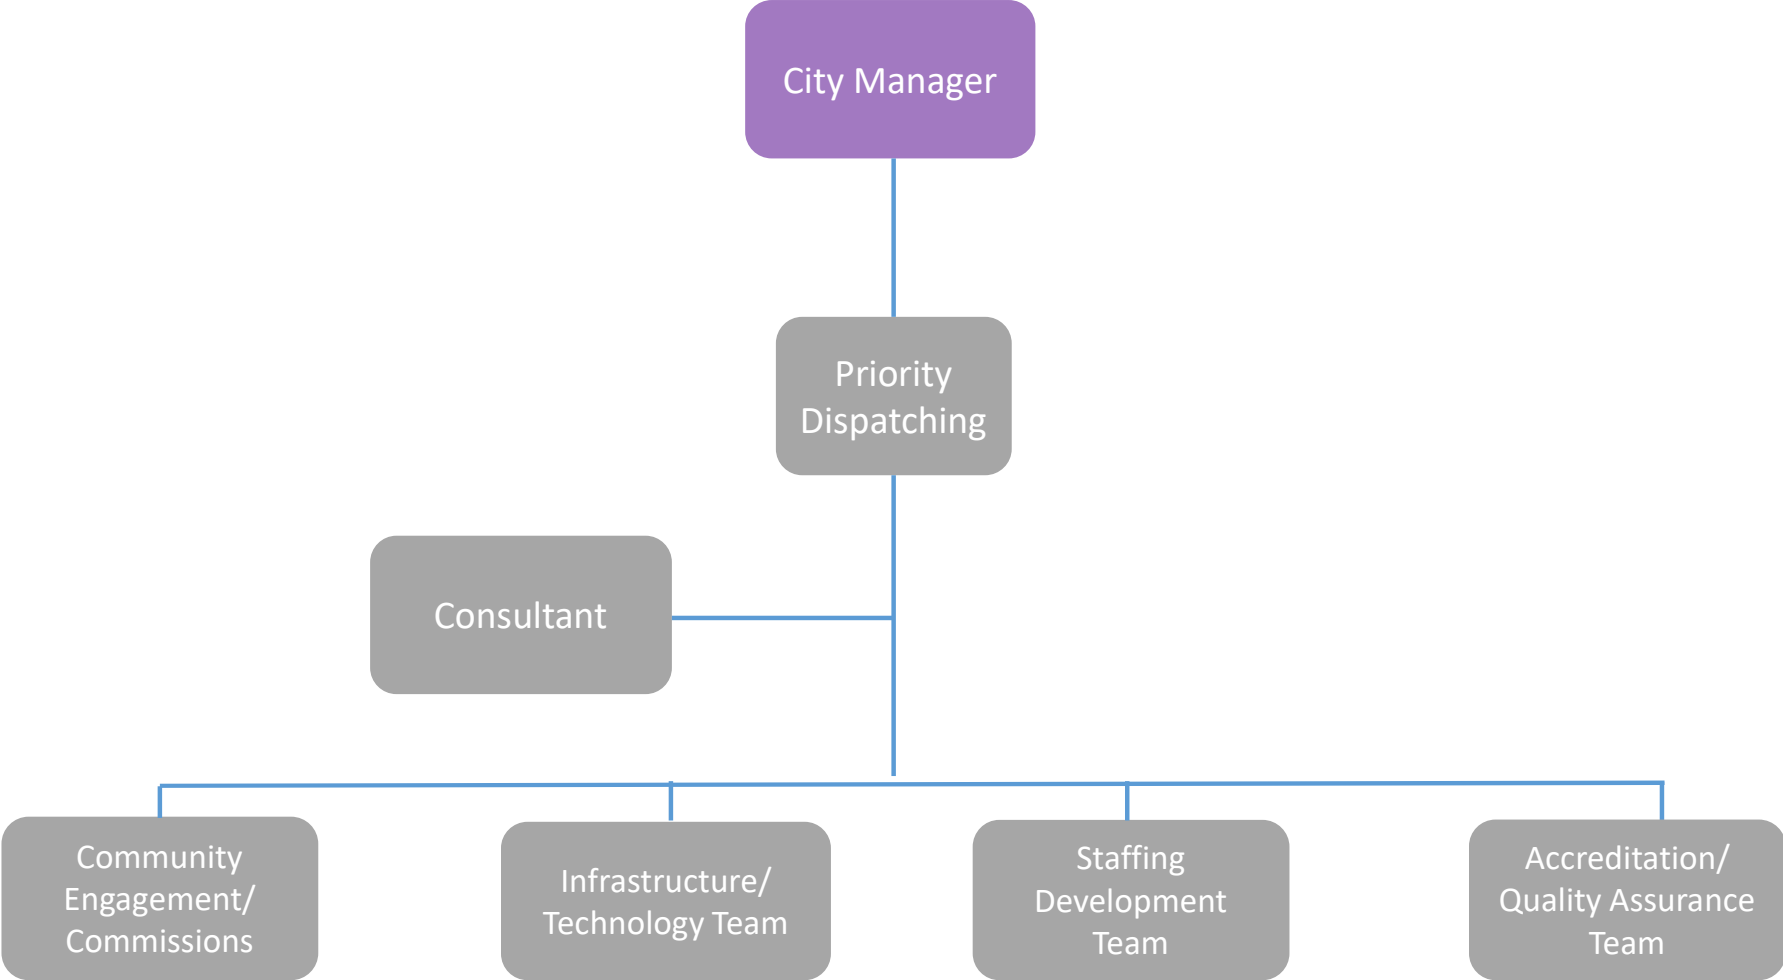

BerkDoT

- Pursue a Department of Transportation (BerkDoT) centered around a racial justice lens in traffic enforcement and the development of transportation policy, programs, & infrastructure
- Consider optimum placement of the following functions:
 - Parking enforcement
 - Traffic enforcement
 - Accident investigation
 - Crossing guards
 - Vision zero/traffic safety
 - Transportation/street planning/projects
- Identify & implement approaches to reduce and/or eliminate the practice of pretextual stops based on minor traffic violations

Priority Dispatching

- Create plans and protocols for emergency/911 dispatch to send calls to the preferred responding entity
- Consider placing dispatch in the Fire Department or elsewhere outside the Police Department
- Achieve required accreditation for Emergency Medical Dispatch
- Create Continuous Quality Assurance/Improvement and training plans and protocols

Budget Overview

		Total Allocated
National Institute for Criminal Justice Reform		\$270,000
Resource Development Associates		185,000
Claims / Settlements Analysis		25,000
BerkDoT		75,000
Priority Dispatching		
Overtime		33,800
Consultant Services		50,000
Total		\$638,800

Reimagining Public Safety in **BERKELEY?**

Our Team

BYA

Pastor Michael Smith

Pastor Michael McBride

Why the NICJR Team

We have significant expertise and experience in **public safety initiatives**, **community outreach and engagement**, **police reform**, **legal analysis**, **government budgeting and relations**, and various other relevant areas.

Reimagining Public Safety Experience

- ✓ NICJR is the co-facilitator of the Oakland Reimagining Public Safety Taskforce
- ✓ NICJR was a consultant for the City of Fresno's Commission on Police Reform and wrote the Commission's final report
- ✓ NICJR is working with the cities of Oakland, Stockton, Portland, Indianapolis, and Washington, DC on violence reduction and police reform initiatives

BRG APPROACH TO COMMUNITY ENGAGEMENT

- **To evoke empathy** for the lived experience of program participants and communities among public systems, funders and decision-makers
- To create **forums for impacted communities to influence government** decisions
- To equip decision-makers with a **more fact-based understanding** of the lived experience, preferences, needs and priorities of target populations
- To support decision-makers in **aligning investments and initiatives with community needs** and preferences
- To inform program participants and communities of **funder priorities, constraints and process**

Our Work

-  911/Calls for Service Analysis with the City Auditor
-  Facilitate Reimagining Public Safety Taskforce
-  Best Practices & Emerging Models of Community Safety and Policing
-  Alternatives Responses
-  Community Engagement
-  Final Report Implementation Plan

Timeline

CITY OF BERKELEY REIMAGINING PUBLIC SAFETY

QUESTIONS?

Office of the City Manager

April 28, 2021

To: Honorable Mayor and Members of the City Council
From: Dee Williams-Ridley, City Manager
Re: Update on Re-Imagining Public Safety

On July 14, 2020, City Council adopted an omnibus package to re-imagine public safety and policing in the City of Berkeley. The omnibus package consisted of numerous elements including, but not limited to the following:

- Having the City Auditor perform an analysis of City's emergency 9-1-1 calls-for-service and responses, as well as analysis of the Berkeley Police Department's (BPD) budget.
- Analyzing and developing a pilot program to re-assign non-criminal police service calls to a Specialized Care Unit.
- Creating plans and protocols for calls for service to be routed and assigned to alternative preferred responding entities and consider placing dispatch in the Fire Department or elsewhere outside the Police Department.
- Analyzing litigation outcomes and exposure for city departments in order to guide the creation of City policy to reduce the impact of settlements on the General Fund.
- Engaging a qualified firm(s) or individual(s) to lead a robust, inclusive, and transparent community engagement process with the goal of achieving a new and transformative model of positive, equitable and community-centered safety for Berkeley.
- Pursuing the creation of a Berkeley Department of Transportation ("BerkDoT") to ensure a racial justice lens in traffic enforcement and the development of transportation policy, programs and infrastructure, and identify and implement approaches to reduce and/or eliminate the practice of pretextual stops based on minor traffic violations

Subsequent to the adoption of the omnibus package, the City established a multi-department working group to oversee and implement various components of the package. The working group consists of the following:

- City Manager;
- Deputy City Managers;

- City Attorney;
- Fire Chief;
- Health, Housing and Community Services (HHCS) Director;
- Human Resources Director;
- Police Chief; and
- Public Works Director.

Weekly coordinating meetings have been established, as well as an organizational structure that will enable city staff to advance the various referrals in the omnibus package at the same time.

Our work to advance the omnibus package has been organized in the following manner:

- HHCS Director, Lisa Warhuus, is leading the work to develop a Specialized Care Unit pilot program.
- Interim Fire Chief, Abe Roman, is leading the work to develop a plan for priority dispatching.
- City Attorney, Farimah Brown, is managing the analysis of litigation claims and settlements.
- The Public Safety / Police Re-Imagining and community engagement process will be led by Deputy City Manager David White. Deputy City Manager White will also be supporting the City Manager by providing overall project management support to the team.
- BerkDoT will be led by our Public Works Director, Liam Garland.

Current Updates (for the April 27, 2021 City Council Meeting)

The following provides a brief overview of what has been accomplished since the last update to City Council on March 30, 2021.

- City Auditor calls-for-service and budget analysis
 - On April 22, 2021, the City Auditor's Office published their report, "[Data Analysis of the City of Berkeley's Police Response](https://www.cityofberkeley.info/uploadedFiles/Auditor/Level_3_-_General/Data%20Analysis%20of%20the%20City%20of%20Berkeley's%20Police%20Response.pdf)"¹. The report provides an overview of calls for service, officer-initiated stops, and police responses that will help inform the community engagement process around reimagining public safety in Berkeley.
 - The City Auditor will present the results of the analysis to the Reimagining Public Safety Task Force at a special meeting of the Task Force on April 29, 2021.

¹ https://www.cityofberkeley.info/uploadedFiles/Auditor/Level_3_-_General/Data%20Analysis%20of%20the%20City%20of%20Berkeley's%20Police%20Response.pdf

- Priority Dispatching
 - A Request for Proposal (RFP) was issued today (April 27, 2021) to seek proposals from qualified firms to assist the City in transitioning to a prioritized fire and medical dispatch system. More specifically, the RFP is seeking a vendor to perform a needs assessment based on trending call volume in to the dispatch center, identify products/solutions that are the best fit for the City, propose any structural changes that are necessary in the dispatch center, and write an implementation project plan. The RFP is attached.
- Specialized Care Unit (SCU)
 - The consultant, RDA, has been gathering information from City, County, and community partners involved in crisis response, as well as compiling research on crisis response systems that do not involve police.
 - RDA is poised to lead the community engagement process in May and June which will include focus groups, individual interviews, a community survey, and written feedback on a website landing page.
 - All of these tools are nearing completion and will be finalized at the beginning of next week, and outreach will begin.
 - Information to community members on how they can participate is forthcoming and will be posted on RDA's and the City's websites, as well as shared with multiple community organizations.
 - The steering committee continues to meet regularly to guide the process.
- Analysis of Claims and Settlements
 - No updates to report.
- Public safety and Police Re-imagining Community Engagement
 - (Background) On December 15, 2020, the City Council authorized the City Manager to enter into a contract with the [National Institute of Criminal Justice Reform](#) (NICJR) to conduct research, analysis, and use its expertise to develop reports and recommendations for community safety and police reform as well as plan, develop, and lead an inclusive and transparent community engagement process to help the City achieve a new and transformative model of positive, equitable and community-centered safety for Berkeley.
 - City staff from the City Manager's Office continue to coordinate regularly with NICJR and attached is a more thorough update from NICJR regarding their work with the City.

- NICJR also submitted their draft report addressing new and emerging models of community safety and policing. This will be presented to the Task Force on April 29, 2021 and has been attached.
- [Reimagining Public Safety Task Force \(Task Force\)²](#)
 - (Enabling legislation for background only) On January 19, 2021, the City Council adopted [revisions to the enabling legislation for the Reimagining Public Safety Task Force³](#).
 - The Task Force last met on April 8, 2021 and will be meeting again on April 29, 2021. Also, the Task Force has two meetings planned in May – May 13 and May 19.
 - The minutes from the April 8, 2021 meeting along with video from the meeting is available on the City's [website⁴](#). Importantly, in order to enhance the public's experience in viewing the video recording of Task Force meetings, starting with the April 8, 2021 meeting, city staff have added functionality that will enable the community to either choose to watch the entire Task Force meeting **OR** they can select what portion of the meeting or presentation that they would like to watch.
 - At the April 8, 2021 meeting, the Task Force received the following presentations from city staff and the City's consultant team:
 - Overview of planned Task Force meetings along with an outline of roles and responsibilities that aligns with the enabling legislation adopted by City Council and a set of questions for the Task Force to consider as they embark on this process.
 - Overview of priority dispatching.
 - Initial overview of the Police Department.
 - Draft Community Survey.
 - The Task Force established two subcommittees:
 - Community Engagement
 - Policing, Budget, and Alternatives to Policing

Both subcommittees have started to meet and the Community Engagement subcommittee submitted detailed input and feedback to the City to guide revisions to the community survey.

³ https://www.cityofberkeley.info/Clerk/City_Council/2021/01_Jan/Documents/2021-01-19_Item_18_Revisions_to_Enabling_Legislation_for_Reimagining.aspx

⁴ <https://www.cityofberkeley.info/RIPST.aspx>

- At the April 29, 2021 Task Force meeting, the Task Force will receive the following presentations:
 - Police Department calls for service analysis prepared by the City Auditor Office.
 - Calls for Service analysis framework that will be led by NICJR.
 - New and Emerging Models of Community Safety that will also be led by NICJR.
- BerkDoT
 - Staff are preparing a report on BerkDOT for presentation at the May 19, 2021 meeting of the Reimagining Public Safety Task Force. This report will distill the input received to date, share for discussion a phased approach to BerkDOT-related projects and activities, and solicit the Task Force's input on the approach.

Berkeley Reimagining Public Safety Process Update April 26, 2021

In accordance with the terms of its agreement with the City of Berkeley, the National Institute for Criminal Justice Reform (NICJR) is actively working to engage the Berkeley Reimagining Public Safety Task Force (RPSTF) in developing alternative models to violence reduction and public safety. Recognizing the multitude of parallel initiatives currently underway in Berkeley, NICJR is making a concerted effort to coordinate and collaborate with the agencies and departments spearheading other related efforts to ensure that all work falling under the auspices of the reimagining umbrella is aligned. It is our intention to gather relevant information and best practices from similar efforts in cities across the country and most importantly from the residents of Berkeley to strengthen the outcomes and recommendations to come from the collective work of the Task Force members.

NICJR, via its subcontractor Bright Research Group (BRG), is building a robust community engagement plan to inform the work of the RPSTF. This plan includes creating and deploying a community survey and outreach strategy with the goal of collecting responses from the most vulnerable and hard to reach populations in the City. The initial draft survey was shared with the Task Force following its April 8th meeting, which prompted the establishment of a Community Engagement Subcommittee. NICJR has received detailed feedback on the survey from the Task Force, Community Engagement Subcommittee, and City staff and is working with city staff to revise the survey accordingly. In addition to revisions based on feedback received, NICJR is developing a recommended strategy for survey composition and dissemination given a related effort included in Resource Development Associates' (RDA) contract with the City to develop a Specialized Care Unit pilot program; that contract requires RDA to issue a survey that directly speaks to the public safety reimagining work. NICJR has met with the Research Development Associates (RDA) to coordinate community outreach efforts as specifically related to individuals with mental health needs. It is anticipated that survey modifications will be completed in early to mid-May and that the survey will be disseminated shortly thereafter.

In addition to launching the survey, NICJR will host a series of listening sessions beginning in June 2021. Forums will target both the community and the Berkeley Police Department (BPD). NICJR is working with interim Police Chief Louis to organize listening sessions with both command staff and rank and file to ensure that the department is actively involved in the reimagining conversation. Each listening session will be designed to solicit the opinions, ideas, and concerns of the participants regarding public safety, police reform, and needed community services/resources. Feedback received will be compiled into a report for the Taskforce and the City Council.

The community engagement strategy also includes the development of a public Berkeley Reimagining Public Safety website that is under development. The website will contain information on the development of the Task Force and its role and responsibilities, and background material on parallel related efforts underway in the City including establishment of a pilot Specialized Care Unit/s (SCU) and BerkDOT, priority dispatching, and the recommendations from the Mayor's Fair and Impartial Policing Workgroup recently adopted by the City Council. In addition, the website will contain local and national news stories of pertinence and interest, as well as publications that may inform the work of the Task Force. The website will be regularly updated by NICJR with support from city staff. In addition, as community engagement efforts ramp up the website will include information about how to participate in the various engagement approaches contemplated.

One of the primary deliverables of the agreement between NICJR and the City of Berkeley is the completion of several reports to help guide the work of the Task Force. The first report focuses on New and Emerging Models of Public Safety. After months of extensive research, NICJR has completed a draft version entitled "New and Emerging Models of Community Safety and Policing." The report introduces emerging non-enforcement models of community safety that are already in place in cities across the United States. It also details non-law enforcement crime reduction strategies, community driven approaches to violence reduction, and cutting edge law enforcement training. NICJR will present the report to the Task Force at its meeting on April 29, 2021. Subsequent to that meeting feedback will be sought from the Task Force and City staff. A final version of the report will be submitted to the task for its May 13, 2021, meeting.

NICJR is currently conducting a detailed analysis of BPD Calls for Service. This analysis will expand upon/augment the recently issued report authored by the City Auditor and will include explicit recommendations regarding the proportion of BPD calls that should be handled by a non-law enforcement alternative. NICJR is expected to complete this analysis by June 2021.

Finally, City staff and NICJR recognize that there are multiple parallel and related efforts underway at this time in the City. On April 30, 2021, NICJR will meet with city staff from the City Manager's Office, Health, Housing, and Community Services, Fire, Police, and Public Works to discuss the Specialized Care Unit pilot that is under development, priority dispatching, and BerkDOT to ensure that all parties are aware of each other's role in Reimagining Public Safety and to collectively discuss how to integrate and align the related initiatives.

DRAFT

Introduction

As a part of the City of Berkeley's Reimagining Public Safety process, the National Institute for Criminal Justice Reform (NICJR) was commissioned to conduct an assessment of programs and models that increase safety, properly respond to emergencies, reduce crime and violence, and improve policing. The New and Emerging Models of Community Safety and Policing report has been prepared in response to that charge. NICJR submits this report to the Reimagining Public Safety Taskforce (RPSTF) for review and feedback, and to inform the RPSTF's development of recommendations for submission to the Berkeley City Council (Council) on alternative responses and police reforms.

The report comprises a brief overview of several examples of Emerging Non-Enforcement Models of Community Response; Non-Law Enforcement Crime Reduction Strategies; Community Driven Violence Reduction Strategies; and Policing Strategies. As hundreds of cities across the country engage in reimagining public safety processes and launching new programs or altering existing models, this report could not possibly be universally comprehensive; it does however provide the RPSTF and the Council with illustrative examples of key options to consider as the City of Berkeley (City) reimagines its public safety system.

NICJR's second commissioned report for the City, Alternative Responses to Law Enforcement, will draw from and build upon the new and emerging models outlined herein.

Emerging Non-Enforcement Models of Community Response

Police departments receive a large volume of 911 calls or other Calls for Service (CFS) requesting emergency response. In the past several decades policing has evolved from officers walking beats to departments primarily responding to CFS with patrol officers in squad cars. A number of new assessments of these CFS have revealed that a majority are low-level or even non-criminal in nature, like noise complaints, abandoned cars, and petty theft. Multiple analyses have estimated that less than 2 percent of CFS are for violent incidents.^{1,2} Retired Chicago police officer David Franco explains “We spend entire shifts dealing with noncriminal matters from disturbance and suspicious person calls...With so many low-level issues put on our shoulders, police cannot prioritize the serious crimes.”³

In addition to responding to a high volume of low-level and non-criminal 911 CFS, police have also been increasingly asked to respond to people experiencing mental health crises. Many of these encounters have resulted in uses of force by police, including deadly officer involved shootings. A number of the emerging examples of effective community driven crime reduction and emergency response models focus specifically on mental health incidents.

Eugene Crisis Assistance Helping Out on the Streets (CAHOOTS)

Crisis Assistance Helping Out on The Streets, or CAHOOTS, is a mobile emergency intervention service established in 1989 in Eugene, Oregon.⁴

This program is free and readily available twenty-four hours a day for mental health and other non-violent related calls.⁵ CAHOOTS is directed by the White Bird Clinic, a regional health center in partnership with the City of Eugene. Each CAHOOTS unit is comprised of an emergency medical technician (EMT) and a mental health service provider.⁶

⁵<https://www.americanprogress.org/issues/criminal-justice/reports/2019/10/02/475220/neighborhood-strengthening-public-safety-community-empowerment/>

⁶<https://www.mentalhealthportland.org/wp-content/uploads/2019/05/2018CAHOOTSBROCHURE.pdf>

CAHOOTS staff are required to go through 40 hours of classroom education and over 500 hours of field work that is supervised by a qualified guide. Their education consists of de-escalation methods and emergency response services. CAHOOTS personnel are able to perform wellness checks, offer mental health services and substance use resources, administer medical aid, and provide mediation assistance.⁷

More than 60 percent of CAHOOTS clients are experiencing homelessness and nearly 30 percent have serious mental illness. CAHOOTS received more than 24,000 calls in 2019, with the number of calls having steadily increased since the program's inception. Among all adults involved with CAHOOTS, the average age was 45.5 years.

Numerous evaluations have shown consistent, robust results with the CAHOOTS program. Many calls are diverted from the police, with CAHOOTS taking over 50 percent of non-emergent cases. This reduces a significant portion of the burden on the local police department. Between 2014 and 2017, the CAHOOTS program has saved the

Eugene Police Department approximately \$8.5 million each year. For all calls referred to CAHOOTS in 2019, only 1 percent necessitated police involvement. Furthermore, when factoring in emergency medical expenditures, the program saves Eugene's government an additional \$2.9 million every year.⁸

Several cities have explored or are currently implementing replications of CAHOOTS. In Oakland, the city is preparing to launch the Mobile Assistance Community Responders of Oakland (MACRO) initiative.⁹ The pilot program will be managed by the Oakland Fire Department and will be available twenty-four hours per day, seven days per week in two person teams. The City of Oakland has allocated an initial \$1.85 million to fund MACRO, although the Oakland Reimagining Public Safety Task Force has recently recommended that the budget be increased significantly to support the program expansion and sustainability.¹⁰

Denver Support Team Assisted Response (STAR)

Based on the CAHOOTS program in Eugene, Oregon, STAR is a community responder model created in 2020. STAR is a joint effort between many stakeholders, including the Denver Police Department (DPD), Denver's Paramedic Division, Mental Health Center of Denver, and community-based organizations. STAR provides direct, emergency response to residents of the community who are experiencing difficulties connected to mental health, poverty, homelessness, or substance use. The STAR transport vehicle operates Monday through Friday from 10 AM to 6 PM. The time frame of operation was chosen based on an analysis of CSF data.¹¹ STAR unit staff are made up of unarmed personnel, with each team including a mental health service provider and a paramedic.¹²

Before the implementation of STAR, calls to 911 were either transmitted to the DPD or the hospital system. The majority of calls (68 percent) routed to STAR concerned individuals that were experiencing homelessness. Around 41 percent of individuals who STAR had been involved with were referred to additional services by the STAR unit staff.¹³

¹¹https://wp-denverite.s3.amazonaws.com/wp-content/uploads/sites/4/2021/02/STAR_Pilot_6_Month_Evaluation_FINAL-REPORT.pdf

¹²<https://www.9news.com/article/news/denver-star-program-results-police/73-90e50e08-94c5-474d-8e94-926d42f8f41d>

In just half a year after the program was established, the STAR unit had addressed 748 calls. The DPD was never called to support the unit in responding to these CSF. Moreover, there were no arrests made in any of the calls evaluated during the initial six months of program operation. The City of Denver is planning to invest an additional \$3 million in 2021 to expand the program.

Olympia Crisis Response Unit (CRU)

Incorporating both CAHOOTS principles and crisis intervention teams, the Crisis Response Unit (CRU) was implemented in Olympia, Washington in April 2019, as a result of a 2017 citywide safety measure that allocated an initial half million dollars for an improved crisis response model. The Olympia Police Department (OPD) contracted with a community-based organization to serve as a new option for behavioral health calls for service. The CRU team consists of six mental health professionals that operate in pairs. Along with a state certification in behavioral health, CRU staff must undergo training that includes police patrol exposure, community engagement, and education about available community support.¹⁴

¹³Id.

¹⁴<https://www.vera.org/behavioral-health-crisis-alternatives/cru-and-familiar-faces>

CRU operates from 7 AM to 9 PM daily, supplying clients with supports such as mediation, housing assistance, and referrals to additional services.¹⁵ Police lines of communication are utilized by CRU staff to identify situations that necessitate CRU response. The City's 911 operations hub and law enforcement personnel can also refer callers directly to CRU. Often, 911 callers request CRU assistance specifically, as the team has fostered strong community ties. Moreover, a significant portion of calls for service referred to CRU originate from community-based service providers, as opposed to the 911 system itself. When CRU staff encounter a frequent flyer-- an individual the team has been called on to support multiple times-- they refer the individual to Familiar Faces, a peer navigation program.¹⁶

Most individuals who were assisted by CRU were experiencing homelessness or mental health issues at the time of service. Out of the 511 calls CRU engaged with from April to June of 2020, OPD was only needed 86 times. Establishing and maintaining trust between CRU and residents is an essential part of the initiative.¹⁷ Post-implementation surveys show that many police officers became advocates of the

model after seeing the program in action for six months.

San Francisco Street Crisis Response Team (SCRT)

The City and County of San Francisco has implemented a pilot alternative response program for individuals experiencing a behavioral health crisis. The San Francisco Fire Department, in conjunction with the Public Health Department, responds to 911 calls related to these issues via Street Crisis Response Teams (SCRT). Street Crisis Response Teams include a behavioral health specialist, peer interventionist, and a first responder. Currently, there are two teams that work 12-hour shifts, but there are plans to expand to six teams to provide an around-the-clock response.¹⁸

SCRT collaborated with community-based organizations including the Glide Foundation and HealthRIGHT360 to ensure that community providers and local residents would be able to provide feedback and input about the new program. The proposed SCRT budget for fiscal year 2021-2022 is approximately \$13.5 million, which includes staff training and team expansion. An

¹⁵<https://olympiawa.gov/city-services/police-department/Crisis-Response-Peer-Navigator.aspx>

¹⁶<https://www.vera.org/behavioral-health-crisis-alternatives/cru-and-familiar-faces>

¹⁸<https://sfmayor.org/article/san-franciscos-new-street-crisis-response-team-launches-today>

evaluation of the pilot program place is currently underway.¹⁹

When 911 calls come into the dispatch center that are determined to be appropriate for SCRT, SCRT is dispatched; a team responds on average in fifteen minutes. No calls for service routed to SCRT required police action or backup in the first two months of the pilot. Approximately 74 percent of individuals assisted by SCRT had their issues resolved, whether it be through transfers to additional supports or de-escalation techniques.²⁰ Initial analyses show that SCRT could respond to up to 17,000 behavioral health calls each year. Because of the small scope of the initial pilot, only 20 percent of behavioral health calls received during the first two months of implementation were able to be responded to by the SCRT.

Austin Expanded Mobile Crisis Outreach Team (EMCOT)

In order to reduce the burden on the Austin Police Department (APD) associated with mental health calls, the City of Austin, Texas established the Expanded Mobile Crisis Outreach Team (EMCOT) in conjunction with Integral Care, the City's community-based mental health service provider. EMCOT

assists individuals undergoing a behavioral or mental health crisis. Agencies such as APD or the Sheriff's Office are able to call for EMCOT services by way of the 911 dispatch hub. EMCOT provides its clients with supports in the form of therapy, life coaching, rehabilitation, and other services.²¹

Since its establishment in 2013, EMCOT has assisted 6,859 clients. The most recently available data is from FY2017, which shows that EMCOT responded to 3,244 CFS, at a rate of approximately 9 times per day. Each client was served for an average of 21 days and provided three different types of supports. In general, post-crisis services are available for up to 3 months after initial contact.²² Integral Care reported that 86 percent of calls routed to a mental health response did not require police backup.²³

EMCOT is currently available from 8AM to 12AM Monday through Friday and 10AM to 8PM on Saturday and Sunday.²⁴ With the additional funding, EMCOT is now projected to provide around-the-clock availability for calls for service. Expansion of telehealth services for the program is also included in the

²⁴<https://www.fox7austin.com/news/crisis-counselors-responding-to-more-mental-health-calls-in-austin>

new funding.²⁵ For all CFS involving EMCOT, 85.4 percent were handled without police officers.²⁶

In 2020, a new dispatch system was established in Austin and a mental health paraprofessional was permanently stationed in the 911 dispatch center. Callers to 911 now have the option to request mental health services instead of police.²⁷ If the operator determines the caller would benefit from these supports, the call is handed over to a mental health professional. If a clinician is unavailable at the time, an EMCOT staff member is deployed. Currently, the clinicians are present all week for a set number of hours each day. This initiative was funded by the reallocation of \$11 million from the Austin Police Department's budget. The EMCOT budget itself was also recently increased to \$1.3 million, a 75 percent increase in funding for the program.²⁸

Houston Crisis Call Diversion (CCD)

The Crisis Call Diversion (CCD) program in Houston, Texas is a joint effort between the fire department, police department, emergency center, and mental health service providers in the

area. In 2017, the Houston Police Department (HPD) received 37,032 calls for service that involved behavior or mental health problems. When calls for service come in, dispatchers flag any that would necessitate CCD response--non-emergency behavioral and mental health calls. Once flagged, these callers are connected to CCD counselors. The CCD counselor evaluates the situation and the mental health of the caller and attempts to provide assistance over the phone.²⁹

If additional community response or police presence is needed, the dispatcher can request that as well. The call is taken off the police dispatch line when the CCD dispatcher verifies that the CCD team is on the way to the scene. CCD teams can contact the caller while traveling to the specified location in order to collect as much relevant information as possible. Upon examination of the data, each rerouted call generates savings of nearly \$4,500. To date, the CCD program has allowed for a diversion of 7,264 calls from the emergency lines, freeing up valuable emergency resources and resulting in millions of dollars in savings.³⁰

Ithaca Department of Community Solutions and Public Safety

In February 2021, the Mayor of Ithaca, New York, proposed the creation of a new Department of Community Solutions and Public Safety that would replace the Ithaca Police Department.³¹ This new department would include both armed officers and unarmed workers who focus on crime and neighborhood service. The department would work with a new alternative service provider that provides non-law enforcement crisis intervention and support. All current police officers would have to reapply to be employed by the new department.

The proposal is a part of the Ithaca Reimagining Public Safety Collaborative and a response to the New York State Governor's Executive Order mandating every police department in the state to submit a reform plan by April 1, 2021.³²

The new Department of Community Solutions and Public Safety would be charged with implementing an alternative to the police response system and establishing a pilot program for non-emergency calls, implementing a culturally responsive training program that includes de-escalation techniques, and developing a comprehensive community healing plan.

Other initiatives proposed under this strategy include standardizing a data review process on traffic stops as well as consistent reviews of officers' body camera footage. Minor grievances would be outsourced to neighborhood mediation centers. Adolescent engagement support programs would be broadened in order to reach those at high risk of violence. The new personnel of the Department would be recruited from a more varied body of applicants as well to reflect the residents of the city in which they operate.³³

In order to oversee the recommendations made by the Mayor and Ithaca Reimagining Public Safety Collaborative, the City of Ithaca has arranged for the creation of an operations hub known as the Community Justice Center (CJC). The CJC will have its own full-time staff including but not limited to a project manager and a data analyst. The CJC is set to give progress updates to the Tompkins County Legislature and the City of Ithaca Mayor to ensure each recommendation is properly addressed.³⁴

Tiered Dispatch & Community Emergency Response Network

NICJR has proposed a tiered dispatch system for CFS, a model that would include a robust, structured, and well-trained team of community responders

– a Community Emergency Response Network (CERN). Based on the type of CFS received, dispatch would deploy CERN and/or police according to the following tiered system:

TIER 1: CERN dispatched only

- Type of calls: non-criminal or low-level with no report of potential violence

TIER 2: CERN lead, with officers present if needed

- Type of calls: non-criminal with low potential of violence or low-level criminal

TIER 3: Officers lead, with CERN present

- Type of calls: low-to-moderate potential of violence; an arrest may be likely
- If officers arrive on scene and determine there is no need for an arrest and violence is unlikely, the officers step back and have CERN take the lead

TIER 4: Officers only

- Type of calls: serious and violent incidents; high likelihood of arrest

Non-Law Enforcement Crime Reduction Strategies

New York City Mayor's Action Plan (MAP) for Neighborhood Safety

The Mayor's Action Plan for Neighborhood Safety (MAP) was launched in 2014 in fifteen New York City Housing Authority (NYCHA) properties. MAP was designed to foster productive dialogue between local residents and law enforcement agencies, address physical disorganization, and bolster pro-social community bonds. Disorganized neighborhoods are characterized by dense poverty, a lack of social mobility, and underdeveloped community connections. These factors contribute to circumstances that make a given neighborhood more vulnerable to crime and violence.³⁵ The 15 housing developments chosen for the program account for approximately 20 percent of violence in NYCHA housing.³⁶

MAP's focal point is NeighborhoodStat, a process that allows local officials and residents to communicate directly with each other. Issues in each particular housing development are addressed in local meetings which involve multiple

stakeholders, including residents, community-based organizations, law enforcement, and government officials. NeighborhoodStat allows residents to have a say in the way New York City (NYC) allocates its public safety resources. The process is facilitated by a team of 15 community members who conduct polls and interviews to determine what the residents feel are the biggest issues in their neighborhoods. NeighborhoodStat also utilizes data analyses regarding employment, physical structure, access to resources, and other metrics into its recommendations in order to identify key areas of focus. At community meetings, this data and other benchmarks for performance are presented by community-based partners, allowing for full transparency. Residents and law enforcement also put forward their concerns and ideas. Once problems are pinpointed through meaningful dialogue, residents and NYC officials come together to generate solutions, which are then implemented by the Mayor's Office and assessed over time.³⁷

Other initiatives MAP has undertaken include providing employment and life coaching services to youth who are at most risk for violence. MAP also focuses on addressing major chronic

³⁵http://www.children.gov.on.ca/htdocs/English/professionals/oyap/roots/volume5/chapter04_social_disorganization.aspx

³⁶<https://criminaljustice.cityofnewyork.us/programs/map/>

³⁷<https://www.americanprogress.org/issues/criminal-justice/reports/2019/10/02/475220/neighborhoodstat-strengthening-public-safety-community-empowerment/>

disease determinants, including low physical activity levels and nutrient-poor diets. Programs such as NYPD Anti-Violence basketball games and pop-up healthy food stands have been established. In addition, public infrastructure has been improved through enhanced lighting, green spaces, and park improvements.³⁸

Early evaluations of MAP show promising results for a reduction in various crimes as well as increased perception of healthier neighborhoods. Significantly, misdemeanor offenses against individuals decreased in developments where residents expressed a positive change in their neighborhood's condition.³⁹

Furthermore, shootings in MAP sites decreased by 17.1 percent in 2015 and 2016 when compared with non-MAP sites.⁴⁰

Domestic Violence

Every year, an estimated 10 million people in the US experience domestic and family violence. Often a cycle of abuse is perpetuated in these situations, as experience with previous violence is a strong predictor for future abuse.⁴¹ The financial expense of domestic and family violence is projected to be \$12

billion each year. In Berkeley, approximately 2,000 reports related to domestic violence are registered annually; the actual number of incidents is probably much higher.⁴²

Domestic violence is a difficult and complex problem. Laws have been established that mandate arrests even for minor incidents; these same laws have generated a growing movement of survivors calling for non-enforcement responses. The challenges here are significant, as a lack of intervention can lead to serious injury and death, primarily of women and transgender women.

An additional complication in domestic violence work is the re-traumatization of survivors that occurs in the judicial system. When survivors of domestic violence endeavor to obtain recourse through the courts, they are often blamed for the abuse and undergo a disparagement of their character. Moreover, testimony is often given in an open court setting, which requires that a survivor recount the abuse they have undergone while simultaneously appearing composed in order to credibly convey their trauma, often in the presence of their abuser.⁴³ Reliving

³⁸<https://criminaljustice.cityofnewyork.us/programs/map/>

³⁹https://johnjayrec.nyc/wp-content/uploads/2020/10/MAP_EvalUpdate06.pdf

⁴⁰https://www1.nyc.gov/assets/operations/downloads/pdf/mmr2016/mayors_action_plan_for_neighborhood_safety.pdf

⁴¹<https://www.ncbi.nlm.nih.gov/books/NBK499891/>

⁴²https://www.cityofberkeley.info/uploadedFiles/Health_Human_Services/Level_3_-_General/dvfactsheet.pdf

⁴³<https://www.seattletimes.com/opinion/a-justice-system-that-re-traumatizes-assault-survivors/>

one's trauma and facing an abuser can cause feelings of helplessness, anxiety, and PTSD to surface in the survivor. Unfortunately, re-traumatization often results in a major roadblock for survivors to pursue justice in domestic violence cases.⁴⁴

There is a significant overlap in addressing domestic violence incidence and anti-poverty work, as intimate partner violence is correlated with devastating monetary effects on survivors who seek to leave their abusive situations. Interventions such as economic education and employment training can both reduce violence and provide critically necessary financial support.

Major domestic violence support programs implemented by the Centers for Disease Control (CDC) include STOP Sexual Violence (SV) and the Preventing Intimate Partner Violence (IPV).⁴⁵ According to the CDC, these strategies focus on promoting social norms that protect against violence; teaching skills to prevent SV; providing opportunities, both economic and social, to empower and support girls and women; creating protective environments; and supporting victims/survivors to reduce harms.

⁴⁴<https://arizonalawreview.org/pdf/62-1/62arizlrev81.pdf>

⁴⁵<http://www.preventconnect.org/2019/08/addressing-poverty-to-prevent-violence/>

⁴⁶<https://www.cdc.gov/violenceprevention/pdf/ipv-technicalpackages.pdf>

Research indicates that IPV is most prevalent in adolescence and young adulthood and then begins to decline with age, demonstrating the critical importance of early prevention efforts.⁴⁶ Analyses of these financial support programs have demonstrated results including increased confidence for survivors as well as decreases in domestic assault incidences.⁴⁷

Another area of focus has been to revisit the mandatory arrest policies for domestic violence calls in place in many jurisdictions.⁴⁸ Alternatives to this approach emphasize coordinated community response teams that maximize the role of community. An effective model integrates other providers, including faith leaders and the courts.⁴⁹

Commercial Sexual Exploitation

Sexual exploitation of minors has historically been difficult to adequately address. This is due to a plethora of factors, ranging from difficulty with identification of adolescents who experience sexual exploitation to a limited understanding of the various methods used to traffic children and the best approaches to engage the victims.⁵⁰ Too often, sexually exploited

⁴⁷<https://vawnet.org/material/economic-empowerment-domestic-violence-survivors>

⁴⁸<https://opdv.ny.gov/help/fss/part22.html>

⁴⁹<https://www.bwjp.org/our-work/topics/ccr-models.html>

⁵⁰<https://ojjdp.ojp.gov/mpg/literature-review/csec-sex-trafficking.pdf>

minors have faced arrest and incarceration instead of intervention and support.⁵¹ More than one thousand children are arrested for “prostitution” annually. However, anywhere from 57,000 to 63,000 individuals are estimated to be involved in commercial sexual exploitation in the United States, a disproportionate number being youth of color.⁵²

The Vera Institute has produced a screening procedure for service providers to follow when encountering an individual who could potentially be a survivor of sexual exploitation. Consisting of a thirty-subject questionnaire, the Trafficking Victim Identification Tool (TVIT), serves to aid in trafficking victim identification. Evaluations have proven that the tool has high accuracy and validity rates.⁵³ Health care providers, social workers, legal aid personnel, and others can use the screening tool to better identify those who have experienced commercial sexual exploitation.⁵⁴

Many community-based organizations have established programs that outreach, support, and provide services to minors who have been sexually

exploited. It is critical that community-based service providers have the requisite training and education to provide appropriate services and interventions to this population who have experienced abuse, trauma, and exploitation. The training should be trauma-informed, and screeners should be focused on establishing trust with their clients.⁵⁵ Organizations like FAIR Girls (Washington, D.C.) and MISSEY (Oakland, CA) have initiatives that intervene directly with girls who have been exploited. At MISSEY, case workers engage at-risk youth in the Alameda County foster system and offer them support and services in the form of financial resources, life coaching, and housing.⁵⁶ In Washington DC, young girls that stayed at the FAIR Girls group home had a 58 percent higher likelihood of permanently withdrawing from commercial sexual exploitation when compared with those who were not provided housing.⁵⁷

Traffic Enforcement

Data from The Stanford Open Policing Project shows that Black men and women are stopped at a higher rate than white drivers and are more likely to be fatally shot during the course of that

⁵¹<https://www.washingtonpost.com/posteverything/wp/2014/12/05/child-prostitutes-arent-criminals-so-why-do-we-keep-putting-them-in-jail/>

⁵²<https://www.vera.org/publications/out-of-the-shadows-identification-of-victims-of-human-trafficking>

⁵³<https://www.vera.org/downloads/publications/human-trafficking-identification-tool-summary-v2.pdf>

⁵⁴<https://www.vera.org/publications/out-of-the-shadows-identification-of-victims-of-human-trafficking>

⁵⁵Id.

⁵⁶<https://missey.org/foster-youth-program/>

⁵⁷<https://fairgirls.org/vida-home/>

traffic stop.⁵⁸ To significantly lessen the exposure of the general public to the police and instead address transportation violations without law enforcement involvement, a number of strategies have been employed: reallocation of certain traffic services to non-law enforcement organizations; the implementation of automation; and elimination of certain police responses.⁵⁹

In the City of Berkeley, the Berkeley Police Department (BPD) performed approximately 11,000 traffic stops in 2019. Black people were stopped by BPD at a rate 4.3 times than their representative population in the City.⁶⁰ This disproportionate traffic enforcement highlights the need to change policies and practices regarding traffic stops.

Reducing the use of police officers in traffic enforcement is one potential solution; this approach can be greatly enabled by technology. Speeding and red-light violations are two areas that constitute a large portion of traffic enforcement. There are 19 states that allow speed cameras, and 21 states that allow red-light camera usage.⁶¹ Implementing automatic speed citations

⁵⁸<https://openpolicing.stanford.edu/findings/>

⁵⁹<https://www.filesforprogress.org/memos/non-police-enforcement-of-civil-traffic-violations.pdf>

⁶⁰<https://sites.google.com/view/saferstreetsberkeley/home>

⁶¹<https://www.ghsa.org/state-laws/issues/speed%20and%20red%20light%20cameras>

along with red-light cameras could allow for a reduction of up to 20 percent of police interactions. It is important to note that although this technology is successful at reducing the need for police, it can generate other issues such as enforcement problems and privacy concerns.⁶²

As Berkeley is considering through the Berkeley Department of Transportation (BerKDOT) initiative, transferring traffic enforcement duties to an agency of unarmed staff can limit problematic police contact with motorists.

Another potential strategy is illustrated by a pilot program in Staten Island, New York, aimed at reducing the number of calls for service related to minor car accidents.⁶³ When a call comes in regarding a car accident, dispatch will determine if the accident is minor or serious enough to merit police response. If an accident is deemed to be minor, all individuals involved in the crash simply complete an accident report and then exchange contact and identification information.⁶⁴

Lastly, ending pre-textual stops for minor traffic infractions, as proposed by the Berkeley Mayor's Fair and Impartial

⁶²<https://www.governing.com/archive/gov-cities-hit-brakes-red-light-cameras.html>

⁶³<https://www.silive.com/news/2019/03/nypd-dont-call-911-for-crashes-without-injuries.html>

⁶⁴<https://abc7ny.com/traffic/nypd-rolls-out-pilot-program-wont-respond-to-every-accident/5205383/>

Policing Workgroup and approved by the City Council in March 2021, could significantly reduce traffic stops. This issue is addressed in more detail in the Policing section of this report.

Neighbor Disputes

Police officers are frequently the first personnel called in when there is a dispute, even a minor one, between neighbors. These events can encompass a broad array of issues, from property damage, blocking a driveway, to noise complaints. Even if police do intervene, the solution is often only temporarily, rather than resolving the root problems that caused the conflict. Police response wastes time and resources and can lead to escalation and violence.⁶⁵ Furthermore, neighbor conflicts in low-income and communities of color have a higher likelihood of resulting in an arrest.⁶⁶

Community mediation is a strategy that has proven to reduce police calls for service and decrease the burden on police for nuisance complaints. Several cities have implemented community medication programs to utilize non-enforcement options to resolve neighbor disputes. In areas where community mediation is prioritized,

neighborhood social ties are strengthened, and communities are more harmonious. Moreover, residents who participate in community mediation use less court and police resources. In a study analyzing mediation's effect in Baltimore, Maryland, for example, researchers found that community mediation for neighbor disputes decreased calls for service to the Baltimore Police Department. For a single mediation session, the Baltimore Police Department produced cost savings between \$208 and \$1,649. Among individuals who went through a mediation, the likelihood of arrest and prosecution was lower when compared to those who did not participate.⁶⁷

Neighbor disputes can also be triaged through a 311 system. Priority is given to complaints based on frequency and the potential to escalate into violence. Outsourcing responses to neighborhood organizations and associations that can operate in conjunction with police officers can be valuable in order to promote a peaceful resolution to violent disputes. These organizations can also conduct sweeps through neighborhoods in order to gain valuable information regarding any disputes.⁶⁸

⁶⁵<https://mdmediation.org/wp-content/uploads/2019/10/Quantitative-Analysis.pdf>

Community Driven Violence Reduction Strategies

Gun violence is a stubborn problem with sometimes unexplainable rises and falls in the rates of shootings in cities across the country. Violence is often concentrated in low-income neighborhoods, with Blacks and Latinos disproportionately experiencing the impacts. These ‘hot spots’ of violent crime experience a complex array of challenges, ranging from high rates of poverty and incarceration to poor quality education and a lack of trust in government institutions. Unfortunately, the effects of exposure to violence are widespread, affecting the health and development of not only those directly involved but also that of their families and communities. Even for those not directly impacted by gun violence, the [enormous financial costs](#) affect all taxpayers.

A small number of effective strategies highlighted in this report have however demonstrated success. When implemented with fidelity, these interventions have been successful at reducing violence, with many initiatives showing improvements in the first six to twelve months of implementation.

The four strategies highlighted below – 1) Group Violence Reduction Strategy (Ceasefire); 2) Hospital-Based Violence

Intervention; 3) Office of Neighborhood Safety/Advance Peace; and 4) Street Outreach – all incorporate similar best practices:

- Identifying and focusing on individuals, groups, and communities at the highest risk of being involved in violence;
- Employing Credible Messengers/community outreach workers to engage those individuals/ groups in a positive and trusting manner; and
- Providing ongoing services, supports, and opportunities to high-risk individuals.

These core elements are essential to the success of any violence intervention strategy.

Group Violence Reduction Strategy

Group Violence Reduction Strategy (GVRS) is known by many other names: Ceasefire, Focused Deterrence, and Gun Violence Intervention. GVRS is a comprehensive strategy that utilizes a data-driven process to identify the individuals and groups at the highest risk of committing or being involved in gun violence and deploying effective interventions with these individuals. Initially developed in Boston, where it was referred to as the “Boston Miracle”, GVRS has evolved as it has been implemented in cities including [Oakland](#) and Stockton, California, to include more

in-depth and intensive services and supports.⁶⁹

GVRs has four core components: Data-driven identification of those individuals and groups at highest risk of gun violence; direct and respectful communication to those at high risk; intensive services, supports, and opportunities; and as a last resort, Focused Enforcement.

Identification of Program Participants

GVRs employs a data-driven process to identify the individual and groups who are at the very highest risk of being involved in a shooting. This involves an initial Gun Violence Problem Analysis, which provides a thorough examination of the shootings and homicides in a city in the past two to three years in order to produce information about victim and suspect demographics, group conflicts in the area, prior history of violence, and general trends. The Problem Analysis provides a critical understanding of the dynamics of gun violence in a particular jurisdiction.

Due to the ever-evolving dynamics of gun violence, in addition to the detailed look back at gun violence, regular Shooting Reviews are also necessary. Shooting Reviews usually are weekly reviews by law enforcement and community violence intervention specialists (often these are two different

meetings) to review every shooting that has occurred in the past seven days and identify the shootings that have a likelihood of retaliation. For those shootings that have a likelihood of retaliation, the individuals who are likely to retaliate or be retaliated against are identified. For those who will not be arrested imminently, they are referred for intervention services.

Engagement: Direct and Respectful Communication

Once high-risk individuals and groups are identified, the GVRs strategy requires immediate engagement. This engagement involves direct and respectful communication to inform identified individuals of their risk and offering them services. There are two primary formats for these discussions: Group meetings, referred to as “Call-Ins” and individual meetings, sometimes referred to as “Customized Notifications”. At Call-Ins, the recently identified very high risk individuals are invited to attend a meeting with community leaders, law enforcement officials, formerly incarcerated individuals, survivors of violence, and service providers. All of these different stakeholders deliver the same message in their own way: based on your risk factors, you are at very high risk of being shot or being arrested for a shooting; the violence needs to end and we will do all we can to achieve that; we care about

⁶⁹<https://www.theguardian.com/cities/2018/dec/06/bostons-miracle-how-free-nappies-and-a-little-mentoring-are-curbing>

you; we want to offer you real and intensive services if you are interested. Treating the participants with dignity at a safe, neutral location is essential to a successful Call-In. Custom Notifications convey similar messages about the risk of violence and the availability of services. However, Custom Notifications are individual meetings where a high-ranking police officer and a community leader directly make contact with an individual at their home or community. Custom Notifications are frequently employed when the risk of violence is imminent or when individuals are unable to attend group meetings.

Provision of Services

Subsequent to a Call-In or a Custom Notification, individuals identified as being at very high risk of gun violence are directly connected to available services, supports, and opportunities. The first and primary service is a positive and trusting relationship with a Life Coach or Violence Intervention worker, someone with similar lived experiences as the people they are serving. These individuals are often known as Credible Messengers. The Life Coach or Intervention Worker is an intensive and personal relationship – which is the most important aspect of the services. Unlike service brokering based case management, contact between the Life Coach and the client must be frequent, flexible, consistent, and on-going for a long period of time. Life Coaches should have daily communication with every client on their

caseload, see each client in person 3-4 times per week, work with clients for at least six months but preferably 18 months, and develop a positive and trusting relationship. Once an initial rapport is established, Life Coaches then work with each client to develop a Life Plan. Life Plans include short and long-term target goals, desired outcomes, specific referrals to services/supports for the client, and specific educational resources regarding violence.

Though a client may need and want a particular service or resource, i.e., job placement or housing, the most important and potent aspect of the engagement is the relationship between the Life Coach and the client. Once a positive and trusting relationship is established, the Life Coach can gain influence with the client and use that influence to help the client make better decisions, leading to improved outcomes.

In Oakland's GVRs, clients are also eligible to receive monthly, modest financial incentive stipends for achieving certain milestones. Through two of the primary community based organizations that are contracted by the City of Oakland's Department of Violence Prevention to provide Intensive Life Coaches to GVRs clients – Community and Youth Outreach (CYO) and The Mentoring Center – they are also offered weekly cognitive behavioral therapy (CBT) sessions to help clients

improve their decision making. CYO partners with NICJR to provide the innovative [Healthy, Wealthy, and Wise](#) CBT program.

Focused Enforcement

One of the overt goals of GVRS is to reduce the footprint of police by focusing enforcement on serious and violent crime, which officers spend a very small portion of their time on. Police departments are encouraged to forgo enforcement of minor infractions or engage in saturation or “scorched earth” tactics that are both ineffective and cause further distrust between communities and police.

For those individuals and groups who do not respond to the GVRS message and continue to engage in violence, there is follow-up supervision and focused enforcement by police, probation, parole, and prosecutors. Because a chief priority of the GVRS is elective agreement, these enforcement options are clearly communicated to high-risk individuals up front and are only instituted once violence occurs.⁷⁰ What this means in practical terms is that a GVRS client is not penalized for simply deciding to not participate in services. Enforcement comes as a last resort only

after someone has committed an act of violence.

Current Programs and Evaluations

The implementation of GVRS strategies typically results in a significant reduction in community-wide levels of homicides as well as nonfatal shootings. Positive results are magnified when the strategy is instituted in relation to a specific, highly victimized demographic. In Boston, Massachusetts, for example, where Operation Ceasefire was instituted with a specific focus on youth, a 63 percent reduction in the number of youth homicides was achieved.⁷¹ Other cities that have implemented GVRS-type programs have experienced similar results.⁷²

Oakland’s GVRS, which was launched at the end of 2012, and concentrated on high-risk individuals likely to be involved in violence, resulted in six consecutive years of reductions in shootings and homicides culminating in a 49 percent reduction in fatal and non-fatal shootings.⁷³ Toward the end of March 2020, before Covid-19 shelter in place restrictions were imposed, homicides were down by 38 year to date from 2019. Had Oakland maintained that low rate, it would have achieved the lowest

⁷⁰<https://nicjr.org/wp-content/uploads/2018/02/Oakland's-Successful-Gun-Violence-Reduction-Strategy-NICJR-Jan-2018.pdf>

⁷³<https://cao-94612.s3.amazonaws.com/documents/Oakland-Ceasefire-Evaluation-Final-Report-May-2019.pdf>

murder rate in the city’s history. But like nearly every city in the country, Oakland experienced a spike in shootings and

homicides once the Covid restrictions caused outreach and services to cease operation.

Hospital-Based Violence Intervention Programs (HVIPs)

Hospital-Based Violence Intervention Programs (HVIP), view violence through a public health-centered lens. Analogous to the spread of an illness, violence has been shown to proliferate with increased proximity and exposure to others.⁷⁴ That is, contact with violence itself increases the probability that those exposed will be directly involved in violence themselves.⁷⁵

Identification of Program Participants

Under the HVIP model, the physical location of a trauma center or emergency room is seen as valuable in the fight against violence. One of the major risk factors for future violence is a history of previous violence. Due to this, hospital workers pinpoint patients that are at highest likelihood for repeat injuries. This is done through initial intake screenings by hospital staff that test for previous trauma and linked effects such as PTSD, as well as

⁷⁴<https://www.cdc.gov/injury/wisqars/fatal.htm>

⁷⁵<https://www.ncbi.nlm.nih.gov/books/NBK207245/>

discharge screenings.⁷⁶ Although all HVIP programs employ a screening strategy, there is no standard protocol for assessing patient risk.⁷⁷

Engagement Strategy

HVIPs make use of the distinct cross-section of time—known as a “teachable moment”—in which after an injury an individual is open to making changes in their behavior and circumstances. During this time period, specialized hospital staff and community-based partners come together in support of the patient in order to diminish the chance of retaliation and further violence. HVIPs are especially important right now in the fight against violence, as injury recidivism rates have been shown to be as high as 60 percent in certain areas.⁷⁸

Many individuals are often entrenched in a cycle of violence that is nearly impossible to escape. Research has found that in these cases, a lack of social support and connections to the community were the largest drivers of the spread of violence.⁷⁹ HVIPs work to address these health determinants by connecting each patient with a highly trained Intervention Specialist. These professionals quickly engage the individual and their family by gaining

their trust in the hospital setting.⁸⁰ The most successful Intervention Specialists not only possess robust interpersonal skills and demonstrate cultural competence, but also reflect the diversity of their clients and the communities from which they originate.

Provision of Services

Once this initial bond is created, Intervention Specialists construct a comprehensive plan with their clients to spur on meaningful change. This plan includes non-violent crisis management methods, counseling for both the client and their family, information on risks and outcomes associated with violence, as well as access to community services including employment assistance, mentoring, education, and court assistance. Consultation with family and health providers is necessary to develop a plan that is feasible and trauma-informed. It is important to note that the plan can change, depending on what is best for the client. Ongoing management and follow-up with the client and their family for up to two years is necessary in order to attain long-term reductions in violence.⁸¹

Current Programs and Evaluations

⁸⁰<https://www.thehavi.org/what-is-an-hvip>

⁸¹<https://www.nationalgangcenter.gov/spt/Programs/4186>

Analyses of HVIP programs have demonstrated considerable success, as evidenced by substantial reductions in repeat hospitalizations, an increase in employment rates for those involved in the programs, and cost savings from reduced injuries.

Caught in the Crossfire, an HVIP program based in Oakland, CA, is among the original HVIPs in the country. Through the use of Intervention Specialists who connect with injured youth at Oakland's Highland Hospital, Caught in the Crossfire resulted in a 70 percent lower probability of re-arrest six months after injury in an evaluation conducted in 2004.⁸² Due to its robust success, the model has been recreated in a multitude of cities.

Baltimore's Hospital-Based Violence Intervention Program (VIP) also demonstrated similar benefits in re-arrest numbers during a 3-year evaluation completed in 2000. With violence being the leading cause of mortality for youth in Baltimore, the VIP program uses risk factors to pinpoint patients who fit the intervention criteria.⁸³ This evaluation illustrates that individuals involved in the program had lower rates of both re-arrest, conviction, and subsequent incarceration.⁸⁴ VIP has

been a cost-effective intervention with positive outcomes. As such, VIP has plans to expand, with 7 more hospitals in the area committing to the program.

Abundant evidence has established that a decrease in the incidence of repeat injury would result in large monetary savings. The typical HVIP intervention would generate savings in health care damages, criminal justice expenses, and lost productivity costs. Studies project those estimated savings could be in excess of \$3.9 million annually per average HVIP.⁸⁵

Although more comprehensive research is necessary on the long-term outcomes of HVIPs, it is evident that they are critical in the effort to address interpersonal violence in communities. By reexamining violence as a public health issue, we have the potential to truly invest in communities.

Office of Neighborhood Safety/ Advance Peace

In 2007, the City of Richmond, CA launched the Office of Neighborhood Safety (ONS), amid escalating homicide rates and increasing numbers of firearm cases. Prior to the establishment of the ONS, the Richmond City Council

⁸²Id.

⁸³<https://www.dchealthmatters.org/promiseppractice/index/view?pid=3743>

⁸⁴https://journals.lww.com/jtrauma/Abstract/2020/08000/Recidivism_rates_following_firearm_injury_as.17.aspx

⁸⁵https://www.researchgate.net/publication/266785304_A_Cost-Benefit_Analysis_Simulation_of_a_Hospital-Based_Violence_Intervention_Program

analyzed violence in Richmond and found that gun violence disproportionately affected Black men aged 18-24, with that population constituting 73 percent of homicide fatalities.⁸⁶ This finding served as the basis for the creation of the Office of Neighborhood Safety; its main focus is achieving tangible reductions in firearm-related assaults and deaths and the subsequent founding of Advance Peace, a non-profit organization that replicates the ONS' Peacemaker Fellowship in cities across the county.

This goal is achieved through the implementation of strategic partnerships and interventions that strengthen neighborhood ties and promote community welfare. ONS works to provide resources including life skills training and mentoring to individuals who are at greatest risk of being involved in a gun violence incident. Currently, ONS assists 250+ individuals annually.

The ONS is composed of nine staff members including an Executive Director, four Neighborhood Change Agents (NCAs), and two Senior Peacekeepers.

Identification of Program Participants

The ONS employs a data-driven approach in identification of individuals at highest risk. Leveraging their

relationships in the community, NCAs conduct daily sweeps of their communities, an effort that provides a continuous flow of critical information that informs staff response. Staff are able to gather information regarding those individuals that are most prone to violence, current conflicts or family issues that may result in violence, and other information that is used to directly inform subsequent intervention activity.

In addition, ONS obtains data from the Richmond Police Department (RPD). This is facilitated through a police officer that serves as a liaison between RPD and ONS. This officer supplies ONS with homicide data each month, which includes demographic information. There is no information given from ONS to RPD whatsoever.⁸⁷ This assists ONS to identify those individuals at highest risk based on the data from law enforcement.

Provision of Services

ONS's main program is the Peacemaker Fellowship.® The Peacemaker Fellowship interrupts gun violence by providing transformational opportunities to young men involved in lethal firearm offenses and placing them in a high-touch, personalized fellowship. By working with and supporting a targeted group of individuals at the core of gun hostilities, the Peacemaker Fellowship bridges the gap between anti-violence

⁸⁶https://www.evidentchange.org/sites/default/files/publication_pdf/ons-process-evaluation.pdf

⁸⁷ Id.

programming and a hard-to-reach population at the center of violence in urban areas, thus breaking the cycle of gun hostilities and altering the trajectory of these men’s lives. The Peacemaker Fellowship works with both public and community-based stakeholders to establish responsive community-driven strategies that achieve high-impact outcomes for those caught in the cycle of urban gun violence.

The Fellowship provides life coaching, mentoring, connection to needed services and cultural and educational excursions, known as Transformative Travel, to those deemed to be the very most dangerous individuals in the city. Fellows travel across the country and to several international destinations. Fellows can also receive significant financial incentives for participation and positive behavior as a gateway to developing intrinsic motivation that arises from internal and not external rewards.

The Seven Touch Points in the ONS/Advance Peace Peacemaker Fellowship include:

- Daily in-person check ins

- Development of LifeMAP and goals
- Social services navigation
- Transformative Travel
- Elders Circle (CBT)
- Internship Opportunities
- LifeMAP milestone allowance (monthly stipends)

Current Programs and Evaluations

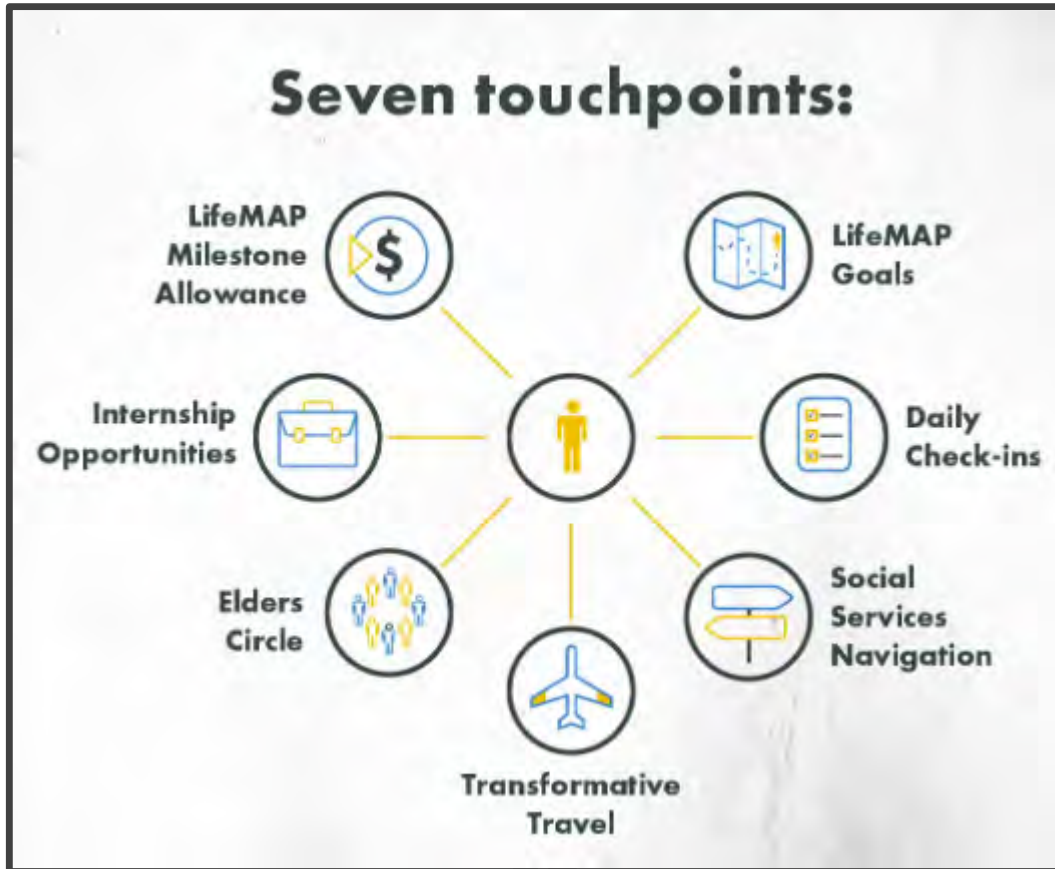

Since the establishment of the ONS, Richmond has experienced a substantial decrease in violence. Firearm-related homicides have declined in Richmond by more than 70 percent. With respect to those individuals enrolled in the Peacemaker Fellowship program within ONS, 77 percent have not been involved in any gun violence activity.⁸⁸

Advance Peace has replicated the Peacemaker Fellowship in the cities of Stockton and Sacramento, CA and Fort Wayne, TX. Advance Peace is also working with the cities of Fresno, New York City, and several others to launch Peacemaker Fellowship programs there.

Initial evaluations of the Advance Peace programs in Stockton and Sacramento have shown very promising outcomes.⁸⁹

⁸⁸<https://www.advancepeace.org/about/the-solution/>

⁸⁹<https://www.advancepeace.org/about/learning-evaluation-impact/>

Street Outreach

Referred to by a variety of names and long seen as the primary entry point for violence reduction programs, Street Outreach can be an effective intervention when implemented correctly. A number of organizations and programs throughout the country have successfully operated Street Outreach initiatives, including [Urban Peace Initiative](#) in Los Angeles, who also provide a Street Outreach training academy; the [Newark Community Street Team](#); and the [Professional Community Intervention Training Institute](#).

Popularized by the documentary *Interrupters*, the Cure Violence Epidemic

Control Model was created in Chicago to provide Street Outreach and violence interruption through a public health approach. This model utilizes the main components that are currently used to control outbreaks of epidemic disease to address violence, namely uncovering and breaking up transmission, pinpointing those with the highest risk of infection, and reforming local norms.

Identification of Program Participants
 Street Outreach programs are designed to address the manner in which violence spreads from person to person. Studies show that those who have been continually in contact with violence can

be thirty times more likely to commit a violent act in the future.⁹⁰ Moreover, violence often has ripple effects in the community, whether it be in the form of retaliation or further escalation of conflict.⁹¹

Because of this pattern in violence, Street Outreach programs recognize potentially lethal conflicts in the community by utilizing trained Violence Interrupters. A system is devised and maintained for collecting and verifying homicide and injury data from the community. This data includes prior history of homicides and injuries, hot spots of violence, neighborhood affiliations, etc. These Violence Interrupters also identify ongoing conflicts by speaking to key members of the community about ongoing disputes. Information regarding arrests, prison releases, and prior criminal history are also utilized to pinpoint violent outbreaks.⁹²

Engagement and Services Strategy

Engagement is primarily facilitated by the work of trained Violence Interrupters that engage the community through meaningful dialogue. Following a shooting, these individuals immediately operate in the community and at hospitals to pacify heightened emotions

and prevent retaliations. This involves coordination with local groups and business owners to hold constructive dialogue around community violence and the appropriate actions to take in response. Events are then organized by Violence Interrupters to promote a change in overall neighborhood attitudes towards violence. This enables the de-normalization of long-standing attitudes around violence by way of constant community engagement and input.⁹³ Events include community education initiatives, gun buyback projects, and sports programming. The main focus on these events is to provide a safe space in the community when violence is at an all-time high.⁹⁴

It is important to note that some applications of this model incorporate collaboration with HVIPs to help aid in the identification of high-risk individuals.⁹⁵

Current Programs and Evaluations

Street Outreach programs have been rigorously evaluated by numerous independent think-tanks, with strong, statistically significant outcomes observed in most analyses. Reductions in shooting have ranged from 40 to 70 percent, with some cities even able to maintain multiple years without any

⁹⁰<https://1vp6u534z5kr2qmr0w11t7ub-wpengine.netdna-ssl.com/wp-content/uploads/2019/09/Infographic-Top-10-v1.pdf>

⁹¹<https://www.lagryd.org/mission-comprehensive-strategy>

⁹²<https://cvg.org/what-we-do/>

⁹³Id.

⁹⁴<https://www.lagryd.org/summer-night-lights>

⁹⁵<https://johnjayrec.nyc/2020/11/09/av2020/>

shootings at all. Analyses have also shown a large ROI (return on investment) associated with investment in this model: anywhere from \$3,500-\$4,500 is saved for every act of violence stopped.⁹⁶ Apart from these tangible results, supplementary benefits in the form of increased employment rates and more faith in law enforcement personnel are also realized.³³

The City of Los Angeles established the Mayor's Office of Gang Reduction and Youth Development (GRYD) in 2007 in order to effectively incorporate Street Outreach into Los Angeles' violence reduction strategy. GRYD's initiatives include intervening in violent situations and proactively promoting communication between various groups through the use of the "triangle protocol," which helps determine appropriate responses to a crisis.^{97,98} This protocol is the main pathway in which information is facilitated between three main stakeholders: the Los Angeles Police Department, GRYD coordinators, and community programs. Ultimately, the collected information assists GRYD to properly respond to violent shootings.

After launching in 2010, New York City's Cure Violence program demonstrated strong success, with a 63 percent reduction in shooting incidents.⁹⁹ Radical transformation in neighborhood attitudes towards the use of violence also occurred, as reflected in community surveys.¹⁰⁰ This shift in norms illustrates a decrease in the willingness of community members to turn to and allow violence as a means of dispute resolution.

Street Outreach programs that simply canvass high crime neighborhoods without any focus on very high-risk individuals or don't have structured, intensive follow-up, have proven to be ineffective. In a meta-analysis of Street Outreach evaluations, a John Jay College study noted: "The most promising outcomes result when streetwork programs focus their efforts on the small networks of people at highest risk for violent victimization and offending—rather than on narrow geographic areas, such as the neighborhoods with high rates of violence."¹⁰¹

Policing Strategies

The following strategies have shown to be effective in reducing crime, resolving incidents, and improving the quality of policing without a focus on heavy-handed enforcement.

SARA Problem Solving Model

The Scanning, Analysis, Response, and Assessment (SARA) model was created in Virginia in 1987 to facilitate the problem-oriented policing procedure.¹⁰²

The cornerstone of this model is a priority on outcomes; the model outlines four steps that are necessary for a proper police response to problems within their jurisdictions. To ensure proper implementation, a significant facet of this method is that officers must be ready to build trust between the community and the police department through the growth of interpersonal relationships.¹⁰³

Scanning. This step consists of pinpointing and then triaging repeated issues that necessitate a response from the police department.¹⁰⁴ Frequent problems that occur in the community should be given priority. Relevant outcomes of the problem should be matched to their corresponding cause.

The police department's ability to significantly affect that outcome should also be studied. For instance, examining which properties in a given area have the highest number of calls for service in a year or given time period is an important initial step in the SARA model.

Analysis. Here, law enforcement officers examine the root causes of the issue, community sentiment regarding the problem, and gather needed contextual data.⁴⁸ This step also involves assessing the status quo response to the problem and identifying the shortcomings of that strategy. Ultimately, the cause of the problem and potential solutions are determined during this phase.

Response. Officers utilize collected data to ascertain potential intervention strategies. When determining strategies, a thorough review of implemented interventions in different areas with comparable issues is critical. Once a strategy is selected, clear goals must also be established. Execution of the chosen plan is the last part of this step.

Assess. After a plan is implemented and officers have attempted to address a problem, the police department must analyze the efficacy of their strategy.

¹⁰²https://www.researchgate.net/publication/297556988_Police_innovation_Contrasting_perspectives

¹⁰³<https://movementforward.org/a-look-inside-strategies-contributing-towards-community-policing-sara-model/>

¹⁰⁴<https://www.evidence-basedpolicing.org/refresher-sara-model-and-problem-oriented-policing/>

Continued evaluation of the intervention is necessary to guarantee lasting success. Alternatives or additions to the strategy are considered as well. This is often a step overlooked or undervalued in police departments.¹⁰⁵

Many police departments have incorporated the SARA model into their interventions. In San Diego, the police department reported that a trolley station was the location of gang fights, violent crimes, and narcotic activity. A squad of officers collected information to show the local transit board that the design of the station contributed to crime. Based on the information provided by the officers, the transit board agreed to provide funds to redesign the station.¹⁰⁶

Ethical Policing Is Courageous (EPIC)

The EPIC program is a peer-to-peer intervention strategy that was created by the police department in New Orleans, Louisiana in 2016. EPIC involves training officers to be accountable to each other and intervene before an unlawful act takes place, irrespective of hierarchy. This initiative aims to alter the culture surrounding policing in order to limit police misbehavior and promote a collaborative environment.¹⁰⁷

The EPIC program is founded on active bystandership psychology, which explains that active bystanders intercede when they are made aware of problematic behavior. EPIC training allows officers to overcome factors that may prevent them from intervening. These factors include a lack of confidence in their skills to deescalate a situation, uneasiness about potential retribution, and worry about breaking an unwritten code of silence.¹⁰⁸

Leadership in police departments who participate in the EPIC program must be committed to changing their organizational culture. Police departments implementing EPIC must provide education, training, and on-going learning and support to officers for the initiative to be successful. EPIC can also integrate with other initiatives to boost officer well-being, including counseling and trauma assistance as well as stress reduction education.¹⁰⁹

Data has shown that police departments where EPIC programs have been implemented have better community relations, lower rates of misconduct, and lower rates of public grievances. The majority of the feedback from New Orleans police officers has also been

¹⁰⁵<https://movementforward.org/a-look-inside-strategies-contributing-towards-community-policing-sara-model/>

¹⁰⁶<https://www.sandiego.gov/department/problem-oriented-policing>

¹⁰⁷<http://epic.nola.gov/home/>

¹⁰⁸<http://epic.nola.gov/epic/media/Assets/EPIC-Overview.pdf>

¹⁰⁹Id.

positive.¹¹⁰ Moreover, there is strong research that peer intervention is effective when successful strategies for interceding are provided.¹¹¹

Project Active Bystandership for Law Enforcement (ABLE)

Project ABLE is a joint effort between the Georgetown Innovative Policing Program and the Sheppard Mullin law firm to train officers to be able to properly intervene in a crisis situation and promote a policing atmosphere that reinforces peer intervention. Project ABLE is based on the principles of the New Orleans EPIC Peer Intervention Program and curriculum created by Dr. Ervin Staub for California law enforcement. Through Georgetown, law enforcement agencies are able to receive training in Project ABLE along with a host of other resources to assist them in advancing their own bystandership strategies.^{112,113} The training consists of a minimum of a one-time eight hour ABLE-specific training along with a minimum of two hours of annual refresher training.¹¹⁴ All of these resources are provided to law enforcement agencies free of charge.

Project ABLE's aim is to reduce police misconduct and errors and assist in improving officer health and well-being. In order to prevent any retaliation from occurring to those officers who intervene, police departments must implement stringent anti-retaliation guidelines. Since its inception, over 70 police departments have enlisted in Project ABLE.¹¹⁵

Research has shown that there are many advantages to the implementation of significant bystander training. This is critical because most police departments have a culture that dissuades officers from intervening when they see problematic behaviors.¹¹⁶ Identified benefits include a decrease in violence to civilians, a decrease in violence to police officers, enhanced relationships between community residents and the police officers, and growth in officer well-being.¹¹⁷ Evidence also suggests a strong correlation between departments that maintain robust duty to intervene protocols and decreased rates of police deaths per capita.

Community Safety Partnership (Watts)

Established in November 2011, the Community Safety Partnership (CSP) is a joint effort between the Los Angeles Police Department (LAPD), the Housing Authority of the City of LA (HACLA), and local residents.¹¹⁸ The program was created in order to address the high violence levels in housing developments in the Watts area and offer residents there supports and services. The broader goal of the CSP is to implement “relationship-based policing.” This process involves police officers creating legitimate relationships with residents of their precinct in order to meaningfully benefit community wellness for the long-term.¹¹⁹ One of the major stakeholders in the project is the Watts Gang Task Force, a team of neighborhood residents, local faith leaders, and other community-based organizations.

Along with high violence rates, the community was also grappling with concentrated poverty, low education

quality, and deteriorating physical infrastructure. Community engagement initiatives the CSP implemented in response include a football team coached by police officers, Fun Runs, health fairs, and organized walks for residents to interact with officers in a non-confrontational setting.^{120, 121}

In 2020, the CSP Bureau was formed within LAPD to expand the work that was achieved in Watts citywide. The LAPD also consolidated CSP programs creating a centralized point of contact and engagement for the community. The main objectives of the CSP Bureau were to serve as a resource for officer–community interaction and promotion of neighborhood safety.¹²²

The CSP Bureau is also responsible for certifying and training officers for 5-year terms. CSP officers undergo over 100 hours of education from the nonprofit Urban Peace Institute. The training centers on cultural competency, de-escalation skills, and understanding community data.¹²³

Originally formed for one housing site, CSP has spread to ten additional

developments. In 2017, the program was broadened to the Harvard Park area due to its efficacy. During the initial three years after the CSP's formation, both violent offenses and arrest rates decreased by over 50 percent in the Watts housing developments. One Watts location even had three consecutive years without a homicide. Residents of these Watts developments have even reported increased perceptions of safety along with greater trust in the police.¹²⁴ An evaluation of CSP by UCLA found that this effort reduced crime, arrest rates, and use of force grievances from residents.¹²⁵

Focused Deterrence

Focused Deterrence strategies involve the communication of risks, ramifications, and avenues of support to individuals involved in gun violence. This strategy is based on the fact that a very small number of people are responsible for a large portion of gun violence.

One of the most prominent implementations of focused deterrence is Boston, Massachusetts's Operation Ceasefire. Experiencing an increase in violence, Boston police identified and communicated with individuals and groups that were pinpointed as most at risk of engaging in violence.¹²⁶ Boston police also partnered with the Boston Ten Point Coalition, a group of faith and

community leaders, in order to provide support and services to these targeted individuals and groups. Oakland has also implemented a version of Focused Deterrence that is profiled in the Gun Violence Reduction section of this report.

Focused Deterrence strategies are often tailored to the location in which they are being implemented. Project Safe Neighborhoods in Lowell, Massachusetts, instituted this strategy in areas of high crime. Lowell dealt with a significant Asian gang presence largely comprising youth involved in illicit gambling operations. In order to address the youth violence, the City of Lowell worked with older Asian males in charge of the gambling. The older Asians intervened in youth violence in order to prevent their gambling enterprise from being destroyed. Lowell experienced a major decline in adolescent violence following the implementation of this Focused Deterrence strategy.¹²⁷

After Ceasefire was implemented in Boston, evaluations found a 63 percent drop in youth homicides and a 32 percent decline in calls for service

¹²⁷Id.

related to gun violence.¹²⁸ A meta-analysis of several Focused Deterrence strategies found steady reductions in violent crime of up to 60 percent, particularly for group and gang related violence.¹²⁹

Elimination of Pretextual Stops

Pretextual or pretext traffic stops occur when police officers stop a driver for a minor violation, like vehicle equipment failure, and then try to leverage that opportunity to find evidence of a more significant crime. A recent evaluation of 100 million traffic encounters demonstrated that Black and Latino drivers experience higher rates of pretextual stops and searches.¹³⁰ However, most of these stops do not actually yield any contraband or weapons.¹³¹ Because the nature of pretextual stops relies heavily on officer discretion, there is high likelihood that implicit racial biases come into play. Such stops that end in violence or death disproportionately affect Black and Latino drivers.¹³²

Elimination of pretextual stops does not negatively affect crime. An analysis by the police department in Fayetteville, North Carolina showed that violent crime was not affected after the police department reformed its use of pretextual stops.¹³³

Pretextual stops are in the process of being regulated in many states across the country. Oregon's Supreme Court ruled in November 2019 that it was unconstitutional for police to stop a driver and proceed to ask unrelated questions, thereby effectively banning pretextual stops.¹³⁴ Virginia policy makers are also considering restricting pretextual stops.¹³⁵ The Berkeley City Council has already approved the formation of BerkDOT in order to address and decrease the frequency of pretextual traffic stops.¹³⁶ The City Council also approved the Mayor's Fair and Impartial Policing Workgroup's recommendations, which includes elimination of pretextual stops.

Ethical Society of Police (ESOP)

Instituted in 1972 by Black St. Louis Metropolitan Police Department officers, the Ethical Society of Police (ESOP) is a police union that was created in order to combat systemic racism within the department and greater community. The group is composed of 220 members, who are either police officers or civilian contractors.¹³⁷ The organization recently scaled up to include the St. Louis County Police Department. ESOP has been particularly outspoken in cases of police wrongdoing. The group places a higher premium on ethical decision making, even though openly criticizing actions of their fellow police officers can be difficult.

Most recently, ESOP condemned the actions of a police officer in Brooklyn Center, MN that resulted in the death of Daunte Wright, expressing that the officer was irresponsible in upholding her duties.¹³⁸ ESOP has also sponsored many events in order to improve relationships between police officers and their community including Pizza with a Cop, community clean-up days, and basketball games. In August of

2020, ESOP released a groundbreaking report that details systemic racism throughout the St. Louis Metropolitan Police Department.

Chicago PD Black Public Safety Alliance (BPSA)

A group of Black Chicago Police Department (CPD) officers created the Black Public Safety Alliance (BPSA) in 2021.¹³⁹ The organization serves to give Black police officers a voice amidst the deep-rooted issues between communities of color and the CPD. The BPSA was created in response to concerns with the broader Fraternal Order of Police (FOP).¹⁴⁰ Officers in the BPSA have explained they “...do not feel supported or comfortable at the FOP,” especially after the local police union refused to undergo mandated precinct reform to promote trust in the community.¹⁴¹

The formation of the alliance is a reflection of the national conversation that was ignited by George Floyd’s death. The members of BPSA have expressed that advocating for the Black community is one of their main goals, even if that involves challenging the

¹⁴¹<https://www.chicagotribune.com/news/criminal-justice/ct-black-chicago-police-organization-20210225-dvbzcs4z3feqvix4sumhcbgru-story.html>

status quo. Currently operating as a nonprofit, the BPSA has established working groups on diversity policies, adolescent coaching, and police reform. The group will also offer services to Black officers who are having difficulties with their overall well-being.¹⁴²

Police Diversity

With the recent demands for law enforcement to address racial injustice and the disparate impact of policing on communities of color, diversity in the ranks of officers has emerged as a potential area of reform. In a New York Times analysis of federal Bureau of Justice Statistics data on nearly 500 police departments across the country, more than 66 percent of the departments experienced a reduction in diversity and became more white from 2007 to 2016. Although the share of police officers of color has risen in that time period as well, the demographics of police departments do not reflect the demographics of communities they serve.¹⁴³ Black officers are twice as likely than their white counterparts to espouse the belief that the deaths of people of color at the hands of police officers are a legitimate problem.¹⁴⁴

¹⁴²<https://www.chicagotribune.com/news/criminal-justice/ct-black-chicago-police-organization-20210225-dvbzcs4z3feqvix4sumhcbbgru-story.html>

¹⁴³<https://www.nytimes.com/interactive/2020/09/23/us/bureau-justice-statistics-race.html>

Diversity in law enforcement is correlated with stronger bonds between a department and the community they serve, particularly communities of color. Use of force grievances have also been shown to decrease when there are more non-white officers in leadership positions.¹⁴⁵ A new comprehensive study of police diversity in Chicago, Illinois was conducted by a group of academics from Princeton University, Columbia University, the Wharton School of Business, and the University of California at Irvine. Their research concluded that, “Relative to white officers, Black and Hispanic officers make far fewer stops and arrests, and they use force less often, especially against Black civilians. These effects are largest in majority-Black areas of Chicago and stem from reduced focus on enforcing low-level offenses, with greatest impact on Black civilians. Female officers also use less force than males, a result that holds within all racial groups.”¹⁴⁶

Warrior vs. Guardian Mentality

The mentality of a warrior going to battle and the police force being an occupying army has been referred to as the “warrior mentality” for many years. Instilled, or reinforced, in police officers

¹⁴⁴<https://www.pewresearch.org/fact-tank/2017/01/12/black-and-white-officers-see-many-key-aspects-of-policing-differently/>

¹⁴⁵<https://www.nytimes.com/interactive/2020/09/23/us/bureau-justice-statistics-race.html>

¹⁴⁶<https://scholar.princeton.edu/sites/default/files/bkmr.pdf>

at the academy, the warrior concept is saturated throughout police culture. The guardian mentality is a newer idea that promotes community engagement, the establishment of meaningful relationships, and providing support to residents.¹⁴⁷

“From Warriors to Guardians: Recommitting American Police Culture to Democratic Ideals,” a report by the Harvard University Kennedy School of Government and the National Institute of Justice, directly addresses the problems of the warrior culture in policing. The report states: “In some communities, the friendly neighborhood beat cop – community guardian – has been replaced with the urban warrior, trained for battle and equipped with the accouterments and weaponry of modern warfare.”¹⁴⁸

The report goes on to highlight problems with police academies and the aggressive, warrior type manner in which new recruits are trained: “Another, more insidious problem in a military-style academy is the behavior modeled by academy staff. Those without power

(recruits) submit without question to the authority of those who have power (academy staff). Rule violations are addressed by verbal abuse or physical punishment in the form of pushups and extra laps.”¹⁴⁹

A novel initiative has been implemented at the Washington State Criminal Justice Training Commission (WSCJTC) to try to instill the guardian culture in police departments in the state. The WSCJTC conducts and implements training of over 10,000 police officers annually. Curricular and approach changes include the removal of salute requirements for recruits, motivating instead of criticizing recruits during training, and the incorporation of behavioral education into the curriculum. Early longitudinal evaluations of the WSCJTC program show that the officers that participated in the training felt more comfortable responding to behavioral and mental health crises when compared with officers that did not receive the training.¹⁵⁰ Gains in emotional intelligence and peer support were observed as well.

Police Training

Increased training and education programs are frequently promoted to police departments to help improve the quality of policing and support officers in gaining new skills. As noted by two Columbia Law School professors in an article on police reform, "... training does not take root unless officers are held accountable for obeying the rules and practicing the skills they are taught."¹⁵¹ Training alone is not adequate to transform a police department or change the behavior of an officer. But combined with culture change, new policies and accountability, training can be an effective tool to improve and reform the police.

Procedural Justice

Procedural Justice in policing improves police-community relations and emphasizes police departments and officers being transparent in their actions, fair in their processes, allowing community voice, and using impartiality in decision making.

According to the Department of Justice's Community Oriented Policing Services, "Procedural justice refers to the idea of fairness in the processes

that resolve disputes and allocate resources. It is a concept that, when embraced, promotes positive organizational change and bolsters better relationships."

A comprehensive evaluation of procedural justice training found that "training increased officer support for all of the procedural justice dimensions. . . . Post-training, officers were more likely to endorse the importance of giving citizens a voice, granting them dignity and respect, demonstrating neutrality, and (with the least enthusiasm) trusting them to do the right thing."¹⁵²

Several evaluations of procedural justice have found the education has been correlated with an improvement in relations between a community and a police department.¹⁵³ In Oakland, the

¹⁵¹<https://www.themarshallproject.org/2014/12/19/the-new-new-policing>

¹⁵²https://www.researchgate.net/publication/269723704_Training_police_for_procedural_justice

¹⁵³https://www.cityofberkeley.info/uploadedFiles/Police/Level_3_-_General/Principled%20Policing_outline.pdf

police department trained all officers in procedural justice and provided specialized procedural justice training to the department's gun violence reduction unit. Oakland's police department was also the first department in the country to have members of the community teach a portion of the procedural justice training.

While also suggesting procedural justice training as a way to combat the "warrior mentality" in police departments, a Harvard University Kennedy School of Government report advises that "Police leaders dedicated to establishing practices in their agencies based on procedural justice principles must ensure that their organizational culture is not in conflict with these same principles."¹⁵⁴

Implicit Bias

Implicit bias, as the name denotes, is an unconscious belief, attitude or bias against another race, ethnicity, or group. When Stanford University psychologist Jennifer Eberhardt conducted a large-scale study of policing, she discovered that the unconscious link between Black individuals and criminality is so high that even contemplating lawlessness can cause someone to fixate on Black

people.¹⁵⁵ These societal biases end up affecting the judgment of police officers whether they are aware of it or not. In Oakland, Professor Eberhardt and her team reviewed body camera footage from 1,000 traffic stops to elucidate the difference in officer language in encounters with Black versus white drivers. The research found that Oakland Police Department (OPD) officers consistently communicated with Black drivers in a less civil manner when compared with white drivers they addressed.¹⁵⁶ Various programs to address implicit bias were then recommended for implementation in OPD in response to these findings. Short, repeated education periods were found to be associated with higher levels of officer comprehension and knowledge.¹⁵⁷ The training was accompanied by more community engagement and data transparency in order to allow officers to start the process of unlearning implicit biases.

A novel approach to implicit bias training is the Counter Bias Training Simulation (CBTSim). This strategy utilizes shooting automation and video sequences to demonstrate the risks of implicit bias in a realistic setting.¹⁵⁸ In the curriculum, officers are forced to

¹⁵⁴<https://www.ojp.gov/pdffiles1/nij/248654.pdf>

deal with potentially explosive situations without reacting in a way that reflects preconceived notions.¹⁵⁹

De-escalation

With an increase in the number of deadly interactions between police and unarmed civilians going viral, there has been an on-going call for officers to be required to utilize effective verbal de-escalation strategies. Law enforcement officers in the United States kill nearly 1,000 civilians annually, many of whom are unarmed.¹⁶⁰ However, many law enforcement agencies provide little to no de-escalation training to officers, and 34 states have no mandate for de-escalation training.

Successful de-escalation programs operate to assist law enforcement personnel in relaxing the situation in order to gain valuable time in a crisis. Ideal guidance for officers suggests that 40 hours of de-escalation instruction is needed. The Police Executive Research Forum (PERF) de-escalation training is a program that has seen substantial reductions in use of force complaints and civilian injury. The training includes active listening, forming physical space between the individual and officer, and education regarding mental illness and well-being.¹⁶¹

¹⁵⁹<https://www.faac.com/milo/cognitive/cbtsim/>

¹⁶⁰https://www.washingtonpost.com/local/deescalation-training-police/2020/10/27/3a345830-14a8-11eb-ad6f-36c93e6e94fb_story.html

¹⁶¹Id.

When the Dallas Police Department implemented a training curriculum involving de-escalation tactics, use of force grievances declined by 18 percent the following year. After the San Francisco Police Department incorporated de-escalation training into their curriculum, use of force incidents dropped by 24 percent annually.¹⁶²

Community Engagement

A tense relationship between police and the community, especially communities of color, has been a long, intractable problem. Mistrust of law enforcement is not just theoretically problematic; it has also been proven to be linked to an increase in crime and violence.¹⁶³ Police officers should work to develop meaningful and positive relationships with members of the community by taking measures including regularly and actively attending community meetings, special events, neighborhood gatherings, positively communicating with area youth, and participating or hosting local sporting events. Law enforcement should convey the message that residents have a voice and that their input matters. Police should also connect with individuals in the community who advocate for greater social cohesion, such as faith

¹⁶²https://www.washingtonpost.com/local/deescalation-training-police/2020/10/27/3a345830-14a8-11eb-ad6f-36c93e6e94fb_story.html

¹⁶³<https://giffords.org/wp-content/uploads/2020/01/Giffords-Law-Center-In-Pursuit-of-Peace.pdf>

leaders, in order to successfully engage a broad swath of residents.¹⁶⁴

Crime Prevention Through Community Engagement (CPTCE), an extensive training guide for improving relations between police departments and the community, was recently developed by The American Crime Prevention Institute (ACPI). The training consists of strategies to engage communities of color, employ social media to interact with residents, coordinate with faith-based leaders, and partner with community-based organizations.¹⁶⁵

In New Haven, Connecticut, the police department implemented 40-hours of community engagement education for its recruits, including education about the area's history as well as continuous outreach activities. Officers overwhelmingly supported the initiative and reported having positive interactions. After the pilot, the police department expanded the program to partner with the local community-based organization, Leadership, Education, & Athletics in Partnership (LEAP).¹⁶⁶ Community engagement training for law enforcement in general is correlated with increased trust and stronger social ties in neighborhoods.

Open Policing is a research-based strategy that incorporates elements of procedural justice to improve police-community relations. Residents of communities are able to offer their comments and observations regarding their exchanges with police officers anonymously. All comments are collated into Agency Pages, which can be explored by residents and officers.¹⁶⁷ In addition to the Open Policing policy, some departments have initiated CFS reviews. After any call for service, community members are able to give details about their interaction in a three-minute review without any fear of consequence.¹⁶⁸

The four main components of procedural justice have been assimilated into Open Policing, including promotion of vocalization from the community, serving individuals with respect, objectivity in decision-making, and credibility with the community. Open Policing has been correlated with a 35 percent decrease in resident grievances and increased trust in police departments.¹⁶⁹

Data Driven Risk Management

The Oakland Police Department (OPD) recently implemented VISION, a Microsoft Power BI dashboard that allows for a precise review of police behavior. Working with Slalom, a data consulting firm, OPD has increased transparency and accountability through data analysis. Patterns of enforcement, historical activity, and performance over time are all monitored in close to real-time.¹⁷⁰

The dashboards were created with input from OPD staff and leadership, community-based organizations, other law enforcement agencies, and Stanford University's SPARQ (Social Psychological Answers to Real-world Questions). Each dashboard can be accessed by OPD leadership, depending

on security clearance. The dashboards have a simple interface, allowing supervisors to access and understand the data easily. Police supervisors can access a variety of data, from long-term information to arrests made within the last 24 hours.¹⁷¹ Dashboards allow for an easy breakdown of incidents by factors including race, gender, ethnicity, and officer. This permits police departments to monitor problematic patterns and address them quickly.¹⁷² Early Intervention Systems (EIS) such as these dashboards have been correlated with increased personnel safety, improved officer welfare, and an increase in police accountability.¹⁷³ One needed improvement with these systems is allowing public access to the information.

DRAFT

Finance Department
General Services Division

REQUEST FOR PROPOSALS (RFP)
Specification No. 21-11439
FOR
PRIORITIZED DISPATCH CONSULTANT
PROPOSALS WILL NOT BE OPENED AND READ PUBLICLY

Dear Proposer:

The City of Berkeley is soliciting written proposals from qualified firms or individuals to analyze the staffing, infrastructure, and technology needs of the Berkeley 9-1-1 Communication Center and create a project plan to implement an accredited prioritized emergency medical dispatch system. As a Request for Proposal (RFP) this is not an invitation to bid and although price is very important, other factors will be taken into consideration.

The project scope, content of proposal, and vendor selection process are summarized in the RFP (attached). **Proposals must be received no later than 2:00 pm, on Tuesday, May 22, 2021**. Proposals are to be via email with the title “**PRIORITIZED MEDICAL DISPATCH CONSULTANT**” and **Specification No. 21-11439** clearly indicated in the subject line of the email. Please submit one (1) PDF of the technical proposal. Corresponding pricing proposal shall be submitted as a separate document.

Email Proposals to:

City of Berkeley
Finance Department/General Services Division
purchasing@cityofberkeley.info

Proposals will not be accepted after the date and time stated above. Incomplete proposal or proposals that do not conform to the requirements specified herein will not be considered. Issuance of the RFP does not obligate the City to award a contract, nor is the City liable for any costs incurred by the proposer in the preparation and submittal of proposals for the subject work. The City retains the right to award all or parts of this contract to several bidders, to not select any bidders, and/or to re-solicit proposals. The act of submitting a proposal is a declaration that the proposer has read the RFP and understands all the requirements and conditions.

For questions concerning the anticipated work, or scope of the project, please contact **Abraham Roman, Fire Chief** via email at aroman@cityofberkeley.info no later than **5:00 p.m. May 3, 2021**. Answers to questions will **not** be provided by telephone or email. Answers to all questions or any addenda will be **posted** on the City of Berkeley’s site at <http://www.cityofberkeley.info/ContentDisplay.aspx?id=7128>. It is the vendor’s responsibility to check this site. For general questions concerning the submittal process, contact purchasing at 510-981-7320.

We look forward to receiving and reviewing your proposal.

Sincerely,

Darryl Sweet
General Services Manager

I. BACKGROUND

The City of Berkeley provides 24/7 dispatch services for police, fire, and emergency medical service (EMS). In order to better distribute responder resources and facilitate more efficient responses, the City would like to engage with a vendor to assist the City in transitioning to a prioritized fire and medical dispatch system. More specifically, the selected vendor will be asked to perform a needs assessment based on trending call volume in to the dispatch center, identify products/solutions that are the best fit for the City, propose any structural changes that are necessary in the dispatch center, and write an implementation project plan.

II. SCOPE OF SERVICES

- a. Term: 6 Months to begin on or around June 1, 2021.
- b. Scope:
 - a. Step 1 – Analysis: Completion date of August 31, 2021. Analyze and recommend a prioritized emergency fire & medical dispatch system for the Berkeley 9-1-1 Communication Center. The analysis should cover:
 - i. Available and recommended software and hardware options, including features, security issues, and cost (one-time and ongoing),
 - ii. An evaluation of the City’s current staffing model and proposed changes that take in to consideration findings from the [audit](#)¹ performed by City Auditor. (Attachment J),
 - iii. Initial and ongoing training,
 - iv. Physical/facility improvements, if any, needed to the current Communication Center to implement prioritized dispatch,
 - v. Recommendation for the most appropriate accreditation option,
 - vi. Best practices to ensure continuous quality improvement, and
 - vii. Other factors identified by the City and vendor.
 - b. Step II – Implementation Plan: Completion date of October 31, 2021. Create an implementation plan for the project. The plan should include, but is not limited to:
 - i. Detailed implementation timeline including critical dependencies identified,
 - ii. Three-year budget consisting of one-time and ongoing costs needed to successfully implement a prioritized dispatch system,
 - iii. Staffing requirements,
 - iv. Technology needs and integration,
 - v. Start up and ongoing training needs,
 - vi. Physical / facility improvements, if any, needed to the current Communication Center including an order-of-magnitude estimate of costs,
 - vii. Recommendation for which accreditation model to pursue and a plan to move forward that includes cost and staffing requirements, and
 - viii. Other factors identified by the City and vendor.
- c. Vendor will receive 50% of contract total upon completion of Step 1, and 50% upon completion of Step II.

¹ https://www.cityofberkeley.info/uploadedFiles/Auditor/Level_3_-_General/Dispatch%20Workload_Fiscal%20Year%202018.pdf

III. SUBMISSION REQUIREMENTS

Preparation of Proposal:

1. Any deviation from this solicitation shall be clearly stated and identified as “Alternative Terms/Exceptions” and must be included with your submittal. If alternatives are not acceptable, the City reserves the right to reject the proposal; subject to negotiation.
2. It is the responsibility of the Contractor to examine the entire RFP and seek clarification of any requirement that may not be clear and to check all responses for accuracy before submitting a proposal. Negligence in preparing a proposal confers no right of withdrawal after due date and time. Contractors are strongly encouraged to:
 - a. Consider applicable laws and/or economic conditions that may affect cost, progress, performance, or furnishing of the products or services.
 - b. Study and carefully correlate Contractor’s knowledge and observations with the RFP document and other related data.
 - c. Promptly notify the City of all conflicts, errors, ambiguities, or discrepancies which a Contractor has discovered in the RFP documents.
3. Most Favored Customer – The offered prices for the products and services described herein are and will continue to be the lowest prices charged by Contractor for the same or substantially similar products and services. If at any time during the term of any resulting Agreement, Contractor offers or sells the same or substantially similar products and services to any other local or state public agency in the State of California at a lower price than the prices offered or charged the City of Berkeley, Contractor will promptly notify the City of Berkeley and within thirty (30) days reduce the purchase prices for the applicable products and services to such lower price for the products and services described herein.
4. Purchases by other Public Agencies – Contractor agrees to extend identical pricing for products and services provided to the City, under the same terms and conditions specified hereunder, to all public agencies that can accept such cooperative purchasing agreements, and to the extent allowed by law. Each such independent public agency shall execute its own Contract with the Contractor for its requirements and using its own sources of funding. The City shall not incur any financial or any other liability in connection with Contractor’s contracting with other public agencies.

All proposals shall include the following information, organized as separate sections of the proposal. The proposal should be concise and to the point.

1. Contractor Identification:

Provide the name of the firm, the firm’s principal place of business, the name and telephone number of the contact person and company tax identification number.

2. Client References:

Provide a minimum of *three (3)* client references. References should be California cities or other large public sector entities. Provide the designated person’s name, title, organization, address, telephone number, and the project(s) that were completed under that client’s direction.

3. Price Proposal:

The proposal shall include pricing for all services. Pricing shall be all inclusive unless indicated otherwise. Pricing proposals shall be a separate document. The Proposal shall itemize all services, including hourly rates for all professional, technical and support personnel, and all other charges related to completion of the work shall be itemized.

4. Scope of Work

Discuss in detail each item in the RFP and how you intend to address each.

5. Firm Background and Project Team:

Background information on the firm, including details of the firm's experience with similar assignments; a brief resume of the individual(s) assigned to this project; and sample work products. The proposal should include information about the firm's current engagements and an affirmation of the firm's ability to focus on this project.

6. Timeline and Project Schedule:

A detailed timeline for the completion of all the services described in the Scope of Work.

7. Past Performance: Analysis

Demonstrated history of conducting analysis of current and recommending changes or new prioritized dispatch systems of similar or larger size and scope.

8. Past Performance: Implementation

Demonstrated history of creating implementation plans and running implementation for prioritized dispatch systems of similar or larger size and scope.

9. Contract Terminations:

If your organization has had a contract terminated in the last five (5) years, describe such incident. Termination for default is defined as notice to stop performance due to the vendor's non-performance or poor performance and the issue of performance was either (a) not litigated due to inaction on the part of the vendor, or (b) litigated and such litigation determined that the vendor was in default.

Submit full details of the terms for default including the other party's name, address, and phone number. Present the vendor's position on the matter. The City will evaluate the facts and may, at its sole discretion, reject the proposal on the grounds of the past experience.

If the firm has not experienced any such termination for default or early termination in the past five (5) years, so indicate.

IV. SELECTION CRITERIA

The following criteria will be considered, although not exclusively, in determining which firm is hired.

- 1. References 20%
- 2. Price 20%
- 3. Past Performance: Analysis 40%
- 4. Past Performance: Implementation 20%

A selection panel will be convened of staff from Berkeley Fire, Police, and Communications Center to evaluate and recommend the successful vendor.

V. PAYMENT

Payment will be made in two parts:

- 1) 50% when Step I of the scope of services is completed to the satisfaction of the City
- 2) 50% when Step II of the scope of services is completed to the satisfaction of the City

Invoices: Invoices must be fully itemized, and provide sufficient information for approving payment and audit. Invoices must be accompanied by receipt for services in order for payment to be processed. Mail invoices to the Project Manager and reference the contract number.

City of Berkeley
Accounts Payable
PO Box 700
Berkeley, CA 94701
Attn: **Stacie Clarke**

Payments: The City will make payment to the vendor within 30 days of receipt of a correct and complete invoice.

VI. CITY REQUIREMENTS

A. Non-Discrimination Requirements:

Ordinance No. 5876-N.S. codified in B.M.C. Chapter 13.26 states that, for contracts worth more than \$3,000 bids for supplies or bids or proposals for services shall include a completed Workforce Composition Form. Businesses with fewer than five employees are exempt from submitting this form. (See B.M.C. 13.26.030)

Under B.M.C. section 13.26.060, the City may require any bidder or vendor it believes may have discriminated to submit a Non-Discrimination Program. The Contract Compliance Officer will make this determination. This applies to all contracts and all consultants (contractors). Berkeley Municipal Code section 13.26.070 requires that all contracts with the City contain a non-discrimination clause, in which the contractor agrees not to discriminate and allows the City access to records necessary to monitor compliance. This section also applies to all contracts and all consultants. **Bidders must submit the attached Non-Discrimination Disclosure Form with their proposal**

B. Nuclear Free Berkeley Disclosure Form:

Berkeley Municipal Code section 12.90.070 prohibits the City from granting contracts to companies that knowingly engage in work for nuclear weapons. This contracting prohibition may be waived if the City Council determines that no reasonable alternative exists to doing business with a company that engages in nuclear weapons work. If your company engages in work for nuclear weapons, explain on the Disclosure Form the nature of such work. **Bidders must submit the attached Nuclear Free Disclosure Form with their proposal.**

C. Oppressive States:

The City of Berkeley prohibits granting of contracts to firms that knowingly provide personal services to specified Countries. This contracting prohibition may be waived if the City Council determines that no reasonable alternative exists to doing business with a company that is covered by City Council Resolution No. 59,853-N.S. If your company or any subsidiary is covered, explain on the Disclosure Form the nature of such work. **Bidders must submit the attached Oppressive States Disclosure Form with their proposal.**

D. Sanctuary City Contracting Ordinance:

Chapter 13.105 of the Berkeley Municipal Code prohibits the City from granting and or retaining contracts with any person or entity that provides Data Broker or Extreme Vetting services to the U.S. Immigration and Customs Enforcement Division of the United States Department of Homeland Security (“ICE”). **Bidders must submit the attached Sanctuary City Compliance Statement with their proposal.**

E. Conflict of Interest:

In the sole judgment of the City, any and all proposals are subject to disqualification on the basis of a conflict of interest. The City may not contract with a vendor if the vendor or an employee, officer or director of the proposer's firm, or any immediate family member of the preceding, has served as an elected official, employee, board or commission member of the City who influences the making of the contract or has a direct or indirect interest in the contract.

Furthermore, the City may not contract with any vendor whose income, investment, or real property interest may be affected by the contract. The City, at its sole option, may disqualify any proposal on the basis of such a conflict of interest. **Please identify any person associated with the firm that has a potential conflict of interest.**

F. Berkeley Living Wage Ordinance:

Chapter 13.27 of the Berkeley Municipal Code requires that contractors offer all eligible employees with City mandated minimum compensation during the term of any contract that may be awarded by the City. If the Contractor is not currently subject to the Living Wage Ordinance, cumulative contracts with the City within a one-year period may subject Contractor to the requirements under B.M.C. Chapter 13.27. A certification of compliance with this ordinance will be required upon execution of a contract. The current Living Wage rate can be found here: https://www.cityofberkeley.info/Finance/Home/Vendors_Living_Wage_Ordinance.aspx. The Living Wage rate is adjusted automatically effective June 30th of each year commensurate with the corresponding increase in the Consumer Price Index published in April of each year. If the Living Wage rate is adjusted during the term of your agreement, you must pay the new adjusted rate to all eligible employees, regardless of what the rate was when the contract was executed.

G. Berkeley Equal Benefits Ordinance:

Chapter 13.29 of the Berkeley Municipal Code requires that contractors offer domestic partners the same access to benefits that are available to spouses. A certification of compliance with this ordinance will be required upon execution of a contract.

H. Statement of Economic Interest:

The City’s Conflict of Interest Code designates “consultants” as a category of persons who must complete Form 700, Statement of Economic Interest, at the beginning of the contract period and again at the termination of the contract. The selected contractor will be required to complete the Form 700 before work may begin.

VII. OTHER REQUIREMENTS

A. Insurance

The selected contractor will be required to maintain general liability insurance in the minimum amount of \$2,000,000, automobile liability insurance in the minimum amount of \$1,000,000 and a professional liability insurance policy in the amount of \$2,000,000 to cover any claims arising out of the performance of the contract. The general liability and automobile insurance must name the City, its officers, agents, volunteers and employees as additional insureds.

B. Worker’s Compensation Insurance:

A selected contractor who employs any person shall maintain workers' compensation insurance in accordance with state requirements. Sole proprietors with no employees are not required to carry Worker’s Compensation Insurance.

C. Business License

Virtually every contractor that does business with the City must obtain a City business license as mandated by B.M.C. Ch. 9.04. The business license requirement applies whether or not the contractor has an office within the City limits. However, a "casual" or "isolated" business transaction (B.M.C. section 9.04.010) does not subject the contractor to the license tax. Warehousing businesses and charitable organizations are the only entities specifically exempted in the code from the license requirement (see B.M.C. sections, 9.04.295 and 9.04.300). Non-profit organizations are granted partial exemptions (see B.M.C. section 9.04.305). Persons who, by reason of physical infirmity, unavoidable misfortune, or unavoidable poverty, may be granted an exemption of one annual free license at the discretion of the Director of Finance. (see B.M.C. sections 9.04.290).

Vendor must apply for a City business license and show proof of application to Purchasing Manager within seven days of being selected as intended contractor.

The Customer Service Division of the Finance Department located at 1947 Center Street, Berkeley, CA 94704, issues business licenses. Contractors should contact this division for questions and/or information on obtaining a City business license, in person, or by calling 510-981-7200.

D. Recycled Paper

Any printed reports for the City required during the performance of the work shall be on 100% recycled paper, and shall be *printed on both sides of the page* whenever practical.

E. State Prevailing Wage:

Certain labor categories under this project may be subject to prevailing wages as identified in the State of California Labor Code commencing in Section 1770 et. seq. These labor categories, when employed for any “work performed during the design and preconstruction phases of construction including, but not limited to, inspection and land surveying work,” constitute a “Public Work” within the definition of Section 1720(a)(1) of the California Labor Code requiring payment of prevailing wages.

Wage information is available through the California Division of Industrial Relations web site at:
http://www.dir.ca.gov/OPRL/statistics_and_databases.html

VIII. SCHEDULE (dates are subject to change)

City of Berkeley Contract Compliance Officer

Attachment B (page 1)

Occupational Categories

Officials and Administrators - Occupations in which employees set broad policies, exercise overall responsibility for execution of these policies, or provide specialized consultation on a regional, district or area basis. Includes: department heads, bureau chiefs, division chiefs, directors, deputy superintendents, unit supervisors and kindred workers.

Professionals - Occupations that require specialized and theoretical knowledge that is usually acquired through college training or through work experience and other training that provides comparable knowledge. Includes: personnel and labor relations workers, social workers, doctors, psychologists, registered nurses, economists, dietitians, lawyers, systems analysts, accountants, engineers, employment and vocational rehabilitation counselors, teachers or instructors, and kindred workers.

Technicians - Occupations that require a combination of basic scientific or technical knowledge and manual skill that can be obtained through specialized post-secondary school education or through equivalent on-the-job training. Includes: computer programmers and operators, technical illustrators, highway technicians, technicians (medical, dental, electronic, physical sciences) and kindred workers.

Protective Service Workers - Occupations in which workers are entrusted with public safety, security and protection from destructive forces. Includes: police officers, fire fighters, guards, sheriffs, bailiffs, correctional officers, detectives, marshals, harbor patrol officers, and kindred workers.

Para-Professionals - Occupations in which workers perform some of the duties of a professional or technician in a supportive role, which usually requires less formal training and/or experience normally required for professional or technical status. Such positions may fall within an identified pattern of a staff development and promotion under a "New Transporters" concept. Includes: library assistants, research assistants, medical aides, child support workers, police auxiliary, welfare service aides, recreation assistants, homemaker aides, home health aides, and kindred workers.

Office and Clerical - Occupations in which workers are responsible for internal and external communication, recording and retrieval of data and/or information and other paperwork required in an office. Includes: bookkeepers, messengers, office machine operators, clerk-typists, stenographers, court transcribers, hearings reporters, statistical clerks, dispatchers, license distributors, payroll clerks, and kindred workers.

Skilled Craft Workers - Occupations in which workers perform jobs which require special manual skill and a thorough and comprehensive knowledge of the processes involved in the work which is acquired through on-the-job training and experience or through apprenticeship or other formal training programs. Includes: mechanics and repairpersons, electricians, heavy equipment operators, stationary engineers, skilled machining occupations, carpenters, compositors and typesetters, and kindred workers.

Service/Maintenance - Occupations in which workers perform duties which result in or contribute to the comfort, convenience, hygiene or safety of the general public or which contribute to the upkeep and care of buildings, facilities or grounds of public property. Workers in this group may operate machinery. Includes: chauffeurs, laundry and dry cleaning operatives, truck drivers, bus drivers, garage laborers, custodial personnel, gardeners and groundskeepers, refuse collectors, and construction laborers.

Attachment B (page 2)

CITY OF BERKELEY
Nuclear Free Zone Disclosure Form

I (we) certify that:

1. I am (we are) fully cognizant of any and all contracts held, products made or otherwise handled by this business entity, and of any such that are anticipated to be entered into, produced or handled for the duration of its contract(s) with the City of Berkeley. (To this end, more than one individual may sign this disclosure form, if a description of which type of contracts each individual is cognizant is attached.)
2. I (we) understand that Section 12.90.070 of the Nuclear Free Berkeley Act (Berkeley Municipal Code Ch. 12.90; Ordinance No. 5784-N.S.) prohibits the City of Berkeley from contracting with any person or business that knowingly engages in work for nuclear weapons.
3. I (we) understand the meaning of the following terms as set forth in Berkeley Municipal Code Section 12.90.130:

"Work for nuclear weapons" is any work the purpose of which is the development, testing, production, maintenance or storage of nuclear weapons or the components of nuclear weapons; or any secret or classified research or evaluation of nuclear weapons; or any operation, management or administration of such work.

"Nuclear weapon" is any device, the intended explosion of which results from the energy released by reactions involving atomic nuclei, either fission or fusion or both. This definition of nuclear weapons includes the means of transporting, guiding, propelling or triggering the weapon if and only if such means is destroyed or rendered useless in the normal propelling, triggering, or detonation of the weapon.

"Component of a nuclear weapon" is any device, radioactive or non-radioactive, the primary intended function of which is to contribute to the operation of a nuclear weapon (or be a part of a nuclear weapon).

4. Neither this business entity nor its parent nor any of its subsidiaries engages in work for nuclear weapons or anticipates entering into such work for the duration of its contract(s) with the City of Berkeley.

Based on the foregoing, the undersigned declares under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

CITY OF BERKELEY
Oppressive States Compliance Statement

The undersigned, an authorized agent of _____ (hereafter "Vendor"), has had an opportunity to review the requirements of Berkeley City Council Resolution No. 59,853-N.S. (hereafter "Resolution"). Vendor understands and agrees that the City may choose with whom it will maintain business relations and may refrain from contracting with those Business Entities which maintain business relationships with morally repugnant regimes. Vendor understands the meaning of the following terms used in the Resolution:

"Business Entity" means "any individual, firm, partnership, corporation, association or any other commercial organization, including parent-entities and wholly-owned subsidiaries" (to the extent that their operations are related to the purpose of the contract with the City).

"Oppressive State" means: **Tibet Autonomous Region and the Provinces of Abo, Kham and U-Tsang**

"Personal Services" means "the performance of any work or labor and shall also include acting as an independent contractor or providing any consulting advice or assistance, or otherwise acting as an agent pursuant to a contractual relationship."

Contractor understands that it is not eligible to receive or retain a City contract if at the time the contract is executed, or at any time during the term of the contract it provides Personal Services to:

- a. The governing regime in any Oppressive State.
- b. Any business or corporation organized under the authority of the governing regime of any Oppressive State.
- c. Any person for the express purpose of assisting in business operations or trading with any public or private entity located in any Oppressive State.

Vendor further understands and agrees that Vendor's failure to comply with the Resolution shall constitute a default of the contract and the City Manager may terminate the contract and bar Vendor from bidding on future contracts with the City for five (5) years from the effective date of the contract termination.

The undersigned is familiar with, or has made a reasonable effort to become familiar with, Vendor's business structure and the geographic extent of its operations. By executing the Statement, Vendor certifies that it complies with the requirements of the Resolution and that if any time during the term of the contract it ceases to comply, Vendor will promptly notify the City Manager in writing.

Based on the foregoing, the undersigned declares under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Printed Name: _____ Title: _____

Signature: _____ Date: _____

Business Entity: _____

Contract Description/Specification No: **PRIORITIZED DISPATCH CONSULTANT/21-11439**

I am unable to execute this Statement; however, Vendor is exempt under Section VII of the Resolution. I have attached a separate statement explaining the reason(s) Vendor cannot comply and the basis for any requested exemption.

Attachment D

CITY OF BERKELEY
Sanctuary City Compliance Statement

The undersigned, an authorized agent of _____ (hereafter "Contractor"), has had an opportunity to review the requirements of Berkeley Code Chapter 13.105 (hereafter "Sanctuary City Contracting Ordinance" or "SCCO"). Contractor understands and agrees that the City may choose with whom it will maintain business relations and may refrain from contracting with any person or entity that provides Data Broker or Extreme Vetting services to the U.S. Immigration and Customs Enforcement Division of the United States Department of Homeland Security ("ICE"). Contractor understands the meaning of the following terms used in the SCCO:

- a. "Data Broker" means either of the following:
 - i. The collection of information, including personal information about consumers, from a wide variety of sources for the purposes of reselling such information to their customers, which include both private-sector business and government agencies;
 - ii. The aggregation of data that was collected for another purpose from that for which it is ultimately used.

- b. "Extreme Vetting" means data mining, threat modeling, predictive risk analysis, or other similar services." Extreme Vetting does not include:
 - i. The City's computer-network health and performance tools;
 - ii. Cybersecurity capabilities, technologies and systems used by the City of Berkeley Department of Information Technology to predict, monitor for, prevent, and protect technology infrastructure and systems owned and operated by the City of Berkeley from potential cybersecurity events and cyber-forensic based investigations and prosecutions of illegal computer based activity.

Contractor understands that it is not eligible to receive or retain a City contract if at the time the Contract is executed, or at any time during the term of the Contract, it provides Data Broker or Extreme Vetting services to ICE.

Contractor further understands and agrees that Contractor's failure to comply with the SCCO shall constitute a material default of the Contract and the City Manager may terminate the Contract and bar Contractor from bidding on future contracts with the City for five (5) years from the effective date of the contract termination.

By executing this Statement, Contractor certifies that it complies with the requirements of the SCCO and that if any time during the term of the Contract it ceases to comply, Contractor will promptly notify the City Manager in writing. Any person or entity who knowingly or willingly supplies false information in violation of the SCCO shall be guilty of a misdemeanor and up to a \$1,000 fine.

Based on the foregoing, the undersigned declares under penalty of perjury under the laws of the State of California that the foregoing is true and correct. Executed this _____ day of _____, 20__, at _____, California.

CITY OF BERKELEY
Living Wage Certification for Providers of Services

TO BE COMPLETED BY ALL PERSONS OR ENTITIES ENGAGING IN A CONTRACT FOR PERSONAL SERVICES WITH THE CITY OF BERKELEY.

The Berkeley Municipal Code Chapter 13.27, Berkeley's Living Wage Ordinance (LWO), provides that contractors who engage in a specified amount of business with the City (except where specifically exempted) under contracts which furnish services to or for the City in any twelve (12) month period of time shall comply with all provisions of this Ordinance. The LWO requires a City contractor to provide City mandated minimum compensation to all eligible employees, as defined in the Ordinance. In order to determine whether this contract is subject to the terms of the LWO, please respond to the questions below. Please note that the LWO applies to those contracts where the contractor has achieved a cumulative dollar contracting amount with the City. Therefore, even if the LWO is inapplicable to this contract, subsequent contracts may be subject to compliance with the LWO. Furthermore, the contract may become subject to the LWO if the status of the Contractor's employees change (i.e. additional employees are hired) so that Contractor falls within the scope of the Ordinance.

Section I.

1. IF YOU ARE A FOR-PROFIT BUSINESS, PLEASE ANSWER THE FOLLOWING QUESTIONS

a. During the previous twelve (12) months, have you entered into contracts, including the present contract, bid, or proposal, with the City of Berkeley for a cumulative amount of \$25,000.00 or more?

YES _____ NO _____

If **no**, this contract is NOT subject to the requirements of the LWO, and you may continue to Section II. If **yes**, please continue to question **1(b)**.

b. Do you have six (6) or more employees, including part-time and stipend workers?

YES _____ NO _____

If you have answered, "YES" to questions 1(a) and 1(b) this contract **IS** subject to the LWO. If you responded "NO" to 1(b) this contract IS NOT subject to the LWO. **Please continue to Section II.**

2. IF YOU ARE A NON-PROFIT BUSINESS, AS DEFINED BY SECTION 501(C) OF THE INTERNAL REVENUE CODE OF 1954, PLEASE ANSWER THE FOLLOWING QUESTIONS.

a. During the previous twelve (12) months, have you entered into contracts, including the present contract, bid or proposal, with the City of Berkeley for a cumulative amount of \$100,000.00 or more?

YES _____ NO _____

If **no**, this Contract is NOT subject to the requirements of the LWO, and you may continue to Section II. If **yes**, please continue to question 2(b).

b. Do you have six (6) or more employees, including part-time and stipend workers?

YES _____ NO _____

If you have answered, "YES" to questions 2(a) and 2(b) this contract **IS** subject to the LWO. If you responded "NO" to 2(b) this contract IS NOT subject to the LWO. **Please continue to Section II.**

Section II

Please read, complete, and sign the following:

THIS CONTRACT **IS** SUBJECT TO THE LIVING WAGE ORDINANCE.

THIS CONTRACT **IS NOT** SUBJECT TO THE LIVING WAGE ORDINANCE.

The undersigned, on behalf of himself or herself individually and on behalf of his or her business or organization, hereby certifies that he or she is fully aware of Berkeley's Living Wage Ordinance, and the applicability of the Living Wage Ordinance, and the applicability of the subject contract, as determined herein. The undersigned further agrees to be bound by all of the terms of the Living Wage Ordinance, as mandated in the Berkeley Municipal Code, Chapter 13.27. If, at any time during the term of the contract, the answers to the questions posed herein change so that Contractor would be subject to the LWO, Contractor will promptly notify the City Manager in writing. Contractor further understands and agrees that the failure to comply with the LWO, this certification, or the terms of the Contract as it applies to the LWO, shall constitute a default of the Contract and the City Manager may terminate the contract and bar Contractor from future contracts with the City for five (5) years from the effective date of the Contract termination. If the contractor is a for-profit business and the LWO is applicable to this contract, the contractor must pay a living wage to all employees who spend 25% or more of their compensated time engaged in work directly related to the contract with the City. If the contractor is a non-profit business and the LWO is applicable to this contract, the contractor must pay a living wage to all employees who spend 50% or more of their compensated time engaged in work directly related to the contract with the City.

These statements are made under penalty of perjury under the laws of the state of California.

To be completed by
 Contractor/Vendor

**Form EBO-1
 CITY OF BERKELEY**

CERTIFICATION OF COMPLIANCE WITH EQUAL BENEFITS ORDINANCE

If you are a **contractor**, return this form to the originating department/project manager. If you are a **vendor** (supplier of goods), return this form to the Purchasing Division of the Finance Dept.

SECTION 1. CONTRACTOR/VENDOR INFORMATION

Name:		Vendor No.:	
Address:	City:	State:	ZIP:
Contact Person:		Telephone:	
E-mail Address:		Fax No.:	

SECTION 2. COMPLIANCE QUESTIONS

- A. The EBO is inapplicable to this contract because the contractor/vendor has no employees.
 Yes No *(If "Yes," proceed to Section 5; if "No", continue to the next question.)*
- B. Does your company provide (or make available at the employees' expense) any employee benefits?
 Yes No
 If "Yes," continue to Question C.
 If "No," proceed to Section 5. (The EBO is not applicable to you.)
- C. Does your company provide (or make available at the employees' expense) any benefits to the spouse of an employee? Yes No
- D. Does your company provide (or make available at the employees' expense) any benefits to the domestic partner of an employee? Yes No

If you answered "No" to both Questions C and D, proceed to Section 5. (The EBO is not applicable to this contract.) **If you answered "Yes" to both Questions C and D, please continue to Question E.**
If you answered "Yes" to Question C and "No" to Question D, please continue to Section 3.

- E. Are the benefits that are available to the spouse of an employee identical to the benefits that are available to the domestic partner of the employee? Yes No

If you answered "Yes," proceed to Section 4. (You are in compliance with the EBO.)
If you answered "No," continue to Section 3.

SECTION 3. PROVISIONAL COMPLIANCE

- A. Contractor/vendor is not in compliance with the EBO now but will comply by the following date:
 - By the first effective date after the first open enrollment process following the contract start date, not to exceed two years, if the Contractor submits evidence of taking reasonable measures to comply with the EBO; or
 - At such time that administrative steps can be taken to incorporate nondiscrimination in benefits in the Contractor's infrastructure, not to exceed three months; or
 - Upon expiration of the contractor's current collective bargaining agreement(s).

Attachment G (page 1)

B. If you have taken all reasonable measures to comply with the EBO but are unable to do so, do you agree to provide employees with a cash equivalent?* Yes No

* The cash equivalent is the amount of money your company pays for spousal benefits that are unavailable for domestic partners.

SECTION 4. REQUIRED DOCUMENTATION

At time of issuance of purchase order or contract award, you may be required by the City to provide documentation (copy of employee handbook, eligibility statement from your plans, insurance provider statements, etc.) to verify that you do not discriminate in the provision of benefits.

SECTION 5. CERTIFICATION

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that I am authorized to bind this entity contractually. By signing this certification, I further agree to comply with all additional obligations of the Equal Benefits Ordinance that are set forth in the Berkeley Municipal Code and in the terms of the contract or purchase order with the City.

Commercial General and Automobile Liability Endorsement

The attached Certificates of Insurance are hereby certified to be a part of the following policies having the following expiration dates:

Policy No.	Company Providing Policy	Expir. Date
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

The scope of the insurance afforded by the policies designated in the attached certificates is not less than that which is afforded by the Insurance Service Organization's or other "Standard Provisions" forms in use by the insurance company in the territory in which coverage is afforded.

Such Policies provide for or are hereby amended to provide for the following:

1. The named insured is _____.
2. CITY OF BERKELEY ("City") is hereby included as an additional insured with respect to liability arising out of the hazards or operations under or in connection with the following agreement:
_____.

The insurance provided applies as though separate policies are in effect for both the named insured and City, but does not increase the limits of liability set forth in said policies.

3. The limits of liability under the policies are not less than those shown on the certificate to which this endorsement is attached.
4. Cancellation or material reduction of this coverage will not be effective until thirty (30) days following written notice to _____, Department of _____, Berkeley, CA.
5. This insurance is primary and insurer is not entitled to any contribution from insurance in effect for City.

The term "City" includes successors and assigns of City and the officers, employees, agents and volunteers.

Audit Report
April 25, 2019

911 Dispatchers: Understaffing Leads to Excessive Overtime and Low Morale

BERKELEY CITY AUDITOR

911 Dispatchers: Understaffing Leads to Excessive Overtime and Low Morale

Report Highlights

April 25, 2019

Findings

- It is taking longer than previous years for call takers to answer 911 calls and the Communications Center does not have enough call takers to answer the current 911 call volume. We also found that, with predicted population growth, the Communications Center would likely need additional resources in the future to maintain its emergency response services.
- Due to consistent understaffing, the Communications Center relies heavily on overtime to meet minimum staffing requirements, spending nearly \$1 million in 2017 on overtime.
- Morale in the Communications Center is low and dispatchers feel unsupported. We found that there are some resources available for staff to manage stress; however, dispatchers often do not have time to access them.

Recommendations

We recommend that the Police Department conduct a staffing analysis to determine the appropriate staffing levels, create a recruitment and continuing training plan for dispatchers, establish a call taker classification, and implement automated scheduling software to provide information to inform future budgeting decisions, decrease the reliance on overtime, and relieve the burden placed on overworked staff.

We also recommend that the Police Department implement programs to increase morale and communication. These include recommendations to establish routine meetings with dispatch supervisors, sworn police, and fire personnel, and to establish a comprehensive stress management program.

Objectives

1. To what extent does the Communications Center, which answers 911 calls, have sufficient staffing to handle workloads and service demands?
2. What contributes to overtime use?
3. How do working conditions affect morale?

Why This Audit Is Important

The Police Department Communications Center serves as Berkeley's 911 public safety answering point, receiving all emergency and non-emergency police, fire, and medical calls in the city and dispatching public safety personnel to respond as appropriate. To ensure the wellbeing of the public, police officers, firefighters, paramedics, and dispatchers, the City must maintain a Communications Center that is appropriately staffed. Without sufficient staff, it takes longer for call takers to answer 911 calls. The faster the Communications Center can get a police officer, firefighter, or paramedic to the scene, the better the chances of a good outcome. The seconds it takes to answer and prepare a call for dispatch can mean the difference between life and death.

Introduction

We identified workload capacity as an immediate concern to the City’s operations and strategic planning in our fiscal year 2018 Audit Plan. We, therefore, included in our audit plan a series of audits that evaluated the City’s ability to provide expected and critical services to the Berkeley community. To ensure the wellbeing of the public, police officers, firefighters, paramedics, and dispatchers, the City must maintain a Communications Center (Center) that is appropriately staffed. Without sufficient staff, it takes longer for call takers to answer 911 calls. The faster the Center can get a police officer, firefighter, or paramedic to the scene, the better the chances of a good outcome. The seconds it takes a call taker to answer and prepare a call for dispatch can mean the difference between life and death.

Objectives, Scope, and Methodology

Our objectives were to determine:

1. To what extent does the Communications Center, which answers 911 calls, have sufficient staffing to handle workloads and service demands?
2. What contributes to overtime use?
3. How do working conditions affect morale?

We examined the Center’s call volume data for calendar years 2013 through 2017, performed interviews, and conducted a survey to gain an understanding of the program. We specifically assessed minimum staffing levels, call answer performance, overtime, recruitment, retention, training, and morale. For more information, see p. 26.

Background

The Public Safety Dispatcher (dispatcher) is often the unsung first responder of the emergency response team. Dispatchers are highly trained professionals, who gather essential information from callers and dispatch the appropriate response team to the scene. They take control of situations that may be chaotic, stressful, confusing, and traumatic. They must be quick-thinking, organized, levelheaded, and confident in their abilities. Dispatchers are at the core of a coordinated emergency response and must make split-second decisions in order to ensure the safety of responders and the public.

The Center, run out of the Police Department, serves as Berkeley’s 911 public safety answering point (PSAP), receiving all emergency and non-emergency police, fire and medical calls in the city and dispatching public safety personnel to respond as appropriate. To ensure the wellbeing of dispatchers, police officers, firefighters, paramedics, and the public, the City must maintain a Center that is appropriately staffed.

Structure, Staffing, and Training

The Center is part of the Support Services Division of the Berkeley Police Department, overseen by a sworn police captain. The Center is staffed 24 hours a day, 365 days of the year by a team of trained dispatchers under the direction of a non-sworn manager. Sworn personnel take an oath to support the Constitution of the United States and the laws of the state and local jurisdiction. This includes police officers and detectives. Non-sworn (civilian) personnel do not take an oath and have limited legal powers or none at all. This includes dispatchers and parking enforcement officers.

Figure 1. Berkeley Police Department Organizational Chart

Source: City of Berkeley 2018-2019 Biennial Budget

The 2018 City budget authorized 33 non-sworn full-time equivalent positions for the Center, including 28 public safety dispatchers, four supervisors, and one manager. At the end of May 2018, the Police Department had only filled 23.5 of the 28 authorized full-time equivalent dispatcher positions and was

actively recruiting for new hires. In addition to civilian dispatchers, the Center utilizes three additional Police personnel who work overtime as call takers to meet minimum staffing levels on an as-needed basis and dependent on their availability.

Dispatcher Roles

Dispatchers have four primary roles: call taker, records desk operator, fire radio dispatcher, and police radio dispatcher. All Berkeley dispatchers are cross-trained and may perform any function during a shift.

Table 1. Dispatcher Work Positions and Duties

Position	Duties
Call Taker	<ul style="list-style-type: none"> Accepts and processes inbound 911 and administrative calls for police, fire, and medical services as well as other services such as animal control Inputs call information into Computer-Aided Dispatch (CAD) system and transfers the information to fire and police dispatcher staff
Records Desk Operator	<ul style="list-style-type: none"> Monitors and responds to radio transmissions on a designated channel Conducts warrants, license, and other checks on persons of interest and vehicles
Fire Dispatcher	<ul style="list-style-type: none"> Dispatches all fire and medical related calls* requiring a response from firefighters or paramedics Maintains radio contact with field staff
Police Dispatcher	<ul style="list-style-type: none"> Dispatches all police related calls requiring a response from law enforcement Enters all officer initiated incidents into CAD such as pedestrian and traffic stops Maintains radio contact with field staff

*Dispatchers route all medical calls requiring pre-arrival instructions to Alameda County.

Source: City of Berkeley Communications Center Manual

It is taking longer to answer 911 calls and there are not enough call takers.

It is taking longer for the City to answer 911 calls because the Communications Center (Center) does not have enough call takers. The number of budgeted dispatchers has remained the same even as call volume has increased. The Center uses a staff-forecasting tool, but has not conducted a thorough staffing analysis to determine the number of dispatchers needed on each shift and the total number of dispatchers needed to staff the Center 24/7. Without a thorough staffing analysis, the Police Department cannot inform future budgeting decisions of dispatcher positions.

It Is Taking Longer to Answer 911 Calls, Falling Below State Standard

The Center is taking longer to answer 911 calls. The faster the Center can get a police officer, firefighter, or paramedic to the scene the better the chances of a good outcome. The seconds it takes a call taker to answer and prepare a call for dispatch can mean the difference between life and death.

California has a state standard requiring public safety answering points to answer 95 percent of 911 calls within 15 seconds. The state standard does not apply to non-emergency calls. Call data from the State's Emergency Call Tracking System (ECaTS) indicates the Center did not meet the performance target in answering 911 calls in two of the last five calendar years (as shown in Table 2). The data shows that in 2017, dispatchers only answered 89 percent of calls within 15 seconds. If the Communications Center is not able to reach this call answer target, they risk losing State funding in the future.¹

Call taking is one of the four primary roles of a Berkeley dispatcher. All dispatchers are cross-trained to perform any function. A call taker accepts and processes inbound 911 and non-emergency telephone calls for police, fire, and medical service. They input call information into the CAD system, which provides information to Police and Fire dispatchers. Call takers also answer and transfer calls intended for other Police units and other City departments.

¹ Funding from the State is contingent upon adherence to the state's mandatory standards including call answer times. In early 2016, the 911 Emergency Communications Branch of the Governor's Office of Emergency Services issued a review of fiscal and operational policies of the Berkeley Communications Center covering the time period of March 2015 through March 2016. The state found that the Communications Center was meeting the call answer standard and estimated that they will receive approximately \$161,000 in state funding over the next five years. This includes reimbursement for language interpretation calls, ECaTS expenses, annual training allotment, and maintenance/upgrades of the phone system.

Table 2. 911 Call Answer Performance

Calendar year	Percent answered within 15 seconds	Average answer time (seconds)	Total 911 calls (Police, Fire, Medical)	Average call duration (seconds)
2013	92%	9	49,579	81
2014	95%	9	54,599	80
2015	95%	9	54,190	88
2016	96%	8	52,520	91
2017	89%	10	55,587	100

Source: ECaTS data

Call Volume Has Risen but Staffing Has Stayed the Same

The Center is experiencing more calls, but staffing has not increased to keep up with the call volume. Rapid population growth in Berkeley since the 2010 Census is creating unprecedented challenges for public safety personnel as more people are calling 911. As Berkeley’s population has risen, so has the number of calls into the Center, both emergency and non-emergency. In 2013, the Center handled 184,000 calls, including emergency, non-emergency, and outbound calls. There was a significant increase in call volume in 2017, rising to over 256,000 calls for the year (Figure 2). According to the data, the majority of this increase came from a rise in non-emergency calls into the Center and outbound calls from the Center. Call volume data does not explain why there was an increase and the Police Department could not provide support for the increase.

In early 2017, the Department installed a new phone system. According to the Department, they believe that the old phone system was capturing incomplete non-emergency call volume data and the newly installed system is capturing complete call volume data. The Department was unable to provide evidence to support this theory but did provide us with 2018 call data to demonstrate that the call volume continues to be much higher than captured before the phone installation. Regardless of whether the increase in call volume was an actual increase in calls or just the data captured, the Department has not increased staffing in response to the noted increase in call volume. The Center has not had an increase in budgeted dispatcher positions since 2004. The number of authorized dispatcher positions remains at 28.

In early 2016, the 911 Emergency Communications

Branch of the Governor’s Office of Emergency Services issued a review of fiscal and operational policies of the Berkeley Communications Center covering the time period of March 2015 through March 2016. The state found that the Communications Center was meeting the call answer standard and estimated that they will receive approximately \$161,000 in state funding over the next five years.

Figure 2. Call Volume for Communications Center Increased with No Change in Authorized Staffing

*The Police Department provided us with only summary data for calendar year 2018. We did not assess the reliability of the summary data as it was not part of our audit scope. We provide it here because there was a significant increase in non-emergency and outbound calls after 2016, which the Department largely attributes to a new phone system, as well as an increase in calls. Providing the 2018 data for comparative purposes helps demonstrate the Department's hypothesis.

Note: Total call volume includes emergency, non-emergency, and outbound calls.

Source: City of Berkeley Biennial Budgets, ECaTS, and auditor analysis

Center Is Understaffed by One Call Taker Each Shift

Based on the Communications Center's current shift staffing model, the Center is understaffed by one call taker at all times of the day to handle 911 calls. The National Emergency Number Association (NENA) published a staffing guidelines report that we used to determine the adequate call taker staffing for the Center.² According to our analysis, the Center should have a minimum of three call takers on shift during normal hours and four call takers on shift during busy hours. However, the Center is not able to follow the NENA guidelines with current budgeted staffing levels. Instead, the Center must set its current minimum staffing levels to include only two call takers during normal hours and three call takers during busy hours. Management determines these levels based on the current minimum staffing and an analysis of call volume. Management stated that the current shift staffing levels are low compared to the call volume and they are unable to adopt higher minimum staffing numbers due to the consistent understaffing of dispatcher positions.

² We conducted the staffing analysis using the Erlang C mathematical formula and the results are based on 911 call volume; call duration; and queuing theory. For more information, see methodology section.

During this audit, the Police Department implemented a phone tree on the non-emergency lines in an effort to maximize the efficiency of call takers. The goal is to route calls for service needing a non-emergency response in the most expedient manner possible. This will help ensure that call takers are answering fewer non-emergency calls that they would normally transfer to a different agency or City Department. It is too early in the implementation to understand how the phone tree will affect the overall workload of call takers. A more in-depth analysis of non-emergency call volume is needed to understand the workload impact of these calls with the implementation of the phone tree.

Additional Resources Are Necessary to Maintain 911 Services in the Future

The City of Berkeley's population grew rapidly in the ten years following the 2000 Census. The population rose by almost nine percent to 112,580 according to the 2010 Decennial Census. The City continues to grow approximately one percent every year. The Association of Bay Area Governments (ABAG), projected Berkeley's population to grow 24.4 percent between 2010 and 2040, to about 140,100 people. If the City's population grows to 140,100 people by 2040, the Communications Center's annual call volume may grow to between 253,000 and 350,000 total calls and of those calls, 68,500 - 75,000 would be 911 calls (Figure 3).³ While population is a good indicator of 911 call volume, additional factors should be considered when planning for the future. Some of those considerations include crime rate, public access to affordable health care, and local attitudes on the use of 911.

Non-emergencies: General calls related to the Police or Fire Departments that do not pertain to an immediate threat to life or property. This includes situations that may be criminal in nature, but do not require immediate attention. These non-emergency calls include "cold-crimes," vehicle complaints, and routine civil matters.

³ Our analysis did not take into account additional factors that may influence 911 call volume.

Figure 3. 911 Calls May Grow Above 70,000 by 2040

Sources: US Census, American Community Survey, ABAG 2013 Projections, Auditor analysis

Next Generation 911 and Proposed Fire Department Changes Could Further Burden Call Center Capacity

Berkeley is preparing to upgrade to Next Generation 911 (NG911). The purpose for this upgrade is to create a more successful and reliable network of 911 systems nationwide that are able to accept voice, video, photo, and text messages. Some local jurisdictions, including San Francisco, Fremont, Hayward, and Alameda County, are already accepting 911 text messages. While the Federal Communications Commission encourages all call centers to begin accepting texts, it is up to each center to decide on a method of implementation. Berkeley is not yet set up to accept text messages but has started to make changes to prepare for NG911, including upgrading its systems. Additional staffing is likely necessary to handle the more complex service demands.

The Fire Department desires to add emergency medical dispatching capabilities to the Center, in keeping with regional standards. Currently, medical calls are transferred to Alameda County Regional Emergency Communications Center for this service. Providing in-house emergency medical dispatching would allow the Center to triage medical calls and provide immediate pre-arrival instructions from dispatchers with direct communication to responders. This will require additional resources, including staff, equipment, physical space, procedures, and training. Emergency medical dispatching will also increase call duration times as

An emergency medical dispatcher gathers information related to medical emergencies, dispatches the appropriate EMS response, provides assistance and instructions to callers over the phone prior to the arrival of emergency medical services, like how to administer CPR. They also communicate with responding units.

someone from the Center will need to stay on the line with the caller until the responding unit arrives. This will increase call time and, therefore, decrease the Center's availability to answer calls without sufficient increases in staffing.

The physical space the Center currently occupies is small and at capacity. There is no room to add workstations for dispatchers. To prepare for increases in call volume and services, Police can begin to plan now, including looking for a bigger space to run the Center. They will quickly outgrow their current resources with any increase in the minimum staffing levels.

Recommendations

To address public safety service demands, we recommend the Police Department:

- 1.1 Conduct an annual staffing analysis of required minimum staffing levels and budgeted dispatchers to ensure budget staffing requests and scheduling efforts meet demand and limit the use of overtime where possible. Use the staffing analysis to communicate to Council and the public during the annual appropriations process:
 - Service level demands;
 - The full-burdened cost of budgeting for additional staff;
 - Whether there is sufficient funding available to budget for the additional staff or a shortfall (quantified in dollars); and
 - Additional staffing requests, if needed.
- 1.2 Use the staffing analysis performed in response to recommendation 1.1, to determine future resource needs of the Communications Center, including staffing, equipment, and physical space. Take into account planned changes to services and factors that may influence call volume.

The Communications Center relies on significant overtime leading to inadequate training and an unhealthy work environment.

Due to consistent understaffing, the Center relies heavily on overtime to meet service demands through minimum staffing requirements, spending nearly \$1 million in 2017 on overtime (Figure 4). Historically, recruitment and training processes left the Police Department unable to fill vacant positions in the Center. During this audit, the Department invested additional resources to improve department-wide recruitment efforts. There are further opportunities to strengthen the Department's recruitment and training efforts for dispatcher positions. The lengthy hiring process also contributes to the ongoing vacancies and related overtime costs. In particular, delays occur during the extensive background investigations when recruitments for police officers take priority over dispatchers.

Figure 4. Communications Center Total Annual Payroll vs. Overtime Costs, Calendar Years 2013-2017

Source: City of Berkeley Cognos payroll data, Auditor analysis

Position Vacancies Lead to Excessive Overtime Use

Historically, the Center has struggled to reach full staffing of the current budgeted positions. Between 2013 and 2018, the Center had between 3.5 and 8 dispatcher position vacancies. In order to meet minimum staffing requirements, supervisors schedule existing employees for mandatory overtime to fill vacant shifts.

Figure 5. Dispatcher Positions Have Historically Been Understaffed, 2013-2018

Source: City of Berkeley Human Resource staffing reports

If the Police Department fills all the vacant positions in the Center, they would be able to reduce the amount of overtime. The nearly \$1 million spent in overtime in 2017 is offset by the current budgeted vacant positions in the Center. However, even if Police fill all the vacant dispatcher positions, the Center would continue to be understaffed according to NENA staffing guidelines. We recognize that some amount of overtime is necessary for all public safety positions due to unplanned absences and events that may require an increase in staffing levels, but there is room to decrease the amount needed.

Excessive Overtime May Lead to Fatigue and Safety-Related Incidences

The four dispatchers working the most overtime in the Center received 40 percent of the 2017 overtime paid (Figure 6). This much overtime may contribute to worker fatigue and decreased quality of service.

Figure 6. Top Four Overtime Earners in Calendar Year 2017

Source: City of Berkeley Cognos payroll data

Although overtime is generally less expensive than hiring additional staff because overtime pay excludes benefits, there are important non-financial benefits to reducing overtime by hiring additional dispatchers. Dispatching is a high-stress job that requires dispatchers to be alert and use good judgement. Overtime, when used in excess, can inhibit these essential skills, threatening the safety of responders and the public. For example, in a traffic stop, dispatchers may need to tell an officer if someone is on parole or probation; has a warrant; has a weapons history; or is in a stolen vehicle. All this information allows the officer to make informed decisions about how to approach a situation safely. Therefore, dispatchers must be alert and ready to quickly convey information.

The continued use of overtime is not an ideal situation for any public safety position and exposes staff to an unhealthy work environment. Studies have shown that in law enforcement and across other industries, working excessively long work shifts, particularly those that are 12 hours or more, can lead to fatigue and safety-related incidents, and decrease quality of service, communication, and cognitive performance. By filling vacant positions, the Center can reduce their reliance on overtime and reduce the risk of employee burnout and potential workers compensation claims that may result from overworking.

The Communications Center's current staffing policy allows individuals to sign up for four voluntary overtime shifts at the beginning of each two-week scheduling period for up to 15 hours each. This is equal to a maximum of 60 hours of overtime over two weeks. When added to regular time, an individual could potentially work 70-hour weeks with shifts up to 15 hours in length. When supervisors do not have enough volunteers to work overtime, they schedule dispatchers to work mandatory overtime shifts.

"Our mandatory overtime creates a very stressful environment while at work and extremely poor health and quality of life outside of work. When can we sleep when we are working 14.5-16 hour shifts each day?" – Berkeley Dispatcher

Manual Scheduling Is Time Consuming and Subject to Errors

The Center's staffing processes are not automated. Supervisors are responsible for creating and maintaining manual schedules, including any overtime, or changes to the schedule due to absences. As a result, the task of meeting daily scheduling and staffing needs is cumbersome, time-consuming, and prone to human error. The manual process for filling overtime is even more complex as supervisors must adhere to complex union labor agreements and overtime policies. The supervisor in charge of scheduling said that it is a difficult job and it gets complicated when dealing with overtime and filling absences. She said that sometimes she makes mistakes and has to scramble to find someone to fill a position to reach minimum staffing. Automating the scheduling system will allow the Center to ensure that scheduling adheres to all policies.

Police Department Can Improve Dispatcher Recruitment Efforts

The Police Department is responsible for all recruitment efforts for the entire Department, not just those for dispatchers. The Department has shown a commitment to improving the recruitment process by dedicating resources to general Department recruitment efforts. The Chief of Police approved the creation of a four-person recruitment team within the Personnel and Training Bureau. The team will develop better branding and marketing of the Department and career paths for sworn and civilian positions.

The Police Department recently opened the Public Safety Dispatcher II classification to continuous recruitment; however, they do not continuously recruit for entry-level Public Safety Dispatcher I positions. Continuous recruitment of all dispatcher positions would allow prospective candidates to submit application materials at any time and the City to respond quickly to changing staffing needs.

Recruiting events are critical to finding potential applicants with the skills necessary to succeed at the job. The Personnel and Training Bureau attends career fairs and community events around the Bay Area to advertise police career opportunities to targeted audiences. Dispatchers have not routinely been involved in the recruitment process. The Police Department has created

The Fire Department manages firefighter scheduling with an industry-known public safety scheduling software called Kronos TeleStaff. TeleStaff functionality allows Fire to:

- Automatically fill vacancies based on organizational qualifications and availability
- Manage shift trades and leave requests
- Control and maintain staffing levels and rotations
- Manage the daily schedule by maintaining on-duty and off-duty personnel at all times
- Capture payroll data and export to third-party HR/payroll systems
- Provide manager and employee self-service access
- Increase oversight and save time currently spent on manual scheduling

marketing material for educating people about the Police Academy but there were no materials about a career in dispatching. Involving dispatchers in this recruitment process and creating unique marketing materials for dispatcher positions would allow the Department to better identify and engage potential recruits. The Department's recruitment webpage is outdated and lacks information about dispatching. Personnel and Training should engage in best practice marketing strategies including the use of websites and social media to engage with targeted audiences.

Background Investigations Cause Delays in Hiring

While the recruitment process can take months, mandatory background checks add even more time to the process. Candidates that pass the interview panel are assigned to an internal background investigator in the Department. When the Department has multiple background investigations to conduct, significant delays can occur. According to the Personnel and Training Bureau, the Department prioritizes backgrounds for sworn over non-sworn positions, and dispatcher candidates can fall to the bottom of the pile. During this delay, the Department may lose candidates to other agencies. Options to increase the processing of background investigations include adding staff time or contracting with an outside firm. There are private background investigation firms that could conduct all or some of the Department's recruitment background investigations to alleviate the workload of investigators, expedite the process, and retain more applicants.

Opportunity to Increase Trainee Retention

A majority of employee separations occur during dispatchers' first year while still in training. Under the current staffing model, dispatchers are cross-trained to work all four positions in the Center: call taker, records desk, police desk, and fire desk. If a trainee does not pass one phase, they are released from training even if they successfully passed other phases. The reason the Center requires all dispatchers to be cross-trained is because it provides the most flexibility in scheduling. There may be, however, an opportunity to retain qualified individuals as call takers, in order to provide current dispatchers with some workload relief.

Current and former management of the Center identified the Police Desk phase of dispatcher training as the most difficult part of training, stating that

Figure 7. Dispatcher Training

Source: City of Berkeley
Dispatcher Training Manual

people cannot handle the pace and stress associated with police calls. The training program for new hires is approximately nine months long with the Police Desk phase at the end (Figure 7). Our analysis of staff turnover revealed that only 45 percent of those hired as trainees in 2013-2017 successfully completed the training program to become permanent dispatchers.

Department managers reported that this is an improvement over previous years. In the current training program, trainees are terminated if they are not able to pass all phases of the program. Twenty-eight percent of the trainees were unable to complete the training program and exited between seven and nine months from their start date, approximately during the Police Desk phase of training.

Call taking is the first phase of training that dispatchers receive. This duty currently accounts for two or three staff positions on each shift. By changing practices to retain dispatchers who are able to pass call taking training but are not able to pass all training phases as call takers, the Center may be able to reduce overtime in the short term. Those individuals may later be able to resume training to advance to a fully cross-trained dispatcher if they desire.

Staffing Shortages Impact Ability to Meet Ongoing Training Requirements

The understaffing of dispatcher positions and the resulting need for dispatchers to work lots of overtime means less time for training. According to the Police Department’s Personnel and Training Bureau, the Center does not fully comply with California’s Police Officer Standards and Training (POST) ongoing training requirements. In such a highly technical profession with changing technology, it is vital that those answering 911 calls are receiving appropriate and adequate ongoing training.

Table 3. Compliance with State Training Requirements

Reporting Years	Total Dispatchers*	In Compliance	Not in Compliance
2013/2014	30	16	14
2015/2016	30	21	9
2017/2018	31	26	5

*Includes dispatchers who have separated from the City

Source: Berkeley Police Department Personnel and Training Bureau

California's
Commission of
Police Officer

Standards and Training (POST) established minimum training requirements for public safety dispatchers. Every dispatcher and supervisor is required to complete 24 hours of continuing professional training every two years to maintain, expand, and enhance knowledge and skills.

A lack of training means that dispatchers may not have the skills, knowledge, or abilities to handle calls, which could lead to serious consequences. In order to ensure that the Center is appropriately trained, the Department needs to increase recruitment efforts to attract quality candidates to fill vacant positions. In addition, adding call taker positions will allow the Center to reduce their reliance on overtime, relieving the burden placed on staff who are working excessive overtime and allow dispatchers more time to complete mandatory training.

Recommendations

In order to ensure well-rested and content dispatchers, and to reduce reliance on overtime, we recommend the Police Department through its recruitment actions:

- 2.1 Open all dispatcher positions to continuous recruitment.
- 2.2 Work with Communications Center staff to create a specific recruitment plan for dispatcher positions including recruitment events and marketing material. Use recruitment best practices to reach potential applicants and increase the number of applicants.
- 2.3 Identify and implement feasible options to improve turnaround time on background checks for dispatcher positions. This can include outsourcing background investigations or working with Human Resources to ensure that the Department is able to complete all background investigations in a timely manner.
- 2.4 Design a way to retain staff that are unable to pass the Police Desk training, for example, keep staff as Public Safety Dispatcher I and have them work as a call taker or create a new job classification for a call taking position.
- 2.5 Evaluate the results from dispatcher recruitment routinely (e.g., annually or at the end of a recruitment cycle) to determine areas for improvement. Update recruitment plans.

In order to ensure adequate staffing and well-trained dispatchers, we recommend the Police Department:

- 2.6 Implement an automated scheduling software that has built-in decision-making capabilities to automatically fill shifts based on specified qualifications and staff availability.
- 2.7 Decrease the concentration of overtime among dispatchers.
- 2.8 Develop and implement a Communications Center training plan to ensure compliance with POST training requirements. Evaluate training processes and update training plans routinely.

Working conditions adversely affect dispatcher morale.

All the dispatchers who responded to our survey stated that morale in the Center was low. According to staff, the major cause of the low morale is the understaffing of dispatch positions and subsequent excessive overtime needed to achieve minimum staffing. As the Center has continued to rely on overtime, staff have little to no time in their work days to complete ongoing training, build a healthy workplace culture, and access stress management resources. They also have less time off work to take care of their physical and mental health. Management reported that they have taken steps to address the low morale and provide resources to support dispatchers. However, there is more that needs to be done to ensure dispatchers have access to and participate in these resources.

Communication Improvements Can Help Morale

Communication is a key tool to a healthy work environment. The majority of dispatchers feel that they are not given opportunities to voice their concerns, ideas, and opinions. This has caused dispatchers to feel disconnected from supervisors and management. Shift work creates a challenge when it comes to communication because there is no time in the day when staff are all together. Additionally, the type of work does not allow the entire unit to be off work and communicate as a whole. In our interviews, supervisors said that there is a lack of communication because they work different shifts and this makes it hard to be on the same page. Supervisors recognized that this challenge likely causes communication issues up and down their chain of command.

Management has recognized the need for greater transparency about management decisions and appear to be committed to creating better communication practices in order to achieve that. There are opportunities to increase transparency by holding regular meetings with supervisors and management where information is shared and communication plans are made. This would help ensure that supervisors are communicating consistent information down to dispatchers and that supervisors have time to bring ideas, concerns, and issues to management. Center staff also expressed that there are communication barriers between dispatchers and sworn police officers. Staff reported feeling largely ignored and forgotten by the Department. The Center and Police Department previously had a committee that met routinely to

100% of survey respondents agreed or strongly agreed that morale within the Communications Center is low.

73.33% of survey respondents disagreed or strongly disagreed that they are given opportunities to voice concerns, opinions, and ideas.

Supervisors are directly responsible for training and conveying information to dispatchers. It is also the job of the supervisor to resolve issues and refer to management as necessary.

discuss issues between patrol staff and dispatchers and keep communication open. The committee has since stopped meeting. A meeting between patrol staff and the Center, if properly managed, could help dispatchers communicate with the Department, build rapport, and solve recurring issues.

Center staff reported having a good working relationship with the Fire Department. They feel that Fire is very mindful about how their policies affect dispatchers and will initiate discussions with supervisors to address changes and issues, and to solicit feedback. However, there is room to improve communication with Fire by including all Center supervisors in those routine discussions to ensure that all significant issues are discussed. Currently, one of the supervising dispatchers serves as the liaison to Fire and is responsible for this communication. While it is important to have a point person, the Center may benefit from involving all supervisors and management in more routine meetings with Fire.

Unaddressed Work-Related Stress Increases Risk to Department

There is no such thing as a good day in the Center. A bad day for most people is every day for a dispatcher. Dispatchers do not just hear when crimes or tragedies occur, they are on the phone with someone who was involved or witnessed what happened. According to the National Emergency Number Association, approximately 16.3 percent of dispatchers may be at risk of Secondary Traumatic Stress Disorder.⁴ Experts identify risks associated with unaddressed 911 stress, including serious health issues, lower employee retention, impaired work performance, and declining morale in the workplace. All of these impacts have the potential to threaten the health of dispatchers and the ability of the Center to fulfill its mission to provide optimal emergency response to the public.

Experts have found that workplace satisfaction reduces the cost of employee turnover and sick leave while increasing performance and productivity. Low morale has been associated with the opposite. With mounting evidence that work-related stress is having more of an impact on 911 dispatchers, industry experts have established standards for a comprehensive stress management program.

The National Emergency Number Association provides standards for creating a comprehensive stress management program, including:

- Stress management training for all staff
- On-site educational materials and resources about stress and related risks
- Information on the role of nutrition, exercise, and sleep in preventing stress disorders
- Written procedures for ensuring participation in post-trauma response, debriefing, and peer support
- A PSAP peer support program
- Personal health incentives program to promote employee investment in lifestyle changes and practices shown to prevent mental and physical disease

⁴ Secondary Traumatic Stress Disorder is the specific stress experienced by an individual who has experienced a traumatic event involving a threat to the physical integrity of another person; the stress resulting from helping or wanting to help a traumatized person.

Dispatchers Are Tired of Dirty Workplace and Broken Equipment

Our survey and interviews revealed that poor equipment maintenance and workplace cleanliness are also contributing to employee dissatisfaction in the Center. There is currently no planned continuous maintenance on Center equipment. In addition to contributing to employee satisfaction, having working equipment is vital to the success of the City's emergency response. Implementing a maintenance plan will allow management to plan routine upgrades and replacement of equipment. Supervisors also commented on the lack of cleanliness in the Center. Overcrowded and cramped working quarters, as well as staff's frequent inability to leave their desks for lunch breaks, are likely contributors to the unclean space. The crowded conditions are likely to worsen as the Center expands to take on additional dispatchers. The Department may need to invest in additional cleaning services to address all sanitation issues.

Dispatchers Believe They Need Better Access to Stress and Wellness Resources

The Police Department has policies and practices that address workplace stress, promote wellness, and show appreciation for employees. There are some resources that dispatchers have access to, for example, recognition during National Public Safety Telecommunicators Week and the City Employee Assistance Program. However, there are other resources that dispatchers report that they have a hard time accessing: post-trauma response, peer support, incident debriefing, and use of the Department gym. Center staff reported that dispatchers do not have time to access many of these resources due to understaffing. Management reported that they have introduced new wellness resources including a healthy-meal delivery service, access to a mobile meditation application, and a physical meditation space. Management recognizes that they will need to continue to work towards improving these services and access to these services.

Center staff also stated that dispatchers do not receive adequate ongoing training. The Center should provide ongoing training on the structured call-taking process, including the management of suicidal callers and calls involving persons with mental illness, to ensure that dispatchers have the skills and knowledge to handle the calls and manage their own stress. In

86.67% of survey respondents disagreed or strongly disagreed that they receive the resources needed to effectively manage the stress of being a dispatcher.

60% of survey respondents disagreed or strongly disagreed that they receive adequate ongoing training to understand their evolving responsibilities and do their job well.

In addition to their current stress management practices, the Police Department could benefit from adding practices to ensure that dispatchers have access to the resources they need to continue to do their job and remain healthy. Without addressing staffing and overtime issues, dispatchers will continue to not have time to access essential stress management resources. By creating a comprehensive stress management program specifically for dispatchers, the Center can make time for dispatchers to access vital stress management resources that are relevant to staff needs.

Management has voiced their commitment to increasing transparency and providing additional support to improve the environment. While the initial implementation of programs to improve morale will have financial costs, these can be offset by cost reductions related to sick time, resignations, and workers compensation claims. The City's investment in its people is critical to ensuring that the Center is prepared to respond to calls for service and effectively communicate information to public safety personnel.

Recommendations

In order to improve morale and communication, we recommend Communications Center management:

3.1 Create a comprehensive stress management program specifically for the Communications Center that includes the following:

- Stress management training for all staff, 8 hours minimum during career
- Access to on-site educational resources to help with stress and related risks, e.g., directory of local therapists specializing in treatment of stress and traumatic stress disorders and City programs that provide information on how and where to access help
- Procedures assuring participation of staff in critical incidence stress management activities (e.g., debriefing sessions when involved in traumatic call events)
- A Peer Support Program
- Comprehensive, ongoing training on structured call-taking processes

- 3.2 Develop and implement plans to address workplace cleanliness and equipment maintenance and replacement.
- 3.3 Conduct regular supervisor level meetings to share information about operations and staffing. Use these meetings to improve understanding of the supervisor role, identify problems, discuss changes that may affect operations, and establish communications plans for distributing information to all staff.
- 3.4 Routinely have Police and Fire staff meet with all Center Supervisors to solicit feedback on Center operations and to address any issues. Use these meetings to improve understanding of the dispatcher role and current policies of public safety, identify problems that should be evaluated for further discussion, and discuss known and expected changes that may affect the Communications Center.

Management Response Summary

City Management agreed to our findings, conclusions, and recommendations. In our meetings with Police Department management, they described their current and planned actions to address our audit recommendations. We found those verbal responses reasonable. For example, to address recommendations 1.2 and 2.4, Police Department management said they plan to request a new Call Taker position. This will help them hire staff who are able to handle call intake but may not be suited to handle police desk responsibilities. This will help reduce reliance on overtime.

The Police Department provided us with written summary information describing the conditions that led to our audit recommendations and identified some of their milestone dates. Some responses did not include complete, written corrective action plans or expected implementation dates as requested. Therefore, we will be working with Police Department management to obtain that information so that we can monitor their progress with implementing our audit recommendations. Please see Appendix III for the Police Department's written response to our audit recommendations.

Appendix I—Methodology and Statement of Compliance

Methodology

We audited the Communications Center's (Center) recruitment, staffing, overtime, retention, and training program for calendar years 2013 through 2017. We performed a risk assessment of the Center's practices and procedures to identify potential internal control weakness, including fraud risks, within the context of our audit objectives. To gain an understanding of the Center's operations and threats to performance and to achieve our audit objectives, we:

- Reviewed the Center's current minimum staffing requirements.
- Sat along during three dispatching shifts to observe operations.
- Interviewed the Captain of the Support Services Division, the Communications Center Manager, Dispatcher Supervisors, and Public Safety Dispatchers to gain an understanding of operations, staffing, and workload.
- Reviewed professional literature to identify common threats to the capacity of public safety dispatching agencies and best practices for staffing, recruitment, and stress management.
- Performed a regression analysis on estimated population growth and call volume.
- Analyzed call data by hour, including time to answer and duration on a call to understand call volume and call types for calendar years 2011-2017.
- Obtained and presented 2018 summary call data at the request of the Police Department to help demonstrate their hypothesis about the change in call volume post 2016.
- Ran a staffing analysis to determine the number of call takers needed to handle the current 911 call volume and compared those numbers to the current staffing.
- Analyzed the Center's use of overtime to meet minimum staffing requirements for calendar years 2013-2017.
- Calculated historic turnover and vacancy rates of dispatcher classifications for calendar years 2013-2018. This is one instance in which we were able to obtain 2018 data for analysis.
- Reviewed budget documents, written procedures, and common forms and reports used by the Police Department.
- Reviewed State and Department of Justice audits.
- Observed dispatcher candidate interviews and analyzed recruitment data to understand the recruitment and hiring process, including a number of applicants passing through each step of the recruitment process and the specific dates for various steps of the process for dispatchers hired.

- Interviewed Communications Training Officers to understand the training program and typical training timeframe for new dispatchers.
- Performed an anonymous survey of dispatchers to gauge morale and satisfaction with different aspects of their work environment.

We recognize that coordinated emergency response operations are complex, involving multiple City departments. The scope of this audit was narrow and looked only at the Communications Center role in answering 911 and non-emergency calls. We did not assess dispatching or emergency service response times, which are distinctly different from call answer times. When looking at answer times, we did not assess non-emergency calls as the California state standards apply to only 911 calls.

Explanation of Staffing Analysis

We used the National Emergency Number Association's PSAP Staffing Guidelines to analyze the Center's staffing level based on call volume. This method of determining how many persons should staff a PSAP looks at primary workload, which is considered to be 911 calls received. We used standard queuing theory to determine how many call takers should be available to process the calls. This queuing theory was created to account for call volumes where if the caller was blocked, then at least 85 percent of the time the caller immediately redials. This is the situation of a person seeking emergency help. The limitation of this analysis is that it does not take into account any factors that influence call handling and that are not in the queuing formula.

Data Reliability

We assessed the reliability of ECaTs data by reviewing them for reasonableness and completeness, interviewing data and data-system owners and managers, gaining an understanding of data access controls, and reviewing data system documentation. We determined that the data were sufficiently reliable for the purposes of this report. We did not include 2018 data in our reliability assessment. We included that data in Figure 2 at the request of the Police Department, but did not use it to support our audit findings, conclusions, or recommendations. We make that clarification under Figure 2.

We relied on US Census population and ABAG population predictions to support our finding regarding predicted increases to call volume. We considered both organizations to be known, reliable sources and, therefore, their data to be sufficiently reliable for our purposes. We recognized both the US Census and ABAG offer slightly differing predictive data. However, the purpose of our predictions is to give readers a general understanding of future impact with an understanding that actual population growth will be different. We do not expect this difference to be significant to the extent it impacts the purpose of our predictions, which is to support that the Center will need to expand along with population growth.

We assessed the reliability of payroll data by reviewing it for completeness, appropriateness, and consistency. We determined it is sufficient and reliable for the purposes of our work. The data captures the date of the hours, the staff member, position title, and hour code. We noted a limitation in the data in that the position title associated with individuals is their current title, which does not necessarily reflect the title at the time the hours were earned. This limitation does not significantly impact our use of the data because all four of the current supervisors were in their positions before 2013. In addition, we combined the Public Safety Dispatcher I and Public Safety Dispatcher II totals so our calculations are not impacted by when dispatchers were promoted from Public Safety Dispatcher I to II.

Statement of Compliance

We conducted this performance audit in accordance with Generally Accepted Government Auditing Standards. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objectives.

Appendix II— Dispatcher Morale Survey: Design, Efforts, and Results

We designed a survey to gain an understanding of dispatchers' satisfaction on a number of issues, with a particular emphasis on determining the overall climate of the Communications Center (Center), and assessing which factors are contributing to dispatcher satisfaction and which are detracting from their satisfaction.

To collect the information contained in this report, we invited 23 dispatchers to participate through the SurveyMonkey online survey platform. Over a two-week period, a total of 15 employees completed the survey, which represents a participation rate of 65 percent. Because our survey focus was on dispatchers perceptions, we excluded supervisors and management. We interviewed the four supervisors, the Center Manager, and the Captain of Support Services separately to gain an understanding of their perceptions and concerns.

We created our survey in SurveyMonkey, an online platform for creating, distributing, and analyzing surveys. We designed our survey to keep responses anonymous.

Survey Limitations

When we started designing this survey, we understood that there are inherent limitations in using survey data to gauge the morale of an organization. However, even with those limitations, providing an anonymous survey to employees was the most effective and efficient way to hear from a large number of employees in shift work who could responded freely. During our audit, we kept the following in mind:

- Many factors can impact an employee's frame of mind when completing the survey, which could influence their responses either positively or negatively.
- People who are dissatisfied are more apt to reply to the survey.
- Ongoing changes within the Center would impact perceptions day to day.
- Unless the survey achieves 100 percent response rate, some dispatchers' opinions may not be reflected in the quantitative analysis of responses.
- Despite our extensive preparation, dispatcher could have interpreted questions differently than we intended.

Because the overall goal was to set a baseline of the morale at a point in time, we determined that the above factors would not create a significant risk as to the accuracy of our audit findings, conclusions, and recommendations. The 65 percent response rate was a strong indicator that the results were reliable, and the responses agreed with comments made during interviews, including discussions with supervisors and management.

Table 1: Overall Survey Results of Dispatcher Morale

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
There are enough dispatchers on duty during each shift to handle call volume.	6.67%	6.67%	13.33%	40.00%	33.33%
I am not able to take my required breaks due to workload and staffing shortages.	26.67%	33.33%	13.33%	20.00%	6.67%
I am required to work too much overtime.	73.33%	13.33%	6.67%	0.00%	6.67%
I received adequate new dispatcher training to understand my responsibilities and to do my job well.	13.33%	40.00%	26.67%	13.33%	6.67%
I receive adequate ongoing training to understand my evolving responsibilities and do my job well.	0.00%	13.33%	26.67%	13.33%	46.67%
I would like to receive additional training to advance my knowledge and skills.	66.67%	20.00%	0.00%	0.00%	13.33%
I am compensated fairly for my work.	13.33%	33.33%	26.67%	20.00%	6.67%
I am given opportunities to voice my concerns, opinions, and ideas.	0.00%	6.67%	20.00%	13.33%	60.00%
I receive the resources I need to effectively manage the stress of being a dispatcher.	0.00%	0.00%	13.33%	26.67%	60.00%
The Communications Center operations written policies and procedures provide appropriate direction and guidance.	0.00%	6.67%	13.33%	13.33%	66.67%
The Communications Center written policies and procedures are applied to all personnel equally.	0.00%	0.00%	6.67%	26.67%	66.67%
I feel supported by Supervising PSDs and can count on them to fill in when workload increases due to training, staff absences, or call increases.	0.00%	6.67%	20.00%	13.33%	60.00%

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
I feel supported by Supervising PSDs and can count on them to fill in when workload increases due to training, staff absences, or call increases.	0.00%	6.67%	20.00%	13.33%	60.00%
Supervisors contribute to a positive work culture.	0.00%	6.67%	20.00%	20.00%	53.33%
I have confidence in management's ability to perform their duties and run the Communications Center.	0.00%	0.00%	6.67%	26.67%	66.67%
Management contributes to a positive work culture.	0.00%	0.00%	13.33%	20.00%	66.67%
Overall, the morale within the Communications Center is low.	93.33%	6.67%	0.00%	0.00%	0.00%

Appendix III—Recommendations and Management Response

1.1 Conduct an annual staffing analysis of required minimum staffing levels and budgeted dispatchers to ensure budget staffing requests and scheduling efforts meet demand and limit the use of overtime where possible. Use the staffing analysis to communicate to Council and the public during the annual appropriations process:

- Service level demands;
- The full-burdened cost of budgeting for additional staff;
- Whether there is sufficient funding available to budget for the additional staff or a shortfall (quantified in dollars); and
- Additional staffing requests, if needed.

Management Response: We will research other available analysis options to determine if we are using best practices by June 2019. A monthly and yearly analysis of staffing is helpful when determining best use of the current employees in terms of scheduling. We recognize that our current use of a manual scheduling process is not optimal and that we would be better served by an automated scheduling program. The Department has already begun to consider several automated scheduling programs to replace our current manual method.

1.2 Use the staffing analysis performed in response to recommendation 1.1 to, determine future resource needs of the Communications Center, including staffing, equipment, and physical space. Take into account planned changes to services and factors that may influence call volume.

Management Response: Decide on Communications Center expansion versus relocation by December, 2019. We will need to increase our staffing levels to meet NENA staffing recommendations. Future enhancements to the 911 system such as text to 911 and Next Generation 911 will increase our call times and further hinder our ability to meet NENA standards on call answer times. The Communications Center will need to either expand the space it currently occupies in the Public Safety Building, or relocate to a separate building in order to increase the number of consoles needed to accommodate additional required staff.

The Department has already begun discussion on the Communications Center's spatial needs. In 2018, we implemented a new Computer Aided Dispatch system in order to enable us to receive 911 calls via the upcoming Next Generation technology. The Call Taker proposal will be submitted to Human Resources and the Personnel Board.

2.1 Open all dispatcher positions to continuous recruitment.

Management Response: We hope to obtain approval from Human Resources by September, 2019. Open and continuous recruitment of all dispatcher positions has long been the desire of Management. There are several factors that make hiring dispatchers challenging. The hiring process itself is lengthy due to required testing of applicants, background investigation and physical exam. Because of our limited resources in terms of floor trainers, we cannot hire more than three dispatchers at one time or the trainer's become overburdened. The Public Safety Dispatcher training program generally takes 9-10 months to complete. Often, it is not until the latter months of training that deficiencies that will not allow a trainee to complete the program are discovered. Allowing for open and continuous recruitment would give us the ability to create a pipeline of applicants to "plug in" once a trainee either completes or is released from the training program.

Human Resources has already agreed to open and continuous hiring for lateral Public Safety Dispatcher II classification and Management has requested the same for both the non-lateral and Public Safety Dispatcher I classifications.

2.2 Work with Communications Center staff to create a specific recruitment plan for dispatcher positions including recruitment events and marketing material. Use recruitment best practices to reach potential applicants and increase the number of applicants.

Management Response: In progress since 2018, the marketing firm is expected to begin work by May of 2019. Recruitment of a compassionate, competent, talented and diverse workforce is a priority for the entire department, and has been a challenge over the last several years due to a variety of reasons. Creation of a more specific plan for dispatcher positions can help reach potential applicants and increase the total number of applicants. Management recognizes the importance of both hiring and retaining applicants through the training program as being a key element in overcoming the staffing shortage.

The Department created a Recruitment and Retention Team in 2018 in order to address the departmental recruitment needs. This was the first step in setting out a concrete plan. This team has developed goals and priorities, with very specific tasks. The goals include better tracking of recruitment efforts, creation of recruitment videos, attending recruitment events, hiring a marketing firm to assist with web design, employment brochures and literature, social media outreach and other advertising avenues.

2.3 Identify and implement feasible options to improve turnaround time on background checks for dispatcher positions. This can include outsourcing background investigations or working with Human Resources to ensure that the Department is able to complete all background investigations in a timely manner.

Management Response: In progress since 2018. In April of 2019 the Department contracted with a background investigation firm that can complete up to three backgrounds at a time with a one month turn around. The Department also hired a retired BPD officer to complete backgrounds on a part time basis. This retiree has extensive experience conducting background investigations for the Department. The Department is experimenting with now assigning multiple categories of backgrounds out at one time, instead of exhausting higher categories before moving on.

The long background check process has been an impediment to successful recruitment and hiring for some time. The above described Recruitment and Retention Team has also identified improving the background investigation process as a critical task. Plans were considered to dedicate current employees as background investigators, hire independent background investigation companies or do some combination of the two. The proposed plan to affect change in this area is to hire an independent but highly experienced background investigation firm that can rapidly complete quality background investigations, continue to use Department employees to complete background investigations, and also continually evaluate and adapt practices.

2.4 Design a way to retain staff that are unable to pass the Police Desk training, for example, keep staff as Public Safety Dispatcher I and have them work as a call taker or create a new job classification for a call taking position.

Management Response: We want to have our final proposal for the call taker and revisions to the PSD classifications by June and implement by fall 2019. Historically, many trainees have gained proficiency in call taking, demonstrated excellent customer service skills and professionalism, but could not complete the training program due to their inability to pass Police Desk training.

Hiring more full time call takers would improve staffing levels, greatly relieve overtime required by dispatchers, significantly reduce overtime costs and allow us to meet NENA minimum staffing requirements. Once the Call Taker classification is approved, it would help Management to potentially retain valuable employees by offering them a position in a different classification they are already qualified to work.

2.5 Evaluate the results from dispatcher recruitment routinely (e.g., annually or at the end of a recruitment cycle) to determine areas for improvement. Update recruitment plans.

Management Response: Evaluation and more robust data collection on applications began in late 2018. By the summer of 2019 the Department should begin to have an adequate data set to review. Recruitment has changed over the last several years, and competition for qualified candidates is great among agencies. Continual evaluation of Departmental efforts will be critical to staying abreast of best practices and successfully hiring quality candidates. The Department plans to improve tracking and review of the number of applicants, how successful applicants are through the process, and where they most often are “lost” in the process. The Department also plans to review these results in line with testing processes in order to adjust as necessary.

2.6 Implement an automated scheduling software that has built-in decision-making capabilities to automatically fill shifts based on specified qualifications and staff availability.

Management Response: As of April 2019, there have been presentations by two separate software vendors. There is a plan to research a third vendor’s software (Tyler Technology) at an upcoming annual conference. DoIT suggests implementing a scheduling software in line with other technology upgrades surrounding payroll (ERMA). The Department anticipates that review of available products and decisions as to whether to move to Implementation could occur in late Fall of 2019.

Implementation of a scheduling software could help relieve the current personnel engaged in scheduling, create a feeling of greater fairness and control which would be a morale boost. This would also allow for greater review over how much overtime individuals are working in order to ensure their wellness and that they are taking enough time off. The Department is interested in balancing the above opportunities with the challenges and expense of implementing a new software solution.

The Department has been communicating with and working alongside DoIT, union representatives and outside vendors to explore various scheduling software options. Efforts are also underway to identify best practices in other jurisdictions.

2.7 Decrease the concentration of overtime among dispatchers.

Management Response: Change in overtime distribution procedures implemented in 2018. For the past five years, the Communications Center's overtime has averaged roughly 300 hours per week in order to meet our minimum staffing requirements. Approximately 100 additional hours would be necessary to meet NENA minimum staffing levels.

Although we cannot reduce overtime levels until we hire more dispatchers and they successfully complete either the PSDII or call taking training program, in 2018 the scheduling supervisor was directed by the Communications Manager to re-order the way overtime is assigned in order to more equitably distribute overtime hours between all dispatchers, instead of the majority of hours falling to a portion of staff.

2.8 Develop and implement a Communications Center training plan to ensure compliance with POST training requirements. Evaluate training processes and update training plans routinely.

Management Response: In progress since January of 2019. The goal is that by end of 2019, all Communications Center Personnel will be on track with POST requirements (nearly half completed with all training hours at the halfway point of the training cycle).

Ongoing training of employees is a priority for the Department. The Department sees the value and benefit of these training opportunities for the employee's development and wellness, the Department's mission, and the quality of service the community ultimately receives.

In January of 2019 the Communications Center leadership team implemented a plan to track POST training requirements along with yearly Performance Appraisal Reviews. At each employee's PAR anniversary date, their supervisor will review the number of hours of training received to date. Additionally, Personnel and Training will conduct an annual review of all Communications Center personnel to track POST training time. Finally, one of the Public Safety Dispatch Supervisors was assigned the job to work as a liaison with Personnel and Training for scheduling POST classes as well as directly with dispatchers to locate and sign dispatchers up for course of interest.

3.1 Create a comprehensive stress management program specifically for the Communications Center that includes the following:

- Stress management training for all staff, 8 hours minimum during career
- Access to on-site educational resources to help with stress and related risks, e.g., directory of local therapists specializing in treatment of stress and traumatic stress disorders and city programs that provide information on how and where to access help
- Procedures assuring participation of staff in critical incidence stress management activities (e.g., debriefing sessions when involved in traumatic call events)
- A Peer Support Program
- Comprehensive, ongoing training on structured call-taking processes

Management Response: All Communications Center Staff to receive 8 hours training by December, 2019. The Department recognizes the negative effects of stress on employees and utilizes Peer Support Counselors, a Crisis Intervention Team as well as the Employee Assistance Program and most recently the Headspace website which promotes mindfulness and meditation.

Work with Personnel and Training to Expand current stress management toolset to include a mandatory 8 hour stress management course for all Communications Center staff.

3.2 Develop and implement plans to address workplace cleanliness and equipment and furniture maintenance and replacement.

Management Response: Beginning fall 2018, the Communications Center receives a deep cleaning on a quarterly basis. Standalone Hepa filters will be purchased by July 2019. Management recognizes the need for improvement in the cleanliness of the Communications Center.

3.3 Conduct regular supervisor level meetings to share information about operations and staffing. Use these meeting to improve understanding of the supervisor role, identify problems, discuss changes that may affect operations, and establish communications plans for distributing information to all staff.

Management Response: Fully operational by October 2019. Management recognizes the need for improved communication across all ranks. The Communications manager is in the process of creating a web based information portal which includes sections for polices, Supervisory blog, Communications Center blog, resources, health and wellness, new dispatcher training, and links to web based training opportunities for tenured staff.

3.4 Routinely have Police and Fire staff meet with all Center Supervisors to solicit feedback on Center operations and to address any issues. Use these meetings to improve understanding of the dispatcher role and current policies of public safety, identify problems that should be evaluated for further discussion, and discuss known and expected changes that may affect the Communications Center.

Management Response: May 2019. The Department recognizes the need and benefit of such meetings. Logistically this has been challenging due to the various shifts and workdays of personnel from other divisions. Invite Police and Fire staff to attend the weekly Supervisor meeting whenever problems are identified or whenever known or anticipated changes may affect the Communications Center.

Mission Statement

Promoting transparency and accountability in Berkeley government.

CONSENT CALENDAR
May 14, 2019

To: Honorable Mayor and Members of the City Council
From: Jenny Wong, City Auditor
Subject: 911 Dispatchers: Understaffing Leads to Excessive Overtime and Low Morale

RECOMMENDATION

We recommend City Council request that the City Manager report back by November 19, 2019, and every six months thereafter, regarding the status of our audit recommendations until reported fully implemented by the Police Department.

FISCAL IMPACTS OF RECOMMENDATION

The Communications Center risks losing State funding if it is not able to reach call-answering targets. Investing in adequate staffing and additional resources will allow the Communications Center to answer 911 calls within those required timeframes. The cost of much-needed resources will depend on the outcome of the staffing analysis we recommend that the Police Department complete to determine appropriate staffing levels now and in the future.

Life should not be measured in dollars. Without sufficient staff, it takes longer for call takers to answer 911 calls. The faster that dispatchers can get a police officer, firefighter, or paramedic to the scene, the better the chances of a good outcome.

CURRENT SITUATION AND ITS EFFECTS

It is taking longer than previous years for call takers to answer 911 calls. The Communications Center's staffing levels are not sufficient to meet current call demands and, with predicted population growth, the Center will soon need even more resources to maintain its emergency response service levels.

Due to consistent understaffing, the Communications Center relies heavily on overtime to meet minimum staffing requirements, spending nearly \$1 million per year on overtime. The Police Department works to fill vacant positions, but the hiring and training processes are lengthy and extensive. There are opportunities to improve those processes to reduce both the number of continuous vacancies and the significant reliance on overtime. Understaffing also leads to low morale in the Communications Center. Dispatchers say that they do not feel supported and that they do not have the time needed to take care of their physical and mental health. Police management has taken some steps to address the low morale, but there is more to be done to address dispatcher needs.

We recommend that the Police Department conduct a staffing analysis to determine appropriate staffing levels, create a recruitment and continuous training plan for dispatchers, establish a call-taker classification; and implement automated scheduling software to better inform future budgeting decisions, decrease the reliance on overtime, and relieve the burden placed on overworked staff.

We also recommend that the Police Department implement programs to increase morale and staff communication. These include establishing routine meetings with dispatch supervisors, sworn police, and fire personnel; and a comprehensive stress management program.

BACKGROUND

The Police Department Communications Center serves as Berkeley's 911 public-safety answering point, receiving all emergency and non-emergency police, fire, and medical calls and dispatching public-safety personnel to respond as appropriate. The 2018 City budget authorized 33 non-sworn full-time equivalent positions for the Center, including 28 public safety dispatchers, four supervisors, and one manager. The City has not added to the Communications Center dispatcher staffing levels since 2004.

ENVIRONMENTAL SUSTAINABILITY

Our office manages and stores audit workpapers and other documents electronically to significantly reduce our use of paper and ink. Our audit recommendation for the Communications Center to use modern staffing software could also reduce the use of paper and ink.

RATIONALE FOR RECOMMENDATION

The seconds it takes to answer and prepare a 911 call for dispatch can mean the difference between life and death. Implementing our recommendations will enable dispatchers to answer calls within required timeframes by ensuring the Communications Center is appropriately staffed and supported.

From: *DWR* Dee Williams-Ridley, City Manager

Re: Update on Re-Imagining Public Safety

On July 14, 2020, City Council adopted an omnibus package to re-imagine public safety and policing in the City of Berkeley. The omnibus package consisted of numerous elements including, but not limited to the following:

- Having the City Auditor perform an analysis of City's emergency 9-1-1 calls-for-service and responses, as well as analysis of the Berkeley Police Department's (BPD) budget.
- Analyzing and developing a pilot program to re-assign non-criminal police service calls to a Specialized Care Unit.
- Creating plans and protocols for calls for service to be routed and assigned to alternative preferred responding entities and consider placing dispatch in the Fire Department or elsewhere outside the Police Department.
- Analyzing litigation outcomes and exposure for city departments in order to guide the creation of City policy to reduce the impact of settlements on the General Fund.
- Engaging a qualified firm(s) or individual(s) to lead a robust, inclusive, and transparent community engagement process with the goal of achieving a new and transformative model of positive, equitable and community-centered safety for Berkeley.
- Pursuing the creation of a Berkeley Department of Transportation ("BerkDoT") to ensure a racial justice lens in traffic enforcement and the development of transportation policy, programs and infrastructure, and identify and implement approaches to reduce and/or eliminate the practice of pretextual stops based on minor traffic violations

Subsequent to the adoption of the omnibus package, the City established a multi-department working group to oversee and implement various components of the package. The working group consists of the following:

- City Manager;
- Deputy City Managers;

- City Attorney;
- Fire Chief;
- Health, Housing and Community Services (HHCS) Director;
- Human Resources Director;
- Police Chief; and
- Public Works Director.

Weekly coordinating meetings have been established, as well as an organizational structure that will enable city staff to advance the various referrals in the omnibus package at the same time.

Our work to advance the omnibus package has been organized in the following manner:

- HHCS Director, Lisa Warhuus, is leading the work to develop a Specialized Care Unit pilot program.
- Interim Fire Chief, Abe Roman, is leading the work to develop a plan for priority dispatching.
- City Attorney, Farimah Brown, is managing the analysis of litigation claims and settlements.
- The Public Safety / Police Re-Imagining and community engagement process will be led by Deputy City Manager David White. Deputy City Manager White will also be supporting the City Manager by providing overall project management support to the team.
- BerkDoT will be led by our Public Works Director, Liam Garland.

Current Updates (*for the May 25, 2021 City Council Meeting*)

The following provides a brief overview of what has been accomplished since the last update to City Council on April 27, 2021.

- Priority Dispatching
 - A Request for Proposal (RFP) was issued April 27, 2021, to seek proposals from qualified firms to assist the City in transitioning to a prioritized fire and medical dispatch system. Responses to the RFP are due today, May 25, 2021. Staff will be putting together a team, reviewing proposals, and selecting a firm to assist the Fire Department in moving this item forward.
- Specialized Care Unit (SCU)
 - The SCU Steering Committee is working with the consultant to conduct a deep community outreach and engagement to better understand:

- People’s experiences with, and perceptions of, the current mental health and substance use related crisis response options;
 - Challenges and strengths of current mental health and substance use related crisis response options;
 - Ideas for an alternative approach to mental health and substance use related crises;
 - Needs identified by the community for a safe, effective mental health and substance use related crisis response.
- The Steering Committee has completed its initial phases of planning and materials engagement and has embarked upon the Community Experience and Landscape Assessment that includes:
 - Crisis system provider and partner interviews and focus groups;
 - Community based organization and other community advocate focus groups;
 - Community listening sessions;
 - Individual community member interviews and focus groups;
 - Benchmarking and best practice research (nearly complete).

This phase will be complete by July 2021, and all of the information gathered will inform design of a proposed SCU for Berkeley.

- Public safety and Police Re-imagining Community Engagement

- (Background) On December 15, 2020, the City Council authorized the City Manager to enter into a contract with the [National Institute of Criminal Justice Reform](#) (NICJR) to conduct research, analysis, and use its expertise to develop reports and recommendations for community safety and police reform as well as plan, develop, and lead an inclusive and transparent community engagement process to help the City achieve a new and transformative model of positive, equitable and community-centered safety for Berkeley.
 - City staff from the City Manager’s Office continue to coordinate regularly with NICJR and attached is a more thorough update from NICJR regarding their work with the City.

- [Reimagining Public Safety Task Force \(Task Force\)](#)¹

- (Enabling legislation for background only) On January 19, 2021, the City Council adopted [revisions to the enabling legislation for the Reimagining Public Safety Task Force](#)².
- Since the last update provided to City Council, the Task Force has met on three occasions (April 29, 2021, May 13, 2021, and May 19, 2021), with each meeting lasting around four (4) hours. To achieve the highest level of transparency, the

¹ <https://www.cityofberkeley.info/RIPST.aspx>.

² https://www.cityofberkeley.info/Clerk/City_Council/2021/01_Jan/Documents/2021-01-19_Item_18_Revisions_to_Enabling_Legislation_for_Reimagining.aspx

minutes and full video of Task Force meetings are posted on the Reimagining Public Safety Task Force website. In addition, all of the materials presented to the Task Force are also available on the Task Force website.

- Some highlights from recent Task Force meetings include:
 - The City Auditor’s Office presented their report, “[revisions to the enabling legislation for the Reimagining Public Safety Task Force](#)³.”
 - NICJR presented a draft report on New and Emerging Models of Community Safety.
 - Interim Police Chief Louis presented to the Task Force on two occasions discussing hiring, training, and implementation of Fair and Impartial Policing Workgroup recommendations
 - Dr. Warhuus provided an update to the Task Force on the process to establish a pilot Specialized Care Unit.
 - Public Works Director Garland provided an overview of BerkDoT and alternative approaches to implementing City Council’s referral.
 - NICJR provided an update on the community engagement process and discussed revisions to the community survey.
- Community Survey / Engagement
 - After substantially revising the community survey in response to feedback from the Task Force and subcommittee members focused on community engagement, the survey was made available to the community on May 19, 2021. The survey is available in English and Spanish and is designed to solicit input to help the City design a new model of community safety. The deadline to complete the survey is June 15, 2021.
 - To ensure a robust community response, in addition to posting a community announcement on the City’s [website](#)⁴, Task Force members have been asked to assist in the promotion and dissemination of the survey and staff have distributed the survey to 65 community organizations that serve the Berkeley community. The survey is just one form of outreach being performed. There will also be focused listening sessions and a citywide townhall.
- A number of other things are in the works:
 - NICJR is coordinating with their team and Task Force members to arrange for targeted listening sessions throughout the community.
 - City staff is working on revisions to the Task Force meeting schedule and hopes to present a revised document for the Task Force to discuss at their next meeting on June 10, 2021.

³ https://www.cityofberkeley.info/Clerk/City_Council/2021/01_Jan/Documents/2021-01-19_Item_18_Revisions_to_Enabling_Legislation_for_Reimagining.aspx

⁴ <https://www.cityofberkeley.info/RIPST.aspx>

- BerkDoT
 - Staff delivered a staff report and presentation on BerkDoT at the May 19, 2021 meeting of the Reimagining Public Safety Task Force. This report distilled the input received to date, shared a phased approach to BerkDoT-related projects and activities, and solicited the Task Force's input on the approach. Staff are now incorporating the Task Force's input and preparing a plan for community engagement this summer.

Berkeley Reimagining Public Safety Process Update May 25, 2021

In accordance with the terms of its agreement with the City of Berkeley, the National Institute for Criminal Justice Reform (NICJR) continues efforts toward the Reimagining Public Safety process as well as engaging the Berkeley Reimagining Public Safety Task Force (RPSTF) in developing alternative models to violence reduction and public safety. The productive discussions NICJR and subcontractor Bright Research Group (BRG) have had with the RPSTF and feedback received from the Community Engagement subcommittee have proven extremely helpful in informing the community engagement survey that launched through several platforms on May 19, including an article in the publication [Patch](#) and [Berkeleyside](#). This marks the start of a deep engagement with the broader community of Berkeley to help impact the recommendations to come from the collective work of the Task Force members.

Listening sessions to garner community response and input to policing and other public safety measures in Berkeley are underway.

- NICJR has hosted the first of these sessions with the Berkeley Police Department (BPD) Command Staff, and has two additional sessions planned with BPD officers to ensure that the department is actively involved in the reimagining public safety conversation.
- BRG and Pastor Michael Smith have scheduled a series of Listening Sessions focused on the Black community and the unhoused community.
- BRG is finalizing plans with Berkeley Youth Alternatives to schedule a series of youth Listening Sessions.
- NICJR is hosting a Listening Session with the Berkeley Merchant's Association on June 2, 2021.

Each listening session is designed to solicit the opinions, ideas, and concerns of the participants regarding public safety, police reform, and needed community services/resources. Feedback received will be compiled into a report for the Taskforce and the City Council. NICJR is holding productive discussions with RPSTF members from the Latinx, LGBTQIA, and AAPI communities to ensure that the voices of these residents are heard through additional listening sessions to be facilitated with the assistance of leadership in these communities and aligned with the timeline for recommendations and final deliverables.

The community engagement strategy also includes the development of a public Berkeley Reimagining Public Safety website. NICJR launched the <https://berkeley-rps.org/> website on March 11, 2021. The website contains information on the development of the Task Force and its role and responsibilities, and background material on parallel related efforts underway in the City including establishment of a pilot Specialized Care Unit/s (SCU) and BerkDOT, priority dispatching, and the recommendations from the Mayor's Fair and Impartial Policing Workgroup recently adopted by the City Council. In addition, the website contains a link to the [recently launched community](#) survey and will include opportunities for additional community engagement. Local and national news stories of pertinence and interest, as well as publications that are intended to provide valuable resources and information are posted to the website. The website continues to evolve and is regularly updated by NICJR with support from City staff.

NICJR is finalizing its report on Alternative Responses, which will detail recommendations on what duties of BPD are better suited for other city agencies or community-based organizations. NICJR is also finalizing an analysis of BPD Calls for Service that will augment the recently issued report authored by the City Auditor.

Office of the City Manager

From *DWR* Dee Williams-Ridley, City Manager

Re: Update on Re-Imagining Public Safety

On July 14, 2020, City Council adopted an omnibus package to re-imagine public safety and policing in the City of Berkeley. The omnibus package consisted of numerous elements including, but not limited to the following:

- Having the City Auditor perform an analysis of City's emergency 9-1-1 calls-for-service and responses, as well as analysis of the Berkeley Police Department's (BPD) budget.
- Analyzing and developing a pilot program to re-assign non-criminal police service calls to a Specialized Care Unit.
- Creating plans and protocols for calls for service to be routed and assigned to alternative preferred responding entities and consider placing dispatch in the Fire Department or elsewhere outside the Police Department.
- Analyzing litigation outcomes and exposure for city departments in order to guide the creation of City policy to reduce the impact of settlements on the General Fund.
- Engaging a qualified firm(s) or individual(s) to lead a robust, inclusive, and transparent community engagement process with the goal of achieving a new and transformative model of positive, equitable and community-centered safety for Berkeley.
- Pursuing the creation of a Berkeley Department of Transportation ("BerkDoT") to ensure a racial justice lens in traffic enforcement and the development of transportation policy, programs and infrastructure, and identify and implement approaches to reduce and/or eliminate the practice of pretextual stops based on minor traffic violations

Subsequent to the adoption of the omnibus package, the City established a multi-department working group to oversee and implement various components of the package. The working group consists of the following:

- City Manager;
- Deputy City Managers;

- City Attorney;
- Fire Chief;
- Health, Housing and Community Services (HHCS) Director;
- Human Resources Director;
- Police Chief; and
- Public Works Director.

Weekly coordinating meetings have been established, as well as an organizational structure that will enable city staff to advance the various referrals in the omnibus package at the same time.

Our work to advance the omnibus package has been organized in the following manner:

- HHCS Director, Lisa Warhuus, is leading the work to develop a Specialized Care Unit pilot program.
- Interim Fire Chief, Abe Roman, is leading the work to develop a plan for priority dispatching.
- City Attorney, Farimah Brown, is managing the analysis of litigation claims and settlements.
- The Public Safety / Police Re-Imagining and community engagement process will be led by Deputy City Manager David White. Deputy City Manager White will also be supporting the City Manager by providing overall project management support to the team.
- BerkDoT will be led by our Public Works Director, Liam Garland.

Current Updates (for the July 27, 2021 City Council Meeting)

The following provides a brief overview of what has been accomplished since the last update to City Council on May 25, 2021.

- Priority Dispatching
 - A Request for Proposal (RFP) was issued April 27, 2021, to seek proposals from qualified firms to assist the City in transitioning to a prioritized fire and medical dispatch system.
 - A team consisting of staff from the Fire Department reviewed the proposals that were submitted to the City and four (4) firms were recommended for interviews that occurred on July 26, 2021. The top-ranked firm resulting from the interviews will be invited to meet with subject matter experts in both the Information Technology and Fire Departments. The discussion with subject matter experts will inform the scope of work, timing, and deliverables.

- It is currently anticipated that vendor selection will occur by August 26, 2021.
- Specialized Care Unit (SCU)
 - The SCU steering committee, with support from RDA, is wrapping up the community engagement process. This process has utilized focus groups, forums, and written feedback to engage diverse groups and individuals that have lived experience with crisis response (as clients and/or as responders) to inform the best SCU model for Berkeley. The findings of this process will be analyzed and shared in September 2021 as a function of:
 - Alternative Crisis Response Models & Best Practices Research,
 - Current State & Community Outreach Findings, and
 - SCU Model Recommendations for Berkeley.

All of these findings will be the foundation for finalizing the design and implementing the SCU.

 - To increase supports for community members on the verge of crisis right now, the SCU steering committee has been assessing service provider capacity to increase pre-crisis services and will be finalizing the service model and initiating implementation in August 2021. Such services will not serve as or replace the SCU, but are considered essential to getting much needed supports to the community until the SCU is fully functional.
- Public Safety and Police Re-imagining Community Engagement
 - (Background) On December 15, 2020, the City Council authorized the City Manager to enter into a contract with the National Institute of Criminal Justice Reform (NICJR) to conduct research, analysis, and use its expertise to develop reports and recommendations for community safety and police reform as well as plan, develop, and lead an inclusive and transparent community engagement process to help the City achieve a new and transformative model of positive, equitable and community-centered safety for Berkeley.
 - City staff from the City Manager’s Office continue to meet with NICJR to discuss project deliverables under their Scope of Work, prepare for Task Force meetings, review timelines and coordinate their work with other initiatives that are ongoing in the City surrounding reimagining public safety.
 - At the July 29, 2021 Task Force meeting, NICJR will present the results of the community survey and community listening sessions that have been performed to date and will provide an overview of their draft “Alternative Responses” Report that was submitted to the Task Force. The “Alternative Responses” Report evaluates Police Department calls-for-service and provides a framework to discuss the potential to re-assign certain calls for service to alternate service

providers and/or community-based organizations. After discussing this report at their July 29, 2021 meeting, the Task Force will be asked to provide comments and feedback to NICJR when they convene in September 2021.

- Reimagining Public Safety Task Force (Task Force)¹
 - (Enabling legislation for background only) On January 19, 2021, the City Council adopted revisions to the enabling legislation for the Reimagining Public Safety Task Force².
 - Since the last update provided to City Council, the Task Force has met on numerous occasions (June 10, 2021, June 30, 2021, and July 8, 2021), with a meeting scheduled for this Thursday, July 29, 2021, before the Task Force.
 - Some highlights from recent Task Force meetings include:
 - After incorporating feedback from the Task Force, NICJR submitted their final report on New and Emerging Models of Community Safety and Policing. The report has been posted on the Task Force website³.
 - Interim Police Chief Louis and Police Department staff presented to the Task Force on three occasions discussing the Police Department’s budget, along with an overview of Patrol Operations, the Field Training Program, Civilian Oversight of the Police Department and the disciplinary process.
 - Dr. Warhuus provided an update, her second, to the Task Force on the work being done to establish the Specialized Care Unit.

As a reminder, the minutes and full video of Task Force meetings are posted on the Reimagining Public Safety Task Force website and all of the materials presented to the Task Force are also available on the Task Force website.

- Community Survey / Engagement
 - On May 19, 2021, reflecting input from the Task Force and city staff, a survey was made available to the community. The survey was available in English and Spanish and was designed to solicit input to help the City design a new model of community safety. The survey closed on June 22, 2021. The City received 2,744 responses to the survey. The results of the survey will be discussed at the July 29, 2021 Task Force meeting and a report providing an overview of survey results is part of the July 29, 2021 Task Force agenda packet.

¹ <https://www.cityofberkeley.info/RIPST.aspx>.

² https://www.cityofberkeley.info/Clerk/City_Council/2021/01_Jan/Documents/2021-01-19_Item_18_Revisions_to_Enabling_Legislation_for_Reimagining.aspx

³ https://www.cityofberkeley.info/uploadedFiles/Clerk/Level_3_-_Commissions/New%20and%20Emerging%20Models%20of%20Public%20Safety%20Report%20-%20Final.pdf

- In addition to discussing the community survey, NICJR will report the results of various listening sessions that have occurred over the past few months. These listening sessions have been facilitated by NICJR and their consultant team, along with Task Force members. Summaries of feedback received at the listening sessions are included in the July 29, 2021 Task Force agenda packet.
- At the upcoming Task Force meeting, it is anticipated that the Task Force will discuss additional listening sessions that they are hoping to facilitate, as well as the potential for a citywide townhall.
- In addition to the above, at the July 29, 2021 Task Force meeting, city staff and NICJR will discuss project timelines and deliverables. The Task Force has asked for additional time to plan for and hear from community organizations and other subject matter experts regarding community safety and policing.
- Finally, early on in the process, the Police Department invited Task Force members to participate in ride-a-longs with Police Officers and sit in the communications center to observe dispatchers. Many Task Force members have participated in these activities that has resulted in deeper knowledge of Police Department operations.
- BerkDoT
 - Following the May 19, 2021 presentation to the Task Force, staff has moved forward with the BerkDOT public engagement plan. A community survey is being developed that will engage about 700 Berkeley residents in 15-20-minute interviews on various traffic safety topics. The survey will include contributions from a sub quorum of the Transportation Committee and Charles T. Brown, founder of Equitable Cities, a firm focused on the intersection of transportation, health, and equity. Results from the survey are likely by mid-September.
 - In addition, staff have been in discussions with SEIU and the City's parking enforcement officers who have indicated their opposition to any shift of this function outside the Police Department. City staff hope to continue to engage with SEIU to understand the concerns raised by the Union and parking enforcement staff.

**Reimagining Public Safety
City Council Update
October 26, 2021**

Background (*reference only*)

- On July 14, 2020, City Council adopted an omnibus package to re-imagine public safety and policing in the City of Berkeley.
- The omnibus package consisted of numerous elements including, but not limited to the following:
 - Having the City Auditor perform an analysis of City's emergency 9-1-1 calls-for-service and responses, as well as analysis of the Berkeley Police Department's (BPD) budget.
 - Analyzing and developing a pilot program to re-assign non-criminal police service calls to a Specialized Care Unit.
 - Creating plans and protocols for calls for service to be routed and assigned to alternative preferred responding entities and consider placing dispatch in the Fire Department or elsewhere outside the Police Department.
 - Analyzing litigation outcomes and exposure for city departments in order to guide the creation of City policy to reduce the impact of settlements on the General Fund.
 - Engaging a qualified firm(s) or individual(s) to lead a robust, inclusive, and transparent community engagement process with the goal of achieving a new and transformative model of positive, equitable and community-centered safety for Berkeley.
 - Pursuing the creation of a Berkeley Department of Transportation ("BerkDoT") to ensure a racial justice lens in traffic enforcement and the development of transportation policy, programs and infrastructure, and identify and implement approaches to reduce and/or eliminate the practice of pretextual stops based on minor traffic violations

- Subsequent to the adoption of the omnibus package, the City established a multi-department working groups to oversee and implement various components of the package. The working group consists of the following:
 - City Manager;
 - Deputy City Managers;
 - City Attorney;
 - Fire Chief;
 - Health, Housing and Community Services (HHCS) Director;
 - Human Resources Director;
 - Police Chief; and
 - Public Works Director.

Weekly coordinating meetings have been established, as well as an organizational structure that will enable city staff to advance the various referrals in the omnibus package at the same time.

- Our work to advance the omnibus package has been organized in the following manner:
 - HHCS Director, Lisa Warhuus, is leading the work to develop a Specialized Care Unit pilot program.
 - Fire Chief, Abe Roman, is leading the work to develop a plan for priority dispatching.
 - City Attorney, Farimah Brown, is managing the analysis of litigation claims and settlements.
 - The Public Safety / Police Re-Imagining and community engagement process is now being led by Interim Deputy City Manager LaTanya Bellow. Interim Deputy City Manager Bellow will also be supporting the City Manager by providing overall project management support to the team.
 - BerkDoT will be led by our Public Works Director, Liam Garland.

Current Updates (for the October 26, 2021 City Council Meeting)

The following provides a brief overview of what has been accomplished since the last update to City Council on August 24, 2021.

- Priority Dispatching
 - On October 26, 2021, the City Council authorized the City Manager to enter into a contract with Federal Engineering Inc. to provide consulting services to analyze staffing, infrastructure and technology needs for Berkeley's 911 Communication Center as well as recommend a project plan to help the City implement an accredited prioritized medical dispatch system.
 - Staff is working to develop the scope of work, timing, and deliverables and expect to have the contract executed in November 2021.
- Specialized Care Unit (SCU)
 - Resource Development Associates (RDA) has completed the first of three reports on Crisis Response Models in which they share information, learnings, and best practices among nearly 40 crisis response programs across North America.
 - RDA is finalizing their 2nd report on the community engagement process outcomes this week and 3rd and final report which is recommendations for an SCU for Berkeley by the first week in November. Both of these reports involved analysis of a large volume of materials and so were slightly delayed.
 - Once RDAs reports are complete and made publicly available, the SCU steering committee will work to finalize the planning, protocols, and timelines for roll out of the SCU.
 - The SCU steering committee also worked diligently over the summer on program design for the 1.2 million dollars that City Council allocated to enhance supportive services on the ground while the SCU is being designed. Steering committee members met with a variety of community-based organizations and community groups that currently provide extensive outreach and field services (such as street medicine, emotional support, peer support, and substance use) to understand the needs they are seeing in the community and to assess community capacity for being able to expand their services. This information was then utilized to conduct a Request for Proposals process to expand these services among a variety of agencies. The RFP has closed and proposals are currently being reviewed by a subcommittee of the steering committee.

Public safety and Police Re-imagining Community Engagement

- (Background) On December 15, 2020, the City Council authorized the City Manager to enter into a contract with the [National Institute of Criminal Justice Reform](#) (NICJR) to conduct research, analysis, and use its expertise to develop reports and recommendations for community safety and police reform as well as plan, develop, and lead an inclusive and transparent community engagement process to help the City achieve a new and transformative model of positive, equitable and community-centered safety for Berkeley.
- City staff from the City Manager’s Office continue to meet with NICJR to discuss project deliverables under their Scope of Work, prepare for Task Force meetings, review timelines and coordinate their work with other initiatives that are ongoing in the City surrounding reimagining public safety.
- At the September 30, 2021 Task Force meeting, NICJR presented an alternative responses Tiered Dispatch model which includes, the Community Emergency Response Network (CERN). The CERN model involves a framework with the potential to re-assign certain calls for service to alternate service providers and/or community-based organizations. In response to the [Alternative Responses Report](#)¹ discussion on July 29, 2021, the Task Force put forth feedback and comments to NICJR on the proposed CERN model.

A number of things are on the horizon:

- NICJR will present a draft of the final report to the City on October 29, 2021.
- Also, planned is a series of Community Town Hall meetings to further promote deep community engagement and input into final recommendations. NICJR is coordinating with their team to facilitate sessions throughout the community. The following dates are scheduled:
 - District 1, 2,- November 10th 6:00-8:00 pm PST – virtual platform
 - Downtown Civic District, South Berkeley-District 3,4,-November 15th 6:00-8:00 pm PST – virtual platform
 - November 23rd 6:00-8:00 pm PST –In person- TBD
UC Campus, Southeast Berkeley District 5,6,7,8- November 30th 6:00-8:00 pm PST – virtual platform

¹ https://www.cityofberkeley.info/uploadedFiles/Clerk/Level_3_-_Commissions/07-27-21%20Combined%20Alternative%20Responses%20Report%20Draft%20with%20Appendices.pdf

- [Reimagining Public Safety Task Force \(Task Force\)²](#)
 - (Enabling legislation for background only) On January 19, 2021, the City Council adopted [revisions to the enabling legislation for the Reimagining Public Safety Task Force³](#)
 - Since the last update provided to City Council, the Task Force has met on numerous occasions (July 29, September 9, 2021, September 30, 2021, October 14), with each meeting lasting around four (4) hours. The next meeting is scheduled for this Wednesday, October 27, 2021 at 5pm.

Some highlights from recent Task Force meetings include:

- On July 29, 2021, NICJR submitted their final report on [Community Engagement⁴](#).
- Dr. Lisa Warhuus and Staff presented an overview of Berkeley's Mobile Crisis Team discussing operations, staffing levels and coordination.
- The Task Force extended invitations to several community-based organizations to speak about matters related to public safety and policing.
- Finally, at the upcoming meeting, the Task Force will discuss a process for submitting its final recommendations on reimagining public safety.

As a reminder, the minutes and full video of Task Force meetings are posted on the Reimagining Public Safety Task Force website and all of the materials presented to the Task Force are also available on the Task Force website.

- Community Survey / Engagement
 - On May 19, 2021, reflecting input from the Task Force and city staff, a survey was made available to the community. The survey was available in English and Spanish and was designed to solicit input to help the City design a new model of community safety. The survey closed on June 22, 2021. The City received 2,744 responses to the survey.

² <https://www.cityofberkeley.info/RIPST.aspx>

³ https://www.cityofberkeley.info/uploadedFiles/Clerk/Level_3_-_Commissions/2021-01-19%20Item%2018%20Revisions%20to%20Enabling%20Legislation%20for%20Reimagining.pdf

⁴ https://www.cityofberkeley.info/uploadedFiles/Clerk/Level_3_-_Commissions/CE-presentation-Final.pdf

- In addition to the community survey, NICJR compiled the results of twelve listening sessions that have occurred over the past few months. These listening sessions have been facilitated by NICJR and their consultant team, along with Task Force members. The overview and summary of results has been posted on the Task Force website².
 - Finally, at the October 14 Task Force meeting, NICJR discussed a potential schedule for Community Townhalls. NICJR is coordinating with their team and the Task Force to support outreach to the community.
- BerkDoT
- Following the May 19, 2021 presentation to the Task Force, the public engagement process for BerkDOT continues and is being advised by the Transportation Commission's subcommittee dedicated to this issue. A recent citywide survey included a randomized sampling of 550 residents and additional sampling of black and Latinx Berkeleyans to ensure responses within each demographic group are sufficient to reports survey results with a margin of error less than 10% in those groups. To supplement with input from groups likely to be left out by such a survey, listening sessions are being held for people of color who work (but don't live) in Berkeley, are high school or college students, or parts of minority religious communities. The survey and listening sessions will conclude at the of October after which staff will incorporate this input into preliminary recommendations.

APPENDIX C

May 5, 2022 | Phased Approach and Priority Items for Reimagining Public Safety

ACTION CALENDAR

May 5, 2022

To: Honorable Members of the City Council
 From: Mayor Jesse Arreguín, Vice-Mayor Kate Harrison, and Councilmembers Ben Bartlett and Sophie Hahn
 Subject: Fulfilling the Promise of Berkeley's Reimagining Public Safety Initiative: Recommendations for a Comprehensive, Phased Approach

RECOMMENDATION

To continue the study and implementation of a comprehensive, new approach to public safety and policing in Berkeley, responsive to the City Council's unanimous July 14, 2020 direction for **a transformative approach to community-centered safety with equitable investment in the essential conditions of a safe and healthy community:**

1. Refer up to \$5.3 Million to the FY 2023-2024 Budget Process for staff and/or consulting services and community investments to complete the **Priority Reimagining Public Safety Initiatives** listed in Attachment 1, Section A.
2. Direct the City Manager to prioritize over the next two years the programmatic recommendations for Phase 1 of **Reimagining Implementation** listed in Attachment 1, Section B.
3. Direct the City Manager to initiate a design process for an **innovative and comprehensive public safety agency or Department of Community Safety** within the City of Berkeley administration, as outlined in Attachment 1, Section C, and return with recommendations to the City Council by May 2024 to align with the FY 25-26 Biennial Budget process.
4. Except where resources may allow for expedited implementation, refer additional reforms to the FY 2025-2026 Biennial Budget as outlined in Attachment 1, Section D.

BACKGROUND**2020 Omnibus Motion**

On July 14, 2020, after hearing from over 130 speakers and receiving hundreds of written comments, the City Council adopted an omnibus motion combining elements from a variety of Council proposals to reimagine community safety in Berkeley. This action came two months after the murder of George Floyd by Minneapolis Police, and in response to a growing movement for reform of traditional public safety models. On June 6, 2020, over 7,000 Berkeley residents marched in the streets to call for transformative change in law enforcement not just nationally, but also here in Berkeley.

Berkeley, like many cities throughout the United States, is not immune from the stain of systemic racism, including state-sponsored actions such as violence against people of color, redlining and discriminatory housing practices. Gaping racial inequities persist with respect to housing affordability and ownership, income, health status, academic achievement, homelessness, and experiences with the criminal justice system, among others. At the same time, due to the lack of government programs to support wealth building and rising housing costs and gentrification, the size of the Black community in Berkeley has decreased from approximately 20% in 1970 to [8%, according to the 2020 census](#). If Berkeley is to realize its aspiration of becoming a truly progressive, equitable community, we must be willing to examine and transform all systems and institutions, including those related to housing, health, education, employment, environmental justice, criminal justice, and law enforcement.

The July 14, 2020 omnibus motion committed Berkeley to:

- i. **A transformative approach to community-centered safety and reducing the scope of policing**, by re-defining our understanding of safety to be holistic and focus not just on crime prevention but health, wellness, and economic security for *all* of our residents. While the focus has been on reducing the footprint of policing, we recognize that police play a critical role in our society, and we must determine the right size, focus and function of our Police Department to prevent and respond to crime, while exploring alternative response models and upstream investments in social services to create a healthy, safe and equitable community.
- ii. **Equitable investment in the essential conditions of a safe and healthy community**, especially for those who have been historically marginalized and have experienced disinvestment, and
- iii. **A broad, inclusive community process** that will result in deep and lasting change to support safety and wellbeing for all Berkeley residents.
- iv. **Reimagining health and safety**, considering allocating resources towards a more holistic approach - one that shifts resources away from policing towards health, education and social services, and is able to meet crises with a variety of appropriate responses.
- v. **Providing meaningful safety, continuing critical health and social services, and committing to, and investing in, a new, positive, equitable and community-centered approach to health and safety that is affordable and sustainable.**
- vi. **Determining the appropriate response to community calls** for help including size, scope of operation and powers and duties of a well-trained police department.
- vii. **Identifying alternatives to policing and enforcement to reduce conflict, harm, and institutionalization**, introduce alternative and restorative justice models, and reduce or eliminate use of fines and incarceration.

In addition to these original goals, we are committed to:

- viii. **Supporting police by freeing them to focus on what they do best: respond to and investigate serious crimes**
- ix. **Ensuring an appropriately staffed and deployed Police Department while reducing the impact of Police expenditures to the General Fund;** Investing in a suite of alternative response services and a sophisticated dispatch system to deploy the most appropriate emergency response in a cost-effective manner.

These initial proposals for a comprehensive, phased approach to fulfilling Council's omnibus recommendations are designed to actualize Council's stated values and goals.

RATIONALE FOR RECOMMENDATIONS

For too long “public safety” has been equated with policing alone, while police have become tasked by default with the impossible job of managing the impact of decades of disinvestment in mental health, education, housing, and other social safety nets. While efforts to address systemic racism and reform the criminal justice system long pre-dated the murder of George Floyd in May of 2020, his murder by the Minneapolis Police challenged communities across the country to reimagine and redefine public safety. In the two years since his tragic death, the Berkeley City Council, city staff, community members and consultants have worked collaboratively to advance recommendations on new programs, policies, and initiatives to reimagine public safety in Berkeley. Some of these recommendations are ready for implementation, while others need further analysis and development, but **collectively these actions represent the building blocks of a new paradigm for public safety in Berkeley.**

This transformative approach requires balancing our resources to simultaneously build a new system while continuing to provide essential public safety services to the community. Thus, as we develop alternative capabilities, our police will continue to receive necessary resources. Start-up costs for new programs and services require investments that may be supported by government and philanthropic grants; there is a great deal of interest among funders in meaningful work to expand and reform models for public safety. Short-term salary savings and other one-time monies available within the City budget may also be invested in the development of Berkeley's transformative work to reimagine and re-deploy our resources to achieve greater public safety and equity across the community.

These recommendations continue Berkeley's thoughtful, measured approach to restructuring and redefining health and safety through identifying and building the right response to each safety related call or crisis, and upstream investments to address social determinants. Through immediate, intermediate, and longer-term steps these recommendations, drawn from the National Institute of Criminal Justice Reform, the Reimagining Public Safety Task Force, and the City Manager's Reimagining Public Safety report, continue Berkeley's efforts to restructure and redefine “health and safety” for all Berkeleyans, and to transform the city to an equitable and holistic model that delivers greater response capabilities to all residents.

1. **Refer up to \$5.3 Million in staffing, consulting costs and community investments to the 2023-24 Budget Process as Priority Reimagining Public Safety Initiatives**

These budget referrals are broken down by staff and consultant costs. Budgets are taken from the City Manager's proposals unless another source is noted.

City Staff Costs

Amount	Purpose	Rationale
\$315,000	Assistant City Manager to lead Office of Equity and Diversity	<p>Recommendation supported by City Manager, Task Force and City Council.</p> <p>The development of the Office Equity and Diversity should consider the recommendations from the Reimagining Task Force. Particular attention from the Office of Equity should be paid to language access, which has been identified repeatedly as a barrier to trust and the provision of services delivered by the City across departments.</p>
\$315,000	Assistant City Manager to serve as Reimagining Project Coordinator	The responsibilities of project management have fallen under the already heavy burden of the existing Deputy City Manager, with part-time support from a Management Analyst. To effectively coordinate the ongoing work, a full-time senior level staff person in the City Manager's Office is required as they will be coordinating a multi-departmental, citywide response.
\$100,000	Fair and Impartial Policing (FIP) Training	Recommendation to implement and prioritize FIP has been supported by City Manager, City Council and Task Force
\$100,000	Grant Writing Services	Recommended by City Manager to apply for and seek grant funds to support Reimagining efforts
Up to \$1.5 Million	1 Supervisor - CSO Unit; Up to 9 Community Services Officers	Launch a pilot Community Services Officer unit using Police salary savings. Positions would be project based for two-years. Evaluate pilot after two-year period to align with the FY 25-26 Budget

		Process and determine the appropriate location of the CSO unit within a new Public Safety Department and the role for other non-sworn responders.
\$175,000	Vision Zero Staff Position	Approve a new Vision Zero staff position in Public Works' Division of Transportation to conduct collision analysis. This will promote the City's Vision Zero approach by boosting the City's capacity to analyze collision data collected by the Police Department, and, with Police input, propose

Consultant Costs

Amount	Purpose	Rationale
\$300,000	Continue BerkDOT process to plan for a civilian traffic enforcement unit. Process would inform the content of any needed state law changes and also work to develop functions that could be carried out by civilians absent such changes (e.g., collision analysis, civilianization of non-moving violations)	Recommendation supported by the City Manager and Task Force. Explore as part of the continued BerkDOT analysis/implementation the potential for unarmed traffic officers in the Police Department. If state law is not amended this may be a potential path for unarmed traffic enforcement.
\$70,000	Analysis of BPD Staffing and Beat Structure (<i>See details in Attachment 1 section A</i>)	Recommended by City Manager and supported by City Council
Approximately \$250,000	Support an organizational design process to create an umbrella agency or Department of Community Safety	See below, rationale part 3
\$150,000	Review Municipal Code for proposed changes to increase equity and racial justice in City's transportation fines and fees, and explore the civilianization of enforcement of various	Recommendation is supported by the City Manager and Task Force

	Municipal Code violations	
\$200,000	Consulting costs requested by City Manager to support continued analysis of prioritized dispatch and development of an implementation plan	Recommendation is supported by the City Manager. Developing a new model for dispatch was identified as critical by both SCU Steering Committee and Task Force

Community Investments

Opportunities for community reinvestment, as envisioned in the City Council's omnibus proposal.

Category	Budget	Purpose	Rationale	Status
Violence Prevention and Youth Services	\$50,000	McGee Avenue Baptist Church - Voices Against Violence	Youth-led violence prevention program in South Berkeley. City has previously funded at \$50,000	Request funding in FY 23 and FY 24 Biennial Budget
	\$200,000	Berkeley Ceasefire	Consulting costs to develop a Gun Violence Intervention (GVI) program, commonly known as "Operation Ceasefire."	Funded in FY 22 AAO #1 (separately referred by CM Taplin - 11/9/21)
	\$160,000	Berkeley Youth Alternatives Counseling Center	\$125,000 to support for their counseling center which cannot meet the current demand for mental health services. \$35,000 for the Summer Jam Day Camp	FY 23 and FY 24
Alternatives to Sanctions/Fines	\$150,000	Expand Hearing Officer Capacity	Expand existing hearing officer	FY 23 and FY 24

			resources in CMO to provide alternative referrals to community service and social services for parking and other infractions	
	\$50,000	Expand Downtown Streets Team	Expand Downtown Streets Team as placement for low-level violations (e.g., vehicular camping/parking and sidewalk ordinance infractions)	FY 23 and FY 24. Measure P revenues.
Community Mental Health, Behavioral & Crisis Response	\$100,000	Behavioral Health, Crisis Response, and Crisis-related Services Needs and Capacity Assessments	Enhance creation and deployment of behavioral and crisis services and responses via SCU etc.	FY 23 (separately referred by VM Harrison)
	\$350,000	Youth Peers Mental Health response	BHS student-led plan for mental health services for youth	FY 23 and FY24 (separately referred by VM Harrison)
Respite from Gender Violence	Up to \$500,000	Increase the capacity of community based-orgs (see page 223 of NICJR Final Report Packet)	Recommended by Task Force: Provide services and housing leads for victims of Gender Violence Additionally, staff to work with county partners to clarify which services should be provided by county vs the city.	FY 23-24

Language Equity	\$15,000	Publish Victim Resources in Plain Language and Multiple Languages	Recommended by Task Force	FY 23-24
-----------------	----------	---	---------------------------	----------

2. Direct the City Manager to prioritize programmatic recommendations for Phase 1 of Reimagining Implementation during next 12-24 months (Attachment 1, Section B)

Recommendation	Rationale
Adopt the report, “City of Berkeley Specialized Care Unit Crisis Response Recommendations” by Resource Development Associates and implement the pilot Specialized Care Unit (SCU)	Recommendation supported by the City Manager, Task Force, City Council and Steering Committee
Continue development and implementation of prioritized dispatch, request staff return with a recommended plan	Recommendation supported by the City Manager, RDA report, SCU Steering Committee, and City Council
Develop an implementation plan to expand alternative response from civilian responders beyond the proposed pilot for SCU for other low-level calls that includes but is not limited to: Community Service Officers for only those calls that necessitate police, code enforcement, environmental health, fire inspectors or city-hired community mediators	<p>The Task Force, City Council and City Manager expressed interest in exploring alternative, civilian responders (as recommended by NICJR) but felt more work was needed before a pilot could be pursued. Questions around the appropriate level of authority, concerns around liability and further refinement of call types need to be addressed.</p> <p>This work could be led by the new reimagining project coordinator and/or be folded into the organizational design process for a new umbrella public safety department.</p> <p>The City Manager has proposed using Community Service Officers in the Police Department as one approach to alternative responders, which for certain functions have some value. But developing non-police alternatives is important for a variety of reasons, most critically enhanced public trust and confidence. Some people are uncomfortable calling the Police to ask for help but might if assured that a community responder will be available as appropriate. Second, while BPD is working</p>

	to hire diverse candidates, there is an opportunity to create a classification that appeals to people that would otherwise not choose to be a sworn responder. Third, having a variety of non-police alternatives which are skilled to respond to different types of calls (CSOs for police calls, code enforcement for noise complaints and other code violations, SCU for health and substance abuse) will ensure the appropriate response to various non-violent calls for service and better improve service delivery and outcomes.
Transition collision analysis and crossing guards from BPD to Public Works until a Department of Transportation is developed.	Recommendation supported by City Manager and Task Force.
Continue consolidating transportation functions as recommended by staff	Recommendation supported by City Manager and Task Force
Complete the implementation of Fair and Impartial Policing Recommendations	Recommendation supported by City Manager and Task Force
Complete Auditor Recommendations on overtime and calls for service	Recommendation supported by City Manager, Task Force, and City Council
Fully implement the Ceasefire violence intervention program	Recommendation supported by City Manager, Task Force, and City Council
Collect data on service gaps in crisis stabilization and analyze creation of a new crisis stabilization center	Recommendation is supported by Task Force. This recommendation refers to the work of the Homeless Commission and the companion report from City Staff to expand access to crisis stabilization and/or respite centers. ¹

¹https://www.cityofberkeley.info/Clerk/City_Council/2022/04_Apr/Documents/2022-04-26_Item_38b_Companion_Report_Development_of_Crisis_Stabilization_Program.aspx

<p>and/or expanded access to existing centers so that people in crisis have a safe and supportive alternative to jail or emergency rooms.</p>	
<p>Implement recommendations from the Reimagining Task Force relating to Gender Violence, LGBTQIA . (Attachment X)</p>	<p>Recommendations supported by Task Force. BPD has already begun the work of expanding collaboration with organizations.</p> <p>The gender-based subcommittee spearheaded their own outreach to service providers and subject matters to develop a set of actionable recommendations to increase resources for victims, provide training to faith-based leaders, coordinate and expand prevention education work as well as many ideas to improve police responses.</p>

3. Direct the City Manager to initiate a design process for an innovative and comprehensive public safety agency or Department of Community Safety within the City of Berkeley administration (Attachment 1, Section C)

This recommendation initiates a design process to develop the right organizational model that reflects Berkeley’s new and holistic approach to public safety.

To date, the process of reimagining and the emerging services and programs have been managed on a department-by-department basis. Health, Housing and Community Services (HHCS) manages the SCU process, the Fire Department manages the priority dispatch process, Public Works leads the BerkDOT work, and the Police Department has been engaged with the Reimagining Task Force and NICJR process and is focused on implementing recommendations by the City Auditor and the Fair and Impartial Working Group. In the short-term, additional project management to coordinate the next phase of these efforts can be supported by a new project coordinator, as requested by the City Manager. However, in the long-term the city should explore an organizational approach to synthesize these efforts. **If the City is to truly re-imagine public safety, it needs a structure for how this new approach will fit within the city organization and work collaboratively to deliver comprehensive public safety services.**

Nowhere is the need clearer to reorganize our approach than our dispatch system. Dispatch is the nervous system of our city’s response network. The system is key to ensuring that low level incidents are handled efficiently and effectively to provide the most appropriate response in

each situation and preserve and prioritize core resources for serious emergencies and critical incidents. Historically, this function has been served by BPD prioritizing calls requiring BPD support. As part of the reimagining process, the Council authorized the City Manager to contract with Federal Engineering to conduct an analysis of the staffing, infrastructure, and technology needs of the Berkeley 9-1-1 Communication Center and create a project plan to implement an accredited emergency medical dispatch system based on industry standards. The adoption of a new model would allow the Fire Department to triage calls for service more efficiently and reduce response times.²

In anticipation of the Specialized Care Unit pilot, which will require further nuance and expertise to ensure the right resources are dispatched for each call, this scope of work was expanded to include an analysis of adding behavioral health dispatch capabilities to the Communications Center. Resource Development Associates supported this approach in their recommendation and noted in their system recommendations that moving dispatch outside the Police Department could better align several of the reimagining initiatives:

*“The 911 Communications Center is currently operated by the Berkeley Police Department. This structure affects how Dispatch is funded and who makes decisions. As the role of Dispatch is broadened to coordinate a greater variety of responses to emergencies, there may be advantages to moving Dispatch outside of the Berkeley Police Department, such as improved communication and coordination across relevant agencies. For instance, it has been expressed that Dispatch call takers are currently more comfortable deploying the police than other crisis responders given their long tenure and rapport with police officers, so call takers’ ability to establish rapport with the SCU team is needed for them to be comfortable deploying the SCU. **Structural changes like this may also align to several of the Reimagining Public Safety initiative’s aims.**”³*

While we have a lot to learn through pilots, preliminary analysis through the reimagining process indicates that Berkeley can be more effectively and efficiently served through a broader array of public safety responders. According to City Auditor and NICJR analyses, 81% of calls to the police are for non-criminal incidents, and police spend 53% of their time responding to these calls.⁴ By implementing an SCU in phase two of this process, and introducing additional civilian responders in phase three, calls for service could be spread much more evenly across police, fire, and civilian responders. However, finding the appropriate balance and resourcing of these

² City Manager Response to the Reimagining Public Safety Task Force and National Institute for Criminal Justice Reform Recommendations, https://www.cityofberkeley.info/Clerk/City_Council/2022/04_Apr/Documents/2022-04-21_Special_Item_01_City_Manager_Presentation_Part2_pdf.aspx

³ Specialized Care Unit Crisis Response Recommendations, Resource Development Associates, 61, https://www.cityofberkeley.info/uploadedFiles/Clerk/Level_3_-_Commissions/Berkeley-MH-SCU_Final_Recommendations_FINAL.pdf

⁴ National Institute for Criminal Justice Reform, Calls for Service Analysis, https://berkeley-rps.org/wp-content/uploads/2022/03/BerkeleyCalls_Report_021722.pdf

new approaches will take time and patience. A new umbrella agency can ensure that this iterative approach is well-coordinated and that new civilian responses are prioritized equally to police and fire. Moreover, it can ensure better communication and coordination between different public safety responders (sworn and un-sworn) and flexible deployment of all these resources to address community needs.

Other Cities Are Pursuing Similar Approaches

Example 1: Albuquerque, New Mexico Department of Community Safety

As noted in NICJR's *New and Emerging Models Report*, Berkeley would not be alone or the first in taking this approach.⁵ Albuquerque, New Mexico created a new cabinet level Department of Community Safety that operates independently from and in collaboration with Albuquerque Police and Fire, with four strategic goals:

Respond: Increase public safety by providing a holistic and trauma-informed response to calls for service.

Build: Establish a sustainable and long-term presence that is woven into the community and the public safety ecosystem.

Engage: Activate community partnerships and strengthen community engagement by enhancing relationships, trust, information sharing, and capacity building between the community and ACS.

Influence: Leverage ACS's position and knowledge to influence and inform the ongoing evolution of the larger (e.g., county, state, national) system of care.

In December 2021, Albuquerque published a complete organizational plan that defines the department and its role, responses, training, and goals.⁶

⁶ Albuquerque Community Safety Department FY2022 Organizational Plan, <https://www.cabq.gov/acs/documents/acs-organizational-plan-20211207.pdf>

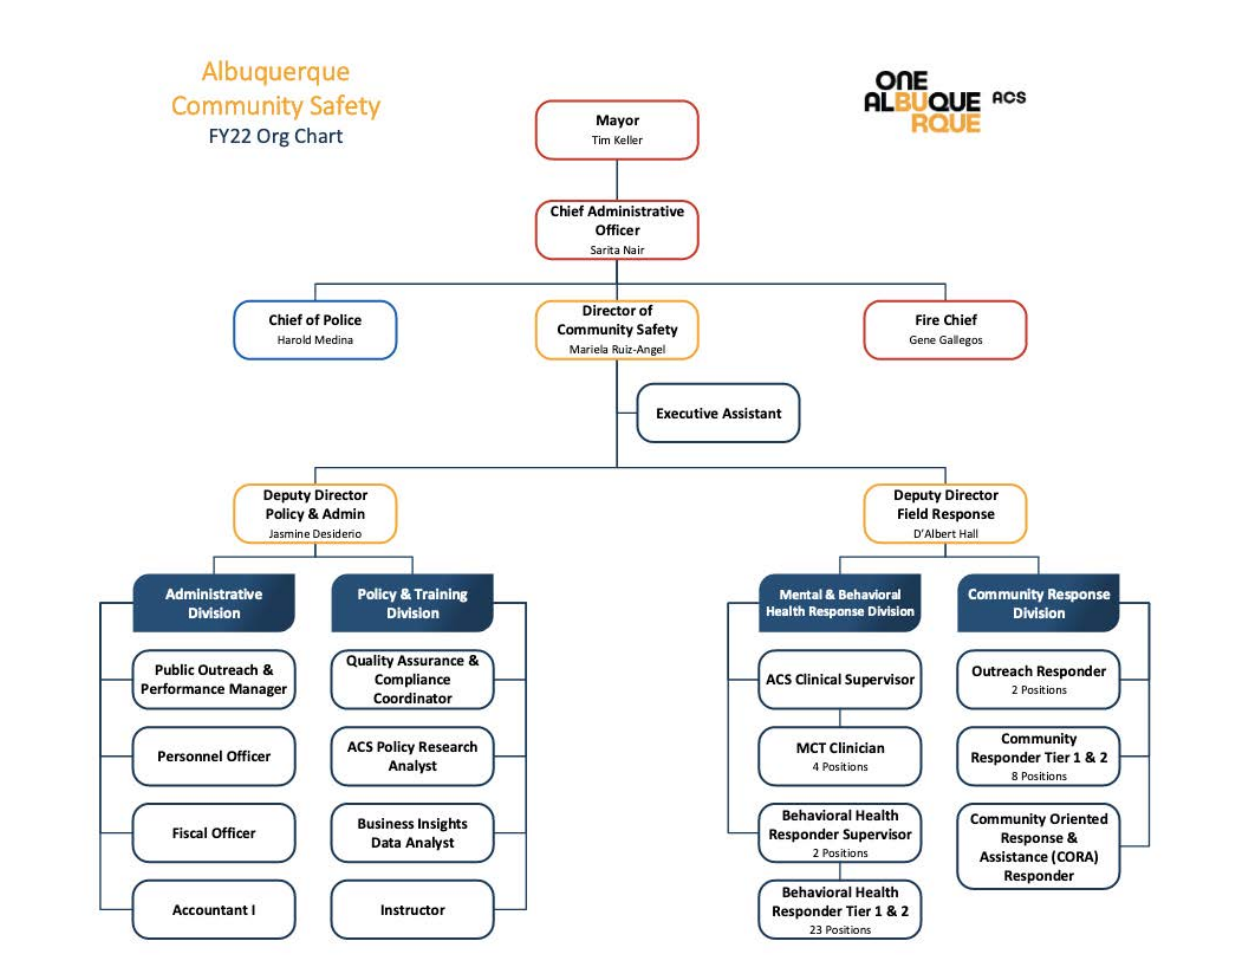

Figure 1: Albuquerque Community Safety FY22 Org Chart

Example 2: Ithaca, New York

Ithaca, New York has also recently released an implementation plan to create a new Department of Community Safety. The Ithaca model consists of a division of police and a division of community solutions, staffed by community responders, with co-equal chiefs that will respond to a civilian director of community safety. A working group of civilians appointed by the Mayor collaborated with city and county staff to provide recommendations including: the assignment of call types, restructuring police staffing and beat design, and defining key responsibilities, training, research and data needs, and equipment and technology requirements.⁷

Goals for Design Process

The primary goal of this process is to develop a long-term organizational structure that will support Berkeley’s vision for community safety. Rather than providing prescriptive direction on

⁷ Implementing the City of Ithaca’s New Public Safety Agency https://www.cityofithaca.org/DocumentCenter/View/13725/WG_IthacaReport_Final

the exact changes to make, this process will define what the right structure looks like for Berkeley. This recommendation does not suggest any changes to the structure of the Police or Fire Departments except for those that are already underway and in alignment with the City's reimagining efforts.

The design process should place a few key principles at the core of its exploration, while also seeking to answer several questions. As part of the design process, the City Manager is recommended to convene an external Steering Committee made up of representatives of affected labor groups, City Commissioners, and community stakeholders.

Key principles to guide the organizational design plan include:

- Police, Fire, and any additional civilian responders should report to a civilian Director or Deputy City Manager of Community Safety, who is responsible for implementing a holistic approach to public safety.
- Dispatch should serve all branches of responders equally and report directly to the Department Director or Deputy City Manager.
- The department should integrate new response models and community services including the SCU, additional community service responders as defined during the development of an implementation plan, and a Mobile Integrated Paramedic unit (MIP).

The organizational plan should explore and include the following considerations, among others:

- A name and structure that matches Berkeley's vision for a community-centered and holistic approach to public safety and prioritizes civilian responders and community investments as key functions of community health and safety along with Police and Fire.
- The best organizational fit for a Specialized Care Unit and other civilian responders that will respond to non-violent calls for service:
 - Review and incorporate ideas from emerging models like Albuquerque, NM and Ithaca, NY
 - Explore whether Berkeley should develop a new division for community response similar to Albuquerque or Ithaca
- Assess the appropriate uniforms, technology and tools for any new division or classifications of civilian responders
- Define the appropriate connections and/or roles for the Mobile Crisis Team, a potential crisis stabilization center, and other services that currently operate under mental health but might frequently work in coordination with other community safety services.
- Consider the role and relationship of a Department of Transportation (BerkDOT) and potential civilian traffic enforcement in relation to a new Public Safety Department. Explore as part of the continued BerkDOT analysis/implementation the potential for unarmed traffic officers in the Police Department. If state law is not amended this may be a potential path for unarmed traffic enforcement.
- Define the appropriate connections and/or roles of the Homeless Response Team and community service providers including housing navigators, homeless outreach staff, and street medicine teams in responding to Police and 311 calls related to street homelessness.
- Analyze calls for service and determine which calls could be handled by Police and by civilian responders
- Evaluate how a new comprehensive dispatch system can better screen and route calls

- to a variety of public safety responders
 - Determine how and under what circumstances a co-response is warranted to police calls for service and determine how civilian responders will communicate and coordinate with Police in responding to lower-level calls.
- 4. Refer for consideration in the FY 2025-2026 budget cycle - Creation of a permanent Specialized Care Unit, expanding crisis stabilization services, introducing additional civilian responders, fully implementing BerkDOT, implementing a Universal Basic Income Pilot and expanded job programs. Consider expedited implementation as appropriate if staff capacity and city resources allow. (Attachment 1, Section D)**

These recommendations express a commitment to fulfilling a more transformative vision for community safety over time. Programs like a universal basic income (UBI), or expanded job opportunities were consistently supported throughout the reimagining process. At the same time, the realities of staff capacity and city resources necessitate the prioritization of the reimagining work. This phased approach is consistent with the original intent of the July 2020 Item, Transform Community Safety, which envisioned implementing new programs, structures and initiatives over several budget cycles.⁸

This referral expresses that, by 2024, it is the City's goal to be prepared to make the following decisions and investments:

1. Expand Specialized Care Unit pending positive pilot results and;
 - a. Conduct an evaluation of the training curriculum and review best practices from other similar emerging models (see Training and Community Institute Task Force Recommendation for inspiration)
 - b. Expand the community responder model to tackle a larger range of low-level calls for service based on implementation plan developed by staff.
2. Revise the BPD Budget and Staffing Structure to reflect results of staffing and beat analysis, and the development of alternative responders
3. Invest in a new Department of Transportation and have clarity on a vision and legal path to civilianized traffic enforcement
4. Invest in a new umbrella city organization for public safety
5. Launch a Universal Basic Income Pilot
 - a. The Mayor as a member of Mayors for Guaranteed income will pursue state grants and philanthropic opportunities to initiate a pilot prior to this budget cycle
6. Continue expanding opportunities for alternatives to fines
7. Consider an Expanded Jobs Program
8. Evaluate BPD Training needs and make changes where needed

⁸ July 14, 2020, Transform Community Safety, https://www.cityofberkeley.info/Clerk/City_Council/2020/07_Jul/Documents/2020-07-14_Item_18d_Transform_Community_Safety_pdf.aspx

FINANCIAL IMPLICATIONS

Up to \$1,575,000 in community investments, \$1,200,000 in consulting costs and \$2,405,000 in staffing costs as identified in the tables in section 1.

REVIEW OF EXISTING PLANS, PROGRAMS, POLICIES AND LAWS

This effort is in support of the following strategic plan goals:

- Champion and demonstrate social and racial equity
- Create a resilient, safe, connected, and prepared City
- Create affordable housing and housing support services for our most vulnerable community members
- Provide an efficient and financially healthy City government
- Be a customer-focused organization that provides excellent, timely, easily-accessible service and information to the community

ENVIRONMENTAL SUSTAINABILITY

No identifiable environmental impacts

Attachments:

1. Summary of Recommendations
2. Consolidated Spreadsheet of Task Force, NICJR Recommendations
3. Albuquerque Community Safety Department Organizational Plan
4. Ithaca, New York plan for a Department of Community Safety

ATTACHMENT 1**Section A: Priority Reimagining Public Safety Initiatives**

- Staff costs
 - \$315,000 to support a staff position of Assistant City Manager to serve as the Reimagining Project Coordinator
 - \$315,000 to support a staff position of Assistant City Manager to lead the Office of Equity
 - Additionally, the development of the Office Equity and Diversity should consider the recommendations from the Reimagining Task Force. Particular attention from the Office of Equity should be paid to language access, which has been identified repeatedly as a barrier to trust and the provision of services delivered by the City across departments.
 - \$100,000 to support training in implementing fair and impartial policing recommendations
 - \$100,000 for Grant Writing Services recommended by the City Manager to apply for and seek grant funds to support reimagining efforts
 - Up to \$1.5 Million Launch a pilot Community Services Officer unit using Police salary savings.
 - Positions would be project based for two-years. Evaluate pilot after two-year period to align with the FY 25-26 Budget Process and determine the appropriate location of the CSO unit within a new Public Safety Department and the role for other non-sworn responders
 - \$175,000 for a Vision Zero Coordinator

- Consultant Costs:
 - \$300,000 to the Budget Process to fund the BerkDOT process that in addition to furthering the organizational development:
 - Develop a vision for unarmed traffic enforcement and a new paradigm for supporting traffic safety that aligns with vision-zero.
 - Evaluate paths to unarmed enforcement under both the scenario that state law changes to enable non-peace officer enforcement as well as the potential for a new designation of peace officers to enforce the California Vehicle Code.
 - \$70,000 for an analysis of BPD Staffing and beat structure. The scope of analysis should:
 - Build on the City Auditor's analysis and recommendations
 - Measure patrol workload – how much time patrol officers spend handling calls for service and how it might change with the implementation of the SCU and additional civilian responders to non-criminal calls.
 - Include availability analysis/measure capacity: Hours officers are on duty
 - Include proactive time analysis: Staff capacity to manage workload
 - Analyze alternative deployment configurations, including new shift schedules and allocations of personnel, as well as redesigning the patrol beat structure.

- Evaluate what police staffing would look like if all calls for service are rerouted from police except those involving crime and violence. Increase flexibility in deployment of beat officers to bike, pedestrian, or problem-oriented policing teams.
 - \$150,000 for City Attorney and City Manager to analyze the Berkeley Municipal Code to identify opportunities to civilianize enforcement.
 - Create a working group to further refine the call for service analysis and determine which calls could be appropriately handled by unsworn alternative responders built on the recommendations from the Reimagining Public Safety Task Force.
 - Identify aspects of the municipal code that require a police officer to enforce that could be safely handled by a civilian entity.
 - \$250,000 to support an organizational design process to create an umbrella Department of Community Safety as described in Section C.
 - \$200,000 for consulting costs requested by City Manager to support continued analysis of prioritized dispatch and development of an implementation plan
- Community Investments
 - Violence Prevention:
 - \$50,000 for McGee Avenue Baptist Church, Voices Against Violence
 - \$200,000 for Berkeley Ceasefire
 - \$160,000 for Berkeley Youth Alternatives: \$125,000 to support their counseling center and \$35,000 for the Summer Jam Day Camp
 - Alternatives to Sanctions/Fines
 - \$150,000 to expand hearing officer resources in the City Manager's Office to provide alternative referrals to community service and social services for parking and other infractions
 - \$50,000 to expand downtown streets team as placement for low-level violations (e.g. vehicular camping/parking and sidewalk ordinance infractions)
 - Community Mental Health, Behavioral and Crisis Response
 - \$100,000 for a Behavioral Health, Crisis Response, and Crisis-related Services Needs and Capacity Assessments
 - \$350,000 for Youth Peers Mental Health response as proposed by the Berkeley High School student-led plan for mental health services
 - Respite from Gender Violence
 - Up to \$500,000 to increase the capacity of community-based orgs. Provide services and housing leads for victims of Gender Violence (see Reimagining Task Force Report and page 223 of NICJR Final Report Packet for details)
 - Additionally, request staff to work with county partners to clarify which services should be provided by county vs the city.
 - Language Equity
 - \$15,000 to publish victim resources in plain language and in multiple languages. See Task Force gender violence report for details

Section B: Phase 1 of Reimagining Implementation (12 - 24 months)

- Adopt the report, “City of Berkeley Specialized Care Unit Crisis Response Recommendations by Resource Development Associates” and implement the pilot Specialized Care Unit (SCU)
- Continue development and implementation of prioritized dispatch, request staff return with a recommended plan.
- Develop an implementation plan to expand alternative response from civilian responders beyond the proposed pilot for SCU for other low-level calls that includes but is not limited to: Community Service Officers for only those calls that necessitate police, code enforcement, environmental health, fire inspectors or city-hired community mediators
- Transition collision analysis and crossing guards from BPD to Public Works until a Department of Transportation is developed.
- Continue consolidating transportation functions as recommended by staff
- Complete the implementation of Fair and Impartial Policing Recommendations
- Complete Auditor Recommendations on overtime and calls for service
- Fully implement the Ceasefire violence intervention program
- Collect data on service gaps in crisis stabilization and analyze creation of a new crisis stabilization center and/or expanded access to existing centers so that people in crisis have a safe and supportive alternative to jail or emergency rooms.
- Implement recommendations from the Reimagining Task Force relating to Gender Violence, LGBTQIA and PEERS as feasible. (Attachment 2)

Section C: Direct the City Manager to initiate a design process for an innovative and comprehensive public safety agency or Department of Community Safety within the City of Berkeley administration, as outlined in Attachment 1, Section C, and to return recommendations to the City Council by May 2024 to align with the FY 25-26 Biennial Budget process.

The design process should place a few key principles at the core of its exploration, while also seeking to answer several questions. As part of the design process, the City Manager is recommended to convene an external Steering Committee made up of representatives of affected labor groups, City Commissioners, and community stakeholders.

Key principles to guide the organizational design plan include:

- Police, Fire, and any additional civilian responders should report to a civilian Director or Deputy City Manager of Community Safety, who is responsible for implementing a holistic approach to public safety.
- Dispatch should serve all branches of responders equally and report directly to the Department Director or Deputy City Manager.
- The department should integrate new response models and community services including the SCU, additional community service responders as defined during the development of an implementation plan, and a Mobile Integrated Paramedic unit (MIP).

The organizational plan should explore and include the following considerations, among others:

- A name and structure that matches Berkeley’s vision for a community-centered and holistic approach to public safety and prioritizes civilian responders and community investments as key functions of community health and safety along with Police and Fire.
- The best organizational fit for a Specialized Care Unit and other civilian responders that will respond to non-violent calls for service:
 - Review and incorporate ideas from emerging models like Albuquerque, NM and Ithaca, NY
 - Explore whether Berkeley should develop a new division for community response similar to Albuquerque or Ithaca
- Assess the appropriate uniforms, technology and tools for any new division or classifications of civilian responders
- Define the appropriate connections and/or roles for the Mobile Crisis Team, a potential crisis stabilization center, and other services that currently operate under mental health but might frequently work in coordination with other community safety services.
- Consider the role and relationship of a Department of Transportation (BerkDOT) and potential civilian traffic enforcement in relation to a new Public Safety Department. Explore as part of the continued BerkDOT analysis/implementation the potential for unarmed traffic officers in the Police Department. If state law is not amended this may be a potential path for unarmed traffic enforcement.
- Define the appropriate connections and/or roles of the Homeless Response Team and community service providers including housing navigators, homeless outreach staff, and street medicine teams in responding to Police and 311 calls related to street homelessness.
- Analyze calls for service and determine which calls could be handled by Police and by civilian responders
- Evaluate how a new comprehensive dispatch system can better screen and route calls to a variety of public safety responders
- Determine how and under what circumstances a co-response is warranted to police calls for service and determine how civilian responders will communicate and coordinate with Police in responding to lower-level calls.

Section D: Except where resources may allow for expedited implementation, refer to the FY 2025-2026 Biennial Budget process the following proposals.

This referral expresses that, by 2024, it is the City’s goal to be prepared to make the following decisions and investments:

1. Create a permanent Specialized Care Unit pending positive pilot results and;
 - a. Conduct an evaluation of the training curriculum and review best practices from other similar emerging models (see Training and Community Institute Task Force Recommendation for inspiration)
 - b. Expand the community responder model to tackle a larger range of low-level calls for service based on implementation plan developed by staff.
2. Revise the BPD Budget and Staffing Structure to reflect results of staffing and beat analysis, and the development of alternative responders
3. Invest in a new Department of Transportation and have clarity on a vision and legal path to civilianized traffic enforcement
4. Invest in a new umbrella city organization for public safety
5. Launch a Universal Basic Income Pilot

- a. The Mayor as a member of Mayor's for Guaranteed income will pursue state grants and philanthropic opportunities to initiate a pilot prior to this budget cycle
6. Continue expanding opportunities for alternatives to fines
7. Consider an Expanded Jobs Program
8. Evaluate BPD Training needs and make changes where needed

NICJR Recommendation	NICJR Estimated Cost & Explanation	NICJR Identified Funding Source	NICJR Timeline	Vote by Task Force	Reason for vote	Proposed Narrative Summary for report
u						
1 Establish tiered dispatch/CERN model (p.14)	\$2,532,000, plus some costs associated with training for Dispatch	Current BPD Vacant Positions	Issue RFP 30 days after City Council approval, select vendors 90-120 days afterward, and begin pilot six months after City Council approval.	More analysis needed	<ol style="list-style-type: none"> Who determines, and at what point in time, which calls are handled by whom (e.g., by CERN, BPD, SCU)? What is the system (or multiple systems) for both receiving calls and routing the responses? How does one system (e.g., CERN) mix and match with other programs under discussion (e.g., SCU, BerkDOT)? Who will provide and staff these non-police responses (i.e., City staff or contractor, professional credentialed or community responders) and if contractors, under what color of authority will they provide City service? When will staffing, and at what staffing level, be available to change, if at all, the allocation of calls for service -- whatever the merits of replacing police, we cannot replace something with nothing? What system is in place should the nature of the call change (i.e., what is the back-up system in case seemingly benign calls turn violent and/or criminal)? Is BPD involved (e.g., as co-responder, as back-up, etc.) or are they required to be separate from these non-police responses? What liability issues do these new responses present to the City; (ix) what impact, if any, does reallocating some percentage of calls for service from police affect the minimum police patrol staffing necessary to perform their function of focusing on and responding to calls for service involving crimes and or violence? 	Overall, the Task Force supports the idea of a community-based response as an alternative to an armed response that would decrease the footprint of the police department. As presented, commissioners are concerned that the co-responder model proposal by NICJR would not decrease the footprint of the police and could have the consequence of having the community see CBOS as an extension of the police. In addition, commissioners need more clarity on how CERN would work with other new models like SCU, BerkDOT and dispatch.
2 Contracting with local CBOS for Tier 1 CERN response				More analysis needed	<ol style="list-style-type: none"> Which CBOS? (Where is the landscape analysis that was promised by NICJR?) Has the City dialogued with each CBO to confirm their interest in providing responders and their timeframe to make responders available, including hiring new staff? What will the pay structure to CBO responders be; does each CBO set their own rates, or will the City set rates? How will all responders be trained to achieve a systematic SCU non-police response for calls for service? 	The Task Force would need more analysis to understand the investment that it would take for the city to ask CBOS to take on this responsibility, including training, the infrastructure a CBO would need, and skills needed for the types of cases in the new model.
3 Evaluate CERN (p. 19-20)				(did not vote on this)		
4 Full implementation of Tiered Dispatch/CERN Pilot Program and reduction of BPD patrol division of 50%	\$7,596,000	Reduction of BPD Patrol Division by 50%	Two years after implementation of the pilot	More analysis needed		No analysis was provided by NICJR for how police department would be reduced by 50%, especially if NICJR recommends no officer layoffs, and reductions through attrition only. Is full implementation dependent on the department reducing by 50% and when would this occur?
5 Reduce BPD budget through attrition only and no layoffs (p. 20)				Reject		This recommendation is unresponsive to the goal of reducing the police department by up to 50% to make resources available for other programs.
6 End pretextual stops (p. 24)				Reject		The Task Force is fully in favor of the elimination of pretextual stops by BPD - this work is already well underway and thus does not constitute a useful recommendation. In 2020 the Mayor's Fair and Impartial Policing Working Group recommended that BPD focus on "the basis for traffic stops on safety and not just low-level offenses" and that they minimize or de-emphasize as a lowest priority stops for low-level offenses," and in February 2021, Council unanimously approved the Working Group's recommendations for adoption. Plans are currently underway for implementation, with quarterly updates being provided to the Police Accountability Board. (based on analysis from Liza Lutzker's report to RPSTF, linked to in the Improve & Reinvest Subcommittee's Feedback document posted January 6, 2022)
7 BerkDOT (p.25)				Accept with Conditions	<ol style="list-style-type: none"> This is in NICJR Report but is not mentioned in the Implementation Plan grid. This needs MUCH more analysis, much like Dispatch changes required by CERN implementation, which NICJR does not detail. 	While the Task Force is glad to see that NICJR sees the value in the creation of BerkDOT as a strategy to reduce the footprint of policing in Berkeley, the description provided for BerkDOT is inadequate with respect to the components of and motivation for BerkDOT (the NICJR report describes BerkDOT as a moving of traffic enforcement away from BPD). Because the BerkDOT creation process is moving forward separately, a complete description and analysis of BerkDOT are not necessary, but at a minimum, the NICJR recommendation ought to accurately describe what a proposed BerkDOT would consist of and provide the rationale for pursuing this approach beyond simply reducing the staffing and budget of BPD. Specifically, BerkDOT needs to be described as a consolidation of all transportation-related work being done by the City and would entail combining the current Public Works Department's above-ground street and sidewalk planning, maintenance, and engineering responsibilities with the current transportation-related BPD functions of parking enforcement, traffic law enforcement, school crossing guard management, and collision response, investigation, data collection, analysis, and reporting.
IMPROVE						
8 BPD Become A Highly Accountable Learning Organization (HALO) (p. 26)				Reject	<ol style="list-style-type: none"> Not credible that this change comes at "no additional cost" RPSTF focused on spending less on BPD, not more More training does not necessarily lead to changes in police culture This process is not about re-imagining police 	Overall, commissioners did not think there was enough information provided in the NICJR report that allowed an accurate assessment of the program and also disagreed with NICJR's indication that this recommendation would come at no cost. Some commissioners felt strongly that any programs that potentially increase funding to police should not be prioritized, and more training will likely not lead to changes in police culture or address the racial disparities that continue to persist in the city.

NICJR Recommendation	NICJR Estimated Cost & Explanation	NICJR Identified Funding Source	NICJR Timeline	Vote by Task Force	Reason for vote	Proposed Narrative Summary for report
9 BPD join ABLE program	Joining ABLE is free of cost	N/A	Within six months of approval from City Council	(Did not vote unless this is part of the HALO program)	1. HALO, EPIC and ABLE might be good programs, but what cost to join/enact? Recordkeeping alone would be a cost.	Same analysis as item 8
10 Expand EIS to assess all Use of Force	No additional costs	N/A	Within six months of approval from City Council	Reject	1. In general recommendations limited to police reform and requiring additional funding were not seen as ideas in the spirit of re-imagining public safety 2. Side question: Is Fair & Impartial's EIS measuring new best-practice gauge of proportionality? Not relying only on officer reporting & citizen complaints through PAB. Not being "de-fanged" by Union during implementation? See Univ of Chicago/Ron Huberman work: https://polsky.uchicago.edu/2021/06/08/benchmarking-police-performance-for-early-intervention-evidence-based-solutions/	The Task Force supports an EIS. However, this work is already well underway and thus does not constitute a useful recommendation. The EIS was recommended in 2020 by the Mayor's Fair and Impartial Policing Working Group and in February 2021, Council unanimously approved the Working Group's recommendations for adoption.
11 BPD Expand current Personnel and Training Bureau OR Create Quality Assurance and Training Bureau				Reject		Rejected, similar to the reason in item 8. The Task Force did not believe that additional investment in training would create the change needed to change police culture and the racial disparities that continue to persist in the city.
12 Transfer 5 officers and 2 civilian staff to new Quality Assurance and Training Bureau (p. 32)	No additional costs	N/A	Within six months of approval from City Council	Reject	Rejecting #12 above, so rejecting this related item, which is yet more additional training/QA cost.	
13 BPD provide semi-annual reports to public (p. 32)	internal re-organization can achieve this goal without additional costs	N/A	First Report should be issued by July 1, 2022	Accept with Conditions	1. Data should be available on a real-time basis, all the time. 2. Build a dashboard that is constantly updating.	Data should be provided to the community through a dashboard, in real-time. Reports can be helpful, and should be provided, in addition to real-time data.
14 Develop a Bay Area Progressive Police Academy (BAPPA) (p. 35)	An analysis of police academies throughout the Bay Area found that the cost per student range is roughly \$4,300 - \$4,600 per student, with a significant proportion of costs eligible for reimbursement through the Commission on Peace Officers Standards and Training (POST.) The development of the BAPPA would include certification through POST in order to satisfy State requirements. NICJR recommends that collaboration with Albany and potentially Oakland be explored.	Reduced BPD budget through eliminating patrol positions through attrition, revenue from partner law enforcement agencies	Launch two years after City Council approval	Reject	RPSTF is focused on reducing BPD spending, not increasing. 2. BAPPA is dependent on a great deal of inter-agency agreement, sharing and teamwork, which don't already exist. Would take many man-hours to get others on board, agree scope of work, convince all to start contributing. 3. Very high staff and overhead costs. 4. BPD regularly states they have top-notch training and sourcing for sworn and non-sworn personnel – it is not clear that a Berkeley-run academy would solve any hiring difficulties. 5. Instead of spending on this, RPSTF recommends spending on creating a Public Safety & Community Solutions Institute.	The Task Force recognizes that many cities are gearing up to provide a robust, expert non-police response to citizens in need, but that this type of workforce does not yet exist in a coordinated fashion. Berkeley can be in the vanguard of cities creating this workforce and expanding best-practice training beyond paid professionals and offering it to the general public, interested groups, students, and the like. The Public Safety & Community Solutions Institute can bring together crisis intervention and situation calming, triage, medical response, mental health response, peer counseling, city and county services offerings, case work, data capture, and follow up with compassionate, trauma-centered delivery. The Institute's trainings and coursework will be created by experts at Berkeley's SCU and the division of Mental Health, and tailored for other relevant audiences, e.g., BerkDOT. The Task Force feels this would be an exemplary area in which to spend time, money, and other resources to provide citizens with resources and support.
15 Increase diversity of BPD leadership (p. 36)				Accept with conditions	1. What is the plan for achieving diversity? 2. What are the numerical definitions of diversity?	The Task Force agreed that diversity in leadership alone would be insufficient to change an entire police culture. However, commissioners do acknowledge the importance of diversity and having responders who are from the city and the taskforce recommends making diversity a priority for all employees, including leadership.
16 Increase Standards for Field Training Officers (p. 36)				Needs more analysis	1. Need numbers about what % of officers have more than 2 complaints or 1 sustained complaint in a 12-month period? 2. How does race & gender data map with complaints data? 3. How do we assess whether implicit bias has played a role in complaint data figures?	
17 Revise BPD's Use of Force policies to limit any use of deadly force as a last resort to situations where a subject is clearly armed with a deadly weapon and is using a threatening to use the deadly weapon against another person	Training Costs	Savings from eliminating patrol positions through attrition	Within six months of approval from City Council	Reject	1. Use of Force policy was revised a year ago. Did NICJR read it and is this different than most recent version? 2. Use of Force policies are complex, making changes is a lengthy process. Shouldn't change what has been recently agreed upon without good reason.	This was rejected because this work has already been done and is covered by a different process and does not need to be duplicated in this process.

REINVEST

NICJR Recommendation	NICJR Estimated Cost & Explanation	NICJR Identified Funding Source	NICJR Timeline	Vote by Task Force	Reason for vote	Proposed Narrative Summary for report
18 Launch a guaranteed income pilot program (p. 37)	\$1,800,000	General Fund; federal funding already received or forthcoming from the Infrastructure Bill; or raised through philanthropy akin to the approach in other cities	Within six months of approval from Council	Accept with Conditions	<ol style="list-style-type: none"> 1. Strong support for the program 2. Addresses root causes 3. Strong preference for unconditional funds that puts trust in people to use the money as they see fit 4. Unclear who is responsible for administering pilot 5. Unclear how families will be selected 6. Informed by completed/ongoing pilots in Stockton, Fremont, Richmond, etc. 	Members strongly support this type of program and note that other communities have implemented these programs successfully. More information is needed to understand how families would be selected, and the city should consider whether other groups, like the AAPI or Indigenous community, should be included in this program.
19 Launch a community beautification employment program (p. 39)	\$1,250,000	5% of County Criminal Justice Realignment funds allocated to community services for Berkeley residents	Launch one year after approval from City Council	Accept with Conditions	<ol style="list-style-type: none"> 1. General support for employment programs 2. Current recommendation is specific to previously incarcerated folks, and funding source is based on that, and could be expanded to include other funding sources, and serve other communities e.g., youth, unhoused population 3. Remove the word beautification that is superficial 4. The program should be responsive to skills and talents of folks 5. Program could benefit from integrating professional development, pipeline to employment, especially folks who are generally left out of the workforce 6. Program should aim for goals and results that are transformative 	Members are very interested in increasing job skills and opportunities. However, programs should be centered around the interests of the target group. The Task Force therefore rejects the idea of simply a beautification program but fully supports programs that focus on professional development, and serve as a pipeline to employment, especially for those who face additional barriers like a criminal record. Any program should have the goal of being transformative.
20 Increase funding for CBOS in one of two ways: (1) increase grant amounts by 25%, or (2) create local government agency/ department (Department of Community Development) (p. 40)	\$25,605,492.50	Measure W funds, when the BPD's budget is gradually reduced; the infrastructure bill; and concerted efforts to increase philanthropic dollars	FY 22-23	Accept with conditions	<ol style="list-style-type: none"> 1. Unclear where the funding is coming from, some of it is coming from Measure W 2. Recommendation is too general, and funding of CBOS should be prioritized based on RPS goals and improving social determinants of health 3. Strong disagreement with approach that proposes across the board funding for CBOS 4. Preference for a recommendation that includes a new department could play a role in visioning and tracking of CBOS and funds, and oversee increased funding 	While members generally agree with increasing the capacity of community-based organizations as a way to improve public safety, funding should be targeted and focus on the goals set forth in the enabling legislation for reimagining public safety. Members also note that this recommendation does not explain where the additional funds would come from, as NICJR does not propose any layoffs to reduce the police budget. Members are very interested in creating a city division that could continue this work and focus on issues of equity.
21 Launch the Advance Peace Program	\$500,000	General Fund	Launch in first quarter of FY 2023, on going for at least 3 years	Recommendation was not in draft report, therefore task force did not vote	N/a	Appendix 6 provides a collection of resources on violence prevention programs. The task force informally voiced their support for these kinds of efforts repeatedly throughout their process.
Notes						
Grid is based on pages 39-40 of NICJR Final Report, titled Implementation Plan and the table on Pages 10-17 of the Task Force Final Report						
Recommendations highlighted in orange indicate items not listed on the grid in the NICJR Final Report						

Reimagining Public Safety Initiative Topic	Specific Task Force Recommendation	Task Force Rationale*	Budget Estimate	Request Additional staff analysis?
Traffic Law Enforcement & Traffic Safety	Review Transportation Laws, Fines and Fees to Promote Safety and Equity	Berkeley should conduct a full review of the Berkeley Municipal Code (BMC) and our structure of fines and fees as they relate to transportation. This review should specifically identify items that serve only to criminalize and penalize poverty or serve as pretext to target at-risk populations. Once reviewed, any identified items should be brought to City Council to either eliminate or revise. In cases when these BMC laws have State law equivalents, City Council should make clear that BPD should make enforcement of these State laws their lowest priority (i.e., decriminalize these behaviors).		Staff should identify the resources required to take this on. See additional comment regarding expanding the effort to look at civilianizing the resources
	Fully Fund the BerkDOT Planning Process	Given the size, scope, and ambition of the BerkDOT proposal, and given the fact that Berkeley is the first city in the nation to approach this topic, there is a substantial need to adequately fund the BerkDOT exploration and planning process. In comparison, the SCU planning process received \$185K, but SCU faces no legal challenges and has numerous models from around the country off which to build. To-date, the \$175K allocated to BerkDOT has funded some initial background research on free-standing departments of transportation and also a community engagement component around traffic safety and enforcement (a BerkDOT-specific citywide survey and listening sessions).	\$200,000	Staff confirm the budget required for the next phase.
	Move forward with the transfer of both collision analysis and school-crossing-guard management away from BPD and over to Public Works			
911 Call Processing & Alternative Calls-for-Service Systems	Adopt City Auditor's Recommendations for Call Processing and Dispatching of First Responders and Others Contained in Report, and Add 'Substance Use' to 911 Recommendations	These recommendations can provide 911 professionals with the basis for establishing systematic, consistent procedures and behavioral health call scripts that screen and divert mental health, substance use, and homelessness calls towards an alternative non-police response. In July 2022, 911 professionals will soon have the option to transfer mental health calls to a national hotline, so it is imperative to establish this process. These professionals can further avoid punitive measures resulting from policing, criminal legal, and incarcerations involvement whenever possible, particularly for diverse and marginalized groups of people who are extremely reluctant, avoid or do not use 911 for fear of a police response.		Request an update from BPD on the progress on implementing the Auditor's recommendations. Would like to better understand the steps required to add substance use to these recommendations
	Implement Specialized Care Unit (SCU): Alternative Non-Police Responder to Meet the Needs of People Experiencing Behavioral Health Challenges			
	Establish Crisis Stabilization Center to Meet the Needs of People Experiencing Behavioral Health Challenges and Further Implement A Comprehensive 24/7 Behavioral Health Crisis Response System	<i>From Page 65 of task force report...</i> "Crisis Stabilization Centers can serve as an alternative to using emergency departments and moreover, criminal legal and incarceration systems as a crisis response to individuals experiencing a behavioral health and/or substance use crisis in the community. They can receive referrals, walk-ins and first responder drop-offs. (SAMHSA, 2020; 22). SAMHSA has further defined minimum expectations to operate crisis receiving and stabilization services, including accepting all referrals, not requiring medical clearance, designing services for both mental health and substance use issues, being staffed (24/7/365) with multidisciplinary team capable of meeting the needs of individuals experiencing all levels of crisis (SAMHSA, 2020; 22).		Yes, Staff should review this recommendation and provide their input as to the best approach to establishing crisis stabilization center(s) in Berkeley, as well as realistic timeframe for doing so.
	Implement A Behavioral Health General Order for the Berkeley Police Department That Emphasizes Diversion Away from Policing Whenever Possible	"...an overarching, comprehensive Berkeley Police Department Behavioral Health General Order would potentially provide for streamlining the current orders and diverting as many people as possible away from policing and towards well-being services in the community." Full rationale on pages 67-68 of Task Force report		See comment. Staff should provide feedback on this approach and a timeline that this could be implemented
Gender-Violence Non-Police Response recommendations	Increase the capacity of community based-organizations. Fund 3-4 organizations to provide services and resources mentioned on page 223 of NICJR Final Report Packet	Providers report that existing resources are insufficient to meet the needs of Berkeley community members, especially for those who require more care and resources including people who are unhoused and people with complex mental health issues. A person seeking to leave an abusive relationship will likely need a range of services, including advocacy/case management; legal services for child custody, restraining order or other family law issue; and other support services like housing and childcare. To provide effective intervention in domestic violence cases, the City should fund long-term solutions. Solutions should include legal services, intensive case management to individuals with high needs, advocacy services in languages other than English, restorative justice programs, healing practices, and job training.	\$500,000	Staff should connect with authors to understand their recommendation and build on their outreach to inform funding. Additionally, staff should work with county partners to clarify which services should be provided by county vs the city.

Reimagining Public Safety Initiative Topic	Specific Task Force Recommendation	Task Force Rationale*	Budget Estimate	Request Additional staff analysis?
	Training and technical assistance for faith-based leaders	Many people turn to faith-based leaders for help. These leaders, like others, need training to understand the complexities of domestic violence, identify effective tools to create safe spaces for those seeking help, learn about existing domestic violence resources to refer people to, and help change cultural norms that perpetuate domestic violence. In California, domestic violence agencies have partnered with faith-based leaders to address domestic violence in their communities. Examples include A Safe Place[1] in Oakland, and Korean Family Services in Los Angeles[2]. The latter has trained over 1700 faith leaders in the last 10 years.	\$50,000	Staff should connect with authors to understand their recommendation and build on their outreach to inform funding.
	Provide services for people who cause harm	While survivor-centered services are essential, services for the person causing harm are also crucial to stopping gender-based violence. The City should invest in programs that target people who cause harm, including men and boys, to provide services and prevention efforts.	\$150,000	
	Prevention education for K-12 to provide, and coordinate prevention work	Breaking the cycle of violence requires changing cultural norms and practices that perpetuate violence and gender inequities. In addition to the recommendations related to intervention listed above, this subcommittee recommends additional funding for education for K-12 and to create peer-based models, when appropriate. Providers report that more education is needed to teach on toxic masculinity, consent, healthy relationships, and sex education, including sexual pleasure.	\$125,000	
Gender-Violence Poiiice Response recommendations	City Leadership to Host Regular Meetings and Coordinate Services	Having the City serve as lead will institutionalize these much-needed partnerships. These meetings would be especially important if a tiered response system is adopted by the City, as victims and survivors of crime will be captured in all tiers (e.g. domestic violence may be reported by a caller as a noise disturbance). During the first listening session, many of the providers noted that the listening session was the first time that they had been asked for their feedback. Establishing a forum would forge new and ongoing partnerships between the City and providers. For survivors of intimate partner violence, a coordinated community response serves as a protective factor against future violence.[1] Outreach should be done to ensure that BIPOC leaders are at the table.	In-kind from the City	Staff input on the resources required to lead these convenings
	Coordinate with Court and Other Law Enforcement to Implement New Firearm and Ammunition Surrender Laws	Local courts are required to notify law enforcement when the court has found that a person is in possession of a firearm or ammunition, in violation of a domestic violence restraining order. Law enforcement must take all necessary actions to obtain the identified firearms or ammunition	In-kind from the City	Request staff coordinate with the District Attorney as well as the courts
	Annually Update the Police Department's Domestic Violence Policies and Victim Resource Materials	California law frequently changes in the area of domestic violence. For example, during the 2021-2022 state legislative cycle, at least five bills passed that change the law for domestic violence restraining orders, including SB 320 noted above. Updating these procedures regularly and in coordination with providers, will ensure that policies reflect current laws and address community-based concerns.	in-kind from the City	
	Implement Regular Domestic Violence and Trauma-Informed Training for Officers, Dispatch, and Responders to 911 and Non-Emergency Calls	Providers report that victims and survivors seeking help from police often feel unheard and further traumatized by the experience with police. Examples include allowing other family members to speak or translate for the victim, when family members may be related to the abuser. This recommendation is consistent with NICJR's recommendation that the department increase its use of local community members to provide training.	\$5,000 for contracted speakers, in-kind from BPD	Staff input on budget and impacts to staffing
	Publish Victim Resources in Plain Language and Multiple Languages	Provides more access to people who have limited English proficiency, do not speak English, or have low literacy.	\$15,000 (one time investment with some funding needed to update resources)	
	Screen for Domestic Violence in All 911 and Non-Emergency Calls	This would lead to better data on the number of domestic violence cases the police and others respond to in the city. Noting the penal code or city ordinance section alone would not capture all domestic violence cases.	in-kind from all responding agencies	Staff input required to understand what screening protocols already exist and whether this would be a matter of training or program and curriculum development
	Assign A Female Officer to Interview, Examine, or Take Pictures of Alleged Victims at Victim's Request	This policy would acknowledge that some victims and survivors will feel uncomfortable with having a male officer examine or question them. This could result in the victim giving an incomplete statement (e.g. not disclosing sexual abuse or showing an injury) and further traumatize the victim.	In-kind from police department	How many female officers exist on the force? What policies or changes in staffing structure would be required to ensure a female officer is always available? Could this be handled by non-sworn personnel in a co-response model?
	Police Response to DV Calls Should be Accompanied by or Coordinated with DV Advocate	This practice is especially important in cases where there is a high risk of lethality, language or cultural barriers that could lead to miscommunication or further traumatization, and high needs cases where victim or family members require a number of services to achieve stability. Having a victim advocate present will help ensure that victims are heard and not further traumatized. Providers report that advocates sometimes must act as a safe middle person between the victim and police, to ensure that the victim is not mistreated or further traumatized by the interaction with police. This feedback is consistent with information gathered from the community engagement process where black residents spoke of the need for a safety ambassador to act as a bridge between the community and police (see page 40 of Summary of Findings report from Bright Research Group).	\$125,000 (two advocates at .5FTE)	Could this be accomplished by establishing an on-call contract with DV Advocates? Are there other places where this is done? What is staff's budget estimate for this? How can this be folded into a community responder CERN-type model?

Reimagining Public Safety Initiative Topic	Specific Task Force Recommendation	Task Force Rationale*	Budget Estimate	Request Additional staff analysis?
Disability & People with Behavioral Health Challenges (PEERS)	Include PEERS in Developing Behavioral Health Responses	PEERS indicated that the first and most important recommendation is outreach and inclusion of PEERS who have worked on behavioral health reforms since the 1990s, when this movement began. There are trained Peers who are invaluable to developing responses to behavioral health crises and supporting the transition to new systems of safety in Berkeley. PEERS are crucial for unpacking the scope and nature of behavioral health crises to provide a nuanced understanding, approach, and framework for responding with appropriate levels of care to people with behavioral health challenges in the community--particularly for a non-police crisis response like a Specialized Care Unit (SCU).		
	Sufficiently Fund Behavioral Health Respite Centers	Drop-in and wellness centers for people living with behavioral health challenges need sufficient funding and staff with full-time Peer Support Specialists where individuals experiencing non-threatening altered states and/or behavioral health crises can move through their crisis in a safe and supported state. It is further essential to have availability 24/7 and on holidays, and to involve PEERS in the transit from the behavioral health crisis to the Peer staffed drop-in/wellness center. Peer Navigators are also key to assisting people in navigating complex systems, including how to get appropriate services in the City of Berkeley and Alameda County.		Need to understand what sufficient funding entails to develop a clear budget request and explore outside funding to support this
	Have a Reconciliation Process with People with Behavioral Health Challenges and Police	There is a need for a reconciliation process with police, particularly as a response to traumatic experiences with police. A reconciliation process, as well as a restorative justice process, with people living with behavioral health challenges may help build trust and rapport with police officers in the future.		
	Clarify the Risk Assessment by Call Takers, Dispatchers, and Police for Behavioral Health	There is a need for clarification about how Public Dispatch Operators and the police use their discretion to make decisions about "public safety threats." It is not clear if the current protocol is designed to not only determine if someone is a "danger to themselves or others," or "gravely disabled" to meet the standard for a 5150 involuntary hold, and/or if the assessment offers a more nuanced evaluation for persons who do not meet this standard, particularly to assist with next steps in care if needed.		This feels directly tied to the SCU process, consider as part of implementation of SCU
	Improve De-Escalation Training for Police & Offer Public Education on Behavioral Health	There is a need for additional de-escalation training for law enforcement and public education about connecting with community members who interact with the world differently than they do—including using peers as part of training.		
	Account for Overlapping Systems of Care for People Living with Behavioral Health Challenges	There is a need to account for overlapping systems of care, including medical, behavioral health (mental health, substance use), social services, and other systems. Participants in the Peers Listening Session, who identify with homelessness, discussed how current systems are not set up in a way that enables long-term sustainable wellness of the behavioral health community.		Discuss with staff what this might entail.
	Further Research Recommendations (in report)			
LGBTQIA+ and Queer/Trans People	Develop Collaboration between LGBTQ+ Liaison for Berkeley Police Department and the Pacific Center for Human Growth	Currently, the LGBTQ+ liaison for the Berkeley Police Department has reviewed the LGBTQIA+ Listening Session Report and is working on a collaboration with the staff for the Pacific Center for Human Growth in order to address challenges in the community.		Confirm with staff what is already underway.
	Establish Partnership between the Division of Mental Health and the Pacific Center for Human Growth	There is a need for an established partnership between the Division of Mental Health for the City of Berkeley and the Pacific Center for Human Growth in order to ensure training and service delivery to LGBTQIA+ clients that are culturally safe and responsive. There is a need for collaboration among service providers to become more well-integrated with coordinated services tailored to meet client needs, including ones that are culturally safe and responsive.		Confirm with staff what is already underway.
	Increase Capacity for Behavioral Health Workers to Serve LGBTQIA+ Clients	There is a considerable need for behavioral health workers, such as clinicians, case managers, peer specialists, and peer navigators, who can directly guide LGBTQIA+ clients in navigating multiple systems—particularly given the shortage of case management services available from community-based organizations in Berkeley.		Confirm with staff what is already underway. Where could additional capacity be developed?
Addressing Underlying Causes of Inequity, Violence, and Crime	Develop a Training and Community Solutions Institute	This proposal from the RPSTF intends to build on the SCU/MACRO training foundations (once finalized – currently under development) and offer training appropriate for members of the general public, law enforcement, BerkDOT personnel, peers, students and those who need or want to respond constructively based on best practices. This proposal is suggested in place of the Progressive Police Academy in the NICJR final report. Training topics are listed in appendix 5 of the task force report on page 126.		Analyze at a future stage once SCU/MACRO is more developed.

Reimagining Public Safety Initiative Topic	Specific Task Force Recommendation	Task Force Rationale*	Budget Estimate	Request Additional staff analysis?
	Develop Community Violence Prevention Programs	Should the City of Berkeley decide to adopt or pilot a new Community Violence Prevention Program, we recommend it take the following steps to ensure its success: 1. Create opportunities for community members, leaders, youth and organizations to tap into this work with equitable compensation 2. Hiring of Credible & Trusted Responders 3. Transparency and Accountability 4. Allow Pilot Violence Prevention Programs to Grow		
	Support City Efforts to Establish the Office of Equity and Diversity 1. Develop the office in partnership with CBOs with listening sessions to inform office's direction/priorities 2. Integrate community oversight and community support body that works closely with the office in establishing community connections, evaluating the office's approach, and ensures ongoing success	The Re-Imagining Public Safety Task Force supports the City of Berkeley's efforts to establish an Office of Equity & Diversity. For too long, City Departments have had to independently monitor impact, disparities, and ongoing relationships with the community that have produced varying results. These inconsistencies can lead to severe impacts in services rendered, supports given to, and needs met of communities of color and additional diversity and marginalized groups. An adverse effect, especially in regard to language access, is that many Black, Immigrant, Latinx, and other voices of color will not view City Departments as a venue to air their concerns, lift up their needs, and much worse, as the valuable resource it aspires to be. This adverse impact is also true for additional diverse and vulnerable groups, including based on gender identity and expression, sexual orientation, physical and behavioral disabilities, and other diverse and marginalized groups. This proposed Office provides an opportunity to help centralize and embed equity and justice practices and frameworks into our City's infrastructure. The impacts of which would far extend beyond addressing disparities, forming partnerships with community organizations and leaders, among others. But perhaps the biggest impact will be seen as communities begin to trust and see City Departments as a resource for them – a Department that is accountable to them.		Support staff in generating a community advisory component to the development of the Office of Equity and Diversity
	Implement a Pilot Guaranteed Income Project	Ultimately, UBIs are not one-size-fits all. The City should review data available from similar programs in order to determine the size and scope of its program, e.g., target recipients, selection criteria and process, appropriate cash transfer size, project duration, and data tracking/ evaluation protocols.		
	Support the Police Accountability Board and Fair & Impartial Policing	We recommend that Council request PAB advice before making a policy decision to proceed toward surveillance technology acquisitions; mandate the BPD to collaborate with PAB on development of all significant General Orders or other policies; and support moves by the PAB to make it easier for people from historically marginalized communities to raise and pursue officer misconduct complaints.		
Addressing Community-Based Organizations' Capacity for Efficient Partnership in Reimagining Public Safety	Conduct Needs Assessment on CBO Capacity			
	Create Coordination and Communication Opportunities for CBO Staff	Specifically, provide opportunities and forums for CBO executive level staff to work more closely with each other. Coordination and common purpose help increase better use of resources. This will create opportunities to align outreach criteria, coordinate efforts, and centralize information obtained from the field.		
	Improve Referral Systems	The City and CBOS' should improve the system of referrals after intake and assessment with the intent to shepherd a consumer through the system and proactively assist in gathering all required documentation. This would lessen the load placed on the person seeking services and person of navigating through a complex and documentation-driven system while trying to survive one day at a time.		
	Remove City Funding System Inefficiencies and Duplication	Specific actions the City can take to decrease bureaucracy and increase efficiency include: a. More flexibility with funding contracts (e.g., higher threshold for requiring a contract amendment, providing administrative overhead that meets actual costs). b. Quarterly instead of monthly reporting. c. Increase baseline CBO salaries to improve their recruitment and retention.		

Reimagining Public Safety Initiative Topic	Specific Task Force Recommendation	Task Force Rationale*	Budget Estimate	Request Additional staff analysis?
	Develop Additional Metrics for Community-Based Organizations	The measure of success cannot be based just on the attainment of housing or jobs – multiple factors contribute to community stability and public safety, including social relationships, connection to resources, service participation/engagement, health/behavioral, health status, mindset, behaviors, and more. Additional metrics need to be developed that better evaluate the wellbeing of individuals, families, neighborhoods, and communities.		
	Help CBOS Enhance Their Funding	<ol style="list-style-type: none"> 1. Establish a small team led by the mayor, a council member, City Manager, service provider, homeless consumer, commission member, major donor, and community member to meet with all major foundations, corporations and other entities with significant resources. 2. Create an annual citywide fundraising campaign that would benefit all CBOS. 3. . Train staff. Areas identified by the CBOS include trauma informed care, motivational interviewing, cultural competence, and developing tools and skills so that our population is served with respect and staff have extensive knowledge about the availability of existing appropriate resources. Funding should be dedicated for training and require specific coursework around the aforementioned areas identified. 4. Gather feedback from Consumers 		
Notes	*Rationale was not consistently provided throughout the Task Force report. The language in the column reflects the Mayor's Office best effort to pull a descriptive paragraph for each recommendation from the report.			
	Sections highlighted in yellow did not make it into final task force report despite clear task force intention to include due to confusion in reconciling all documents and recommendations.			
	Sections highlighted in blue indicate the recommendation is a reiteration of a similar or existing recommendation that has already been made to City Council by staff, another comission or parallel process

ACKNOWLEDGEMENTS

This report is made possible by the countless contributions from a growing ACS staff, colleagues from across the City of Albuquerque, community members, community-based organizations, partners, and others. This is the first iteration of what will undoubtedly be an evolving journey for this new department, one we are grateful to travel alongside fellow first responders and the community we serve.

Letter from Mayor Tim Keller

On September 1, 2021, the Albuquerque Community Safety (ACS) department began serving our community and making a transformative impact.

A day with ACS first responders can look like many things: safely de-escalating a behavioral health crisis, helping a family and a landlord navigate a housing dispute to avoid eviction, getting treatment to an individual wrestling with substance abuse, connecting an unhoused community member living in an arroyo with the shelter and resources they need, checking on an abandoned vehicle, or talking someone in distress down from self-harm or suicide.

With each call trained behavioral health and community responders take, we are strengthening our entire public safety system. We are relieving pressure on police and fire, allowing officers to focus on addressing violent crime calls, and freeing up our EMTs to quickly respond to urgent, life-threatening situations. With ACS as a third branch of 911, we are now better equipped than ever to provide the right response to those in need.

The origin of this department, the nation's first cabinet-level department of its kind, extends back to when our administration first walked into office. It starts with programs we began piloting in 2018 to send Albuquerque Fire Rescue responders to a segment of non-violent calls that police had been handling, and with our work to decriminalize symptoms of poverty, addiction, and behavioral health issues. But above all, we gained the political will to launch ACS because of the movement for racial justice that surged following the murder of George Floyd. That powerful call to do things differently changed everything. ACS is a new approach to how we respond to distress in communities and get folks the services that are needed in that moment and for the long term. It's a trauma-informed public health response built in partnership with our community. Through a real reimagining of public safety and a reckoning with legacies of trauma and institutionalized racism, we can begin making the history that will bring our communities closer together.

I am encouraged by the progress that ACS is making as I work with our inaugural Director Mariela Ruiz-Angel, Deputy Directors D'Albert Hall and Jasmine Desiderio, and with the new class of first responders. We are moving forward with humility, understanding that we are building this approach from the ground up. We look forward to ACS's evolution as we launch this effort to send the right response at the right time in our community.

Mayor Tim Keller

Letter from the Director

The City of Albuquerque's Community Safety Department (ACS) is proud to provide our first organizational plan as the City's next step toward reimagining public safety. We are a new component of the City's public safety response. When 911 dispatchers answer calls involving mental health, addiction, or other public health issues, they will send our mental health professionals along with or instead of paramedics, firefighters, and police officers. ACS will also respond to calls like reports of abandoned vehicles that do not require a police officer, firefighter or paramedic.

ACS is the first municipal agency in New Mexico created as a peer with the municipal police and fire departments. ACS first responders have the training and resources to step in when someone is experiencing a mental health, addiction or housing crisis to get the person connected with the right resources. Our work will alleviate pressure on police and fire units and maximize resources dedicated to public safety.

This plan reflects more than a year of research, discussion and planning with a wide range of experts and community members to understand the needs and gaps in public safety. A cornerstone of our effort to design ACS has been engaging with the community, including meetings with residents from Albuquerque neighborhoods hit hardest by violence and economic disparity and a communitywide survey.

We know the work has just begun. As our teams hit the streets, we are driven by a shared vision with our fellow first responders of a public safety system that ensures a purposeful, humane, and appropriate response. We also know there is so much more for us to learn. We are working hard to define our impact in, with, and for the community. Expect to hear more about that work over the next year. We are grateful for ongoing community engagement as we improve our approach with every call, every response, and every conversation.

We are grateful to the thousands of people who have already contributed their time, insights, and feedback you will see reflected in the pages to come. We invite you to explore this report and engage with us as we continue to work toward a safer Albuquerque for everyone.

Mariela Ruiz-Angel
September 2021

OUR ROLE

Why does Albuquerque need ACS?

Albuquerque faces serious public safety issues in addition to crime that include homelessness, mental health, and drug addiction challenges.

According to the federal Substance Abuse and Mental Health Services Administration (SAMHSA), nearly one in five people 12 years of age or older in the Albuquerque metro area report using any illicit drug in the past year, outpacing both state and national averages.¹ SAMHSA also reports that more than one in five adults aged 18 or older in Bernalillo County reported any mental illness in the past year based on annual survey averages from 2016–2018, and nearly 15 percent reported receiving mental health services in the past year.² The 2021 Point in Time Count showed that the number of people experiencing homelessness in Albuquerque has been steadily increasing since 2013, with 1,567 counted in this year's report.³ Many unsheltered individuals are adults with a serious mental illness and/or substance use disorder.

Albuquerque Police Department (APD) officers and Albuquerque Fire Rescue (AFR) responders interact frequently with people experiencing these issues. Though not accounting for all mental health calls, APD officers recorded 8,510 encounters with an individual experiencing a behavioral health crisis in 2019 and 7,860 in 2020. Statewide, the New Mexico Sentencing Commission reports that one in five contacts in 2020 with law enforcement were with a homeless individual.⁴ Moreover, in fiscal year 2020 (FY2020), AFR and Metro Security responded to 9,514 "down and out" calls in which a person was unresponsive on the ground or seemingly intoxicated. Beyond mental health, in FY2021, there were 1,326 311 calls for needle pickups and 13,075 311 and 911 calls for abandoned vehicles, neither of which need police or fire response.

This demonstrates a need for trained and licensed professionals with experience or education in addressing these issues to take on these calls. An internal review found that of the nearly 200,000 annual APD calls for service involving these issues, nearly one in five may be appropriately handled through an alternative response. Redirecting these calls will reduce call volume for police and fire responders, allow police officers to spend more time tackling violent crime, free up fire units to immediately address life-threatening situations, and ensure a first responder can spend the necessary time to address the issue.

How was ACS created?

Mayor Tim Keller’s administration convened a public safety group three years ago to discuss and research a myriad of issues, from interrupting cycles of violence through diversion programs to decriminalizing our response to mental health, homelessness, and addiction.

The group includes police, fire, social service departments, code enforcement, transit, solid waste, the Office of Civil Rights, and the Office of Equity and Inclusion. From the group’s work, the City has implemented pilots and programs, including the Safe Handling and Routing of Paraphernalia (SHARP) program that cleans up improperly disposed of needles and syringes around the City, and the dispatching of Metro Security officers to respond to “down and out” calls.

Building from that work and learning from early successes, Mayor Keller announced in summer 2020 plans to create ACS to serve as an additional branch of the City of Albuquerque’s public safety system alongside police and fire. ACS will offer the appropriate response to calls involving non-violent, non-medical mental behavioral health, substance use, homelessness issues, and other responses that do not require a paramedic or police officer. In the year between the announcement and ACS’s launch, the City developed a plan for launching this third branch of the public safety system by researching relevant models and running a community engagement campaign.

With the onset of COVID-19 in 2020, the City replaced in-person engagement with virtual meetings to educate, inform, and gather input on our strategic planning. The City hosted seven virtual sessions of 45 participants representing more than 25 key community stakeholder groups. The City also involved the Mental Health Response Advisory Committee (MHRAC) and presented policies and training plans to MHRAC, which has been working with APD for many years. The City also conducted a community survey and received 2,858 responses. Community feedback reflected overwhelming support for an ACS-style model. Community experts provided crucial input on the look and feel of ACS as well as specific policy and training recommendations. Community members were excited to be included in the solution. One said:

Community feedback reflected overwhelming support for an ACS-style model.

“As a community mental health provider, I look forward to seeing how this department shapes up and am hopeful that the City collaborates and integrates behavioral health care providers into the system at large.”

Following these sessions, the City has been in continual discussion with community leaders and experts as well as participated in national-level forums, sprints, and working groups involving municipalities engaging in similar work. You can read more about the community engagement process and the feedback the City collected in the [ACS Community Engagement Report](#) available on our website.

Where does ACS fit in the public safety system?

The Keller Administration made ACS a cabinet-level department, allowing it to operate independently from and in collaboration with APD and AFR.

What makes ACS different is our use of a public health model with a non-law enforcement-led response. ACS allows 911 dispatch to send trained professionals with backgrounds in behavioral and mental health and social services to non-violent and non-medical calls. The goal is to deliver the right response at the right time and to improve access to the broad range of social services from government and community-based organizations.

Albuquerque’s First Responder System

Law enforcement and violent/life-threatening situations

Non-violent, non-medical mental behavioral health, substance use, and homelessness issues, and other responses that do not require a paramedic or police officer

Fire and emergency medical needs

ACS responders will use motivational interviewing, crisis intervention, de-escalation, cultural healing, and other proven strategies to address needs. ACS will also address calls that do not require a behavioral health background, such as needle pickup and abandoned vehicles. ACS responders do not make arrests or issue citations, instead connecting individuals and families to services and resources in the community.

OUR DEPARTMENT

Through community feedback, partner input, and expert voices, ACS crafted an organizational design and culture focused on delivering the right response at the right time.

What is the ACS vision for Albuquerque and the department's mission to get there?

Mission: To make Albuquerque safer by providing a holistic, empathetic, and informed response to behavioral, mental health-related and other 911 calls that do not require a police officer, firefighter or paramedic, such as homelessness, minor injury and non-injury calls for service. Responses are personalized to the needs of the individual, family, and community so that ACS can bring the right response at the right time.

Vision: A safe and inclusive city in which any person can call for help and get a purposeful, humane, and appropriate response.

Creating a “new normal” for our community’s public safety response system.

What are ACS's values as a department?

Introducing our WE CARE model:

Our values guide the decisions we make as individuals and as a team. The inspiration for this value system came from two places. First, we asked the community during our engagement campaign what values our responders and our department should embody. Second, we reflected as a team on what core concepts should anchor us. From this, the WE CARE model was born. The fingerprints of these values will be found everywhere, from the goals we set for ourselves to the training we provide our staff to the interactions we have with the community.

W

Well-being and safety

Take every measure possible to ensure the safety and well-being of all residents of our city.

E

Empathy

Take the time to listen to others and recognize their unique experience.

C

Community at the center

Put community and partners at the center of all we do.

A

Accountability

Have the courage to learn from mistakes.

R

Respect and dignity

Meet people where they are, and treat them how they want to be treated

E

Equity

Lift the voices of all people in our community

How does ACS put community at the center of decision-making?

ACS began as a community-led initiative, and we are dedicated to keeping community voices at the forefront of our decision-making processes. Early on, we formed an ACS Planning Committee comprised of community leaders and experts to guide us through critical decisions, provide insight on challenges we face, and help us grow as we examine our progress. With ACS's launch, the ACS Planning Committee will expand to include additional members and transition into an ACS Steering Committee to provide long-term guidance. The table lists the members of our original committee.

We are also developing an ongoing community engagement process and feedback system in order to keep community members informed, solicit ongoing feedback and questions, and provide answers and updates. ACS is launching in uncharted territory, and we will be looking to the community to tell us what is working and where we need to improve.

What is our FY2022 Budget?

FY2022 GENERAL FUND BUDGET:
\$7,730,00 FOR 61 POSITIONS

This is a \$4.4 million increase from FY2021 that includes \$3.2 million for 43 additional full-time equivalent positions consisting of behavioral health responders, community response team members, and administrative staff, as well as \$1.2 million for operational expenses. Other increases include an additional \$250,000 for contractual services, and \$40,000 for outreach communication. As a start-up department, a larger proportion of budget was needed for equipment than usual. As the department scales up in FY2023, we expect this to remain the case, with the share of budget going to personnel and operations normalizing in FY2024.

The following is a comparison of the FY2021 and FY2022 budgets:

FY/22 ALBUQUERQUE COMMUNITY SAFETY DEPARTMENT	
Wages: Funding for 61 Positions (43 New Positions added in FY/22)	5,128,973.00
Utilities: Telephone	17,985.00
Operating: Contractual, Outside Vehicle Maintenance, Training, Equipment, and Supplies	2,020,642.00
Capital: Vehicles and other Capital Items	570,000.00
Maintenance: City Provided Vehicle Maintenance	4,400.00
Grand Total	7,742,000.00
FY/21 ALBUQUERQUE COMMUNITY SAFETY DEPARTMENT	
Wages: Funding for 18 Positions	1,201,206.00
Utilities: Telephone	4,400.00
Operating: Contractual, Vehicle Maintenance, Training, Equipment, and Supplies	1,265,394.00
Grand Total	2,471,000.00

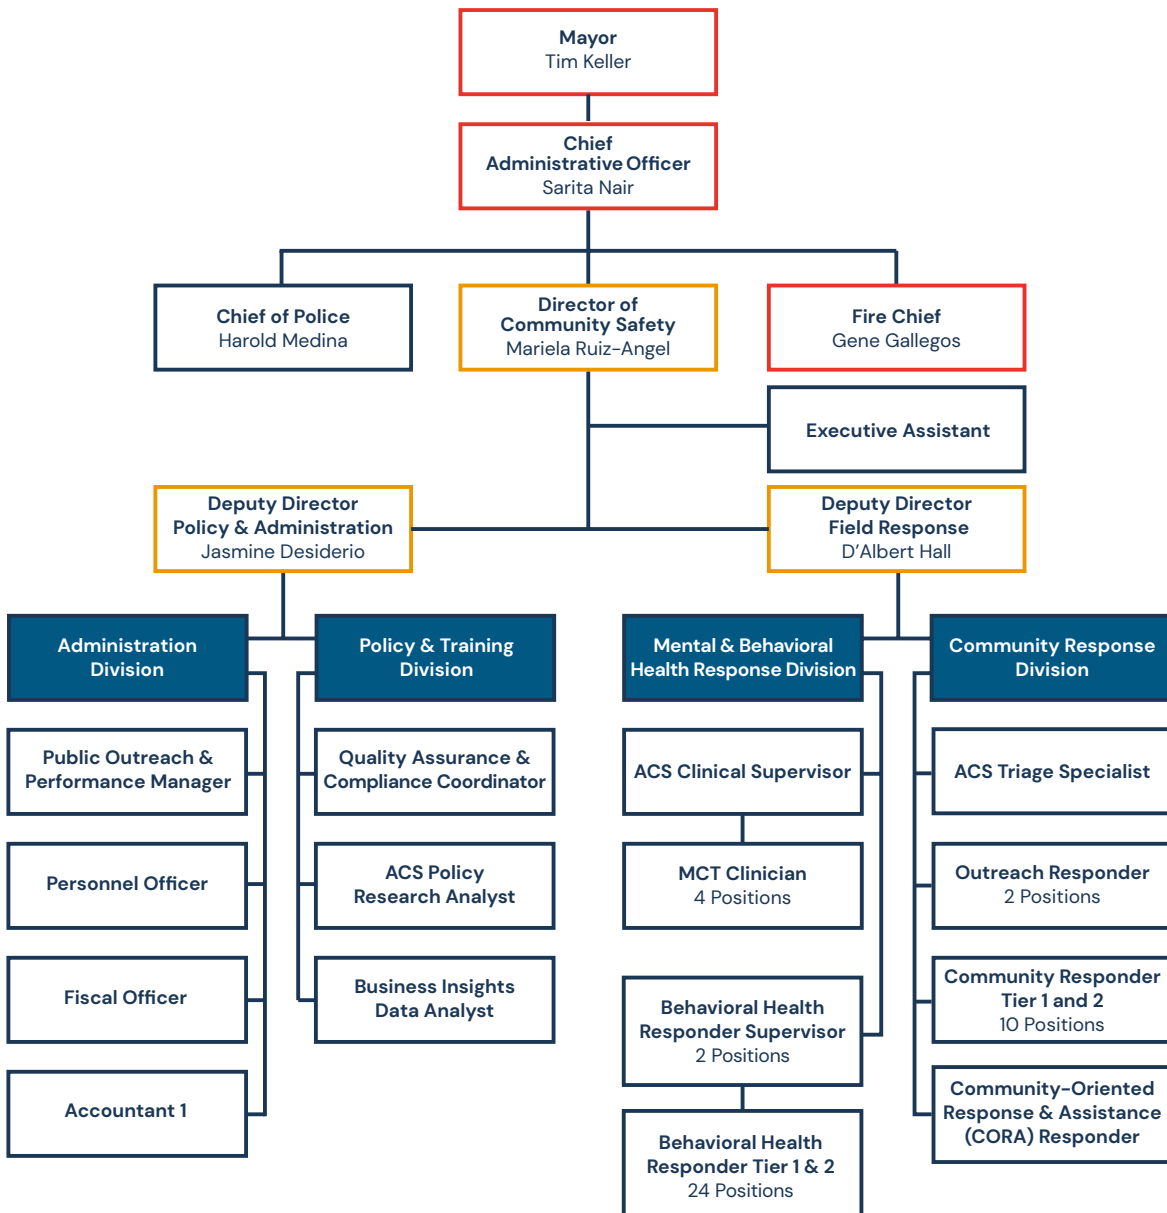

What is ACS's Organizational Structure?

The following organizational chart reflects our focus on field response with robust policy and administrative services to support our first responders. ACS reports directly to the City's Chief Administrative Officer.

ALBUQUERQUE COMMUNITY SAFETY | FY2022 ORGANIZATIONAL CHART

OUR RESPONSE

Who Are Our Responders?

Behavioral Health Response Division

Improving behavioral health outcomes for Albuquerque residents experiencing mental health issues is central to improving community safety. ACS's behavioral health response is designed to meet the needs of people across a spectrum of mental health needs, from crisis intervention to less urgent calls for support from people who need help accessing services. Having our responders in the field will further the City's effort to decriminalize mental health issues and ensure all calls for service can be addressed properly and quickly.

ACS's behavioral health response is designed to meet the needs of people across a spectrum of mental health needs.

Mobile Crisis Team (MCT) Clinicians

What they do: An MCT Clinician is an independently licensed mental health professional who works in a team with a uniformed law enforcement officer. MCTs co-respond to high-acuity mental and behavioral health emergencies. MCT clinicians provide professional behavioral health services to, de-escalate crises involving, and link individuals who are experiencing mental health emergencies to appropriate services in the community.

Why we created them: MCTs have been in the field since February 2018. Historically, MCT clinicians were employees of an agency that contracted with APD and the Bernalillo County Sheriff's Office (BCSO). APD and BCSO each had four teams. Between February 2018 and March 2020, MCTs were dispatched to almost 5,000 calls. Many of the people assisted had diagnosed mental health issues, including 13% with diagnosed schizophrenia spectrum disorder and 38% having

multiple diagnoses. Properly addressing these crises also takes time; an average MCT call lasts 75 minutes. MCTs are able to take the time and provide the necessary expertise to ensure the best possible outcome for these calls. To make this effort permanent, ACS hired the four clinicians working with APD as City employees. By bringing these clinicians in-house, ACS has created a more robust community of practice and tightened lines of communication and data sharing.

Profile: John

John was born and raised in Albuquerque and has a Master of Science in Mental Health Counseling. He is a Licensed Professional Clinical Counselor (LPCC) in the state of New Mexico and has counseling experience ranging from school-based therapy for children to substance abuse counseling and group therapy. John has also conducted suicide assessments for Albuquerque Public Schools and is a member of the New Mexico Counseling and Therapy Practice Board.

Behavioral Health Responders (BHRs)

What they do: BHRs respond in person, generally in pairs, or by phone to requests for assistance with individuals experiencing issues with mental and behavioral health, inebriation, homelessness, addiction, chronic mental illness as well as other issues that do not require police, fire or EMS response. These responders have education and experience in fields that include social work, counseling, social services, health, and peer support, often having extensive familiarity with the resources and services available in our community. They focus on addressing any immediate crisis then connecting individuals to the services they need.

Why we created them: APD officers frequently respond to calls involving mental and behavioral health, inebriation, homelessness, addiction, and chronic mental illness. In 2020 alone, there were 190,000 calls under these categories. Officers also recorded 3,661 transports to Presbyterian Kaseman Hospital or UNM Hospital for mental health services and 2,306 documented instances of individuals diagnosed

with schizophrenia or bipolar disorder. There is a clear need for first responders with the training and experience to take many of these calls off the shoulders of police officers. Of the roughly 16,000 calls per month in these categories, around 3,000 would be appropriate for BHR response. BHRs will respond to calls that often wait hours for officers so people can get the help they need, freeing up officers to focus on crime and violent or life-threatening situations.

Profile: Jenny

Jenny grew up in Zuni Pueblo and holds a Bachelor of Science in Healthcare Administration. She worked for five years as a Certified Nursing Assistant before spending over 10 years in healthcare administration, primarily at Presbyterian Hospital. Jenny comes to ACS from Ambercare Hospice where she was the We Honor Veterans Coordinator.

Community Response Division

ACS is a community-centered agency dedicated to improving the health and well-being of our fellow Albuquerque residents. Our community response focuses on homelessness, minor injury and non-injury calls for service, and community healing. We will also address needle pickup requests and abandoned vehicles as part of a comprehensive response to community health.

Street Outreach and Resource Responders

What they do: This team will provide street outreach in coordination with other City departments and community-based organizations to individuals experiencing homelessness in encampments; conduct in-person assessments; and assist with screening, organizing and prioritizing reports regarding homeless encampments. This team will focus on connecting individuals to long-term services.

Why we created them: The City's Family and Community Services (FCS) Department has employed an encampments team since March

2019 to provide street outreach and enforce City code regarding encampments. In FY2021 alone, there were more than 2,400 requests for assistance related to homelessness and encampments that were addressed by this team. By focusing on connecting to services, ACS's street outreach team will increase the City's capacity to respond to these situations and help people get the services they need before enforcement action is needed.

Profile: Deidre

Deidre has a Bachelor of Arts in Native American studies and worked for six years as a Keresan language curriculum developer for the Santa Ana Pueblo. She has dedicated her life to being a liaison and advocate for Native Americans in our community, including doing case management for Native American constituents under the City's Office of Equity & Inclusion.

Community Responders

What they do: Community responders will respond to minor injuries or incapacitation, abandoned vehicles, non-injury accidents, needle pickups, or other calls for service in the community.

Why we created them: The City has previously piloted ways to divert calls from police and fire and free up resources. One of those programs was the Wellness Check Program. Since December 2018, AFR has dispatched City Metro Security Division officers to wellness check or "down and out" calls that would normally go to AFR. These calls often involve a person who is laying on the ground in public view. These calls usually do not warrant the standard AFR response of a four-person engine and an ambulance, and having someone else triage the situation first is a more productive approach. Metro Security has responded to 3,648 calls since December 2018, saving the city approximately \$284,000. Expanding upon this success, ACS Community Responders will serve a similar function and respond to lower-priority calls, including wellness checks that do not indicate a potential for violence.

Community-Oriented Response Assistance (CORA) Responders

What they do: The CORA team is a multidisciplinary group of first responders and mental health professionals who organize outreach to communities affected by tragedy and violence in Albuquerque. ACS's CORA Responder coordinates the outreach effort, reaching out to community leaders and organizing meetings or finding alternative methods of connection. They provide education on grief and trauma, guide individuals through what they can expect while processing the event, and connect people to mental health providers and other resources.

Why we created them: Albuquerque communities have long been dealing with traumatic events, such as homicides, suicides, child deaths, and other incidents of violence. From January 2019 to July 2020 alone, there were nearly 1,300 suicides and suicide attempts in Albuquerque. The City recognized that responding to these events shouldn't just stop at the immediate crisis. These communities often need support and help figuring out how to heal and move forward. Modeling after similar efforts elsewhere in the country, the City's police, fire, and family and community services departments started organizing CORA responses in March 2019. By creating an ACS CORA Responder, we aim to centralize these organization efforts and further bolster the continuum of service we provide community members experiencing a broad range of mental and behavioral health issues.

Profile: Lynae

Lynae was born and raised in Albuquerque. She has over 10 years of experience in violence prevention and youth development and mentoring. Lynae comes to ACS from Youth Development, Inc., where she was the Violence Prevention Coordinator.

How Are We Training Our Responders?

In addition to the education and credentials ACS responders bring to the department, ACS will provide comprehensive training through partners to support responders in the field. The following are training areas and examples for each.

¹ More detailed information about the training curriculum is available on our [website](#)

How is ACS dispatched?

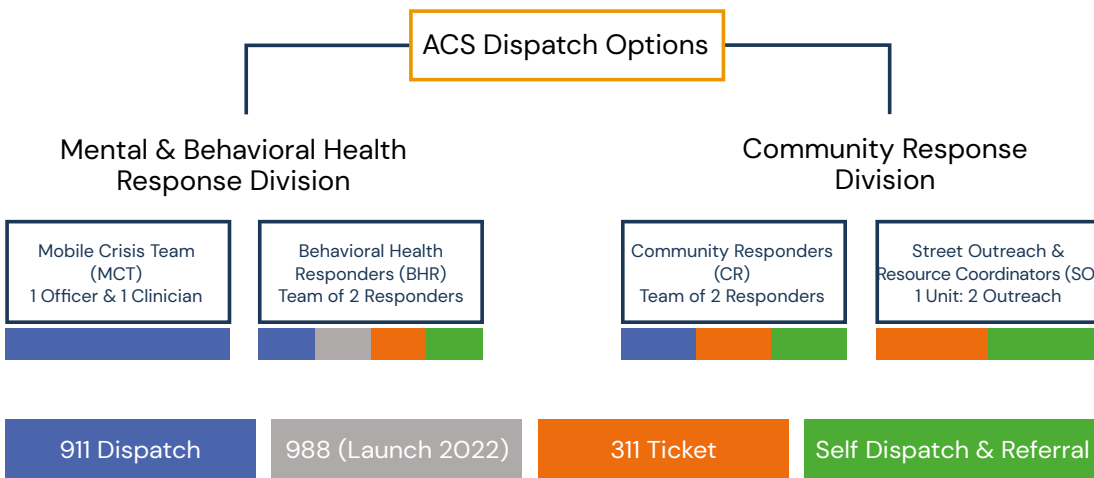

When calls are made, 911 operators gather critical information while keeping callers calm and safe. These operators determine if the call requires a police, fire, or community safety response and relay it to the corresponding dispatch system. ACS units will be dispatched via AFR's dispatch system

YOU CAN GET AN ACS RESPONSE

Monday through Sunday from 7 a.m. – 10 p.m. Call **911** for **non-violent, non-medical emergencies** or **311** for **non-emergencies**.

While responding to 911 calls is our primary focus, ACS responders will be dispatched through additional methods, including referrals, self-dispatch, and 311 tickets. ACS will also respond to calls from 988, the national behavioral health crisis hotline, when it launches in 2022. The figure below illustrates dispatch methods for each type of responder unit.

As of September 2021, ACS units are in the field and responding to 911 calls. As we continue to hire more responders, our aim to reach 24-hour/ seven-days-a-week coverage by early 2022.

What calls will ACS respond to?

911 operators prioritize calls for service on a 1–5 scale (A through E for AFR), 1 (or E for AFR) being the highest priority based on severity of a crime or level of acuity (intensity or urgency) of the emergency. APD, AFR, and ACS collaborated to determine the call types most appropriate for ACS responders. ACS will respond to lower-acuity calls within those call types. Calls that are routed to ACS responders will be assigned an ACS call type and an ACS priority level (1–3). For example, ACS might respond to a call that would be a Priority 3 for APD, but that call might be a Priority 1 for ACS.

The table below outlines the call types ACS will respond to, the associated APD or AFR code, how ACS will re-prioritize them, and provides a description.

ACS CALL DEFINITIONS

Call Description	Existing APD/AFR Call Type	Assigned ACS Call Type	Priority
BHR: Behavioral Health Responders			
Suicide	APD: 10–43–1	CSSUIC	1
Behavioral health issue	APD: 10–40	CSBH	1
Disturbance	APD: 10–39	CSD	1
Suspicious/intoxicated subject	APD: 10–31D/31S/31	CSSP	2
Wellness check	AFR: 32B	CSWELF	2
Panhandler	AFR: 10–39–5	CSPH	3
Welfare check	AFR: 10–10–0	CSWC	3
Message for delivery	AFR: 10–51	CSMD	3
CR: Community Responders (Dispatched by AFR Alarm Room; Triaged by 311)			
Wellness check	AFR: 32B	CSWELF	1
Abandoned vehicle	APD: 24	CSAV	2
Abandoned vehicle	311 Ticket	CSAV	3
Needles	311 Ticket	CSPU	3
SO: Street Outreach and Resource Coordinators (Triaged by FCS and 311; Not Dispatched by AFR Alarm Room)			
Unsheltered individual	311 Ticket	CSUI	1
Needles	311 Ticket	CSPU	1
Mobile Crisis Team (MCT): ACS call types do not apply to MCT clinicians. This team will respond to all high-acuity behavioral health related calls with a sworn officer. These units are dispatch by APD only.			
Community-Oriented Response and Assistance (CORA): ACS call types do not apply to CORA. These ACS responders will organize outreach to communicate affected by tragedy and violence in Albuquerque.			

How are we keeping our responders safe?

Our Responders' safety is our top priority, and we have taken several steps to engrain safety into our everyday practices.

ACS Responders are trained by APD and AFR on scene safety.

The right calls: The call types ACS Responders take were carefully selected to consider not only which situations called for their expertise but whether it was safe enough to respond without police presence. 911 operators are trained to properly screen calls for ACS, APD, and AFR. Our Responders are only dispatched if the call indicates no immediate threat or danger. Alternatively, APD officers have the ability to request ACS after they have secured the scene.

Safety in numbers: ACS Responders do not go to calls alone. Our Responders generally take calls in pairs, and our MCT clinicians who respond to potentially dangerous situations co-respond with uniformed Crisis Intervention Unit police officers.

Policy and training: Responders receive extensive de-escalation training, and, if an individual shows any sign of aggression or resistance, Responders are instructed to leave the scene. [ACS policies and procedures](#) lay out how Responders should react if they ever encounter potentially violent situations as well as how to prevent those situations. ACS Responders are also trained by APD and AFR on scene safety and how to identify other indicators that police backup is warranted.

Constant communication: ACS Responders have multiple means of communication available depending on the need. Primarily, they are tapped into the same radio dispatch system as other first responders and are able to request backup at any time. Their radios have an [emergency button](#) that will automatically request a rapid police response if they are unable to talk. Second, the dispatch system allows dispatchers and ACS administrative staff to see the location each unit is responding to and their status on that call. Third, each Responder is assigned a cell phone and is encouraged to call their supervisor for any assistance or guidance on a call. Fourth, Responders have a weekly debrief session where they address any challenges or concerns that may require an improvement to standard practices.

How will ACS collect data and track impact?

ACS is focused on developing a robust and respectful data-collection system. Information recorded for each call and each interaction will not only help ACS monitor progress against goals and outcomes, but it will also help us understand how we can have a positive impact in the community. ACS recognizes that the needs of those we serve are often complex, and we intend to document our work as much as possible.

ACS will follow an informed consent approach for data collection so anyone served by ACS understands what information is being collected, why it is being collected and where the information will go. The data will help highlight root causes of public safety issues and gaps in ACS services, enabling ACS to become a catalyst for larger change in the public safety and public health systems.

We heard from community that individuals' personal information collected by ACS should not be accessible to law enforcement. As such, while ACS will utilize APD's records management system for data security and call outcome tracking, ACS will have its own separate forms that restrict access to only ACS staff.

ACS is focused on developing a robust and respectful data-collection system.

OUR GOALS

ACS has a clear and critical focus as the newest branch of the City's 911 response – to respond, build, engage, and influence.

Our goal is to move with intention and urgency in service of a shared vision among all first responders to create a safe and inclusive city by providing a purposeful, humane, and appropriate response. As we launch our field work, we will be flexible and agile, making changes to this plan as needed with input from the community.

"I became a Behavioral Health Responder to help people who are often overlooked or forgotten, who don't have anyone they can count on or talk to for support; to guide someone through what may be the toughest day of their life. I want to bridge the gaps within a broken system; to support the community in whatever way possible."

Walter, Behavioral Health Responder

GOAL AREA 1: RESPOND

Goal statement: Increase public safety by providing a holistic and trauma-informed response to calls for service.

Objectives:

1. Employ a diverse, experienced, and community-centered cohort of responders.
2. Implement a robust person- and community-centered training plan that provides staff with essential skills, best practices, and resources with which to serve the public.
3. Respond effectively to all ACS calls for service.
4. Increase linkages to appropriate stabilization and recovery services as part of providing holistic responses to calls for service.

Strategies:

1. Collaborate with the community to create a diverse and equitable staff recruitment campaign.
2. Design a hiring process that removes barriers to entry and values lived experience.
3. Identify evidence-based and strengths-based training that is relevant to the needs of Albuquerque's diverse populations and specific challenges.
4. Integrate ACS into the 911 dispatch system.
5. Respond to calls for service that historically do not need a police or fire response.
6. Develop comprehensive standard operating procedures that ensure the safety of Responders and meets the needs of individuals served.
7. Build relationships and connections with community providers and organizations to create a streamlined referral process.

Key performance indicators:

1. ACS staff reflects the diversity of Albuquerque's citizens, including in language, culture, race/ethnicity, and lived experiences.
2. Efficacy related to service response metrics, including but not limited to:
 - a. Monthly call volume
 - b. Response time
 - c. Percentage of calls involving co-response
 - d. Number of needs addressed by category (e.g., unmet basic needs, mental health, drug or alcohol use)
 - e. Response outcomes
 - f. Percentage of calls involving a person experiencing homelessness
 - g. Number of referrals by category
 - h. Number of transports
 - i. Number of training certifications and continuing education units (CEU)
 - j. Number of trainings offered by community partners
 - k. Number of repeat calls for same individual or location

GOAL AREA 2: BUILD

Goal statement: Establish a sustainable and long-term presence that is woven into the community and the public safety ecosystem.

Objectives:

1. Increase accessibility between ACS and community members.
2. Create a performance-focused culture that develops the abilities and potential of employees.
3. Improve productivity with cross-functional teams, including other first responders, City departments, and external partners.
4. Employ a robust training operation that allows ACS to provide training to other departments and external partners.

Strategies:

1. Build a dedicated ACS headquarters in the heart of the International District, located at Kathryn and San Mateo.
2. Provide staff with opportunities for professional and educational development.
3. Contract and partner with organizations to help provide inter-connected services and training.
4. Streamline training process by insourcing training and using a train-the-trainer process.
5. Create a dedicated training center for ACS curricula.

Key performance indicators:

1. Positive engagement results from regularly administered community surveys (e.g., pulse surveys) indicating a strong degree of community awareness, understanding, and accessibility to ACS services.
2. Number of employees that utilize continuing education, tuition reimbursement, certification programs paid for by ACS.
3. Number of cross-departmental referrals.
4. Number of coordinated responses, events, and outreach with internal and external partners.
5. Number of internal and external users of trainings.

GOAL AREA 3: ENGAGE

Goal statement: Activate community partnerships and strengthen community engagement by enhancing relationships, trust, information sharing, and capacity building between the community and ACS.

Objectives:

1. Design effective programs that stimulate ongoing community interest and involvement in the work of the Department.
2. Establish authentic processes for continuous community feedback about ACS strategies, programs, and achievements.
3. Create opportunities for Albuquerque providers and organizations to expand services inside and outside of City government that support ACS responses.
4. Be a hub for thought partnering and collaboration on how to most effectively respond to calls for service across agencies, sectors, and communities.

Strategies:

1. Implement an educational campaign that promotes ACS as it pertains to public safety and public health.
2. Host interactive events and programs on community issues related to ACS's core mission for families and the community.
3. Expand ACS Key Communications list, email, and other modalities for sharing information with community stakeholders.
4. Develop a community-oriented website or portal for sharing information, soliciting feedback, and providing relevant resources.
5. Expand the current ACS Planning Committee to include additional community members and stakeholders.
6. Partner with the County and community on local, state, and federal grants.
7. Develop a micro grant program for relevant service providers and organizations that support ACS responses.

Key performance indicators:

1. The number of community forums and touchpoints provided by ACS (in person and online).
2. The number of the community members who join, visit, and return to ACS community forums (in person and online).
3. Development of the "first-generation" (version 1.0) dashboard of key community safety processes and outcome indicators, created with input from community stakeholders and relevant subject-matter experts.
4. Amount of funding to the community for relevant public health and safety missions.
5. Number of grants awarded within or on behalf of the community.
6. Amount of grants awarded within or on behalf of the community.
7. Number of contracts to relevant service providers and community agencies.
8. Number of services provided by ACS made possible through contracts and relationships with partnering providers and community agencies.

GOAL AREA 4: INFLUENCE

Goal statement: Leverage ACS's position and knowledge to influence and inform the ongoing evolution of the larger (e.g., county, state, national) system of care and emergency response.

Objectives:

1. Be a catalyst and collaborator in changing and strengthening the role of first response in public health and criminal justice system.
2. Establish a career pathway for community safety responders.
3. Create a long-term plan for a City behavioral and mental health academy.
4. Promote non-law enforcement mobile crisis response as part of the public safety system.
5. Create a plan for sustainable funding.

Strategies:

1. Design community safety positions that are supported with professional development and career advancement as a model for a strong, sustainable workforce.
2. Connect with universities and colleges to develop an educational path that qualifies students for community safety positions.
3. Partner with cities across the state on the implementation of "988," the national crisis line.
4. Utilize community voices to impact public health and criminal justice policies related to emergency response.
5. Support other local governments and entities that are interested in non-law enforcement mobile crisis response programs.
6. Conduct a staffing analysis to support additional City funding appropriation.
7. Leverage behavioral health funding to include Medicaid and the Behavioral Health Initiative.

Key performance indicators:

1. Percentage of ACS staff positions that are classified with defined career progression.
2. Number of knowledge products produced (e.g., evaluation reports, knowledge papers, media coverage and stories) stemming from ACS's work.
3. Number of knowledge-sharing and policy-oriented presentations or forums contributed to by ACS.
4. Diversified funding received from public, private, and philanthropic sources as appropriate to support the ACS model and related initiatives and agencies across the state and the country.

Land Acknowledgement

The Reimagining Public Safety Working Group acknowledges that Ithaca and Tompkins County are located on the traditional homeland of the Gayogohó:nq' (Cayuga Nation). The Gayogohó:nq' are members of the Haudenosaunee Confederacy of sovereign Nations that currently reside on this land. The Gayogohó:nq' predate the formation of the City of Ithaca, Tompkins County, New York State, and the United States of America. The Working Group acknowledges the painful history of Gayogohó:nq', recognizes the dispossession of Gayogohó:nq' land, and honors the continued local presence of Gayogohó:nq' people and culture.

TO THE MEMBERS OF COMMON COUNCIL,

February 23, 2022

On behalf of the City of Ithaca's Reimagining Public Safety Working Group, it is our honor, as the group's co-leads, to submit to Common Council the following suggestions for the implementation of the city's new public safety agency.

In April of 2021, Common Council unanimously approved the creation of a new public safety agency. This new agency would center the experiences of the city's marginalized and vulnerable populations; focus police resources on crime solving and prevention; and add a new unit of non-law enforcement first responders to address public safety issues better served through non-criminal justice interventions.

In June 2021, at the behest of Common Council, then-Mayor Svante Myrick created the Reimagining Public Safety Working Group, whose members represent the community, law enforcement, business, Common Council members, and students. As the selected co-leads of the Working Group, we had the privilege of shepherding the group to its suggestions for how the new public safety agency could be implemented. Four Subcommittees, which included additional community members, were also created to independently build implementation plans for specific areas of the new public safety agency's work.

Throughout the process, we were clear-eyed about both the importance and difficulty of our task. For too long, marginalized and vulnerable communities in the City of Ithaca have lived without the true sense of peace and safety we are all promised. Those same communities, along with allies from every facet of our community, have been asking and working for change to the city's overreliance on police to resolve non-criminal or non-violent public safety concerns. These asks and this work came many years before George Floyd's May 25, 2020 murder, the national event which sparked communities across the country to re-examine their approach to policing and public safety.

While we understood the need and mandate for change, we also understood the challenges of reimagining a new way of approaching public safety. What made Common Council's groundbreaking resolution exciting also made it daunting—very few communities have attempted what the City of Ithaca is undertaking with its new public safety agency. Even if the entire Working Group was in total agreement on all key facets of the new agency, the audacity of our task makes it a hard endeavor.

And to be frank, while the plan below has a majority of Working Group and Subcommittee support, the suggestions were not unanimous decisions. We had some very difficult conversations as a Working Group: some thought our pace too fast, others too slow; some hoped for more change, others wished for much of the current public safety structure to stay intact; some felt heard, others felt misunderstood. Through any disagreement or difficulty, our ethos remained the same: we would treat all Working Group members with respect and dignity; we would honor the lived experiences of all participants; and we would make informed decisions democratically and transparently.

The result of this work is the below plan for a new city agency for public safety. We believe this plan fulfills our Working Group responsibilities as elucidated in Common Council's resolution and then-Mayor Myrick's charge to the group. We know this is just one step in the reimagining public safety process, with other recommendations to follow suit in the coming months and years.

Everything about the plan—the suggested new public safety agency's name; the role of the agency leader;

' We care deeply about the City of Ithaca. We believe in all of its people. We put forward this plan with the conviction that, if approved, it will provide a more expansive, inclusive and effective public safety reality for every one of us.'

the structure of its police and non-police functions; the resources to support training, equipment, technology, and research—is designed to stand-up an agency that will expand and enhance our city's public safety approach, and keep as its beating heart the best interests of those who call upon it in times of need.

We care deeply about the City of Ithaca. We believe in all of its people. We put forward this plan with the conviction that, if approved, it will provide a more expansive, inclusive and effective public safety reality for every one of us.

Sincerely,

Eric Rosario & Karen Yearwood

In June 2021, a Reimagining Public Safety Working Group was formed (“the Working Group”) to “facilitate the replacement of the City of Ithaca Police Department with a Department of Public Safety,” in accordance with the first recommendation of the Reimagining Public Safety Plan.

1000

Subscribers

As of February 2022 an email list the City of Ithaca and Tompkins County created to keep the community apprised on the process had just under 1,000 subscribers.

50+

Meetings

The Working Group met 16 times to advance an implementation plan for the new public safety agency. There were 4 subcommittee meetings, each Subcommittee met at least 9 times each.

35+

Members & Advisors

Former Mayor Myrick named the Working Group leaders from various stakeholder groups in Ithaca, including community members. The Working Group and Subcommittees have over 35 members and advisors.

EXECUTIVE SUMMARY & SUGGESTIONS

This report details the implementation plan for the City of Ithaca’s new public safety agency. In accordance with Common Council’s April 2021 resolution, this implementation plan represents the city’s next step towards reimagining public safety.

This new agency would contain law enforcement officers as well as non-law enforcement first responders. Born out of a desire to center the city’s marginalized and vulnerable populations, the vision for the new agency is to direct police resources to the activities that require and merit law enforcement intervention, and to use the new unit of civilian first responders to address public safety issues that would be better served by a different expertise and approach. In so doing, the agency will provide a better public safety reality for all.

The suggestions contained within this report were determined by majority vote or consensus within the Working Group, and by consensus within the four specific Subcommittees. The Working Group and the Subcommittees were made up of leaders from the community, law enforcement, health and human services, business, and education. The Working Group and the Subcommittees considered several inputs in crafting these suggestions, including: their own lived experience and expertise; perspectives gathered from the community (especially from Black, Brown, and other vulnerable community members); research evaluating evidence-based practices in other jurisdictions; and analysis of City of Ithaca data. In discussing and debating these suggestions, the Working Group and the Subcommittees sought a process that was inclusive of all stakeholders, that centered the experiences of Black and Brown and other vulnerable communities in Ithaca, and that reflected the best available evidence on innovative approaches to reimagining public safety.

The suggestions of the Working Group and the Subcommittees to the Common Council are summarized as follows, and are detailed in the body of this report:

- **Naming a new umbrella city agency for public safety:**
 - The new city agency for public safety should be named the Department of Community Safety.
- **Leadership of the new Department of Community Safety:**
 - The title of the leader of the Department of Community Safety should be “Commissioner of Community Safety”.
 - The Commissioner of Community Safety position should be filled by a civilian leader, who brings a background in racial justice, social work, public health, public or business administration, and demonstrates in-depth knowledge of the intersections of race, public health, and public safety.
- **Names and leadership structures of the two Department of Community Safety units:**
 - The two units of first responders within the Department of Community Safety should be titled the Division of Police (staffed by police officers) and the Division of Community Solutions (staffed by civilian first responders).

- The Commissioner of Community Safety should oversee both divisions.
 - Reporting to the Commissioner of Community Safety, the head of the Division of Police should be called the Director of Police (who may also be referred to as the Police Chief, where necessitated by state law). Initially, this division will consist of all existing staff of the current Ithaca Police Department (IPD).
 - Reporting to the Commissioner of Community Safety, the head of the Division of Community Solutions should be called the Director of Community Solutions. This division should consist of unarmed civilian first responders.
- **Key responsibilities of the two Department of Community Safety units:**
 - The Division of Police should retain key law enforcement responsibilities, in particular those calls that represent a serious threat to public safety and/or that state law requires be conducted by a police officer.
 - The Division of Community Solutions should respond to quality of life and other incidents (including those involving referrals to mental health or other social service providers), and may also include law enforcement duties that can be carried out by non-police (i.e. the administration of certain kinds of fines and penalties).
- **Call delineation:**
 - The Working Group voted to delineate the following call types between “armed” and “unarmed” responses, but recognizes that these decisions will need to be refined and adjusted under the leadership of the Commissioner for Community Safety, and based on factors including staff capacity, departmental policies, and further analysis of call types:
 - The new Division of Police should respond to the following calls for service (in alphabetical order):
 - Assault; Bomb Threat; Burglary; Criminal Mischief; Dead Body; House Alarm Triggers Police; Intoxication; Robbery; Shots Fired; Stabbing; Warrant; Weapons; 911 Call Hangup.
 - The following call types should be handled by unarmed responders, from the Division of Community Solutions and other departments (in alphabetical order):
 - Animal Bites; Animal Problem; Bad Check; Child Abuse; Civil Complaint; Escort; Fire Outside; Fireworks; Fraud; Hazmat; Information; Local Law; Noise Complaint; Parking Problem; Personal Injury Collision; Property Check; Property Complaint; Repossessed Vehicle; Service Call; Special Detail; Theft of Mail/Packages; Traffic Collision; Unclassified; Vehicle Fire; Welfare Check.
 - The following call types were categorized as “it depends.” These call types should be further analyzed to determine if they need to be broken down into smaller categories (new call types) in order to effectively delineate a response, if they need an in-person response at all, or if they merit a co-response between armed and unarmed responders (in alphabetical order):
 - Assisting Another Government Resource; Disorderly Conduct; Dispute; Domestic; Drugs; Harassment; Missing Person; Overdose; Psychiatric; Sex Offense; Suspicious; Traffic Complaint; Traffic Offense; Transport; Trespassing; Unsecured Premise; 911 Call with No One Talking.
 - A joint response between the Division of Police and the Division of Community Solutions

Born out of a desire to center the city’s marginalized and vulnerable populations, the vision for the new agency is to direct police resources to the activities that require and merit law enforcement intervention, and to use the new unit of civilian first responders to address public safety issues that would be better served by a different expertise and approach.

should be considered in cases which merit it (for example, trespassing incidents where there is a potential threat to public safety). A co-response model will be determined under the leadership of the new Commissioner of Community Safety.

- **Staffing level, beat design, and shift assignments for the Department of Community Safety divisions:**

- For the new Division of Community Solutions:
 - The City of Ithaca should initially hire five unarmed responders for the Division of Community Solutions under the Department of Community Safety, with the Commissioner of Community Safety to determine additional staffing needs.
 - Unarmed responders should have the title of “Community Responders,” and be responsible for addressing calls that do not require law enforcement expertise. These unarmed responders should bring skills in community engagement, de-escalation, crisis intervention, and referral to mental health and social service providers.
 - The Division of Community Solutions may be assigned beat assignments, but only as

appropriate to increase community engagement, and to be concentrated within beats in which their services are most needed.

- For the Division of Police:
 - The Division of Police should restructure its beat design with the priorities of creating an even distribution of 911 calls between beats and incorporating walking beats, while maintaining neighborhood integrity.
 - By the next collective bargaining process, the City of Ithaca and its Police Department/ Division of Police should adopt the Pitman shift assignment configuration¹ in order to meet community needs, and maximize officer sustainability, efficiency, and equity.
- For both divisions:
 - The Division of Community Solutions and the Division of Police should work in tandem to improve intra-departmental efficiency and communications.
 - Responders from both the Division of Community Solutions and the Division of Police should provide ten hours of paid service per month to predetermined community service sites; for patrol officers, the sites they serve should be located within the geographic boundaries of their beats.
 - Common Council should create a committee or task force to further investigate details regarding implementation of these recommendations, particularly the questions identified by this Subcommittee as relevant but meriting more consideration.

- **Training for the Department of Community Safety:**

- Training for staff of the Department of Community Safety (including the Division of Police and the Division of Community Solutions) should emphasize a community-centered model which prioritizes community protection through de-escalation tactics, alternatives to use of

force, trauma-informed approaches, mental health awareness, holistic responses, and data collection practices;

- Training resources should focus on trainings that are shown to have a positive impact on officer engagement with the community.
 - To better assess the impact of the recommended training, the Department of Community Safety should establish an evaluation process for its training program.
 - Information on the Department of Community Safety’s annual training offerings and mandates should be publicly listed.
- **Equipment and technology needs for the Department of Community Safety:**
 - In addition to the existing equipment and technology of the Division of Police and the start-up equipment and technology necessary for the new Division of Community Solutions, the new Department of Community Safety should provide the following:
 - Improvements to the online records management system (RMS);
 - Speech recognition technology to make report writing more efficient and accurate;
 - A mechanism for reporting lower-priority occurrences online.
- **Research and data needs for the Department of Community Safety:**
 - The Department of Community Safety should collect and publicly report the following data:
 - The type, number, and share of 911 calls by response;
 - Certain outcomes of Division of Community Solutions activities, disaggregated by race and other demographics;
- Certain outcomes of Division of Police activities, disaggregated by race and other demographics;
 - Complaints filed against responders from either the Division of Community Solutions or the Division of Police.
- The Department of Community Safety should standardize data entry practices to align with other city and county services, and consistently and proactively input data into the city-county data dashboard, as defined in the Reimagining Public Safety Collaborative resolutions.
 - The Department of Community Safety should establish partnerships with the Community Justice Center and with academic institutions in the Ithaca area to explore more complex research questions.
 - The Department of Community Safety should dedicate staff resources within the Department of Community Safety to continue this work (including leading the work in the above suggestions, and contributing to the other data-related recommendations contained in the “Public Safety, Reimagined” report), including the hiring of a data analyst for the new department.

BACKGROUND

In June 2020, following the murder of George Floyd by Minneapolis police officer Derek Chauvin and citing “a long and painful history in New York State of discrimination and mistreatment of Black and African-American citizens,” then-New York Governor Andrew Cuomo issued Executive Order 203.

Executive order 203, the New York State Police Reform and Reinvention Collaborative, compelled all jurisdictions with a “police agency” to develop a plan to improve public safety policies and practices to better serve the community, including addressing “any racial bias and disproportionate policing of communities of color.” Local legislative bodies were directed to vote on their plan and report to the Governor’s Office by April 1, 2021.²

In response to Executive Order 203, then-Tompkins County Administrator Jason Molino and then-City of Ithaca Mayor Svante Myrick convened a joint city and county collaborative to assess the state of policing in their jurisdictions.³ This 40-person group, made up of individuals appointed for their expertise, role, and ability to implement solutions, convened in September 2020.⁴ The collaborative, which also included the Center for Policing Equity (a national nonprofit focused on racial justice in law enforcement practices) sought to center its approach within the safety needs and perceptions of the community, and with an eye towards reimagining (rather than reforming) what policing could mean for public safety, equity, and justice for all. The collaborative committed to recommending the kinds of systems and structures necessary to achieve sustainable and meaningful community well-being.

In February 2021, the collaborative released a report for public comment, “Public Safety, Reimagined.” The final report, based on the collaborative’s deliberations, as well as extensive additional community input, included an

in-depth analysis of the policing functions of the county and city as well as 19 recommendations for reimagining public safety in Tompkins County and the City of Ithaca.⁵ On March 31, 2021, the Tompkins County Legislature accepted and the City of Ithaca Common Council unanimously voted to accept the “Public Safety Reimagined” report, and to adopt the recommendations contained within it.⁶ The report was then submitted to the New York State Division of Budget and the Governor’s Office.⁷

The first recommendation within the “Public Safety, Reimagined” report forms the center of the City of Ithaca’s public safety restructuring. As approved by the City of Ithaca Common Council, this recommendation calls for the City of Ithaca to: “Create a new department, tentatively named the Department of Public Safety (DPS), which may be led by a civilian to manage various public safety functions in the City.” At the direction of Common Council, the new department is to include two units: one of “unarmed first responders” who will be tasked with responding to “certain non-violent call types,” and a unit “whose members will qualify in all respects under New York State law as police officers...led by someone who shall qualify in all respects under New York State law as a Chief of Police.”⁸ In the resolution, the City of Ithaca Common Council members noted the goal of advancing “positive changes in policing practices.”⁹ The resolution also called for the formation of a working group, consisting of various city stakeholders and technical experts, to produce implementation recommendations for Common Council to vote upon.

IMPLEMENTATION PLANNING PROCESS

The Reimagining Public Safety Working Group

In June 2021, then-Mayor Myrick, working closely with City of Ithaca Director of Human Resources Schelley Mitchell-Nunn, formed the Reimagining Public Safety Working Group (“the Working Group”) to “facilitate the replacement of the City of Ithaca Police Department with a Department of Public Safety,” in accordance with the first recommendation of the Reimagining Public Safety Plan.¹⁰ The Working Group was tasked with delivering specific plans for the new public safety agency: the new department’s title; “naming conventions” for the new department’s staff and units; job descriptions for key leadership positions; delineated call type responsibility between the two units; training of department members; and an operating budget. As outlined in the Common Council resolution, the Working Group was to include “some combination of IPD staff, other City staff, Alderpersons, interested City residents, and outside experts or consultants.”¹¹

Then-Mayor Myrick named Eric Rosario, a community leader and former member of the City of Ithaca Common Council, as project lead for the Working Group. The Mayor named the Working Group leaders from various stakeholder groups in Ithaca, including community members.¹² Rosario then selected Karen Yearwood, an administrator with Cornell Cooperative Extension and a former Executive Director of the Village at Ithaca, to serve as co-project lead with him. The Center for Policing Equity would serve as facilitators for the Subcommittees and as content advisors for both the Subcommittees and the Working Group. Technical advisors would be brought into Working Group meetings and discussions according to the expertise and support needed for any given meeting or planning process. The Working Group and its technical advisors participated in a two-day orientation, which introduced them to one another’s working and decision-making preferences and provided background and context for the history of policing in Ithaca, the reimagining public safety work to-date, and the Working Group’s role in making suggestions for the implementation of the first recommendation of the public safety redesign.

Working Group subcommittees and technical advisors

In order to inform Working Group decisions on the first recommendation, the collaborative created four Subcommittees consisting of Working Group members and additional community members. These Subcommittees were tasked with addressing key aspects of the new department: Subcommittee A on Staffing Levels, Shift Assignments, and Beat Designs; Subcommittee B on Training, Equipment, and Technology; Subcommittee C on Research and Data; and Subcommittee D on Proposed Operating Budget for the New Public Safety Model. The Subcommittee to address Call Type Responsibility (which units would respond to which types of calls) was of such central importance to the new department that it was subsumed into the Working Group as a whole. (For a full list of Working Group and Subcommittee members, and technical advisors, please see Appendix A).

Community input

Community input was a cornerstone of the decision making process. In order to solicit community input and to keep the community updated on the Working Group’s progress, the City of Ithaca and Tompkins County created a website: www.publicsafetyreimagined.org. The website contains: a list of all resolutions and plans passed by the City of Ithaca Common Council and Tompkins County Legislature related to reimagining public safety; news releases and other updates on the process; and tools for the community to provide their input on key Working Group decisions. Through the website, community members also have the opportunity to sign up for email updates on the Working Group’s progress. The city and county held in-person and virtual information sessions for community members to learn more about the website, and how to use the website to provide input on the public safety reimagining process. The website will contain information on all current and future reimagining plans, and serve as both an archive for past plans and tool for future plans.

For the new public safety agency, there were two key decisions for which community input was solicited: the name for the new department, and the delineation of responsibility for various call types. Community members were encouraged to submit their own ideas for each of these decisions. Community members could also comment on ideas posted by others, including those submitted by the Working Group, generating conversation within the community, and helping the Working Group assess the level of community consensus or conflict around various ideas. In order to post or comment on the website, community members had to create an account confirming their residency in the City of Ithaca or Tompkins County.

The City of Ithaca and Tompkins County held in-person and virtual community forums where community members could share ideas. The in-person forums were designed for those who did not have easy access to participate virtually. Weekly half-page ads were placed in the free Tompkins Weekly newspaper from September 2021 and will run for one calendar year featuring process updates and a cut-out section for community members to write and mail-in ideas. And at libraries in Tompkins County, reference librarians received communications on how to use the website, and how to help community members access it via library computers.

Throughout the process, the City of Ithaca and Tompkins County kept the community apprised on updates through the website, in-person and virtual forums, and an email list (members of the public can continue to sign up using [this link](#)).¹³ The goal was maximum transparency, allowing the community to track the process from the origination of an idea to its implementation. The collaborative's email list had just under 1,000 subscribers as of February 2022.

Decision-making process

The Working Group held its first meeting on July 21, 2021, and met 16 times to advance an implementation plan for the new public safety agency. In order to aid in the group's decision-making process, the full group received briefings on public safety information to help inform decision making.

Community input was a cornerstone of the decision making process... the City of Ithaca and Tompkins County kept the community apprised on updates... The goal was maximum transparency, allowing the community to track the process from the origination of an idea to its implementation.

Subcommittees held their first meetings in late September, and each met between 9 and 13 times to advance their work. Subcommittees also received briefings specific to their committee assignment. At the end of their deliberation process, each Subcommittee shared suggestions on which they had reached consensus to the larger Working Group for inclusion in this report.

The Working Group's decisions on a department name and call type delineation were informed by the community input collected on those decisions. Working Group co-leads Eric Rosario and Karen Yearwood assessed the community ideas collected on these issues, and incorporated finalists into a list from which Working Group members voted. Each suggestion considered by the Working Group was presented to the full Working Group for a vote. Suggestions with majority support were included in this report plan.

For too long, marginalized and vulnerable communities in the City of Ithaca have lived without the true sense of peace and safety we all are promised. Those same communities, along with allies from every facet of our community, have been asking and working for change to the city's overreliance on police to resolve non-criminal or non-violent public safety.

IMPLEMENTATION PLAN FOR THE NEW PUBLIC SAFETY AGENCY

Naming a new umbrella city agency for public safety

SUGGESTION

The Working Group suggests to the Common Council that the new city agency for public safety be named the Department of Community Safety.

CONTEXT

In its April 1, 2021 legislative mandate, Common Council charged the Reimagining Public Safety Working Group with recommending a name for the new public safety agency.¹⁴ Working Group members submitted name suggestions to the Working Group co-leads. Members of the public submitted name suggestions through the City of Ithaca and Tompkins County website for this project (www.publicsafetyreimagined.org), as well as through online and in-person community forums.¹⁵

Submissions from both the Working Group and the public were then reviewed by the co-leads of the Working Group, and assessed using four criteria:

- **Whether the name reflects the charge for a new department.**
 - Does the name effectively communicate an agency that will adopt and implement alternative response models to calls for service?
- **Whether the name allows for future responsibilities of the new department.**
 - Does the name allow for a broader scope of “public safety” that may include other units in the future?

- **Whether the name is intuitive, meaning that it will help people understand what the department does.**
 - Will people who hear or see the name understand that it is responsible for multiple public safety activities?
- **Whether the name is inclusive and innovative.**
 - Does the name capture the goal of reimagining public safety?
 - Is it responsive to the needs of Black, Brown, and other vulnerable communities in Ithaca?

The Working Group co-leads presented a list of finalist names to the entire Working Group, which the Working Group voted on in accordance with the same criteria articulated above. The majority of voting Working Group members selected the “Department of Community Safety” as the new name. The name underscores the vision for the new department as an umbrella agency that will grow to become the hub for community safety in Ithaca, and may eventually come to include some of the City’s other safety-related units.

Leadership of the new Department of Community Safety

SUGGESTIONS

The Working Group suggests to Common Council that:

- **The title of the leader of the Department of Community Safety should be “Commissioner of Community Safety”;**
- **The position of Commissioner of Community Safety should be filled by a civilian leader;**

- **The Commissioner of Community Safety should bring a background in racial justice and social work, public health, public or business administration, and demonstrates in-depth knowledge of the intersections of race, public health, and public safety.**

CONTEXT

This position represents the first time that the City of Ithaca will have a leader whose sole job is to oversee multiple facets of the city's public safety system. The title of this position, "Commissioner of Community Safety," was chosen to reflect the breadth of the department's charge and the seniority of this leadership position within the city's organizational structure.

In its April 1, 2021 resolution, Common Council articulated that the new public safety agency "may be led by a civilian to manage various public safety functions in the City."¹⁶ Given the impetus for reform, the Working Group felt it was important to have the Commissioner be a civilian, and not a current law enforcement officer. The Working Group believes that a civilian leader with full-time oversight of public safety will give the Department of Community Safety its best chance to develop a culture of service and transparency that centers the community experience and will define the department's values. The Commissioner would report directly to the Mayor.

In terms of the Commissioner's qualifications, the Working Group agrees that the position will require a strong leader with a passion for racial and social equity. As the Commissioner of Community Safety will be responsible for developing and implementing the newly formed Department of Community Safety, this position will also require extensive project management and interdisciplinary leadership experience.

Names and leadership structures of the two Department of Community Safety units

SUGGESTIONS

The Working Group suggests to Common Council that:

- **The two units of first responders within the Department of Community Safety should be titled the Division of Police (staffed by police officers) and the Division of Community Solutions (staffed by civilian first responders).**
- **The Commissioner of Community Safety should oversee both divisions.**
- **Reporting to the Commissioner of Community Safety, the head of the Division of Police should be called the Director of Police (who may also be referred to as the Police Chief, where necessitated by state law). Initially, this division will consist of all existing staff of the current Ithaca Police Department.**
- **Reporting to the Commissioner of Community Safety, the head of the Division of Community Solutions should be called the Director of Community Solutions. This division should consist of unarmed civilian first responders.**

CONTEXT

In its April 1, 2021 resolution, Common Council mandated that the new public safety agency include two units: one of "unarmed first responders" who will be tasked with responding to "certain non-violent call types," and a unit "whose members will qualify in all respects under New York State law as police officers...led by someone who shall

IMPLEMENTATION PLAN FOR THE NEW PUBLIC SAFETY AGENCY *continued*

qualify in all respects under New York State law as a Chief of Police.”¹⁷

When a 911 call for service comes in, dispatch must “hand-off” the call to a unit of first responders. Currently, in the City of Ithaca, there are only three units of first responders: the fire department, emergency medical services (EMS) and the police department. This means that for all calls not related to a fire or medical emergency, dispatch hands off the call to the police department, even in cases that do not require law enforcement authority or expertise. A new division of unarmed civilian responders, the Division of Community Solutions, provides the ability to deploy first responders who are better suited to address certain call types (more detail on this in the call delineation suggestion below). The division will be led by the Director of Community Solutions.

Recognizing that law enforcement will continue to play an important role in public safety, the Department of Community Safety will also house the Division of Police. This division will contain the staff of the Ithaca Police Department, and will continue to be bound by the labor contract agreed to by the City of Ithaca and the Ithaca Police Benevolent Association (unanimously passed by Common Council in December 2021). State law requires that if a jurisdiction has a staff of more than four police officers it must have a police chief.¹⁸ Thus, the head of the Division of Police will have two formal titles: the Director of Police and Police Chief (where required by state law). Unless certain protocols require otherwise, the primary title for this position will be Director of Police, designed to align with the title of Director of Community Solutions.

Key responsibilities of the two Department of Community Safety units

SUGGESTIONS

The Working Group suggests to Common Council that:

- **The Division of Police should retain key law enforcement responsibilities, in particular those calls that represent a serious threat to public safety and/or that state law requires be conducted by a police officer.**
- **The Division of Community Solutions should respond to quality of life and other incidents (including those involving referrals to mental health or other social service providers), and may also include law enforcement duties that can be carried out by non-police (i.e. the administration of certain kinds of fines and penalties).**

CONTEXT

Currently in the City of Ithaca, the Tompkins County Emergency Response System (911) can dispatch calls to three response units: the fire department, the police department, and emergency medical services. All 911 calls received by dispatch must be routed to one or more of these three options. By establishing a new Department of Community Safety, including a Division of Community Solutions staffed by civilian first responders, the City of Ithaca would create an alternative to the three existing dispatch options.

This is in line with models established in jurisdictions across the country, where public safety systems are adopting and evaluating alternative responses to 911 calls. In particular, public safety systems are assigning responsibility for quality-of-life and other non-violent incidents to civilian responders, rather than armed police officers. As stated in the Center for American Progress report “The Community Responder Model”: “dispatching armed officers to calls where their presence is unnecessary is more than just an ineffective use of safety resources; it can also create substantially adverse outcomes for communities of color, individuals with behavioral health disorders and disabilities, and other groups who have been disproportionately affected by the American criminal justice system.”¹⁹

The Working Group recognizes the importance of and, in some cases, the legal requirement of having police engage in and respond to public safety threats. For example, certain kinds of crime reports require the response of police officers based on state law, insurance requirements, or other parameters. The Working Group suggests that the core responsibilities of the Division of Police remain similar to those of the current Ithaca Police Department.

Regardless of any change in the responsibilities of the Division of Police, the Working Group emphasizes that it is particularly important to change the culture of policing in Ithaca. Over the course of the process, the Working Group gathered community input from particularly vulnerable community members, some of whom noted experiencing physical and/or verbal abuse from IPD, and voiced a strong desire that their public safety system inflict no mental or physical harm on the civilians it interacts with. As such, the Division of Police should create a culture that prioritizes the needs and safety concerns of Black, Brown, and other marginalized communities in Ithaca. By building a culture that is respectful of community needs and protective of all community members, the Division of Police can begin to repair the mistrust that continues to exist between vulnerable communities and the police. The work starts with division leadership and accountability. It can be enhanced by giving police the time and training they need to build better community relations in purposeful and meaningful ways.

The Working Group recognizes that certain public safety functions that are currently handled by the police would be better served by unarmed civilian first responders within the Division of Community Solutions or in coordination with the County Mobile Crisis Unit (for example, certain incidents related to mental health or homelessness). The Working Group considered alternative response models from other jurisdictions in the US. For example, for over thirty years, the CAHOOTS (Crisis Assistance Helping Out On The Streets) program in Eugene, OR has been rerouting 911 calls related to addiction, disorientation, mental health crises, and

homelessness to teams of first responders (including a medic and a crisis worker) from a local mental health clinic.²⁰ The calls diverted to CAHOOTS exclude those in which there is a danger posed to others (for example, incidents involving a weapon). Similarly, in Denver, CO, the STAR (Support Team Assistance Response) program deploys Emergency Medical Technicians and Behavioral Health Clinicians to non-violent calls involving mental health issues, poverty, substance abuse, and homelessness.²¹ The new Division of Community Solutions in Ithaca could have similar responsibilities. A co-response by the Division of Police and the Division of Community Solutions might further address both public safety threats and holistic community needs. The responsibilities of the Division of Community Solutions will continue to be refined as part of the implementation of Recommendation #2 of the “Public Safety, Reimagined” report (“Evaluate existing models and implement an alternative to law enforcement response system for crisis intervention and wraparound health and human services delivery”).

Call delineation

SUGGESTIONS:

The Working Group offers the following suggestions on call delineation, meant to serve as high-level guidance for which types of calls should be handled by law enforcement and which types of calls should be handled by unarmed first responders. There were certain call types that contained a wide range of possible circumstances, and thus could not be clearly delineated between units. These call types may need to be refined (broken into more specific subcategories) in order to be delineated in an effective, responsible way. There were other call types which may necessitate a co-response between law enforcement and unarmed responders. Co-responses may be varied, and could include units on standby in case a co-response need emerges, telephonic responses to calls, or other forms of alternative responses. As such, the Working Group did not come to a delineation decision on all call types, and grouped these into an “it depends” category

IMPLEMENTATION PLAN FOR THE NEW PUBLIC SAFETY AGENCY *continued*

for further analysis. These remaining details of call delineation would come under the leadership of the new Commissioner of Community Safety.

The Working Group suggests to Common Council that:

- **The Working Group voted to delineate the following call types between “armed” and “unarmed” responses, but recognizes that these decisions will need to be refined and adjusted under the leadership of the Commissioner for Community Safety, and based on factors including staff capacity, departmental policies, and further analysis of call types:**

- The new Division of Police should respond to the following calls for service (in alphabetical order):
 - Assault; Bomb Threat; Burglary; Criminal Mischief; Dead Body; House Alarm Triggers Police; Intoxication; Robbery; Shots Fired; Stabbing; Warrant; Weapons; 911 Call Hangup.
- The following call types should be handled by unarmed responders from the Division of Community Solutions and other departments (in alphabetical order):
 - Animal Bites; Animal Problem; Bad Check; Child Abuse; Civil Complaint; Escort; Fire Outside; Fireworks; Fraud; Hazmat; Information; Local Law; Noise Complaint; Parking Problem; Personal Injury Collision; Property Check; Property Complaint; Repossessed Vehicle; Service Call; Special Detail; Theft of Mail/Packages; Traffic Collision; Unclassified; Vehicle Fire; Welfare Check.
- The following call types were categorized as “it depends.” These call types should be further analyzed to determine if they need to be broken

down into smaller categories (new call types) in order to effectively delineate a response, if they need an in-person response at all, or if they merit a co-response between armed and unarmed responders (in alphabetical order):

- Assisting Another Government Resource; Disorderly Conduct; Dispute; Domestic; Drugs; Harassment; Missing Person; Overdose; Psychiatric; Sex Offense; Suspicious; Traffic Complaint; Traffic Offense; Transport; Trespassing; Unsecured Premise; 911 Call with No One Talking.
- A joint response between the Division of Police and the Division of Community Solutions should be considered in cases which merit it (for example, trespassing incidents where there is a potential threat to public safety). A co-response model will be determined under the leadership of the new Commissioner of Community Safety.

CONTEXT:

In the context of this report, call delineation refers to the assignment of 911 calls for service to either the Division of Police or to unarmed responders, including from the Division of Community Solutions. The Working Group analyzed approximately 60 call types, selected from a list of all call types provided by the Tompkins County Emergency Response (911) dispatch system. (For a complete list of considered call types and their definitions, please see Appendix B.)

Several call types reflect broad categories, within which a range of incidents could be included and necessitate different types of response. For example, one call type is “Domestic,” which includes calls involving abuse in progress (requiring a Division of Police response), and calls without an immediate threat to personal safety (which may be better served by a Division of Community Solutions response).

Other calls may be better served by a co-response, for example “psychiatric”, which includes incidents where the person in crisis poses a threat to others (requiring a Division of Police response) and is in need of social services assistance (which may be better served by a Division of Community Solutions response). In order to implement call delineation on the remaining call types, the call types may have to be segmented into smaller categories (creating new call types). These new call types should be crafted for ease of clear delineation between an armed response, unarmed response, a co-response, or perhaps an administrative response that does not require a responder being sent to the scene at all. Over the course of COVID-19, the Ithaca Police Department was handling an increasing number of lower-priority calls telephonically (for example, a call related to bike theft). This practice could potentially be expanded to ensure that response resources are being deployed to the incidents that most require in-person support.

The Working Group considered several factors in making its suggestions on call delineation: community input, analysis of 911 call data, consultation with 911 dispatch experts, research on the value of alternative responses, and model practices from alternative response programs in other US cities. The principle applied was to route call types requiring law enforcement expertise to the Division of Police, and diverting call types better served by a non-law enforcement response to unarmed first responders. In making determinations about call delineation, the Working Group adopted the following criteria:

- **Decisions should be inclusive and innovative;**
- **Decisions should capture the intent of reimagining public safety;**
- **Decisions should be responsive to the need of Black, Brown, and other vulnerable communities in Ithaca;**
- **Decisions should include input from experts, Common Council, and the surrounding community.**

Taking into account all of these inputs, the Working Group then held a series of facilitated discussions culminating in a vote. The suggestions for call delineation listed above reflect decisions on which either a majority of Working Group members were in favor or, in case of a tie, the Working Group co-leads decided with the counsel of the Director of Department of Emergency Response (DoER).

The City of Ithaca and Tompkins County will continue this process as they work to implement Recommendation #3 of the “Public Safety, Redesigned” report: “Better align available resources with emergency response needs by establishing a pilot program for non-emergency calls.” This pilot program will include responses by the new Division of Community Solutions within the City of Ithaca, and also may include collaboration with and responses by the County’s Mobile Crisis Team.

Staffing level, beat design, and shift assignment suggestions for the Department of Community Safety divisions

SUGGESTIONS

The Subcommittee on Staffing Levels, Shift Assignments, and Beat Designs suggests to Common Council that:

- **For the new Division of Community Solutions:**
 - The City of Ithaca should initially hire five unarmed responders for the Division of Community Solutions under the Department of Community Safety, with the Commissioner of Community Safety to determine additional staffing needs.
 - Unarmed responders should have the title of “Community Responders”, and be responsible for addressing calls that do not require law enforcement expertise. These unarmed

IMPLEMENTATION PLAN FOR THE NEW PUBLIC SAFETY AGENCY *continued*

responders should bring skills in community engagement, de-escalation, crisis intervention, and referrals to mental health and social service providers.

- The Division of Community Solutions may be assigned beat assignments, but only as appropriate to increase community engagement, and to be concentrated within beats in which their services are most needed.

- **For the Division of Police:**

- The Division of Police should restructure its beat design with the priorities of creating an even distribution of 911 calls between beats and incorporating walking beats, while maintaining neighborhood integrity.
- By the next collective bargaining process, the City of Ithaca and its police department/ Division of Police should adopt the Pitman shift assignment configuration²² in order to meet community needs, and maximize officer sustainability, efficiency, and equity.

- **For both divisions:**

- The Division of Community Solutions and the Division of Police should work in tandem to improve intra-departmental efficiency and communications.
- Responders from both the the Division of Community Solutions and Division of Police should provide ten hours of paid service per month to predetermined community service sites; for patrol officers, the sites they serve should be located within the geographic boundaries of their beats.
- Common Council should create a committee or task force to further investigate details regarding implementation of these

recommendations, particularly the questions identified by this Subcommittee as relevant but meriting more consideration.

CONTEXT

Guiding principles

The Subcommittee considered several guiding principles in making these suggestions, intended to capture the spirit of reimagining public safety in a community-centered way:

- **The Department of Community Safety and all of its employees should show respect and kindness to all members of the community, regardless of race, class, sexual orientation, occupation, etc.**
- **The staffing and beat design of the Department of Community Safety should pay particular attention to the experiences of disproportionately impacted Black and Brown communities in Ithaca.**
- **The staffing and beat design of the Department of Community Safety should serve the holistic needs of community members, and enable genuine and empathic community engagement.**

The Department of Community Safety should be aware of and integrated with existing infrastructure and wraparound services in Ithaca.

Staffing Levels

To determine potential staffing levels for the Division of Police and the Division of Community Solutions, the Subcommittee analyzed existing Ithaca Police Department (IPD) workload by call type, identifying which calls could involve an unarmed response. The subcommittee noted that about one-third of the community-generated 911 calls IPD responds to could potentially be handled by unarmed officers or with some kind of co-response. This number is only intended to be a rough approximation, especially since the Division of Community Solutions will be expected to provide additional services that IPD is not currently responsible for.

For a more precise breakdown of suggested call diversion to the Division of Community Solutions, please see the section titled “Call delineation” within this report. The implications of this analysis inform the Subcommittee’s subsequent suggestions on the roles and responsibilities of unarmed responders.

This Subcommittee suggests that the City of Ithaca initially hire five full-time responders for the Division of Community Solutions, with potential staffing expansion based on an evaluation of initial outcomes after one year. Unarmed officers are intended to 1) provide the Ithaca community with services and skill sets that would improve public safety outcomes, particularly those of Black, Brown, and other vulnerable communities; and 2) supplement IPD’s capacity by reducing workload that can appropriately be handled by unarmed officers. The subcommittee recommends that hired unarmed officers represent the diversity of Ithaca, and be hired from within the local Ithaca community.

Roles of unarmed responders

Drawing inspiration from other call diversion models across the country, the Subcommittee has outlined the proposed role of “Community Responder”: a civilian responder position that works collaboratively as part of the Division of Community Solutions within the Department of Community Safety. Community Responders would respond to calls related to quality-of-life concerns, some community conflicts, and some mental health issues that do not require an armed intervention. This could include 911 call types like “Welfare Checks”, “Noise Complaint”, “Property Complaint”, “Traffic Collision”, “Civil Complaint”, and “Animal Problem”.

The Community Responder’s primary duties involve:

- **Responding to non-hazardous, non-emergency and other calls for service in lieu of or in tandem with an armed officer.**
- **Performing a variety of specialized and technical duties in the areas of patrol, community services, training, and other areas as assigned.**

- **Conducting active patrol of public spaces to promote community safety and engagement.**
- **Writing reports documenting incidents and calls for service and preparing other written correspondence as needed.**
- **Supporting a variety of administrative functions for the department and assisting with projects as needed.**
- **In the event of emergencies, requesting emergency services assistance, including providing key information to other responders and evacuating persons.**
- **Accompanying armed responders on patrol as allowed by the officer in charge.**
- **Working in collaboration with other community resources—including but not limited to armed responders, unarmed responders, Downtown Community Outreach Workers, and Law Enforcement Assisted Diversion (LEAD)—to make appropriate referrals to mental health and other social services.**

For more information on the proposed training for Division of Community Solutions responders, please see the section “Training protocols for the Department of Community Safety.”

The Subcommittee recognizes that the precise roles, responsibilities, and configurations of unarmed responders will require further inquiry once operational, and that their job descriptions will be refined under the leadership of the new Department of Community Safety and as part of the Common Council recommendation to: “Evaluate existing models and implement an alternative to law enforcement response system for crisis intervention and wraparound health and human services delivery.” Of specific importance will be determining responses to mental health crisis calls, which may involve collaboration with the Tompkins County Mobile Crisis Unit.

IMPLEMENTATION PLAN FOR THE NEW PUBLIC SAFETY AGENCY *continued*

The Subcommittee also recognizes that staffing structure and responsibilities for the Division of Police will be governed by the current and next collective bargaining agreement. Out of deference to that process, and recognizing the expertise behind IPD's current staffing configurations, the Subcommittee does not make recommendations on staffing levels for armed responders.

Beat design

Given the addition of a new Division of Community Solutions, the Department of Community Safety has an opportunity to restructure its beat design. A "beat" is the assigned territory and times in which a police officer patrols within the community. These patrols can happen by car, bicycle, on foot, or a combination of all three.

While recognizing that any formal re-drawing of beats will require additional review and approval, the Subcommittee does suggest that beats be restructured, with the following priorities in mind:

- **Equalizing call volume and workload between the beats.**
- **Keeping neighborhoods together in order to facilitate community engagement.**
- **Accounting for the unique and diverse geography of Ithaca, including the ways its six square miles are shaped by waterways that create transportation barriers.**
- **Responding to community input on where walking beats would be most useful.**

A report by Matrix Consulting Group (Appendix C) represents a useful starting point for this restructuring of beats. It suggests an alternative beat configuration that equalizes workloads between beats to within a 20% variance, and proposes areas for walking beats. To account for fluctuations in the volume of community-generated call activity and variations in the types of call activity, the Subcommittee also raised the

possibility of having different beat schedules depending on time of day, days of the week, and seasonality. The subcommittee also raised the question of whether officers should rotate in and out of patrol beats based on a predetermined schedule or be assigned to patrolling the same beat for an extended duration. The subcommittee flags both questions as important for future stakeholders to consider before finalizing beat redesign for the department.

Where appropriate, the new beat design and patrol schedule should encourage collaboration and co-responses between the two units. Research shows that, in cases involving a behavioral health crisis, a co-response by police officers and mental health professionals reduced the likelihood that the individual in crisis would be arrested, compared to a police-only response.²³

Furthermore, to promote sustained and generative interaction between the community and public safety officers, and to orient the culture of armed officers towards community engagement, both armed and unarmed officers should provide at least ten hours of paid service per month to predetermined community service sites. For patrolling officers, the sites they serve should be located within the jurisdiction of their beats.

Shift assignments

Because of the current contract between the Police Benevolent Association and the City of Ithaca, the shift schedules for responders within the Division of Police cannot be adjusted until the collective bargaining process is engaged again in 2023. As part of the new collective bargaining process, the subcommittee suggests that the Division of Police adopt the 12-Hour Schedule, also known as the Pitman Configuration, to improve department efficiency, workload equalization, and officers' work-life balance.

Currently, the IPD operates with 8.25 hour shifts, with officers working in a pattern of 4 days on followed by 2 days off (equating to 38.6 hours per week). Because the current cycle repeats every 6 days, officers do not have fixed workdays.

According to Matrix Consulting Group: “A constantly changing set of workdays can, for some, misalign and isolate officers from life outside of work that generally follows a regular weekly pattern.”

Under the proposed Pitman Configuration, officers would have 12-hour shifts, with a regularly repeating set of fixed workdays over a 2-week cycle. In this schedule, over 14 days, officers would work: 2-on, 2-off, 3-on, 2-off, 2-on, and 3-off. This cycle translates to 84 hours biweekly, with consistent days on and off, allowing for more predictable work-life balance.

For more details on the proposed Pitman Configuration and other shift schedules, please see the full Matrix Consulting Group report in Appendix C.

Training protocols for the Department of Community Safety

SUGGESTIONS

The Subcommittee on Training, Equipment, and Technology suggests to Common Council that:

- **Training for staff of the Department of Community Safety (including the Division of Police and Division of Community Solutions) emphasizes a community-centered model which prioritizes community protection through de-escalation tactics, alternatives to use of force, trauma-informed approaches, mental health awareness, holistic responses, and data collection practices.**²⁴
- **Training resources should focus on trainings that are shown to have a positive impact on officer engagement with the community.**
- **To better assess the impact of the recommended training, the Department of Community Safety should establish an evaluation process for its training program.**

- **Information on the Department of Community Safety’s annual training offerings and mandates should be publicly listed.**

CONTEXT

The Subcommittee on Training, Equipment, and Technology received detailed briefings on the current training requirements, offerings, and protocols for the Ithaca Police Department, as well as information on promising training programs for police and other first responders.

Responders within the Division of Police are police officers under New York State, serving the City of Ithaca. As such, they are mandated by state law to complete the state’s Basic Course for Police Officers (BCPO). Training suggestions in this section for these officers are in addition to the state’s basic training program for new officers.

In its work, the Subcommittee on Training, Technology, and Equipment evaluated: the BCPO training schedule offered by the Broome County Sheriff’s Law Enforcement Academy; a list of the Ithaca Police Department’s annual training offerings; and heard from Ithaca Police Department Acting Chief John Joly and Sgt. Dave Amaro, who runs the department’s training, about the department’s approach to its training program.

The BCPO training curriculum, which includes around 700 hours of training, is set by the state, not the city.²⁵ The BCPO requirements cover a wide range of issues, including crisis intervention, use of force, ethics & professionalism, and cultural diversity. For a complete list of the BCPO training curriculum, please see Appendix D. While New York State’s BCPO training is widely-regarded, it’s training curriculum has received criticism, including from law enforcement officers. For example, in a Times Union opinion piece, Tim Dymond, President of the New York State Investigators Association, noted, “The New York State Police...offers some of the best police training available. However, the amount of training we receive in mental health, crisis negotiation and de-escalation is woefully inadequate compared with the amount of time spent on vehicle operation, firearms,

IMPLEMENTATION PLAN FOR THE NEW PUBLIC SAFETY AGENCY *continued*

defensive tactics, penal law, criminal procedure law and investigation techniques.”²⁶

Apart from an officer’s initial BCPO training, New York State does not set any additional minimum training requirements for police officers. While not required by the state, the Ithaca Police Department has offered various annual training opportunities for its officers, on a wide range of topics. (For the IPD curriculum please see Appendix E.) The IPD has expressed a goal of having its own police academy-like structure to deliver comprehensive training for its officers, but currently lacks the resources to institute such a service.

The basic training program for the Division of Community Solutions is still to be determined. But, For the Department of Community Safety, the Subcommittee suggests all responders (including the Division of Police and the Division of Community Solutions) have access to the following training (above and beyond the training included in BCPO, existing IPD training, and any additional basic training required for the Division of Community Solutions). These suggested trainings are designed to improve the full scope of interactions between responders and the community, shifting focus towards the most common, everyday ways that first responders and community members are likely to interact. The suite of suggested trainings is intended to ensure everyone in the Department of Community Safety is able to effectively engage with the community, making the community feel valued and protected.

- **Crisis intervention training**²⁷

- With a focus on mental health crises, crisis intervention training teaches responders about mental illness, connects them to local mental health professionals, and emphasizes non-violent tactics.

- **Procedural justice training**²⁸

- This training covers the four pillars of procedural justice as they relate to public safety:

- Voice: To provide people with the opportunity to share their side of the story, and to take their story into consideration before a decision is made;
- Neutrality: To make decisions without bias and with transparent reasoning;
- Dignity and respect: To treat all people with dignity and respect;
- Community trust: To establish the authenticity and sincerity of the officer’s motives and approach to justice.

- **Implicit bias training**²⁹

- This training teaches responders about recognizing their implicit bias (the unconscious and differential treatment of a person based on a set of discriminatory factors including race, sex, religion, sexuality, disability, age, nationality, and others) and the impact it has on their community interactions.

- **Enhanced communication techniques, including training in “verbal judo”**³⁰

- Verbal judo trains responders to diffuse conflict through advanced verbal communication techniques; it can help ameliorate a common civilian complaint of police: how the officer communicates with them during an interaction.

- **Trauma informed training**³¹

- Trauma is a response to physical and emotional harm, and can have a significant impact on one’s physical, psychological, emotional, and social health. Trauma-informed training provides responders with an understanding of trauma and how to recognize its effects in victims, suspects, and the larger community. Through a trauma-lens,

responders learn how to: navigate victim's needs; connect with early intervention programs to disrupt cycles of violence; and identify appropriate community services for traumatized individuals.

- **Brain development training**³²
 - Research shows that the human brain is not fully developed until our mid-20s. Understanding the brain development of adolescents and young adults can help responders navigate interactions with teens and early adults, resulting in better communication, trust, and outcomes for both young civilians and responders.
- **Conflict resolution training**³³
 - Responders are often present to manage conflict between individuals, and conflict resolution training provides officers with practical verbal and non-verbal techniques to manage conflict towards a safe and peaceful resolution for all parties.
- **Critical thinking/problem-solving training**³⁴
 - Critical thinking or problem solving training teaches responders to identify and implement solutions to advance the holistic needs of community members.
- **Collaborative public safety training**³⁵
 - Collaborative public safety models approach public safety as a shared responsibility of law enforcement, community groups, government health and social service agencies, and individuals. Training can provide responders with concrete tools to coordinate across different public safety functions and engage community members.

- **Data collection training**

- High-quality data collection is essential to understanding the impact of Department of Community Safety activities, including any disproportionate impacts on racial or ethnic minorities. Training on the value of data and how to input data into RMS would help ensure that the Department's data is as consistent and useful as possible.

- **Training on the history of policing and public safety in Ithaca**

- By understanding the dynamics of the Ithaca community and the history of policing in Ithaca, responders will be informed on the relationship between public safety systems and various communities, providing context to the present day work of implementing a reimagined public safety system.

The City of Ithaca will continue to refine this training plan as it works to implement Recommendation #5 of the "Public Safety, Reimagined" report: "Identify new curriculum, redesign and implement a culturally-responsive training program that incorporates de-escalation and mental health components into a comprehensive response for law enforcement."

Equipment and technology needs for the Department of Community Safety

SUGGESTIONS

The Subcommittee on Training, Equipment, and Technology suggests to the Common Council the following equipment and technology investments for the Department of Community Safety:

IMPLEMENTATION PLAN FOR THE NEW PUBLIC SAFETY AGENCY *continued*

- **Improvements to the online records management system (RMS);**
- **Speech recognition technology to make report writing more efficient and accurate;**
- **A mechanism for reporting lower-priority occurrences online.**

These technology investments would be in addition to the existing equipment and technology of the Division of Police and the start-up equipment and technology necessary for the new Division of Community Solutions.

CONTEXT

The Subcommittee's equipment and technology suggestions are meant to apply to both units of responders within the new Department of Community Safety. The suggested improvements are in addition to the existing equipment and technology being used by various public safety agencies in Ithaca (for example, police body cameras, a 211 helpline for community resource inquiries, traffic cameras), and the start-up equipment and technology necessary for the new Division of Community Solutions.

Improvements to the online records management system (RMS)

An RMS³⁶ is an automated tool that allows a department to store, retrieve, retain, and view reports, records, files, or any other information documenting a department's work. Such a tool can save a department time, and enhance internal and external data collection and data sharing opportunities.

The Department of Community Safety needs access to a records management system (RMS) that allows for efficient and consistent data entry, and easy extraction of public safety data. The RMS should capture and produce key statistics including but not limited to: the number and outcome of pedestrian stops, the number and outcome of vehicle stops, and the number and outcome of use of force incidents. All statistics captured and produced via the RMS should allow

for disaggregation by race and other demographic attributes.

There exists a county-level RMS system currently used by IPD and other public safety agencies. This system should be evaluated to identify whether and how it can meet the Department of Community Safety's RMS needs.

The lack of an effective RMS system will impede the Department of Community Safety's ability to assess department-generated information, and would make it difficult for policymakers, police oversight entities, and members of the public to effectively assess the operations of the department.

The RMS system would be useful to and used by all responders within the Department of Community Safety.

Speech recognition technology for report writing

When a police officer responds to a call, that officer completes paperwork that describes the nature of the call, the actions of the citizens involved in the call, the actions of the responding officers, and other relevant information. Thus, paperwork can represent a significant portion of an officer's job. Speech recognition technology allows officers to dictate rather than write reports, offering the possibility of increased efficiency and of capturing a fuller extent of any given incident call.³⁷ The increased efficiency provided by speech recognition technology will give responders within the Department of Community Safety more time for critical thinking and community engagement. The suggested speech recognition technology would be provided to all responders within the Department of Community Safety.

A mechanism for reporting lower-priority occurrences online

This would provide a way for community members to report lower-priority incidents from their phone or computer. Online reporting of non-emergency incidents is convenient for community members, allowing them to report at any time of

day, without needing to wait for an officer to respond. It also reduces face-to-face interaction, which may reduce disproportionate minority contact with the criminal justice system and help mitigate the spread of COVID-19 for as long as the pandemic continues. For the responding agencies, it allows the department to reallocate its resources to higher-priority activities. While there are models for online reporting systems in other jurisdictions, the concept will need to be tested and refined within the context of the Ithaca community, including specifics on which incidents would qualify for various responses, and how the response outcomes will be tracked.

Research and data needs of the Department of Community Safety

SUGGESTIONS

The Subcommittee on Data Analysis and Recommendations suggests to the Common Council the following data collection and research practices for the Department of Community Safety:

- **Collect and publicly report data on the type, number, and share of 911 calls by response:**
 - Division of Community Solutions only response;
 - Division of Police only response;
 - Division of Community Solutions and Division of Police co-response.
- **Collect and publicly report data on the following outcomes of Division of Community Solutions activities, disaggregated by race and other demographics:**
 - The type, number, and frequency of different outcomes from Division of Community Solutions responses (e.g. transport to a domestic violence shelter);
 - The number of individuals experiencing mental health crisis served by the Division of Community Solutions, and the nature of service provided;
 - The number and share of Division of Community Solutions responses that ended in an arrest.
- **Collect and publicly report data on the following outcomes of Division of Police activities, disaggregated by race and other demographics:**
 - The number and rate of community members stopped by the Division of Police;
 - The number and rate of community members arrested by the Division of Police;
 - The number and rate of community members who experience use of force by responders from the Division of Police (as documented by the Division of Police or as reported by community members).
- **Collect and publicly report data on complaints filed against responders from either the Division of Community Solutions or the Division of Police:**
 - Number of complaints;
 - Number of investigations;
 - Outcomes of investigations.
- **Standardize data entry practices to align with other city and county services, and consistently and proactively input data into the city-county data dashboard as defined in the Reimagining Public Safety Collaborative resolutions.**
- **The Department of Community Safety should establish partnerships with the Community Justice Center and with academic institutions in the Ithaca area to explore more complex research questions.:**

IMPLEMENTATION PLAN FOR THE NEW PUBLIC SAFETY AGENCY *continued*

- Partner with researchers at Ithaca College, Cornell University, and Tompkins Cortland Community College to explore complex research questions (e.g. changes in community perception of public safety, community reactions to new alternative response models, etc.)
- **The Department of Community Safety should dedicate staff resources within the Department to continue this work (including leading the work above suggestions, and contributing to the other data-related recommendations contained in the “Public Safety, Reimagined” report), including the hiring of a data analyst for the new department.**

CONTEXT

As the Department of Community Safety is established, it is important to measure its impact in real time, to publicly report that data to the community, and to use that data to identify and implement improvements in service.

One major piece of this research would be to measure the usage of the new Division of Community Solutions. As a unit designed to divert some call types away from law enforcement, one metric of success would be the type, number, and share of 911 calls handled by the Division of Community Solutions. This would allow the community to clearly understand the role of the new Division of Community Solutions (i.e. what call types they actually responded to), and the extent to which they served as an alternative to law enforcement (i.e. what share of those call types they responded to).

It is also important to measure the outcomes of Division of Community Solutions activities. For example, did the presence of the Division of Community Solutions reduce the likelihood of negative outcomes, like arrest or use of force? To what extent did the activities of the Division of Community Solutions drive positive outcomes, like referral to mental health services or substance abuse treatment? In order for

this data to be useful and available, Division of Community Solutions officers will need to be trained in data entry into the shared service system managed by the county (including RMS), as outlined in the training section above.

When it comes to the Division of Police, this plan represents an opportunity to fill key gaps in existing data collection and reporting. Currently, IPD reports very little data on the nature and outcomes of its activities. For example, IPD doesn't track the racial breakdown of traffic stops, and also does not report what share of calls result in arrest. Part of this is due to inconsistent data entry on the part of IPD, and part is due to limitations in the shared services RMS system managed by the county. The county-managed RMS system is capable of collecting this data and should be optimized to require standardized data inputs, including clearly capturing the race of all community members stopped and arrested as a mandatory field. These changes may require collaboration with other agencies that use the RMS system as changes would potentially affect all users. In addition, the new Division of Police should also train officers on the value of data collection, and how to input data into the county-managed RMS in a consistent and high-quality manner. In particular, Division of Police officers should collect and publicly report data that clearly connects police activities to outcomes, and disaggregates this data by race, ethnicity, geography, and other key demographics. For example, the community should know the number and rate of police stops by race. These data points would be an essential component in identifying and measuring the disproportionate racial impact of policing in Ithaca.

A unique strength of the Ithaca community is its proximity to leading research institutions like Cornell University, Ithaca College, and Tompkins Cortland Community College. The Department of Community Safety should leverage these relationships, forming partnerships with local researchers to study the impact of the Department in greater depth. For example, social science researchers could explore questions beyond the scope of RMS data collection, measuring

changes in community perception of public safety, and layering additional variables into analysis (e.g. poverty, educational attainment, etc.)

Finally, the Department of Community Safety should dedicate staff resources to continue to improve research and data practices, which includes the hiring of a data analyst for the new department. The Department of Community Safety will continue the work outlined above, and contribute to implementing the remaining data-related recommendations in the “Public Safety, Reimagined” report: including a recommendation to “Collect and evaluate the results of officer-initiated traffic stop enforcement”; a recommendation to “Standardize data entry and review existing data sets for more actionable insights and allocation of public safety resources”; and a recommendation to “Develop a real-time public safety community dashboard”.

IMPLEMENTATION PLAN FOR THE NEW PUBLIC SAFETY AGENCY *continued***Budget****SUGGESTIONS**

The Subcommittee on Proposed Operating Budget for the New Public Safety Model (Budget Subcommittee) suggests to Common Council that the new Department of Community Safety be initially provided with \$1,150,000.00 in additional budget (which may be spent over multiple years, depending on the pace of hiring new staff and purchasing other improvements). This budget would be in addition to the existing budget of IPD (whose staff will continue to work within the Department of Community Safety), and is broken down as follows:

Item	Budget
DEPARTMENT OF COMMUNITY SAFETY LEADERSHIP	
New Commissioner of Community Safety salary	\$139,000.00
New Director of Community Solutions salary ³⁸	\$105,000.00
Benefits for the above positions ³⁹	\$117,000.00
DIVISION OF COMMUNITY SOLUTIONS STAFF AND START-UP COSTS	
New Community Responders (5)	\$285,000.00
Benefits for new Community Responders (5)	\$136,000.00
Vehicles with radio equipment (2)	\$100,000.00
Uniforms, computers, other tech costs, and office supplies for Community Responders	\$66,000.00

Item	Budget
RESEARCH AND DATA STAFF	
New Data Analyst position (1)	\$57,000.00
Benefits for new Data Analyst position (1)	\$27,000.00
TRAINING	
Additional training for all responders within the Department of Community Safety ⁴⁰	\$90,000.00
EQUIPMENT AND TECHNOLOGY IMPROVEMENTS⁴¹	
Speech recognition technology	\$28,000.00
TOTAL	\$1,150,000

IMPLEMENTATION PLAN FOR THE NEW PUBLIC SAFETY AGENCY *continued***CONTEXT**

The intent of this proposed budget is to represent the initial financial commitment necessary to fully implement the proposed Department of Community Solutions, and to reflect the goals and principles of the Reimagining Public Safety efforts. The proposed budget is based on the suggestions of the Working Group and the three RPS Subcommittees (detailed above in this report). The Working Group and each Subcommittee worked independently to develop suggestions for policy, programs, and personnel. Additionally, the Working Group and Subcommittees provided recommendations and budget implications. Where possible, they provided cost estimates, which the Budget Subcommittee supplemented with its own research.

The Working Group suggests two new leadership positions for the Department of Community Safety: the Commissioner of Community Safety, and the Director of Community Solutions. For the Commissioner of Community Safety, the Budget Subcommittee suggests an annual salary of approximately \$139,000.00; and for the Director of Community Solutions, the Budget Subcommittee suggests an annual salary of approximately \$105,000.00 (both commensurate with experience). These suggestions are based on benchmarking of similar positions within Ithaca and beyond. A salary for the Director of Police position is not reflected here because that line item is already contained within IPD's budget (as the Chief of Police position). For all new positions, the Budget Subcommittee suggests the City calculate benefits at approximately 48% of salary (a standard ratio).

For the new Division of Community Solutions, the Subcommittee on Staffing Levels, Shift Assignments, and Beat Designs suggests that five civilian responders (called "Community Responders") should be initially hired. The Budget Subcommittee suggests an annual salary of approximately \$57,000.00 for these Community Responder positions, based on benchmarking of similar positions. The Community Responders will require two new vehicles with radio equipment, computers, uniforms, and other office supplies;

the Budget Subcommittee suggests that \$140,000.00 be allocated to these start-up costs.

The Subcommittee on Training, Equipment, and Technology suggests several new trainings that should be made available to responders from both the Division of Police and the Division of Community Solutions. The Budget Subcommittee suggests that \$90,000.00 be initially allocated to these additional trainings, with a focus on crisis intervention, implicit bias, de-escalation, and verbal judo training. Some of these training sessions could be provided in Ithaca by the RITE Academy and the Verbal Judo Institute. With Ithaca acting as the host for the RITE Academy trainings, there may also be an opportunity to subsidize Ithaca's costs by selling seats to other jurisdictions.

The Subcommittee on Training, Equipment, and Technology also suggested investment in speech recognition technology. The Budget Subcommittee suggests purchasing 28 licenses for Dragon Law Enforcement reporting software, to be used by all responders within the Department of Community Safety. This investment in speech recognition technology would cost approximately \$28,000.00.

The Budget Subcommittee recognizes that additions or adjustments to this proposed budget will be necessary once the Department of Community Safety is operational and its impact can be evaluated. The Budget Subcommittee suggests that this proposed budget continue to be refined under the leadership of the Commissioner of Community Safety.

The Budget Subcommittee also recognizes the importance of impact evaluation, and tying future budgeting, policy, and management decisions to departmental performance. Public-facing performance measures and results build trust and support from the community. (For more detail on suggested performance metrics for the Department of Community Safety, see the Research and Data section of this report.) In making future budget decisions, the City of Ithaca should

adjust funding based on which aspects of the Department of Community Safety are driving positive outcomes.

Conclusion

The above plan for implementing a new public safety agency represents the first step in reimagining public safety in the City of Ithaca: a shared vision and commitment to look at public safety through an equity lens, and create a system that serves all community members. Beyond the establishment of a new public safety agency, the resolutions passed by the City of Ithaca and Tompkins County contains 18 more recommendations (covering topics such as officer recruitment, data dissemination, and creating a public safety review board), which will be implemented over the coming months and years. As with the creation of this plan, implementing the remaining recommendations will require extensive collaboration between city leaders, public safety agencies, and community members. The City of Ithaca and Tompkins County have begun planning for the implementation of the remaining recommendations.

“What we’ve learned is that when we improve public safety for People of Color, we improve public safety for everyone. This process looked through a new lens, studying the problems facing our community and the people in it. We see clearly how the city can respond differently to increase access to meaningful solutions and decrease interactions with the criminal justice system and disproportionate negative outcomes for Black and Brown people in Ithaca.

In this report’s suggestions I see better outcomes for People of Color, I see increasing trust in local government, and I see our most vulnerable neighbors feeling more safe and less afraid. We’re on a path of using our people and resources in the City of Ithaca to meet the needs of our community better and more equitably. This represents long-term, structural change that is needed to truly have community safety for all.”

WORKING GROUP AND SUBCOMMITTEE MEMBERS

Ithaca RPS Working Group Members:

1. Amir Tazi
2. Amos Malone
3. Ducson Nguyen
4. Eric Rosario
5. George McGonigal
6. John Guttridge
7. Karen Yearwood
8. Laura Lewis
9. Luca Maurer
10. Mar'Quon Frederick
11. Mary Orsaio
12. Scott Garin
13. Tom Condzella
14. Travis Brooks
15. Yasmin Rashid

Technical Advisors to the Working Group:

1. Schelley Michell-Nunn
2. Michael Stitley
3. Greg Thomas & Jewel Kinch-Thomas
4. Faith Vavra
5. Derek Osborne
6. Melody Faraday
7. Jessica Verfuss
8. John Halaychik
9. John Joly

Subcommittee A: Staffing Levels, Shift Assignment, Beat Design

1. Travis Brooks
2. Mary Orsaio
3. Laura Lewis
4. George McGonigal
5. Rob Gearhart

Subcommittee B: Training, Technology, and Equipment Needs

1. Amir Tazi
2. Eric Rosario
3. Tom Condzella
4. Yasmin Rashid
5. Richard Onyejuruwa
6. Camille Tischler
7. Tierra LaBrada
8. Ben Ortiz
9. Norma Gutierrez

Technical Advisors to Subcommittee B:

1. David Amaro
2. John Joly

Subcommittee C: Data Analysis and Recommendations

1. Luca Maurer
2. Ducson Nguyen
3. John Guttridge
4. Scott Garin
5. Karl Lewis

Technical Advisors to Subcommittee C:

1. Michael Stitley
2. Kim Moore
3. Alan Karasin
4. Greg Potter

Subcommittee D: Proposed Operating Budget

1. Amos Malone
2. Mar'Quon Frederick
3. Karen Yearwood

Technical Advisors to Subcommittee D:

1. Schelley Michell-Nunn

APPENDIX B:

CALL TYPE DEFINITIONS

Delineated Call Types: Example Sheet

Call Type	Example
<p>Traffic Offense</p>	<p>Calls related to violation of the motor vehicle code.</p> <p>Not coming to a full stop at a stop sign. Going through a red light. Suspicion of DUI or DUID</p>
<p>Property Check</p>	<p>Calls to check a property for signs of break in while the owners are not present.</p> <p>Calls to check a property for signs of break in while the owners are not present.</p> <p>Checking to make sure a business' doors and windows are locked and secure on night shift.</p> <p>Vacation property checks to make sure an unoccupied house has not been broken into.</p>
<p>Traffic Accident</p>	<p>Calls to investigate a motor vehicle collision</p> <p>Collision with no injuries and under \$1000 property damage.</p> <p>Collision with no injuries and over \$1000 property damage</p> <p>Collision with injuries.</p>
<p>Assisting another Gov. Resource</p>	<p>Calls relating to assisting another agency or resource.</p> <p>NYSP is serving a warrant in Ithaca.</p> <p>US Marshalls are looking for a fugitive.</p> <p>Health inspector is doing a restaurant inspection.</p>
<p>Traffic Complaint</p>	<p>Calls related to problem intersections or speeding.</p>

	<p>Reported speeding in school zone.</p> <p>Calls concerning safety at specific intersections</p>
Welfare Check	<p>Calls related to requests to check on the health or safety of a subject.</p> <p>Someone is sleeping on a bench in the Commons.</p> <p>An adult child hasn't heard from an elderly parent in several days.</p>
Parking Problem	<p>Calls related to illegal or hazardous parking.</p> <p>No parking zone.</p> <p>Too close to a fire hydrant</p>
House Alarm Triggers Police	<p>Calls relating to home alarms auto-triggering police.</p> <p>Audible alarm called in by a neighbor.</p> <p>Silent alarm called in by an alarm company.</p>
Theft	<p>Calls related to the unlawful taking of property from the possession of another entity.</p> <p>A theft in which both parties are still present.</p> <p>A theft in which there are no suspects and the value of the item stolen is less than \$1000</p>
Suspicious	<p>Calls related to reports of suspicious persons, vehicles, or circumstances.</p> <p>A call concerning a person acting strangely</p> <p>A call concerning a vehicle that doesn't belong in the neighborhood parked for an extended period of time.</p>
Harassment	<p>Calls related to reports of being the subject</p>

	<p>of ongoing unwanted contacts.</p> <p>A call in which both parties are still there.</p> <p>A call in which only the victim is on scene and the suspect is unknown.</p> <p>A call in which the victim is on scene and the suspect is known.</p>
Dispute	<p>Calls to investigate a dispute between individuals.</p> <p>A call in which the suspect is still on scene.</p> <p>A call in which the suspect is no longer on scene.</p>
Noise Complaint	<p>Calls relating to excessive or bothersome noise.</p> <p>A call concerning a neighbor's loud muffler</p> <p>A call concerning a loud late night party</p>
Property Complaint	<p>Calls relating to complaints regarding private property.</p> <p>A dispute between neighbors concerning a property line.</p>
Domestic	<p>Calls related to disturbances or assaults involving adult members of a domestic relationship.</p> <p>A call concerning a physical assault by a family member.</p> <p>A call concerning an argument by a family member.</p>
Animal Problem	<p>Calls related to animals that are either in danger or pose an immediate threat to the public.</p> <p>A call concerning a possible rabid fox</p> <p>A call concerning a family of geese in the road</p>

<p>Special Detail</p>	<p>Calls relating to special events and investigations, etc.</p> <p>Assigning officers to a community event such as a basketball game.</p> <p>A call concerning safely getting event attendees across a main street.</p>
<p>Trespassing</p>	<p>Calls to investigate a person unlawfully on another's property</p>
<p>911 Call Hangup</p>	<p>Calls relating to 9-1-1 calls that are terminated by the caller before they are answered, and 9-1-1 calls that are terminated by the caller after they are answered by a dispatcher.</p> <p>A person calls 911 and hangs up because they are being abused by a spouse and are afraid to be heard speaking to the police.</p> <p>A child is playing with the phone and accidentally calls 911</p>
<p>Criminal Mischief</p>	<p>Calls related to the destruction of property</p> <p>A call in which the suspect is still on scene.</p> <p>A call in which the suspect is not on scene.</p>
<p>Fraud</p>	<p>Calls related to the use of deceit to induce an entity to part with something of value or to surrender a legal right.</p> <p>A call in which a shopkeeper discovered a counterfeit bill when closing out the register.</p> <p>A call in which a customer is attempting to use a stolen credit card and is still in the store.</p>
<p>Disorderly Conduct</p>	<p>Calls relating to public activity or behavior that's offensive or disruptive, and interrupts other people's ability to enjoy a public space.</p> <p>A call concerning loud patrons of a bar in the street at closing time.</p>

	A group of children playing basketball in the street
Warrant	<p>Calls related to court issued warrants.</p> <p>A call to check an address to see if a wanted person is there.</p>
Local Law	Calls relating to municipal code violations (e.g skateboarding on a city street, etc.)
Unclassified	<p>Calls that do not fit in any predetermined category</p> <p>A call in which a resident wants to speak to an officer concerning a topic that does not fit any of the predetermined categories.</p>
Civil Complaint	<p>Calls that relate to complaints not criminal in nature</p> <p>A call concerning money owed to an ex spouse.</p>
Burglary	<p>Calls related to the unlawful entry into a building or other structure with the intent to commit a theft. Includes residential and commercial burglaries.</p> <p>A call in which it is unknown if the suspect is still in the building.</p> <p>A call in which the suspect is not still on scene but is known to the victim.</p> <p>A call in which entry was gained however nothing is missing.</p>
Transport	<p>Calls related to police car needs for transport (e.g., scene of incident, transport suspects, etc.)</p> <p>A call in which a suspect in a crime needs to be transported to jail.</p>
Drugs	Calls related to illegal narcotics.

	<p>A call of a suspected house in which someone is selling narcotics</p> <p>A call in which someone is believed to be holding narcotics in their pocket.</p>
Escort	<p>Calls relating to police escorts.</p> <p>A call in which a funeral home wants an escort to the cemetery.</p>
Missing Person	<p>Calls relating to missing person reports.</p> <p>A call in which a person is missing under suspicious or questionable circumstances.</p>
Shots Fired	<p>Calls related to reports of hearing gunshots with no indication of a victim.</p>
Information	<p>Calls related to general inquiries</p>
Repossessed Vehicle	<p>Calls related to vehicles being repossessed</p>
Intoxication	<p>Calls related to intoxicated individual(s)</p>
Sex Offense	<p>Calls related to any sexual act directed against another person, without the consent of the victim, including instances where the victim is incapable of giving consent or reports of unlawful, non-forcible sexual intercourse.</p> <p>Calls in which the suspect is known to the victim but not present.</p> <p>Calls in which the suspect is unknown to the victim and present.</p>
Unsecured Premise	<p>Calls related to investigating a premise with an unsecured door or window</p> <p>A call in which a neighbor reports the neighbors door is ajar and the neighbors are at work.</p> <p>A call in which an officer finds a closed business has an unlocked door and it is unknown if entry has been gained.</p>

Assault	Calls related to the unlawful attack by one person upon another. Includes stabbings, shootings, and other types of assault.
Fireworks	Calls related to illegal, hazardous, or noisy fireworks. A call concerning children playing with fireworks in the Commons.
Weapons	Calls related to weapons, people being in the possession of or a found weapon.
Public Health Complaint	Calls related to a public health related event A call to provide public notifications or provide educational information (COVID-19 - Social Distancing complaints)
Child Abuse	Calls related to the act of willful harm to a child. Includes abandonment and neglect. A call in which a child is reportedly in a house with no heat in the winter. A call in which a child has been disciplined by spanking with a belt.
Robbery	Calls related to the taking or attempt to take anything of value from the control, custody, or care of another person by force or intimidation. A call of a bank robbery. A call in which a person's cell phone was taken by force.
Injured Person	Calls related to medical conditions or injuries which may or may not be the result of a crime or accident. A call in which a person has reportedly twisted an ankle. A call in which a person is having difficulty

	breathing.
Psychiatric	<p>Calls related to mental health</p> <p>A call in which a person is reportedly talking to themselves while walking through the Commons</p> <p>A call in which a person with a diagnosed mental health disease is calling for assistance.</p>
Bad Check	<p>Calls related to a person attempting to use a check with insufficient funds to cover the check.</p>
Recovered Vehicle	<p>Calls to investigate a vehicle reported stolen.</p> <p>A call in which a person finds their car that has previously been reported stolen.</p> <p>A call in which an officer through an investigation discovers a car previously reported stolen</p>
Animal Bites	<p>Calls related to an animal biting a person.</p> <p>A call in which a stray dog has reportedly bitten a PERSON.</p>
Personal Injury Accident	<p>Calls related to a vehicle collision in which someone is injured as a result</p>
Stabbing	<p>Calls related to a person being stabbed with an object. NOTE: Dispatch also uses the stabbing code for a shooting victim.</p>
911 Call with No One Talking	<p>Calls related to a 911 call and the line is open with no one speaking.</p> <p>A call in which a person in need of help calls 911 but can't talk because they are in fear of the person with them.</p> <p>A call in which a child accidentally calls 911</p>

	and walks away from their parents cell phone without hanging up or saying anything.
Bomb Threat	Calls related to a threat to bomb
Dead Body	<p>Calls relating to the scene of death; differs depending on whether medical attention or CSI (crime scene investigation) is needed.</p> <p>A call of a person who appears dead in a private or public place other than a medical facility or nursing home (unless suspicious circumstances are reported)</p> <p>A call in which a family member reports an expected death due to an illness.</p>
Overdose	Calls related to overdoses
EMS	<p>Calls related to assisting EMS units</p> <p>A call for a person having difficulty breathing in a neighborhood known to have had past violent crime.</p>
Unconscious	<p>Calls related to investigating the report of an unconscious person</p> <p>A call in which a person appears to be unconscious on a bench</p> <p>A person laying on the sidewalk with no signs of movement</p>
Service Call	Calls related to needs for police service.
Breathing Problem	Calls related to a person experiencing breathing problems.
Cardiac Arrest	Calls related to a person experiencing reported cardiac arrest.
Chest Pain	Calls related to a person experiencing chest pains.
Headache	Calls related to a person experiencing a headache.
Sick Person	Calls related to a person feeling sick.

Traumatic Injury	Calls related to reported injured person A call in which a forklift has driven off a loading dock and the driver is injured
Fire Outside	Calls related to a fire outdoors.
Hazmat	Calls related to Hazardous Materials
Vehicle Fire	Calls related to a fire involving a vehicle.

APPENDIX C:

MATRIX CONSULTING GROUP REPORT ON PATROL STAFFING AND DEPLOYMENT

Report on Patrol Staffing and Deployment

ITHACA, NEW YORK

FINAL

January 27, 2022

Table of Contents

Introduction and Executive Summary
.....

Patrol Workload Analysis
.....

Analysis of Patrol Resource Needs
.....

Self-Initiated Activity
.....

Shift Schedule Optimization Analysis
.....

Redesign of the Patrol Beat Structure
.....

1. Introduction

(1) Project Overview

Matrix Consulting Group was retained by Center for Policing Equity to conduct analysis of field services and staffing needs for the Ithaca Police Department. Our scope of work includes:

- **Comprehensive analysis of patrol workload**, examining service needs and workload throughout Ithaca.
- **Analysis of patrol staffing needs and call diversion opportunities**, focusing on the capacity of patrol units to both handle incoming workloads and be proactive in the field.
- **Study alternative deployment configurations**, including new shift schedules and allocations of personnel, as well as redesigning the patrol beat structure.

This draft document presents the analysis of these scope areas, including findings and recommendations. Further analysis in the study will examine alternative call response and other alternative service delivery alternatives.

(2) Key Findings

The comprehensive analysis of call data presents a clear picture of workload in 2019, the year focused on to examine patrol staffing and capacity, as well as over the entire five-year period for which data was received. This enabled us to accurately measure patrol workload in terms of both the number of incidents that patrol units responded to, as well as how much time was spent handling these calls.

Similarly, department personnel data provides a measure of the capacity to handle these workloads by examining how many hours staff are on duty after accounting for factors such as time spent on leave, training, and other categories that take officers out of the field.

In measuring patrol workload and comparing that workload against staff capacity to handle it, several findings are evident:

- Patrol handled 12,217 community-generated calls for service in 2019.

- The workload that community-generated calls for service create take up 41% of officers' net available time, leaving the remaining 59% for proactive use.
- A proactive (uncommitted) time level of 59% indicates that there is not only sufficient staffing to handle workloads, but also to have exceptional proactive capabilities.
- Based on this analysis, current staffing is sufficient to handle community-generated workloads and provide a high level of service.
- Over the past five years, there has not been consistent or meaningful growth in call for service workloads.
- Self-initiated activity, however, has diminished rapidly since 2018.
 - Officers are using less of their proactive (uncommitted) time to generate activity such as traffic stops and other proactive policing efforts.
 - Given the lack of significant increase in workload during that time period, it does not explain the decline in how officers use proactive time.
- The current beat structural is effective overall; however two of four beats have moderately unequal workload levels that can create different experiences for officers day-to-day in terms of their ability to be proactive and not be overloaded by call workloads.
- The current shift schedule is problematic from perspectives of both officer quality of life and efficiency in deploying staff against when workload is greatest:
 - A variable schedule of four-on, two-off does not give officers fixed workdays.
 - This configuration also only gives officers an average of about 2.3 days off per week, in contrast with 10 and 12-hour alternatives.
 - The schedule results in only 2,008 work hours per year, as opposed to 2,080 hours in a normal 40-hour workweek pattern.
 - Equal allocations of staff by shift result in a highly inefficient distribution of personnel against workload.

(3) Recommendations

The following recommendations are made in this report to address the issues identified through the analysis:

- **Maintain the current staffing level in patrol.**
- **As part of the collective bargaining process, implement either the 10-hour fixed workday schedule or the 12-hour Pitman schedule, allocating and deploying officers as outlined in the analysis.**
- **After a process of review and revision in consultation with the Ithaca Police Department and the community, adopt the alternative patrol beat structure in order to equalize workload and better facilitate community policing.**

2. Patrol Workload Analysis

The following sections provide analysis of patrol workload and other issues relating to the effectiveness of field services.

(1) CAD Analysis Methodology

Our project team has calculated the community-generated workload of the department by analyzing incident records in the computer aided dispatch (CAD) database, covering the entirety of calendar years 2016 through the end of 2020. Although the entire five-year span is used to analyze trends and examine comparability, the staffing analysis focuses on workload in 2019, due to the irregularity of 2020 data stemming from the impacts of the COVID-19 pandemic.

For incidents to be identified as community-generated calls for service and included in our analysis of patrol staffing and capacity to handle workload, each of the following conditions needed to be met:

- The incident must have been unique.
- The incident must have been first created in calendar year 2019.
- The incident must have involved at least one officer assigned to patrol, whether designated as car patrol or foot patrol, as identified by the individual unit codes of each response to the call.
- The incident must have been originally initiated by the community, as identified using the following methods:
 - The source of the call must correspond to a community-generated event. Thus, if the call source value is listed as either “Radio” or “Officer Report”, it is not counted as a community-generated event.
 - Additionally, the incident type of the event must have sufficiently corresponded to a community-generated event. Call types that could be identified with a high level of certainty as being self-initiated (e.g., “special detail”) are not counted as community-generated calls for service.
- There must have been no major irregularities or issues with the data recorded for the incident that would prevent sufficient analysis, such as having no unit code or lack of any time stamps.

After filtering through the data using the methodology outlined above, the remaining incidents represent the community-generated calls for service handled by IPD patrol units.

(2) Calls for Service by Hour and Weekday

The following table displays the total number of calls for service handled by patrol units by each hour and day of the week:

Calls for Service by Hour and Weekday

Hour	Sun	Mon	Tue	Wed	Thu	Fri	Sat	Total
12a	99	42	41	42	40	69	95	428
1am	91	40	42	45	40	61	93	412
2am	67	24	26	35	31	37	67	287
3am	36	17	19	23	25	29	28	177
4am	24	18	16	20	16	23	16	133
5am	20	16	17	21	19	24	18	135
6am	22	25	23	22	22	26	22	162
7am	25	30	25	43	34	44	36	237
8am	42	56	46	61	60	65	50	380
9am	69	86	70	83	64	69	79	520
10am	63	103	73	91	79	85	58	552
11am	72	98	83	97	79	95	102	626
12pm	90	97	80	76	91	108	91	633
1pm	83	91	94	101	80	110	96	655
2pm	85	115	120	119	121	148	105	813
3pm	88	122	116	127	151	126	130	860
4pm	104	143	146	133	143	130	113	912
5pm	84	125	123	156	113	130	94	825
6pm	76	109	102	98	94	109	91	679
7pm	80	99	89	78	74	107	94	621
8pm	63	84	97	76	71	78	78	547
9pm	75	68	70	74	75	87	99	548
10pm	67	80	66	67	85	92	94	551
11pm	55	55	66	56	81	101	110	524
Total	1,580	1,743	1,650	1,744	1,688	1,953	1,859	12,217

The chart demonstrates that, across all days of the week, call activity during the late night and early morning hours is minimal compared to the busier hours of the day – generally during the afternoon and early evening. This is particularly notable given the deployment schedule of the department, which assigns equal numbers of officers to all three shifts (days, swings, and nights) despite vastly different workload levels. The following chart summarizes call for service activity on an hourly basis across all days of the week:

Call for Service Activity by Hour

Call activity has a relatively even buildup and decline up to and trailing from the peak of 4:00PM. This is somewhat more pronounced than in other agencies, where there is often a longer-lasting ‘plateau’ of higher levels of call activity.

(3) Calls for Service by Month

The following table displays calls for service totals by month, showing seasonal variation as a percentage difference from the quarterly average:

Calls for Service by Month

Month	# of CFS	Seasonal +/-
Jan	783	
Feb	777	-17.8%
Mar	950	
Apr	974	
May	1,055	+0.9%
Jun	1,052	
Jul	1,076	
Aug	1,183	+14.2%

Sep	1,230	
Oct	1,143	
Nov	1,039	+2.7%
Dec	955	
Total	12,217	

Seasonal variation is significant in Ithaca, likely owing to influence of the cold winters experienced in Upstate New York. The variation in call generation due to this factor does not appear to be significantly moderated by the additional population in Ithaca during Fall through Spring as a result of Cornell University and Ithaca College being in regular session.

(4) Most Common Types of Calls for Service

The following table provides the ten most common incident categories of calls for service handled by patrol units over the last year, as well as the average call handling time (HT)¹ for each:

Most Common Call for Service Categories

Incident Type	# CFS	HT	12a	4a	8a	12p	4p	8p
ASSIST	1,224	29.7						
WELFARE CHECK	1,015	29.5						
PD ACCIDENT	919	37.5						
THEFT	760	45.6						
ALARM POLICE	732	12.8						
NOISE CMLNT	665	16.6						
SUSPICIOUS	637	25.8						
DISPUTE	633	36.4						
PARKING PROBLEM	596	19.5						
TRAFFIC CMLNT	532	18.6						

¹ Handling time is defined as the total time in which a patrol unit was assigned to an incident. It is calculated as the difference between the recorded time stamps the unit being dispatched and cleared from the incident.

All Other Types	4,504	39.6
Total	12,217	32.4

IPD uses relatively broad categories for CAD incident types, with the generic “ASSIST” category comprising 10% of all calls for service handled by the department.

It is worth noting that “PD ACCIDENT” refers to accidents that the department responds to, not accidents *involving* the police department.

Even so, there is a noticeable clustering of the top four incident categories – which together account for just under one third of all calls for service – in terms of when they are most likely to occur. Each peaks around the late afternoon and early evening hours, with their frequency rising and declining over the several hours preceding and following that period. Most of the other leading call categories, by contrast, peak in the evening and nighttime hours.

The department’s demand profile of high-volume, low-priority incidences is typical, with most police forces having similar trends. The significant workload incurred from some of these incident categories, which involve lower-priority, non-violent offenses, indicates that there is opportunity to divert some of these calls for service to alternative response. The next phase of the study will examine the feasibility of such options further, such as non-armed professionals, in addition to non-response report options (e.g., online reports and telephone reporting).

(5) Call for Service Response Time by Year

The following table displays call for service statistics priority level, showing the median (middle value) response time² and distribution of calls by response time for each category:

² Response time is defined in this report as the duration between the call creation timestamp and the arrival time stamp for the first patrol officer on the scene.

Call for Service Response Time by Priority Level

Priority Level	# CFS	% of CFS	Median RT	RT Distribution
				20 40 60
2016	12,460	21%	10.0	
2017	12,493	21%	9.8	
2018	11,717	19%	10.2	
2019	12,217	20%	10.5	
2020	11,789	19%	12.0	

In 2019, response time performance was exceptional, with 85% of all calls for service – regardless of severity – answered within 30 minutes. 97% of all calls were answered within an hour. It is important to stress that the computer-aided dispatch data received by the project team did not contain priority level information. Thus, this analysis is not able to break response times down by priority, which generally works as a proxy for call severity.

Nonetheless, a median response time of 10.5 minutes for *all* calls for service is extraordinarily low, and could indicate – but does not necessarily prove – that current staffing allows for the capacity to handle community-generated workloads.

3. Analysis of Patrol Resource Needs

Analysis of the community-generated workload handled by patrol units is at the core of analyzing field staffing needs. Developing an understanding of where, when, and what types of calls are received provides a detailed account of the service needs of the community, and by measuring the time used in responding and handling these calls, the staffing requirements for meeting the community's service needs can then be determined.

To provide a high level of service, it is not enough for patrol units to function as call responders. Instead, officers must have sufficient time outside of community-driven workload to proactively address community issues, conduct problem-oriented policing, and perform other self-directed engagement activities within the community. As a result, patrol staffing needs are calculated not only from a standpoint of the capacity of current resources to handle workloads, but also their ability to provide a certain level of service beyond responding to calls.

With this focus in mind, the following sections examine process used by the project team to determine the patrol resource needs of the Ithaca Police Department based on current workloads, staff availability, and service level objectives.

(1) Overview of the Resource Needs Analysis

An objective and accurate assessment of patrol staffing requires analysis of the following three factors:

- i. The number of community-generated workload hours handled by patrol.
- ii. The total number of hours that patrol is on-duty and able to handle those workloads, based on current staffing numbers and net availability factors (e.g., leave, administrative time, etc.).
- iii. The remaining amount of time that patrol has to be proactive, which can also be referred to as "uncommitted" time.

This study defines the result of this process as, **patrol proactivity**, or the percentage of patrol officers' time in which they are *available and on-duty* that is *not* spent responding to community-generated calls for service. This calculation can also be expressed visually as an equation:

$$\frac{\text{Total Net Available Hours} - \text{Total CFS Workload Hours}}{\text{Total Net Available Hours}} = \% \text{ Proactivity}$$

The result of this equation is the overall level of proactivity in patrol, which in turn provides a model for the ability of patrol units to be proactive given current resources and community-generated workloads. There are some qualifications to this, which include the following:

- Optimal proactivity levels are a generalized target, and a single percentage should be applied to every agency. The actual needs of an individual department vary based on a number of factors, including:
 - Other resources the department has to proactively engage with the community and address issues, such as a dedicated proactive unit.
 - Community expectations and ability to support a certain level of service.
 - Whether fluctuations in the workload levels throughout the day require additional or fewer resources to be staffed to provide adequate coverage.
- Sufficient proactivity at an overall level does not guarantee, based on workload patterns, and deployment schedules, that resources are sufficient throughout all times of the day and week.

Overall, to provide effective patrol services and handle community-generated workload, IPD should generally target an overall proactivity level of at least 40-45% as an effective benchmark of patrol coverage. Agencies below this number typically lack the resources to avoid issues caused by resource shortages, such as frequently experiencing queues of calls that lead to longer response times, particularly for lower-priority calls for service. An important qualifier is that even agencies above this number can have inefficient deployment schedules that do not staff high-activity periods of the day with sufficient resources, thus resulting in the same effects on response times as if staffing as a whole is adequate. Thus, **the overall proactivity target of 40-45% should be thought of as a benchmark for the potential to provide effective levels of service** – to avoid both longer response times to lower-priority calls for service, as well as to be able to have the time available to be proactive outside of responding to calls.

(2) Patrol Unit Staffing and Net Availability

The Ithaca Police Department follows an 8.25-hour shift configuration that assigns personnel to workday sets of 4 days on, followed by 2 days off. As a 6-day rotation, the workdays are not fixed to days of week, and are instead constantly rotating forward.

The 24³ officers in patrol and their supervisors are assigned to one of three shifts: Day (2245–0700), Swing (1500–2315), or night (0700–1515). Officers on a platoon are assigned to a specific sergeant who is responsible for direct field supervision on shared workdays and for completing regular performance evaluations.

Given patrol staffing allocations, net availability calculations can provide a realistic picture of how staffing translates to active on-duty hours. Out of the 2,008 hours per year that officers are scheduled to work in a year (excluding overtime), a large percentage is not actually spent on-duty and available in the field.

As a result, it is critical to understand the amount of time that officers are on leave – including vacation, sick, injury, military, or any other type of leave – as well as any hours dedicated to on-duty court or training time, and all time spent on administrative tasks such as attending shift briefings. The impact of each of these factors is determined through a combination of calculations made from IPD data and estimates based on the experience of the project team, which are then subtracted from the base number of annual work hours per position. The result represents the total **net available hours** of patrol officers, or the time in which they are on-duty and available to complete workloads and other activities in the field:

The table below outlines this process in detail, outlining how each contributing factor is calculated:

Factors Used to Calculate Patrol Net Availability

³ Filled positions only. Numbers do not include trainees, those in the academy, or officers on long-term disability leave.

Work Hours Per Year

The total number of scheduled work hours for patrol officers, without factoring in leave, training, or anything else that takes officers away from normal on-duty work. This factor forms the base number from which other availability factors are subtracted from.

Base number: 2,008 scheduled work hours per year

Total Leave Hours (subtracted from total work hours per year)

Includes all types of leave, as well as injuries and military leave – anything that would cause officers that are normally scheduled to work on a specific day to instead not be on duty. As a result, this category excludes on-duty training, administrative time, and on-duty court time.

Calculated from IPD data: 391 hours of leave per year

On-Duty Court Time (subtracted from total work hours per year)

The total number of hours that each officer spends per year attending court while on duty, including transit time. Court attendance while on overtime is not included in the figure.

Without any data recording on-duty court time specifically for patrol officers, the number of hours is estimated based on the experience of the project team.

Estimated: 20 hours of on-duty court time per year

On-Duty Training Time (subtracted from total work hours per year)

The total number of hours spent per year in training that are completed while on-duty and not on overtime. This number based using watch sheet data for 2019 to estimate the training hours that would have been conducted on regular time, as opposed to overtime. If training is completed on overtime, it does not necessarily take away from the number of regular work hours an officer works in a pay period, and thus is not relevant to this analysis. However, data systems rarely designate which training is conducted on regular time versus overtime.

Estimated/calculated from IPD data: 139 hours of on-duty training time per year

Administrative Time (subtracted from total work hours per year)

The total number of hours per year spent completing administrative tasks while on-duty, including briefing, meal breaks, and various other activities.

The number is calculated as an estimate by multiplying 60⁴ minutes of time per shift times the number of shifts actually worked by officers in a year after factoring out the shifts that are not worked as a result of leave being taken.

Estimated: 196 hours of administrative time per year

Total Net Available Hours

After subtracting the previous factors from the total work hours per year, the remaining hours comprise the total *net available hours* for officers – the time in which they are available to work after accounting for all leave, on-duty training, court, and administrative time. Net availability can also be expressed as a percentage of the base number of work hours per year.

Calculated by subtracting the previously listed factors from the base number:

⁴ Typically, 60 minutes are assumed for shifts from 8-9 hours in length, and 90 minutes per shift for longer patrol shifts.

1,261 net available hours per officer

The following table and chart summarize this calculation process, displaying how each net availability factor contributes to the overall net availability of patrol officers:

Calculation of Patrol Unit Net Availability

Base Annual Work Hours		2,008
Total Leave Hours	-	391
On-Duty Training Hours	-	139
On-Duty Court Time Hours	-	20
Administrative Hours	-	196
.....		
Net Available Hours Per Officer	=	1,261
<i>Number of Officer Positions</i>	×	24
Total Net Available Hours	=	30,274

Overall, the 24 filled officer positions combine for 30,274 net available hours per year, representing the total time in which they are on duty and able to respond to community-generated incidents and be proactive.

(3) Overview of Call for Service Workload Factors

The previous chapter of the report examined various trends in patrol workload, including variations by time of day and of week, common incident types, as well as a number of

other methods. This section advances this analysis, detailing the full extent of the resource demands that these incidents create for responding patrol personnel.

Each call for service represents a certain amount of workload, much of which is not captured within the handling time of the primary unit. Some of these factors can be calculated directly from data provided by the department, while others must be estimated due to limitations in their measurability.

The following table outlines the factors that must be considered in order to capture the full scope of community-generated workload, and provides an explanation of the process used to calculate each factor:

Factors Used to Calculate Total Patrol Workload

Number of Community-Generated Calls for Service

Data obtained from an export of CAD data covering a period of an entire year that has been analyzed and filtered in order to determine the number and characteristics of all community-generated activity handled by patrol officers.

The calculation process used to develop this number has been summarized in previous sections.

*Calculated from IPD data: **12,217 community-generated calls for service***

Primary Unit Handling Time

The time used by the primary unit to handle a community-generated call for service, including time spent traveling to the scene of the incident and the duration of on-scene time. For each incident, this number is calculated as the difference between 'call cleared' time stamp and the 'unit dispatched' time stamp.

In the experience of the project team, the average handling time is typically between 30 and 42 minutes in agencies where time spent writing reports and transporting/booking prisoners is *not* included within the recorded CAD data time stamps. At 32.3 minutes per call, IPD is somewhat on the lower end of most agencies, although not an outlier by any means.

*Calculated from IPD data: **32.3 minutes of handling time per call for service***

Number of Backup Unit Responses

The total number of backup unit responses to community-generated calls for service. This number often varies based on the severity of the call, as well as the geographical density of the area being served.

This number can also be expressed as the *rate* of backup unit responses to calls for service, and is inclusive of any additional backup units beyond the first.

*Calculated from IPD data: **0.55 backup units per call for service***

Backup Unit Handling Time (multiplied by the rate)

The handling time for backup units responding to calls for service is calculated using the same process that was used for primary units, representing the time from the unit being dispatched to the unit clearing the call.

*Calculated from IPD data: **24.7 minutes of handling time per backup unit***

Number of Reports Written

The total number of reports and other assignments relating to calls for service that have been completed by patrol units, estimated at one report written for every three calls for service. This includes any supporting work completed by backup units. *In this case, the number has been estimated based on the experience of the project team. This was done for several reasons, as explained below:*

The project team requested a dataset showing written reports and their incident numbers; however, this dataset was not available or possible to produce with IPD resources.

As a backup methodology, the CAD/RMS data provided by the department includes a call clear field with a disposition added, which can in some cases be used to estimate report writing. There are four options, each of which repeating for all backup units on the call:

- BLANK CLEARANCE CODE (3)
- NO REPORT NEEDED (2,381)
- REPORT TO FOLLOW (9,540)
- TRANSFERRED TO OTHER AGENCY (1)

9,540 out of 12,217 community-generated calls for service had the disposition value of “REPORT TO FOLLOW” listed in that field. At 0.78 reports per call for service, this would represent an unrealistically high report writing rate. The degree to which it is an outlier is also relevant – the vast majority of agencies fall within a report writing rate of 0.25 to 0.35. At 0.78, IPD would be more than double. Consequently, it must be assumed that the disposition values for “REPORT TO FOLLOW” correspond with some type of reporting required in CAD/RMS upon clearing, given the type of incident it corresponds to. For instance, 81% of calls under the category 911 Hang Up are listed with the “REPORT TO FOLLOW” disposition code. In reality, reporting requirements for such a call type would not likely be significant.

Given these considerations, a normative estimate was used that is at the conservative (higher) end for communities the size of Ithaca, at 1 report for every 3 community-generated calls for service.

Estimated: 0.33 reports written per call for service

Report Writing Time (multiplied by the report writing rate)

The average amount of time it takes to complete a report or other assignment in relation to a call for service. Without any data detailing this specifically, report writing time must be estimated based on the experience of the project team. It is assumed that 45 minutes are spent per written report, including the time spent by backup units on supporting work assignments.

Estimated: 45 minutes per report

Total Workload Per Call for Service

The total time involved in handling a community-generated call for service, including the factors calculated for primary and backup unit handling time, reporting writing time, and jail transport/booking time.

The product of multiplying this value by the calls for service total at each hour and day of the week is the number of hours of community-generated workload handled by patrol units – equating to approximately 12,398 total hours in 2019.

Calculated from previously listed factors: 60.9 total minutes of workload per call for service

Each of the factors summarized in this section contribute to the overall picture of patrol workload – the total number of hours required for patrol units to handle community-generated calls for service, including primary and backup unit handling times, report writing time, and jail transport time.

These factors are summarized in the following table:

Summary of CFS Workload Factors

Total Calls for Service	12,217] 53%
Avg. Primary Unit Handling Time	32.3 min.	
Backup Units Per CFS	0.55] 22%
Avg. Backup Unit Handling Time	24.7 min.	

Reports Written Per CFS	0.33	} 25%
Time Per Report	45.0 min.	
<hr/>		
Avg. Workload Per Call	60.9 min.	
Total Workload	12,398 hrs.	

Overall, each call represents an average workload of 60.9 minutes, including all time spent by the primary unit handling the call, the time spent by any backup units attached to the call, as well as any reports or other assignments completed in relation to the incident.

(4) Calculation of Overall Patrol Proactivity

Using the results of the analysis of both patrol workloads and staff availability, it is now possible to determine the remaining time in which patrol units can function proactively. The result can then function as a barometer from which to gauge the capacity of current resources to handle call workload demands, given objectives for meeting a certain service level.

The following table shows the calculation process used by the project team to determine overall proactivity levels, representing the percentage of time that patrol officers have available outside of handling community-generated workloads:

Calculation of Overall Patrol Proactivity

Total Patrol Net Available Hours		30,274
Total Patrol Workload Hours	-	12,398
Resulting # of Uncommitted Hours	=	17,876
<hr/>		
Divided by Total Net Available Hours	÷	30,274
Overall Proactive Time Level	=	59.0%

Overall, 59.0% of on-duty time is available to be proactive – well above the targeted threshold of 40-45% as a base. This indicated that IPD has not only sufficient capacity to handle community-generated workloads, but also to provide exceptional proactive policing.

The following chart shows this analysis at a more detailed level, providing proactivity levels in four-hour blocks throughout the week:

Proactivity by Hour and Weekday

	Sun	Mon	Tue	Wed	Thu	Fri	Sat	Overall
2am–6am	76%	78%	85%	74%	79%	81%	73%	78%
6am–10am	81%	75%	79%	73%	70%	73%	71%	75%
10am–2pm	49%	50%	48%	41%	52%	39%	51%	47%
2pm–6pm	55%	36%	38%	34%	35%	38%	44%	40%
6pm–10pm	60%	48%	57%	58%	56%	46%	47%	53%
10pm–2am	56%	60%	68%	68%	66%	60%	56%	62%
Overall	63%	57%	62%	58%	60%	56%	57%	59%

The consistency in proactive time capabilities is highly evident. The chart's color scale ranges from white to gray to green, fully reaching the end of the scale at 40% – indicating that proactive time is not only sufficient to handle workload on a consistent basis, but to provide exceptional levels of proactive service as well. In IPD's case, virtually every four-hour block reaches this threshold, even during the daytime hours when workload is highest. A few blocks narrowly reach this level, falling just short at 38-39%, which remains a high level of proactive policing for peak activity hours.

Consequently, it can be strongly concluded from the results of this analysis that current staffing in patrol meets the demands of workload and provides for ample time to be proactive.

(5) Patrol Staffing Levels Required to Meet Service Level Objectives

Given the results of the workload and availability analysis, staffing levels can be determined based on achieving a certain target for proactive time. Prior to this, however, there are several considerations that must be made that provide context to staffing requirements.

(5.1) Adjusting for the Impact of Turnover

For staffing targets to be grounded in the long-term reality of a workforce, is important to consider the number of vacancies that currently exist, as well as the rate of turnover. An agency will never be fully staffed, as there will always be vacancies occurring as a result of retirement, termination, and other factors. When these events occur, it takes a significant amount of time to recruit a new position, complete the hiring process, run an academy, and complete the FTO program before the individual becomes an on-duty officer. Given this consideration, agencies must always hire above the number needed to provide a targeted level of service.

The amount of 'buffer' that an agency requires should be based on the historical rate of attrition within patrol. Attrition can take many forms – if it is assumed that the majority of vacancies are carried in patrol staffing, a vacancy at the officer level in any other area of the organization would consequently remove one officer from regular patrol duties. Likewise, promotions would have the same effect, in that they create an open position slot in patrol. Not included, however, are positions that become vacant while the individual is still in the academy or FTO program, and they are not counted in our analysis as being part of 'actual' patrol staffing.

Given these considerations, **an additional 5% *authorized* (budgeted) positions should be added on top of the actual number currently filled (actual) positions in order to account for turnover** while maintaining the ability to meet the targeted proactivity level. The resulting figure can then be rounded to the nearest whole number, assuming that positions cannot be added fractionally. It is worth noting that the number of officers needed without turnover is fractional, as it is an intermediate step in the calculation process.

(5.2) Additional Considerations

The overall patrol proactivity level should function as a barometer of potential resource capacity to handle workloads and be proactive, and different levels have varying implications for the effectiveness of an agency in being proactive at addressing public safety issues and engaging with the community. These considerations can be summarized as follows:

- In agencies that are severely understaffed in patrol functions, and consequently have very little proactive time (**under 35% overall**), calls will frequently be held in queues as resources cannot handle the incoming workload. Proactivity also falls behind, as officers in such agencies would have little to no time to be proactive.

When gaps do occur, the high rate of workload relative to available time can have a limiting factor on self-initiated generation, as officers avoid being tied up on a proactive activity such as a traffic stop in case priority calls for service occur.

- As proactivity increases (**around 35-45% overall**), the generation of self-initiated activity rapidly increases, as officers are able to deal with already-identified opportunities to proactively address issues in the community, some of which are prioritized and project-oriented engagements.
- Beyond those levels (**at least 45-50% overall**, depending on scheduling and deployment efficiency), the time available for proactive policing increases further, and opportunities to engage in self-initiated activity expand. However, the number of priority needs for self-initiated activity (e.g., addressing narcotics activity) also decrease. Despite this, no limitations exist on the time that can be spent on activities such as saturation/directed patrols and community engagement activities.

(5.3) Calculation of Staffing Needs

Staffing calculations provide the culmination of the proactive time analysis, using the proactive time target to determine how much time must be staffed for relative to workload such that the proactive time target equals the target on an overall basis. Based on number of net available hours per officer, the number of authorized positions needed to achieve the requisite number of hours staffed can be calculated, with a buffer for turnover added thereafter.

It is important to note that the calculations do not take into account the effect of cumulative vacancies that are not able to be replaced and filled over a *multi-year* period. This is intended, as budgeting for additional staff does not fix recruiting, hiring, or training issues. Instead, the turnover factor is designed to provide a balance against the rate of attrition, assuming new recruits can complete the academy and FTO program each year.

Nonetheless, the following table presents these calculations, showing the number of officers needed to maintain the current level of proactive time, at 59% overall:

Staffing Needs @ 59% Proactive Time Target

Total Workload Hours	12,398
Proactivity Target	59%

<i>Staffed Hours Needed</i>	=	30,239
Net Available Hours Per Officer	÷	1,261
Turnover Factor	+	5%
Patrol Officer FTEs Needed	=	26

This process can be repeated for any proactive time target, as shown in the next table:

Officers Needed by Proactive Time Level

% Proac. Time	# of Ofc.	# to Raise +1%
55%	23	
56%	24	+1
57%	25	+1
58%	25	+0
59%	26	+1
60%	26	+0
61%	27	+1
62%	28	+1
63%	28	+0
64%	29	+1
65%	30	+1
66%	31	+1
67%	32	+1
68%	33	+1
69%	34	+1
70%	35	+1

The findings from this analysis are particularly notable given that as the proactivity level increases, the number of officers needed to raise it further grows exponentially. Whereas at low proactivity levels, adding several more officers would have a significant effect on overall proactivity, doing so at high proactivity levels (>60%) would have very little effect if the proactivity level was around 60 or 60%.

The following chart provides a visualization of this issue, showing the diminishing returns of adding additional officers on patrol proactivity and service levels:

The gray vertical bar indicates the current level of patrol proactivity.

The steeper the curve, the less returns are gained from investing additional resources in patrol. This chart demonstrates that, generally, 40-50% represents the level that should be aimed for, and that improvements to service level experience diminishing returns beyond that point. Below 40%, however, adding staff to patrol achieves significant effects on proactive time with comparatively minimal financial expenditures.

Recommendation:

Maintain the current staffing level in patrol.

4. Self-Initiated Activity

The analysis to this point has focused exclusively on the reactive portion of patrol workload, consisting of community-generated calls for service and related work. In the remaining available time, which is referred to in this report as proactive time, officers are able to proactively address public safety issues through targeted enforcement, saturation patrol, community engagement, problem-oriented policing projects, and other activity. Equally critical to the question of how much proactive time is available is how and whether it is used in this manner.

There are some limitations on how the use of proactive time is measured, however. Not all proactive policing efforts are tracked in CAD data, such as some informal area checks, saturation patrol, miscellaneous field contacts, and other types of activity. However, many categories of officer-initiated activity are nonetheless recorded, such as traffic stops, predictive policing efforts, and follow-up investigations.

Nonetheless, CAD data does provide for a significant portion of officer-initiated activity to be analyzed to examine how uncommitted time is for proactive policing.

(4.1) Self-Initiated Activity by Hour and Weekday

Self-initiated activity displays different hourly trends compared to community-generated calls for service, as illustrated in the following table:

Self-Initiated Incidents by Hour and Weekday

Hour	Sun	Mon	Tue	Wed	Thu	Fri	Sat	Total
12am	66	66	45	72	66	79	82	476
1am	31	37	44	48	43	42	61	306
2am	52	27	28	28	23	39	33	230
3am	21	13	23	19	17	29	18	140
4am	17	9	9	16	11	14	20	96
5am	8	9	9	7	10	15	8	66
6am	10	7	7	9	11	5	4	53
7am	6	9	3	6	3	8	9	44
8am	13	12	19	14	9	28	16	111
9am	23	25	20	28	15	20	23	154
10am	20	34	23	25	19	26	29	176
11am	32	18	24	18	18	17	30	157

12pm	25	23	23	14	16	31	12	144
1pm	15	13	18	17	19	31	26	139
2pm	31	27	23	18	14	14	19	146
3pm	11	16	19	11	13	13	25	108
4pm	31	32	29	25	29	41	26	213
5pm	36	23	18	23	25	29	28	182
6pm	35	31	27	28	24	25	29	199
7pm	28	18	15	15	19	20	23	138
8pm	14	10	27	23	20	16	24	134
9pm	12	26	14	19	24	26	29	150
10pm	13	18	13	15	15	20	12	106
11pm	45	35	28	34	33	43	38	256
Total	595	538	508	532	496	631	624	3,924

Interestingly, self-initiated activity peaks sharply from around 12:00AM to 1:00AM, with an hour or so on either side having comparable levels of activity. At these times, vastly more proactive policing is conducted than during other hours. Possible explanations could include it being immediately after shift change, as well as the high levels of proactive time that exist during those hours.

(4.2) Self-Initiated Activity by Category

Unlike community-generated calls for service, self-initiated activity is typically more concentrated over a few call types:

Most Common Categories of Self-Initiated Activity

PROPERTY CMLPNT	76	13.7	
TRAFFIC CMLPNT	59	35.9	
WELFARE CHECK	54	19.8	
All Other Types	405	19.6	
Total	3,924	21.6	

“Traffic Offense” incidents (i.e., traffic stops) account for about 39% of all self-initiated incidents, averaging just over 13 minutes per event. Beyond the top three or four categories, activity is relatively sparse. Proactive ‘suspicious’ events (e.g., suspicious vehicle, person, etc. – common categories of police self-initiated activity in most agencies) occur only 97 times over the course of calendar year 2019.

(4.3) Total Utilization

Overall, the rate at which self-initiated activity is conducted is not high relative to the amount of proactive time available. This can be shown by examining total utilization – the percentage of officers’ net available time that is spent handling both community-generated calls for service and self-initiated activity:

Total Utilization of Patrol Officers on Calls for Service and Self-Initiated Activity

	Sun	Mon	Tue	Wed	Thu	Fri	Sat	Overall
2am–6am	30%	24%	20%	28%	24%	21%	36%	26%
6am–10am	23%	28%	21%	30%	31%	34%	31%	28%
10am–2pm	54%	52%	53%	61%	50%	64%	49%	55%
2pm–6pm	53%	67%	66%	69%	67%	66%	58%	63%
6pm–10pm	44%	53%	46%	44%	47%	57%	57%	50%
10pm–2am	29%	47%	41%	36%	40%	38%	40%	45%
Overall	42%	45%	41%	45%	43%	48%	47%	45%

Outside of the mid-afternoon to early evening hours, net available time is not highly utilized on either calls for service or officer-initiated activity. Of course, it could be argued that there are only so many opportunities to be proactive. Certain services, such as security checks, however, are highly repeatable in comparison to other types of activity.

Moreover, any proactive policing efforts should be balanced with their potential effects on community trust, a principle echoed in the report on the President’s Task Force on 21st Century Policing. Too many vehicle stops in certain areas, for instance, can create long-lasting effects on relationships with those communities, creating perceptions that may not be aligned with the original intentions of the activity. Thus, it is not necessarily the goal for officers to be completely utilized, or for a certain threshold of self-initiated activity to be met.

(4.3) Historical Self-Initiated Activity Trends

To investigate this further, the CAD analysis can be extended for the entire five-year period for which data was received in order to gauge trends in activity levels, as was provided earlier in the analysis for community-generated calls for service.

The following table presents the findings of this analysis:

Five-Year Self-Initiated Incident Trends

Year	# Self-Initiated Incidents	+/- Change
2016	5,184	N/A
2017	5,723	+10%
2018	5,610	-2%
2019	3,924	-30%
2020	3,163	-19%

There is a clear drop-off in activity after 2018, with 2019 – the last pre-pandemic year – having significantly less activity than the year before. The chart below puts this into context, showing the year-by-year changes in both community-generated calls for service and officer-initiated activity:

Declining Self-Initiated Incidents Versus Community-Generated Workload

The decline in officer-initiated activity does not correlate with an increase in workload, and consequently does not appear to be indicative of a lack of staffing capacity to be proactive.

5. Shift Schedule Optimization Analysis

The following analysis examines the effectiveness of the current shift schedule and analyzes the feasibility and effects of implementing alternative schedules. This analysis is both quantitative and qualitative, balancing the objective of optimizing resource deployment with the need to have this schedule be broadly popular with officers and provide for quality of life concerns to be addressed.

The latter point is critical in part because work hours, shift length, and workday patterns are set by the collectively bargained labor agreement made with the Ithaca Police Benevolent Association (PBA), which covers all sworn personnel. **Changes to work hours or any schedule characteristics must be made through the collective bargaining process**, and cannot be made unilaterally by the department's management.

This analysis is intended to provide the analytical framework for any discussion on shift schedules, outlining a number of alternatives that most effectively deploy officers to achieve high levels of service, as well as to provide for officer quality of life considerations to be facilitated.

1. Current Shift Configuration: 8.25-Hour Schedule (Rotating Workdays)

(1.1) Overview

The current shift schedule, which has been in place since 2005, is an 8.25-hour shift, with officers working in a pattern of 4 days on, followed by 2 days off. Because this cycle repeats every 6 days, it is forward-rotating – officers do not have fixed workdays. If an officer worked Monday to Thursday in one calendar week, the next would be Sunday to Wednesday. Start times are schedule to provide for slight overlaps between shifts, as shown below:

Current 8.25-Hour Shift Configuration

Team	Start	End	# Officers
Night	2245	0700	8
Day	0700	1515	8
Swing	1500	2315	8

Working 8.25 hours in a 4 on, 2 off pattern equates to 38.6 work hours per calendar week, or approximately 2,008 scheduled work hours over an entire year. **This is a highly**

unusual configuration, with the vast majority of departments following a 40-hour workweek that equates to 2,080 hours annually. The weekly average of 38.6 hours results in fewer hours worked per officer while also likely not reducing costs overall.

An advantage of the forward-rotating workday schedule is that it gives all officers some weekend days off. This typically a leading consideration for officers, particularly among newer or younger officers that value an active social life and that lack the seniority to bid for workday sets that provide for weekend days off.

However, on balance with other concerns, the 4-on, 2 off pattern does not necessarily provide for ideal officer quality of life. Forward-rotating workday patterns such as this can often be unpopular due to their disruption on domestic and social life. It can be more difficult to schedule child care and align life outside of work with a domestic partner. Organized activities such as sports or clubs generally have fixed days when they occur, making regular attendance impossible in a rotating workday pattern. Off-duty work is also much more difficult to schedule in a rotating workday pattern – a critical issue for officers in many departments, particularly those that work 10 or 12-hour shifts and have more consecutive off days. In essence, a constantly changing set of workdays can, for some, misalign and isolate officers from life outside of work that generally follows a regular weekly pattern.

Consequently, despite this being a schedule that was and is collectively bargained for – and one that has been in place for more than 15 years – **the lack of fixed workdays must be considered a key weakness of the current schedule.**

(1.2) Performance and Efficiency of the Current Schedule

The following chart provides the proactive time levels, a measure of capacity and service level, achieved by the current shift schedule in four-hour blocks. As values drop below 40%, the color of the cell shifts closer to gray:

	Sun	Mon	Tue	Wed	Thu	Fri	Sat	Overall
2am–6am	76%	78%	85%	74%	79%	81%	73%	78%
6am–10am	81%	75%	79%	73%	70%	73%	71%	75%
10am–2pm	49%	50%	48%	41%	52%	39%	51%	47%
2pm–6pm	55%	36%	38%	34%	35%	38%	44%	40%
6pm–10pm	60%	48%	57%	58%	56%	46%	47%	53%
10pm–2am	56%	60%	68%	68%	66%	60%	56%	62%
Overall	63%	57%	62%	58%	60%	56%	57%	59%

Overall, the schedule clearly is able to accomplish high levels of proactive time throughout the day, dropping below 40% only during the afternoon and early evening, without decreasing below 34%.

The high proactive time levels do necessarily mean, however, that the schedule is achieving the results efficiently. At 59% proactive time on an overall basis, staffing is at such a high level relative to workload that even moderately inefficient schedules still accomplish deployment objectives.

While not the only aim of developing an optimized shift schedule, schedules should efficiently match staff deployments against periods when workload is greatest. In Ithaca, as explored in the patrol staffing analysis, the difference in workload levels between day and nighttime hours is exceptional. To this point, 7 times more calls for service are generated during the busiest daytime hour and the least busy nighttime hour:

Calls for Service Activity by Hour

Granted, it should not be inferred that 1/7th of the staff are needed at night – during those hours, staffing for officer safety and emergency response capability are paramount. The objective of filling beats in itself is important only so far as it allows for response time to be minimized. In a community the size of Ithaca, this is less likely to be an issue.

Using workload and net availability data, the project team calculated the number of staff that would need to be deployed in order to achieve a proactive time level of 50% – which would represent an extraordinarily high level of service during the daytime hours. While not the only consideration in scheduling, it provides a benchmark against which to gauge how the current schedule used by the Ithaca Police Department allocates personnel against workload demands.

Deployed Staff Required for 50% Hourly Proactive Time vs Expected Number Deployed⁵

With IPD using an equal deployment of 8 officers to each shift, the 4 officers expected at certain times (as opposed to 3) is the result of slight overlaps increasing the average slightly enough to be rounded up.

Nonetheless, the results show that, if 50% proactive time is targeted for at any given hour – an exceptional level of service – too few officers are deployed during the afternoon and early evening hours, with more officers deployed than needed during the nighttime and early morning hours.

2. Priorities for Alternative Schedule Creation

To be able to offer concrete advantages over the current schedule and ensure that they could realistically be adopted through the collective bargaining process, the following aims are central to the development of alternative schedules:

- Deploy officers efficiently based on workload patterns by hour and day in order to provide for consistently high levels of service.
- Provide for officer safety and emergency response capabilities to be maintained at all hours of the day.

⁵ The expected number deployed takes into consideration the number scheduled on any particular day and factors in net availability factors such as leave, training, etc. to develop the 'typical' scenario. This does not factor in the usage of overtime to fill positions or controls against officers taking time off, nor does it include sergeants in the counts.

- Prioritize and provide for officer quality of life by:
 - Using workday patterns that are fixed over a weekly or biweekly cycle.
 - Maximizing the number of officers that receive weekend days off.
 - Scheduling reasonable shift start and end times, particularly for night shift personnel.
- Ensure that alternative schedules are implementable and have the potential to be popular among officers, by using configurations that are analogous to schedules that are popular in other departments.

Effective schedules are able to balance these concerns, which are both qualitative and quantitative and qualitative in nature.

3. Alternative A: 10-Hour Schedule (Fixed Workdays, Adjusted Start Times)

The first alternative is a 10-hour shift in which officers work the same days each week in a four-on, three-off pattern. Such a configuration is extremely common throughout the country, given its ability to provide for overlap between shifts during high-activity periods, while also giving officers the same three days off each week. This results in a 40-hour workweek, totaling 2,080 hours per year.

In this configuration, officers are staggered across workday sets, spreading staff out as evenly as possible across the week. This avoids a critical issue in many departments' 10-hour schedules that assigns a shared overlap day where every officer is on duty. This is inherently inefficient, as any time in which an above average officers are deployed results in other times having a *below* average number of officers deployed. By doubling the officers on one specific day, this occurs in an extreme magnitude, having a noticeable effect on service levels on other days of the week.

Staggering officer workday sets to address this problem also achieves the benefit of giving officers more options and more ways to have at least one weekend day off, whereas most two-team approaches give half of officers the entire weekend and others no weekend days. However, a key weakness of the schedule that this creates is that officers are not working with the same sergeant each day they are on duty.

The following chart illustrates this schedule and the allocation of officers to each shift, with **darker-shaded cells** indicating a workday:

10-Hour Fixed Workday Schedule Configuration

Team	Start	End	Week 1							Week 2							# Officers

In total, 8 officers are assigned to the night shift, 8 officers on the day shift, and 8 officers on the swing shift – the same allocation that exists currently.

The following chart shows the proactive time levels achieved by this currently by hour and weekday:

10-Hour Shift Configuration Proactive Time Performance

	Sun	Mon	Tue	Wed	Thu	Fri	Sat	Overall
2am–6am	75%	78%	84%	66%	74%	75%	72%	75%
6am–10am	81%	75%	75%	72%	64%	72%	66%	73%
10am–2pm	63%	62%	52%	51%	55%	55%	57%	61%
2pm–6pm	74%	62%	55%	57%	53%	64%	64%	62%
6pm–10pm	61%	50%	47%	49%	46%	47%	49%	50%
10pm–2am	52%	53%	57%	54%	51%	49%	50%	52%
Overall	69%	64%	62%	59%	57%	61%	61%	62%

Clearly, the schedule outperforms the current schedule significantly, consistently providing for extraordinarily high levels of proactive time while still deploying sufficient officers during the night shift to maintain officer safety and emergency response capabilities:

Potential modifications to this schedule include shifting the start times of the night shift back to 2100 in order to end at 0700, allowing for the shift to facilitate a better circadian rhythm. In this scenario, the day shift would also begin at 0700. An overlap of 15 minutes on either side could also be planned for. No adjustments would be needed to the swing shift, which already has a sufficient overlap with the night shift.

4. Alternative B: 12-Hour Schedule (Pitman Configuration)

Taking a different approach, the second alternative schedule features a 12-hour shift using the popular 'Pitman' configuration, which uses a regularly repeating set of fixed workdays over a 2-week cycle. In this schedule, officers work a 2-on, 2-off, 3-on, 2-off, 2-on, and 3-off pattern.

The workday cycle equates to 84 hours biweekly, or 2,184 hours per year. Some departments pay all hours as regular time and specify the 84-hour biweekly work

periods in the labor agreement, thus bypassing the FLSA requirements for overtime. Others pay the time in excess of 80 biweekly hours as built-in overtime, resulting in 2,080 hours of regular time and 104 hours of scheduled overtime per year as part of the schedule.

With officers completing 7 shifts over a two-week period, the configuration allows for a high degree of simplicity to be achieved. There are just four shift teams and sets of workdays – one each for day and night shifts, working opposite sides of the week.

The following chart illustrates this, with workdays represented by **darker-shaded cells**:

12-Hour Pitman Schedule Configuration

Team	Start	End	Week 1							Week 2							# Officers
			S	M	T	W	Th	F	Sa	S	M	T	W	Th	F	Sa	
Day	0700	1900	■	■	■	■	■	■	■	■	■	■	■	■	■	■	7
	0700	1900	■	■	■	■	■	■	■	■	■	■	■	■	■	■	7
Night	1900	0700	■	■	■	■	■	■	■	■	■	■	■	■	■	■	5
	1900	0700	■	■	■	■	■	■	■	■	■	■	■	■	■	■	5

In the Pitman configuration, all officers get one weekend day off every week. If the workdays are often backwards by one day in the biweekly cycle shown in the chart, then all officers get both Saturday and Sunday off every other week. Virtually no other leading schedule configuration guarantees weekend days off to all officers regardless of seniority.

Another key benefit of 12-hour shift schedules is that they allow for officers for greater opportunity to work off-duty employment should they chose to. This can sometimes make transitioning away from 12-hour systems unpopular among a subset of officers once they are implemented.

The effects of the 12-hour Pitman schedule on proactive time are apparent, as shown in the following chart:

12-Hour Shift Configuration Proactive Time Performance

	Sun	Mon	Tue	Wed	Thu	Fri	Sat	Overall
2am–6am	76%	78%	85%	74%	80%	81%	73%	78%
6am–10am	86%	81%	84%	80%	78%	80%	78%	81%
10am–2pm	64%	64%	63%	59%	66%	57%	66%	63%
2pm–6pm	67%	52%	54%	51%	51%	54%	59%	55%
6pm–10pm	63%	53%	61%	62%	60%	50%	51%	58%
10pm–2am	54%	54%	64%	64%	62%	56%	51%	58%
Overall	69%	64%	68%	64%	66%	63%	63%	65%

No four-hour block falls below 50%, which places the 12-hour schedule slightly ahead of the 10-hour system in terms of efficiency and effectiveness. This is aided by the 84-hour biweekly period, which raises proactive time to 65% on an overall basis.

In spite of the positive characteristics of this schedule, the primary weakness of the schedule, is readily apparent – 12 hours is a relatively long shift in law enforcement work. Issues of fatigue and sleepiness have been attributed to 12-hour shifts by various studies, although it should also be noted that studies have found these effects for 8-hour shifts as well in comparison to 10-hour configurations.

In general, 12-hour shift configurations can be more popular and potentially cause less fatigue issues when staffing levels are adequate, or particularly, above that level. This is intuitive – if officers are going call to call for 12 hours, fatigue issues mount and be exacerbated as officers are held over at the end of a shift to handle a call or write a report. However, if officers are handling on average fewer calls per shift and have more time in between handling calls for service, then 12-hour shift configurations can be more palatable.

In Ithaca, officers have a high proactive time level of 59% of available time on an overall. This indicates that staffing levels are relatively high in comparison to workload, and consequently mean that officers often have ample time in between shifts to ward off some of the negative effects of a 12-hour shift system.

Potential modifications to the shift schedule include shifting the workday cycles back a day to guarantee a full weekend every other week for all officers, as well as adjustment of start times. It is critical, however, to have the night shift return as early as possible in order to maintain adequate circadian rhythm.

5. Conclusions

The current shift schedule is highly unusual, resulting in a forward-rotating work schedule without fixed workdays, while also guaranteeing fewer hours on duty per officer than virtually any other shift configuration. The 8.25-hour shift length, in itself becoming less common as agencies shift to 10 and 12-hour systems, is particularly misaligned given the department's high proactive time levels and consequently longer time for officers on average in between handling calls for service. In a scenario where the norm is for officers to be going from stacked call to stacked call for an entire shift without break, trading a shorter shift length for fewer days off per week or non-fixed workdays might be a reasonable trade. However, with an 8.25-hour shift worked in a 4-on, 2-off rotating pattern, **given the staffing levels and service needs of Ithaca, the current schedule neither maximizes efficiency nor officer quality of life.**

The 10 and 12-hour alternatives developed for this analysis provide for a balance of both qualitative and quantitative factors, offering improvements. Both have fixed sets of workdays, meaning that officers will work the same days every weekly or biweekly period.

Despite the advantages, both schedules represent a monumental change for officers, many of whom have worked this schedule for their entire careers. Furthermore, neither schedule is without its drawbacks and weaknesses. These must be considered within the context of the issues with the current schedule, as well as the relative advantages of each options. As any change to the shift schedule must be collectively bargained, officers will decide whether it makes sense for them – both professionally, as well as in their personal lives.

Recommendation:

As part of the collective bargaining process, implement either the 10-hour fixed workday schedule or the 12-hour Pitman schedule, allocating and deploying officers as outlined in the analysis.

6. Redesign of the Patrol Beat Structure

1. Objectives in Patrol Beat Redesign

The following subsections outline the priorities used in both assessing the current beat structure, as well as creating new beat areas.

(1.1) Patrol Workload Equalization:

Workload should be equalized across all beats in order to maintain proactive capabilities and meet service level mandates.

All beats should be created to have call for service totals that are within $\pm 20\%$ of the overall average. Exceptions can be made in areas that are geographically isolated and/or have significant response time issues, such as hilly terrain or significant distances that must be covered, which require fewer calls. In these cases, a lower call for service target should be used. However, no beat should exceed $\pm 40\%$ of the average – indicating extraordinarily uneven workload – even with these exceptions in mind.

Workload equalization ensure that patrol units in each area are able to respond to calls for service in a timely manner, and that these capabilities are distributed equitably across the city.

IPD staffing provides for the potential to consistently deploy 4 officers during daytime hours, and 3 officers at night, without using high levels of overtime. Given this, a maximum of four beats can be established – the same number that exist now.

Over a five-year period from 2016-2020, the patrol staffing analysis identified 56,949 calls for service that occurred within Ithaca's city boundaries⁶. Among the four beats, this averages out to 2,847 calls per year, or 14,237 calls per beat over the entire five-year period.

To stay within the benchmark range for workload equalization of $\pm 20\%$ the average call for service total, each beat must have between 11,390 and 17,085 calls for service over five years.

⁶ This excludes any responses to incidents outside of Ithaca, as well as calls for service that could not be geolocated, though these occurred at a relatively negligible rate.

The project team geolocated the calls for service that occurred within this period and counted the number that occurred within each beat in order to measure whether workload was adequately equalized among the patrol areas.

(1.2) Neighborhood Integrity

Neighborhoods and business districts should be kept together as much as possible in order to facilitate community policing.

By designing beats around entire areas and neighborhoods – rather than through them – the patrol officers assigned to that area are better able to become familiar with the community and its issues and concerns. From the perspective of the public, this can provide for the development of trust and one point of contact for specific neighborhoods. Some departments even publicize the patrol officer assigned to the area on their website, which can further this sense of geographic responsibility and accountability for community policing.

Consider an example in another municipality where a business district, highlighted in teal could either be split between a beat or kept within one:

Less Effective: *The split down the middle of an arterial road that functions as a focal point for the business district.*

More Effective: *The beat extends to both sides of the street, keeping the business district together.*

Differences in how these boundaries are drawn have real-world impacts in how community policing is coordinated, particularly when distinct areas have assigned points of contact within the police department.

These considerations must also be balanced with call equalization and geographic barriers, although the latter is almost always congruent with neighborhood integrity. Geographic barriers – even manmade barriers such as freeways – are prominent markers that divide and form our understanding of where one community ends and another begins.

(1.3) Logical Barriers and Transportation Routes

The road and transportation network within a beat structure should facilitate timely response times.

Beats should be designed with the local road network in mind, taking into account how features such as creeks or rivers, hills, and highways with limited access impact the ability of officers to travel from one side of the beat to the other in order to respond to a call for service.

Despite its small size of around six square miles, the geography of Ithaca is shaped by its numerous features such as waterways that provide for transportation barriers. Among them, the Cayuga Inlet and several creeks run through the heart of the city, with varying degrees of access across them. Where numerous connection points exist across these features, areas can be joined together in the same beat. Where this is not possible, the transportation barrier it creates could lead to higher response times.

In Ithaca, for example, the many crossings (highlighted in green) across this part of Six Mile Creek prevent any impacts to transportation. Further upstream to the east, by contrast, there are only a few crossings across the creek.

To the contrary, the hillside on the west side of the Cornell campus has only two access points – one at the southern terminus of University Ave, and the other at the northern terminus of Lake St. Traversing west to east can take an extra minute or two as a result of this impediment.

However, these considerations must also be balanced with competing priorities, such as neighborhood integrity and balance of workload. As a result, the degree to which transportation is affected must be weighed as well.

2. Assessment of the Current Beat Structure

Workload equalization the most quantifiable metric by which to evaluate how well a beat structure is able to provide the framework for community policing, by ensuring that no beats are too busy relative to others to be able to have sufficient – or at least equitable – levels of proactive time available. Calls for service over a five-year period (2016–2021) are used for the assessment, with the totals for each beat then compared against the average for all four beats.

The following map provides the five-year call for service totals by beat:

5YR Call for Service Totals by Beat (Current Beat Structure)

The hashed green areas represent officer foot beats, which overlap the car beat structure.

The four beats range from 9,821 calls (-31% below the average) to 18,050 calls (+27% above the average), with the other two remaining within around $\pm 5\%$ of the average. Compared to the benchmark established for patrol workload variation of $\pm 20\%$ from the average, beats 203 (northern) and 204 (eastern) exceed this threshold. However, no beats are more than $\pm 40\%$ of the average, which would indicate severely unequal workloads.

In other words, workload is somewhat even under the current beat structure. Officers assigned to 204 (eastern) would have a largely different day-to-day experience

compared to officers assigned to 203 (northern), assuming officers have primary responsibility for responding to calls that occur in their beat.

In terms of neighborhood integrity, a few of the principally identifiable neighborhoods include Downtown Ithaca – particularly its core, but also extending along State Street –the Cornell University campus, Collegetown, and the box store commercial district surrounding Elmira Rd that includes a Walmart Supercenter. Other neighborhoods include the industrial area along the Cayuga Inlet, the upsloping residential neighborhoods west of the inlet, and the single-family home neighborhoods north of Downtown.

For the most part, the current beat structure is able to keep each of these neighborhoods together. There are some exceptions, however.

In the greater Downtown area, a few blocks of what would generally be considered to be part of the same district are split from 203 (the downtown/northern beat) into 202 (western beat) and 204 (eastern beat), as shown in the following map:

- 1) On the western border, the area along State Street continues into another beat, separating those blocks from the main beat covering the State Street corridor.
- 2) The block between N Aurora St and E State St immediately east of the boundary contains several restaurants and bars that would be considered part of the Downtown area from the public's perspective.

For the most part, however, the current beat structure does an effective job of aligning communities and business districts to beat boundaries.

As discussed earlier, the issue of transportation routes and logical barriers is complex in that it depends greatly on the context of the surrounding transportation network. A river

or creek can be a significant impediment if there are no routes across it for an extended area of its course, but these issues are mitigated and even eliminated if numerous bridges exist crossing it.

The following map provides the road network and waterways of Ithaca with beat boundaries overlaid on top, and bridge crossings highlighted in green:

Transportation Barriers and Waterway Crossings (Current Beat Structure)

It is evident that barriers are well accounted for in the current beat boundaries. One example is the stretch of the creek in the SW quadrant of Ithaca, just SW of E State St label on the map, which has no crossings for almost a mile. The boundary between the two beats is approximately along the river, ensuring that cross-waterway travel is not needed to respond to calls within the same beat.

The following table summarizes the findings made in this assessment of the current beat structure against the criteria established previously:

Current Beat Structure Findings

Category	Rating	Description
Workload Equalization	B-	Moderate workload inequality is an issue in 2 of 4 beats, creating differences in the ability to conduct community policing.
Neighborhood Integrity	A-	Major neighborhoods kept together with only minor exclusions.
Logical Barriers and Transportation	A	

In short, there are no major issues with the current beat structure. The issue of call inequality between beats 203 (Downtown/northern) and 204 (eastern) is tempered by being somewhat moderate in severity, as well as the context of the geographic and transportation barriers that run through and around the area. However, improvements can be made to the beat structure to address call workload inequalities.

3. Redevelopment of the Beat Structure

To accomplish the objective of addressing the current call inequalities within the current structure, the project team undertook a restructuring of its beat boundaries. To accomplish this in a manner that keeps communities together and is cognizant of where concentrations of calls exist, this process must begin with an entirely clean slate.

The project team started with a shapefile layer of U.S. Census blocks – the smallest level of geography available – and combined these to form cluster areas. The resulting cluster areas, which number around 90, each represent a portion of either a neighborhood, line at a geographic barrier such as a waterway, or a notable concentration of calls for service. Within each of these areas, calls for service were totaled over the entire five-year period used in the data analysis.

Initial Cluster Areas Used to Redraw Beat Boundaries

The approximately 90 clusters represent a portion of a larger area, a section of a neighborhood, a cluster of calls, or a geographical barrier (e.g., the Cayuga Inlet).

The clusters are not weighted equally in terms of calls, given the different purposes that the different types of clusters service.

To better illustrate this in the beat redesign process, these numbers are shown visually. For mapping purposes, however, a better illustration can be shown by a point overlay map, which shows each call for service as semi-transparent dots. As more calls occur at the same location or area, the overlapping points become more opaque and visible.

Given that redrawing boundaries requires notice of specific hotspots rather than more generalized areas, this approach avoids some limitations of heat maps. The following map presents this analysis:

5YR Call for Service Concentrations

Clearly, the State Street corridor is a significant area of calls based on this map. And additionally, while the commercial district along Elmira Road may not seem like a concentration, because the addresses are mostly large stores such as a Walmart Supercenter, each of those points can represent hundreds to well over one thousand calls for service.

The clusters are merged together in a continuous process until several areas of focus emerge, which later form the redesigned beats.

The 'mega-clusters' that are formed from combining the smaller clusters represent the major areas and concentrations of calls – the Downtown core, Cornell and Collegetown, the commercial district around Elmira Rd, everything west of the Cayuga Inlet, and so

forth. Each of these are guaranteed to be joined within the same beat later in the analysis, and their call totals are recalculated.

Between each of the areas are buffers comprised of unmerged cluster areas, which are then gradually joined to the larger areas to reach equalized workload and to finetune the boundaries. Edits are made in order to ensure that neighborhoods are kept together and geographic barriers are consistent. If needed, travel time estimates from point to point are developed based on the road networks in order to ensure that in-beat travel is kept generally under 8-10 minutes without requiring lights and sirens under normal traffic circumstances.

Input was sought from the community on where walking beats would be desired. These have been incorporated into the alternative beat structure, which include additional walking beats compared to the current configuration.

The following map provides the results of this analysis, displaying the total calls for service over the past five years in the redesigned beat structure:

Redesigned Beat Structure: Boundaries and 5YR Call for Service Totals

The hashed green areas represent the community-defined officer walking beats, which overlap the car beat structure. One of these, represented with dotted lines, is a secondary/optional walking beat area.

All four beats have call for service totals that are within 20% of the average, accomplishing the goal of equalizing workload while keeping neighborhoods together. Geographic barriers are also accounted for, within the contest of available road networks. Nonetheless, trade-offs are inherently part of this process. For instance, a compromise may need to be made in equalization of calls in order to keep travel times

to a minimum, as well as vice versa. In these circumstances however, the magnitude of any issues caused by these decisions are kept within tolerable limits.

The alternative beat structure should be reviewed and revised in consultation with the community and the police department, including line-level patrol officers who ultimately have the greatest day-to-day stake in the new geographic deployment structure.

The draft patrol beat structure can be downloaded electronically as a shapefile (.shp) for use in GIS applications such as ArcGIS or QGIS using the following Drive link:

<https://drive.google.com/file/d/1fEs-JiAYS1GOsxmiQR8nkXlp2aZnrhn-/view?usp=sharing>

The beat structure can also be viewed as an interactive map at the following Google Maps link:

https://www.google.com/maps/d/u/1/edit?mid=1iDD-a-INVbdCYgJUvwSOsFnDA9W9k_I0&usp=sharing

Recommendation:

After a process of review and revision in consultation with the Ithaca Police Department and the community, adopt the alternative patrol beat structure in order to equalize workload and better facilitate community policing.

APPENDIX D:

NEW YORK STATE BASIC COURSE FOR POLICE OFFICERS TRAINING CURRICULUM

New York State Division of Criminal Justice Services
BASIC COURSE FOR POLICE OFFICERS – CURRICULUM CHECKLIST
MPTC Approved 9/4/2019 – Effective Date 01/01/2020

Basic Course for Police Officers Part/Module Name	Required Hours	Actual Hours
Part 1 - Administration of Justice		
1-A. Introduction to Criminal Justice		
1-B. Jurisdictions and Responsibilities of Law Enforcement		
1-C. Adjudicatory Process and Court Structure Civil & Criminal		
Part 1 Total	4	
Part 2 - Introduction to Law Enforcement		
2-A. Constitutional Law	2	
2-B. Discretionary Powers	2	
2-C. Ethics and Professionalism	8	
2-D. Physical Fitness and Wellness - Must include 3 tests. - Must not exceed 3 hours per day nor more than 9 hours per week. - Must be a certified Physical Fitness Instructor.	65	
2-E. Procedural Justice	2	
2-F. Officer Wellness *NEW Eff. 9/1/19*	16	
Part 2 Total	95	
Part 3 - Laws of New York State		
3-A. New York State Penal Law Offenses	16	
3-B. Use of Physical Force & Deadly Physical Force - Instructor must take 2 Day BCPO Use of Force Update Training.	11	
3-C. New York State Criminal Procedure Law Standards of Proof Laws of Arrest Search and Seizure Stop, Question, and Frisk Interview and Interrogation Accusatory Instruments Appearance Tickets Evidence Concepts Eyewitness ID	21	
3-D. New York State Juvenile Law and Procedures	6	
3-E. Civil Liability and Risk Management	2	
3-F. Ancillary New York State Statutes Eff. 1/1/20: Objectives updated	2	
3-G. New York State Vehicle and Traffic Law	5	
Part 3 Total	63	
Part 4 - Law Enforcement Skills		
4-A. Essentials of Response and Investigative Skills *NEW Eff. 9/1/19*	24	
4-A. Field Note Taking Eff. 9/1/19: Consolidated with new 4-A.	2	Consolidated w/ 4-A
4-B. Report Writing	7	
4-C. Electronic Communications	4	
4-D. Observation and Patrol Eff. 9/1/19: Reduced from 4 hrs to 3 hrs	3	
4-E. Case Preparation and Demeanor in Official Proceedings	7	
4-F. Fundamental Crisis Intervention Skills for LE - Must be a certified Mental Health Instructor AND take 2018 Fundamental Crisis Intervention Skills for LE Update Course. OR - Instructor must take Fundamental Crisis Intervention Skills for Law Enforcement Instructor Course.	20	
4-G. Crimes in Progress Eff. 9/1/19: Consolidated with new 4-A.	4	Consolidated w/ 4-A
4-H. Arrest Processing	5	
4-I. Vehicle Stops and Traffic Enforcement	11	
4-J. Defensive Tactics and Principles of Control - Practice must not exceed 4 hours per day nor more than 20 hours per week. - Must be a certified Defensive Tactics Instructor (if before 6/6/18: AND 2 Day Defensive Tactics Instructor Refresher Course).	40	
4-K. Emergency Medical Services - Must provide documentation showing instructor is a certified EMT Instructor.	48	
4-L. Emergency Vehicle Operation and Control - Must be a certified EVOC Instructor.	21

New York State Division of Criminal Justice Services
BASIC COURSE FOR POLICE OFFICERS – CURRICULUM CHECKLIST
 MPTC Approved 9/4/2019 – Effective Date 01/01/2020

4-M. Firearms Training - Must be a certified Firearms Instructor.	40	
4-N. Supervised Field Training Review and Orientation	160	
4-O. Traffic Direction and Control	2	
4-Q. DWI Detection and Standardized Field Sobriety Testing - Must be a certified DWI and SFST Instructor	21	
4-R. Physical Evidence Eff. 9/1/19: Consolidated with new 4-A.	42	Consolidated w/ 4-A
4-S. Off Duty and Plain Clothes Police Encounters	4	
4-T. Active Shooter - Must be a certified Firearms, Defensive Tactics OR Reality Based Training Instructor.	16	
4-U. Aerosol Subject Restraint - Must be a certified Chemical Agents Instructor. OR - Instructor must be take Aerosol Subject Restraint Instructor Course.	6	
4-V. Professional Communications	8	
4-W. Decision Making	8	
Part 4 Total	455	
Part 5 - Community Interaction		
5-A. Intoxication	1	
5-B. Community Resources - Victim/Witness Services	3	
5-C. Elder Abuse	2	
5-D. Cultural Diversity/Bias Related Incidents and Sexual Harassment	5	
5-E. Persons with Disabilities	6	
5-F. Crime Control Strategies *NEW Eff. 1/1/20* Replaced: Community Oriented Policing and Problem Solving - Media Relations	2	
5-G. Crime Prevention	2	
Part 5 Total	21	
Part 6 - Mass Casualties and Major Events		
6-A. Standardized Response Plans for Unusual Events - May replace with online courses ICS-100 and IS-700.a	8	
6-B. Behavioral Observation and Suspicious Activity Recognition	7	
6-C. The Nature and Control of Civil Disorder	3	
Part 6 Total	18	
Part 7 - Investigations		
7-A. Domestic Violence - Must be a certified Domestic Violence Instructor	14	
7-B. Organized Crime Familiarization/Enterprise Corruption Eff. 9/1/19: Removed.	2	Removed
7-C. Preliminary Investigation and Information Development Eff. 9/1/19: Consolidated with new 4-A.	2	Consolidated w/ 4-A
7-D. Interviewing Techniques Eff. 9/1/19: Consolidated with new 4-A.	5	Consolidated w/ 4-A
7-E. Common Criminal Investigation Techniques (Larceny, Robbery, Auto Theft, Arson, Burglary, Electronic Media) Eff. 9/1/19: Consolidated with new 4-A.	40	Consolidated w/ 4-A
7-F. Basic Crash Management and Reporting - Instructor must take Basic AND Intermediate Crash Management Courses OR document 70+ hours of formal training.	14	
7-G. Injury and Death Cases	3	
7-H. Sex Crimes	2	
7-I. Narcotics and Dangerous Drugs	3	
7-J. Missing and Abducted Children - Missing Adult Cases	3	
7-K. Animal Abuse Cases	2	
7-L. Contemporary Police Problems Eff. 9/1/19: Removed.	4	Removed
7-M. Human Trafficking	2	
Part 7 Total	43	
Part 8 – Reality Based Training		
8-A. Reality Based Training - Must be a certified Reality Based Training Instructor.	Varies

APPENDIX E:

ITHACA POLICE DEPARTMENT TRAINING TOPICS

Ithaca Police Department Training Topics

Annual Training Minimums:

There are NO annual training minimums required by the State of New York. Training is conducted to increase officer's abilities, lesson agency and municipal liability, and stay updated on evolving topics or agency needs. Training may be required by individual companies who provide equipment that we use (example: Taser.)

The items listed below are representative of our minimums.

Spring Firearms

- Topics include marksmanship, weapons handling, priority of life and cover concealment usage, Legal updates, Use of Force refreshers, medical aid for gunshot wounds (suspect aid, officer aid ect.), Tourniquets, quick clot gauze. Tactics related to firearms. Department qualifications and minimum acceptable standards to successfully complete.

Taser Recert/ Updates

- Yearly updates from Taser on device usage, considerations, safety processes, aid to those who the device is used on.

Defensive Tactics

- Review of procedures and practice of techniques and principles. Introduction of newly adopted methods from DCJS updates. Use of Force refreshers, De Escalation techniques, Handcuffing, OC Spray, Baton Usage. Competency Checks.

Fall Firearms

- Topics include all of the above from Spring Firearms but also focus on low light conditions. Data shows that the majority of OIS occur in low light conditions and therefor training in colder weather and in the dark is data driven and valuable. Patrol Rifle

Reality Based Training

- Officers are exposed to a series of realistic scenarios each designed to specifically train and/or test their abilities. These training topics are adopted each year by a panel of instructors and include topics of local value, topics related to national incidents, topics that may need updating. We partner with local agencies and experts to build and conduct scenarios as often as possible. For example, we worked with TC Mental Health on a suicidal subject scenario this spring and TCMH was on site to evaluate and provide feedback on officer's performance.
- Examples of recent topics include but are not limited to:
 - o Suicidal Subjects
 - o Welfare Checks
 - o Narcan Usage
 - o Fentanyl Exposures

- Domestic Disputes
- Mental Health Related Calls for service
- Low Light operations
- Verbal De Escalation
- Rendering Medical Aid
- Traffic Stops
- Officer Rescue
- Ambushed Officers
- Emergency Vehicle Operations
- Active Killer/Shooter Response
- Search and Seizure Scenarios

Additional In Service Training

- These training topics vary from year to year and are selected based on local items of importance, national trends, changes in laws or tactics, and department needs.
- These may include entire multi day training all the way to Body worn camera review of incidents with lead discussions follow ups.
- This year's topics are:
 - Persons in Crisis
 - Search and Seizure
 - Domestic Violence Law
 - Basic Crash Investigation
 - Excited Delirium
 - Evidence Collection and Preservation
 - Juvenile Refresher (Coordinated with Suzi Cook from TC Probation)
 - Trans Mindfulness
 - De Escalation
 - Law Enforcement Assisted Diversion
 - Principle Based Policing

Instructor Development

- Maintaining a progressive and updated capable instructor cadre is vital to a program's success. It is the goal of the IPD to ensure that all instructors, in every topic area receive either in house Instructor training or are sent to an off-site program or course to update their skills, learn new methods or discover new areas of need within the Department to focus on.
- We hosted other agencies (to include our own) and delivered NYS Firearms Instructor School
- We have some of the best respected LE Instructors in New York State. Lt Jake Young and I co Created the NYS 5 day Reality Based Training Instructor Course and are considered Subject Matter Experts in the field. Lt Young also just completed revamping NYS Firearms Instructor Course as a Subject Matter Expert in that field.

Outside Training

- Trainings attended off site this year include:

- Supervisor School (New Sergeants)
- High Impact Leadership
- Peer Support and Mentoring in Law Enforcement
- NYS Human Trafficking Awareness
- Advanced Internal Investigations Course
- Initial Response Strategies for Missing Children
- Read Recognize Respond
- Legally Justified, but was it Avoidable
- Accreditation Program Manager
- Material Creation and Program Implementation
- De Escalation, Intervention and Force Mitigation
- Instructor Development Course
- Master Instructor Course work
- AMBER Alert Best Practices
- Course Director Orientation
- Explosive Detection K9 Handler Panel
- Advanced Assisting Individuals in Crisis
- Progressive Force Concepts Instructor Development
- DCJS Missing Persons
- Child Homicide Investigations
- Force Science Body Worn Camera Course
- National Criminal Justice Training Center De Escalation Training
- Property and Evidence Room Management
- Deceptive Behaviors Hidden Compartments Training
- New York Tactical Officers Association Conference
- Performance Pistol and Carbine Course
- Assisting Individuals in Crisis
- Crisis Intervention Team Training
- New York State Homicide Seminar
- National Association of Black Law Enforcement Officers Conference
- Law Enforcement Training Directors Conference
- DNA and Genetics Training
- Use of Force Summit (Daigle Law Group)
- Taser Instructor Recertification
- Sequential Mapping Exercise (Mental Health and Law Enforcement Collaboration)

Academy Training

- Ideally we would deliver and run our own Police Academy but unfortunately we do not have the resources. We currently possess an instructor in all the basic topic areas, but the logistics of staffing the necessary units simultaneously managing an academy are more than we can currently accomplish with our staffing.
- The two attachments include the DCJS Basic Academy Curriculum.
 - It's important to understand THESE ARE THE MINIMUMS
 - WE UTILIZE THE Broome Academy and the Syracuse Academy. I've attached a copy of the Broome Academy's Curriculum Content Form. You

will see that they go way beyond the minimums and add many topics that are important that do not appear on DCJS basic minimums. I do not have Syracuse's form but know that they as well go well beyond state minimums.

5	Assumptions and Constraints	8
6	Project Budget	9
6.1	Reporting Process, Frequency, and Deadlines	9

1 Executive Summary

Introduction: The Reimagining Public Safety (RPS) initiative is a groundbreaking effort by the City of Berkeley to transform its approach to public safety. The initiative aims to build a safe, equitable, and thriving community through a redefined, multidisciplinary approach to public safety.

Justification: The RPS initiative aims to achieve a transformative approach to public safety, improving community well-being and potentially reducing long-term costs. The expected outcome includes not just policy adjustments but also broad, systemic change.

Objectives: To fulfill¹ the task activities and deliverables outlined within the Mayor and Councils recommendations and [phased approach](#) regarding Reimagining Public Safety:

1. Refer up to \$5.3 Million to the FY 2023-2024 Budget Process for staff and/or consulting services and community investments to complete the Priority Reimagining Public Safety Initiatives listed in Attachment 1, [Section A](#) to the report
2. Direct the City Manager to prioritize over the next two years the programmatic recommendations for Phase 1 of Reimagining Implementation listed in Attachment 1, [Section B](#) to the report.
3. Direct the City Manager to initiate a design process for an innovative and comprehensive public safety agency or Department of Community Safety within the City of Berkeley administration, as outlined in Attachment 1, [Section C](#) to the report, and return with recommendations to the City Council by May 2024 to align with the FY 25-26 Biennial Budget process.
4. Except where resources may allow for expedited implementation, refer additional reforms to the FY 2025-2026 Biennial Budget as outlined in Attachment 1, [Section D](#) to the report.

Scope: The initiative encompasses a breadth of fields including, but not limited to, law enforcement, health, housing and community services, dispatch analysis and coordination with our fire teams, and public works. It will focus on collaborative, proactive, and problem-solving approaches that align with the mission and values of our City and Reimagining Public Safety efforts.

Purpose of the Coordination Plan: This coordination plan is aims to integrate the Assistant to the City Manager, serving as the Reimagining Public Safety Project Coordinator, into the RPS Team and establish a framework for collaborating. Designated City Departments (CMO, HHCS, Police, Fire, Public Works), who have been spearheading this initiative forward, will continue to serve as leads for respective Reimagining Public Safety deliverables. The Assistant to the City Manager will serve as the RPS project coordinator and work collaboratively alongside Departments to catalog and report-out RPS project progress.

Timeline: This timeline will follow the 2020-2026 phased approach [outlined here](#).

Budget and Resources: A budget of up to \$5.3 million has been referred for the FY 2023-2024 Budget Process. Staff and/or consulting services will be engaged for implementing deliverables.

Next Steps: *This coordination plan is a dynamic document and may be updated as needed. Upon formal approval of this plan, we will make every effort to execute the plans and activities outlined herein.*

¹ Unless otherwise amended.

2 Introduction

2.1 Objective of the Reimagining Public Safety Initiative Coordination Plan

The primary objective of this Coordination Plan is to articulate the integration of project coordinator responsibilities within the broader context of leaders and teams committed to propelling the Reimagining Public Safety (RPS) initiative forward. Given the dynamic nature of the RPS initiative, the coordination plan is inherently a living document, adaptable to the evolving needs of the team. It establishes a framework for reporting on the progress of various deliverables and sub-deliverables associated with the Reimagining Public Safety initiative (RPS) being implemented across the City of Berkeley. The Assistant to the City Manager – RPS Project Coordinator’s role will primarily involve cataloging ongoing work, managing information flow, and ensuring that the key stakeholders are informed of RPS developments and progress.

2.2 Drivers, Problems to be Solved, and Communities Impacted

In striving to reimagine public safety, Berkeley’s efforts encompass a balanced distribution of resources, reassessment of policing responsibilities, strategic community investments, and the design of a holistic approach to safety. This approach seeks to offer a balanced model for addressing public safety while also attending to various community needs.

Drivers & Motivators	Problems to be Solved	Communities Impacted
<ul style="list-style-type: none"> • Community Well-being • Public Trust • Equity and Inclusion • Legislative Momentum • Resource Optimization • Fiscal Responsibility • Compliance and Accountability • Resilience and Preparedness • Technological Advances 	<ul style="list-style-type: none"> • Addressing Historical Inequities • Scope and Range of Police Responsibilities • Community Investment Gap • Resource Allocation • Public Perception and Trust • Data and Reporting • Diverse Population Dynamics • Community Call Responses • Holistic Safety and Well-being Approach • Sustainability 	<ul style="list-style-type: none"> • City of Berkeley Residents <ul style="list-style-type: none"> ○ Communities of Color ○ Low Income Communities ○ LGBTQIA+ Communities ○ Justice-Impacted Communities ○ Mental Health & Substance Use Communities ○ Youth & Students ○ Immigrant Communities ○ Justice-Impacted Communities • Community Based Organizations • Government Officials <ul style="list-style-type: none"> ○ City Departments: <i>CMO, Fire, Police, HHCS, Public Works, HR, IT, Finance</i> ○ Council Committees: <i>Public Safety Policy Committee, FITES Committee, Health, Life Enrichment, Equity & Community Committee, Budget & Finance Policy Committee</i> ○ Boards & Commissions: <i>Mental Health Commission, Public Safety Policy Committee, Police Accountability Board, RPS Taskforce</i>

2.3 Purpose and Value to Organization

The purpose of the Reimagining Public Safety Initiative in the City of Berkeley is to develop a more equitable, holistic, and community-centered approach to public safety. By reassessing and restructuring traditional models, we aim to address systemic inequities, increase community trust, and efficiently allocate resources for the well-being of all residents. This initiative not only seeks to enhance the city’s public safety and community engagement, but also positions Berkeley as a potential model for innovative, comprehensive, and inclusive public safety strategies nationwide. Reimagining Public Safety Principles, Commitments, and Objectives

Guiding Principle	Commitment
<p>REIMAGINE Redesign public safety from a traditional Police Department to one that is focused on the diverse needs of the community it serves.</p>	<p>A transformative approach to community-centered safety and reducing the scope of policing, by re-defining our understanding of safety to be holistic and focus not just on crime prevention but health, wellness, and economic security for all of our residents. While the focus has been on reducing the footprint of policing, we recognize that police play a critical role in our society, and we must determine the right size, focus and function of our Police Department to prevent and respond to crime, while exploring alternative response models and upstream investments in social services to create a healthy, safe and equitable community.</p> <p>Reimagining health and safety, considering allocating resources towards a more holistic approach - one that shifts resources away from policing towards health, education and social services, and is able to meet crises with a variety of appropriate responses.</p> <p>Identifying alternatives to policing and enforcement to reduce conflict, harm, and institutionalization, introduce alternative and restorative justice models, and reduce or eliminate use of fines and incarceration.</p>
<p>IMPROVE Improve the City of Berkeley’s public safety system for residents and communities that have experienced the greatest harm from the existing public safety model.</p>	<p>A broad, inclusive community process that will result in deep and lasting change to support safety and wellbeing for all Berkeley residents.</p> <p>Determining the appropriate response to community calls for help including size, scope of operation and powers and duties of a well-trained police department.</p> <p>Supporting police by freeing them to focus on what they do best: respond to and investigate crimes.</p>
<p>REINVEST Increase equitable investment in vulnerable communities and for those who have been historically marginalized.</p>	<p>Equitable investment in the essential conditions of a safe and healthy community, especially for those who have been historically marginalized and have experienced disinvestment.</p> <p>Providing meaningful safety, continuing critical health and social services, and committing to, and investing in, a new, positive, equitable and community-centered approach to health and safety that is affordable and sustainable.</p> <p>Ensuring an appropriately staffed and deployed Police Department while reducing the impact of Police expenditures to the General Fund; Investing in a suite of alternative response services and a sophisticated dispatch system to deploy the most appropriate emergency response in a cost-effective manner.</p>

3 Reimagining Public Safety Team

The Reimagining Public Safety Team has undertaken the substantial task of reshaping the city’s approach to public safety, following the City Council’s adoption of the [July 2020 omnibus motion](#). This initiative, as noted in the [City Manager’s report](#), represents a collective effort, drawing together city departments, community stakeholders, field experts, and the dedicated Reimagining Public Safety Task Force to collaboratively design a new public safety paradigm.

In Phase 1 (2020-2022), the City Manager, leadership team, and city staff actively engaged in comprehensive consultations and strategic planning sessions; their efforts, focused on ensuring that the initiatives underway are well-aligned with both the community’s needs and the city council’s directives, set the stage leading into Phase 2 (2022-2024).

The table below offers an overview of the Reimagining Public Safety Team’s structure for Phase 2, acknowledging the individuals and their collaborative work². It is crucial to emphasize that this initiative is a city-wide effort, reliant on the active involvement of a variety of city staff and community-based subject matter experts throughout its phased implementation. This team is uniquely situated to continue accomplishing this work. Their dedication, passion and leadership around this work is truly exceptional.

Department	RPS Team	
City Manager’s Office (CMO)	Dee Williams Ridley	City Manager
	LaTanya Bellow	Deputy City Manager
	Anne Cardwell	Deputy City Manager
	Carianna Arredondo	Assistant to the City Manager <i>Reimagining Public Safety Project Coordinator</i>
Health Housing and Community Services (HHCS)	Dr. Lisa Warhuus	Director, Health Housing and Community Services
	Katherine Hawn	Senior Management Analyst, HHCS <i>RPS Team Lead Representative (HHCS)</i>
Police	Chief Jennifer Louis	Chief of Police
	Lt. Matthew McGee	Lieutenant, Police <i>RPS Team Lead Representative (Police)</i>
Fire	Chief David Sprague	Chief of Fire
	Shanalee Gallagher	Program Manager, Fire <i>RPS Team Lead Representative (Fire)</i>
Public Works	Liam Garland	Director, Public Works <i>RPS Team Lead Representative (Public Works)</i>
City Attorney’s Office (CAO)	Brendan Darrow	Assistant City Attorney
City Attorney’s Office (CAO)	Emile Durette	Assistant to the City Attorney <i>RPS Team Lead Representative (City Attorney’s Office)</i>

² As noted in the Executive Summary, this coordination plan aims to integrate the Assistant to the City Manager, serving as the Reimagining Public Safety Project Coordinator, into the RPS Team and establish a framework for collaborating. Designated City Departments (CMO, HHCS, Police, Fire, Public Works), who have been spearheading this initiative forward, will continue to serve as leads for respective Reimagining Public Safety deliverables. The Assistant to the City Manager will serve as the RPS project coordinator and work collaboratively alongside Departments to catalog and report-out RPS project progress.

4 Deliverables and Tasks

At the time of this coordination plan’s creation, the Reimagining Public Safety initiative has already been set into motion. City departments, each taking steps in line with their specific mandates and responsibility, are continuing to move forward in their efforts to support this initiative. Department Heads and the designated RPS Team leads will collaborate with the Assistant to the City Manager serving as the RPS project coordinator in identifying and cataloging work that has already been completed, work that is in progress, and future tasks that still require action. This consolidated view will enable effective resource allocation, risk management, and strategic planning, thus ensuring the deliverables are executed in a timely and effective manner.

Department	Deliverable	
City Manager’s Office (CMO)	Phase 1	<ul style="list-style-type: none"> Community Engagement Process

	Phase 3	<ul style="list-style-type: none"> <i>BerkDOT Implementation</i> Implementation of Public Safety Department

5 Assumptions and Constraints

In planning and executing the Reimagining Public Safety initiative, it’s crucial to identify the underlying assumptions that guide our strategies, as well as the constraints that may limit our options. This section outlines these assumptions and constraints to provide a structured framework for decision-making, risk management, and effective project implementation on an inter-departmental level.

Assumption/Constraint	Description	Example Detail
Funding	<i>Adequate financial resources will be available for implementing various aspects of the project.</i>	<i>Budget allocation, grants, etc.</i>
	<i>Limited funds may restrict the extent of changes or pace implementation.</i>	<i>Budget caps, competing priorities.</i>
Community Support	<i>There is strong community support and engagement in the reimagining process.</i>	<i>Community meetings, surveys, etc.</i>
	<i>Resistance or opposition from certain community groups may slow down the project’s pace.</i>	<i>Public protests, negative media attention.</i>
Legislative Framework	<i>Necessary changes in local and state laws will be made to facilitate project goals.</i>	<i>Policy adjustments for unarmed enforcement.</i>
	<i>Existing laws may limit the types of changes that can be implemented immediately.</i>	<i>State laws on unarmed enforcement.</i>
Staff Recruitment/Retention	<i>Required staff positions will be filled timely and will remain stable throughout the project.</i>	<i>Assistant City Managers, Vision Zero Coordinator, etc.</i>
	<i>Constraints on hiring or retaining the specialized staff required for the project.</i>	<i>Recruitment challenges, staffing shortages, causing delay.</i>
	<i>High attrition rates.</i>	<i>Hiring and training can take up to a year due to added measures in this specialty.</i>
Technology	<i>Technology platforms will effectively support new dispatch and response models.</i>	<i>Software for prioritized dispatch.</i>
	<i>Technological limitations may constrain the speed or effectiveness of new systems or models.</i>	<i>Outdated systems, interoperability issues, extended timelines.</i>
	<i>Request for Proposals is often a 6-month process. Actual implementation of new systems could take up to two years.</i>	

6 Project Budget

A budget allocation of up to \$5.3 million³ has been designated for Fiscal Year 2023-2024. Together with additional grants, the total funding for the Reimagining Public Safety Initiative exceeds approximately \$9 million. Developed based on recommendations from the City Manager, Mayor, and City Council the budget serves as a financial blueprint for responsibly allocating resources and achieving the initiative’s objectives. For optimized tracking and reporting, we’ve established a simple process that involves multiple stakeholders.

6.1 Reporting Process, Frequency, and Deadlines

The given the dynamic nature of the Reimagining Public Safety work, the team will continue to collaborate on identifying and improving best practices for budget process. RPS Project Leads will be responsible for sharing the following information for respective RPS-related deliverables:

Type of Expense	Tracking Information
For Contracted Items	<ul style="list-style-type: none"> • Vendor Name • Contract # (if applicable) • Budget COA
For Staffing Positions	<ul style="list-style-type: none"> • Position Filled (Y/N) • Job Description/Posting Link

Considering the RPS work is funded by the city across FY 2023 and FY 2024, a quarterly reporting cadence is most effective.

By adhering to these guidelines and protocols, we aim to maintain rigorous control and agility while effectively making meaningful progress on the Reimagining Public Safety Initiative.

³ Subject to change based on bi-annual budget review process and recommendations.

APPENDIX E

Resource Development Associates (RDA) Specialized Care Unit (SCU) Contract & Reports

EXPENDITURE NON-CONSTRUCTION CONTRACT REVIEW FORM: NEW CONTRACT

Contract # 32100082

CONTRACTOR NAME: Resource Development Associates, Inc. (RDA)

Subject of Contract: Specialized Care Unit (SCU) Design

This contract package contains: 3 Original Contracts (Department, Vital Record and Vendor) in folders	Attached	Waiver Attached	Not Required
*The Vital Record contract MUST be in a folder. *Optional: In lieu of folders, Department and Vendor copies may be assembled with an Acco-fastener.			
1. CONTRACT BOILERPLATE	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

SCOPE OF SERVICES

Agency Name: Resource Development Associates (RDA)
 Contract Period: January 1, 2021 – June 30, 2022
 Program Title: Specialized Care Unit (SCU) Design

Resource Development Associates, (hereafter RDA) will provide the following services, enumerated below. This contract is for the period commencing January 1, 2021 to June 30, 2022 which may be extended by agreement of the City of Berkeley and RDA.

Specialized Care Unit (SCU) Design

A variety of stakeholder groups (including the Berkeley/Albany Mental Health Commission) has long advocated for the need for a community designed 24/7 crisis care program and the need to reduce the role of law enforcement in crisis response. In July 2020, City Council directed the City Manager to evaluate initiatives and reforms that reduce the footprint of the Police Department and **limit the Police's scope of work primarily to violent and criminal matters. This includes the development of a Specialized Care Unit (SCU) pilot spearheaded by the HHCS Department.** This SCU would consist of trained crisis-response field workers who would respond to mental health crisis occurrences that posed on imminent threat to safety without the involvement of law enforcement.

RDA, in partnership with the HHCS Department, will conduct a comprehensive feasibility study (provided as a written report) for the creation of a 24/7 SCU that provides services in response to public safety calls that do not need or require the presence of police. The feasibility study will be developed through extensive community engagement involving input from diverse service users, City departments, community stakeholders, subject matter experts, professionals, paraprofessionals, and others. RDA will conduct all activities entailed in this project in a manner that is culturally responsive, humble, and deeply respectful of the lived experience of all who are involved. With written permission, RDA may utilize funds to subcontract activities for data collection and community engagement.

The feasibility study will include community-driven program design recommendations, complete budget and potential funding sources, and a detailed plan for phased implementation that includes a proposal and budget for a program pilot while also projected timelines for expanded services informed by local data (such as the coming City Auditor's audit of BPD staffing and budget). The study will also make recommendations for how the SCU can link with other supportive services such as crisis counseling, conflict resolution, housing assistance, wellness checks, first aid, referrals, resource connection, transportation, follow-up, and other services.

RDA will accomplish the work according to the following steps:

1. Work with the City of Berkeley departments, community stakeholders, subject matter

experts, professionals, paraprofessionals, diverse service users and others to produce a feasibility study for the creation of a Specialized Care Unit. The SCU will provide services in response to 911 calls that do not need or require the presence of police as well as to calls made directly to them, independent of 911.

- a. Create a Mission Statement for the SCU program. Specifically, define SCU non-emergency 24/7 rapid response mental health and substance use related services. Services would also address citywide needs for coordinated responses from City Departments (ex. fire/EMT), crisis counseling, conflict resolution, housing assistance, wellness checks, first aid, referrals, resource connections, transportation, follow-up continuity of care and stable, predictable living for those who are served by them.
- b. Prepare a detailed plan for a phased implementation of the SCU.
- c. Prepare a detailed budget for the initial pilot program and projections for expanded services based on data from the audits by City Auditor, and other data-based projections.
- d. Identify potential funding sources, including Medi-Cal reimbursement, Mental Health Services Act (MHSA), Realignment and City of Berkeley General Funds, and strategies to access additional funding from other City departments and/or other sources.

2. Research and identify best practices related to non-police-centered responses

- a. Conduct literature reviews and interviews with representatives of similar/model programs and identify the SCU's intersections with the existing Berkeley social service structure.
- b. Identify necessary qualifications of the SCU team. Describe how SCU staff will de-escalate, assess, provide services, referrals, resources and, in some cases, provide transportation for persons in distress.

3. Gather input from stakeholder groups to inform the program design

- a. Describe how mental health and/or Substance Use Disorder (SUD) interventions and services will be tailored to meet the needs of people and communities of color, as well as LGBTQIA+, unhoused, and economically disadvantaged people who are disproportionately impacted by mental health and carceral systems.
- b. Describe culturally responsive, evidence-based best practices and survey prospective and current users of services.
- c. Interview current and former staff of HOTT, MCT, TOT, Crisis Triage Program, Berkeley Ambassadors, MACROS, CAHOOTS, and the Alameda County CATT team.
- d. Analyze BPD dispatcher protocols and create a method of dispatch for the SCU that includes emergency calls from the public to an independent SCU phone number, as well as 911 calls that are evaluated and redirected to the SCU.
- e. Interview BPD Community Services Bureau Officers and CIT officers.

Some strategies that RDA will consider utilizing include:

- a. Providing lots of digital data collection options for a wide, diverse array of community

members to engage with RDA. Particularly given the current COVID-19 pandemic and shelter-in-place orders, data collection will be limited to remote and virtual connections. Potential digital data collection activities include:

- i. Online surveys
 - ii. Online listening sessions (lightly facilitated sessions where individuals can call or video into during anytime during a set period of time, and then engage with an RDA team member in 1-on-1 ways via online breakout rooms)
 - iii. Online focus groups and town halls (with provider teams, advocacy groups, and other established group entities)
 - iv. Key informant interviews (1-on-1 phone/video interviews with leadership representatives, elected officials, and other key stakeholders for whom a private conversation is preferred)
 - v. Qualitative interviews with diverse crisis response service users
- b. Providing a clear outline and timeline of how the data collected for this project will be used, when components of the SCU plan will be developed, and key feedback points in the project plan.
 - c. Partnering with interested key stakeholders to co-facilitate some data collection activities (online focus groups and listening sessions).

4. Provide recommendations for the best “home” for the SCU; whether it be within the City of Berkeley or a community service provider

5. Contact and planning with impacted departments. Coordinate with City departments who will be impacted by the phased implementation of the SCU; whether it involves a service reduction or service enhancement

6. Facilitate collaboration with local Continuum of Care providers and stakeholders

- a. Identify providers that can engage with the SCU to provide services and become a destination for individuals accessing service via SCU.
- b. Identify strategies to ensure that the SCU is not continuously responding to the same crisis, but rather offering support within the community that allows for on-going treatment and care, including support from clients’ families.
- c. Meet with care partners and those agencies and organizations that will be providing follow-up care in partnership with the SCU.
- d. Evaluate the gaps in service including, but not limited to, the number of shelter beds needed and available, permanent housing vouchers, respite facilities, substance use recovery programs and other options besides the criminal justice system.

7. Develop SCU Feasibility Study Report

- a. Analyze data from MHD, City Auditor, and others to create projections for budget, staffing, training options, and equipment and technology needs.
- b. Describe both the currently available and needed additional IT and technology supports, including the technological interconnections with the local network of

- partners/providers, that support the SCU to access current medical and mental health/substance use records for clients.
- c. Develop a mindful community education and training program focused on empathy and compassion which supports the work and vision of the SCU.

8. Create Evaluation Criteria for the SCU Program

- a. Produce a plan for evaluation and data collection for the SCU program that includes both process and outcome measures.

RDA will employ a variety of strategies throughout this project to reach the diverse populations in Berkeley, and particularly with the local African American communities. The equal opportunity for crisis response services users to meaningfully participate is key to improving the quality of individual service delivery and moreover, to inform structural changes across these crisis response systems. Diverse crisis response service users can describe their routes through these systems, provide their perspectives about the nature of them and how they impact their lives in a way that other stakeholders are not able or qualified to do based on actual lived experience and not professional opinion. BIPOC, LGBTQ+ and other communities are disproportionality represented in public mental health and incarcerations systems, particularly ones designed for punishment and sentencing to prisons. Thus, their input is essential to achieve health equity and community safety.

RDA will work hand-in-hand with the Steering Committee to ensure clear timelines and deadlines are agreed upon early on and adhered to throughout this project – in particular, RDA will actively seek the feedback from the Steering Committee regarding all data collection tools and protocols that this project will utilize. The diversity of backgrounds and roles of the Steering Committee will **provide crucial insights and expertise about the local Berkeley community to RDA's data collection and analysis efforts.**

RDA will work very closely with the Steering Committee – as well as other key stakeholders – early on in this project to collaboratively identify the potential avenues in which to reach **Berkeley's diverse communities, including the types of data collection modalities that will be engaging and productive for RDA to receive the open, honest, and critical feedback that this project needs.** RDA will conduct robust qualitative interviews with diverse crisis response service users in order to identify emerging themes to account for service users and the quality of care. RDA will ensure that those conducting the qualitative interviews with service users are highly experienced in serving these communities and listening to life narratives needed to inform these systems. RDA will remain flexible and adapt its activities to any changing circumstances and process feedback that is shared throughout this project. Of utmost importance to RDA and this project is that community feedback to sought after in culturally competent and trauma-informed ways. RDA and the Steering Committee both understand that the topic of this project is very sensitive and difficult for some populations to engage with openly.

RDA will lead multiple data work sessions with the Steering Committee and other identified key stakeholders at key points in the project. RDA will share its most current preliminary analyses and findings from the quantitative and qualitative data that has been collected thus far. Then, RDA will

facilitate conversations to understand how these stakeholders are interpreting this information, what questions are coming to mind, what potential areas for further exploration or data collection are needed, and also building consensus amongst this larger team of the key findings and SCU planning items thus far. The goal of these collaborative data work sessions is so this entire project team is incrementally building its understanding of the feasibility study as it is unfolding, and actively shaping together the direction in which the SCU planning occurs.

Estimated Project Timeframe

It is envisioned that these services will begin January 1, 2021 and will be completed by June 30, 2022.

Activity	Lead Organization	Timeframe
Gather input from stakeholder groups to inform the program design	RDA	Feb – Jun 2021
Research and identify best practices related to non-police-centered responses.	RDA	Jan – May 2021
Develop Crisis System of Care model of the current state, including identifying gaps in care.	RDA	
Develop SCU Feasibility Report with written recommendations for the SCU program model that includes summary of all stakeholder input, best practice research, detailed description of the ideal model for Berkeley, budget and finance recommendations, recommended pilot model, as well as recommendations for phased and long-term implementation.	RDA	May – Aug 2021
Revise the Berkeley Crisis System of Care Map to include SCU and potential system changes.	RDA (transferring to Berkeley in Jan 2022)	May 2021 – ongoing

EXHIBIT B

PAYMENT

The cost for professional services for the Specialized Care Unit (SCU) Design is \$185,000. The term of the contract is 01/01/2021 – 06/30/2022.

RDA will provide the services described above according to the proposed schedule that may be altered to adapt to emerging needs. A list of all RDA staff positions and their hourly rates are presented below in the event they are called upon to contribute to the project to meet emerging needs.

Position	Hourly Rate
CEO	\$275
Director of Practice and Delivery	\$250
Practice Director	\$225
IT Director	\$200
Senior Project Manager	\$185
Senior Program Associate	\$175
Program Associate	\$150
Research Associate	\$125
Project Support Assistant	\$100

These rates are inclusive of all personnel, fringe benefit, materials, travel, equipment, insurance, communications, indirect, facilities, and administrative costs that will be incurred over the course of the proposed project. The hours proposed for staff on each task are estimates and will be adjusted during the course of the project, but RDA will not exceed the total budget amount in the contract. We bill on a monthly basis for actual hours worked, up to the project's not-to-exceed amount.

Resource Development Associates will bill the City for each area of professional services outlined in the Budget on a monthly basis until the assignment is completed. With written permission, RDA may utilize funds to subcontract activities for data collection and community engagement.

Payments will be made by the Finance Department in arrears after receipt and acceptance of proper, fully itemized, and correct invoices by the Finance Department.

EVIDENCE OF COMPETITIVE SOLICITATION

Project Name: Specialized Care Unit (SCU) Design

Possible Vendor	Contacted Via
Resource Development Associates (RDA)	pbennett@resourcedevelopment.net

The Request for Proposal (RFP) for the Specialized Care Unit (SCU) Design was solicited to the following list of prospective Bidders below.

Prospective Bidders

Evalcorp Research and Consulting

Facente Consulting

Public Consulting Group

Resource Development Associates

Recovery Innovations INC

An RFP evaluation panel, including mobile crisis unit staff, Alameda County staff, Mental Health Commissioners and a mental health consumer, reviewed each RFP and evaluated it using a scoring matrix. From this initial review emerged two top contenders. These final two bidders completed an interview with the evaluation panel where they presented their proposals and responded to questions from the panel. Ultimately, RDA was chosen because of the quality of the presentation and responses to questions, ability to begin work efficiently, and their higher scoring matrix score.

NON-DISCRIMINATION/WORKFORCE COMPOSITION

FOR ALL CONTRACTS: 5 OR MORE EMPLOYEES

To assist the City of Berkeley in implementing its Non-Discrimination policy, you're requested to furnish information regarding your personnel, as indicated below, and return this form to the City Department handling your contract.

ORGANIZATION Resource Development Associates

ADDRESS 2333 Harrison Street, Oakland, CA 94612

BUSINESS LICENSE # 003113

You may complete this online & make entries in these cells, they will be automatically totaled at the bottom; or print the form & complete by hand/typewriter.

Occupational Category (see page 2 for definitions)	ALL EMPLOYEES		WHITE		BLACK		ASIAN		HISPANIC		OTHER (specify)**

Executive Summary

As part of the larger effort to Reimagine Public Safety, the City of Berkeley contracted with Resource Development Associates (RDA) to conduct a feasibility study for a Specialized Care Unit (SCU), an alternative mental health and substance use crisis response model that does not involve law enforcement.

This is the third of three distinct reports for this effort. The first report (“[Crisis Response Models Report](#)”) presents a summary of crisis response programs in the United States and internationally. The second report (“[Mental Health Crisis Response Services and Stakeholder Perspectives Report](#)”) is the result of engagement with stakeholders of the crisis system, including City of Berkeley and Alameda County agencies, local community-based organizations (CBOs), local community leaders, and utilizers of Berkeley’s crisis response services, and presents a summary of key themes to inform the SCU model.

This third report is intended to guide implementation of the SCU model and includes:

- Core components and guiding aims of the SCU model;
- Stakeholder and best practice-driven design recommendations;
- Considerations for planning and implementation;
- A phased implementation approach;
- System-level recommendations; and
- Future design considerations.

Each recommendation put forth in this report is deeply rooted in the stakeholder feedback included in the two previous reports. This report presents RDA’s recommendations based on this year-long project, which the City of Berkeley may adapt and adjust as necessary.

Key Recommendations

1. The SCU should respond to mental health crises and substance use emergencies without a police co-response.
2. The SCU should operate 24/7.
3. Staff a three-person SCU mobile team to respond to mental health and substance use emergencies.
4. Equip the SCU mobile team with vans.
5. The SCU mobile team should provide transport to a variety of locations.
6. Equip the SCU mobile team with supplies to meet the array of clients' needs.
7. Clearly distinguish the SCU from MCT.
8. Participate in the Dispatch assessment and planning process to prepare for future integration.
9. Ensure the community has a 24/7 live phone line to access the SCU.
10. Plan for embedding a mental health or behavioral health clinician into Dispatch to support triage and SCU deployment.
11. Fully staff a comprehensive model to ensure the success of the SCU mobile team, including supervisory and administrative support.
12. Operate one SCU mobile team per shift for three 10-hour shifts.
13. SCU staff and Dispatch personnel should travel to alternative crisis programs for in-person observation and training.
14. Prepare the SCU mobile team with training.
15. Contract the SCU model to a CBO.
16. Integrate the SCU into existing data systems.
17. Collect and publish mental health crisis response data publicly on Berkeley's Open Data Portal.
18. Implement care coordination case management meetings for crisis service providers.
19. Implement centralized coordination and leadership across city agencies to support the success of mental health crisis response.
20. Continue the existing SCU Steering Committee as an advisory body.
21. Solicit ongoing community input and feedback.
22. Adopt a rapid monitoring, assessment, and learning process.
23. Conduct a formal annual evaluation.
24. Launch a public awareness campaign to promote community awareness and education about the SCU.
25. The SCU mobile team should conduct outreach and build relationships with potential service utilizers.

Introduction

Project Background

In response to the killing of George Floyd by Minneapolis police in May 2020 and the ensuing protests across the nation for this and many other similar tragedies, a national conversation emerged about how policing can be done differently in local communities. The Berkeley City Council initiated a wide-reaching process to reimagine safety in the City of Berkeley. As part of that process, in July 2020, the Council directed the City Manager to pursue reforms to limit the Berkeley Police Department's (BPD) scope of work to "primarily violent and criminal matters." These reforms included, in part, the development of a Specialized Care Unit (SCU) to respond to mental health crises without the involvement of law enforcement.

In order to inform the development of an SCU, the City of Berkeley contracted with Resource Development Associates (RDA) to conduct a feasibility study that includes community-informed program design recommendations, a phased implementation plan, and funding considerations.

The Need for Specialized Mental Health Crisis Response

Just as a physical health crisis requires treatment from a medical professional, a mental health crisis requires response from a mental health professional. Unfortunately, across the country and in Berkeley, police are typically deployed to respond to mental health and substance use crises.

Without the proper infrastructure and resources in place, cities are unable to adequately meet the needs of people experiencing a mental health and/or substance use crisis. Relying on police officers to respond to the majority of mental health 911 calls endangers the safety and well-being of community members. Tragically, police are 16 times more likely to kill someone with a mental illness compared to those without a mental illness.¹ A November 2016 study published in the *American Journal of Preventative Medicine* estimated that 20% to 50% of fatal encounters with law enforcement involved an individual with a mental illness.² As a result, communities have begun to consider the urgent need for crisis response models that deploy mental health professionals rather than police. An analysis found that the 10 largest police departments in the U.S. paid out nearly 250 billion dollars in settlements in 2014, much of which were related to wrongful-

¹ Szabo, L. (2015). People with mental illness 16 times more likely to be killed by police. *USA Today*. <https://www.usatoday.com/story/news/2015/12/10/people-mentalillness-16-times-more-likely-killed-police/77059710/>

² DeGue, S., Fowler, K.A., & Calkins, C. (2016). Deaths due to use of lethal force by law enforcement. *American Journal of Preventive Medicine*, 51(5), S173-S187. [https://www.ajpmonline.org/article/S0749-3797\(16\)30384-1/fulltext](https://www.ajpmonline.org/article/S0749-3797(16)30384-1/fulltext)

death lawsuits of people in a mental health crisis.³ Law enforcement should not be the primary responders to mental health crises.

A 2012 Department of Justice report outlines that policing in the U.S. does not necessarily keep people safer but instead, militaristic policing causes more harm than good and disproportionately impacts communities of color. The report further assessed that over-policing requires more resources without producing benefits to public safety, draining resources that could otherwise be used for more effective public safety strategies.⁴

Nationally, the negative impacts of policing and police violence have been declared a public health issue.⁵ Extensive data shows that aggressive policing is a threat to physical and mental health: inappropriate stops are associated with increased anxiety, depression, PTSD, or long-term health conditions like diabetes. In 2016, at least 76,440 nonfatal injuries due to law enforcement were reported and at least 1,091 deaths were reported. However, due to insufficient monitoring and surveillance of law enforcement violence, these statistics are underestimated.⁶

The impacts of policing disproportionately harm people of color, especially Black Americans, making policing an issue of racial justice. Police disproportionately stop, arrest, shoot, and kill Black Americans. Other marginalized populations, such as people with mental illness, people who identify as transgender, people experiencing homelessness, and people who use drugs, are also subjected to increased police stops, verbal and sexual harassment, and death.⁷

In California, Alameda County has the highest rate of 5150 psychiatric holds in the entire state,⁸ which may indicate inadequate provision of mental health crisis services. Of those individuals placed on a 5150 psychiatric hold in Alameda County and transferred to a psychiatric emergency services unit, 75-85% of the cases did not meet medical necessity criteria to be placed in inpatient acute psychiatric care. This demonstrates an overuse of emergency psychiatric services in Alameda County. Such overuse creates challenges in local communities such as lengthy wait times for ambulance services which are busy

⁸ INN Plan – Alameda County: Community Assessment and Transport Team (CATT) (2018, October 25). *California Mental Health Services Oversight and Accountability Commission*. https://mhsoac.ca.gov/sites/default/files/documents/2018-10/Alameda_INN%20Project%20Plan_Community%20Assessment%20and%20Transport%20Team_8.6.2018_Final.pdf

transporting and discharging individuals on 5150 holds. The overuse of involuntary psychiatric holds can be traumatizing for people experiencing crisis, as well as for their friends and family.

The overuse of involuntary psychiatric holds is also an issue of racial justice. Police and ambulance workers have been found to bring Black patients with psychoses to psychiatric emergency service more frequently than non-Black patients with psychoses.⁹ For example, in San Francisco, Black adults are overrepresented in psychiatric emergency services, relative to overall population size.¹⁰

Based on 911 call data from 2001 to 2003 in San Francisco, a study found that neighborhoods with higher proportions of Black residents generate relatively fewer mental health-related 911 calls. The authors suggest that underutilization of 911 by the Black community can result in delayed treatment, therefore increasing the risk posed to the health and safety of people in crisis and their communities. The study highlights the common distrust of law enforcement among communities of color. Such distrust and fear of law enforcement may mean that people of color do not trust that mental health-related calls will be handled appropriately if they seek support for a mental health crisis through 911. The study reinforced that “law enforcement officers’ role in the disposition of calls makes them de facto gatekeepers to safety net services for persons with mental disorders.”¹¹

It is within this context that many Berkeley community members are calling for a more just, equitable, and health-focused crisis response system, in part due to the distrust of institutions of policing or those closely intertwined with police. A variety of stakeholder groups, including the Berkeley Mental Health Commission and the Berkeley Community Safety Coalition, have long advocated for a community-designed 24/7 crisis care model and to reduce the role of law enforcement in crisis response.

Effect of racial and ethnic composition of neighborhoods in San Francisco on rates of mental health-related 911 calls. *Psychiatric Services*, 60(10), 1376-1378. <https://ps.psychiatryonline.org/doi/pdf/10.1176/ps.2009.60.10.1376>

In a concurrent project for the City of Berkeley's Reimagining Public Safety initiative, the National Institute for Criminal Justice Reform found that among many Berkeley residents, there is a lack of trust in and satisfaction with the Berkeley Police Department. They found that:¹²

- Non-White respondents were more likely to indicate that the Berkeley Police Department is not effective at all compared to White respondents;
- 17.1% of Black respondents and 7.6% of Latinx respondents reported that police had harassed them personally in comparison to only 4.3% of White respondents;
- Respondents are less likely to call 911 during emergencies related to mental health or substance use crisis (57.9%) in comparison to an emergency not involving mental health or substance use (86.2%); and
- Substantially more Black respondents indicated extreme reluctance to call 911 as compared with other groups.

Additionally, the report shared that across all respondents, 65.9% indicated a preference for trained mental health providers to respond to mental health and substance use emergencies "with support from police when needed" and 14.9% indicated a preference "with no police involvement at all." In total, 80.8% of respondents indicated a preference for trained mental health providers to respond to calls related to mental health and substance use.¹³

Clearly, there is an urgent need for a more racially just, equitable, and health-focused mental health crisis response system. The SCU could be well poised to address these inequities by providing specialized mental health crisis intervention, de-escalation, and stabilization without the presence of law enforcement.

Inputs to the Recommendations

This report includes core components and guiding aims of the SCU model, considerations for planning and implementing the SCU model, a phased implementation approach, stakeholder-driven design recommendations, system-level recommendations, and next steps and future design considerations. Each recommendation that RDA puts forth in this report is deeply rooted in the following sources of input:

- Crisis Response Models Report (Report 1 of this series of 3)
- Mental Health Crisis Response Services and Stakeholder Perspectives Report (Report 2 of this series of 3)
- Ongoing engagement with the SCU Steering Committee and the City's Health, Housing & Community Services Department (HHCS)

¹² National Institute for Criminal Justice Reform (2021). Reimagining public safety: Draft final report and implementation plan. https://www.cityofberkeley.info/uploadedFiles/Clerk/Level_3_-_Commissions/Draft%20Final%20Report%20and%20Implementation%20Plan%20FNL%20DRFT%2010.30.21.pdf

¹³ Ibid.

- Learnings from the simultaneous Reimagining Public Safety initiative
- Best practices research

The recommendations presented in this report are directly informed from the strengths, challenges, gaps in services, and lessons learned from crisis response programs around the country. Those considerations, however, must be uniquely tailored to the Berkeley community based on the existing crisis response system and the needs and perspectives of Berkeley residents. Together, the recommendations and implementation approaches presented here are informed by findings from the robust community engagement and citywide processes of the past year.

Crisis Response Models Report

As part of this feasibility study, RDA reviewed the components of nearly 40 crisis response programs in the United States and internationally, including virtually meeting with 10 programs between June and July 2021. A synthesized summary of RDA's findings, including common themes that emerged across the programs, how they were implemented, considerations and rationale for design components, and overall key lessons learned can be found in the [Crisis Response Models Report](#).

Mental Health Crisis Response Services and Stakeholder Perspectives Report

With the guidance and support of the SCU Steering Committee, facilitated by the Director of City of Berkeley's Health, Housing and Community Services Department (HHCS), RDA conducted a large volume of community and agency outreach and qualitative data collection activities in June and July 2021. Because BIPOC, LGBTQ+, unhoused, and other communities are disproportionately represented in public mental health and incarceration systems—particularly ones designed for punishment and sentencing to prisons—their input was sought to advance the goal of achieving health equity and community safety.

Crisis response service users described their routes through these systems, providing their perspectives about their experiences and how these experiences impact their lives in a way that other stakeholders are not able or qualified to do. The goal of the immense amount of outreach and qualitative data collection was to understand the variety of perspectives in the local community regarding how mental health crises are currently being responded to as well as the community's desire for a different crisis response system that would better serve its population and needs. Such perspectives are necessary to improve the quality of service delivery and, moreover, to inform structural changes across the crisis response system.

The synthesis of the City of Berkeley's current mental health crisis system and themes from qualitative data collection can be found in the [Mental Health Crisis Response Services and Stakeholder Perspectives Report](#)

The SCU Model: Planning & Implementation

Core Components

The recommendations presented in this report represent a model that is responsive to community needs, but as planning continues throughout 2021 and into 2022, new considerations and constraints may arise. As dynamics evolve and more information is obtained and assessed, the model must be flexible and adaptable. There are several components that should, however, remain core to the SCU model:

- The SCU responds to mental health and substance use crises.
- The SCU responds with providers specialized in mental health and substance use.
- The SCU model does not include police as a part of the crisis response.
- The SCU is not an adjunct to nor overseen by a policing entity (e.g., Police, Fire, or CERN¹⁴).

With these core components in mind, the SCU model and phased approach were designed to address the challenges, gaps in services, and community aspirations shared by numerous stakeholders throughout Berkeley. The SCU model seeks to:

- Address the urgent need for a non-police crisis response.
- Disrupt the processes of criminalization that harm Black residents and other residents of color, substance users, people experiencing homelessness, and others who experience structural marginalization.
- Increase the availability, accessibility, and quality of mental health crisis services.
- Provide quality harm reduction services for substance use emergencies.
- Strengthen collaboration and system integration across the crisis and wraparound service network.
- Be responsive to ongoing community feedback and experiences.
- Build and repair trust with community members and increase public awareness of newly available services.

A System-wide Change Initiative

The development of a mental health crisis response model as a component of the City of Berkeley's emergency services should be understood as a systemwide change initiative of great magnitude. Developing a shared narrative around community health and well-being while reducing harm, trauma, and unnecessary use of force may build collective support for the SCU model across City of Berkeley agencies and departments. Other cities implementing non-police crisis response models found that garnering buy-in from other

¹⁴ Community Emergency Response Network (CERN) is a model recommended by the National Institute for Criminal Justice Reform through the Reimagining Public Safety process.

city or county departments requires collaboration from the earliest planning stages. Cities shared that when they focused these conversations about shared objectives between the crisis response program and the police, police began to see the program as a resource to them, as mental health professionals could often better handle mental health crises because of their training and backgrounds. Alignment on shared goals and values may support leadership across the City of Berkeley to identify and advance the best resource(s) for responding to mental health needs and substance use crises. An effective systemwide change initiative will also require all involved leaders to communicate and champion the shared vision.

The SCU model requires not only collaboration, but also structural changes and integration across other entities. For one, the SCU's ability to respond to crises relies in large part on the 911 Communications Center ("Dispatch"). However, in 2019, a Berkeley City Auditor's report¹⁵ elevated that the understaffing of Dispatch has led to staffing levels that cannot meet the call volume of residents and has increased call wait times. Increased wait times for 911 callers have negative implications for the safety and well-being of service utilizers and community members. Increased wait times also have negative implications for service providers and crisis responders that are responding to a potentially more advanced state of crisis. Additionally, inadequate staffing levels rely on overtime spending to fund Dispatch, which increases the cost of the entity.

The Auditor's report also recommended increased training for Dispatchers to manage and respond to mental and behavioral health crisis calls, including the management of suicidal callers and persons with mental illness. The well-being and stress of call takers are also of concern. In all, if they are not addressed, such resource shortages and unmet training needs could have a significant impact on the SCU's success.

Other entities that will be affected by the implementation of the SCU model include Berkeley Fire, who responds to crises through Dispatch, and the Mobile Crisis Team (MCT), who provide mental health crisis services in partnership with the Berkeley Police Department. These entities, in addition to Dispatch and the SCU, will have to establish new working relationships and protocols to effectively serve the community together.

Dispatch is an immensely complex system. Integrating the SCU into such a system, while addressing staff capacity and training needs, will take significant planning and coordination, as well as funding. For these reasons, the recommendations for the planning and implementation of the SCU model are laid out in a phased implementation approach to allow for sufficient preparation of Dispatch while providing urgently needed mental health crisis response to community members.

¹⁵ Berkeley City Auditor. (2019, April 25). 911 Dispatchers: Understaffing Leads to Excessive Overtime and Low Morale. https://www.cityofberkeley.info/uploadedFiles/Auditor/Level_3_-_General/Dispatch%20Workload_Fiscal%20Year%202018.pdf

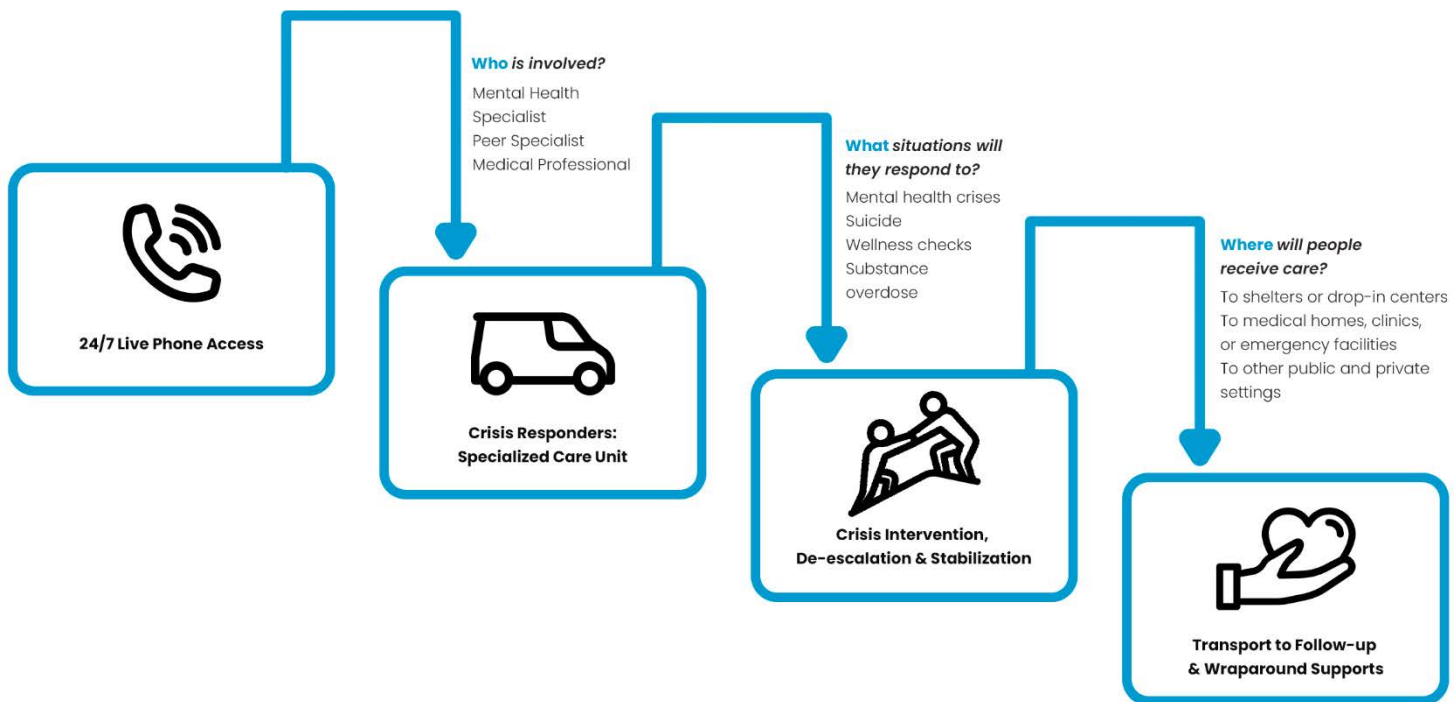

Recommendations

Overview

This report presents recommendations that address what is required for SCU model. Figure 1, below, provides an overview of the specialized care unit’s response. Figure 2 shows the many components required for a comprehensive 24/7 SCU model.

The Specialized Care Unit: Crisis Response

Figure 1: An overview of the SCU crisis response.

Community members experiencing or witnessing a mental health or substance use crisis will be able to call the SCU through a 24/7 live phone line, from which the SCU mobile team will be deployed to the crisis. The SCU mobile team will include specialists who support a person in crisis with intervention, de-escalation, and stabilization techniques. If necessary, the SCU will also be able to transport a person in crisis to locations that promote the person’s safety and care.

The SCU Model: A Comprehensive 24/7 Crisis Response

Figure 2: An Overview of the comprehensive 24/7 SCU model.

The SCU is not solely a mobile team that delivers specialized care during mental health and substance use crises, but rather requires a comprehensive model. This model includes clinical and administrative staff to ensure 24/7 live access to the phone line and SCU mobile team. The model also requires centralized leadership and system integration to realize systemwide changes. As this new model is implemented, it will require ongoing data collection, assessment, and iteration to ensure it is meeting the needs of the community. And, the model requires that community members know that they can call a non-police, specialized mental health and substance use crisis team.

Phased Implementation

A phased approach will support a successful rollout of the SCU model while planning for integration across city agencies. These timelines may be ambitious given the magnitude of this systems-change initiative and the dependencies of the various model components. While the phased implementation approach represents an ideal timeline and is responsive to the urgent need for specialized mental health and substance use crisis response in Berkeley, it may need to be adjusted to realize the success of the SCU.

Refer to **Appendix A** for a complete phased implementation roadmap.

Figure 3: An overview of the phased implementation approach.

SCU Mobile Team

The goal of the SCU is to provide specialized care during mental health crises and substance use emergencies, including crisis intervention, de-escalation, and stabilization. This specialized care does not require a police response but instead should be a three-person team of medical and behavioral health specialists. The SCU will need to be equipped to address the nuanced variety of crisis needs across mental health and substance use emergencies.

By providing 24/7 SCU services, the City of Berkeley asserts that mental health crisis response is of the same importance as other crisis services and limits the need to use the police to respond to such crises. Overall, the SCU model aims to disrupt the criminalization of substance use and mental illness and advance racial justice in the City of Berkeley. There are several considerations for how to most effectively promote the safety of crisis responders, persons in crisis, and general community members.

The following recommendations are aligned to best practices and emerging alternative models, while being rooted in community-driven recommendations. Each recommendation is tailored to the City of Berkeley and provides key considerations to support planning and implementation:

Key Recommendations

- 1. The SCU should respond to mental health crises and substance use emergencies without a police co-response.**
- 2. The SCU should operate 24/7.**
- 3. Staff a three-person SCU mobile team to respond to mental health and substance use emergencies.**
- 4. Equip the SCU mobile team with vans.**
- 5. The SCU mobile team should provide transport to a variety of locations.**
- 6. Equip the SCU mobile team with supplies to meet the array of clients' needs.**
- 7. Clearly distinguish the SCU from MCT.**

Recommendation #1

The SCU should respond to mental health crises and substance use emergencies without a police co-response.

The goal of the SCU is to provide specialized care during mental health crises and substance use emergencies. Below are suggested guidelines of when the SCU should and should not respond to a call.

Types of calls SCU **should** respond to:

- Suicide
- Drug overdose
- Welfare check
- Suspicious circumstance
- Complaint of an intoxicated person
- Social disorder
- Indecent exposure
- Trespassing
- Disturbance

Types of calls SCU should **not** respond to:

- Confirmed presence of firearm, knife, or other serious weapon
- Social monitoring and enforcement (e.g., of unsheltered residents in public spaces)
- Calls that Dispatch already deems do not need an in-person response (e.g., argument with a neighbor, minor noise violation)

Location of calls SCU should respond to:

- Public settings (e.g., parks, sidewalks, vehicles)
- Commercial settings (e.g., pharmacies, restaurants)
- Private settings (e.g., homes)

Note: These guidelines and types of calls will need to be further explored to develop triage criteria that adequately reflect all the considerations for when the SCU will respond to crises.

Why isn't the SCU responding with police?

Stakeholders consistently emphasized the need to provide non-police mental health crisis response options, noting that police are primarily trained in issues of imminent public safety threats, not mental health care. Rather than duplicating the MCT's model, the SCU model provides a new option for those better served by a non-police response. A dedicated response unit for mental health, behavioral health, and substance use emergencies will also help to build community trust and increase the likelihood that someone will call for help when they are in a crisis.

Why is the SCU responding to calls at public and private locations? Is that safe?

A mental health crisis can happen anywhere, so the SCU must be able to respond to mental health and substance use crises in both public and private settings. Any variables around the safety of responding to a crisis in a private setting should be assessed before deploying the SCU team (e.g., the presence of a serious weapon).

How were the types of calls decided?

Research from alternative models in other cities, community stakeholders' perceptions of existing needs in Berkeley, and input from crisis responders in the City of Berkeley all indicate that these call types may be well suited for behavioral health and mental health specialists instead of police. The nuances within any of these call types will be further planned for throughout Phase 0.

Considerations for Implementation

Safety & Weapons:

- Not all weapons pose the same risk to crisis responders, so triage and deployment protocols should be aligned to best practices and standards of practice. The SCU may be able to respond to some calls where a weapon is present. The criteria for this safety precaution should be evaluated and planned for during Phase 0.
- If there is a mental health or substance use emergency where a weapon is present, then MCT-Police co-response should be deployed rather than the SCU.
- If the SCU mobile team is on scene but feels their safety is in imminent danger, they should have the ability to call in the MCT-Police co-response as backup support.

Coordinating with Other Entities

- Mobile Crisis Team: The types of calls, triage criteria, and workflows will need to be differentiated for deploying MCT versus SCU.
- Berkeley Police Department: When BPD is on scene and MCT is not available, BPD and SCU will need clear processes for whether police can bring the SCU to support. Similarly, BPD and SCU will need clear processes for when/how SCU leaves if they call the BPD to a scene.

Recommendation #2

The SCU should operate 24/7.

The SCU mobile team should be available to respond to a crisis in person 24 hours per day, 7 days per week. Not having services available 24/7 was the most common challenge expressed by stakeholders about the current mental health crisis response system. In contrast, other crisis services like Fire and Police are available 24/7. By operating the SCU 24/7, the City of Berkeley asserts that mental health crisis response is of the same importance as other crisis services and negates the need to use police to respond to such crises. The need for 24/7 service is supported by national trends, as although some cities have implemented alternative crisis models with limited hours, many of them shared that they plan to expand to 24/7 to meet community needs.

Why does the SCU need to be available 24/7? Why can't it operate only during peak hours?

A mental health or substance use crisis can happen at any time. Stakeholders stressed the importance of having mental health crisis response services available 24 hours per day and 7 days per week. If community members are to trust in the SCU as an ongoing and authentic alternative to police involvement, services need to be available whenever someone calls.

Considerations for Implementation

All other supporting elements described throughout this report will need to accommodate 24/7 availability, such as:

- Phone access to the SCU
- Certain personnel roles, like a Clinical Supervisor
- Staffing structure that allows redundancy of personnel to cover each shift
- Equipment and infrastructure including the number of vans for the mobile team

Recommendation #3**Staff a three-person SCU mobile team to respond to mental health and substance use emergencies.**

The array of mental health, behavioral health, and substance use services offered by the SCU require staff with varying professional specialties. The following roles are necessary to adequately provide these services:

1. A Mental Health Specialist

This role will be the primary provider of mental health services with the ability to conduct 5150 assessments, and therefore need to be licensed. They should have significant training in mental health and behavioral health conditions and disorders, crisis de-escalation, and counseling.

- Recommended position: Licensed Behavioral Health Clinician
- *Possible positions: Licensed Clinical Social Worker (LCSW), Associate Clinical Social Worker (ASW), SUD or AOD Counselor, psychologist*

2. A Peer Specialist

This role should have lived experience with mental health crises and systems, substance use crises or addiction, and be equipped to support system navigation for a person in crisis.

- Recommended position: Peer Specialist
- *Other possible positions: Community Health Worker, Case Manager*

3. A Medical Professional

This role should be able to identify physical health issues that may be contributing to or exacerbating a mental health crisis, including psychosomatic drug interactions. They should be able to administer single-dose psychiatric medicines and have training in harm reduction theory and approaches. They can also assess and triage for higher levels of medical care as needed.

- Recommended position: Psychiatric Nurse Practitioner (Psych-NP)
- *Other possible positions: Nurse Practitioner (NP), EMT, Paramedic*

Why a three-person team?

These three distinct roles create a team that can effectively provide the necessary range of specialized services and can engage in organic collaboration to address each crisis. Cities who have implemented similar models spoke to the advantage of team members taking different roles in each scenario based on each client's needs and preferences.

Why is the mental health specialist conducting 5150 assessments?

The SCU's aim is to reduce the overall number of involuntary holds through effective crisis intervention, de-escalation, and stabilization. However, ensuring the SCU has the ability to conduct 5150 assessments and involuntary holds rather than calling in the police to do the assessment can reduce interactions between people experiencing mental health crisis and police. Additionally, enabling the SCU to conduct the 5150

assessment is a more trauma-informed model because it eliminates the need for a person in crisis to interact with multiple teams and reduces the time it takes to respond to a crisis from start to finish.

Why is there a peer on the team?

The peer is a critical member of the crisis team. Other systems shared that a person in crisis may be most responsive to a peer who has gone through a similar experience and that, at times, peers' unique training and skills allow them to engage that person more effectively than other specialties. Berkeley stakeholder participants emphasized the invaluable contributions of peer specialists, noting that they may be best equipped to lead the de-escalation before the mental health specialist or medical professional steps in to administer care because a person in crisis may be most responsive to someone that has similar lived experience.

Why is there a medical professional on the team? Why a Psych-NP?

Mental health and physical health needs often co-present, with physical needs ranging from basic first aid (e.g., wound care, dehydration) to reactions to substances, such as overdoses or drug interactions. A medical professional, such as a Psych-NP, brings the clinical expertise to understand how physical ailments, chronic medical conditions, and psychiatric conditions affect a service utilizer (e.g., someone with hypertension and schizophrenia using methamphetamines). Other medical professionals, such as NPs, may also have sufficient training to meet the mental health and substance use needs of service utilizers. These situations do not require the expertise of a paramedic or doctor who are trained to respond to emergencies and deliver life-saving care.

Considerations for Implementation:

- The number of mobile teams required will be based on multiple variables including community needs, call volume, and budget (for a more in-depth description, *refer to recommendation #12*).
- There may be challenges in staffing the SCU mobile team with these specific roles, such as the Psych-NP. The SCU model may need to allow for a variety of specialists to fill each of the three main roles.
- Across these roles, the SCU mobile team should have the following competencies:
 - Lived experience of behavioral health or mental health needs, homelessness, addiction or substance use, and/or incarceration
 - Emphasis on dual diagnosis (mental health and substance use) training, psychosomatic interactions, substance use management, and harm reduction
 - Identities reflective of those most harmed by the current system of care and/or those who are most likely to use or benefit from the SCU services
 - Multilingual
- Across these roles, the SCU mobile team will need to be trained on a variety of topics (for a full list, *refer to recommendation #14*). These may be desirable prerequisite skills, such as:
 - Disarming without the use of weapon
 - Motivational interviewing
 - Naloxone administration
 - Harm reduction
 - Trauma-informed care

Recommendation #4

Equip the SCU mobile team with vans.

Based on the scope of services, the SCU mobile team will need a vehicle to arrive at each call, carry equipment and supplies, and transport clients to another location. A well-equipped van should be both welcoming and physically accessible to clients and easily maneuverable by staff.

SCU vans should include:

- Wheelchair accessible features
- Lights affixed to the top of the van, allowing for sidewalk parking
- Locked supply cabinets
- Rear tinted windows for client privacy
- Rear doors not operable from the inside
- Power ports to charge laptops, tablets, and phones
- Comfortable seating
- SCU logo on the side of the van so the community can easily identify the team

SCU vans should **not** include:

- Sirens
- A plexiglass barrier between the front and back seats

Why not use an ambulance?

There are a several reasons why an ambulance is not the appropriate vehicle for the SCU:

- Ambulances must transport to a receiving emergency department when transporting from the field (a call for service from a community member), which may not always be the most appropriate end point for the level of care required (*refer to recommendation #5*).
- Ambulances require a special license to drive and would require the inclusion of an EMT or paramedic on staff and would therefore increase the expense of the SCU.
- Ambulances are more expensive to purchase and maintain than a van.
- A van is potentially less stigmatizing and traumatizing for a person in crisis.

Why were these specific features chosen?

All van specifications are based on lessons learned from alternative crisis response programs in other cities and experiences and insight shared by the Berkeley Fire Department. Many van features, such as locked supply cabinets and locked rear doors, are designed to increase the safety of both crisis responders and a person in crisis. Other van features support the SCU mobile teams to provide a variety of services.

Why shouldn't the van have sirens or a plexiglass barrier?

Sirens can draw unnecessary public attention, thereby reducing privacy for a person in crisis, while both sirens and plexiglass barriers can exacerbate the stigmatization, traumatization, and criminalization of mental health and substance use crises.

Considerations for Implementation

The number of vans required will be based on the number of SCU mobile teams and shift structure/overlap (*refer to recommendation #12*).

Recommendation #5

The SCU mobile team should provide transport to a variety of locations.

The SCU should provide a level of care appropriate to each specific crisis with the aim of de-escalating crises, preventing emergencies, and promoting well-being. The SCU will transport service utilizers in the SCU van (*refer to recommendation #4*) unless there is a medical need that requires the SCU to request an ambulance for transport.

The SCU will transport service utilizers to:

- Inpatient units of psychiatric emergency departments
- Primary care providers, psychiatric facilities, or urgent care
- Crisis stabilization units, detox centers, or sobering centers
- Drop-in centers and other CBOs
- Shelter or housing sites
- Domestic violence service sites
- Long-term programs including residential rehabilitation sites
- Requested public locations (e.g., parks)
- Requested private locations (e.g., home)

Considerations when deciding transport location:

- Transport can be voluntary or involuntary, based on a 5150 assessment
- The SCU should be able to deny the request of a person in crisis for transportation based on their assessment of the appropriate level of care
- The SCU will need to assess safety or liability concerns for the service utilizer or other bystanders based on transport location (e.g., not transporting an intoxicated person home where another person is present at the home)

Why should the SCU transport service utilizers to so many different locations?

The SCU model aims to support diversion of people experiencing crises away from jails and hospitals and into the appropriate community-based care and resources. Some crises can be resolved on scene, while others will require transport to another location. Even if a crisis is de-escalated on scene, service utilizers may benefit from being transported to another location for additional care or resources. Throughout this project, stakeholder participants emphasized that the level of need outweighs the available resources and providers in Berkeley and Alameda County. Providing transport to a variety of locations and resources allows the SCU to provide the level of care appropriate to each specific crisis and increases the possibility of providing care in an overwhelmed service network. *Refer to Section V for long-term recommendations for addressing the needs of the service network.*

Considerations for Implementation

- Established, trust-based relationships with community partners and warm handoff procedures will improve overall quality of care and can reduce the amount of time required when dropping off a client.
- Staff at emergency facilities will need to be familiar with the SCU, including the van, logo, and uniforms, to be prepared to receive transported clients in a timely and responsive manner, reducing “wall time.”
- Triage criteria and workflows should support the SCU in assessing where and how to transport a person in crisis.
- Triage criteria and workflows for transport should address the safety implications for both the person in crisis and other community members.

Recommendation #6

Equip the SCU mobile team with supplies to meet the array of clients' needs.

The SCU will be responding to a variety of calls, each with their own specific needs. The supplies needed will vary depending on the call. Below is a suggested list of supplies the SCU should carry, generated from the input of stakeholders and other alternative crisis response programs. These supplies will facilitate a harm reduction approach and directly contribute to the health and well-being of the person in crisis.

- | | |
|-------------------------|---|
| Medical supplies | <ul style="list-style-type: none"> • First aid kit • Personal protective equipment • Wound care supplies • Stethoscope • Blood pressure armband • Oxygen • Intravenous bags • Single-dose psychiatric medications |
|-------------------------|---|

- | | |
|--------------------------------|---|
| Client engagement items | <ul style="list-style-type: none"> • Food and water • Clothing, blankets, and socks • Transportation vouchers • "Mercy beers" and cigarettes • Tampons and hygiene packs |
|--------------------------------|---|

- | | |
|----------------------------------|--|
| Community health supplies | <ul style="list-style-type: none"> • Safe sex supplies and pregnancy tests • Naloxone • Clean needles and glassware • Sharps disposal supplies |
|----------------------------------|--|

- | | |
|-------------------|--|
| Technology | <ul style="list-style-type: none"> • Cell phones • Data-enabled tablets • Computer Aided Dispatch (CAD) • Police radio |
|-------------------|--|

- | | |
|-----------------|--|
| Uniforms | <ul style="list-style-type: none"> • Casual dress: polo or sweatshirt with the SCU logo |
|-----------------|--|

Why does the SCU need to carry client engagement items?

These items can help initiate an interaction while also meeting the basic needs of clients while they are experiencing a crisis.

Why does the SCU need to carry community health supplies?

These supplies can help address an underlying physical health need or provide harm reduction for substance use crises.

Why does the SCU need technology and uniforms?

The team needs cell phones and data-enabled tablets for mobile data entry. The tablets should be preloaded with an electronic health record (EHR) application so staff can access client history to provide more effective, tailored care. Wearing a casual uniform can help the team appear more approachable to clients and be easily identifiable. Uniforms that look more like traditional emergency response uniforms can be triggering for clients who have had traumatic experiences with emergency responders.

Considerations for Implementation

- The need for basic provisions among service utilizers is often significant and therefore affects the model's budget. To effectively plan for the program budget, San Francisco's Street Crisis Response Team shared that they budgeted for \$20 in supplies per client contact but quickly exceeded their \$10,000 annual budget. Denver's STAR program noted that these supplies were in high demand and the budget was supplemented with donations.
- Staff should track which supplies are used most often and which supplies are requested by clients that the SCU does not carry.

Recommendation #7

Clearly distinguish the SCU from MCT.

Once the SCU model is implemented, there will be two teams responding to mental health crisis calls in the City of Berkeley: the Specialized Care Unit and the Mobile Crisis Team. It will be necessary to clearly distinguish the role of these two teams so that the proper response is deployed for each situation. The general public will also need to be informed regarding the two teams, how to access them, and why.

Suggested scenarios when MCT and Police should be deployed instead of the SCU:

- If there is a confirmed presence of a serious weapon during a mental health crisis, the police and MCT would be deployed.
- If the police request mental health support during a crisis, MCT will be deployed as a co-response.
- If the SCU is on a call and needs backup or cannot successfully intervene, they would call for an MCT-police co-response.

If there's an SCU, why should the MCT still exist?

When the police respond due to the presence of a weapon or other element outlined above, a joint response that includes clinical staff to support the intervention is a best practice and community asset, delivering a trauma-informed response focused on de-escalation. This is especially true for a person in crisis with past traumatic experiences with the police. The MCT remains an important resource that can reduce the negative impacts of police presence during situations where a mental health crisis intersects with issues of imminent public safety.

Why is it important to distinguish MCT from the SCU?

Trust & Acceptability of SCU: MCT responds to the majority of their calls with police backup. Because SCU is a non-police crisis response option, clearly distinguishing the two models will be essential in establishing and maintaining community trust to increase utilization of the SCU, particularly among groups most at risk of harm from police violence.

Logistics for Deploying the Right Team: Dispatch will need tools and training to clearly differentiate the teams' roles to effectively deploy the right team for each mental health crisis call.

Considerations for Implementation

- All triage criteria and workflows need to be reflective of the differentiation between SCU and MCT. This includes the triage criteria and workflows for Dispatch and/or the alternative phone line and Alameda County's Crisis Support Services (CSS) (*refer to recommendation #9*).
- The distinction between MCT and the SCU, particularly around availability and police involvement, should be emphasized in the public awareness campaign (*refer to recommendation #24*).
- Tracking the acuity levels of calls, as well as whether MCT and police were called in for backup, can help refine the Dispatch process and ensure that the right team is deployed.

Accessing the SCU Crisis Response: Dispatch & Alternative Phone Number

Implementing the SCU as a 24/7 mental health and substance use crisis model requires that community members have reliable and equitable access to the team. By integrating the SCU crisis response into 911 and Dispatch's processes, mental health crisis services will be elevated to the same level of importance as Fire and Police when calling for emergency services, thus promoting community access to specialized crisis care. To reach this goal, the SCU model, City of Berkeley leadership, and Dispatch will need to work together during assessment and planning processes.

The need to develop and implement the SCU model is urgent. Yet Dispatch is a complex, under-resourced, and overburdened system. To achieve structural change that ensures sustainability, significant planning and coordination is essential.

There are several possibilities for how to advance the SCU-911 integration aligned to the phased implementation approach. The following recommendations are aligned to best practices and emerging alternative models and responsive to the needs and concerns expressed by community stakeholder participants. Each recommendation should be further explored, assessed, and discussed across City of Berkeley leadership:

Key Recommendations

- 8. Participate in the Dispatch assessment and planning process to prepare for future integration.**
- 9. Ensure the community has a 24/7 live phone line to access the SCU.**
- 10. Plan for embedding a mental health or behavioral health clinician into Dispatch to support triage and SCU deployment.**

Recommendation #8

Participate in the Dispatch assessment and planning process to prepare for future integration.

Ultimately, the SCU should be integrated into 911 and Dispatch protocols. To reach this goal, the SCU model, City of Berkeley leadership, and Dispatch will need to work together during assessment and planning.

Dispatch, through the Berkeley Fire Department, has conducted a Request for Proposal process and selected a consulting firm to support enhancements to the deployment of Fire and EMS/Ambulance services. That assessment and planning process should integrate SCU implementation, preparing for the SCU to be a mental health emergency response on par with police and fire emergency calls.

If this is a non-police response model, why is Dispatch involved?

An effective mental health crisis response that increases community safety, well-being, and health outcomes relies on the SCU actually being deployed to community members in crisis. Dispatch has established infrastructure and technology that could effectively and safely deploy the SCU mobile team. Moreover, 911 is a well-known resource to the general public, which many people do seek during crises. In 2017, Dispatch received 256,000 calls.¹⁶ For these reasons, integration of the SCU into 911 and Dispatch's processes is an important method for deploying the SCU team to people experiencing a mental health or substance use crisis.

Will another assessment and planning process delay the launch of the SCU?

Dispatch's expertise and experience are a critical asset to lead the assessment, planning, and implementation of revised 911 procedures that include the SCU. The Dispatch assessment and planning project is slated to begin in 2022; by incorporating assessment and planning for the SCU into an existing project, it will initiate the process several months sooner than if a separate and new project were to be initiated. Additionally, integrating both projects will ensure consistent and simultaneous efforts rather than disjointed efforts that require backtracking or undoing of work and decisions.

Considerations for Implementation

- A systems-change initiative of this magnitude will need identified shared aims and goals.
- A systems-change initiative of this magnitude will need Dispatch leadership to champion the effort and communicate early, often, and positively about the upcoming changes.
- By participating in Dispatch's assessment and planning processes, the SCU model can identify opportunities early on that support the integration, such as using aligned terminology and data collection processes.
- A Dispatch representative should join the SCU Steering Committee (*refer to recommendation #20*).
- Dispatch leadership should join the model's centralized coordinating body (*refer to recommendation #19*).

¹⁶ Berkeley City Auditor. (2019, April 25). 911 Dispatchers: Understaffing Leads to Excessive Overtime and Low Morale.

https://www.cityofberkeley.info/uploadedFiles/Auditor/Level_3_-_General/Dispatch%20Workload_Fiscal%20Year%202018.pdf

Recommendation #9

Ensure the community has a 24/7 live phone line to access the SCU.

Implementing the SCU as a 24/7 mental health and substance use crisis model requires a 24/7 live phone line to ensure community members have reliable and equitable access to mental health crisis response. The 24/7 availability is essential for community members to feel confident in the availability of the mental health crisis response, as stakeholders reported that MCT's alternative phone number—which is not live and relies on voicemail and callbacks—does not feel like a reliable resource during crises.

The need to develop and implement the SCU model is urgent and at the same time must achieve structural change to ensure sustainability. Implementing a process for the short-term that must be undone would be an inefficient use of funds and may confuse the public and exacerbate distrust. For these reasons, the following three options should be further considered and assessed for how to most effectively ensure 24/7 live access to the SCU crisis response:

1. Option A: Use the existing 911 Communications Center (“Dispatch”) to deploy the SCU.
2. Option B: Contract to a CBO that can staff and implement an alternative number phone line as part of the SCU model.
3. Option C: Use the 988 National Suicide Prevention Lifeline to receive, triage, and assess all mental health crisis calls.

Table 1 below highlights several factors to consider related to timeline and staff capacity, funding, safety, system integration, and public awareness. Based on these factors, it appears that Option A (using the existing 911 Communications Center to deploy the SCU) would be the best option for the City of Berkeley. However, these factors should be further discussed by City of Berkeley leadership across HHCS and Dispatch with careful consideration of the phased implementation approach and timeline.

Table 1: Options and factors to assess when planning for the community to have 24/7 live phone line access to the SCU.

	Option A *Recommended Option*	Option B	Option C
	Use 911 and existing Communications Center (“Dispatch”) to deploy the SCU.	Contract to a CBO that can staff and implement an alternative number phone line as part of the SCU model.	Use the 988 national phone line to receive, triage, and assess all mental health crisis calls.¹⁷
Timeline & Staff Capacity	<p>Assess Dispatch’s ability to recruit, hire, and train new staff on a timeline aligned to the phased implementation approach.</p> <p>Consider the amount of resources and time required for Dispatch to train existing staff on new protocols.</p> <p>Consider Dispatch’s capacity to support the SCU adoption and integration in addition to the current accreditation process.</p>	<p>Assess whether a CBO can realistically implement both the SCU model and an alternative phone number (i.e., call center), including recruiting, hiring, and training all new personnel.</p>	<p>Monitor the alignment of national, state, and county timelines for 988 implementation.</p> <p>Assess whether the 988 call center will be staffed appropriately for the additional call volume brought in by requests for SCU.</p>
Funding	<p>Estimate the additional funds required for Dispatch to recruit new personnel (i.e., a recruitment team) and manage the Human Resource capacity to support additional staff.</p>	<p>Estimate the cost to create and operate an independent 24/7 live alternative phone line.</p>	<p>Explore the amount of funding and resourcing available for 988 to assess whether the funds sufficiently support the 24/7 SCU.</p>

¹⁷ Gold, J. (2021). How will California’s new 988 mental health line actually work? *U.S. News*. <https://www.usnews.com/news/health-news/articles/2021-10-12/how-will-californias-new-mental-health-hotline-actually-work>

Option A (Recommended)

Option B

Safety Promotes Safety

Evaluate and compare each option’s ability to establish protocols or infrastructure to support the safety of crisis responders and community members.

Dispatch already has established protocols and technology to track the crisis responder’s location/position through CAD.

Assess the resources and timing required for a CBO to ensure sufficient training on the use of the CAD system and radio communication.

Assess the ability for existing Alameda CSS and 988 technology to integrate with Dispatch’s CAD system and radio communication.

Dispatch already has established protocols and technology to maintain radio communication between Dispatch and crisis responders, especially during rapid changes in a situation.

Assess workflows and processes that would affect the number of times a caller must repeat triage/assessment; estimate whether there will be an increase in dropped calls.

Evaluate the effectiveness of existing processes to transfer calls between Alameda CSS and Dispatch.

Dispatch already has established protocols and technology to streamline the handling and transfer of calls so that a person in crisis does not have to repeat their story multiple times, thereby reducing the number of dropped calls.

Consider if a non-911 entity will more effectively reduce police-community interactions during mental health and substance use crises.

Consider if the 988 entity will more effectively reduce police-community interactions during mental health and substance use crises.

Risks to Safety

Evaluate and compare the potential risks to the safety of crisis responders and community members across each option.

Consider whether Dispatch will be more likely to deploy the police than the SCU during initial model implementation.

Consider whether alternative phone line personnel will be more likely to deploy the SCU than transferring calls to 911.

Consider whether community members will be confused about 988 and may believe it is only for suicide prevention rather than the full spectrum of mental health and substance use crises, and therefore be less likely to call 988.

Evaluate whether community members’ fear of a police response, will reduce the utility, acceptability, and accessibility of the SCU.

Evaluate whether community members will be more likely to call an alternative phone number than 911 if they are experiencing a mental health or substance use crisis.

Option A (Recommended)

Option B

System Integration

N/A
(911 is already integrated with Berkeley Fire, Falck, and Alameda County CSS)

Explore the process for a CBO to assess and prepare callers if they need to transfer the call to 911, such as if the presence of weapons is confirmed. Evaluate the effects, such as a slowed response time or increased risk of a dropped call.

Consider whether the transfer of calls to 911 (i.e., calls ineligible for SCU) will undermine community trust in the alternative phone line.

Determine the feasibility of integrating a CBO’s technology to allow for the transfer of calls between Alameda CSS and Dispatch.

Determine the feasibility of a CBO’s technology to receive calls from Fire and Falck if they request the SCU.

Determine whether Alameda County will be able to deploy a Berkeley-specific team (the SCU) for only Berkeley residents as a component within the larger 988 model.

Assess what will be required for a county system to deploy a model administered by a CBO, such as additional contracts, MOUs, or staff licensure requirements.

Public Awareness

Consider what will be required of a public awareness campaign to build community trust in 911 to deploy the SCU as a non-police response.

Consider what will be required of a public awareness campaign to inform Berkeley residents both about the SCU as a non-police crisis response and promote an alternative phone number to access the SCU.

Assess the public awareness and education planned for 988.

Assess whether the Alameda County 988 public awareness campaign can be adjusted for Berkeley to communicate the availability of the SCU through 988.

Why consider different options for phone access to the SCU?

The numerous factors that should be assessed to determine the best option for phone access to the SCU will require a significant amount of collaboration and detailed planning across city leadership, which requires time throughout Phase 0. The general public is familiar with 911 as a crisis response resource. As a result, 911 could be an important method of ensuring mental health and substance use crises are routed to the SCU mobile team. However, stakeholders, especially residents of color and Black residents, consistently shared that the fear of physical violence, criminalization, or retaliation by police in response to mental health and substance use emergencies is a barrier to calling 911. Therefore, a non-911 option may support community members to feel confident in the SCU as a non-police mental health crisis response. Considering and assessing the full array of options will ensure the best approach for a reliable and equitable access to 24/7 mental health crisis response.

Why is Option A elevated as the recommended option?

Overall, Option A is recommended because it appears to be a better fit for the SCU model. It will most likely be the more cost-effective option, will allow for the SCU mobile team to be launched soonest, and will align to the phased implementation approach and the future integration of the SCU into 911.

By pursuing Option A, preparation with Dispatch can begin sooner than the other options, thus allowing for additional time to plan and prepare. This additional planning time can be used to address concerns regarding safety, community trust, and public awareness. Integrating the SCU into 911 from the initial phases of implementation may also support a streamlined and efficient integration. In contrast, Option B will likely require significantly more funding to create an entirely new call center, which may become obsolete once 988 is implemented, nationally. The feasibility and expense of standing up an entirely new call center (option B) may be prohibitive. Option C will require significant coordination with Alameda County and has many implications that are outside of the control of the City of Berkeley, which could cause delays or challenges to the implementation of the SCU model.

Additionally, 911 has established technology and infrastructure for receiving and triaging phone calls, deploying crisis responders, tracking the crisis response to promote responder safety, and collecting data that is essential for monitoring, evaluation, and follow-up. Moreover, for the public awareness campaign, it may be easier to communicate the SCU as a non-police response through 911 than it is to both communicate the SCU as a non-police response and to publicize an alternative phone number.

Why might the model implement an alternative phone number? (Option B or Option C)

First, due to existing community distrust of policing systems, it is important to establish the SCU response as a non-police response. By implementing the alternative phone number first, community members may be encouraged to utilize the SCU. Second, the existing Dispatch system is complex, overburdened, and underfunded. In order to have a successful integration of the SCU within 911, it may require more time for planning for a sustainable integration that ensures community safety. Third, lessons learned from other cities implementing alternative models may indicate this order would support SCU success. For example, the Portland Street Response team can be accessed through both 911 and a non-emergency phone number connected to Dispatch. However, they found that calls from 911 were prioritized rather than calls from the alternative line when deploying the team. Berkeley will need to establish clear prioritization and triage protocols so that the highest-acuity calls receive adequate responses, rather than the response being determined by the source of the call.

Do other cities use multiple phone numbers?

From the reviewed models, at least seven use two or more lines for emergency crisis calls:

- Olympia, WA: Crisis Response Unit
- Sacramento, CA: Department of Community Response
- Austin, TX: Expanded Mobile Crisis Outreach Team (EMCOT)
- Oakland, CA: Mobile Evaluation Team (MET)
- Portland, OR: Portland Street Response
- Eugene, OR: Crisis Assistance Helping Out on the Streets (CAHOOTS)
- Denver, CO: Supported Team Assisted Response (STAR)

If the model uses an alternative phone line, what happens if people still call 911 when they are having a mental health crisis?

Dispatch should have the option to forward calls to the SCU alternative phone line, where those staff can triage the call and deploy the SCU. Establishing these protocols will be part of the assessment and planning process. It is also important that a public awareness campaign promotes access to the SCU team (*refer to recommendation #24*).

Additional Considerations for Implementation:

- The phone line will require dedicated office space and equipment to process calls and deploy the SCU.
- The phone line will need technology and protocols to ensure data collection and integrity to support monitoring and evaluation (*refer to recommendations #22 and #23*).
- The phone line will require enough staff to maintain a 24/7 live response including staff to receive calls and supervisory staff. This team will need to be sufficiently staffed to account for shift overlap, sick leave, and vacation time.
- Additional data collection and planning will be required to determine the adequate number of call takers and fully implement the phone line.
- Option A may require that Dispatch makes more gradual changes to triage criteria, deploying the SCU to a more limited scope of call types with a gradual increase in SCU deployment through Phase 1 implementation.
- Either option B or option C would still require the phone line entity to collaborate with Dispatch to develop types of calls, triage criteria, and workflows to allow for future integration of SCU into Dispatch.
- The future structure of the 911 Communications Center within Berkeley Police Department should be evaluated (*refer to Section V*).

**Please note: Dispatch uses specific terminology that may not be accurately represented here. The language in these recommendations should be understood from a lay perspective rather than rigid technical language (e.g., call takers versus dispatchers, assessment versus triage versus decision-trees).*

Recommendation #10

Plan for embedding a mental health or behavioral health clinician into Dispatch to support triage and SCU deployment.

Embedding a mental or behavioral health clinician within the Dispatch represents a new process for Berkeley's Dispatch and broadens Dispatch's lens from being solely a Police entity to an entity that includes clinical specialists. Dispatch must be involved in planning for this additional team member.

Why should Dispatch have a clinician in the call center?

Embedding a mental health clinician in emergency call centers is an emerging best practice, though only a few cities nationally report staffing their call centers with clinicians. The few cities that have included mental health clinicians in their call centers have found them to be a useful resource. Where implemented, clinicians provide specialized training for call takers to handle behavioral health crisis calls, receive transferred behavioral health crisis calls, and provide guidance.¹⁸

How does having a clinician in Dispatch promote community or crisis responder safety?

Berkeley Dispatch is deeply committed to the safety of crisis responders. In interviews for this project, Austin's EMCOT program¹⁹ shared that embedding a clinician within their call center increased communication around safety and risk assessment during triage, including increased deployment of the crisis response team. They also shared that this integration improved handoffs for telehealth conducted by the clinician. Berkeley should plan for embedding a clinician in Dispatch to support with de-escalation and determinations because it could promote safety.

Why does the clinician need to be part of planning in Phase 0 if implementation is in Phase 1?

This change represents a structural shift for Dispatch, incorporates new roles for a specialized skillset, and changes several workflows. As a result, having a clinician participate in planning in Phase 0 will support successful implementation in future phases. Additionally, given the current significant understaffing and under-resourcing of Dispatch, the clinician can augment staff capacity without Dispatch having to acquire a new, specialized skillset.

Considerations for Implementation:

- Calls that do not require an in-person response should continue to be sent to Alameda County CSS for phone support.
- Staffing structures will need to be adapted, such as determining which roles supervise the clinician and which roles the clinician supervises.
- The clinician may be able to provide training and ongoing professional development to support call takers to identify and address mental health calls.
- There may be a need for multiple clinicians depending on their role and the call volume.
- This recommendation will need to be adapted based on how recommendations #8 and #9 are implemented.

¹⁸ Velazquez, T & Clark-Moorman, K. (2021). New research suggests 911 call centers lack resources to handle behavioral health crises. *ResearchGate*.

https://www.researchgate.net/publication/355684339_New_Research_Suggests_911_Call_Centers_Lack_Resources_to_Handle_Behavioral_Health_Crises

¹⁹ Read more about the EMCOT program here: <http://www.austintexas.gov/edims/pio/document.cfm?id=348966>

Implement a Comprehensive 24/7 Mental Health Crisis Response Model

There are many considerations for realizing the full implementation of a 24/7 model including hiring personnel, establishing clear roles, and providing office space and required materials. Staffing a comprehensive model should seek to address the perceived challenges of existing crisis response systems throughout Berkeley, such as not having 24/7 availability or sufficient staff capacity.

The following recommendations are designed to leverage the lessons learned from other cities implementing non-police crisis response models and be responsive to the needs and concerns expressed by community stakeholder participants. Each recommendation should be further explored as launch and implementation progresses:

Key Recommendations

- 11. Fully staff a comprehensive model to ensure the success of the SCU mobile team, including supervisory and administrative support.**
- 12. Operate one SCU mobile team per shift for three 10-hour shifts.**
- 13. SCU staff and Dispatch personnel travel to alternative crisis programs for in-person observation and training.**
- 14. Prepare the SCU mobile team with training.**

Recommendation #11

Fully staff a comprehensive model to ensure the success of the SCU mobile team, including supervisory and administrative support.

In addition to the three-person SCU mobile team (*recommendation #3*), the 24/7 live phone line (*recommendation #9*), and the clinician in Dispatch (*recommendation #10*), the SCU will require supervisory and administrative support roles. These roles will support the day-to-day services and operations of the SCU mobile team. They also will participate in case management meetings (*recommendation #18*), rapid assessment and monitoring (*recommendation #22*), and model evaluation (*recommendation #23*).

Recommended Personnel Roles & Types of Responsibilities²⁰:**Program Manager**

- Review data from implementation, lead rapid assessment process, support changes and iteration to model
- Liaise with city, Dispatch, and central leadership around implementation, rapid assessment, and coordination
- Manage contract and budget
- Manage scheduling and shifts

Clinical Supervisors

- Oversee and support SCU mobile team, provide consultation for medical and mental health services
- Plan and lead training and professional development for SCU mobile team
- Collaborate with peer specialist supervisor on how to best support SCU mobile team
- Share client and staff feedback to program manager for rapid assessment and monitoring

Peer Specialist Supervisor

- Oversee and support peer specialists on SCU mobile team with an emphasis on emotional support for peers
- Plan and lead training and professional development for SCU mobile team, with an emphasis on utilizing peer specialists and other forms of team communication and support (e.g., advocacy, equal value, communication)
- Collaborate with clinical supervisor

Call Takers / Call Center (*pending implementation of recommendations #8-10*)

- Receive calls from the 24/7 live phone line; triage calls and deploy SCU mobile team, as required
- Receive calls from Dispatch
- Transfer calls that do not require in-person services to Alameda County CSS
- Participate in case management care coordination meetings, as relevant

²⁰ Refer to **Appendix B** for the number of personnel, availability, shifts, and a sample shift structure

Considerations for Implementation

Availability or shift structure for roles:

- The program manager and peer specialist supervisor roles should be available during traditional business hours.
- The clinical supervisor role should be available 24/7 and will require redundancy in hiring.
- The call center will need to be staffed to ensure a 24/7 live phone line. If Option B is pursued (*refer to recommendation #9*), the call center should be situated within the SCU model rather than a separate CBO. This could promote morale and team identity and will increase the quality and efficiency of communication.

Office & Equipment Needs:

- The SCU model will need an office space that accommodates all personnel and their roles, such as daily huddles, desks, and equipment.²¹
- Stakeholders suggested that the SCU would benefit from developing relationships with service utilizers and their families. If these opportunities are pursued as part of the SCU's function, then office space could also accommodate service utilizer and family consultations and/or open "office hours" for relationship building.

²¹ Refer to **Appendix C** for the budget and additional office equipment needs, such as computers, phones, printers, etc.

Recommendation #12**Operate one SCU mobile team per shift for three 10-hour shifts.**

In order to staff a crisis response model that operates 24/7, the SCU should staff one mobile team per shift for three 10-hour shifts. We estimate that the SCU would respond to three to six incidents per 10-hour shift, with each incident requiring 20 to 120 minutes for response and closure. This should generally be manageable by one SCU mobile team.²²

Why 10-hour shifts?

Based on feedback from those operating similar models as well as from community stakeholders, 10-hour shifts are common in residential settings and tend to work well for clinical and mental health staff. There are often labor union protections for shifts longer than 10 hours. Three 10-hour shifts would provide 24/7 coverage while allowing for some overlap before and after each shift.

Why should shifts overlap?

The SCU mobile team shifts should overlap so that the team can conclude engagement with a person in crisis before their shift ends. The next shift would be able to respond to a crisis call that comes in towards the end of the preceding team's shift. The overlap also supports team huddles for care coordination. The shift structure and overlap should include time for the required paperwork at the end of the shift so that there is not an expectation that paperwork is completed during off hours.

Will one SCU mobile team be sufficient?

This estimate is comparable to the call and incident volume reported by Denver's STAR pilot, Portland's Street Response pilot, and Eugene's CAHOOTS program. Though the city population of Denver and Portland are 5.8 and 5.3 times larger than Berkeley's population, respectively, their pilots are restricted to smaller geographic units of the city; Denver and Portland both operate only 1 mobile crisis response team per shift. Eugene's city population is 1.4 times the population of Berkeley, and Eugene operates 1 crisis team per shift, with an additional team during peak hours of 10am-12pm and 5pm-10pm.²³

Considerations for Implementation

- Staffing structure will require redundancy to allow for personnel to take vacation and sick days, and in anticipation of periodic vacancies.²⁴
- Staffing structure may need to plan for on-call or floater shifts.

²² Estimates for SCU call volume are based on analysis of call and service volume by MCT from 2015 to 2019, the Auditor's Report and analysis of Berkeley Police Department's call and service volume from 2015 to 2019, and analysis of Berkeley Fire's and Falck's transport volume and time on task from 2019 to 2021. Please refer to **Appendix D** for more specific analysis and estimates.

²³ The City of Eugene (2019-03240). <https://www.eugene-or.gov/DocumentCenter/View/56579/2019-03240-White-Bird-CAHOOTS-Services---SIGNED>

²⁴ Refer to **Appendix B** for the number of personnel, availability, and a sample shift structure.

Recommendation #13

SCU staff and Dispatch personnel should travel to alternative crisis programs for in-person observation and training.

Although Berkeley's SCU model will be uniquely designed and tailored for the Berkeley community, there are many opportunities to learn from successes and challenges of other models that have implemented non-police mental health crisis response programs. For example, the Denver STAR team shared that their Dispatch team benefited greatly from traveling to Eugene, OR to observe and learn about the CAHOOTS model and plan their deployment protocols.

Options for city programs to visit:

- CAHOOTS: Eugene, OR
- STAR: Denver, CO
- EMCOT: Austin, TX

Recommended personnel to attend:

- Dispatch: Supervisor
- SCU: Clinical Supervisor and Program Manager
- Phone line staff, as relevant (refer to recommendation #9)

Potential program components to observe during site visit:

- Triage criteria and workflows
- Assessing for risk and safety
- Working with the mental health clinicians embedded in Dispatch
- Coordinating and prioritizing calls between 911 and an alternative phone number
- SCU mobile team services and team coordination
- Role clarification

Why should Dispatch and SCU staff travel to these sites together?

This training opportunity would support the collaboration between the SCU and Dispatch in planning for the phased integration. By traveling to the sites together, SCU and Dispatch will not only hear the same questions and answers but can ideate and collaborate on adaptations for the Berkeley SCU model. Finally, this is an important opportunity for relationship building between SCU staff and Dispatch, which is essential to this systems-change initiative.

Considerations for Implementation

- Travel costs will need to be included in the initial budget; estimates for consulting fees from the sites are already included.²⁵

²⁵ Refer to **Appendix C** for the estimated SCU model budget.

Recommendation #14**Prepare the SCU mobile team with training.**

The SCU will require training in a set of specific skill areas to be best equipped to provide mental health crisis response. The personnel hired should already have demonstrated their specialized skill set in previous employment settings; training will therefore support the team to align on how to implement their skills. Training also supports teams to work together and with other entities effectively, such as Dispatch, which is essential in crisis response.

The SCU mobile team should be trained in the following topics:

- General de-escalation techniques
- Disarming without use of weapon
- Substance use management
- Naloxone administration
- Harm reduction theory and practice
- First aid
- Situational awareness and self-defense
- Radio communication
- Motivational interviewing
- Implicit bias, cultural competency, and racial equity
- Trauma-informed care
- Training on data collection protocols and data integrity (refer to recommendations #17 and #18)
- Compliance with confidentiality and HIPAA when interacting with Police and/or Dispatch

How long will it take to train staff?

Eugene's CAHOOTS program includes at least 40 hours of classroom training and 500 to 600 hours of field training for all new staff.²⁶ This equates to 12.5 to 15 weeks of training when calculated on a full-time basis.

What informed these suggested training topics?

These training topics were generated from a variety of alternative model program recommendations and input from Berkeley service providers and community stakeholders.

Considerations for Implementation:

- The phased approach timeline incorporates an estimate aligned to CAHOOTS' model, with room for adaptation.
- Training should be provided to all new SCU staff as they are added to the team, regardless of start date.
- Additional training topics may be identified by the SCU team.

²⁶ Beck, J., Reuland, M., & Pope L. (2020). Case Study: CAHOOTS. Vera. <https://www.vera.org/behavioral-health-crisis-alternatives/cahoots>

Administration and Evaluation

There are many considerations for effectively administering and monitoring implementation of a new, 24/7 mental health crisis response model. Effective implementation includes ongoing collaboration and decision-making at both the structural and provider levels.

At a structural level, the SCU model will require cross-system coordination for implementing new processes and therefore will require leadership across the City of Berkeley and SCU to collaborate around ongoing program monitoring, data review and transparency, and system integration. At a provider level, the SCU model will require collaboration and communication to support care coordination and case management for people that have experienced crisis as well as to elevate emerging challenges and successes.

Moreover, the community can—and must—provide essential advisory capacities. The community should be actively engaged to provide input and feedback throughout the planning and implementation of the SCU, including through the SCU Steering Committee and ongoing opportunities for the general public.

The following recommendations were informed by the lessons learned from other cities implementing alternative crisis models and aim to be reflective of the perspectives shared by the project’s stakeholder participants. Each recommendation should be a starting point to promote cross-sector collaboration, adjusting to accommodate the evolution of the SCU:

Key Recommendations

- 15. Contract the SCU model to a CBO.**
- 16. Integrate the SCU into existing data systems.**
- 17. Collect and publish mental health crisis response data publicly on Berkeley’s Open Data Portal.**
- 18. Implement care coordination case management meetings for crisis service providers.**
- 19. Implement centralized coordination and leadership across city agencies to support the success of mental health crisis response.**
- 20. Continue the existing SCU Steering Committee as an advisory body.**
- 21. Solicit ongoing community input and feedback.**
- 22. Adopt a Rapid Monitoring, Assessment, and Learning process.**
- 23. Conduct a formal annual evaluation.**

Recommendation #15

Contract the SCU model to a CBO.

The administrative structure of crisis response systems across the country varies significantly. Some are administered by government agencies, some are run in collaboration between a government agency and CBO, and some are entirely operated by CBOs. There are several reasons why the SCU model should be contracted to a CBO, at least through Phase 2 of the phased implementation approach.

The SCU crisis response model would benefit from being contracted to a CBO for several reasons:

- **Supports a quick launch:** CBOs are often able to move more nimbly than government agencies, especially as it relates to hiring; adequately staffing the SCU mobile crisis team is a critical element in timely implementation. Given the urgent need, the ability to launch the SCU quickly and provide non-police mental health crisis response services is critical.
- **Established relationships with community members:** Stakeholders made it clear that CBOs have developed strong relationships with service utilizers accessing mental health support, homelessness resources, street medicine, and system navigation and referrals. CBOs in Berkeley have expertise in the community that can be leveraged to advance the SCU's crisis response efforts.
- **Referral networks and partnerships:** A CBO with established networks and partnerships would be well positioned to support service utilizers with referrals as well as transport to community-based resources. Additionally, these relationships can support warm handoffs at transport locations.

Considerations for Implementation

- To contract with a CBO, the City of Berkeley will have to issue a Request for Proposals (RFP). The RFP process will need to evaluate a CBO's capacity to develop and implement a model of this size on this timeline.
- The City should identify a backup plan if no qualified CBOs respond to the RFP.
- The CBO's practices should align to the values and principles of the SCU. The City may need to use contracts and MOU specifications to require:
 - Adequate and equitable wages for all SCU staff and crisis responders, especially peer specialists and peer specialist supervisors.
 - A representative and equitable hiring process that prioritizes staff who are reflective of those most marginalized and harmed by existing crisis response options and the criminal legal system.
 - Necessary data and metrics to collect and report as well as ensuring sufficient technological systems to meet these needs.
- CBOs may face challenges inherent in the contract structure, which should be evaluated and protected against as these challenges can undermine sustainability and longevity.
 - Short-term funding: only funding the SCU in one-year increments can reduce staff retention and inhibit investments in operations (*refer to Section V*).
 - Overhead costs: allocate enough funds for overhead costs (e.g., salary, training, and office equipment), which are critical to SCU success.
 - Contract monitoring: data collection, monitoring, and evaluation are essential to the success and iteration of the SCU but should not be prohibitive to the work.
- There may be additional needs or considerations around data and system integration (*refer to recommendation #16*) and the collaboration across administration and leadership if a CBO implements the SCU; these may need to be included in the contract.
- All recommendations are written with a contracted CBO in mind; additional implications may arise during planning and Phase 0.

Recommendation #16

Integrate the SCU into existing data systems.

Having access to patient data will support the SCU to provide tailored, informed, and equitable services for those experiencing mental health and substance use crises. Access to existing data systems, such as an EHR, will not only ensure that the SCU has access to relevant patient information, but also that other providers are aware when, how, and why their client might be interacting with crisis response. Finally, integrating the SCU into existing data systems will ensure aligned and consistent data collection, which is essential for the rapid assessment monitoring (*refer to recommendation #22*) and evaluation (*refer to recommendation #23*).

There are many factors outside of the purview of the SCU, HHCS, or even that City of Berkeley that affect whether data and system integration can be achieved. These factors include patient privacy and legal protections (i.e., HIPAA), technological capabilities, available funding, logistics across private and government entities, and more. As a result, this recommendation is included as an aspiration that should be planned for in future phases and may not be realized during Phase 1 of implementation.

- Bidirectional, live data feeds should be integrated between the SCU and other data sources, including but not limited to:
 - EHRs used by major medical systems and Federally Qualified Health Centers (FQHC)
 - Alameda County's Community Health Record (CHR)
 - Alameda County's YellowFin

Why does the SCU need to access service utilizers' records, such as EHRs?

Access to an EHR allows crisis responders to make informed decisions based on a service utilizer's health history. This access also enables crisis responders to communicate directly with a service utilizer's existing support team, such as psychiatrists or case managers, when providing crisis response or referring the service utilizer for follow-up care.

Is it common for crisis responders and clinicians to have access to service utilizer records?

Many other crisis response programs enable access to these sources of data. For example, the Alameda County Community Assessment and Transport Team (CATT) has access to the county's CHR. Providers at FQHCs, including programs like Lifelong's Street Medicine Team, have access to an integrated EHR. Berkeley Mental Health (BMH) is already integrated with the county's YellowFin reporting system. Other city models, such as Denver STAR, enable their crisis responders to access existing data systems.

Why should the data feeds be bidirectional?

Not only do crisis responders need to access service utilizer medical history, but the data they collect during a crisis response should be entered into the centralized data systems so that a service utilizer's existing support team has an updated and complete case history. The county's CHR has live data feeds from many providers and so the SCU's data should also have bidirectional capabilities when possible.

Considerations for Implementation

- The Berkeley City Attorney and IT have signed onto the county's CHR, and many CBOs and medical providers have also already signed onto the CHR, which could facilitate the SCU's integration into this system.
- The SCU will need access to EHRs and the CHR to participate in client case management meetings (*refer to recommendation #18*).
- SCU team members will need training and support to accurately enter data into these platforms, which is essential to data integrity.
- Legal protections for confidentiality and consent will have to be carefully assessed to determine the feasibility of this recommendation and implementation approach.
- Many health conditions can be criminalized and prosecuted. The SCU data must be separate from Dispatch and CAD data because Dispatch is situated within Berkeley Police Department. Presently, Dispatch does not have access to EHRs or the CHR, and in the future, this separation should continue.

Recommendation #17

Collect and publish mental health crisis response data publicly on Berkeley's Open Data Portal

Data collection is essential to monitoring and evaluation and spans across the SCU mobile team and supporting personnel, Dispatch and/or the alternative phone line, and central leadership. Given how many different personnel and agencies will be collecting and reviewing data, it is essential that data collection be planned for early in Phase 0 to ensure alignment, accuracy, and data integrity.

- Types of data that should be collected and published:
 - Call volume
 - Time of calls received
 - Service areas
 - Response times
 - Speed of deployment
 - Determinations and dispositions of Dispatch (including specific coding for violence, weapons, and emergency)
 - All determinations and deployed teams from Dispatch
 - Percentage of calls responded to by SCU of all calls sent to SCU
 - Type or level of service needed compared to the initial determination at the point of Dispatch
 - Service utilizer outcomes
 - Number of 5150 assessments conducted
 - Number of 5150s confirmed and involuntary holds placed
 - Number of transports conducted
 - Location of transport destinations
 - Type of referrals made
 - Priority needs of clients served (housing, mental health)
 - Number of requests for police involvement
 - Racial demographics of service utilizers
 - Other relevant characteristics of service utilizers, such as homelessness status or dementia

Note: not an exhaustive list.

- Examples of public data dashboards from alternative crisis models:
 - [Portland's Street Response data dashboards](#)
 - [NYC's B-HEARD monthly data reports](#)

How does data collection promote community safety and health?

Nationally, many emergency call centers lack consistent data collection and internal sharing and review, suggesting city administrators and leaders are unable to effectively use data to understand the scope of behavioral crisis and response in their communities.²⁷ Collecting data in a way that can be used among program administrators will be essential in supporting the success of the SCU and positive outcomes for the community. Moreover, during this project, it was impossible for RDA to conduct an “apples-to-apples” analysis between data from any of the contributing agencies (Police, Fire and Falck, MCT, Dispatch/Auditor’s Report) because the data entry practices across each agency are inconsistent. Specifically, the variables that each agency records for each call response are not the same. In instances where there were similarities in the types of variables used between agencies, the values that they each used to enter or code their data were not comparable.

Why does publishing data publicly matter?

Publishing data through Berkeley’s Open Data Portal could promote transparency around crisis response services, address community stakeholders’ distrust of the system, and keep the community informed about the SCU and the city’s crisis response services.

Considerations for Implementation

- Multiple agencies are likely to engage in data collection that contributes to the SCU model. All data variables and definitions should be aligned to ensure system integration and data integrity, including:
 - CAD data
 - Additional 911 and Dispatch data (as applicable)
 - Alternative phone number data (as applicable)
 - SCU mobile team data
 - EHR data
 - CHR data
- Personnel will need ample training on data collection, including variable definitions and data entry processes, to ensure a high degree of data integrity.
- Staff will need adequate technology to collect and report on data (*refer to recommendation #6*).

²⁷ Velazquez, T & Clark-Moorman, K. (2021). New research suggests 911 call centers lack resources to handle behavioral health crises. *ResearchGate*.

https://www.researchgate.net/publication/355684339_New_Research_Suggests_911_Call_Centers_Lack_Resources_to_Handle_Behavioral_Health_Crises

Recommendation #18

Implement care coordination case management meetings for crisis service providers.

Service utilizers often receive care across multiple agencies and individual service providers, but transparency and visibility of service utilizers that move in and out of these agencies is a challenge. Regular case management coordination meetings across organizations and providers could help to address the perceived lack of coordination across different services and to improve the care coordination for service utilizers, such as those discharged from inpatient facilities.

Who should participate:

- SCU mobile team
- Service providers and case managers identified through CHR and EHRs
- Partners and those receiving referrals at CBOs
- A designated meeting coordinator (e.g., SCU program manager, city staff)

What the meetings should achieve:

- Discuss care for shared service utilizers
- Discuss needs of high service utilizers, services provided
- Discuss successes or challenges with warm handoffs and referral pathways

How is care coordination relevant to crisis response?

Care coordination supports providers in making informed decisions about the services to provide and can prevent future crisis. Throughout the project's qualitative data collection, service providers in Berkeley commonly provided the idea of care coordination meetings between the SCU and providers; they expressed that if their clients access SCU crisis services, they would benefit from collaborating with the SCU. The REACH Edmonton program also shared that meetings for frontline workers to discuss shared clients increased positive client outcomes. Finally, Berkeley's Transitional Outreach Team (TOT) shared challenges they have encountered when providing follow-up care after MCT responds to an incident, especially communicating with the many external providers that interact with a single service utilizer.

Why is there a coordinator role in these meetings? Who is that?

Based on the lessons learned from other cities implementing alternative crisis response models, such as the REACH Edmonton and Denver STAR programs, care coordination meetings will require a centralized coordinator or leader from the SCU. Frontline workers do not have the capacity to manage these meetings, which includes scheduling, note taking, preparing data, following up on items as necessary, and other duties. The care coordinator may be an administrative staff member of the SCU, such as the program manager, or a staff member from the City of Berkeley who oversees many of the relevant contracted providers (beyond the SCU).

Considerations for Implementation:

- These meetings will require a clear owner to manage meeting topics, prepare data, identify non-urgent items for follow-up, and ensure equitable power and time talking, especially for peer specialists. The SCU program manager may be best poised for this role.
- Integrated data systems that allow for sharing data and reviewing case history across providers would enhance care coordination and case management (*refer to recommendation #16*).
- There may be a benefit to call takers joining these meetings if they identify and document who is in crisis.

Recommendation #19

Implement centralized coordination and leadership across city agencies to support the success of mental health crisis response.

Overall, programs benefit from ensuring there are one or more people responsible for coordinating the program at a birds-eye view. As a new mental health crisis response initiative, the SCU model will require cross-system coordination for implementing new processes, training, monitoring, and evaluation. Moreover, because these initiatives span across Dispatch and/or an alternative phone number, the SCU mobile team, and other referral entities like Fire, Police, MCT, TOT, and mental health and social service providers, a centralized coordinating body will be essential to the success of this far-reaching initiative.

Who should participate:

- Berkeley Dispatch
- Berkeley Department of Public Health
- Berkeley Mental Health (BMH)
- Berkeley Health, Housing & Community Services Department (HHCS)
- SCU Program Manager
- Berkeley Fire Department
- Berkeley Police Department
- Other relevant parties as the project evolves

What the meetings should achieve:

- Progress along the phases of implementation
- Lead the rapid assessment processes and regularly review data
- Review SCU Steering Committee feedback
- Review service utilizer and stakeholder feedback
- Prioritize issues
- Make decisions

Additional outcomes:

- Increase open communication across city agencies
- Build trust across crisis responders and city departments
- Align all partners on shared values for increasing community health and well-being

Why is the Berkeley Police Department involved in this leadership body if the SCU is a non-police response?

Because the police currently respond to all mental health calls received through 911, any decision about shifting specific call and service types from police to SCU will require BPD buy-in, communication, and planning. Moreover, Dispatch is currently situated within BPD, and therefore, BPD leadership will be required to assess and approve changes to Dispatch. For instance, to ensure that all SCU data is kept confidential and separate from police, BPD will need to support planning for CAD data to integrate with SCU in a compliant manner. Finally, police may be able to request SCU deployment, so these types of protocols will need BPD's input.

Considerations for Implementation:

- These meetings will need a clear owner to schedule meeting times, prioritize agenda topics, prepare data, identify non-urgent items for follow-up, and coordinate follow-up communication to relevant stakeholders.
- A data dashboard will support data review and rapid assessment processes.
- Some agencies may have strong bargaining presence or positional power, such as BPD. It is important that these meetings uphold equitable power and weight in making decisions.
- Throughout Phase 0 and Phase 1, this group may need to meet on a weekly basis.
- Additional stakeholders may need to be added to this group (permanently or ad hoc for specific topics), such as representatives from emergency departments, John George Psychiatric Hospital, or other city or county stakeholders.
- As the model progresses, this group may discuss opportunities to improve the mental health crisis system at a broader scale, beyond the scope of the SCU's crisis response, such as more inter-county and inter-city coordination on systemic issues related to housing.

Recommendation #20

Continue the existing SCU Steering Committee as an advisory body.

Presently, the SCU Steering Committee has representatives with ties to community groups and stakeholders. The SCU Steering Committee should continue as an advisory body to incorporate into decision-making spaces the perspectives that may otherwise be neglected in government spaces.

The SCU Steering Committee should continue to advocate for marginalized communities in the SCU model design and delivery by taking on an advisory role through Phase 0 and Phase 1 of implementation, at a minimum.

The current participants should remain, if they choose, including:

- Berkeley Community Safety Coalition
- Representatives from the Mental Health Commission
- HHCS staff
- BMH staff
- Berkeley Fire

Additional participants should be added, including:

- Relevant staff from the SCU or administrative CBO, such as the program manager or clinical supervisor
- Dispatch personnel, particularly someone in a leadership position who can both promote change and holds expertise relevant to implementation

Considerations for Implementation

- HHCS staff should maintain the role of coordinating the SCU Steering Committee, even if a contracted CBO leads the SCU, because HHCS will lead other aspects of oversight including contract management.
- Additional participants may be added to the SCU Steering Committee at different times. For example, Dispatch personnel should join earlier in Phase 0 of implementation, while SCU personnel will join once that team is fully staffed in Phase 1.

Recommendation #21

Solicit ongoing community input and feedback.

Governments often face barriers in hearing from community members that are the most structurally marginalized. However, engaging existing coalitions and networks designed to represent marginalized service users' perspectives can support more equitable engagement. Intentional outreach for these opportunities is essential because, historically, government institutions and other structures have prevented the full and meaningful engagement of Black people, Indigenous people, people of color, working class and low-income people, immigrants and undocumented people, people with disabilities, unhoused people, people who use drugs, people who are neurodivergent, LGBTQ+ people, and other structurally marginalized people. Prioritizing the engagement, participation, and recommendations of the community members most harmed by existing institutions, including those most harmed by police violence, will ensure that systems of inequity are not reproduced by a crisis response model.

Instead, community engagement can support the SCU to address structural inequities. In addition to the SCU Steering Committee, ongoing opportunities for the community to provide input to decisions as well as feedback about their experiences will be valuable to the SCU model throughout Phase I.

Suggested methods to receive community input and feedback:

- Focus groups
- Town halls or community forums
- On-site outreach
- Questionnaire
- Online feedback "box"

Modalities should ensure equitable access to participation:

- Online and in person
- Large groups, small groups, and one-on-one
- Anonymous
- Written and verbal
- Translation and interpretation

Encourage participation among:

- Service utilizers
- Community members with mental health and behavioral health needs who have not yet engaged with the SCU
- Service providers at CBOs, especially those receiving SCU transports and referrals

Address structural barriers to participation by:

- Using convenient, accessible, and geographically diverse locations
- Offering events at varying times to accommodate different schedules
- Providing financial compensation
- Providing childcare

Why is more community engagement needed if community input informed the model?

The robust community engagement that contributed significantly to the development of this model demonstrates the valuable perspective and knowledge held by community members about the types of services needed and how to make them more accessible and acceptable. Soliciting ongoing feedback once the SCU is launched will provide insight to how well the model is meeting community members' needs and where barriers to crisis care persist, servicing both quality improvement and evaluative needs.

Why should ongoing community engagement be conducted?

Community input and feedback should not be limited to the end of Phase 1 as part of a summative evaluation, but instead be ongoing to account for the changing landscape of SCU model implementation and the needs of both service utilizers and the broader community. It will also support ongoing iteration of the SCU throughout Phase 1, while planning for more complex modifications in Phase 2.

Considerations for Implementation

- The opportunities for community input and feedback should be held regularly, such as monthly, or quarterly.
- Frequent service utilizers, perhaps identified during the SCU's first three months of implementation, could be the primary recruitment base for feedback.
- Address barriers to equitable participation in feedback, such as by providing childcare, transportation vouchers, or financial compensation for time.
- Community feedback should be evaluated as essential data points that directly inform the rapid assessment processes (*refer to recommendation #22*).

Recommendation #22

Adopt a rapid monitoring, assessment, and learning process.

Many crisis response programs use data to monitor their ongoing progress and successes, modify and expand program pilots, and measure outcomes and impact to inform ongoing quality improvement efforts. Data collection, data system integration, centralized coordination across city leadership, the SCU Steering Committee, and ongoing input and feedback from community members and service utilizers (*recommendations #16, #17, #19, #20, and #21*) should all contribute to the monitoring that supports ongoing implementation, assessment, and iteration.

A rapid assessment process will likely need to:

- Develop a shared vision for the SCU model.
- Develop goals for the SCU model.
- Create assessment questions to guide the monitoring and learning process.*
- Define indicators or measures.
- Use a mixed-methods approach, including quantitative programmatic data and feedback from service utilizers, staff, and other stakeholders.

All model components will benefit from assessment, including:

- Availability of the team, accessibility of Dispatch and/or alternative phone line, response time
- Services provided, expertise of mobile team, training
- Equipment, vehicles, and supplies
- Transport, service linkages and handoffs, partnerships with CBOs
- Case management meetings and centralized leadership coordination
- Data collection, data integration, data integrity, and data transparency
- Public awareness campaign

Consider using the Results-Based Accountability (RBA) framework²⁸ to assess SCU performance aligned to:

- Quantity of SCU services
- Quality of SCU services
- The impact or outcome of SCU services

*From the shared vision, create assessment questions to use throughout the duration of Phase 1, such as:

- Is there a need to scale and increase services?
- Are resources being used efficiently in the pilot? Will they be used efficiently with an increase in services?
- How effective is the current approach? Will it be effective with an increase in services?
- Is the current approach appropriately tailored to the Berkeley community? Is it appropriate for the Berkeley community?

²⁸ The City of Berkeley is using RBA for performance monitoring efforts and therefore may benefit from using RBA for the SCU model too.

Figure 4: Rapid Monitoring, Assessment, and Learning Process

A rapid monitoring, assessment, and learning process can happen in multiple venues. Some questions may be assessed on a quarterly basis, while others can happen on a monthly or weekly basis.

Considerations for Implementation:

- The rapid assessment process will need to establish clear roles for leading the meetings and decision-making, especially between the SCU program manager and central coordinating leadership.
- The rapid assessment process will benefit from clear timelines and processes for reviewing data, discussing changes and adaptations, and sharing findings across relevant stakeholders.
- The rapid assessment process may have multiple processes or venues based on specific data points or meeting frequencies. Clarify who should be attending, such as Dispatch, the alternative phone number (if applicable), the SCU mobile team, HHCS leadership, and others.

Recommendation #23**Conduct a formal annual evaluation.**

Several components of the SCU – including the model’s services, the SCU mobile team’s training, the deployment determinations of Dispatch and/or the alternative phone line, and impacts and outcomes for service utilizers – offer potential for demonstrating the success of the model through formal evaluation. The evaluation should measure whether the SCU model is progressing towards the intended outcomes, as well as suggest opportunities for modifications and expansion. Design of a formal, annual evaluation is best done early in program planning.

Evaluation may define:

- A Theory of Change or Logic Model
- Short-term and medium-term goals

Evaluation could measure:

- Fiscal analysis, especially evaluation of progress towards the City’s aim of reducing BPD’s budget by 50%
- Systems change effectiveness, including evaluation of progress towards City’s goal of reducing the footprint of BPD to criminal and imminent threats
- Program efficacy/effectiveness, quality of service
- Service utilizer outcomes
- Ongoing barriers and challenges that Phase 2 can address
- Effectiveness of public awareness campaign, whether community members know about it
- Impacts aligned to a Racial Equity Impact Assessment²⁹

Evaluation should include:

- Qualitative and quantitative data
- Perspectives from SCU personnel
- Perspectives from service utilizers
- Perspectives from adjacent organizations, staff, and SCU Steering Committee

How is the proposed evaluation different than rapid monitoring?

Evaluation and rapid monitoring, or quality improvement, are complementary and should inform each other. Rapid monitoring is intended for more immediate quality improvement and occurs on more frequent cycles to guide iterative implementation of specific model elements. Evaluation asks broader questions from a greater degree of distance to guide adjustments to the model that will support ongoing effectiveness and sustainability. Staff are typically central to rapid monitoring to facilitate ongoing improvements, but an evaluation is generally conducted by an outside team that has some distance from day-to-day operations.

Considerations for Implementation

- If the City of Berkeley intends to contract out the evaluation, then the RFP and contracting process should be initiated early in Phase 0 to allow for adequate planning.

²⁹ To learn more about Racial Equity Impact Assessments, visit:

https://www.raceforward.org/sites/default/files/RacialJusticeImpactAssessment_v5.pdf

Promoting Public Awareness

Promoting public awareness of the SCU and its aims will be essential to the SCU's success. Public education efforts should be advanced through a variety of methods, including a far-reaching campaign and targeted outreach. These efforts should emphasize that the SCU is a non-police crisis response service and promote how to access the SCU (i.e., which phone number to call). Overall, promoting public awareness is essential to building trust and addressing fears or reluctance that might inhibit people to call for support during a mental health or substance use crisis.

Promoting awareness and establishing relationships with other providers in the response network is also important, especially staff at emergency facilities who may interact with the SCU during the transport of a person who has experienced a mental health or substance use crisis. This type of relationship-building and education can streamline processes to promote positive outcomes for people in crisis.

The following recommendations should be adapted and implemented to advance public education and awareness about the SCU model:

Key Recommendations

- 24. Launch a public awareness campaign to promote community awareness and education about the SCU.**
- 25. The SCU mobile team should conduct outreach and build relationships with potential service utilizers.**

Recommendation #24

Launch a public awareness campaign to promote community awareness and education about the SCU.

For the community to be able to call for an SCU response, they must know that it exists. Stakeholder input throughout this project has indicated that community members must trust that the SCU provides a crisis response without the use of law enforcement for the SCU to be a viable and sought-after crisis response option. For these reasons, promoting public awareness of the SCU and its aims will be essential to the SCU's success.

Aims of the campaign:

- Emphasize the SCU as a non-police mental health and crisis response option
- Distinguish the roles and responses of SCU, MCT, and police
- Promote how to access the SCU (i.e., through 911, an alternative number, or 988)
- Describe when SCU will not respond (e.g., social monitoring, weapons) and when it will (e.g., types of services).
- Emphasize the community engagement that informed the model
- Share the availability of Berkeley Open Data
- Promote opportunities for ongoing stakeholder input and feedback

Why is it important to launch a public awareness campaign?

To inform the community of this new resource and to distinguish the SCU as a non-police response. Stakeholder input throughout this project has indicated that community members must trust that the SCU provides a crisis response without the use of law enforcement for the SCU to be a viable and sought-after crisis response option.

How do other cities promote their crisis response model?

Other cities provided examples of promoting awareness outside of mass media. For example, Portland's Street Response team contracts with street ambassadors with lived experience (via a separate contract with a local CBO) who perform direct outreach to communities and work to explain the team's services and ultimately increase trust with potential service utilizers.

Considerations for Implementation

- The methods of the campaign may need to be tailored to the targeted stakeholder groups and may include:
 - Mass media, billboards, advertisements on public transportation, radio announcements, local newspaper announcements, updates to the city's social media and websites, updates to service providers' and CBOs' social media.
 - Business cards with contact information for potential service utilizers.
 - "Meet-and-greets" that the SCU mobile team hosts with service providers at CBOs and emergency facilities.
- The public awareness campaign may have multiple phases, such as first promoting awareness of the SCU and how to access it, and then promoting opportunities for stakeholder feedback.

Recommendation #25

The SCU mobile team should conduct outreach and build relationships with potential service utilizers.

In addition to a public awareness campaign that promotes the SCU as a community resource, shares how to access the SCU, and emphasizes the non-police design, many service utilizers may still be reluctant to engage with a new entity. As a result, to most equitably meet the needs of potential service utilizers and especially substance users, the SCU may need to conduct in-person outreach. This outreach should be targeted to specific groups who are most likely to call the SCU with the aim of establishing trusting relationships and sharing more about their harm reduction approaches.

Targeted sites for relationship building with potential service utilizers:

- Encampments
- Safe parking RV lots
- Drop-in centers
- Downtown Berkeley
- People's Park
- Emergency department waiting rooms

Why might service utilizers be reluctant to engage in services with the SCU?

Many community members have personally experienced the criminalization of substance use and mental health emergencies, whether through their own experiences or having witnessed the experiences of family, friends, or community members. Such carceral approaches include involuntary psychiatrist holds and unnecessary transport to hospitals. In particular, unsheltered residents and substance users may be more distrustful of a new team and be less likely to call during a crisis. In interviews, unsheltered residents shared that not all of their substance use management are being adequately addressed by current crisis responders and they experience high rates of transport to emergency departments. Many also shared that they fear police retaliation for their substance use. In general, there are several reasons why community members may be hesitant about engaging crisis responders, which could be addressed by individual, relational outreach.

Why would relationship building improve utilization of the SCU?

Despite many service utilizers reporting overall distrust of first responders, they also shared that EMTs have developed trusting relationships and strong rapport for handling overdoses. Because of this relationship, service utilizers are more willing to call for an EMT to respond to an overdose. Similarly, having strong relationships built on trust will be key to the success of the SCU.

Considerations for Implementation

- If there are periods of low call volume, the SCU may use those times as opportunities to build relationships in communities of potential service utilizers and proactively provide services.
- This outreach may also be implemented based on data and findings or in preparation for Phase 2 expansion and changes.

System-Level Recommendations

The development of a mental health crisis response model as a component of the City of Berkeley's emergency services should be understood as a systems-change initiative of great magnitude. There are several critical factors that must be attended to in order to realize the full implementation of the SCU and to progress towards its intended outcomes.

Addressing the Needs of Dispatch

There is an urgent need for a 24/7 mental health and substance use crisis response model that does not rely on law enforcement to provide specialized mental health care. To provide this service, crisis responders must be connected to those in crisis. Thus, the role of Dispatch is essential.

Dispatch needs a full assessment and planning process to address the complexity of the 911 response system. This assessment and planning, though urgent, cannot be done hastily. The SCU will benefit if Dispatch is able to:

- Address the understaffing, under-resourcing, and identified training needs of call takers.
- Plan for a sustainable integration.
- Plan for a variety of scenarios to ensure crisis responder and community safety.
- Participate in the SCU phased-implementation approach and ongoing collaboration with SCU leadership.
- Establish trusting relationships and rapport with the SCU so that call takers are confident in deploying the SCU for scenarios they previously would have deployed MCT or Police.

A Sufficient Investment of Resources

A lack of sufficient resources is not only a challenge for Dispatch, but is a common challenge expressed by service providers in Berkeley and in other locales. Within the City of Berkeley, both TOT and MCT have challenges meeting the needs of community members because their hours of operation are limited, and they do not have enough staffing and resources to provide 24/7 services. This results in the perception of slow or delayed response times and can decrease the likelihood that callers continue to seek that service. Efforts in other cities, such as the Mental Health First and MACRO initiatives in Oakland and the Street Crisis Response Team in San Francisco, have also had to restrict their hours of availability and services due to a lack of sufficient funding.

Mental health crisis response could be essential in promoting health equity in the City of Berkeley. However, if it is not sufficiently resourced to provide 24/7 crisis response without long wait times, it will not achieve trust, and will become utilized less often and will therefore not achieve the desired systems-change results. This resourcing includes not only the SCU mobile crisis team, but the entirety of the model and related infrastructure, from the call center to program manager. Sufficient resourcing also includes dedicated time by city leadership to support coordination, collaboration, and problem-solving.

The Role of Trust

Trust was one of the most discussed factors across stakeholder engagement and will be a critical ingredient to the success of this system-wide change initiative. The public awareness campaign and all Phase 0 planning processes must address the concerns and doubts that could undermine trust across community stakeholders, the service provider network, and city leadership.

Trust will shape whether community members utilize the SCU. Community members must trust that the SCU:

- Is a non-police crisis response.
- Is accessible and available 24/7.
- Is responsive to emerging needs and ongoing community input and feedback.
- Provides competent harm reduction and non-carceral approaches to mental health and substance use crisis intervention.

Trusting relationships affect the quality of referrals, warm handoffs, and service linkages across the service provider network. Service providers emphasized that trust plays a role in:

- Whether they will refer a client to another provider.
- The amount and type of information they disclose about a shared client.
- Whether systems will choose to share and integrate data.

- The quality of collaboration and communication during warm handoffs, care coordination, or at client discharge.

Trusting relationships are essential to centralized coordination and collaboration among city leadership.

The SCU model will require a variety of agencies and departments to work together in new ways and toward new ends. Other cities implementing alternative crisis models shared that trust was enhanced across leadership by:

- Aligning on shared values and commitment to improving health outcomes for people in crisis.
- Recognizing and adapting to the varied cultures of city departments, agencies, and CBOs.
- Ensuring decision-making power is allocated in alignment with the aims of the crisis model, such as ensuring that law enforcement does not have an unaligned or inequitable of voice or power in making decisions.
- Reviewing data to promote accountability and celebrate successful outcomes.
- Planning for sufficient time to prepare and participate in collaboration.

Conclusion: Next Steps & Future Considerations

This report presents recommendations for a model that is responsive to community needs. Still, there were numerous questions, issues, needs, and considerations that surfaced that were beyond the scope of the project. Decisions around those factors could significantly shape the types of services the SCU provides as well as how it is coordinated and administered across agencies. Such considerations are pertinent to the future of the SCU, crisis response, and the mental health service system in Berkeley, and therefore should continue to be discussed by city leadership and those implementing the SCU.

Long-Term Sustainable Funding

The SCU model requires long-term sustainable funding. A sound fiscal strategy must recognize the robustness of costs associated with the SCU and plan for institutionalizing and sustaining those costs. There are a number of potential funding sources for the SCU model, including Medi-Cal reimbursement, Medi-Cal opportunities through CalAIM, and DHCS grants. However, these funding streams are unlikely to sustain a crisis response model on their own. Other funding and resources may need to be braided into the SCU to effectively implement this model.

While braiding allows for maximizing funding resources, it also requires clear and separate tracking of services based on funding sources and requirements. With multiple funding streams, the target populations, reporting requirements, eligibility criteria, and performance measures can vary greatly. A braided funding model, therefore, requires knowledgeable administrators as well as dedicated time to manage. This can be especially resource-intensive for a CBO implementing the SCU. The SCU model will need to be very clear about the funding requirements and develop an appropriate system for ongoing tracking and reporting.

Different financing mechanisms provide varying levels of sustainability and predictability, considerations which should inform the development of a fiscal strategy for the SCU model. Unfortunately, these recommendations may not be fully realized if there is not a long-term sustainable fiscal strategy. Modifications to the SCU model could negatively impact the quality of service delivery or lessen the population impact.

Across the country, some cities have used a sales tax to fund their alternative crisis response models while others have redirected funds away from police departments. Rather than identifying new or short-term grant awards, a primary consideration for the City of Berkeley should be to look to dollars that can be reinvested from the Berkeley Police Department, in alignment with the Reimagining Public Safety initiative, to develop a sustainable and comprehensive SCU model.

Continue Planning for 24/7 Live Phone Access to the SCU

Significant planning will be required to fully realize the 24/7 live phone access to the SCU (*refer to recommendations #8, 9, and 10*). Reaching out to existing call centers—such as Alameda County CSS—or to other cities implementing similar crisis models could support the development of the phone access to the SCU. Additional planning is needed to determine, at a minimum:

- Equipment and technology needs
- Staffing requirements for the estimated call volume
- Recruitment, hiring, and training
- Workflow and protocol development
- Cost and funding availability

The Location of 911 Dispatch Within the Berkeley Police Department

The 911 Communications Center is currently operated by the Berkeley Police Department. This structure affects how Dispatch is funded and who makes decisions. As the role of Dispatch is broadened to coordinate a greater variety of responses to emergencies, there may be advantages to moving Dispatch outside of the Berkeley Police Department, such as improved communication and coordination across relevant agencies. For instance, it has been expressed that Dispatch call takers are currently more comfortable deploying the police than other crisis responders given their long tenure and rapport with police officers, so call takers' ability to establish rapport with the SCU team is needed for them to be comfortable deploying the SCU. Structural changes like this may also align to several of the Reimagining Public Safety initiative's aims. This consideration can be explored as part of the assessment and planning processes of the phased implementation approach.

Preventing Social Monitoring: Clarifying the SCU's Guiding Principles

The SCU model is designed to ensure that mental health specialists respond to people experiencing mental health crises. However, there is significant and justified concern that the SCU could be co-opted to support the social monitoring and enforcement of unsheltered residents. Clarifying the SCU's guiding principles could support in reifying the intentions of the model to ensure that all practices are aligned with those principles.

There are several elements within the model design where data, ongoing conversation, and service utilizer feedback can ensure that the SCU lives out its intention. One such example is whether and how the SCU would be deployed with the police and/or how the SCU is distinguished from MCT. For example, if a caller reports an unsheltered neighbor is residing on their sidewalk or driveway, this may not qualify for an SCU response. However, if that call is deployed to the police, then the response effectively criminalizes unsheltered Berkeley residents. Such scenarios should be explored as the SCU model is implemented, refined, and expanded.

Address the Full Spectrum of Mental Health and Substance Use Crisis Needs

Mental health and substance use crises vary in severity along a spectrum. A crisis can present as someone in immediate danger to themselves or others, someone who needs regular support to address their basic needs, or someone who is generally able to manage their needs but needs occasional support to prevent a future crisis.

Throughout this project, many stakeholders expressed that in order to effectively address the challenges of the current system, solutions and changes must engage with the nuances and spectrum of mental health crises:

- Some forms of crisis are readily visible while others are not.
- Some forms of neurodivergence are reported as a mental illness or crisis, but they are not.
- Some forms of crisis occur because the person is unable to access services to meet their needs.
- Some forms of emergency service utilization stem from ongoing unmet basic needs such as food and affordable housing.

Stakeholder participants urged that the concept and definition of a mental health crisis and crisis services be expanded to not only support crisis intervention but also prevention, diversion, and follow-up. The following two considerations should be further explored because they may support the SCU model. Both considerations represent a form of

reimagined public safety and may be realized with additional resources, such as funds divested from Berkeley Police Department:

Expand the SCU Model to Include a Follow-up Care and Coordination Team

There will likely be a need for a team to receive referrals from the SCU mobile team and connect with service utilizers for follow-up care. Follow-up care could include referrals, system navigation, and case management support. This team may also need to conduct outreach to make contact with service utilizers and address barriers to care as needed. For example, some service utilizers may be unable to follow through with a referral if they do not have reliable access to transportation or experience challenges maintaining scheduled appointments. This team could potentially be funded by the 988 funding allocated to dedicated follow-up teams deployed from 988 crisis call centers.³⁰

There are many lessons that should be learned from the existing Transitional Outreach Team (TOT), such as challenges they face with adequate staffing and funding or constraints and limitations with who they can serve. Any initiatives around follow-up care should augment rather than duplicate the TOT.

Increase the Number of Sites for Non-emergency Care for Berkeley Residents

Throughout this project, stakeholder participants emphasized the need for sites for non-emergency care, such as drop-in centers, day centers, sobering sites, and respite centers. These services are important for harm reduction and crisis prevention, and as such would support the outcomes of the SCU model. There may be opportunities in Phase 0 or Phase 1 to reserve beds at a shelter or similar care facility as a temporary measure, ensuring persons in crisis have access to these beds after engaging with the SCU. However, increasing the overall number of sites for non-emergency care would require a longer-term investment

³⁰ Santos, M (2021). New suicide prevention hotline aims to divert callers from police. *Crosscut*. <https://crosscut.com/politics/2021/07/new-suicide-prevention-hotline-aims-divert-callers-police>

 **Appendix**

Appendix A: Launch Timeline & Phased Implementation Approach

Phase 0 – Launch Timeline
Nov 2021 – May 2022

System-Level: Planning, Launch, Implementation		HHCS	Steering Committee	Dispatch	Contracted CBO
	Engage community on feedback to SCU Model recommendations	X	X		
	Engage community on SCU RFP requirements	X			
Dec	Dispatch leadership communicates and champions (internally) the SCU change-initiative			X	
	Plan for Dispatch assessment (e.g., determine if RFP needed)	X		X	
Jan	Make decisions about 24/7, live phone line to SCU (option A, B, C)	X	X	X	
Feb	Issue RFP for SCU	X			
	<i>Issue RFP for SCU alternative phone line (TBD)</i>	X			
	RFP Deadline				
Mar	Review all RFPs	X	X		
	Select awardee for SCU	X	X		
	Begin planning for site visits	X		X	X
Apr	Contract process for SCU	X			
May	Hire SCU personnel (mobile team, supportive and administrative roles, Dispatch/phone staff)				X
	Hire mental health clinician to support Dispatch assessment & planning	X		X	
	Build relationships across all new personnel	X	X	X	X
June - Aug	<i>Plan & Implement Recommendations: Refer to Phase 0 Implementation Approach</i>				

Phased Implementation Approach	Phase 0		Phase 1		Phase 2	Future, Beyond Phase 2
	Nov 2021 - Aug 2022		Implementation Sept 2022 - Aug 2023	Planning for Phase 2 Sept 2023 - Feb 2024	Feb 2024+	
SCU Mobile Team Recommendations						
1 The SCU should respond to mental health crises and substance use emergencies without a police co-response	Clarify specific factors and codes for all suggested SCU call types	Develop triage criteria and workflows across all SCU call-types and services.	Coordinate with other entities (BPD, MCT, UCPD) for differentiation and/or collaboration.	<i>SCU mobile team goes live, providing services</i>	<p>Consider additional types of calls for service that they can respond to where armed police officers are not needed or aligned to a reimagined definition of public safety, such as:</p> <ul style="list-style-type: none"> - Completing documentation while providing crisis services where a traditional "police report" is needed, such as in cases of sexual assault, sexual harassment, and rape - Petty theft - Nonviolent conflicts, such as neighbor disputes or youth behavioral issues - Minor assaults, with no weapons present - Proactive support at events that may trigger a crisis (e.g., during an encampment sweep) 	Integrate other SCU model elements (e.g., follow-up care team [Report Section V])
2 The SCU should operate 24/7						
3 Staff a 3-person SCU mobile team to respond to mental health and substance use emergencies						
4 Equip the SCU Mobile Team with vans	Procure vans					
5 The SCU Mobile Team should provide transport to a variety of locations	Introduce SCU to emergency facility staff at all transport destinations					
6 Equip the SCU mobile team with supplies to meet the array of clients' needs	Procure supplies					
7 Clearly distinguish the SCU from MCT	Develop clear roles and parameters for SCU and MCT teams by collaborating across Dispatch, the SCU Steering Committee, the current MCT team, and other relevant leadership			Evaluate the role of MCT and the efficacy of having both teams.	Communicate to general public and relevant service providers about changes relevant to the distinguished roles of MCT and SCU	
	<i>Note: These decisions are essential for developing triage criteria and workflows and for communicating to the general public in a public awareness campaign.</i>			Make recommendations for Phase 2, such as changes to each team's scope or processes.		

Phased Implementation Approach

Phased Implementation Approach	Phase 0	Phase 1		Phase 2	Future, Beyond Phase 2
	Nov 2021 - Aug 2022	Implementation Sept 2022 - Aug 2023	Planning for Phase 2 Sept 2023 - Feb 2024	Feb 2024+	2
Accessing the SCU Crisis Response					
8 Participate in the Dispatch assessment and planning process to prepare for future integration	<p>Decide the most effective method for 24/7, live phone access to the SCU (Option A, B, C)</p> <p>Dispatch makes investments in staffing and technologies, as needed</p> <p>SCU model discusses with Dispatch the necessary data (variables, definitions, timelines, privacy, etc.) to be collected during each Phase of implementation</p> <p>Dispatch begins planning for changes to CAD or other data systems</p>	<p>Dispatch makes investments in staffing and technologies, as needed</p> <p><i>Dispatch implements Phase 1 protocols, as determined by Phase 0 planning (Option A, B, C)</i></p>	<p>Implement new triage criteria and workflows</p>		
9 Ensure the community has a 24/7 live phone line to access the SCU	<p>Implement and adapt 24/7, live phone line access to SCU (Option A, B, C)</p> <p>Adapt protocols for other Berkeley crisis responders (Fire, EMS/Falck, MCT, Police) to request SCU support through the alternative phone number</p> <p>Dispatch and HHCS/SCU identify opportunities for Phase 1 implementation (based on Option A, B, C), such as: - Phase 1 call types for SCU deployment OR preliminary calls that Dispatch will transfer to the alternative phone line in early Phase 1 (e.g., welfare checks) - Dispatch supports alternative phone line to develop aligned triage criteria and workflows to support future integration</p>	<p><i>If Option B or C: Plan for how calls will be triaged and prioritized from the two separate sources (alternative number and 911) in deploying the SCU mobile teams in Phase 2</i></p>	<p>Determine if the SCU should respond to crises by sight ("proactive" deployment and intervention)</p> <p>Determine if the SCU should self-deploy by listening to the police radio (based on other models: Eugene's CAHOOTS, Denver's STAR, and San Francisco's Street Crisis Response Team)</p>	<p><i>If Option B or C: Integrate SCU into 911</i></p>	
10 Plan for embedding a mental health or behavioral health clinician(s) into Dispatch to support triage and SCU deployment	<p>Dispatch hires one clinician to support the Dispatch assessment process and to support triage criteria and workflow development for calls routed to SCU</p> <p>Clinician attends trainings and site observations with Dispatch and SCU</p> <p>Clinician(s) supports planning for triage criteria, call-types, etc. <i>(as relevant: Option A, B, C may affect timing of this)</i></p> <p><i>If Option A:</i> Dispatch prepares for fully embedding clinician(s), including clarifying their roles and supervision structure</p> <p><i>If Option B or C: implement this in Phase 2</i></p>	<p>Clinician(s) support Dispatch based on the assessment findings and next steps, such as: - supervises call-takers triaging mental health crisis calls - provides trainings to call-takers based on 2019 Auditor's Report and ongoing assessment</p>			<p>Assess whether clinician(s) can provide services beyond SCU deployment, including basic telemedicine and psychiatric screenings or psychiatric crisis assessment</p>

Phased Implementation Approach

	Phase 0 Nov 2021 - Aug 2022	Phase 1		Phase 2 Feb 2024+	Future, Beyond Phase 2
		Implementation Sept 2022 - Aug 2023	Planning for Phase 2 Sept 2023 - Feb 2024		
Implement a Comprehensive, 24/7 Mental Health Crisis Response Model					
Fully staff a comprehensive model to ensure the success of the SCU mobile team, including supervisory and administrative support roles for SCU					
11					
12 Operate one SCU mobile team per shift for three 10-hour shifts					
13 SCU staff and Dispatch personnel should travel to alternative crisis programs for in-person observation and training	<p>incorporate into training timelines to allow for these periods of travel and training. <i>Note: City of Berkeley and/or the contracted CBO may need to reach out to the other cities and programs to solidify travel and training plans prior to the hiring of any individual personnel.</i></p> <p>Allot time after the site visit(s) for debriefing, reflecting on lessons learned, and discussing how to integrate key takeaways into the SCU model.</p> <p>Include in debrief and planning conversations personnel that traveled for site observations, HHCS staff, additional Dispatch leadership, and Steering Committee members as needed.</p>				
14 Prepare the SCU mobile team with training, informed by community needs		Plan the training schedule based on community needs, ongoing assessment and planning, and prerequisite skills and experiences of hired personnel			

Phased Implementation Approach	Phase 0		Phase 1		Phase 2	Future, Beyond Phase 2
	Nov 2021 - Aug 2022		Implementation Sept 2022 - Aug 2023	Planning for Phase 2 Sept 2023 - Feb 2024	Feb 2024+	2
Administration and Evaluation						
15 Contract the SCU Model to a CBO				Extend contract and provide funding for Phase 2, as applicable		Determine if the SCU can be administered through the City of Berkeley, elevating it to the status of Police and Fire as an essential citywide emergency service and ensuring long-term sustainability
16 Integrate SCU into existing data systems	Assess feasibility of data integration across various systems and sources: assess system capacity needs to realize integration, seek consultation on legal issues surrounding patient protections and sharing health data across providers Evaluate implications for Recommendation 18 (care coordination case management meetings) based on feasibility and adaptations from this recommendation (Recommendation 16) Maintain and strengthen data privacy before SCU is integrated with Dispatch (given that Dispatch is situated within Berkeley Police and that many health conditions can be criminalized and prosecuted)		Continue: Assess feasibility of data integration across various systems and sources: assess system capacity needs to realize integration, seek consultation on legal issues surrounding patient protections and sharing health data across providers Coordinate with Alameda County Care Connect to plan for bi-directional data feeds with the Community Health Record (CHR) Plan for access to EHRs and other relevant data systems			
17 Collect and publish mental health crisis response data publicly on Berkeley's Open Data Portal	Coordinate with City of Berkeley to add new data to Portal Plan for how regularly data will be refreshed/updated on Portal	Publish data regularly				
18 Implement care coordination case management meetings for crisis service providers	Involve all relevant agencies in planning to define, align, and adjust data definitions, variables, and collection practices. (e.g., 911-Dispatch, MCT, BPD, BFD, Falck, HHCS, SCU, etc.) Engage potential participants to plan for Phase 1 implementation of care coordination case management meetings (identify and confirm participants, confirm meeting intervals, set meeting times, etc.)	Convene and implement care coordination meetings				
19 Implement centralized coordination and leadership across city agencies to support the success of mental health crisis response	Engage potential participants to plan for Phase 1 implementation of centralized coordination and leadership meetings (identify and confirm participants, confirm meeting intervals, set meeting times, etc.)	Convene and implement centralized coordination and leadership meetings				

Phased Implementation Approach

	Phase 0 Nov 2021 - Aug 2022	Phase 1		Phase 2 Feb 2024+	Future, Beyond Phase 2
		Implementation Sept 2022 - Aug 2023	Planning for Phase 2 Sept 2023 - Feb 2024		
<i>Administration and Evaluation (continued)</i>					
20 Continue the existing SCU Steering Committee as an advisory body	Identify additional Steering Committee members Invite and engage new members Adapt processes, group norms and agreements, and/or meeting schedules, as relevant Decide on methods and intervals for collecting community input and feedback during Phase 1	Hold regular meetings of SCU Steering Committee; incorporate decision-making processes across other Recommendations			
21 Solicit ongoing community input and feedback	Develop a plan to communicate the opportunities for community and feedback; incorporate into public awareness campaign	Solicit ongoing community input and feedback; incorporate decision-making processes across other Recommendations			
22 Adopt a rapid monitoring, assessment, and learning process	Plan for the evaluation and rapid assessment processes to use overlapping data and be mutually-supportive and streamlined Plan for all data definitions and collection processes to be aligned across rapid assessment and evaluation aims.	Ensure that the evaluation findings are available for the latter six-months of Phase 1 to support planning for Phase 2	Review evaluation findings Plan for Phase 2		
24 Launch a public awareness campaign to promote community awareness and education about the SCU	Plan for public awareness campaign, including targeted modalities, targeted audiences, and/or phased timing Launch public awareness campaign	Continue public awareness campaign, as necessary			
25 The SCU mobile team should conduct outreach and build relationships with potential service utilizers	Conduct targeted outreach and establish trusting relationships between SCU and community members, promoting utilization of SCU	Continue targeted outreach and build relationships as necessary			

Appendix B: Sample Shift Structure & Redundancy Needs

Model Component	Phase	Staffing Needs	Shift Type	M	T	W	Th	F	Sa	Su	No. of shifts (week 1)	No. of shifts (week 2)	No. of staff per unit	No. of units	No. of FTE needed	Notes

Executive Summary

The City of Berkeley contracted with Resource Development Associates (RDA) to conduct a feasibility study to inform the development of Specialized Care Unit (SCU) pilot to respond to mental health crises without the involvement of law enforcement. RDA's feasibility study includes community-informed program design recommendations, a phased implementation plan, and funding considerations. RDA's first report from this feasibility study was a synthesis of crisis response programs in the United States and internationally. This second report details RDA's synthesized findings from speaking with and collecting data from a myriad of City of Berkeley and Alameda County agencies, community-based organizations (CBOs), local stakeholders and community leaders, and utilizers of Berkeley's crisis response services.

This report has two focus areas: 1) describing the City of Berkeley's current mental health crisis response system, including the roles and responsibilities of the various agencies involved and basic quantitative data about the volume of mental health crisis calls received; and 2) sharing key themes from RDA's qualitative data collection efforts across the Berkeley community.

Presently, callers experiencing a mental health crisis typically call 911, Mobile Crisis Team (MCT) phone line, or the Alameda County Crisis Support Services phone line. Depending on the assessment of the call, phone or in-person services are deployed. All these points of access could result in a police response.

In Berkeley, while there are a variety of programs and service provided by Berkeley Mental Health, Berkeley Police, Berkeley Fire, and an array of community-based organizations, there is an overall insufficient level of resources to meet the volume and types of mental health crisis needs across the city. Stakeholder participants urged that the concept and definition of a mental health crisis and crisis services be expanded to include the full spectrum of a mental health crisis, including prevention, diversion, intervention, and follow-up. Through this lens, stakeholders identified strengths and challenges of the existing crisis response system, described personal experiences, and shared ideas for a reimagined mental health crisis response system.

Key Themes from Stakeholder Feedback

Perceptions of the urgent need for a non-police mental health crisis response in Berkeley

Perceptions of varied availability, accessibility, and quality of crisis response services

Perceptions of insufficient crisis services for substance use emergencies

Perceptions of a need for a variety of crisis transport options

Perceptions of a lack of sites for non-emergency care

Perceptions around supporting the full spectrum of mental health crisis needs

Perceptions of a need for post-crisis follow-up care

Perceptions of barriers to successful partnerships and referrals across the mental health service network

Perceptions of needs to integrate data systems and data sharing to improve services

Perceptions of a need for increased community education and public awareness of crisis response options

Participants were asked to share their ideas for alternative approaches to mental health and substance use crises as well as to share community needs for a safe, effective mental health and substance use crisis response. Such perspectives illuminate the perceived gaps in the current system that could be filled by a future SCU. These perspectives are summarized as guiding aspirations for reimagining public safety and designing a response system that promotes the safety, health, and well-being of all Berkeley residents.

Community Aspirations

Stakeholder-identified opportunities to address the root causes that contribute to mental health, homelessness, and substance use crises

Stakeholder-identified opportunities for centering BIPOC communities in crisis response

Stakeholder-identified opportunities for community oversight to ensure equitable and transformative crisis care

Introduction

In response to the killing of George Floyd by Minneapolis police in May 2020 and the ensuing protests across the nation for this and many other similar tragedies, a national conversation emerged about how policing can be done differently in local communities. The Berkeley City Council initiated a broad-reaching process to reimagine policing in the City of Berkeley. As part of that process, in July 2020, the Berkeley City Council directed the City Manager to pursue reforms to limit the Berkeley Police Department's scope of work to "primarily violent and criminal matters." These reforms included, in part, the development of a Specialized Care Unit (SCU) pilot to respond to mental health crises without the involvement of law enforcement.

To inform the development of an SCU, the City of Berkeley contracted with Resource Development Associates (RDA) to conduct a feasibility study that includes community-informed program design recommendations, a phased implementation plan, and funding considerations. RDA's first report from this feasibility study was a synthesized summary of its review of the components of nearly 40 crisis response programs in the United States and internationally. This second report details RDA's synthesized findings from speaking with and collecting data from a myriad of City of Berkeley and Alameda County agencies, community-based organizations (CBOs), local stakeholders and community leaders, and utilizers of Berkeley's crisis response services.

With the guidance and support of an SCU Steering Committee (led by the Director of City of Berkeley's Health, Housing and Community Services Department), RDA conducted a large volume of community and agency outreach and qualitative data collection activities between June-July 2021. The goal of this immense undertaking was to understand the variety of perspectives in the local community regarding how mental health crises are currently being responded to as well as the community's desires for a different crisis response system that would better serve its populations and needs. The City of Berkeley will be implementing an SCU that consists of a team of providers – that does not include law enforcement representation – who will respond to mental health crisis situations in Berkeley. Given that this is happening, RDA's data collection focused on obtaining perspectives that could inform the development of Berkeley's SCU; in contrast, RDA's data collection was not targeted at understanding the validity or utility of having a SCU in Berkeley.

RDA's outreach and data collection efforts yielded a large volume of information. In order to ensure this report is accessible to a wide audience - in both the length and breadth of findings - RDA's analysis of all the information it collected was led by a clear goal of identifying common themes across its many data sources. Additionally, RDA sought to distill all findings into manageable pieces that could be succinctly written about in this report.

This report has two focus areas: 1) describing the City of Berkeley's current mental health crisis response system, including the roles and responsibilities

of the various agencies involved and basic quantitative data about the volume of services provided; and 2) sharing the common themes from RDA's qualitative data collection efforts across the Berkeley community. It is important to note upfront that given the limited quantitative data available about Berkeley's historical mental health crisis response calls – as documented and described in much depth by the Berkeley City Auditor's study (released in April 2021) entitled "Data Analysis of City of Berkeley's Police Response"¹ – this report is focused on qualitative data. That data allows for a better understanding of what this set of stakeholders feels about the current crisis system and their hopes for an improved system. After sharing information about Berkeley's current mental health crisis response services, this report shares information from RDA's qualitative data collection activities with local agencies, CBOs, stakeholders, and utilizers of crisis response services.

Communitywide Data Collection

In order to fully understand the current state of the mental health crisis system in the City of Berkeley, RDA engaged a variety of stakeholders in gathering both quantitative and qualitative data. As this is a community-driven process, much of the data collection was through engaging members of the Berkeley community. These methods will be described below.

Note: Please refer to the following section, [What is the current mental health crisis call volume in Berkeley?](#) for a description of the project's quantitative methods.

Community Engagement Planning Process

To bring resident and other stakeholder voices into community planning efforts, RDA worked closely with the SCU Steering Committee² to develop a comprehensive, inclusive, and accessible outreach and engagement plan. The goal of this plan was not to reach a group that was "representative" of all Berkeley residents, but rather to hear from those that receive crisis response services, those that call or initiate crisis

¹ https://www.cityofberkeley.info/uploadedFiles/Auditor/Level_3_-_General/Data%20Analysis%20of%20the%20City%20of%20Berkeley's%20Police%20Response.pdf

² Berkeley Specialized Care Unit Steering Committee members: Colin Arnold, Paul Kealoha Blake, Jeff Buell, Caroline de Bie, Margaret Fine, Maria Moore, Andrea Pritchett, David Sprague, David McPartland, Marc Staton, Lisa Warhuus, and Jamie Works-Wright.

response, and those whose voices are commonly omitted from city planning efforts. The plan focused on those who are most marginalized by the current system and are most at risk of harm. These groups include, but are not limited to the following:

- Individuals who are frequently targeted by policing, including:
 - Black and African Americans
 - Native Americans
 - Pacific Islander Americans
 - Latinx Americans
 - Asian Americans
 - SWANA (Southwest Asia and North Africa)
- People who have experienced a mental health crisis
- People experiencing or at risk of homelessness
- People who use substances
- Gay, Lesbian, Bisexual, Queer, Transgender and Non-Binary people
- Seniors and older adults
- Transition age youth (TAY)
- People with disabilities
- Survivors of domestic violence and/or intimate partner violence
- People returning to the community from prison or jail
- Veterans
- Immigrants and undocumented residents

RDA and the steering committee also reached out to a wide range of advocates, service providers, and CBOs. In addition to wanting to understand the current state of crisis services from a provider perspective, one of the objectives for reaching out to these advocacy and community organizations was to leverage their community and client connections to reach the target populations.

Once the target groups were identified, RDA and the SCU Steering Committee developed a specific outreach plan and interview guides for each group. The outreach strategy was designed to maximize accessibility by providing multiple opportunities for engagement. Interview guides³ were customized to each group but followed the same set of four core questions:

1. People's experiences with, and perceptions of, the current mental health and substance use related crisis response options;
2. Challenges and strengths of current mental health and substance use related crisis response options;
3. Ideas for an alternative approach to mental health and substance use related crises; and
4. Needs identified by the community for a safe, effective mental health and substance use related crisis response.

³ For an example interview guide, see [Appendix A](#).

This set of four questions was also used to create a survey distributed to providers unable to attend focus groups, their clients, other service utilizers, and the broader Berkeley community.

It is important to note that mental health crisis affects everyone. RDA purposefully focused engagement efforts on groups that are most often marginalized and at risk of harm from the current crisis system, but in so doing, was an approach that may not have brought in all voices impacted by mental health crisis. The key themes brought out by stakeholders, therefore, may not be fully representative of the broader Berkeley community. Instead, the key themes reflect the perspective of those most impacted by the current system.

Data Sources

All outreach activities occurred between June and July 2021. RDA engaged the community in a variety of in-person and virtual mediums including interviews, focus groups, shadowing, and surveys. In total, RDA conducted 18 focus groups, 51 individual interviews, 1 full day of shadowing dispatch at BPD, and administered 1 online survey.

The CBOs and community members that were targeted for outreach skewed towards either agencies serving unhoused populations in Berkeley or individuals who were unhoused. This was an intentional strategy to reach a population that is generally underrepresented in community-wide data collection efforts. But, as mentioned above, mental health crises can affect anyone, not just those who are unhoused.

Below is a list of groups that were engaged in interviews or focus groups as part of this process.

Type of Group	Organizations/Departments (# individuals)
City of Berkeley & Alameda County	<ol style="list-style-type: none"> 1. Berkeley Fire Department 2. Berkeley Fire Department – Mobile Integrated Paramedic (MIP) 3. Berkeley Mental Health 4. Berkeley Mental Health - Mobile Crisis Team 5. Berkeley Mental Health – Crisis, Assessment, and Triage (CAT) 6. Berkeley Mental Health - Homeless Full Service Partnership 7. Berkeley Mental Health – Transitional Outreach Team (TOT) 8. Berkeley Police Department - Key Informants 9. Berkeley Police Department – Dispatch 10. Berkeley Police Department - Community Services Bureau 11. Berkeley Police Department - Public Safety Officers 12. City of Berkeley - Aging Services 13. LifeLong Medical Care - Street Medicine 10. Needle Exchange Emergency Distribution (NEED) 11. Pacific Center 12. UC Berkeley School of Social Welfare 13. Women's Daytime Drop-In Center
Service Utilizers	<ol style="list-style-type: none"> 1. People's Park 2. Seabreeze encampment 3. Planting Justice

Demographics of Participants of RDA's Data Collection Efforts

RDA was able to reach a large demographic of providers, service utilizers, and community members across these engagement efforts. These data collection efforts were not focused on providers of mental health care, substance use disorder care, or insurance companies like Kaiser Permanente or the Alameda Alliance. This was a purposeful decision to gain the insight of those who are outside of the current system of care. Demographic information was not gathered for City of Berkeley or Alameda County staff.

Overall, RDA received information from more people in the 30-44 range than any other age range. As compared to Berkeley's overall population, service utilizers and providers who identified as Black or African American were overrepresented in RDA's data collection efforts. There were far more cisgender participants than transgender participants overall, though a higher proportion of service utilizer respondents were transgender compared to survey respondents and provider respondents. RDA collected feedback from more than double the number of female-identifying participants than male identifying participants. Overall, there were very few genderqueer or nonbinary participants. The most common zip codes of participants were 94710, 94702, 94703, and 94704. For more a more detailed description of participant demographics, see [Appendix B](#).

Impacts of COVID-19 Pandemic on Data Collection

The COVID-19 pandemic made it challenging for this project to engage with participants for data collection. The rise of the Delta variant in August 2021 further complicated matters. Many non-medical social service providers in Berkeley had suspended or limited their in-person services with clients due to the pandemic, so RDA was unable to connect with clients in-person. Invitations were sent to case managers and group/individual counselors to forward to their clients in hopes of interviewing clients, but this did not prove to be effective. Aside from being unable to connect with participants in-person, many providers were overwhelmed with ongoing COVID-19 emergency response and unable to participate in focus groups or the survey. Eleven agencies were in conversation with RDA but were unable to attend any focus groups or submit a survey, and 34 agencies did not respond to attempts to connect. Despite these challenges, RDA found considerable themes and patterns in the data that was collected for this project and feel strongly that the data and perspectives presented here represent the scope of the issues pertinent to mental health crisis response in the City of Berkeley.

Overview of Berkeley Crisis Response

What is the current mental health crisis response system in Berkeley?

To understand where the gaps are in the mental health crisis response system in Berkeley, it is important to understand each component and the surrounding landscape of providers and services. The following section describes the process of a mental health call, key city and county entities involved in the crisis system, and other community-based organizations who provide crisis services. This information was gathered during key informant interviews with city and county staff, CBO provider focus groups, and consulting online materials.

Process of Response to a Mental Health Call⁴

When someone makes a call for a mental health crisis, they will typically call 911, the Mental Health Division's Mobile Crisis Team (MCT) phone line,

⁴ See [Appendix C](#) for a flowchart of this process.

or Crisis Support Services of Alameda County. The caller is often a family member, friend, or bystander.

If the call goes to 911, the staff member at Berkeley dispatch receives the call. They use the Emergency Medical Dispatch (EMD) protocols to assess whom to deploy to the scene: fire, police, or an ambulance. When assessing a call for the presence of mental health issues, they consider many factors including the possibility of violence against the caller or others, certainty or uncertainty of violence, whether the person is using substances and what type of substance, the coherence of the person's thoughts or behaviors, and background noises. Callers can specifically request MCT, in which case dispatchers may call MCT on the radio and request an MCT call-back for the caller.

If they determine that services can be delivered over the phone, they can transfer the call to Alameda County Crisis Support Services (CSS). If CSS cannot resolve the crisis, they will send the call back to dispatch for an in-person response. If an in-person response is required, they will transfer the call to the appropriate dispatcher staff. Calls with a potential for violence or criminal activity are transferred to police dispatch. Police can call the Berkeley Mobile Crisis Team (MCT) for backup if it is clear that there is a mental health component to the situation. Calls that involve mental health are sent to police dispatch. Police will then alert the MCT that they are needed on-scene. The police will arrive first to secure the scene, then mobile crisis will provide mental health crisis services while police are still on-scene. If the individual needs to be transported to a secondary location, the police will call for an ambulance. Calls that involve a medical or fire issue are transferred to fire dispatch. If fire staff need to place an involuntary hold on the person, they can call police to place the hold.

If the caller decides to call MCT directly, their call will be sent to a confidential voicemail. An MCT staff member will listen to the voicemail, call the person back, and provide services over the phone. If no further services are required, the call is resolved. If an in-person response is required, MCT will call police dispatch to have police secure the scene. After MCT calls dispatch, they will travel to the scene of the incident. Once the scene is secured, MCT provides services and may call an ambulance through dispatch if transport is needed.

If the caller decides to call CSS directly, staff will first attempt to resolve the crisis over the phone. If they are able to de-escalate the crisis over the phone, they will provide referral services to additional resources or, on rare occasions, contact Berkeley Mental Health for follow-up care. If they are unable to resolve the crisis, they will send the call to 911 dispatch.

After the incident, the Berkeley Transitional Outreach Team (TOT) will follow-up with the client to ensure that options for longer term care have been offered. TOT can provide referrals and linkage to long-term services, bridging the gap between a moment of crisis and ongoing mental health care.

City and County Teams that Respond During a Crisis

There are several teams within the City of Berkeley and Alameda County that provide services to someone experiencing a mental health crisis. These include programs within Berkeley Mental Health, Berkeley Police Department, Berkeley Fire Department, and Alameda County Behavioral Health Care Services. Although, as mentioned later in this report, the community does not see these services as sufficient or linked.

Berkeley Mental Health Crisis Programs:

The City of Berkeley is contracted by Alameda County to deliver mental health services to Berkeley residents. In general, Berkeley Mental Health programs are funded to serve individuals with severe mental health needs who have major impairments in their functioning and are covered by Medi-Cal. However, Crisis Services teams (not including Homeless FSP) can serve any Berkeley resident, regardless of diagnosis or insurance status. It should be noted that residents covered by private insurance are eligible for services through their insurer and are not eligible for most Berkeley Mental Health programs.

The *Crisis, Assessment, and Triage (CAT)* program is a key access point for a wide range of Berkeley residents to get connected to mental health services. They are a team of clinical staff—licensed clinicians, paraprofessionals, peers, and/or family members—that conduct mental health screenings and assessments, mental health planning/consultation, and linkages to county or community-based care. They are also the official entry point for Berkeley Mental Health’s Homeless Full Service Partnership (HFSP), Adult Full Service Partnership (AFSP), and Comprehensive Community Treatment (CCT) programs. As previously noted, these programs have strict eligibility requirements driven by their funding. Most callers are referred to non-city resources. They offer both remote as well as in-person, walk-in assessments, and linkages to appropriate care. If someone is in crisis, they can suggest or facilitate linkage to 911, MCT, Amber House, or other crisis resources. CAT can also provide limited outreach and transportation services to people experiencing homelessness or people with disabilities who also want to engage in mental health services.

The *Mobile Crisis Team (MCT)* is a team of licensed clinicians that provide crisis intervention services to people in crisis within the Berkeley city limits. These services include de-escalation and stabilization for individuals in crisis, consultation to hospital emergency personnel, consultation to police and fire departments, hostage negotiation, and disaster and trauma-related mental health services. When fully staffed, MCT can operate 7 days a week from 11:30am-10pm. Due to persistent staff shortages, MCT is currently unable to operate on Tuesdays or Saturdays. They primarily receive referrals from Berkeley Police Department, Berkeley Fire Department, hospital emergency rooms, and directly from residents. Most calls for MCT are received on the police radio directly from BPD for 5150 evaluations. Calls can also come directly through the MCT voicemail.

The *Transitional Outreach Team (TOT)* follows up with individuals after an interaction with MCT. The TOT team consists of one licensed clinician and

one unlicensed peer team member. The function of the TOT team is to offer linkages to appropriate resources and help navigating the system of care after someone has experienced a crisis. TOT assesses the individual's eligibility for services, including insurance status, before making referrals to care. During the pandemic, their services have been mostly limited to phone calls. Pre-pandemic, they regularly connected with service utilizers after they were discharged from the hospital. Most often, TOT connects people with homeless service provider agencies, the CAT team for connection to BMH programs, case management services at other clinics, or any other community provider that would meet the client's needs. Due to a recent division restructuring, TOT and CAT have been combined into one unit to allow more community members to access information and referrals provided by TOT.

The *Homeless Full Service Partnership (HFSP)* is Berkeley Mental Health's newest program. They are a team of two behavioral health clinicians, two social service specialists, one mental health nurse, one part-time psychiatrist (0.5 FTE), and one clinical supervisor. HFSP serves adults who are homeless or at risk of homelessness and have major functional impairments related to a mental health diagnosis. They provide a wide array of services based on the client's needs including support applying for benefits, connection to short-term and long-term housing, harm reduction for substance use, and support with physical health needs.

Berkeley Police Department: The Berkeley Police Department (BPD) is made up of patrol teams, Communications Center (i.e., dispatch) staff, other sworn officers, and non-sworn professional personnel. In total, the 2020 budget included 181 sworn officers and 104.2 professional staff.^[1] BPD patrol team duties include responding to emergency and non-emergency calls for service or criminal activity, enforcing the law, responding to community needs, and directing traffic. The role of BPD patrol teams in mental health crises is to assess the situation to determine if there is a threat of public safety, assess how volatile the situation is, and secure the scene. Oftentimes, police officers will then provide crisis intervention services themselves, either because MCT is unavailable or the officer believes they can adequately respond with their experience and skillset. Otherwise, they will bring in another service team, such as MCT or Fire/ambulance to provide additional mental health or medical services. Officers may on-view incidents, but primarily receive assignments from the Communications Center. Officers may also coordinate with the other City Departments on some cases. All officers also receive a minimum of eight hours of advanced officer training in de-escalation and crisis intervention per year; and many officers are trained in a full week CIT-training course. The Department continues to assign

^[1] Berkeley City Auditor. (2021, July 2). *Data Analysis of the City of Berkeley's Police Response*.

https://www.cityofberkeley.info/uploadedFiles/Auditor/Level_3_-_General/Data%20Analysis%20of%20the%20City%20of%20Berkeley's%20Police%20Response.pdf

officers to this full week training as staffing allows and course space is available.

BPD's Communications Center is staffed by dispatchers who handle the following: community calls, records checks, fire dispatching, and police dispatching.^[2] Call takers receive non-emergency and 911 calls, assess the call (including using the emergency medical dispatch (EMD) protocol, enter data into the computer aided dispatch (CAD) system to be dispatched to either police or fire personnel where appropriate. Other calls may be directed to other City Departments or BPD work units. The dispatchers deploy the appropriate response to the scene and maintain radio contact until personnel arrive at the scene.

Other sworn officers in BPD include area coordinators, a bike unit, detectives and traffic enforcement unit, and other sworn non-patrol officers. Area coordinators are situated within the Community Services Bureau and work with patrol officers in their area and seek to address community needs. Officers on the bike unit are assigned to patrol specific areas, where they address public safety issues and other community safety concerns. Detectives follow up on criminal investigations, conduct search warrants and work with the District Attorney's Office on charging. The traffic enforcement unit responds to traffic related complaints, investigates serious injury and fatal collisions, and analyzes and provides state mandated reporting on collision data. Other sworn, non-patrol officers include special assignments in personnel and training, policy, and police technology.

The remaining staff are non-sworn, professional personnel including community service officers, crime scene technicians, and parking enforcement officers. Community service officers work in jail and as crime scene technicians who collect and document evidence from crime scenes. Parking enforcement officers enforce parking violations and support traffic safety related matters. Many of these functions are also supported by Police Aides and Reserve Police Officers.

Berkeley Fire Department: The Berkeley Fire Department (BFD) is comprised of 7 fire stations, 130 sworn fire suppression personnel and paramedic firefighters.⁵ BFD provides 24/7 response to emergencies including fires, medical emergencies, and disasters. The department operates 4 24/7 Advanced Life Support ambulances that are primarily responsible for all emergency medical transport within the City of Berkeley to local emergency departments.

^[2] Berkeley City Auditor. (2019, April 25). *911 Dispatchers: Understaffing Leads to Excessive Overtime and Low Morale*.

https://www.cityofberkeley.info/uploadedFiles/Auditor/Level_3_-_General/Dispatch%20Workload_Fiscal%20Year%202018.pdf

⁵ City of Berkeley Fire Department. (n.d.). *History of the Berkeley Fire Department*. Retrieved October 5, 2021, from

https://www.cityofberkeley.info/Fire/Home/Department_History.aspx

BFD also participates in care coordination for high utilizers of services as part of the Community Accessing Resources Effectively (CARE) Team. This team is a multidisciplinary group of practitioners made up of both staff from community organizations as well as City of Berkeley staff. The group is facilitated by the EMS division of the department and aims to connect residents using high amounts of emergency services to more appropriate and/or long-term care options.

During the COVID-19 pandemic, BFD operated a Mobile Integrated Paramedic (MIP) unit for a six-week pilot. The MIP unit provided community paramedicine as a diversion from hospitals during the early days of the pandemic. This team did proactive street outreach in the community to help meet basic needs and provide referrals to community organizations, based primarily on 9-1-1 callers who ended up not seeking care at an Emergency Department.

For people experiencing a mental health crisis, the City of Berkeley contracts with Falck Ambulance, which is also the private provider for emergency medical transport for Alameda County. Falck provides treatment, stabilization, and transports to hospitals, including voluntary and involuntary psychiatric hospitalizations. BFD firefighters can call Falck directly when an individual needs to be transported for mental health issues, although most transport requests are through requests from Mobile Crisis. The current collaboration with Falck began July, 1 2019, and the contract is overseen by BFD.

Alameda County Behavioral Health Care Services Crisis Programs:

Alameda County Behavioral Health Care Services (AC BHCS) operates both crisis and long-term mental health service programs.⁶ Some key crisis programs include Crisis Support Services, Acute Crisis Care and Evaluation for Systemwide Services, Mobile Crisis Team, Mobile Evaluation Team, and the Community Assessment and Transport Team.

The Alameda County Mobile Crisis Team, Mobile Evaluation Team, and the Community Assessment and Transport Team do not serve the geographic area of the City of Berkeley; despite this, we include brief information about them below to describe the types of mobile crisis services available to the other cities in Alameda County.

Crisis Services Eligible to Berkeley Residents

Crisis Support Services (CSS) is a county contracted program that provides several services for individuals experiencing a mental health crisis, including a 24-hour crisis phone line, text messaging, therapy groups, therapy services for older adults, school-based counseling, grief therapy,

⁶ Alameda County Behavioral Health Care Services. (n.d.). *Acute & Integrated Health Care – Acute & Crisis Services*. Retrieved October 5, 2021, from <http://www.acbhcs.org/acute-integrated-health-care/acute-crisis-services/>

and community education.⁷ CSS coordinates closely with mobile crisis teams in Oakland and Alameda County and often refer clients to mobile crisis. They are staffed by trained crisis counselors, both licensed and unlicensed. Most often calls to CSS are direct from someone experiencing a crisis. Berkeley dispatch can transfer calls to CSS for phone support if they deem an in-person response is not required. CSS fields over 40,000 calls annually and spends an average of 25-30 minutes per call.

Acute Crisis Care and Evaluation for Systemwide Services (ACCESS) is the main entry point for Alameda County residents to get connected to acute and longer-term mental health and substance use services.⁸ The phone line is staffed by licensed mental health clinicians and administrators who screen and assess the client's needs, provide information about available options, and refer to an appropriate service. Clinicians also screen clients to see if they meet medical necessity criteria for Specialty Mental Health Services (SMHS). Calls that come in after 5pm or on weekends are routed to CSS.

Crisis Services Not Eligible to Berkeley Residents

The Alameda County *Mobile Crisis Team* responds to mental health crisis calls either in-person or over the phone.⁹ They are staffed by two licensed clinicians. Calls can come directly to the mobile crisis team, or they can be dispatched by 911 or CSS. The Alameda County Mobile Crisis Team responds in a police co-responder model.

The *Mobile Evaluation Team (MET)* is a co-responder program; one Oakland police officer and one licensed clinician respond to calls in an unmarked police car. They respond to mental health calls that come through 911 dispatch.

The *Community Assessment and Transport Team (CATT)* provides community-based crisis intervention, medical clearance, and transport services. Administered through Bonita House, a licensed clinician and an EMT will be dispatched to a scene where the individual needs to be transported to a higher level of care. CATT currently utilizes a police co-responder model.

Other Service Providers in the Mental Health Crisis Response System: In addition to services provided by the City of Berkeley and Alameda County, there is an array of community-based services and other providers within the mental health crisis response system in Alameda

⁷ Crisis Support Services of Alameda County. (n.d.). *24-Hour Crisis Line*. Retrieved October 5, 2021, from Alameda County Behavioral Health Care Services. (n.d.). *Acute & Integrated Health Care – Acute & Crisis Services*. Retrieved October 5, 2021, from <http://www.acbhcs.org/acute-integrated-health-care/acute-crisis-services/>

⁸ Alameda County Behavioral Health Care Services. (n.d.). *ACCESS program*. Retrieved October 5, 2021, from <http://www.acbhcs.org/providers/Access/access.htm>

⁹ In this report, the acronym "MCT" is only used in reference to the City of Berkeley's Mobile Crisis Team, not Alameda County's Mobile Crisis Team.

County. These generally fall into four categories: crisis response providers, crisis stabilization units, drop-in centers, and medical service providers.

The agencies listed below are not meant to be a comprehensive list, rather these were the organizations that were mentioned most frequently by focus group participants, interviewees, and survey respondents. There are many organizations and individuals who contribute to crisis prevention and stabilization by addressing other needs such as housing, substance use, ongoing mental health support, or domestic violence. Though not enumerated in this report, the ecosystem of services in Berkeley and surrounding areas help prevent community members from escalating into crisis.

Crisis Response Providers: Crisis response providers accompany individuals while they are experiencing a crisis, work with the client to de-escalate, and connect them to resources to meet their needs. It should be noted that ongoing mental health service providers, such as therapists or clinical case managers, de-escalate and divert mental health crises every day. In this report, we are focusing on providers who respond to acute crisis situations that are outside of long-term supports. The two key crisis response providers mentioned most often by the community are Mental Health First and UC Berkeley.

Mental Health First is a project of the Anti Police-Terror Project (AFTP). Based in Oakland, this volunteer-run crisis line provides crisis support, de-escalation, mediation, and connection to resources to anyone who calls. They are available on Friday and Saturday nights, 8pm to 8am, when other crisis services are unavailable. Community members can access services via phone, text, or social media. About half of callers are calling for themselves, while the other half are calls from friends or family members concerned about a loved one. Mental Health First can help people navigate the complicated mental health system and get them connected to services.

When a student is experiencing a mental health crisis on the UC Berkeley campus, *UC Police Department (UCPD)* are often the ones who arrive on scene. UCPD employs a mix of sworn and non-sworn personnel including 49 police officers, 10 dispatch and records staff, 31 security patrol officers, and 12 professional staff.¹⁰ UCPD police officers are currently the ones who respond during a mental health crisis. However, the University has publicly stated plans to phase out involvement of police during a crisis and shift to having its Tang Center counselors respond to mental health

¹⁰ Berkeley UCPD. (n.d.). *Department Demographics*. Retrieved October 5, 2021, from <https://ucpd.berkeley.edu/department-demographics>

calls.¹¹ They are currently in the process of planning and developing a new mental health response team.¹²

The *UC Berkeley Tang Center* offers health, mental health, and crisis services to all UC Berkeley students, regardless of insurance. Their staff, which include licensed psychologists, psychiatrists, and psychiatric nurses, respond to urgent mental health concerns.¹³ They also provide services after a sexual assault or incident of domestic violence and respond to campus crises (e.g., when a student passes away).¹⁴ As of the Fall 2021 semester, students can access these services by calling the Tang Center's urgent phone or after-hours support lines. But as previously mentioned, UC Berkeley is currently redesigning their crisis response model so students can more easily get connected with Tang Center staff during a crisis.

Crisis Stabilization Units and Psychiatric Facilities

Crisis Stabilization Units and psychiatric facilities provide a safe location for people to de-escalate from crisis, receive psychological support, and get connected with mental health services. There are no crisis stabilization units within the City of Berkeley, so Berkeley residents in crisis are often transported or referred to the facilities noted below.

John George Psychiatric Hospital (JGPH, or John George) is a locked facility where patients can receive short-term psychiatric care from doctors, psychiatrists, and counselors. Once a patient receives medical clearance (i.e., they do not have any acute medical needs), they can be transported to JGPH. John George is the main facility that individuals are transported to when they are under an involuntary hold. Many patients are referred and/or transported by emergency services and mobile crisis teams across the County.

Willow Rock Center operates both a 12-16 bed crisis stabilization unit as well as an inpatient unit for adolescents ages 12-17.¹⁵ A team of psychiatrists, nurses, group and individual therapists and counselors provides assessment, counseling, medication administration, group,

family, individual therapy, and connections to resources. The locked, inpatient unit is the main transport facility for adolescents under an involuntary hold. Their patients are often referred from Kaiser Permanente, schools, and emergency services. They also accept walk-ins for voluntary services.

Cherry Hill Detoxification Services Program provides services for adults needing to detox from substances.¹⁶ Their sobering unit has 50 beds for patients to stay 23 hours or less. The detox unit has 32 beds for patients to stay 4-6 days. Trained staff screen patients, provide medical services and psychological support, and link patients to services to meet their needs before discharge. Both units often get referrals from emergency services but also can accept self-referrals.

Amber House, operated by Bay Area Community Services (BACS), is a 23-hour mental health crisis stabilization unit (CSU) that provides a quiet environment for clients to receive short-term psychological support and have their basic needs met. The team is a clinician, a nurse, a supervisor, and an on-call psychiatrist, who provide voluntary services for people experiencing an acute mental health crisis. Many of their clients are transported or referred by mobile crisis teams, Oakland's CATT program, and occasionally police. Before a client is discharged, a staff member will provide referrals for long-term mental health care and other resources to meet their needs. Amber House also operates a crisis residential treatment (CRT) program in the same facility (which is Alameda County's only combined CSU and CRT), providing clients the option for a longer stay.

Drop-In Centers

The City of Berkeley has three drop-in centers for residents: the Berkeley Drop-In Center, Berkeley Wellness Center, and the Women's Daytime Drop-In Center. While not all sites have specific services for individuals in crisis, they can be an entry point for mental health services.

The *Berkeley Drop-In Center* is a peer-run, walk-in community center that provides drop-in time, service advocacy, and housing advocacy.¹⁷ Clients can have their basic needs met, find a place to socialize, get connected to benefits, receive a referral for subsidized housing, and get linked to mental health services.

The *Berkeley Wellness Center*, operated by Bonita House, provides art classes, employment services, connection to benefits, primary care, counseling, case management, and evidence-based support groups for

¹⁷ City of Berkeley. (n.d.). *Berkeley Drop-In Center*. Retrieved October 5, 2021, from https://berkeleycity.networkofcare.org/mh/services/agency.aspx?pid=BerkeleyDropInCenter_670_2_0

adults with mental health and co-occurring disorders.¹⁸ The Berkeley Wellness Center serves as an entry point to recovery and supportive services for people with a broad range of mental health needs and co-occurring conditions.

The *Women's Daytime Drop-In Center (WDDC)* provides similar services for homeless women and their children.¹⁹ A small team of case managers, managers, and volunteers provide various services including case management, food, groceries, and hygiene kits. Clients can also receive referrals to additional services that are beyond the scope of WDDC.

Medical Service Providers

Because a mental health crisis and substance use crisis can co-occur, medical service providers play an important role in crisis stabilization and prevention. The two medical outreach teams mentioned by the community were Lifelong Street Medicine and Berkeley Free Clinic's Street Medicine team.

LifeLong Street Medicine is a program contracted by Alameda County Health Care for the Homeless Street Health.²⁰ Multidisciplinary teams provide street psychiatry and substance use recovery services for people experiencing homelessness in Berkeley. They can also provide connections to primary care, social services, housing, and other resources.

Berkeley Free Clinic's Street Medicine team is a volunteer-run collective where volunteers are trained as medics and provide services in the community.²¹ Their services include HIV and STI testing and treatment, first aid, vaccinations, hygiene kit distribution, and substance use supplies and training. The teams regularly do proactive outreach to connect to new clients.

What is the current mental health crisis call volume in Berkeley?

In addition to its deep community engagement process, RDA also reviewed quantitative data on the volume of calls related to mental health issues and who is making those calls. As noted previously, quantitative data from City of Berkeley agencies conducting crisis response (i.e., Mobile Crisis Team, Berkeley Police Department, and Berkeley Fire Department) currently have a variety of limitations. Because

²⁰ Alameda County Health Care for the Homeless. (n.d.). *Street Health*. Retrieved October 5, 2021, from <https://www.achch.org/street-health.html>

²¹ Berkeley Free Clinic. (n.d.). *Street Medicine Team*. Retrieved October 5, 2021, from <https://www.berkeleyfreeclinic.org/street-medicine-team>

of these limitations, RDA suspects that the available data is generally an underrepresentation of the true volume of mental health related calls in Berkeley. Given these limitations, RDA explored the available data for trends that can support the community in building its understanding of who is currently utilizing Berkeley's crisis services.

It is important to note that the City of Berkeley has contracted with the National Institute of Criminal Justice Reform (NICJR) to lead the City's current Reimagining Public Safety work. As a part of its current engagement, NICJR collaborated with Bright Research Group (BRG) on a large community engagement effort to better understand the local community's perspectives across a variety of issues pertaining to public safety in Berkeley. NICJR and BRG shared their findings on July 29, 2021 at Berkeley's Reimagining Public Safety Task Force (RPSTF) meeting; the slide deck presentation of key findings can be found online.²² The overarching findings from this presentation align with RDA's community-wide data collection efforts.

Key Mental Health Call Volume Trends

- MCT has responded to a declining number of 5150s since 2015, in part due to staff vacancies and the pandemic.
- The most frequent incident types of all 5150 calls to BPD were disturbance, welfare check, mentally ill, and suicide.
- Around 40% of BPD's welfare check calls included a mental health related facet to the response, followed by around 20% of disturbance calls, and around 10% of calls regarding suspicious circumstances.
- Falck has been contracted to conduct the large majority of 5150 transports in Berkeley, most often taking service utilizers to Alta Bates Medical Center and John George Psychiatric Emergency Services.
- BFD conducted fewer 5150 transports in Berkeley and only took service utilizers to Alta Bates, Oakland Children's Hospital, and Kaiser Hospital.
- The time required for a 5150 is, in part, determined by geography and the destination of transport.
- Calls for 5150s are most frequent from 10:00am to midnight and least frequent from 2:00am to 8:00am. There are no notable differences in the frequency of calls by day of the week.

For a deeper description of call volume and data, demographics of calls, and methods please see [Appendix D](#).

Stakeholder Feedback

Mental health crises vary in severity along a spectrum. A crisis can present as someone in immediate danger to themselves or others, someone that needs regular support to address their basic needs, or someone that is generally able to manage their needs but needs occasional support to prevent a future crisis. Many stakeholders expressed that in order to effectively address the challenges of the current system, solutions and changes must engage with the nuance and spectrum of mental health crises.

Many stakeholders shared that by broadening our concept or definition of a mental health crisis, we can better design the mental health crisis response system and related services. Stakeholders provided several examples of the nuance and spectrum of mental health crises:

- ❖ Some forms of crisis are readily visible (such as people presenting to hospitals or experiencing a crisis while in public) while others may be unseen (such as a homeless-but-sheltered individual recovering from intimate partner violence).
- ❖ Some forms of mental illness or neurodivergence are reported by a bystander as a crisis, but there is not an acute crisis situation and should not result in a forced transport just because of a bystander's concern.
- ❖ Some forms of crisis are a result of community members not knowing where to access services even if they are able to identify their needs.
- ❖ Some forms of emergency service utilization stem from an ongoing unmet need for basic goods and services, such as a high utilizer that regularly presents at the hospital emergency department because they need food.

Overall, there is wide consensus among interviewed stakeholders that the current mental health, substance use, and homelessness crisis systems in Berkeley are under-resourced and unable to meet both the volume of need and the various ways in which crisis presents.

Expectations for different types of crisis responders varied greatly by stakeholder. Stakeholders shared mixed experiences with BPD's ability to successfully de-escalate situations and respond empathetically to people in crisis, and often attributed the quality of interaction to the traits of an individual officer. Stakeholders often held low expectations for BPD to intervene non-violently and expressed positive perceptions when BPD "didn't do anything." On the other hand, stakeholders shared high expectations for other crisis service providers including MCT responders or county case managers. Negative feedback from stakeholders was often because providers were not meeting these high standards. As a result, understanding stakeholder praise and criticism of crisis responders – such as MCT, BPD, and other CBOs – requires understanding stakeholders' varied expectations.

In discussing their experiences as well as the strengths and challenges of existing crisis response system, interviewed participants and survey respondents also shared ideas for a reimagined mental health crisis response system. The following sections detail key themes that were elevated across stakeholder participants.

Illustrative quotes from survey respondents are included alongside key themes. Due to concerns with anonymity and limitations of data collection, quotes from interviews and focus groups were unable to be included.

Key Themes from Stakeholder Feedback

Perceptions of an urgent need for a non-police mental health crisis response in Berkeley

Perceptions of varied availability, accessibility, and quality of crisis response services

Perceptions of insufficient crisis services for substance use emergencies

Perceptions of a need for a variety of crisis transport options

Perceptions of a lack of sites for non-emergency care

Perceptions around supporting the full spectrum of mental health crisis needs

Perceptions of a need for post-crisis follow-up care

Perceptions of barriers to successful partnerships and referrals across the mental health service network

Perceptions of needs to integrate data systems and data sharing to improve services

Perceptions of a need for increased community education and public awareness of crisis response

Stakeholder perceptions of the urgent need for a non-police mental health crisis response in Berkeley.

"I think a carceral approach creates more trauma and fear. I have been traumatized by being in jail. I do not wish to be incarcerated when all I need is support."

- SCU Survey Respondent

Overall, there was a strong sense of urgency for a change in the response to mental health crises in Berkeley. Service providers indicated that they routinely use creative interventions and provide services for clients multiple times and consider calling the police a last resort. Service providers shared that if there were an SCU, they would prefer to use a non-police option for crisis response.

Service providers and crisis responders expressed a sense that the current system is "broken," that they see the same service utilizers on a frequent basis. Providers shared examples of clients unable to access existing services, not engaged in services they are enrolled in, or not willing to receive offered treatment for a variety of reasons. Stakeholders felt that most people need support accessing resources in addition to immediate crisis response or de-escalation. However, they believe the existing crisis response system often relies on police to respond to calls. This is not the specialty of the police, nor are they able to provide a full range of follow-up linkages and referrals to trauma-informed social services.

There is strong consensus across city staff, service providers, service utilizers, and survey respondents that police do not best serve the needs of those who are experiencing a mental health or substance use crisis. Stakeholders emphasized that a mental health crisis should not be equated with violence, though there is often the misconception that any display of mental illness is violent or a threat to public safety.

*"My perception is that mental health issues, substance use, and homelessness are *rampant* in Berkeley - now more than ever - and police are simply not the right people to deal with these issues."*

- SCU Survey Respondent

Stakeholders shared that there are scenarios in which the presence of police can increase the danger for service utilizers or bystanders. In the context of intimate-partner and domestic violence, there is often a fear of retaliatory violence if the police are called in to respond to the abused partner seeking help. Stakeholders shared examples police presence and visible weapons escalating a mental health crisis, causing an increase in erratic or unpredictable client behavior. Particularly for service utilizers with traumatic histories from interactions with police officers, they felt the presence of police can escalate a crisis or emergency. Service providers shared stories of clients that have suffered through immense psycho-social harm and/or medical complications before reaching out to 911 due to their fear of the police.

Survey respondents and service providers shared the perception that sometimes police think a weapon is present on an individual when it is not, and felt that police use unnecessary violence and force, which overall decreases their sense of safety. Stakeholders felt that this context results in an environment in which they do not call for emergency help because of

a fear of police, leaving community needs for crisis support unmet. Service providers also elevated that there are ways to disarm someone without using force or weapons which would improve the safety for both service utilizers and providers alike.

For these reasons, Crisis Support Services of Alameda County (CSS) crisis line providers shared that they prepare callers for interactions with the police by telling them what to expect when the police arrive and providing options to keep themselves safe (e.g., stepping outside, double checking that there are no weapons or illicit substances on their person, and closing their front door). However, they did mention that service utilizers using substances or experiencing a break with reality may not be able to follow close directions and are at increased risk of police violence due to the heightened probability of misunderstanding or miscommunication.

Stakeholders shared a few strengths of police involvement in the existing crisis response system. They shared that police may provide a useful resource for people who need documentation of a crime for future legal reference. A police report with these details can later be used in a court setting or provided as proof to an insurer. Additionally, many service providers indicated police presence can protect the safety of crisis responders and bystanders when weapons are present. Some stakeholders elevated that the presence of police can be supportive when community members or service providers are attempting to de-escalate a crisis.

The overwhelming importance and immediacy of changing the mental health crisis response system was emphasized in stakeholders' references to the violence committed against a woman killed by BPD during a mental health crisis in 2013 and a man shot by BPD during a mental health crisis in 2021. Stakeholders shared that providing a non-police mental health crisis response option could increase the acceptability and accessibility of crisis response by addressing this fear, thereby promoting the safety and well-being of community members and service utilizers.

There were differing perspectives of whether police should have any involvement in crisis response. The expressed perspectives included: there should be no police involvement; police should be called as back-up only if SCU de-escalation efforts were unsuccessful; police should be called as back-up only if the presence of weapons was confirmed; or police should be involved through a co-responder model like MCT.

Stakeholders offered important considerations for police involvement. Some stakeholders suggested that police should be dressed in plain clothes to avoid their presence further escalating a community member in crisis. Other stakeholders shared that if police are involved in the SCU model of crisis response, then they should be in uniform; they elevated that community members should understand who they are speaking to, given that a police officer can arrest, detain, and/or incarcerate them. Additionally, because community members expressed that they have the right to identify a police officer's badge number and last name -- which is particularly important if a community member needs to report any

"I desperately needed help for a friend who was experiencing a mental health crisis. She was adamant that I not call police because she is scared of them and feared that they would be violent with her. There were no alternatives available in Berkeley. I have watched police respond to people in crisis many times. Some cops are aware that their presence can escalate people. Some of the cops are oblivious of how they impact a situation and make it worse."

- SCU Survey Respondent

"I have had police response in an emergency crisis. It only made the crisis more terrifying and traumatic."

- SCU Survey Respondent

misconduct -- police should be in uniform. Furthermore, stakeholders elevated their fear of being targeted by certain police officers as someone that experiences mental health emergencies and/or someone who uses drugs; for this reason, stakeholders shared that it is important for police to remain in uniform to mitigate the criminalization of mental health crises and drug use and for public awareness.

Stakeholders shared considerations for protecting and enhancing the safety and well-being of crisis responders, service utilizers, and community bystanders alike. The presence of weapons is a primary safety consideration for many stakeholders. Stakeholders reported concerns about determining and dispatching the appropriate intervention team in order to prevent injury or assault to crisis responders, especially when there are weapons present. Many stakeholders also emphasized that the safety of the person in crisis must be protected too.

Stakeholders provided many ideas for how a non-police crisis response system could best support Berkeley residents. Community members and providers suggested a crisis response team include mental health practitioners such as peer workers, therapists, direct patient care specialists, social workers, medical providers and/or psychiatrists. They also suggested several trainings that would support crisis responders to better meet the needs of people in crisis, such as trainings on trauma-informed care, de-escalation, and crisis neutralization. Finally, given the types of crises service providers and service utilizers most often experience, stakeholders elevated specific technical knowledge that crisis responders should be prepared to employ, including basic first aid, domestic-violence crisis response training, and specific knowledge on DSM-5 mental health diagnoses, and co-occurring drug-induced states.

Additional Perspectives from the SCU Survey

"The police response here is among the most professional that I have seen in any jurisdiction in the nation - yet the bottom line is requiring police to respond to crisis situations in which they do not have the requisite training is a disservice to both the officers and those on the other side of the response."

"I don't feel unsafe in the community. My homeless neighbors are much more unsafe than I am because they are consistently interacting with people who hate them, with some bad cops including the campus cops."

"There is a huge crisis in our city of homelessness and mental health and the police only ever make things worse. Sweeps, seizures of possessions, harassment and intimidation of unhoused residents is all too common. The violent detention of mentally ill people seems to be a day to day reality. Heavy restraints and spit hoods being used in the place of de-escalation and care. The Berkeley police shot a man in crisis through the mouth this year and that is beyond unacceptable!!!"

"I need to know that if I, or someone I love, is experiencing a mental health crisis that there is a trained mental health professional that I can call who will come, without a gun, and that I will receive care, not a cop, and that I will not end up dead. Knowing I won't be shot dead by a cop for the "crime" of living with mental illness, for being poor, or for having a substance use disorder would help me to feel safe."

Stakeholder perceptions of varied availability, accessibility, and quality of crisis response services

Perceived Strengths

- MCT provides quality services
- Positive experiences with individual BPD officers
- BFD created a resource list to better provide referrals

Perceived Challenges

- Lack of 24/7 crisis services
- Requiring service utilizers to keep appointments
- Slow response times for MCT due to limited staffing
- Long waitlists for services
- Few options for de-escalation or non-emergency care
- Poorer quality of services provided to people of color and unsheltered people

Stakeholder Ideas

- Proactively communicate service availability & hours of operation
- Increase 24/7 service options
- Increase training on racial justice, cultural sensitivity, harm reduction, and de-escalation

Stakeholders identified a few strengths of the availability, accessibility, and quality of crisis services. Many reported that there is general knowledge of the existing crisis response options in Berkeley. Some providers reported positive experiences with police, and many reported positive experiences with MCT. Another strength shared by stakeholders is that BFD's ability to refer and link service utilizers to resources has increased since they created a list of CBOs and local programs.

A common challenge elevated by stakeholders is the lack of 24/7 response options. A mental health crisis can happen at any time, but many crisis programs operate during standard business hours. The limited hours of operation of MCT were elevated by stakeholders as a significant challenge that increased the risk of police interaction with service utilizers who call 911 when MCT is not staffed.

Stakeholders frequently mentioned limited MCT staffing as a major barrier to accessing quality crisis response services. For the last two years, two of four crisis staff positions have been vacant. Because MCT responds to calls in pairs, only one team is available to respond at a time. This can result in long wait times if the team is responding to another call. Additionally, if there is a high call volume, MCT will prioritize high acuity calls where someone is showing imminent signs of crisis or distress. The reduction in staffing also led to a reduction in hours. This has caused confusion among providers and service utilizers. Service providers elevated this as a source of uncertainty and distrust that can reduce the likelihood of someone accessing services in the future.

"Berkeley MCT is only open on weekdays during certain hours. I have never had an incident where I needed help with a client coincide with their open hours."

- SCU Survey Respondent

"Mobile Crisis folks are good. It's just that they always come with the cops, and sometimes they can't come for many hours because they're busy."

- SCU Survey Respondent

Stakeholders believe these challenges and barriers to accessing services or ensuring the availability of services are ultimately challenges to the overall safety and well-being of potential service utilizers, community bystanders, and service providers.

A Berkeley City Auditor's report in 2019 elevated that the understaffing of the 911 Communications Center has led to staffing levels that cannot meet the call volume and increased call wait times.²³ Increased call wait times have negative implications for the safety and well-being of service utilizers and community members, as well as the service providers and crisis responders that are responding to a potentially more advanced state of crisis. Additionally, inadequate staffing levels have caused BPD to rely on overtime spending to fund the Communications Center, which increases the cost of the entity.

There was consensus among participants that many facets of the crisis response system feel understaffed, which can lead to decreased service availability and slower responses. Under-resourcing can create challenges to service availability across the providers and programs throughout Berkeley and Alameda County. Service utilizers and community members reported long waiting lists for permanent supportive housing units, a key stabilizing factor that could reduce the incidence of mental health crises overall. There was also a perception among stakeholders that service utilizers are faced with long waits to access healthcare, case managers, and temporary congregate shelters.

Some CBOs also identified a need for more multilingual services, especially Spanish-speaking providers. They also indicated that a fear of ICE or 911-corroboration with ICE is a barrier for undocumented community members to call 911, especially for undocumented residents that are unhoused. Service providers suggested that more culturally competent services would increase the likelihood of someone seeking services when they are experiencing a crisis.

Stakeholders believe that these challenges to availability and accessibility can reduce the quality of available services. When police must respond to a mental health crisis because it is outside MCT business hours, community members do not feel the response was adequate or of the highest quality. Crisis responders expressed that they frequently provide medical solutions when the service utilizers they encounter have mental health needs and are most affected by broader societal problems.

When MCT is not operating, CSS indicated that they do more de-escalation over the phone prior to calling for police support to prepare

"It's a revolving door (with Santa Rita, John George, etc.) where crises are sometimes averted, but almost no one is truly healed and set on a good path of recovery or even stability."

- SCU Survey Respondent

²³ Berkeley City Auditor. (2019, April 25). *911 Dispatchers: Understaffing Leads to Excessive Overtime and Low Morale*. https://www.cityofberkeley.info/uploadedFiles/Auditor/Level_3_-_General/Dispatch%20Workload_Fiscal%20Year%202018.pdf

the service utilizer and reduce their risk of harm; however, they shared that phone support may not always be sufficient for every mental health crisis.

Overall, there was consensus among stakeholders that there is a lack of successful linkages and connection to follow-up services beyond John George Psychiatric Hospital. Many participants felt that hospitalization may not be appropriate care for everyone experiencing a mental health crisis. Crisis responders and providers reported service utilizers requesting to not be sent to John George, but that as service providers they do not feel they have other options. For service utilizers, trauma histories can be re-triggered by congregate shelters, psychiatric care or hospitals, and police interactions. Stakeholders elevated a need for increased options for where people can be transported during a crisis.

Finally, there is a perception that the quality of the City's first responder crisis response services is inhibited by a lack of training that sufficiently addresses harm reduction, racial justice and cultural sensitivity training, and successful de-escalation. Service providers shared examples of clients' needs not being taken seriously, such as instances of individual EMTs not responding to unsheltered clients and/or clients of color. These examples demonstrate how stigma, dehumanization, and racism decrease quality of services.

Given the constraints of how the existing crisis system is funded and resourced currently, stakeholders elevated that any changes to program hours of operation, locations, staffing, phone numbers, and/or other logistical/programmatic decisions be shared regularly and distributed to the partnership network in order to improve availability, accessibility, and quality of service provision. They felt that the ideal alternative crisis response options would include 24/7 mental health crisis response and should address the desired competencies of harm reduction, racial justice and cultural sensitivity, and de-escalation to increase community safety and promote health and well-being.

"The resources we have are helpful, but we need more. We especially need affordable housing units. The mobile street medicine teams have been very helpful. Shelters are ok for some people, but often exclude people with disabilities who need assistance the most."

- SCU Survey Respondent

Additional Perspectives from the SCU Survey

"They tend to exist in ways that are the most convenient for the service providers, not for the person in need. Mental Health Services don't really happen outside of their offices. How can disordered, homeless people be expected to make and keep appointments at some unfamiliar address? The drug epidemic is complicating things and I have seen no evidence that this city wants to commit to rehab on demand which is what we need. We need to be able to offer help when it is needed- not when it is convenient."

"I've been doing outreach work for more than a year in Berkeley now and access to mental health crisis support is almost nonexistent. It is highly needed as many individuals are experiencing some level of mental health issues."

"... My experience with the police response has been that the City of Berkeley crisis team has been understaffed or not working the day that I phoned, or my report of the need for crisis support was minimized, and it was explained that the person "wasn't breaking any law." Crisis doesn't often intersect with law breaking, nor does an individual always meet the criteria for a 5150. There are trained individuals who can help with this, and police often offer heavy handed threats of arrest, or physical violence, in attempt to stop a behavior."

Stakeholder perceptions of insufficient crisis services for substance use emergencies

Perceived Strengths

- EMTs respond well to substance overdoses
- EMTs are well-trusted by many unsheltered communities and encampments

Perceived Challenges

- Not enough SUD training for clinicians providing complex mental illness care
- High rates of transport to emergency facilities for substance use emergencies
- Infrequent referrals to substance use management services
- Too few resources to meet high volume of substance use emergencies and management needs

Stakeholder Ideas

- Incorporate harm reduction framework into all crisis response
- Distribute NARCAN
- Distribute harm reduction supplies (e.g., sharps disposal, clean needles, etc.)

“Decriminalization is key to “illegal” drug use and harm reduction methods of dealing with addiction and drug use save lives and alleviate the stigma.”

- SCU Survey Respondent

Stakeholders explained that mental health crises often include substance use emergencies, but they felt that variety and uniqueness of substance use emergencies is often overlooked and not adequately served in the existing crisis response. Stakeholders described many examples of physical and psychosocial health needs related to substance use that do not involve an overdose. Service providers shared that substance use emergencies and mental health crises are often co-occurring as substance use is common among people with histories of trauma and is used as a form of self-medicating.

Substances can alter someone’s mental state and contribute to or exacerbate what is perceived as a mental illness. Stakeholders elevated that when a person is in distress, providers should assume that something is triggering that distress, be it an event or intoxication. One of the most frequently and emphatically emphasized points by service providers was the need to address mental health and substance use in tandem.

"The people with mental illness should get treatment. In crisis, they should be housed with treatment. Those with substance abuse should have treatment available. Being homeless probably makes people mentally ill. I think I would be mentally ill if homeless."

- SCU Survey Respondent

In the event of a substance overdose, stakeholders felt that Berkeley EMTs are well-trained, follow protocols, and administer effective treatment for users that have overdosed. Stakeholders reported that EMTs are well-trusted by marginalized substance-using communities, including homeless encampments. Seabreeze encampment residents shared that they avoid calling 911 for any emergencies except to specifically request an EMT during an overdose.

Stakeholders described many challenges to how the system currently addresses substance use emergencies. They felt that the physical health and mental health needs of a service user experiencing a substance use emergency are treated as separate needs. Service providers explained that whichever presents as more immediately pressing often dictates the classification for the call; they felt that this results in inadequate service provision during a crisis.

Community-based providers elevated that when seeking care for clients with complex trauma or chronic mental illness, they are rarely put in contact with a provider that has SUD training. Service providers expressed a need for an integrated approach to substance use emergencies, with providers working together to tend to both the psychological and physical health needs of their clients.

Substance users reported frequent transport to hospitals and sobering centers when emergency providers respond to crises. Interviewed substance users shared that they were only informed of other substance use management options when other case managers shared those options (not emergency services personnel prior to transport).

Stakeholders suggested ways that the current crisis response system could better address the needs of substance use emergencies, including incorporating a Harm Reduction framework into first responder's approach to drug use, distributing Narcan, and distributing harm reduction supplies such as clean needles, pipes, and safe sharps disposal kits.

Additional Perspectives from the SCU Survey

"I am a Nurse Practitioner... Some camps in Berkeley have agreements internally not to call the police on each other. If someone does, there is retaliation, sometimes in the form of lighting the person's tent on fire. This means people do not call 9-11 when there is a mental health emergency. While I completely understand why the mobile crisis unit has police officers, it is not used as often as it could be because of that fact...Many unhoused folks we meet use meth in part to stay up all night so they will not get raped or robbed during the night. This is of course not the only reason folks use meth and other drugs--there are mental health issues, addiction, etc. But until people are housed, it is very, very hard for them to cut down or quit, because the risks can outweigh the benefits in their minds."

"...Offering safe use and drug checking sites, so we can reduce harm that comes from unsafe drug use. Creating accessible, affordable, and temporary housing for each phase of a person's recovery from crisis. Ensuring people have access to food, safe shelters, and access needs are met."

Stakeholder perceptions of a need for a variety of crisis transport options

Perceived Strengths

- Transport is provided to emergency sites during medical emergencies

Perceived Challenges

- High rates of involuntary transports (5150s) do not align with service needs
- Lack of options for transport to non-emergency sites
- Ambulances and emergency services can be cost-prohibitive for service utilizers

Stakeholder Ideas

- Provide voluntary transport to non-emergency sites
- Provide services and supplies during transport process

“With all the services available, as a firefighter, all we can really do is take someone to the ER, which is not definitive care for homelessness. Mobile support of homeless services would be a game changer, much the way mental health comes out into the field.”

- SCU Survey Respondent

Crises can vary in levels of acuity, and not everyone calling in to report a mental health emergency needs transport to a psychiatric facility, hospital emergency department, or inpatient setting. Both EMTs and police shared that they provide free transport to a medical facility, which is important in the event of medical health emergencies. However, Alameda County has the highest rates of 5150s per capita in California.²⁴ Service providers described full emergency departments and service utilizers not being admitted upon arrival. There are also financial implications for being transported in an ambulance, which providers suggested may deter service utilizers from requesting emergency services. Stakeholders felt that there are few to no options for service utilizers to request transport to a different, non-medical facility or location. Stakeholders did provide some examples of CBOs and non-emergency programs that provide transportation to their clients, though they shared that these services are not for the general public and barriers to transportation persist.

Given the need for addressing a variety of transport needs, stakeholders elevated the importance of an SCU team to have the ability to provide voluntary transport services to any secondary location, such as a sobering center or a public location. Service providers and community members suggested that the transport vehicle should have available supplies to provide care during a transport, such as one-off doses of psychiatric medicines, food, and water. There was a shared sense that providing

²⁴ California Department of Health Care Services. (2017, October). *California Involuntary Detentions Data Report; Fiscal Year (FY) 2015-2016*. https://www.dhcs.ca.gov/services/MH/Documents/FMORB/FY15-16_Involuntary_Detentions_Report.pdf

transport options that meet the mental health needs at varying levels of acuity has important implications for the safety and well-being of crisis responders and service utilizers.

Additional Perspectives from the SCU Survey

"...Another challenge is the lack of options for people in crisis either hospitalization or nothing which is very harmful. Another issue are people who feel terrible but are not exactly in crisis but because there are not enough mental health providers they are forgotten or left to their own devices."

"I need to know that if I call for help, a compassionate response will arrive and be able to take a person to a humane location, respite of some kind. Not forcing them into a hospital where they are stripped of agency, but giving them a place where they can stabilize without adding to their feeling of trauma and powerlessness."

Stakeholder perceptions of a lack of sites for non-emergency care

Perceived Strengths

- Drop-in centers, day centers, sobering sites, and respite centers provide essential non-emergency services

Perceived Challenges

- No drop-in site for mental health emergencies or crises in Berkeley
- Too few drop-in sites for non-emergencies to meet the volume of need
- Lack of support for people released from a psychiatric hold

Stakeholder Ideas

- Offering drop-in sites with counselors and Peer Specialists, a phone line, and no service/time limits
- Offering office hours and/or relationship-building opportunities between the SCU and service utilizers

Stakeholders shared examples of sites that can support non-emergency care and felt that they are effective for mitigating further crises. These examples include drop-in centers, day centers, sobering sites, and respite centers. Services providers believe that such spaces allow individuals to meet their basic needs – including access to restrooms, showers, clothing, food, and rest – as well as have a safe space for self-regulation and self-soothing. Stakeholders, particularly service providers, feel that these types of resources are essential for harm reduction, crisis intervention, health promotion, and crisis prevention. Stakeholders shared that these sites can be a safe and trusted source for someone to access so that a primary caregiver can have a break, such as a parent that provides an adult child behavioral health support and care. Participants mentioned other CBOs

that operate drop-in sites, such as the Women’s Drop-In Center or Berkeley Drop-In Center, but service providers indicated that there is still an unmet need for more sites that serve sub-acute needs. Because there is not a drop-in center for emergencies, service utilizers and community service providers described relying on either 911 or the CSS 24/7 phone line. Similarly, stakeholders felt that the availability of non-emergency drop-in centers for individuals to have non-emergency, indoor downtime is too limited to meet the volume of need. CBO service providers as well as crisis responders described situations of individuals being released from psychiatric holds without adequate support upon their release. They felt that these individuals would greatly benefit from the availability of additional drop-in centers.

Service utilizers and community-based service providers emphasized that it would be useful for the SCU to have an office available for community members to develop relationships with the team, like Aging Services’ Senior Centers. They suggested that a drop-in site could have a social worker or peer counselor to accept and direct phone calls, answer questions, and support those accessing the drop-in site.

Additional Perspectives from the SCU Survey

“...addressing the connection to community in the long term - spaces for people to gather publicly without needing to pay money, so we can get to know our neighbors.”

“... We need wrap-around services, a halfway house or drop-in center for people being released from a psychiatric hold, to ease them back into their lives and connect them with ongoing services.”

Stakeholder perceptions around supporting the full spectrum of mental health crisis needs

Perceived Strengths

- Relationship building is important in crisis response

Perceived Challenges

- Wages, retention, and union agreements may affect type of staff on crisis response team
- Crisis response lacking sufficient supplies and expertise for SUD treatment, de-escalation, and system navigation
- Crisis responders are not often representative of service utilizers

Stakeholder Ideas

- Incorporate clinicians, social workers, and peer counselors on crisis response team
- Increase compensation for Peer Specialists and non-clinical staff

“A response team targeted at de-escalation and risk reduction would be best; it would be best staffed by those who can actually connect people in need to resources rather turning a crisis into a criminal matter, such as police do.”

- SCU Survey Respondent

Stakeholders shared many strengths of crisis responders across a spectrum of non-clinical and clinical background and expertise, emphasizing the importance of empathy and building trusting relationships. For instance, TOT staff received positive feedback across stakeholder groups for their follow-up work post-crisis, especially due to their diverse staff and rigorous training in preparation for field work. Service providers emphasized the importance of Peer Specialists to support service utilizers by reassuring them from their own background of lived experience, especially during transport or if the team applies physical restraints.

Crisis responders and service utilizers shared that the pre-existing relationships paramedics have with community members, particularly those that repeatedly need crisis response services, allows paramedics to deliver better care. Some CBOs have observed similar success when incorporating Nurse Practitioners on their street outreach teams. Overall, stakeholders believe that the ability for the same personnel to be providing crisis response services over an extended period can lead to positive outcomes of relationship building and knowing a client's background.

However, stakeholders raised some potential challenges that must be considered when deciding how to staff a crisis response team. Crisis responders explained that paramedics often have a higher salary than other crisis responders and their skills can be under-utilized during a mental health crisis. They felt that this could make staffing a crisis response

program with paramedics less financially efficient. On the other hand, they shared that other crisis responders, such as peer specialists, can be underpaid for their level of contribution, which they suggested might make retention a challenge. One additional consideration shared by crisis responders is that staff can have different union agreements that restrict the number of hours that can be worked per shift, which would affect the program's overall staffing model and schedule.

"I think professionals who are trained to resolve these crises non-violently is key. For example, social workers."

- SCU Survey Respondent

Stakeholders felt that some of the services most important for mental health are not always standard practice among current crisis response teams. The types of clinical services that stakeholders reported as most important for mental health crisis response include prescribing psychiatric medicines, administering single-dose psychiatric medicines, quick identification of a substance overdose and/or the need for Narcan intervention, as well as a nuanced understanding of drug-psychosomatic interactions. The types of non-clinical services that stakeholders reported as most important for mental health crisis response included de-escalation, resource linkages and handoffs, system navigation, providing perspective from providers with shared identities or experiences, building ongoing relationships with frequent utilizers, and overall building trust and rapport with the community.

Given the considerations around the types of needs that various specialties can address during crises, as well as the implications for financial feasibility, stakeholders elevated additional ideas for how to staff crisis response teams. Stakeholders expressed support for a crisis response team with a medical provider (e.g., advanced practice nurses, psychiatric mental health nurse practitioners, EMTs, or paramedics), social workers, and especially peer counselors. Stakeholders expressed that non-clinical staff are equally valuable to clinical staff in a crisis response team, a value which should be reflected in their salaries.

Additional Perspectives from the SCU Survey

"We need a crisis response team with trained social workers, case managers, and clinicians trained in de-escalation techniques. This team should be able to connect people in crisis with emergency shelter and other services."

"I do not believe that the police are trained to respond to the needs of an individual, homeless, or otherwise, experiencing a crisis. Mental health, substance use, and homelessness related crisis are best responded to by someone who has been trained to work with these issues, or a peer who, along with a trained professional, can provide support and most importantly, follow up."

Stakeholder perceptions of a need for post-crisis follow-up care.

Perceived Strengths

- Positive experiences with existing referral services (i.e., TOT and CAT)

Perceived Challenges

- Existing programs do not meet the volume of need
- Difficulty contacting service utilizers for follow-up care
- Lack of warm handoffs to follow-up providers
- Limited long-term service availability
- Strict missed appointment policies

Stakeholder Ideas

- SCU provides follow-up care
- SCU builds relationships to support before, during, and after a crisis
- Providers should be familiar with case history, triggers, etc.

For crisis services provided by the City of Berkeley, the Transitional Outreach Team (TOT) is the primary resource for post-crisis follow-up care. Service utilizers and community-based service providers elevated many strengths about the TOT team, including their ability to connect service utilizers to longer-term care options and social services when interested.

At the same time, stakeholders uplifted a need for additional follow-up care after a mental health emergency. TOT staff and Berkeley Mental Health leadership described many challenges TOT face in meeting the level of need across the crisis spectrum. The team is not adequately staffed to meet the current demand for their services. TOT is a team of only two staff with limited business hours for providing linkage to care. TOT staff also shared that the service provider that responds during a crisis (i.e., MCT) is not the same provider that makes follow-up connections (i.e., TOT), and that there are many potential providers to provide ongoing, long-term care (e.g., Berkeley Mental Health, Alameda County Behavioral Health, or private providers). They felt that this can create challenges for them to provide successful referrals and handoffs to post-crisis follow-up care, sharing background information on clients, and building trust and establishing rapport.

TOT staff also shared many challenges they face in reaching clients, particularly those leaving an inpatient or emergency facility, such as John George or Alta Bates Hospital. They explained that clients are sometimes discharged prior to their connection with TOT, often outside of TOT's hours of operation. They find it particularly difficult to connect with service utilizers that do not have a cell phone or a consistent residence, which they explain is common among high-utilizer community members, such as those with severe mental illness or those experiencing homelessness.

"I think police officers already deal with so much, there's often an acute need they're responding to when in fact these individuals need long-term care."

- SCU Survey Respondent

We need clean, safe shelters for people to spend the night if they're homeless and/or under threat. Kicking them out of shelters doesn't make the problem go away.

- SCU Survey Respondent

In general, many people that experience mental illness or mental health crises require or are recommended to long-term therapy or extended sessions. However, it is the perception of stakeholders that services are primarily devoted to high-acuity and short-term and service utilizers are unable to access long-term therapy. Stakeholders felt that the providers who do offer therapy or counseling are unable to meet the volume of weekly appointment needs of service utilizers due to budget and billing constraints. Therapy is not only a form of post-crisis care but also a pre-crisis prevention tool; service providers suggested brief intervention therapy in non-emergency settings (such as a service utilizer walking in during a crisis) to augment the existing crisis response system.

Outside of Berkeley Mental Health services, there are often strict policies around missing appointments, largely tied to insurance and billing requirements, that result in service disruption or termination for service utilizers. Service providers and service utilizers feel that these strict missed appointment policies are inaccessible to many low-income service utilizers and often result in the discontinuation of services. Stakeholders described some barriers that service utilizers may face in maintaining their appointments, including working more than one job (especially during standard business hours), having a reliable cell phone, having access to a calendar, and/or having a reliable mode of transportation.

The importance of follow-up care was elevated by all stakeholder groups as a priority for the SCU. Service providers argued that there may be benefits to having the same people providing care before, during, and after a mental health crisis, to build relationships, establish trust, and understand an individual service utilizer's care history, behaviors, triggers, and needs.

Additional Perspectives from the SCU Survey

"I would like for the police to be removed from crisis services and to have a rapid response available when I call...I would like for there to be more connection to services and follow up as part of the planning. There is often not a resource available for the person, and living on the streets is stressful, so repeated contact is essential. It can't be a one and done and often would mean an increase in FSP teams."

"Alternative trained individuals, such as social workers or mental health professionals as part of this time, increased community-based mental health care services, social and rehabilitative services that highlight social reintegration, such as Supported Housing, Supported Employment, and Supported Education."

Stakeholder perceptions of barriers to successful partnerships and referrals across the mental health service network

Perceived Strengths

- Providers know the referral options available for their clients

Perceived Challenges

- Limited coordination and information sharing between providers of shared clients
- BPD engages with many high utilizers but is not connected to the network of providers
- Lack of trust and understanding across service providers

Stakeholder Ideas

- Engage providers in discussions on system improvement
- Increase collaboration between cities, counties, and providers
- Address systemic factors of crises
- Increased outreach and care coordination of referrals

“A 24-hour crisis line/team or at least a team more available than currently. Police and that team should attend the regular city coordination meetings with the current teams that are doing outreach.”

- SCU Survey Respondent

There was consensus among stakeholder groups that the existing mental health and crisis service network is complex, involves many providers, and can be a challenge for both clients and providers to navigate. Across these entities, establishing partnerships and referral pathways can be done informally (such as knowing which organization provides which types of services) or can be formalized (such as holding regular case management meetings for shared clients). Among community-based service providers, interviewees shared that they typically do know the scope of options available to their clients.

In general, stakeholders elevated a perceived lack of coordination between service entities in Berkeley. For example, a single client might receive emergency services from John George or Highland Hospital, but also have a primary care provider, have engaged frequently with the LifeLong Street Medicine Team, and have a case manager at the Women’s Drop-In Center for wraparound services. Stakeholders shared that there is not active collaboration across all these entities or an established infrastructure to facilitate an understanding of all the touch points between providers and a service utilizer. Ultimately, stakeholders feel that this obstructs the visibility of how a service utilizer moves through various points in the system. Some providers explained that they may not share the full case history or behavior details of a client with other service providers initially because they fear the client will be rejected or denied service, particularly for violent behaviors. They feel that this prevents informed and well-placed referrals and service provision.

TOT staff shared that service coordination is lacking between hospitals and TOT for post-crisis follow-up care. To connect with an MCT service

utilizer at the hospital, TOT explained that they must rely on the discharging facility to contact them and coordinate the release of the shared client. TOT staff reported needing to spend time in hospitals to establish relationships with new case managers, front desk staff, nurses, and orderlies to facilitate this information sharing and warm handoff of clients; they described a lack of standardized protocol for such coordination.

BPD also reported feeling disconnected from the care continuum and lacking coordination with trusted CBOs and behavioral healthcare providers around shared clients. BPD routinely engages with frequent crisis service utilizers and sometimes carries supplies like food and clothing, though there is not an existing pathway for BPD to identify, contact, and coordinate with a case manager. BPD elevated that these frequent utilizers would be better served by a case manager.

Service providers also reported that BPD does not routinely bring service utilizers to their locations for support, and some questioned whether BPD know that their programs and services exist. Still, others felt that police presence at their sites is disruptive and may prevent potential service utilizers from coming if they witness police officers around the premises.

Stakeholders offered possibilities to enhance the referral pathways and partnerships across the crisis response network at both structural and provider levels. At a structural level, stakeholders suggested having a regular convening of local care providers to discuss opportunities to improve the mental health crisis system. Stakeholders also suggested having more inter-county and inter-city coordination on systemic issues related to housing and healthcare. Stakeholders suggested that the crisis response system should be expanded and augmented to include more non-mental health related service provision on the spot and not only connections or linkages to resources. Additionally, stakeholders expressed a desire for more outreach and partnerships with long-term care to enhance coordination and referrals across the service network.

At a provider level, stakeholders suggested having more coordination between providers and outreach teams. Service providers also expressed an interest in having regular meetings with the SCU to discuss shared clients, which could improve care coordination as well as client outcomes.

Additional Perspectives from the SCU Survey

"The challenge is, and has been, to have adequate staffing to provide services to those in crisis, with severe mental health diagnosis and/or dual diagnosis in the moment and following a crisis response. Successful efforts have been proven by street health teams to engage and provide treatment on the street, which often include de-escalation. The struggle lies on helping folks transition into care in the clinics, recovery programs, or a combination of both: with adequate staffing to provide long term services. So, challenges would fall under budget & funding to expand staffing and programming, including crisis residential, and Board and Care Homes...The City appears open and willing to try an approach that will better meet the needs of its citizens."

Stakeholder perceptions of needs to integrate data system and data sharing to improve services

Perceived Strengths

- Some medical clinics use the same EHR
- Some agencies use a shared Alameda County Community Health Record

Perceived Challenges

- Limited data integration across providers inhibits care coordination

Stakeholder Ideas

- Expand data integration across providers and provider access to case history
- Increase care coordination across providers
- Notify case managers after discharge from hospital

"I would also feel safe knowing that the City and County were working together to identify ways to increase funding for mental health services in conjunction with housing to meet the mental health/substance use recovery needs of the community."

- SCU Survey Respondent

Service providers feel that better system integration and data sharing across the service provider network can support providers in meeting the needs of service utilizers. Stakeholders feel that system integration and data sharing are strongly related to the successes and challenges of partnerships, referrals, and connectivity across the service network.

The numerous entities that span the mental health, substance use, and homelessness service network include CBOs and government agencies across the City of Berkeley, Alameda County, and other cities and counties. Service utilizers also move across these regions, accessing services in multiple cities or counties. As a result, system integration could happen at many levels.

Fortunately, subsets within the service network do have data integration and sharing capabilities. For instance, providers shared that all federally-qualified health centers (FQHCs) are on the same network as hospital Emergency Departments.

Some program directors also discussed a recent effort at the county level to integrate data into one Community Health Record for service utilizers.²⁵ This system integrates medical, mental health, housing, and social service data into one platform. There are currently over 30 organizations within

²⁵ Alameda County Care Connect. (n.d.). *Why AC Care Connect? Why Now?* Retrieved October 11, 2021, from <https://accareconnect.org/care-connect/#faq-item-5>

Alameda County who are using the community health record, with a goal of every agency being onboarded onto the system.²⁶

Until then, the current multitude of agency data systems are not yet fully integrated. Providers explain that they are unable to identify shared clients or high utilizers of multiple systems, track those service utilizers' touchpoints across the service network, or view patient history across those service touchpoints. Case managers share that they are not notified when a client is discharged from a medical facility or community provider of care. Service providers feel that this lack of data integration affects collaboration, referrals, and, ultimately, client outcomes. The limited visibility of a service utilizer's prior history was raised by service providers as a challenge to supporting safety when trauma histories, triggers, and recent mental health crises cannot be incorporated into care planning.

Additionally, except for diagnosis and treatment purposes, HIPAA privacy regulations require service utilizers to give consent and Release of Information (ROI) to providers for external case managers' names, information, and service documentation to be included in medical records. This limits the collaboration between case managers and other providers on a case-by-case basis.

Stakeholders elevated that it would be ideal to have all service providers, including an SCU, utilizing the same data platform. They also indicated that non-medical CBO providers and case managers should have contact with the client's health home (if established), especially for substance use management and medication management. Case managers could then be notified when a service utilizer is engaged or discharged from care. Service providers emphasized the importance of understanding someone's medical and social history to provide appropriate care and anticipate what could trigger or escalate them. Service providers also warned to not overburden the SCU with documentation requirements.

"...But we need more training in mental health, de-escalation and interagency training and coordination. We have a lot of great people working these issues, we just need a little more cross pollination of effort."

- SCU Survey Respondent

Additional Perspectives from the SCU Survey

"...Secondly, we need significantly greater inter-municipal and inter-county collaboration in order to tackle structural problems that homeless and mentally ill clients face...Increasingly, our clients are more mobile, have longer commutes, and with gentrification and sprawl, landscapes of poverty and wealth are shifting. We need to be able to be responsive to clients across municipalities and communities, as people who seek services in Berkeley, particularly homeless and low-income clients, often no longer have the means themselves to be able to live in Berkeley."

²⁶ Raths, D. (2021, October 4). Alameda County's Social Health Information Exchange Expands. *Healthcare Innovation*. <https://www.hcinnoationgroup.com/interoperability-hie/health-information-exchange-hie/article/21240807/alameda-countys-social-health-information-exchange-expands>

Stakeholder perceptions of a need for increased community education and public awareness of crisis response options

Perceived Strengths

- 911 is well-known by the general public as a crisis response option

Perceived Challenges

- Lack of clarity that MCT responds with police, undermining trust
- Limited knowledge around services and availability
- Distrust of system can prevent people from calling 911
- Incidents of unnecessary use of 911

Stakeholder Ideas

- Launch a public awareness campaign for new SCU and clearly distinguish it from MCT
- Work with partners and service providers to advertise SCU
- Increase community education on use of 911 and techniques for conflict resolution

A common perspective among stakeholders is that the general public is unclear around when police will or will not be involved in a response. Many service providers and service utilizers do not know the current options and availability of services in Berkeley to support during a mental health crisis. Overall, stakeholders share that there is a lack of understanding of what services are available and which entity provides those services. They feel that this undermines a sense of safety and contributes to distrust of the current mental health crisis response system.

One common challenge raised by many stakeholders has been the lack of understanding of MCT's co-responder model. Many providers shared that they have contacted the MCT line specifically to avoid calling 911 and were surprised when MCT was accompanied by police. Many providers, therefore, stopped calling MCT because of its collaboration with BPD. Similarly, service utilizers shared that there is a lack of trust that MCT can manage a crisis without police presence. Service utilizers are concerned that their safety is endangered in these instances and that they may experience retaliation or police surveillance after requesting service provision from MCT, especially when they request help during substance use emergencies.

Stakeholders spoke to the importance of promoting community education and public awareness to address these challenges. They feel that the success of an SCU would be contingent on community education and public awareness around whether there would be police involvement in an SCU response. Service providers shared that connecting with local CBOs, leveraging existing partnerships, and building trust will be essential for an SCU to have buy-in among service providers to call a new

"In the past, I have witnessed unsafe situations or people who look like they could use support, but I am too afraid to call the police in those situations, for fear that they could show up and harm or kill the person."

- SCU Survey Respondent

“More trained & well-compensated and insured crisis response staff, especially at night, around the full moon, or public events, & other times of increased disturbances, & more info put out there about what they do to help.”

- SCU Survey Respondent

service that they have not used before. Service providers are interested in understanding more closely how services will be provided, the techniques that will be used for de-escalation and crisis intervention, and the SCU’s relationship with the police.

Stakeholders also shared challenges around the general public’s use of 911 and ideas for how to increase responsible use of 911. Stakeholders shared many instances of inappropriate use of 911, such as during disputes among neighbors or because a housed person or business does not want an unhoused neighbor to be near them. For these reasons, stakeholders emphasized the importance of a community education campaign around appropriate uses of 911. Stakeholders suggested that such a campaign could include strategies and techniques for managing conflicts and disputes without calling for crisis responders as an additional form of promoting community safety through methods that do not require law enforcement.

Additional Perspectives from the SCU Survey

“Merchants in the shopping districts should not be able to call the cops like they’re calling customer service when a homeless person is not breaking any laws. It would be great if crisis services were more friendly and less coercive (cops), if the mental health delivery system was more robust, if crisis teams could respond in a timely way, if clinicians didn’t use police radios on mobile crisis calls, if actual risk assessments were done on calls where no one would ever need a cop (when the person is willingly ready to go to the hospital), if hospitals would actually keep and treat the most ill patients rather than turning them away after 24 hours in a waiting area, if there were more mental health respite beds run by people who aren’t ready to call the police if someone is agitated.”

Community Aspirations

Throughout stakeholder engagement, participants were asked to share their ideas for alternative approaches to mental health and substance use crises as well as to share community needs for a safe, effective mental health and substance use crisis response. These perspectives help illuminate the gaps in the current system that could be filled by a future Specialized Care Unit.

The following perspectives provide guiding aspirations for reimagining public safety and designing a response system that promotes the safety, health, and well-being of all Berkeley residents.

Community Aspirations

Stakeholder-identified opportunities to address the root causes that contribute to mental health, homelessness, and substance use crises

Stakeholder-identified opportunities for centering BIPOC communities in crisis response

Stakeholder-identified opportunities for community oversight to ensure equitable and transformative crisis care

Stakeholder-identified opportunities to address the root causes that contribute to mental health, homelessness, and substance use crises

“Berkeley should decriminalize the use of all drugs, it needs to create housing for the chronically mentally disturbed, it needs to have very well-trained people responding to crises. Berkeley together with Alameda County, should be providing wraparound services for the mentally disturbed and substance abusers. It needs to stop criminalizing people who are homeless.

- SCU Survey Respondent

Stakeholders unanimously pointed to the context surrounding the conversation on mental health crises: there are intersecting, state-wide crises of homelessness due to the lack of affordable housing²⁷ and the opioid epidemic. When reflecting on alternative ideas and community needs, stakeholders expressed desires for addressing the root causes that manifest in the present-day rates of mental illness, homelessness, and substance misuse and abuse. Stakeholders discussed possibilities for shifting funding away from the criminal system and policing to overall community infrastructure (such as jobs, housing, and education) and increasing preventative healthcare to address the root causes of mental health, homelessness, and substance use emergencies more adequately.

Stakeholders also emphasized how stigma and criminalization of drug use and/or mental illness continue to exacerbate crises. Stigma and criminalization are barriers to accessing care and addressing these crises at both the individual and structural levels. At the individual-level, stakeholders identified that internalized stigma around mental illness, homelessness, or substance use, can prevent individuals from seeking care and that service providers can reinforce stigma through their actions and/or withhold care. They described instances of criminalization of mental illness, homelessness, and substance penalizing individuals who do seek care, preventing or terminating employment or housing, and consequently perpetuating a cycle of these experiences. At a structural level, stakeholders emphasized that stigma and criminalization shape the prioritization of funding and budget allocations away from quality healthcare, affordable housing, and evidence-based harm reduction approaches that promote community safety and health. Stakeholders also identified that the gaps in the existing crisis response system are because the crisis response system was designed around the stigma and criminalization of these experiences rather than designed to provide care and promote well-being.

²⁷ In 2019, Berkeley passed a resolution calling on the Governor to declare homelessness a state of emergency. https://www.cityofberkeley.info/Clerk/City_Council/2019/02_Feb/Documents/2019-02-19_Item_10_Declaring_a_California_Homelessness.aspx

Additional Perspectives from the SCU Survey

“As with every other part of the United States, we too are dealing with a rather poorly run medical care delivery system. We are also dealing with the war on drugs which is a total failure and has criminalized for too many people for a drug related problem, which is a public health issue and should never have been a criminal justice issue.”

“Honestly we need more than just mental health crisis teams. We need a holistic approach. One that considers not just the crisis but also everything before. We need to address the underlying cause - child abuse, domestic violence, individualism and lack of community.”

“The system is overwhelmed. It has been extraordinarily difficult to link clients to shelter or mental health consistently in Berkeley. The problems that most clients suffering from mental illness in the region face are primarily systemic in nature, and there is an extreme lack of resources available in the way of permanent housing, shelter, or frontline community mental health services. Furthermore, for clients who are low-income, learning disabled or struggle with executive functioning, or homeless, engaging in the kind of time-intensive, linear, multi-step bureaucratic processes necessary to enter into the shelter and mental health systems is often all but impossible without intensive agency advocacy and persistency. Homeless clients in particular struggle with agency-based barriers to care, often move between counties and municipalities, lack targeted outreach, and experience outreach primarily as criminalization, a tragedy given that cost of living, region-wide housing shortages, and past failures of criminal justice policy are disproportionately responsible for endemic homelessness in the Bay Area.”

“Firstly, funding priorities need to shift. We need to address the root causes of mental illness, substance use, and homelessness - trauma, often created or exacerbated by decades of failed criminal justice policy and lack of investment in community infrastructure and social services, criminalization of drug users as opposed to investment in substance use counseling and harm reduction programs, and the legacy of a suburbanized and disjointed approach to regional housing policy and governance. We need to shift funding priorities in Berkeley and the region towards funding social services, especially mental health and substance use rehabilitation, education, parks and transit infrastructure, and encourage policies that protect renters and the working poor, especially families. We need to not only shift towards social workers and mental health responders as the primary agents in engagement with clients suffering from mental illness, and not only increase homeless outreach - we also need to acknowledge the history of homeless-led political engagement in Berkeley and the region, and employ a model that politically values the voices of homeless clients themselves...”

Stakeholder-identified opportunities for centering BIPOC communities in crisis response

Stakeholders emphasized that people of color, particularly Black or African American people, are most often harmed by police. They also named that in Berkeley, the structures that put people at risk of homelessness disproportionately affect Black residents, which results in Black Berkeley residents disproportionately experiencing homelessness.²⁸

Some service providers also shared incidences of racial bias and discrimination by BPD against their Black clients. For example, at a CBO provider of non-emergency services, case managers reported calling 911 because MCT was closed; the case managers reportedly gave specific instructions that a young White woman was threatening staff and refusing to leave the premises. Yet, upon arrival, BPD harassed and threatened to arrest a Black client.

Black service utilizers and service providers alike elevated their own experiences navigating systems with entrenched racism, including interactions with police and medical facilities. For example, one Black clinician shared the important and unique ways that Black personnel promote a sense of safety, security, and trust for Black service utilizers. The provider shared that the comfort and reassurance of a shared identity increases the opportunities to be more honest, especially during medical or mental health crises.

Stakeholders shared that reducing contact between police and Black residents, especially Black unsheltered residents, is important to public safety. Stakeholders also shared that Black residents and other community members of color should provide input and feedback as an SCU is designed and implemented in Berkeley.

Additional Perspectives from the SCU Survey

"less arrests and escalation by police, I worry because the homeless population is mostly African American."

"...The proportion of folks who are Black among those homeless in Berkeley is much higher than the general population. We know that police interacting with POC is a dynamic that all too often leads to harm."

²⁸ City of Berkeley. (2019). *City of Berkeley Homeless Count & Survey – Comprehensive Report*. Retrieved October 11, 2021, from https://everyonehome.org/wp-content/uploads/2019/09/2019HIRDReport_Berkeley_2019-Final.pdf

Stakeholder-identified opportunities for community oversight to ensure equitable and transformative crisis care

Due to system distrust and the current climate around Berkeley's Reimagining Public Safety efforts, stakeholders expressed a desire and need for ongoing community input and oversight of crisis response, especially by those most impacted by crisis services.

Stakeholders suggested leveraging the Mental Health Commission, which they feel is currently underutilized. They also expressed the importance of ensuring that engagement and oversight opportunities are accessible for the most structurally marginalized residents and residents utilizing SCU and crisis response services.

Additional Perspectives from the SCU Survey

"Crisis response that reaches out to the community to ask what they want; particularly communities of color, and enlist this community in the creation of the programs..."

Thoughtful, constructive ways for integration and engagement of the challenged community with the community of Berkeley residents and workers."

Overview

[Introduce facilitator and notetaker]

We are gathering information about mental health and substance use crisis response in the City of Berkeley, including by contacting (211, 911, BMH crisis triage line, etc.) and who responded (if at all): social workers, medics/EMT, fire and/or police in our city. We are interested in hearing specifically about your experiences, and/or your perceptions of, mental health and substance use crisis response in the City of Berkeley. We are gathering this information to inform the development of a Specialized Care Unit (SCU) for the City of Berkeley as a non-police crisis response to mental health and substance use calls.

At the end of the discussion, if you feel like you didn't get to share something, or you think of something else you want to share later, feel free to visit our website for additional ways to provide feedback. <https://sites.google.com/rdaconsulting.com/city-of-berkeley-scu/>

This focus group will last approximately 90 minutes. If possible, please leave your video on and keep yourself muted when you are not speaking. You may respond to our questions verbally or in the chat, whichever you prefer.

Our goal for today is to understand your experiences as providers and advocates and do not expect you to share private details of your clients' experiences. Your own responses will be kept confidential and will be de-identified in any report back to the City of Berkeley.

We understand that some experiences with the current crisis response may have been harmful to you and/or your clients; if you would like to take a break or leave the focus group, please do so at any time.

Does anyone have any questions before we begin?

Questions

Warm-up

To get us started, we would like to do some introductions.

1. Please introduce yourself to the group by sharing your name, group or organization you are representing, your role, how long you've been there, and a word or phrase that comes to mind when you think about "mental health and substance use crisis services".

Experience with and perceptions of mental health and substance use crisis response

Now I would like to ask you some questions about your experience with and perceptions of the mental health and substance use crisis response options in the City of Berkeley.

2. What do you know about the existing mental health and substance use crisis response options in the City of Berkeley?
 - a. What kinds of crises do these services respond to?
 - b. What is missing?
3. How do the services your organization or program provides intersect with mental health and substance use related crisis services?
4. Are individuals referred to your program after experiencing a mental health or substance use related crisis?
 - a. If so, what services do you typically provide
 - b. How are those clients connected to your program?
5. Where would your clients go/who would they call if they were experiencing a mental health or substance use related crisis?
 - a. If, as a provider, a client was experiencing a mental health or substance use related crisis is there a program that you would call for support?
 - i. If so, who would you call? How do you decide who to call?
 - ii. How effective has the response been?
 - iii. Please share an example of a situation where you needed to contact someone to support a mental health or substance use related crisis for a client.
 1. Do you feel that the service was helpful? If so, how?
 2. If not, what could have been done differently?
6. Do you feel comfortable/safe calling for support from the existing mental health or substance use related crisis service options? Why or why not?
 - a. Do you feel that the existing mental health or substance use related crisis response options are helpful to clients? Why or why not?
7. Are there times that you have chosen not to call for mental health or substance use related crisis response services? Why or why not?
 - a. What did you do instead?
 - b. What might have made you feel more comfortable calling for support when a client was experiencing a mental health or substance use related crisis?
8. What do you feel that your clients typically need when they are experiencing a mental health or substance use related crisis?
 - a. Where might you refer a client if your program or organization can't provide the help they need during a mental health or substance use related crisis?
9. Are there local organizations or groups that you collaborate with that are maybe not considered part of the "system"?
 - a. If so, who are they and what kinds of support do they provide?
 - i. Do you think they would want to talk with us? *[if yes, get contact info for follow up]*

Strengths and challenges of the current mental health or substance use related crisis response options

In this section we will be discussing what the system is doing well and what the system is not doing so well.

10. In your opinion, what are some of the strengths of the current mental health or substance use related crisis response options?
 - a. If your clients have experienced a mental health or substance use related crisis, were they able to get help? How so?

11. In your opinion, what are some of the weaknesses of the current mental health or substance use related crisis response options?
 - a. Why do you think things aren't working?
 - b. Do you think mental health or substance use related crisis response services are difficult for your clients to access? How so?
 - c. What are some of the gaps related to mental health or substance use related crisis response options?

12. Do you feel that some people are served better than others by the current crisis system?
 - a. If so, who is left out?
 - b. Are people treated differently based on their race, gender, culture, sexuality, or disability? If so, how?

Ideas for alternative model

In this section I'm now going to ask you for your ideas for an ideal response for someone experiencing a mental health or substance use related crisis.

13. What would an ideal mental health or substance use related crisis response look like for you and the people you serve?
 - a. What kind of response would best meet the needs of your clients?
 - b. What would make it more likely for you to reach out to a crisis team for support?
 - c. What would make it less likely for you to reach out?
 - d. Who should, and should not, be involved in a mental health or substance use related crisis response? (i.e., Police, EMT, clinicians, peers, social workers, others?)
 - e. What do you consider to be essential features of an effective mental health or substance use related crisis response that is responsive to, and respectful of, the clients you serve?

14. What do you feel needs to be included in a new mental health or substance use related crisis response for you to feel safe calling for or providing those services?

Wrap up

We are hoping to talk to people one on one who are less likely to attend a focus group, but who have lived experience and would like to provide feedback on the development of a Specialized Care Unit. We are asking you to think about the people your program serves and consider if there are individuals who might want to share their experience with us in an interview either in person or over the phone.

15. What do you think are the best ways to engage your clients in this process?
 - a. How can we make sure that everyone's voice is heard?
 - b. Who is the best person to interview them?

- c. Would they be comfortable talking with someone from RDA or is there another person who might be more suited to talk with them?
- d. [Note contact information for follow up if applicable]

16. Is there anything else that you didn't get to share today that is important for us to know?

Closing

Thank you for your participation. We genuinely appreciate the time you took to speak with us today. We will be conducting interviews with other organizations and community members over the next few months and compiling a report based on the feedback, which will be shared with you and the community. If you would like to share any additional information with the City of Berkeley, feel free to visit <https://sites.google.com/rda consulting.com/city-of-berkeley-scu/>.

Appendix B. Demographics of Community Engagement Participants

As a reference point, it is important to understand the demographics of the Berkeley population. Table 1 below shows the demographics of Berkeley's overall city population (in July 2019) and the Medi-Cal recipient population (FY 2019-2020). Medi-Cal population demographics are included because the majority of City of Berkeley ongoing funded mental health services are restricted to this population, due to funding requirements. Relative to Berkeley's overall population, Black or African American residents are overrepresented in the City's Medi-Cal population, while Whites and Asians are underrepresented.

Table 1. Berkeley Population and Medi-Cal Recipient Demographics (2019)

	City Population (July 2019) ²⁹	Medi-Cal Recipients (FY 2019-2020)
Population Size	121,363	18,548
Race Ethnicity (%)		
White	53.3%	26%
Black/African American	7.9%	22%
Hispanic/Latino	11.4%	12%
Asian/Pacific Islander	21.5%	10%
American Indian/Alaska Native	0.5%	0%
Other (including 2+ races)	7.5%	33%
Gender (%)		
Female	50.5%	51%
Male	49.5%	49%

In the charts shown below, "provider participants" are those who were interviewed by RDA as part of CBO interviews and focus groups. "Service utilizer participants" are clients of CBOs or encampment residents who were interviewed by RDA. And "survey participants" are individuals who responded to RDA's online survey; these respondents could be a mix of providers, service utilizers, and/or other Berkeley residents or stakeholders.

²⁹ United States Census Bureau. (2019). *QuickFacts – Berkeley city, California*. <https://www.census.gov/quickfacts/berkeleycitycalifornia>

Figure 1 below shows the age distribution of the individuals that participated in this process. Overall, RDA received information from more people in the 30-44 range (39%) than any other age range.

Figure 1. Participants by age (n = 122 individuals)

Figure 2 below shows the racial and ethnic distribution of participants in RDA's data collection.³⁰ Participants were asked to note all races/ethnicities that they identified with, so these are duplicated counts; for this reason, specific percentages should not be interpreted from this data. A large proportion of participants were white, especially among the survey respondents who participated. Most of the Black or African American participants contributed their perspectives via RDA's in-person focus groups or interviews. As compared to Berkeley's overall population, service utilizers and providers who identified as Black or African American were overrepresented in RDA's data collection efforts, (see Table 1).

³⁰ 13 participants selected more than one racial or ethnic identity, so these numbers are duplicated. For example, if a participant selected White and Black or African American, they are counted in both the White and African American categories.

Figure 2. Participants by race/ethnicity (n = 122 individuals)

Figure 3 below shows the number of transgender and cisgender participants of RDA's data collection. Overall, there were far more cisgender participants than transgender participants. However, a higher proportion of service utilizer respondents (13%) were transgender, while less than 4% of survey respondents and 3% of provider respondents were transgender.

Figure 3. Participants by transgender/cisgender (n = 122 individuals)

Figure 4 below shows the gender identity distribution of participants to RDA's data collection. RDA collected feedback from more than double the number of female-identifying participants (72) than male-identifying participants (31). There was an even distribution among service utilizer respondents (41% female and 41% male) compared to survey respondents (67% female vs. 20% male) and provider respondents (69% female, 16% male). Overall, there were very few genderqueer or nonbinary participants (<1% and 6% respectively).

Figure 4. Participants by gender identity (n = 122 individuals)

Figure 5 below shows the sexual orientation of participants of RDA's collection. Over one third (35%) of participants identified as heterosexual or straight, while over one fourth (28%) identified as LGBTQ+. The remaining participants did not share their sexual orientation or it was not asked of them. Over half of survey respondents (57%) identified as straight, while only 31% of provider respondents and 10% of service utilizer respondents identified as straight.

Figure 5. Participants by gender identity (n = 122 individuals)

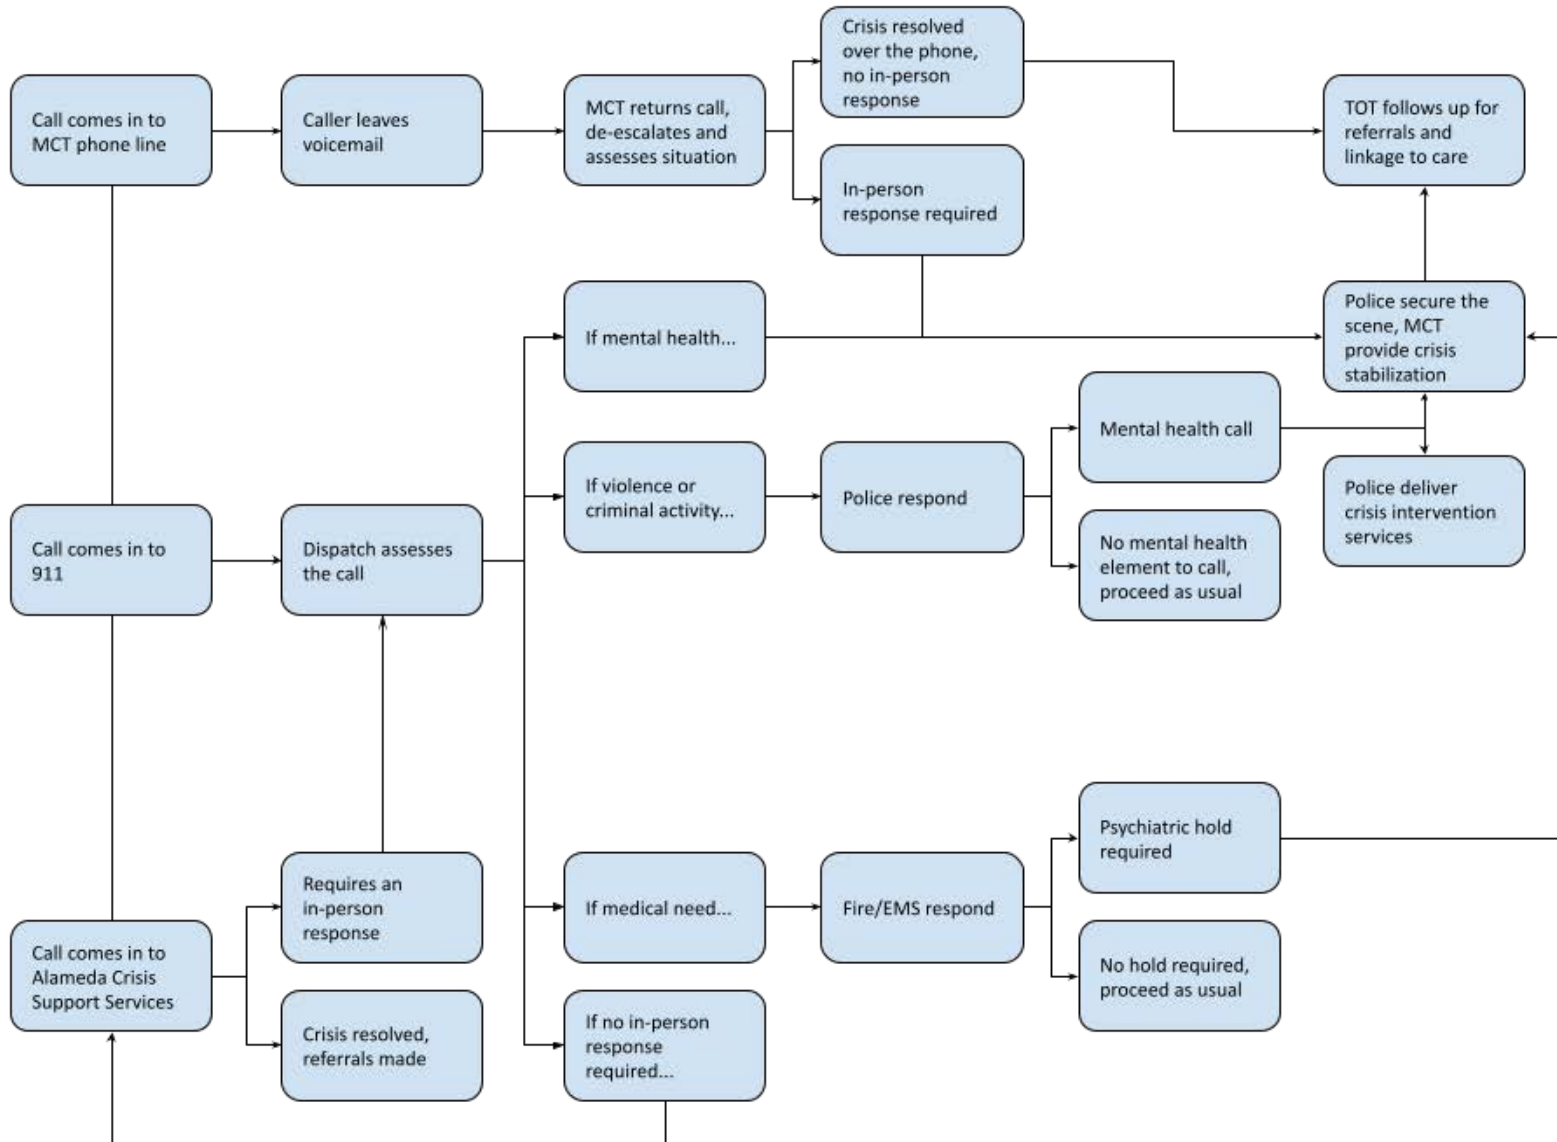

Figure 6 below shows the geographical distribution of participants of RDA's data collection. The most common zip code of participants was 94710 (25%), in large part due to the number of Seabreeze encampment residents that participated in this process. Closely following were the Berkeley ZIP codes of 94702, 94703, and 94704 with 11%, 12%, and 18% of participants, respectively.

Figure 6. Participants by ZIP code (n = 122 individuals)

Appendix C. Process of a Mental Health Call

Appendix D. Mental Health Call Responses – Call Volume and Demographics

Data Collection Methods and Challenges

Early on in this project, RDA submitted requests to Berkeley Mental Health’s Mobile Crisis Team (MCT) and the Berkeley Fire Department (BFD) to receive data on responses to all mental health related calls. MCT shared basic service-level data of their responses for FYs 2015-2020. BFD shared data from BFD and Falck (the city’s contracted ambulance services provider for mental health crises) that was limited to responses to 5150 calls in Berkeley between calendar years 2019-2021.

RDA did not submit a data request to the Berkeley Police Department (BPD) for two reasons. First, from another evaluation project that RDA currently has with the Berkeley Mental Health Division, RDA already had basic service-level data from BPD regarding their responses to calls originating for 5150s, for the period of CYs 2014-2020. Second, in April 2021, the Berkeley City Auditor released a comprehensive report on its extremely in-depth data analysis of BPD’s responses. For the purposes of RDA’s project regarding the Specialized Care Unit (SCU), there was no need to replicate any of the work and findings that came from the Berkeley City Auditor. Please see the Berkeley City Auditor’s report for a detailed description of its methods, findings, data limitations, and data recommendations for BPD.³¹ The findings that are shared in this report from the Berkeley City Auditor’s study are extrapolated directly from the data about BPD calls (from CYs 2015-2019) that was included in the Auditor’s report.

In general, RDA’s analysis of MCT, BFD, Falck, and BPD call data yielded high-level summary plots about subject/patient demographics and call volume. The general limitations of all available data prevented a more in-depth analysis of the data. More detailed tabular findings are not shared in this report for two reasons: 1) given that all of the quantitative data are under representations of the true volume of crisis responses and callers in Berkeley, only the trends about the volume of mental health related calls and caller demographics should be interpreted from this data, not the specific numbers; and 2) in order to protect the privacy of the few individuals who populated some of the specific categorizations of this data, RDA cannot disclose data which includes small sample sizes.

There were limitations to the quantitative datasets that RDA received. Of greatest impact is that the data entry practices across each agency were not consistent with each other, thus limiting which data could be pulled for analysis as well as which findings could be compared between agencies. For example, due to data limitations, RDA was unable to present a total call volume across agencies or the unmet need for mental health intervention during 5150 transport. Though estimates on call volume and unmet need are relevant to understanding crisis response options, inconsistent data collection and reporting across agencies would make this calculation inaccurate and misleading.

³¹ Berkeley City Auditor. (2021, July 2). *Data Analysis of the City of Berkeley’s Police Response*. https://www.cityofberkeley.info/uploadedFiles/Auditor/Level_3_-_General/Data%20Analysis%20of%20the%20City%20of%20Berkeley's%20Police%20Response.pdf

The data challenges that RDA encountered were very similar to those faced by the Berkeley City Auditor; please refer to the Berkeley City Auditor’s report of its findings of Berkeley’s Police Response for a thorough description of their data challenges.³²

Mental Health Call Volume

Mobile Crisis Team: From the call data that MCT shared with RDA, findings are limited to only showing the total volume of calls that MCT responded to during 2015-2020. Due to missing data and data elements across the various years, there were not any consistent elements for which findings could be determined over the full five-year period. Figure 7 below shows the volume of MCT’s total incidents and which of those incidents resulted in a 5150 for each year between 2015-2020.

Figure 7. Mobile Crisis Team (MCT) Incidents in 2015-2020 - Total

Since 2015, there has been a gradual decline in the number of total and 5150 incidents that MCT responded to in Berkeley due to staff vacancies as well as the COVID-19 pandemic.

Berkeley Police Department: For the period of 2014-2020, RDA received data from BPD that included all calls initially coded by BPD as needing a 5150 response. This was the only type of designation that could be queried in BPD’s data for mental health related calls. From this dataset, RDA identified the variety of other types of incidents that were coded alongside “5150” for each call. Figure 8 below shows the top ten incident types for all the 5150 calls that BPD responded to in 2014-2020.

Figure 8. Top 10 Berkeley Police Department (BPD) 5150 Incident Call Types, 2014-2020

³² Berkeley City Auditor. (2021, July 2). *Data Analysis of the City of Berkeley’s Police Response*. https://www.cityofberkeley.info/uploadedFiles/Auditor/Level_3_-_General/Data%20Analysis%20of%20the%20City%20of%20Berkeley's%20Police%20Response.pdf

Top 10 BPD 5150 Incident Call Types (2014-2020)

Disturbance, welfare check, mentally ill, and suicide were the most frequent incident types of all 5150 calls to BPD.

The Berkeley City Auditor conducted a qualitative analysis of its BPD call response data to explore the differences between calls that were or were not mental health related. Because BPD’s data does not have an explicit variable that denotes whether each call is mental health related or not, the Berkeley City Auditor did a keyword search for mental health related terms in the open narrative fields of BPD’s call entries. Figure 9 below shows the differences in mental health related and non-mental health related calls that BPD responded to between 2015-2019, stratified by call type.

Figure 9. Berkeley Police Department (BPD) Call Types, 2015-2019

Top Call Types with Mental Health Incidents (2015-2019)

Around 40% of BPD’s welfare check calls included a mental health related facet to the response, followed by around 20% of disturbance calls, and around 10% of calls regarding suspicious circumstances.

Berkeley Fire Department: The data that BFD shared with RDA (which included data from BFD and Falck) included information on the facilities that BFD and Falck transported 5150 cases to between 2019-2021. Falck conducted the large majority of 5150 transports in Berkeley. Most 5150 transports were to Alta Bates Medical Center and John George Psychiatric Emergency Services. BFD only transported 5150 cases to Alta Bates, Oakland Children’s Hospital, and Kaiser. As contracted, Falck conducted 5150 transports to all the agencies noted below.

Figure 10. BFD and Falck 5150 Transports by Destination, 2019-2021

BFD also shared data regarding their and Falck’s time on task for each 5150 response and transport. Time on task represents the time from which BFD or Falck arrive at the scene to the point in which they complete the transport of the patient to the destination. Of the 95 5150 transports that BFD conducted between 2019-2021, BFD’s average time on task was 20 minutes. Of the 1,523 5150 transports that Falck conducted between 2019-2021, Falck’s average time on task was 115 minutes. This is because Falck is the designated ambulance provider who is transporting 5150 cases around Alameda County. These calls can take more time and can be to farther locations. Figure 11 below shows the average time on tasks for BFD and Falck.

Figure 11. BFD and Falck Time on Task for 5150 Transports, 2019-2021

Average Time on Task, BFD (2019-2021)

Average Time on Task, Falck (2019-2021)

BFD, Paramedics Plus (or PPlus, the contracted ambulance provider prior to Falck), and Falck’s data on their 5150 call responses also included information on the day of the week and time that each 5150 call was initiated. RDA analyzed this data to search for any notable trends regarding when 5150 calls originate. Figure 12 below shows when each agency’s 5150 call responses occurred; this data spans the years 2018-2021. From this data, it appears that 5150s are least frequent during the very late-night and early-morning hours (2:00-8:00am), and the most frequent between 10:00am – midnight. There is no noticeable difference in the frequency of 5150s across the seven days of the week.

Figure 12. BFD, PPlus, Falck 5150 Transports by Time of Day and Day of Week, 2018-2021

Call Responses by Hour of Day (2018-2021)

Call Responses by Day of the Week (2018-2021)

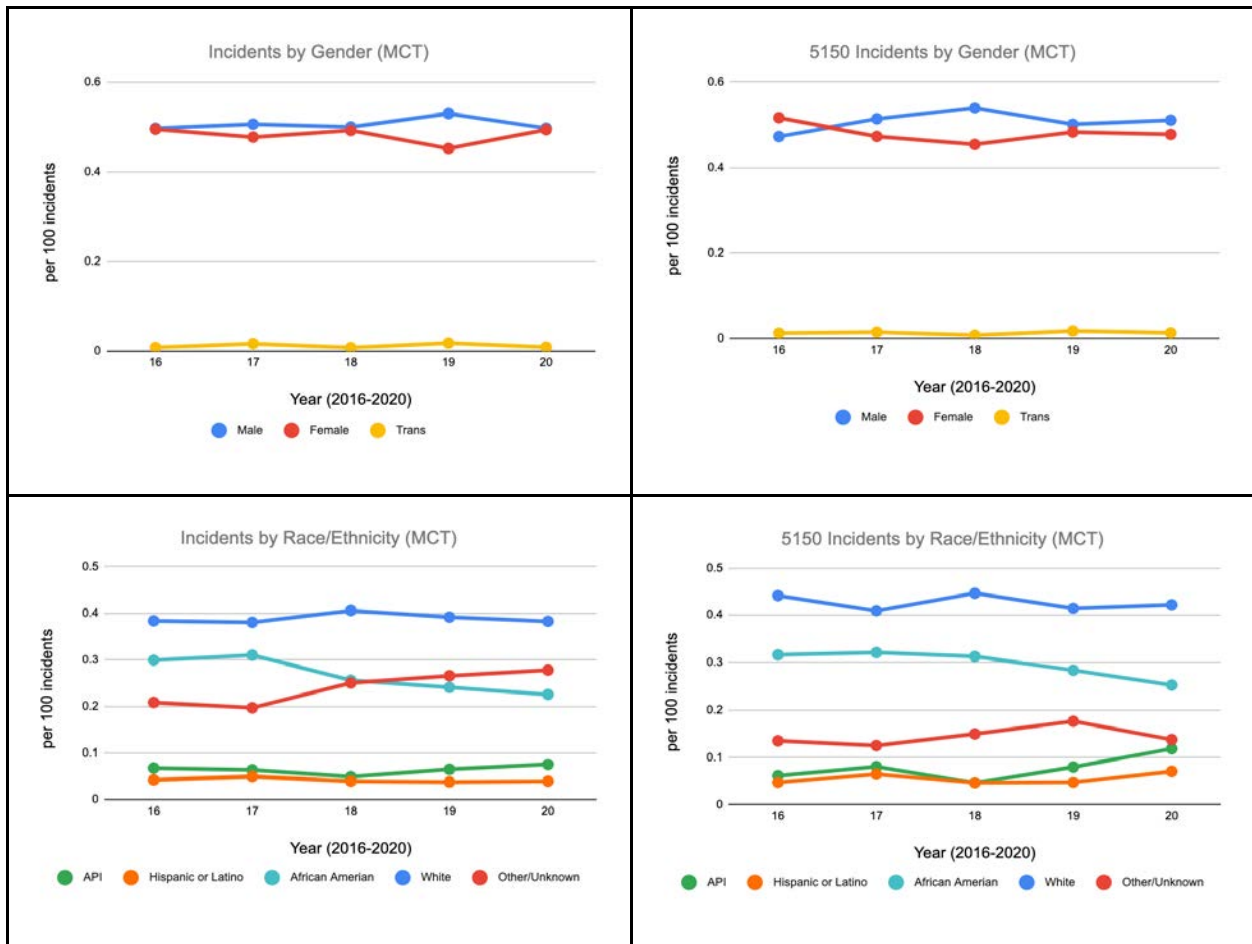

Demographics of Mental Health Call Responses

Mobile Crisis Team: For the five-year period of FY 15/16 through FY 19/20, the Berkeley Mental Health Division’s Mobile Crisis Team (MCT) shared data about both their overall volume of responses as well as those pertaining specifically to 5150 calls. Figure 13 below includes four figures that show MCT’s incidents by gender (first row), and then incidents by race/ethnicity (second row) by each fiscal year.

Figure 13. Mobile Crisis Team (MCT) Incidents in 2015-2020 - Gender, Race/Ethnicity

Total Incidents	5150s Only

MCT incidents were with slightly more males than females, and very few trans individuals. And, regarding race/ethnicity, MCT cases were most often White, followed by African American, other/unknown, Asian Pacific Islander, and Hispanic or Latino. Given that African Americans comprise only 7.9% of Berkeley's population (see Table 1), they are very overrepresented in MCT's service utilizer population.

Berkeley Police Department: For the six-year period of CY 2014 through CY 2020, the Berkeley Police Department (BPD) shared data regarding demographics (age, race, and sex) for each of its calls that were originated as designated 5150 responses. Since 2019, the majority of 5150 responses were conducted by Falck - an ambulance services provider contracted by BFD - because Falck is the designated entity (between the two agencies) to conduct 5150 transports in Berkeley. Figure 14 below includes six figures that show: 1) the summative demographics of BFD's 5150 subjects, and 2) the incident types stratified by subject demographics.

Figure 14. Berkeley Police Department (BPD) 5150 Subjects in 2014-2020 - Demographics and Incident Types³³

<u>Subjects by Demographics</u>	<u>Incident Types by Demographics</u>
---------------------------------	---------------------------------------

³³ Data noted as (blank) represent data points where data were missing.

Of the BPD 5150 calls that had demographic variables coded, most responses were with individuals between ages 26-59, White, or male. Liked noted above with MCT’s service utilizer population, given that African Americans comprise only 7.9% of Berkeley’s population (see Table 1), they are also very overrepresented amongst BPD’s 5150 population. Most BPD 5150 calls were also coded as disturbance calls, welfare checks, mentally ill individuals, and suicide. Each incident type is not mutually exclusive, so any particular incident could have one or multiple more incident type logged towards it in addition to being a 5150.

The Berkeley City Auditor’s report (released in April 2021) on BPD call responses included a variety of tables with data on the demographics of the subjects of their officer-initiated stops by race and age; please refer to the Berkeley City Auditor’s Report in Figure 19: Officer-Initiated Stops by Race and Age, 2015-2019.³⁴ RDA took the data shared in that figure to produce different visual representations of all subjects that BPD responded to between 2015-2019; this data includes responses to non-mental health related calls, as well.

³⁴ Berkeley City Auditor. (2021, July 2). *Data Analysis of the City of Berkeley’s Police Response*. https://www.cityofberkeley.info/uploadedFiles/Auditor/Level_3_-_General/Data%20Analysis%20of%20the%20City%20of%20Berkeley's%20Police%20Response.pdf

Figure 15. Berkeley Police Department (BPD) Officer-Initiated Calls in 2015-2020 - Race and Gender (via Berkeley City Auditor's Report on BPD Calls)

Berkeley Fire Department: For the three-year period of CY 2019 through CY 2021, the Berkeley Fire Department (BFD) shared data regarding demographics (age, race, and gender) and incident type for each of its calls that were originated as designated 5150 responses. Figure 16 below includes six figures that show: 1) the summative and combined demographics of BFD and Falck's 5150 patients, and 2) the differences in volume of BFD and Falck 5150 responses stratified by patient demographics. Figure 17 below shows the total combined 5150 responses by BFD and Falck, first grouped by gender by race, then by race by gender.

Figure 16. Berkeley Fire Department (BFD) and Falck 5150 Patients in 2019-2021 - Demographics

Figure 17. Berkeley Fire Department (BFD) and Falck 5150 Patients in 2019-2021 - By Gender and Race

Similar to the incidents that MCT responded to, the 5150 patients that BFD and Falck responded to are mostly between ages 26-59, White, or male. Falck also conducted a large majority of the 5150 transports in Berkeley, as compared to BFD.

Introduction

In response to the killing of George Floyd by Minneapolis police in May 2020 and the ensuing protests across the nation for this and many other similar tragedies, a national conversation emerged about how policing can be done differently in local communities. The Berkeley City Council initiated a broad reaching process to reimagine policing in the City of Berkeley. As part of that process, in July 2020, the Berkeley City Council directed the City Manager to pursue reforms to limit the Berkeley Police Department's scope of work to "primarily violent and criminal matters." These reforms included, in part, the development of a Specialized Care Unit (SCU) pilot to respond to mental health crises without the involvement of law enforcement.

In order to inform the development of an SCU, the City of Berkeley contracted with Resource Development Associates (RDA) to conduct a feasibility study that includes community-informed program design recommendations, a phased implementation plan, and funding considerations. As part of this feasibility study, RDA reviewed the components of nearly 40 crisis response programs in the United States and internationally, including virtually meeting with 10 programs between June and July 2021. This report provides a synthesized summary of RDA's findings, including common themes that emerged from across the programs, how they were implemented, considerations and rationale for design components, and overall key lessons learned. Please see the table below for a list of the programs that RDA reviewed. For the first nine programs listed (in bold and italics), RDA conducted phone interviews with representatives to obtain a further understanding of their program models; these programs are cited more often in this report because RDA had more details about them. For the remaining programs listed, RDA reviewed information that was available online. For a tabular summary of the key components of each crisis response program that RDA reviewed, please see Appendix C at the end of this report.

Additionally, SAMHSA's summary of its National Guidelines for Behavioral Health Crisis Care (released in 2020) is included in Appendix A of this report.

<u>Program Name</u>	<u>Location</u>

Crisis Response Models: An Overview

Of the crisis response program models reviewed, almost all specify that they respond to mental health and behavioral health concerns in their communities. Some models additionally specify that they respond to non-emergency calls, crises or disturbances related to substance use, homelessness, physical assault and sexual assault, family crises, and/or youth-specific concerns, as well as conduct welfare checks.

In California, Alameda County has the highest rate of 5150 psychiatric holds in the entire state.¹ Of those Alameda County individuals placed on a 5150 psychiatric hold that were transferred to a psychiatric emergency services unit, 75-85% of the cases did not meet medically necessary criteria to be placed in inpatient acute psychiatric services. This demonstrates an overuse of emergency psychiatric services in Alameda County, which creates challenges in local communities such as having lengthy wait times for ambulance services when these ambulances are tied up transporting and waiting to discharge individuals on 5150 holds at psychiatric emergency service units.

Mental health crises are varied - they affect individuals across their lifespans, manifest in a variety of behaviors, and exist on a spectrum of

¹ INN Plan – Alameda County: Community Assessment and Transport Team (CATT) – October 25, 2018. (2018, October 25). severity and risk. A crisis response system ultimately seeks to provide care to individuals in the midst of a mental health crisis, keeping the individual and their surrounding community safe and healthy, and preventing the escalation of the crisis or exacerbating strains to mental and emotional well-being. As such, there are many considerations for the design of a mental health crisis response system that addresses the current shortcoming or flaws in existing models around the country and internationally.

Traditionally, the U.S. crisis response system has been under the purview of local police departments, typically with the support of local fire departments and emergency medical services (EMS), and activated by the local 911 emergency phone line. Over time, communities have responded to the need for a response system that better meets the mental health needs of community members by activating medical or therapeutic personnel in crisis response instead of traditional first responders (i.e., police, fire, EMS).

Term	Definition
<i>Traditional Crisis Response Model</i>	For the purposes of this report, we assume a traditional crisis response model includes having all crises routed through a 911 center that then dispatches the local law enforcement agency (as well as fire department and/or EMS, if necessary) to respond to the crisis.
<i>Co-Responder Model</i>	Co-responder models vary in practice, but they generally involve law enforcement officers and behavioral health clinicians working together to respond to calls for service involving an individual experiencing a behavioral health crisis.
<i>911 Diversion Programs</i>	Programs with processes whereby police, fire, and EMS dispatchers divert eligible non-emergency, mental health-related calls to behavioral health specialists, who then manage crisis by telephone and offer referrals to needed services.
<i>Alternate Model</i>	Emerging and innovative behavioral health crisis response models that minimize law enforcement involvement and emphasize community-based provider teams and solutions for responding to individuals experiencing behavioral health crises.

Like a physical health crisis that requires treatment from medical professionals, a mental health crisis requires responses from mental health professionals. Tragically, police are 16 times more likely to kill someone

with a mental health illness compared to others without a mental illness.² A November 2016 study published in the American Journal of Preventative Medicine estimated that 20% to 50% of fatal encounters with law enforcement involved an individual with a mental illness.³ As a result, communities have begun to consider the urgent need for crisis response models that include mental health professionals rather than police.

In the current national discussion about appropriate crisis response strategies for individuals experiencing mental health crises, the prominent concerns voiced have typically focused on the safety of crisis responders and community members, the funding of such programs, and balancing a sense of urgency to implement new models quickly with the need for intentional planning and preparation. In order to understand the current models that exist, RDA reviewed nearly 40 national and international crisis response programs and specifically interviewed staff from 9 programs about their:

- Program planning efforts, including community engagement strategies, coordinating across city agencies and partner organizations, and program planning, implementation, and evaluation activities;
- Models' key elements, including dispatch, staffing, transport capabilities, follow-up care, and more;
- Program financing;
- Other considerations that were factored into their program planning; and
- Key lessons learned or advice for the City of Berkeley's implementation of its SCU.

Components of Crisis Response Models

While each crisis response program was designed to meet the needs of its local community, there are several overarching components that were common across the programs that RDA explored. The majority of crisis response programs use their community's existing 911 infrastructure for dispatch. Most programs respond to mental health and behavioral health calls where they engage in de-escalation, assessment, referral, and

<https://www.usatoday.com/story/news/2015/12/10/people-mental-illness-16-times-more-likely-killed-police/77059710/>

³ DeGue, S., Fowler, K.A., & Calkins, C. (2016). Deaths Due to Use of Lethal Force by Law Enforcement. *American Journal of Preventive Medicine*, 51 (5), S173-S187. [https://www.ajpmonline.org/article/S0749-3797\(16\)30384-1/fulltext](https://www.ajpmonline.org/article/S0749-3797(16)30384-1/fulltext)

transport. Nearly all programs recognize the need to operate 24/7. Staffing structure varies by the needs of the community, but many response team units are staffed by teams of two to three individuals and can include a combination of mental health professionals, physical health professionals, and peers with lived experience. Many teams arrive in plainclothes or T-shirts with logos in a vehicle equipped with medical and engagement items. Teams typically receive skills-based training in de-escalation, crisis intervention, situational awareness, and communication. Crisis teams will either transport clients themselves or call a third party to transport, depending on the legal requirements and staffing structure of the crisis response team. Programs varied in their inclusion and provision of follow-up care.

Underneath the high-level similarities of the crisis response models that RDA researched are the tailored nuances that each program adapted to its local needs, capacities, and priorities. Below are additional details, considerations, and examples from existing models to further inform the City of Berkeley's development and implementation of its SCU.

Accessing the Call Center

Of the reviewed crisis response programs, the majority use the existing local 911 infrastructure, including its call receiving and dispatch technology and staff. There are several advantages to this approach. The general public is typically familiar with the number and process for calling 911, which can reduce the barrier for accessing services. Also, because 911 call centers already have a triage protocol for behavioral health calls, there can be a more seamless transfer of these types of calls to the local crisis response program. Additionally, some calls might not be reported as a mental health emergency but can be identified as such by trained 911 dispatch staff.

Generally, the administration of 911 varies across the nation. In some locales, 911 is operated by the police department, while in other locales it is administered centrally across all emergency services. Some programs have mental health staff situated in the 911 call center to: a) directly answer calls; b) support calls answered by 911 staff; and/or c) provide services over the phone as a part of the 911 call center's response. In Chicago, in addition to diverting more calls to the crisis response program, the staff of Chicago's Crisis Response Pilot anticipates that having mental health clinicians embedded in their call center to do triage and telemedicine will help them lay the foundation for a smooth transition to 988.

988 is the three-digit phone call for the National Suicide Prevention Lifeline. By July 16, 2022, phone service providers across the country will direct all calls to 988 to the National Suicide Prevention Lifeline, so that Americans in crisis can connect with suicide prevention and mental health crisis

counselors.⁴ In California, AB 988 was passed in the State Assembly on June 2, 2021 (and is currently waiting on passage by the State Senate) – AB 988 seeks to allocate \$50 million for the implementation of 988 centers that have trained counselors receiving calls, as well as a number of other system-level changes.⁵ In RDA’s research of crisis response models, some programs are actively planning for the upcoming 988 implementation when exploring the functionalities of their local 911 infrastructure and responsibilities; other programs were not differentiating 988 from 911 in the communities. For the purposes of this report, moving forward, we will not differentiate 911 from 988, and will refer to all emergency calls for service as going to 911.

Other programs use an alternative phone number in addition to or instead of 911. These numbers can be an existing non-emergency number (like 211) or a new phone number that goes directly to the crisis response program. Oftentimes a program will utilize an alternative phone number when they believe that people, particularly those disproportionately impacted by police violence, do not feel safe calling 911 because they fear a law enforcement response. Portland’s Street Response team & Denver’s STAR team use both a non-emergency number and 911, routed to the same call center. This supports community members that are hesitant to use 911 while also ensuring that calls that do come through 911 are still routed to Portland’s Street Response team. Overall, designing a system in Portland with both options was intended to increase community members’ access to mental health crisis services. Given that Portland’s program began on February 16, 2021, not enough time has elapsed for findings to be generated regarding the success of this model. But a current challenge that Portland shared with RDA is that some calls to their non-emergency number have wait times upwards of an hour because their call center needs to prioritize 911 calls.

In other program models, an alternate phone number may have been used in the community for years and, therefore, is a well-known resource. For example, in Canada’s REACH Edmonton program, the 211 line is well-used for non-emergency situations, so it is used as the main connection point for its crisis diversion team.

Triage & Dispatch

Once a call is received, dispatch or call center staff will assess whether services could be delivered over the phone or whether the call requires an in-person response, and whether the response should be led by the crisis response team or another entity. Several programs utilize existing

⁴ Federal Communications Commission. (2021). Suicide Prevention Hotline. <https://www.fcc.gov/suicide-prevention-hotline> & <https://www.fcc.gov/sites/default/files/988-fact-sheet.pdf>

⁵ Open States. (n.d.). California Assembly Bill 988. Retrieved September 2, 2021, from <https://openstates.org/ca/bills/20212022/AB988/>

well-used triage tools and/or made modifications to those triage tools based on a renewed emphasis of having non-police responses for mental health crises. Please see Appendix B for sample outlines of types of scenarios for crisis response teams that were shared with RDA. A dispatch's assessment of mental health related calls is dependent on the services provided by the local mental health crisis response team, an assessment of the situation and the caller's needs, who the caller has identified as the preferred response team, and any other safety concerns.

Some programs prioritize staff assignment based on call volume and need, such as programs that have chosen to pilot non-police crisis response teams in specific geographic locations within their jurisdiction. In these programs, the call center must, therefore, determine the location of the requested response when dispatching a crisis response team. For example, Chicago's Crisis Response Pilot has four teams that are assigned to different areas of the city based on their local ties and expertise of community needs; each team, therefore, only responds to calls that come from their assigned area. When programs are able to scale their services and hire more staff, many pilot programs plan to expand their geographical footprints.

Many crisis response teams are dispatched via radio or a computer-aided dispatch (CAD) system, and some have the ability to listen in on police radio and activate their own response if not dispatched. Of the nine programs that RDA interviewed, the Eugene CAHOOTS program allows its team to be self-dispatched, the Denver STAR program allows its team to directly see what calls are in the queue so they can be more proactive in taking and responding to calls, and the San Francisco SCRT program allows its team to respond to incidences that they witness while being out in the streets. Regarding the ability to self-dispatch, San Francisco's SCRT program is currently figuring out the regulatory requirements that might prohibit self-dispatching paramedics because they must be dispatched through a dispatch center.

Having multiple opportunities to engage the crisis response team is important to ensure community members have the most robust access to the service. For example, in Denver, their police, fire, and EMS can call their Support Team Assisted Response (STAR) team directly. Across all incidents that the Denver STAR team responded to in the first six months of its pilot implementation, it was activated by 911 dispatch in 42% of incidents, by police/fire/EMS in 35% of incidents, and self-activated in 23% of incidents.⁶ These data from the Denver STAR team demonstrate how, especially in the early stages of a new program's implementation, new processes and relationships are continually being developed, learned, refined, and implemented. For this reason, it is beneficial to have safeguards in place in triage and dispatch processes so that the crisis

⁶ Denver STAR Program. (2021, January 8). STAR Program Evaluation. https://www.denverperfect10.com/wp-content/uploads/2021/01/STAR_Pilot_6_Month_Evaluation_FINAL-REPORT.pdf

response team can be flexible in responding to the various ways in which crisis response calls originate.

Assessing for Safety

The presence of weapons or violence are the most common reasons why a crisis response team would not be sent into the field. Some of the reviewed programs only respond to calls in public settings and do not go to private residences as an effort to protect crisis team staff, though this was the case in a few of the 40 reviewed programs. Calls that are deemed unsafe or not appropriate for a crisis response team will often be responded to by police, co-responder teams, police officers trained in Critical Intervention Team (CIT) techniques, or other units within the police department. Many alternative models have demonstrated that the need for a police response is rare for calls that are routed to non-law enforcement involved crisis response teams. For instance, in 2019, Eugene's Crisis Assistance Helping Out On The Streets (CAHOOTS) team only requested police backup 150 times out of 24,000 calls, or in fewer than one percent of all calls received by the crisis team;⁷ this demonstrates that effective triage assessments and protocols do work in crisis response models.

Several of the programs interviewed by RDA mentioned that they are currently evaluating options for their non-police crisis response teams to respond to situations that may involve weapons or violence. These are situations that would otherwise be scenarios that default to a police response. These programs are aware of the risks of police responses to potentially escalate situations that could otherwise be deescalated with non-police involved responses and are trying to find ways to reduce those types of risks.

The types of harm and concerns for safety that should be assessed are not only for crisis response team staff, but also for the individual(s) in crisis and surrounding bystanders or community members. SAMHSA's best practices on behavioral health crisis response underscores that effective crisis care is rooted in ensuring safety for all staff and consumers, including timely crisis intervention, risk management, and overall minimizing need for physical intervention and re-traumatization of the person in crisis.⁸ When call center staff deem a call safe and appropriate for the crisis response team, they will assign the call to the crisis response team. There may be multiple calls and situations happening concurrently, in which case the call center staff

https://store.samhsa.gov/sites/default/files/SAMHSA_Digital_Download/PE20-08-01-001%20PDF.pdf (page 32)

prioritize the calls based on pre-established criteria, such as acuity and risk of harm.

Crisis Response Teams Increase Community Safety

New York City's Behavioral Health Emergency Assistance Response Division (B-HEARD) program is being piloted in a region that receives the city's highest number of mental health emergency calls.⁹ In the first month of implementation, the program demonstrated:

- Increased rates of people accepting care from the B-HEARD team compared to traditional 911 response teams.
- The proportion of people transported by the crisis response team to the hospital for more care was far smaller than the proportion transported with their traditional 911 response.
- An anticipated increase of 911 operators routing mental health emergency calls to the B-HEARD team.

"A smarter approach to public health and public safety. A smarter use of resources. And the evidence — from Denver to New York — shows that responding with care works."

- U.S. Representative Jamaal Bowman, D-NY

Hours of Operation

Because a mental health crisis can happen at any time, many programs have adopted a 24-hour model that supports the community seven days a week; of the 40 programs that RDA reviewed, 12 have adopted a 24/7 model. Some programs that are in their early phases of implementation have launched with initially limited hours but have plans to expand to 24/7 coverage once they are able to hire more staff for crisis response teams. If a program uses 911 as a point of access for the crisis response team, then there may be a community perception or expectation that the crisis response team also operates 24/7 the same way that 911 operates 24/7.

Other programs with more restricted resources often have limited hours; some offer services during business hours (9am to 5pm, Monday through Friday) while others offer services after-hours. Using historical data to prioritize coverage during times with highest call volumes can help a program adapt to local needs. For example, Mental Health First Oakland currently responds to calls Friday through Sunday from 7pm to 7am

⁹ Shivaram, D. (2021, July 23). Mental Health Response Teams Yield Better Outcomes Than Police In NYC, Data Shows. *National Public Radio (NPR)*. <https://www.npr.org/2021/07/23/1019704823/police-mental-health-crisis-calls-new-york-city#:~:text=Hourly%20News-.New%20York%20City%20Mental%20Health%20Response%20%20Teams%20Show%20Better%20Results,were%20admitted%20to%20the%20hospital.>

because they have found that those times are when mental health services are unavailable but need is high.

Types of Calls

Some crisis response programs only respond to specific call types, such as calls pertaining to mental health, behavioral health, domestic violence, substance use, or homelessness. A fraction of programs only respond to acute mental health situations, such as suicidal behavior, or conversely only non-acute mental health calls, such as welfare checks. And, some crisis response programs respond to any non-emergency, non-violent calls, which may or may not include mental health calls. Every program is unique in the calls that they are currently responding to as well as how agencies coordinate for different types of calls. Additionally, given that many programs are actively learning and adapting their models, what and how they respond to calls is evolving.

The most common types of calls that programs are responding to are calls regarding trespassing, welfare checks, suicidal ideation, mental health distress, and social disorder. Several programs mentioned that their main call type - trespassing - is to move an unwanted person, usually someone that is unsheltered and sitting outside the caller's home or business. While programs provide this service, many advocate for increased public education around interacting with unhoused residents and neighbors without the need to call for a third-party response.

The programs in New York City, Chicago, and Portland shared with RDA that they are keeping their scopes of services small for their current pilot implementations. At a later time, they will learn from the types of calls receive and determinations made in order to determine how they will expand their program to respond to more situations (e.g., including serving more types of crises, more types of spaces like private residences, etc.).

In order to demonstrate the variety of incidents that different programs respond to, below are highlights regarding the types of calls that some of the programs that RDA interviewed respond to:

- New York City's B-HEARD program is currently responding to calls regarding suicidal ideation with no weapons, mental health crisis, and calls signaling a combination of physical health and mental health issues. For calls where weapons are involved or are related to a crime, NYPD is the initial responder. The B-HEARD program provides transport and linkage to shelters, where the shelters then provide follow-up services.
- Chicago's Crisis Response Pilot is determining how they will address "low-level crimes" and crimes related to homelessness, especially if the root cause of the crime is an unmet behavioral health and/or housing need. The program does not have an official protocol or decision tree yet for determining which calls it will respond to. But,

its emphasis is on responding to mental health crisis and mental health needs.

- The Portland Street Response program is currently only responding to calls regarding crises that are happening outdoors or public settings (e.g., storefronts), not in private residences. The majority of their calls are related to substance use issues, co-occurring mental health and substance use issues, and welfare checks. The program cannot respond to suicide calls because of a Department of Justice (DOJ) contract that the City of Portland has that would require the Portland Street Response Program to appear before a judge and renegotiate that contract that the city currently has; this process would take at least two years to happen.
- Denver's STAR program currently responds primarily to calls where individuals have schizophrenia, bipolar disorder, major depression, and/or express suicidal thoughts but have no immediate plans to act upon them. The STAR program also conducts many Welfare checks. The program is currently primarily dealing with issues related to homelessness because its pilot rolled out in Denver's downtown corridor where there is a high number of unsheltered individuals.

Services Provided Before, During, and After a Crisis

The reviewed programs offer a variety of services before, during, and after a mental health crisis. Regarding services provided before crises occur, some programs view their role as supporting individuals prior to crisis, including proactive outreach and building relationships in the community with individuals. Portland's Street Response team contracts with street ambassadors with lived experience (via a separate contract with a local CBO) that do direct outreach to communities; street ambassadors work to explain the team's services and ultimately increase trust. Portland's Street Response team also works with nursing students who provide outreach and medical services to nearby encampments. Mental Health First has a strong cohort of repeat callers who request accompaniment through issues they are facing that the team will go into the field to provide – these services can help them avoid escalating into a crisis. Denver's STAR program initiates outreach with local homeless populations to ensure they have medicines and supplies. These proactive efforts are examples of crisis response teams supporting potential individuals before they are in crisis, and thus also promoting their overall health and well-being.

During a crisis response, most programs offer various crisis stabilization services, including de-escalation, welfare checks, conflict resolution and mediation, counseling, short-term case management, safety planning, assessment, transport (to hospitals, sobering sites, solution centers, etc.), and 5150 evaluations. To engage the individual in crisis, staff will provide supplies to help meet basic needs with items such as snacks, water, and clothing. If there is a medical professional on the team, they can provide

medical services including medical assessments, first aid, wound care, substance use treatment (i.e., medicated-assisted treatment), medication assistance and administration, and medical clearance for transport to a crisis stabilization unit (CSU).

After a crisis, the teams may provide linkage to follow-up care. Some crisis response teams do short-term case management themselves, but most refer (and sometimes transport) individuals to other providers for long-term care. Referrals can be a commonly provided service of a crisis response program. For example, 41% of Denver STAR's services are for information and referrals.¹⁰ Many programs have relationships with local community-based organizations for providing referrals and linkages, while some programs have a specific protocol for referring individuals to a peer navigation program or centralized care coordination services.

¹⁰ Alvarez, Alayna. (2021, July 21). Denver's pilot from police is gaining popularity nationwide. Axios. <https://www.yahoo.com/now/denver-pivot-police-gaining-popularity-122044701.html>

Term	Definition
Transport	Placing an individual in a vehicle and driving them to or from a designated mental health service or any other place.
5150	5150 is the number of the section of the Welfare and Institutions Code which allows an adult who is experiencing a mental health crisis to be involuntarily detained for a 72-hour psychiatric hospitalization when evaluated to be a danger to others, or to himself or herself, or gravely disabled.
Peer Worker	A mental health peer worker utilizes learning from their own recovery experiences to support other people to navigate their recovery journeys.
Medication-Assisted Treatment (MAT)	MAT is the use of medications, in combination with counseling and behavioral therapies, to provide a whole-patient approach to the treatment of SUDs.
Narcan	Narcan (Naloxone) is a nasal spray used for the treatment of known or suspected opioid overdose emergencies.
Crisis Stabilization Unit	A mental health voluntary facility that provides a short-term stay for individuals needing additional stabilization services following a behavioral health crisis.
Sobering Center	A facility that provides a safe, supportive environment for publicly intoxicated individuals to become sober.

Staffing Crisis Teams

Most teams include a combination of a medical professional (e.g., an EMT or nurse), a mental health clinician (e.g., a psychologist or social worker), and a peer. Having a variety of staff on a team allows the program to respond to a diverse array of calls, meet most needs that a client might have, and gives the client the ability to engage with whomever they feel most comfortable.

The reviewed programs staffed their crisis teams with a variety of medical professionals. There was consensus among interviewed programs that crisis response team EMTs, paramedics, nurse practitioners, or psychiatric nurse practitioner clinicians should have at least three to five years of experience in similar settings, as well as having comprehensive de-escalation and trauma-informed care training and skills. Austin's Extended Mobile Crisis Outreach Team (EMCOT) program cited that a paramedic's ability to address a client's more acute physical health and substance use

needs is a beneficial diversion away from an EMS or police response.¹¹ However, in many cities, the skills and expertise of paramedics are not heavily utilized, as many mental and behavioral health calls do not require a high level of medical care. However, a medical professional can be an important addition to the team, especially for services like providing first aid, wound care, the administration of single-dose medication, medication-assisted treatment (MAT) for substance use issues, and 5150 transports. Considerations for which medical professionals should be staffed on a crisis team depends on the types of services the model intends to provide, the historical data on the types of calls or service needs, the local rules for which services can be provided by specific professions, and the overall program budget.

All programs had a mental health provider on their crisis response teams. There is variability in the level of formal education, training, and licensure of the type of mental health provider in each program. Some programs have licensed, masters-level therapists and clinicians (e.g., ASW, LCSW), while other programs utilize unlicensed mental health providers. Considering if a program wants or needs to be able to bill Medicaid or other insurance payors, the ability to place a 5150 hold, as well as the direct costs of providers with differing levels of education and training are examples of considerations and decision points that programs have when determining what type of professional they want to provide mental health services.

Across the programs reviewed and interviewed by RDA, there is variability in the current presence of peer support specialists on teams. By definition, peer workers are “those who have been successful in the recovery process who help others experiencing similar situations.”¹² Studies demonstrate that by helping others engage with the recovery process through understanding, respect and mutual empowerment, peers increase the likelihood of a successful recovery. While they do not replace the role of therapists and clinicians, evidence from the literature and testimonials given to RDA leave no doubt about their value added on a crisis response team. Peer support specialists are able to connect with clients in crisis in ways that are potentially very different from how mental health clinicians and medical providers are trained to provide their specific types of services.

Although 21 of the 40 reviewed programs were classified as alternative models for mental health crisis response, it is important to note that co-responder programs, which were 11 of the 40 reviewed programs, include a police officer on the response team. A co-responder program will often

¹¹ Expanded Mobile Crisis Outreach Team. (n.d.). Integral Care Crisis Services. Retrieved August 29, 2021, from

<https://www.austintexas.gov/edims/document.cfm?id=302634>

¹² Who Are Peer Workers?. (2020, April 16). Substance Abuse and Mental Health Services Administration (SAMHSA) Bringing Recovery Supports to Scale Technical Assistance Center Strategy (BRSS TACS).

<https://www.samhsa.gov/brss-tacs/recovery-support-tools/peers>

be used for higher acuity calls that involve the risk of violence by the person in crisis or the risk that the person in crisis has a weapon. As co-responders, police may arrive on site before the rest of the crisis team does. Other models treat the police officer as a back-up personnel, allowing the crisis team to evaluate the level of risk or danger of the situation and then, if de-escalation tactics are unsuccessful, call the police for support.

Team structures vary depending on funding, local salary structures for different types of providers, program design, and program administration. For example, 24-hour programs require more teams and staffing while programs with limited hours will likely have fewer shift rotations and therefore fewer teams. San Francisco's Street Crisis Response Team has six teams with three members per team; shifts are 12 hours long with two teams assigned to each shift. Overlap between the shifts has improved coordination between the teams. Programs with unionized staff (e.g., EMTs, paramedics) require regimented 8-, 10-, or 12-hour shifts, which also influences a team's capacity and scheduling.

Training

Training requirements vary based on the staffing structure and services provided by a crisis response program as well as the specific needs of the local community. Across the board, programs train their staff in crisis intervention topics such as de-escalation, mental health intervention, substance use management, and situational awareness. Many teams are trained together as a cohort to build relationships and trust between staff. Most teams are trained for around 40 hours in the classroom and then supervised in the field. In co-respondor teams, police officers often receive 40 hours of Crisis Intervention Team (CIT) Training.

Specialized staff also receive specific training relevant to their role. Dispatch staff typically receive separate training focused on risk assessment and triage. In programs with clinicians embedded within the call center, the clinicians often provide training to other dispatch staff on mental health topics. Interviewed programs also recommended the crisis response team's dispatch team learn to assess call risk level by building an intake/eligibility tool, as well as through risk assessment and motivational interviewing. For both Denver's STAR and Portland's Street Response programs, dispatch staff were trained by and then shadowed Eugene's CAHOOTS dispatch team, leveraging the decades of experience of CAHOOTS' established alternative crisis response model.

Specific de-escalation and crisis intervention training in which programs participate include key strategies to mitigate risk in the field, learning effective radio communication, and motivational interviewing skills. Some interviewed programs shared that substance use training should be attended by all crisis response staff, not just clinicians; for example, Narcan administration, tourniquet application, and harm reduction training are critical training skills for all team members when supporting a client during a substance use emergency.

Training on implicit bias was also regarded as essential among interviewed programs. Many interviewed programs agreed that receiving training in team-building and communication strategies, trauma-informed care, cultural competency, and racial equity advances the intention and principles of their alternate response program.

Equipment: Uniforms, Vehicles, and Supplies

Most teams arrive either in plain clothes or a T-shirt with a logo. Interviewed programs attested that casual clothing helps crisis response teams appear approachable and creates a sense of comfort for the person in crisis. In contrast, programs worried that formalizing their uniforms could trigger negative past experiences that community members have had with institutions (e.g., police, psychiatric hospitals, prisons) and, therefore, escalate someone in crisis. However, EMTs or police in a co-responder team do wear their usual uniform so that they are easily identifiable as first responders.

The types of vehicles and equipment needed for each model vary based on the scope of services provided, types of calls to which the team responds, and the team's staffing structure. The majority of programs have a van or fleet of vans with the program logo on it and are stocked with necessary supplies. Some programs use their vehicles for on-site service delivery, while others use them only for transporting a client to an alternate location. Programs situated within fire departments often have EMTs or paramedics on-staff, so those teams ride in ambulances or vans with transport capabilities. Co-responder programs often use police vehicles, either marked or unmarked.

There are several considerations for how the design of the vehicle increases accessibility and safety for clients, as well as supports the security of providers. Vans should be accessible to wheelchairs so that crisis response teams can provide services within the interior of the van (to ensure client privacy) and in the event of a needed transport. Also, vans equipped with lights allow them to park on sidewalks and increase traffic safety. Several interviewed programs mentioned using Eugene's CAHOOTS program's van specifications. One component of this design is a plexiglass barrier between the van's front and back seats, which protects both the driver and anyone riding in the back in the case of an accident; additionally, the barrier keeps clients in the back of the vehicle and protects the driver from any disruption that could decrease safety during the transport. However, some cities are moving away from including the plexiglass barrier between the front and back seats in their vans due to the stigma and lack of trust it communicates to the client.

Many vehicles and teams are equipped with various technologies, including radios with connection to dispatch, cell phones, and data-enabled tablets for mobile data entry. Denver's STAR program has access to the local 911 dispatch queue to understand what calls are being

assessed and which could potentially use the program's response. The STAR program teams also have direct access to an electronic health record (EHR) system where they can look-up an individual's health history or communicate directly with a client's psychiatrist or case manager and thus provide tailored, high quality of care in real-time.

If crisis response teams provide medical services, they often carry items such as personal protective equipment, wound care supplies, a stethoscope, blood pressure armband, oxygen, and intravenous bags. Teams also often carry engagement items to initiate client interactions and meet basic needs, such as food, water, clothing, socks, cigarettes, "mercy beers," tampons, condoms, and hygiene packs. When it is able to go into the field again, the Mental Health First model intends to use an RV instead of a van, so they can invite clients into the RV for more privacy and then supply them with a variety of supplies for their basic needs (e.g., clothing).

Overall, when deciding the types of uniforms, vehicles, and equipment to obtain, programs considered what would be recognizable, establish expertise, support the service delivery, build trust with those whom they serve, and not trigger or further harm individuals in crisis.

Transport

The ways that programs transport clients to a subsequent location varies in many ways, including when the transport is allowed, who is doing the transport, where clients are transported, and who is affected by the transport decision.

While some programs have the capability to transport clients themselves, others call a third party to do the transport. This depends on whether staff are licensed to do involuntary transports, whether the vehicle is able to transport clients, and whether it is deemed safe to provide transport at that time. Oftentimes, programs will only conduct voluntary transports, and they may pre-establish specific locations or allow the client's location of choice. If clients do not want to be transported to another location, some programs will end the interaction. Because Denver's STAR team does not use an ambulance, they can refuse someone's requested transport to a hospital if a lower level of care is appropriate, such as a sobering center. Some programs conduct involuntary holds, either done by program staff or by calling for police backup. Waiting for police can undermine the level of care provided, a delay which poses a threat to the client's safety and well-being. Portland's Street Response program experiences delays of up to an hour when requesting police for involuntary holds; for this reason, the team hopes to have the ability to do 5150 transports themselves, and in a trauma-informed way that gives individuals a sense of control over the situation. Whether a crisis response team can transport clients, initiate involuntary holds, and/or call police for back-up in these situations are all considerations which implicate the continued involvement of law enforcement in crisis response.

In the transport process, clients may be transported to short- or long-term service providers as well as the client's location of choice. Some short-term programs include a crisis stabilization facility, detox center, sobering center, homeless shelter, primary care provider, psychiatric facilities, diversion and connection center, hospital, and urgent care. Long-term programs include residential rehabilitation and direct admission to inpatient units of psychiatric emergency departments. Building relationships at these destinations and with providers is key to successful warm handoffs and ensuring clients in crisis receive the appropriate care. For example, challenges can arise when bringing someone to an emergency room if the hospital is not fully aware of what the crisis response program is, which makes it more difficult to advocate for the client to receive services.

There are many things to consider about client and provider safety when transporting a client. Some programs do not give rides home and only transport the person to a public place. Others have restrictions on when they will transport a client to a private residence. For example, Denver's STAR team will not take a person home if they are intoxicated and if someone else is in the home because they do not want to put the other person in potential harm. Instead, when responding to an intoxicated individual, the STAR team transports them to a sobering center, detox facility, or similar location of choice. In Portland, first responders and crisis response providers use a risk assessment tool that helps them determine if ambulance transport needs to be arranged. Portland's risk assessment tool asks providers to determine if the individual has received sedation medication in the last six hours, had a Code Gray in the last 6 hours, had a history of violence and/or aggression, had a history of AWOL, or are showing resistance to hospitalization; if the answer is yes to any of these five questions, then they will arrange for ambulance transport for the individual in crisis.

Follow-up Care & Service Linkage

Follow-up care and linkage to services are handled in a variety of ways. Some programs include referrals to internal, non-crisis response program staff as a service provided directly by the crisis response team. When community health workers and peer support specialists are staffed on crisis response teams, they often lead the referral and navigation support role. After responding to a crisis, Portland's Street Response team (an LCSW and paramedic) call a community health worker if the client wants linkages or additional follow-up supports. While referrals and linkages are important to client outcomes and prevention, this kind of follow-up care can be challenging for many programs to do because it can be difficult to find individuals in the community, particularly if they are not stably housed or do not have a working phone. Portland's Street Response team often goes to encampments to provide follow-up care, which is a program element that is also effective as proactive outreach into local communities.

Other programs refer individuals to other external teams or organizations not affiliated with the crisis response team whose primary role is to provide follow-up care to individuals who served by the crisis response team. Olympia's Crisis Response Unit specifically identifies repeat clients for a referral to a peer navigation program for linkage to care. Additionally, many programs have relationships with community-based organizations and refer clients there for follow-up services. Newer programs that have yet to fully launch stated this was a focus of their program design, as well. For example, San Francisco's Street Crisis Response Team partners with a centralized Office of Care Coordination within the San Francisco Department of Public Health that provides clients with linkages to other services; the Street Crisis Response Team essentially embeds this handoff in their own processes.

And, there are some programs that do not include follow-up care within the scope of their services. For example, Eugene's CAHOOTS program has a narrower focus on crisis stabilization and short-term care; they do not provide referrals or linkage to longer-term services for their clients.

Program Administration

Across the crisis response models that RDA researched and interviewed, there was variability in how they are each administered. As each program is constructed around their local agency structures, resources, needs, and challenges, how their programs are administered are also just as adaptive.

Administrative Structure

The administrative structure and placement of crisis response programs varies significantly. Some programs are administered and delivered by the city/county government, some programs are run in collaboration between a city/county government and community-based organizations (CBO), while others are entirely operated by CBOs.

The administration and structure of a crisis response program may be affected by the geographic and/or population size of the local region and what stage of implementation the program is in. For instance, consistent and guaranteed funding helps sustain programs for the long-term, so developing a program within the local municipal structure may be an advantage over contracting the crisis response program to a CBO. Some programs found that staff retention was higher for government positions, due to their generally higher wages and increased benefits compared to what CBOs generally offer. Additionally, the use of the existing 911 and dispatch infrastructure may be streamlined for crisis response programs administered by city/county governments because they can be situated within existing emergency response agencies and use existing interagency data sharing and communication processes

more easily. Finally, programs that are situated within a local health system -- such as Departments of Public Health, Behavioral Health, or public hospitals -- may have existing protocols and processes with which to collaborate with CBOs for referral assistance, case management, resourcing, and follow-up service provision.

On the other hand, programs that are primarily administered and staffed through CBOs reported a sense of flexibility and spontaneity in their program design, expansion, and evolution, especially for early-stage pilots that intend to change and grow over time. These programs shared that they experienced reduced bureaucratic barriers that were conducive to community engagement and program redesign. Additionally, most programs that included peer support specialists in their crisis response program had these roles sourced by CBOs – these peer support specialists were either fully integrated into crisis response teams or were referred to by crisis response teams to provide linkage and follow-up services.

Though there is variety in what entity administers crisis response programs, who sources or contracts the crisis responders, and where funds are generated, all programs require cross-system coordination for designing the program and implementing the dispatch, training, funding, and program evaluation/monitoring activities.

Staffing and sourcing a crisis response program entirely by volunteers can also be helpful in reducing barriers for potential providers to enter this professional field, elevating lived experience of staff, addressing community distrust of the police-involved response system, and building a mental health workforce. However, currently, all-volunteer models face challenges in having consistent and full staffing coverage, which limits a program's overall service provision and hours of operation.

Financing

Aside from the health benefits of increasing mental health and medical resources in crisis responses, there are financial benefits, too. For example, in Eugene, the CAHOOTS program's annual budget is \$2.1 million. In contrast, the City of Eugene estimates it would cost the Eugene Police Department \$8.5 million to serve the volume and type of calls that are directed to CAHOOTS.¹³

Several cities are funding crisis response systems through the city's general fund, which offers a potentially sustainable funding source for the long-term because it demonstrates that city officials are committed to investing in these services with public funds. To generate these funds, Denver added a sales and use tax in 2019 (one-quarter of a percent) to cover mental health services, a portion of which funds the STAR program.

¹³ White Bird Clinic. (n.d.). What is CAHOOTS?. Retrieved August 29, 2021, from <https://whitebirdclinic.org/what-is-cahoots/>

Some cities have funded crisis response programs by reallocating other city funds. Chicago's Police Department currently pays the salary of the CIT-officer in Chicago's crisis response pilot program. Chicago's crisis response pilot also receives additional funding from Chicago's Department of Public Health. Austin's EMCOT program is funded by \$11 million reallocated from the Police Department. And Eugene's CAHOOTS program is fully funded through a contract by the Eugene Police Department.

Federal or state dollars have also been used for some crisis response programs. Alameda County's Community Assessment and Transport Team (CATT) is funded by California's Mental Health Services Act (MHSA) Innovation funds. Chicago's current crisis response pilot uses Centers for Disease Control and Prevention (CDC) funding. New York City and Los Angeles both plan to bill Medicaid as a funding source for their emerging crisis response programs. The national Crisis Now program bills per service and per diem for mobile crisis and crisis stabilization services, which is reimbursed by Medicaid.

Some programs are able to leverage private funds to support their services. In addition to the allocation of city funds, Chicago receives funding from foundations and corporations to fund its crisis response program. The Mental Health First program is entirely supported by donations, grants, and volunteer time.

These financing mechanisms provide varying levels of sustainability and predictability, which may affect the longevity of a program and, therefore, its overall impacts. Ensuring that programs can be continuously funded ensures resources go into direct service provision and program administration, rather than on development, fundraising, or grant management. Staff recruitment and retention is also more successful when there is long-term reliability of positions.

Program Evaluation

Many crisis response programs use data to monitor their ongoing progress and successes, modify and expand program pilots, and measure outcomes and impact. Standardizing data collection practices (i.e., data collection tools, measures, values for measures, aligned electronic sources for data entry, etc.) across participating teams and agencies within and across cities/locales, especially for regional plans, supports effective program evaluation and reporting. Addressing this consideration is best done early in program planning because it affects the protocols developed for triage and dispatch, the equipment that crisis response teams use to record service delivery notes or accessing clients' EHR records, the way referrals and hand-offs are conducted, whether or how Medicaid billing/financing will be leveraged, and more. Several cities noted that they incorporated data sharing and access into MOUs that outlined the scope of work. The providers in most programs have access to an electronic health record (EHR) system that they are able to enter

their contact notes into – having access to a centralized data collection portal like this can greatly aid a program’s evaluation efforts.

Pilot Program Evaluation Highlight: Denver’s Support Team Assisted Response (STAR) Program

Denver planned to evaluate the STAR program after an initial six-month pilot phase. For the evaluation, data was collected from both the 911 CAD database and the Mental Health Center of Denver. Data was kept in separate systems to protect health-related information from the law enforcement database. The program evaluation provided data on incident locations, response time, response dispatch source (i.e., 911, police unit, or STAR-initiated), social demographics of consumers served, services provided, location of client transport/drop-off, and more. The use of two data systems also allowed the program to evaluate what the STAR team identified as the primary issue of concern compared to clinical diagnoses from the health data.¹⁴

As a result of analyzing these data, Denver identified its program successes and impacts and is committed to expanding the funding and scope of the program. This expansion includes purchasing more vans, staffing more teams, expanding the hours of operation, expanding the service area across the City, hiring a supervisor, and investing in program leadership. Additional plans for future evaluation include building a better understanding of populations served and more rigorous data capture, a longitudinal study to understand consumer long-term outcomes, and a cost-benefit analysis to understand the economic impacts of the program.

Once data is collected, a process for analyzing, visualizing, and reviewing data supports the overall effectiveness of program monitoring, thus contributing to changes to a pilot and the overall outcomes achieved by the program. Some programs have developed internal data dashboards to compile and organize their data in real-time, thus allowing them to review their program data on a weekly basis. And, some programs are also planning for an external evaluation to assist them in developing a broader understanding of their program’s impacts for their clients and in the larger community.

¹⁴ Denver STAR Program. (2021, January 8). STAR Program Evaluation. https://www.denverperfect10.com/wp-content/uploads/2021/01/STAR_Pilot_6_Month_Evaluation_FINAL-REPORT.pdf

Examples of Metrics that Cities Collect, Review, and Publish Data On

- Call volume
- Time of calls received
- Service areas
- Response times
- Speed of deployment
- Determinations and dispositions of dispatch (including specific coding for violence/weapons/emergency)
- Which teams are deployed across all emergency response
- Actual level of service needed compared to the initial determination at the point of dispatch
- Number of involuntary holds that are placed
- Number of transports that are conducted
- Type of referrals made
- Priority needs of clients served (housing, mental health)
- Frequency of police involvement

Making data about crisis response programs publicly available is also important for community transparency and public research. For example, New York City is planning to publish B-HEARD program data on a monthly basis. And, Portland has a public data dashboard for its crisis response program that is updated at least once per week.¹⁵ Such data transparency allows local constituents and stakeholders to check on the progress of their local crisis response program and whether it is making a difference. Such transparency can also contribute to public research and dissemination efforts about emerging alternate crisis response models.

Coordinating the Crisis Response System

Given the complexity of a crisis response system -- from its administrative structure and financing, the technical integration of dispatch with responders, the coordination of referrals and linkages, to client case management -- coordination is an essential, ongoing element of any program. This coordination requires investing in staff time and skills to participate in coordination efforts, focusing on de-siloing all components of crisis response, and effective leadership and vision. Coordination affects financing decisions and contributes directly to client outcomes; therefore, coordination implicates every aspect of program planning, implementation, and evaluation. Overall, program administration benefits

¹⁵ Portland Street Response Data Dashboard. (n.d.). City of Portland, Oregon. Retrieved August 29, 2021, from <https://www.portland.gov/streetresponse/data-dashboard>

from having coordination done at a high level, ensuring there is a person(s) responsible for holding the program at a birds-eye view.

Coordinating services between the crisis response team and community partners includes ensuring there are open communication channels between various entities at a structural level down to a client case management level. At a structural level, it requires investing in staff time, technology, and protocol development, not just at the initial program launch but on an ongoing basis. Based on the program evaluation and data collection design, system-level coordination can support ongoing data review and inform future decisions made about a program.

For example, the managers of San Francisco's Street Crisis Response Team participate in interagency meetings to ensure strategic coordination of service delivery across San Francisco's Department of Public Health, Fire Department, and Office of Care Coordination. Additionally, when Austin's EMCOT program's call center staff integrated the call center technology and co-located their crisis response services within the city's 911 dispatch, the crisis response program had reduced dropped calls, increased communication around safety and risk assessment during triage, more effective handoffs to mental health clinicians for telehealth, and increased deployment of the crisis response team by dispatch.

System-level coordination also has important downstream effects, such as ensuring that first responders (i.e., police, fire, EMS) can call the crisis response team to respond to a situation if they are dispatched first. At a client level, system coordination can support case management, referrals and linkages, and improved client outcomes. For example, Canada's REACH Edmonton program provides governance support and coordination to a network of CBO providers, including facilitating a bimonthly meeting for frontline workers to discuss shared clients. The program shared that for its most complex cases, this coordination significantly increased positive client outcomes. The program also found that they were able to better leverage the expertise of peer support specialists by having a specified coordinator leading these meetings and ensuring their voice and participation was valued. Service providers within this network all utilize the same EHR for documenting and sharing client notes, though the program has encountered challenges in data sharing. Overall, the REACH Edmonton program shared that system-level coordination must be tightly managed but that most program staff and frontline workers do not have the capacity to do so, so having a centralized governance and coordinating body is essential.

Program Planning Process

Planning the large and small details of a crisis response program is an essential part of a successful launch. Although each city will have a different planning process and timeline based on the local community's needs and administrative designs, some common themes emerged across the crisis response models that RDA reviewed.

Planning across city departments typically includes active involvement from emergency medical services, fire, and police as well as leaders from local public health and mental/behavioral health agencies and CBOs. Many cities stated that having emergency responders involved in the collaborative brainstorming and discussions from the earliest planning stages was essential in garnering buy-in from other city or county departments, including identifying the best resource(s) when responding to mental health needs and crises. Planning also requires engaging other entities; for instance, Portland has to negotiate with the local police union for all services provided by Portland's Street Response program. Some cities shared that they are aware of beliefs of local police departments and unions about potentially losing funding for police services when new crisis response services are added to the local infrastructure. But, cities found that when they focused the conversation about shared objectives between the crisis response program and the police, police began to see the program as a resource to them as mental health professionals could often better handle mental health crises because of their training and backgrounds. This alignment on shared goals and values underpins the reason that the Eugene Police Department funds the city's non-police crisis response program, CAHOOTS. Developing a collective and shared narrative around community health and well-being while reducing harm, trauma, and unnecessary use of force, is essential in promoting any crisis response program.

Program planning allows cities to identify elements to include in the pilot that will be investigated throughout the pilot stages. For instance, the planning process may include heat mapping the highest call-volume areas of the city or discussing preliminary milestones to support scaling or expansion of a pilot program. As an example, New York City's B-HEARD model is currently focused on deploying the B-HEARD team using the existing 911 determination process for identifying mental health emergencies; but, in the future, the program will also assess how those determinations are made to improve the determination and dispatch processes. Their sequencing of planning priorities allowed the program to be launched on a shorter timeline while preparing for an iterative evaluation and design process.

In the future, many learnings can be extrapolated from the ways that crisis response programs are being implemented across the United States and internationally. At this point in time, given that many implementations began within the past two years and are still actively evolving and changing, it is premature to pinpoint common themes in how similar and different jurisdictions and communities (e.g., population size, population density, geography, etc.) are unfolding their emerging crisis response programs.

Planning Timeline

While some cities operated co-responder models for years before moving to a non-police model, other cities are launching non-police models for the first time. Some cities engaged in extensive community engagement

processes while others launched programs quickly and plan to collect feedback for future iterations of their program.

For instance, Denver had a co-responder model from 2016-2020 and launched the STAR program in 2020 for an initial six-month pilot. The program was launched very quickly in 2020, and then it held community forums to hear from community members for input on the expansion. In Chicago, planning began in the summer of 2019 and the mental health advisory commission developed recommendations in October 2019, then planning and funding continued throughout the summer of 2020, with the program launched in the summer of 2021 (two years after initial program planning began).

New York City's B-HEARD program was originally announced in November 2020 with an initial launch target of February 2021, though the launch was delayed until June 2021 (eight months later). San Francisco's Street Crisis Response Team began planning in July 2020 and launched with one team in November 2020 (five months later); the program added a second team and additional hours in January 2021, added four more teams in March 2021, and integrated the local Office of Coordinated Care team for follow-up and linkages in April 2021 (all over a span of four months); the City of San Francisco wanted to move quickly due to its budgeting timeline so it did not conduct much initial community engagement, but rather expected the program design to be an iterative process with future opportunities for community input and evaluation. Additionally, for many pilot crisis response programs, when they are able to scale their services and hire more staff, then they plan to expand their geographical footprints.

Community Engagement

Community engagement is an invaluable element of program design and evaluation that leverages the expertise of the local community members directly impacted by these services. Community engagement activities are conducted to include the perspectives of potential service recipients, existing consumers of the behavioral health and crisis systems, existing coalitions, and/or local community-based service providers in the development and implementation of crisis response programs.

Cities may face barriers in hearing from community members that are the most structurally marginalized, so engaging existing coalitions and networks can support more equitable and targeted outreach. For instance, in Chicago, Sacramento, and Oakland, program planners worked with credible messengers that were connected to networks that the cities were not connected to, such as a teen health council, street outreach teams, homeless advocacy organizations, and disability rights collectives. There was a focus especially on working with mutual aid collectives and other underground groups that do not receive city funding, including voices that may otherwise be neglected in government spaces. This level of outreach and intentionality is essential because, historically, government institutions and other structures have prevented

the full and meaningful engagement of people of color, working class and cash-poor people, immigrants and undocumented people, people with disabilities, people who are cognitively diverse, LGBTQ+ people, and other structurally marginalized people. Engaging community members that are most directly impacted by crisis response programs, such as unsheltered people, will lead to feedback that is informed by direct lived experiences with the prior and existing programs in a given community. Additionally, prioritizing the engagement, participation, and recommendations of community members that are most harmed by existing institutions - such as the disproportionate rates of police violence against people of color¹⁶ - will ensure that systems of inequity are not reproduced by a crisis response program. Instead, intentional community engagement can support the program to address existing structural inequities.

Community engagement can inform program planning, program implementation, and program evaluation in unique ways. When planning for a crisis response program, community engagement can be used to survey existing needs, collect input on priorities, and engage hard-to-reach consumers. To hear directly from community members, Chicago interviewed 100 people across the city to ask about their service needs and how to implement a co-responder or alternative crisis response model. Denver targeted specific community stakeholder groups when collecting feedback for its program design, including perspectives from residents with lived experience, community activists for reimagining policing, a Latinx clinic, and a needle exchange program.

When implementing a crisis response program, engaging the community can identify opportunities for program improvement in real-time and promote community education about the program's services and partners. To collect feedback on key components of its model, Portland worked with a local university to send a questionnaire to service recipients. Denver prioritized community education by working with Business Improvement Districts (BIDs) to educate them on appropriate and inappropriate times to call 911 and how to more effectively and compassionately engage with unsheltered neighbors. Denver also worked to build trust with local CBOs to increase their engagement of the STAR crisis response team. Such community engagement can improve program implementation by increasing community awareness of the program, clarifying existing barriers for community members, and modifying service provision processes and priorities on an ongoing basis.

Lessons Learned

As cities have begun planning, launching, and iterating on a variety of crisis response program models, they shared key lessons learned and recommendations for new cities considering implementing non-police crisis response programs.

Community members are essential sources of knowledge: Co-creating a crisis response model with community members that have directly experienced the crisis system will make the program more accessible and utilized.

Community engagement requires time: Build the engagement and planning time into the overall program development approach and timeline.

Use a pilot approach: Test, modify, and expand specific aspects of each crisis response model based on program successes, challenges, and consumer feedback.

Build trust across the network: Cities must build trust across city agencies and local CBOs to successfully launch and implement a crisis response program.

The 911 dispatch system is complex: Successful implementation of a crisis response program requires sufficient planning, time/resources investment, and buy-in for revising 911 call determination and dispatch processes.

Look to the future: While alternative models are currently focused on crisis response, future models could also support a population's holistic health outcomes and redefine what "safety" means in a community.

Community members are essential sources of knowledge.

Program representatives that spoke with RDA emphasized the many considerations that programs must make to ensure a program is utilized and accessible to community members. The interviewed programs emphasized the importance of co-creating programs with community members because community members have experienced the existing crisis response options, know where the gaps exist, and may have already implemented or witnessed community-based short-term solutions that should directly inform program design. Cities explained that creating a program or model that does not appeal to the consumer, especially in terms of the involvement and presence of law enforcement, will decrease

the reach and impact of the program. Community members must trust the program if they are going to call and engage in services. For example, because they understood that a significant barrier was that the general public was not confident that they could call 911 to engage a non-police response to a mental health or related crisis, the San Francisco's Street Crisis Response Teams have done significant outreach at community events and presentations at CBOs to build relationships and trust.

Community engagement requires time.

Learning from the community requires time, so plans for community engagement should be part of any new program's overall timeline and approach. For example, after their initial implementation began, Denver's STAR teams learned that there is a need to expand their program with multilingual teams, which they have since been effective in making progress towards achieving this. It has been a part of the STAR program's process to prioritize program needs as they arise while planning for expansion.

Use a pilot approach.

Cities also recommended using a pilot approach so that the model can evolve and expand over time. For example, Chicago piloted two crisis response teams with a CIT-officer and piloted two teams without a CIT-officer to determine the role and efficacy of the CIT-officer in a crisis response. New York City designed their pilot to focus on one zone (a geographic subsection of a borough) before broadening the pilot to more of the city. A pilot approach allows a city to learn from implementation successes and challenges, hear from service recipients, and generate buy-in from potentially hesitant stakeholders.

Build trust across the network.

Cities elevated that building trust across city departments and with CBOs was an essential component of their processes. Cities recognize the different cultures and priorities across city departments and agencies as well as CBOs and volunteers. Within a local government, framing this work as a health response helps to align all partners on their shared values. Moreover, emphasizing to the local police departments that taking a responsibility off their plate is a benefit to them, which may help them to see the crisis response teams as assets and resources to them. Additionally, while bringing onboard internal (i.e., city departments and agencies) stakeholders to the table, it is important to ensure that they each have the appropriate degree of weight in decision making for the program. For example, New York City emphasized that law enforcement should not have an imbalance in controlling the conversation or

decisions. Programs also shared examples of opportunities to build trust across staff members: San Francisco's Street Crisis Response Team used all-team debriefs to strengthen communication and establish processes; and Canada's REACH Edmonton used data on their program and outcomes to promote accountability between providers. Ultimately, building and sustaining trust across a network of crisis response teams, first responders, and law enforcement agencies is a type of role that the central coordinating governance structure of a crisis response system should aim to lead and support.

The 911 dispatch system is complex.

The 911 dispatch component of a crisis response model is complex and requires effective collaboration for successful implementation. New York City felt that the dispatch and deployment components of its B-HEARD program took the most time to design well (e.g., diagramming calls, finding existing data), even though the 911 data infrastructure already existed. Similarly, Los Angeles' Department of Mental Health found the call diversion process and decision-making to be the most challenging aspect to align across departments. By being aware of this hurdle from the beginning, a new program can allocate sufficient time and resources as well as identify strategic personnel to support the development of this important component of any crisis response program.

Look to the future.

Finally, cities offered that they are only in their first steps of a longer process of designing alternative models of care in their communities. Planning for a program's next steps can make the initial pilots even more successful and support the transition to future iterations. For instance, Portland's Street Response program is primarily focused on low-acuity crises, though there is a need for a non-police response that can respond to higher acuity calls, including incidences with weapons, in order to achieve Portland's aim of reducing police violence. Mental Health First emphasized that an armed officer does not necessarily provide security and safety to bystanders, providers, or consumers, and so alternative crisis response models are countering a larger system of socialization around notions of safety and the role of 911 in a community. Additionally, these models are operating within larger mental health response systems that must work together to ensure fewer community members are going into crisis in the first place. Programs should always be considering how alternative models of care can support individuals from entering into crises, too. Denver's STAR program shared that they have numerous opportunities for prevention efforts, such as proactive response after encampment sweeps, checking in with consumers in high visibility areas even if there is not a call there, and proactively connecting people to services. By keeping an open mind for what a more holistic crisis response system could look like in their future, cities can plan for their present day,

early-stage pilot programs to be a part of their evolving and innovative models of care.

Appendices

Appendix A. SAMHSA's National Guidelines for Behavioral Health Crisis Care - Best Practice Toolkit Executive Summary¹⁷

The *National Guidelines for Crisis Care – A Best Practice Toolkit* advances national guidelines in crisis care within a toolkit that supports program design, development, implementation and continuous quality improvement efforts. It is intended to help mental health authorities, agency administrators, service providers, state and local leaders think through and develop the structure of crisis systems. The toolkit includes distinct sections for:

- ✓ Defining national guidelines in crisis care;
- ✓ Implementing care that aligns with national guidelines; *and*
- ✓ Evaluating alignment of systems to national guidelines.

Given the ever-expanding inclusion of the term “crisis” by entities describing service offerings that do not truly function as no-wrong-door safety net services, we start by defining what crisis services are and what they are not. Crisis services are for **anyone, anywhere and anytime**. Crisis services include (1) crisis lines accepting all calls and dispatching support based on the assessed need of the caller, (2) mobile crisis teams dispatched to wherever the need is in the community (not hospital emergency departments) and (3) crisis receiving and stabilization facilities that serve everyone that comes through their doors from all referral sources. These services are for **anyone, anywhere and anytime**.

With non-existent or inadequate crisis care, costs escalate due to an overdependence on restrictive, longer-term hospital stays, hospital readmissions, overuse of law enforcement and human tragedies that result from a lack of access to care. Extremely valuable psychiatric inpatient assets are overburdened with referrals that might be best-supported with less intrusive, less expensive services and supports. In too many communities, the “crisis system” has been unofficially handed over to law enforcement; sometimes with devastating outcomes. The current approach to crisis care is patchwork and

¹⁷ Substance Abuse and Mental Health Services Administration (SAMHSA). (2020). National Guidelines for Behavioral Health Crisis Care – Best Practice Toolkit Executive Summary. <https://www.samhsa.gov/find-help/implementing-behavioral-health-crisis-care> & <https://www.samhsa.gov/sites/default/files/national-guidelines-for-behavioral-health-crisis-services-executive-summary-02242020.pdf>

delivers minimal treatment for some people while others, often those who have not been engaged in care, fall through the cracks; resulting in multiple hospital readmissions, life in the criminal justice system, homelessness, early death and even suicide.

A comprehensive and integrated crisis network is the first line of defense in preventing tragedies of public and patient safety, civil rights, extraordinary and unacceptable loss of lives, and the waste of resources. There is a better way. Effective crisis care that saves lives and dollars requires a systemic approach. This toolkit will delineate how to estimate the crisis system resource needs of a community, the number of individuals who can be served within the system, the cost of crisis services, the workforce demands of implementing crisis care and the community-changing impact that can be seen when services are delivered in a manner that aligns with this Best Practice Toolkit. Readers will also learn how this approach harnesses data and technology, draws on the expertise of those with lived experience, and incorporates evidence-based suicide prevention practices.

Core Services and Best Practices

The following represent the *National Guidelines for Crisis Care* essential elements within a **no- wrong-door** integrated crisis system:

1. **Regional Crisis Call Center:** Regional 24/7 clinically staffed hub/crisis call center that provides crisis intervention capabilities (telephonic, text and chat). Such a service should meet National Suicide Prevention Lifeline (NSPL) standards for risk assessment and engagement of individuals at imminent risk of suicide and offer quality coordination of crisis care in real-time;
2. **Crisis Mobile Team Response:** Mobile crisis teams available to reach any person in the service area in his or her home, workplace, or any other community-based location of the individual in crisis in a timely manner; *and*
3. **Crisis Receiving and Stabilization Facilities:** Crisis stabilization facilities providing short-term (under 24 hours) observation and crisis stabilization services to all referrals in a home-like, non-hospital environment.

In addition to the essential structural or programmatic elements of a crisis system, the following list of essential qualities must be “baked into” comprehensive crisis systems:

1. Addressing recovery needs, significant use of peers, and trauma-informed care;
2. “Suicide safer” care;
3. Safety and security for staff and those in crisis; *and*

4. Law enforcement and emergency medical services collaboration.

Regional Crisis Call Hub Services – Someone To Talk To

Regional, 24/7, clinically staffed call hub/crisis call centers provide telephonic crisis intervention services to all callers, meet National Suicide Prevention Lifeline (NSPL) operational standards regarding suicide risk assessment and engagement and offer quality coordination of crisis care in real-time. Ideally, these programs will also offer text and chat options to better engage entire communities in care. Mental health, substance use and suicide prevention lines must be equipped to take all calls with expertise in delivering telephonic intervention services, triaging the call to assess for additional needs and coordinating connections to additional support based on the assessment of the team and the preferences of the caller.

Minimum Expectations to Operate a Regional Crisis Call Service

1. Operate every moment of every day (24/7/365);
2. Be staffed with clinicians overseeing clinical triage and other trained team members to respond to all calls received;
3. Answer every call or coordinate overflow coverage with a resource that also meets all of the minimum crisis call center expectations defined in this toolkit;
4. Assess risk of suicide in a manner that meets NSPL standards and danger to others within each call;
5. Coordinate connections to crisis mobile team services in the region;
and
6. Connect individuals to facility-based care through warm hand-offs and coordination of transportation as needed.

Best Practices to Operate Regional Crisis Call Center

To fully align with best practice guidelines, centers must meet the minimum expectations and:

1. Incorporate Caller ID functioning;
2. Implement GPS-enabled technology in collaboration with partner crisis mobile teams to more efficiently dispatch care to those in need;
3. Utilize real-time regional bed registry technology to support efficient connection to needed resources; *and*
4. Schedule outpatient follow-up appointments in a manner synonymous with a warm handoff to support connection to ongoing care following a crisis episode.

To align with National Suicide Prevention Lifeline (NSPL) operational standards, centers must:

1. Practice **active engagement** with callers and make efforts to establish sufficient rapport so as to promote the caller's collaboration in securing his/her own safety;

2. Use the **least invasive intervention** and consider involuntary emergency interventions as a last resort, except for in circumstances as described below;
3. Initiate life-saving services for attempts in progress – in accordance with guidelines that do not require the individual’s consent to initiate medically necessary rescue services;
4. Initiate active rescue to secure the immediate safety of the individual at risk if the caller remains unwilling and/or unable to take action to prevent his/her suicide and remains at imminent risk;
5. Practice active engagement with persons calling on behalf of someone else (“third-party callers”) towards determining the least invasive, most collaborative actions to best ensure the safety of the person at risk;
6. Have supervisory staff available during all hours of operations for timely consultation in determining the most appropriate intervention for any individual who may be at imminent risk of suicide; *and*
7. Maintain caller ID or other method of identifying the caller’s location that is readily accessible to staff.

True regional crisis call center hub services that offer air traffic control-type functioning are essential to the success of a crisis system. Cracks within a system of care widen when individuals experience interminable delays in access to services which are often based on an absence of:

1. Real-time coordination of crisis and outgoing services; *and*
2. Linked, flexible services specific to crisis response; namely mobile crisis teams and crisis stabilization facilities.

Mobile Crisis Team Services – Someone To Respond

Mobile crisis team services offering community-based intervention to individuals in need wherever they are; including at home, work, or anywhere else in the community where the person is experiencing a crisis. For safety and optimal engagement, two person teams should be put in place to support emergency department and justice system diversion. EMS services should be aware and partner as warranted.

Minimum Expectations to Operate a Mobile Crisis Team Services

1. Include a licensed and/or credentialed clinician capable to assessing the needs of individuals within the region of operation;
2. Respond where the person is (home, work, park, etc.) and not restrict services to select locations within the region or particular days/times; *and*
3. Connect to facility-based care as needed through warm hand-offs and coordinating transportation when and only if situations warrants transition to other locations.

Best Practices to Operate Mobile Crisis Team Services

To fully align with best practice guidelines, teams must meet the minimum expectations and:

1. Incorporate peers within the mobile crisis team;
2. Respond without law enforcement accompaniment unless special circumstances warrant inclusion in order to support true justice system diversion;
3. Implement real-time GPS technology in partnership with the region's crisis call center hub to support efficient connection to needed resources and tracking of engagement; *and*
4. Schedule outpatient follow-up appointments in a manner synonymous with a warm handoff in order to support connection to ongoing care.

Essential functions of mobile crisis services include:

- Triage/screening, including explicit screening for suicidality;
- Assessment;
- De-escalation/resolution;
- Peer support;
- Coordination with medical and behavioral health services; *and*
- Crisis planning and follow-up.

Crisis Receiving and Stabilization Services – A Place to Go

Crisis receiving and stabilization services offer the community a no-wrong-door access to mental health and substance use care; operating much like a hospital emergency department that accepts all walk-ins, ambulance, fire and police drop-offs. The need to say yes to mental health crisis referrals, including working with persons of varying ages (as allowed by facility license) and clinical conditions (such as serious emotional disturbance, serious mental illness, intellectual and developmental disabilities), regardless of acuity, informs program staffing, physical space, structure and use of chairs or recliners in lieu of beds that offer far less capacity or flexibility within a given space. It is important to fund these facility-based programs so they can deliver on the commitment of never rejecting a first responder or walk-in referral in order to realize actual emergency department and justice system diversion. If an individual's condition is assessed to require medical attention in a hospital or referral to a dedicated withdrawal management (i.e., referred to more commonly and historically as detoxification) program, it is the responsibility of the crisis receiving and stabilization facility to make those arrangements and not shift that responsibility to the initial referral source (family, first responder or mobile team). Law enforcement is not expected to do the triage or assessment for the crisis system and it is important that those lines never become blurred.

Minimum Expectations to Operate a Crisis Receiving and Stabilization Service

1. Accept all referrals;
2. Not require medical clearance prior to admission but rather assessment and support for medical stability while in the program;
3. Design their services to address mental health and substance use crisis issues;
4. Employ the capacity to assess physical health needs and deliver care for most minor physical health challenges with an identified pathway in

- order to transfer the individual to more medically staffed services if needed;
5. Be staffed at all times (24/7/365) with a multidisciplinary team capable of meeting the needs of individuals experiencing all levels of crisis in the community; including:
 - a. Psychiatrists or psychiatric nurse practitioners (telehealth may be used)
 - b. Nurses
 - c. Licensed and/or credentialed clinicians capable of completing assessments in the region; *and*
 - d. Peers with lived experience similar to the experience of the population served.
 6. Offer walk-in and first responder drop-off options;
 7. Be structured in a manner that offers capacity to accept all referrals, understanding that facility capacity limitations may result in occasional exceptions when full, with a no rejection policy for first responders;
 8. Screen for suicide risk and complete comprehensive suicide risk assessments and planning when clinically indicated; *and*
 9. Screen for violence risk and complete more comprehensive violence risk assessments and planning when clinically indicated.

Best Practices to Operate Crisis Receiving and Stabilization Services

To fully align with best practice guidelines, centers must meet the minimum expectations and:

1. Function as a 24 hour or less crisis receiving and stabilization facility;
2. Offer a dedicated first responder drop-off area;
3. Incorporate some form of intensive support beds into a partner program (could be within the services' own program or within another provider) to support flow for individuals who need additional support;
4. Include beds within the real-time regional bed registry system operated by the crisis call center hub to support efficient connection to needed resources; *and*
5. Coordinate connection to ongoing care.

The Role of the Psychiatrist/Psychiatric Nurse Practitioner

Psychiatrists and Psychiatric Nurse Practitioners serve as clinical leaders of the multi-disciplinary crisis team. Essential functions include ensuring clinical soundness of crisis services through evaluation of need, continued monitoring of care and crisis service discharge planning.

Essential Principles for Modern Crisis Care Systems

Best practice crisis care incorporates a set of core principles that must be systematically “baked in” to excellent crisis systems in addition to the core structural elements that are defined as essential for modern crisis systems. These essential principles and practices are:

1. Addressing Recovery Needs,

2. Significant Role for Peers,
3. Trauma-Informed Care,
4. *Zero Suicide/Suicide Safer Care,*
5. Safety/Security for Staff and People in Crisis *and*
6. Crisis Response Partnerships with Law Enforcement, Dispatch, and Emergency Medical Services.

Addressing Recovery Needs

Crisis providers must address the recovery needs of individuals and families to move beyond their mental health and substance use challenges to lead happy, productive and connected lives each and every day.

Implementation Guidance

1. *Commit to a no-force-first approach to quality improvement in care that is characterized by engagement and collaboration.*
2. *Create engaging and supportive environments that are as free of barriers as possible. This should include eliminating Plexiglas from crisis stabilization units and minimal barriers between team members and those being served to support stronger connections.*
3. *Ensure team members engage individuals in the care process during a crisis. Communicate clearly regarding all options clearly and offer materials regarding the process in writing in the individual's preferred language whenever possible.*
4. *Ask the individual served about their preferences and do what can be done to align actions to those preferences.*
5. *Help ensure natural supports and personal attendants are also part of the planning team, such as with youth and persons with intellectual and developmental disabilities.*
6. *Work to convert those with an involuntary commitment to voluntary so they are invested in their own recovery.*

Significant Role for Peers

A transformative element of recovery-oriented care is to fully engage the experience, capabilities and compassion of people who have experienced mental health crises. Including individuals with lived mental health and substance use disorder experience (peers) as core members of a crisis team supports engagement efforts through the unique power of bonding over common experiences while adding the benefits of the peer modeling that recovery is possible.

Implementation Guidance

1. *Hire credentialed peers with lived experience that reflect the characteristics of the community served as much as possible. Peers should be hired with attention to common characteristics such as gender, race, primary language, ethnicity, religion, veteran status, lived experiences and age.*

2. *Develop support and supervision that aligns with the needs of your program's team members.*
3. *Emphasize engagement as a fundamental pillar of care that includes peers as a vital part of a crisis program's service delivery system. This should include (1) integrating peers within available crisis line operations, (2) having peers serve as one of two mobile team members and (3) ensuring a peer is one of the first individuals to greet an individual admitted to a crisis stabilization facility.*

Trauma-Informed Care

The great majority of individuals served in mental health and substance use services have experienced significant interpersonal trauma. Mental health crises and suicidality often are rooted in trauma. These crises are compounded when crisis care involves loss of freedom, noisy and crowded environments and/or the use of force. These situations can actually re-traumatize individuals at the worst possible time, leading to worsened symptoms and a genuine reluctance to seek help in the future.

On the other hand, environments and treatment approaches that are safe and calm can facilitate healing. Thus, we find that trauma-informed care is an essential element of crisis treatment. In 2014, SAMHSA set the following guiding principles for trauma-informed care:

1. Safety;
2. Trustworthiness and transparency;
3. Peer support and mutual self-help;
4. Collaboration and mutuality;
5. Empowerment, voice and choice; *and*
6. Ensuring cultural, historical and gender considerations inform the care provided.

Trauma-informed systems of care ensure these practices are integrated into service delivery. Developing and maintaining a healthy environment of care also requires support for staff, who may have experienced trauma themselves.

Implementation Guidance

1. *Incorporate trauma-informed care training into each team member's new employee orientation with refreshers delivered as needed.*
2. *Apply assessment tools that evaluate the level of trauma experienced by the individuals served by the crisis program and create action steps based on those assessments.*

Zero Suicide/Suicide Safer Care

Two transformational commitments must be made by every crisis provider in the nation: (1) adoption of suicide prevention as a core responsibility, and (2) commitment to dramatic reductions in suicide among people under care. These changes were adopted and advanced in the revised *National Strategy for Suicide*

Prevention (2012), specifically via a new Goal 8: “Promote suicide prevention as a core component of health care services” (p. 51).

The following key elements of Zero Suicide or Suicide Safer Care are all applicable to crisis care:

1. Leadership-driven, safety-oriented culture committed to dramatically reducing suicide among people under care, that includes survivors of suicide attempts and suicide loss in leadership and planning roles;
2. Developing a competent, confident, and caring workforce;
3. Systematically identifying and assessing suicide risk among people receiving care;
4. Ensuring every individual has a pathway to care that is both timely and adequate to meet his or her needs and includes collaborative safety planning and a reduction in access to lethal means;
5. Using effective, evidence-based treatments that directly target suicidal thoughts and behaviors;
6. Providing continuous contact and support; especially after acute care; *and*
7. Applying a data-driven quality improvement approach to inform system changes that will lead to improved patient outcomes and better care for those at risk.

Safety/Security for Staff and People in Crisis

Safety for both individuals served and staff is a foundational element for all crisis service settings. Crisis settings are also on the front lines of assessing and managing suicidality and possibly violent thoughts or aggressive behaviors, issues with life and death consequences. While ensuring safety for people using crisis services is paramount, the safety for staff cannot be compromised. Keys to safety and security in crisis delivery settings include:

- Evidence-based and trauma-informed crisis training for all staff;
- Role-specific staff training and appropriate staffing ratios to number of clients being served;
- A non-institutional and welcoming physical space and environment for persons in crisis, rather than Plexiglas “fishbowl” observation rooms and keypad-locked doors. This space must also be anti-ligature sensitive and contain safe rooms for people for whom violence may be imminent;
- Established policies and procedures emphasizing “no force first” prior to implementation of safe physical restraint or seclusion procedures;
- Pre-established criteria for crisis system entry;
- Strong relationships with law enforcement and first responders; *and*
- Policies that include the roles of clinical staff (and law enforcement if needed) for management of incidents of behavior that places others at risk.

Providers must establish environments that are safe for those they serve as well as their own team members who are charged with delivering high quality crisis care that aligns with best practice guidelines. The keys to safety and security for

home visits by mental health staff include:

- No mental health crisis outreach worker will be required to conduct home visits alone.
- Employers will equip mental health workers who engage in home visits with a communication device.
- Mental health workers dispatched on crisis outreach visits will have prompt access to any information available on history of dangerousness or potential dangerousness of the client they are visiting.

Implementation Guidance

1. *Commit to a no-force-first approach to care.*
2. *Monitor, report and review all incidents of seclusion and restraint with the goal of minimizing the use of these interventions.*
3. *Remember that barriers do not equal safety. The key to safety is engagement and empowerment of the individual served while in crisis.*
4. *Offer enough space in the physical environment to meet the needs of the population served. A lack of space can elevate anxiety for all.*
5. *Incorporate quiet spaces into your crisis facility for those who would benefit from time away from the milieu of the main stabilization area.*
6. *Engage your team members and those you serve in discussions regarding how to enhance safety within the crisis program.*

Law Enforcement and Crisis Response—An Essential Partnership

Law enforcement agencies have reported a significant increase in police contacts with people with mental illness in recent years. Some involvement with mental health crises is inevitable for police. Police officers may (1) provide support in potentially dangerous situations when the need is assessed or (2) make warm hand-offs into crisis care if they happen to be first to engage.

In many communities across the United States, the absence of sufficient and well-integrated mental health crisis care has made local law enforcement the *de facto* mental health mobile crisis system. This is unacceptable and unsafe. The role of local law enforcement in addressing emergent public safety risk is essential and important. With good mental health crisis care in place, the care team can collaborate with law enforcement in a fashion that will improve both public safety and mental health outcomes. Unfortunately, well-intentioned law enforcement responders to a crisis call can escalate the situation solely based on the presence of police vehicles and armed officers that generate anxiety for far too many individuals in a crisis.

Implementation Guidance

1. *Have local crisis providers actively participate in Crisis Intervention Team training or related mental health crisis management training sessions.*

2. *Incorporate regular meetings between law enforcement and crisis providers, including EMS and dispatch, into the schedule so these partners can work to continuously improve their practices.*
3. *Include training on crisis provider and law enforcement partnerships in the training for both partner groups.*
4. *Share aggregate outcomes data such as numbers served, percentage stabilized and returned to the community and connections to ongoing care.*

Psychiatric Advance Directives

A psychiatric or mental health advance directive (PAD) is a legal tool that allows a person with mental illness to state their preferences for treatment in advance of a crisis. They can serve as a way to protect a person's autonomy and ability to self-direct care. Crisis providers are expected to always seek to understand and implement any existing PAD that has been developed by the individual during the evaluation phase and work to ensure the individual discharges from crisis care with an updated and accurate psychiatric advance directive whenever possible. PAD creates a path to express treatment preferences and identify a representative who is trusted and legally empowered to make healthcare decisions on medications, preferred facilities, and listings of visitors.

Funding Crisis Care

The full *Crisis Services Best Practice Toolkit* document contains specific strategies on how a community can fund each of the core crisis system elements in single and multiple-payer environments. Additionally, recommendations on service coding already being reimbursed by Medicaid in multiple states are made available; including the use of HCPCS code H2011 *Crisis Intervention Service per 15 Minutes* for mobile crisis services and S9484 *Crisis Intervention Mental Health Services per Hour* or S9485 *Crisis Intervention Mental Health Services per Diem* for crisis receiving and stabilization facility services.

Training and Supervision

Many members of the crisis services delivery team are licensed mental health and substance use professionals operating within the scope of their license and training with supervision delivered in a manner consistent with professional expectations of the licensing board. Licensed professionals are expected to strengthen their skills and knowledge through ongoing CEU and CME professional advancement opportunities focused on improving team members' ability to deliver crisis care.

Providers also incorporate non-licensed individuals within the service delivery

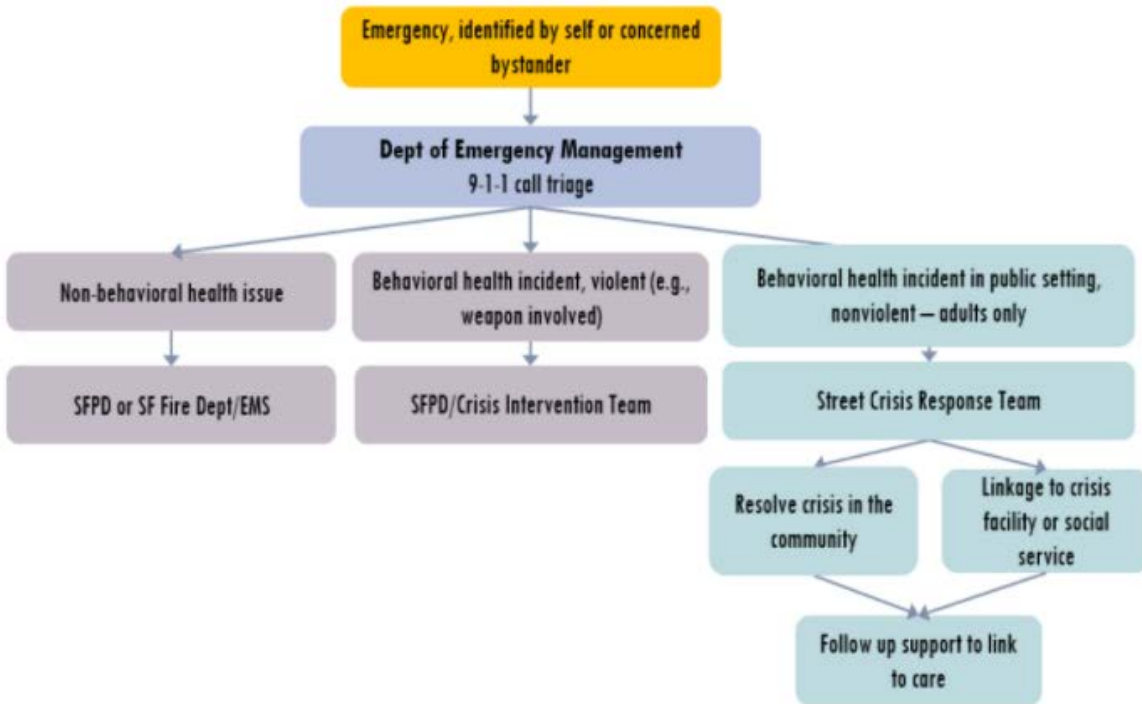

team; creating the need for additional training and supervision to ensure services are delivered in a manner that advances positive outcomes for those engaged in care. Verification of skills and knowledge of non-professional staff is essential to maintaining service delivery standards within a crisis program; including the incorporation of ongoing supervision with licensed professionals available on site at all times. Supervision and the verification of skills and knowledge shall include, but is not limited to, active engagement strategies, trauma-informed care, addressing recovery needs, suicide-safer care, community resources, psychiatric advance directives and role-specific tasks.

Conclusion

Crisis services must be designed to serve **anyone, anywhere and anytime**. Communities that commit to this approach and dedicate resources to address the community need decrease psychiatric boarding in emergency departments and reduce the demands on the justice system. These two benefits translate into better care, better health outcomes and lower costs to the community. The *National Guidelines for Crisis Care – A Best Practice Toolkit* delivers a roadmap that can be used to truly make a positive impact to communities across the country.

Appendix B. Sample Outlines of Types of Scenarios for Crisis Response Teams

Appendix B-1. County and City of San Francisco’s Crisis Response

Appendix B-2. County of Los Angeles' Behavioral Health Crisis Triage

COUNTY OF LOS ANGELES · BEHAVIORAL HEALTH CRISIS TRIAGE			
PEER INVOLVEMENT IN TRAINING	HIGHER RISK	CALLS AND RESPONSE CAN BE FLUID AND OVERLAP	M MEDICAL AID • EMS / FIRE DEPT ANYONE NEED MEDICAL ATTENTION? INJURY? ALSO FOR INTEGRATED MEDICAL INTERVENTION PLAN
	4		
MODERATE RISK	CALLER NEEDS HELP IN PERSON PUBLIC NOT IN IMMEDIATE DANGER FIELD RESPONSE IS NECESSARY MAY BE DANGER TO SELF, OTHERS, GRAVELY DISABLED DMH ACCESS CALL CENTER—DISPATCHES NON-LE TEAM [FUTURE LINKAGE TO 988 & 911 SYSTEM FOR TRANSFER IF NEEDED] ----- FIELD RESPONSE BY DMH PSYCHIATRIC MOBILE RESPONSE TEAM (PMRT) OR DMH VAN OR OTHER PSYCH EVALUATION TEAM (PET)		
3	CALLER NEEDS HELP VIA CALL / TEXT / CHAT IN CRISIS NOW • CAN / WILL ACCEPT IMMEDIATE <u>REMOTE</u> HELP INCLUDES SUICIDAL SUBJECT THAT'S NOT AN IMMEDIATE THREAT TO OTHERS "LIVE TRANSFER" TO DIDI HIRSCH SUICIDE PREVENTION CENTER [FUTURE 988 WITH LINKAGE TO 911 FOR TRANSFER IF NEEDED] ----- NO FIELD RESPONSE UNLESS CALL ASSESSMENT LEVEL CHANGES CALLER MAY REMAIN ENGAGED FOR HELP DURING LEVEL 3+ FIELD RESPONSE		
DIRECT PEER INVOLVEMENT (INDIVIDUALS WITH LIVED EXPERIENCE)	IMMEDIATE REMOTE	1	CALLER NEEDS SUPPORT/SERVICES • NOT IMMEDIATE RISK SUBJECT OR CARE TAKER NEEDS SUPPORTIVE SERVICES "LIVE TRANSFER" TO DMH ACCESS CALL CENTER—PRIORITY LINE <u>MAY</u> TRIGGER PEER ACCESS NETWORK REFERRAL TO MAKE CONTACT <u>MAY</u> RESULT IN APPOINTMENT FOR A TREATMENT PROVIDER ----- MAY REQUEST PEER-RESPONSE ORG TO ASSIST INCLUDING "NAVIGATOR" ROLE
	NO CRISIS / RESOLVED		

Appendix C. Crisis Response Programs Researched by RDA – Summary of Key Components

<u>Program</u>	<u>Dispatch</u>	<u>Types of calls</u>	<u>Hours of operation</u>	<u>Crisis team staff</u>	<u>Vehicles</u>	<u>Follow-up process</u>
Albuquerque Community Safety Department – <i>Albuquerque, NM</i>	911	Mental health, inebriation, homelessness, addiction	TBD	Clinicians or peers	TBD	TBD
B-HEARD (the Behavioral Health Emergency Assistance Response Division) – <i>New York, NY</i>	911 dispatch	Mental health	Daily 16 hours per day	2 EMTs or paramedics + social worker	Non-transport vehicles	Connect with services if transported; heat team does follow-up (clinician and peer for follow-up connection to services)
Boston Police Department’s Co-Responder Program – <i>Boston, MA</i>	911 dispatch	Mental health crisis	Unknown	Co-responder (police + clinician)	Police car	Unknown
Crisis Assistance Helping Out On The Streets (CAHOOTS) – <i>Eugene, OR</i>	911 calls dispatched on radio	Non-emergency calls	24/7	Unlicensed crisis worker and EMT or paramedic	3 vans with logo	Not currently part of services
Crisis Assessment & Transport Team (CATT) – <i>Alameda County, CA</i>	911 dispatch	Mental health	Daily 7am-12am	Licensed clinician + EMT, co-responding with police	Unmarked vehicles, barrier, custom locks and windows, locked storage cabinets	Unknown
Community Paramedicine – California (statewide)	911 dispatch	Non-emergency health and mental health calls	Unknown	Paramedics	Unknown	Unknown
Crisis Call Diversion Program (CCD) – <i>Houston, TX</i>	911 dispatch	Non-emergency mental and behavioral health calls	Daily, morning and evening shifts	Mental health professional tele-counselors at 911 call center	N/A	Unknown

<u>Program</u>	<u>Dispatch</u>	<u>Types of calls</u>	<u>Hours of operation</u>	<u>Crisis team staff</u>	<u>Vehicles</u>	<u>Follow-up process</u>
Crisis Now – National model (via SAMHSA)	Regional crisis call hub	Mental health	24/7	Licensed clinician + behavioral health specialist	Unmarked van	Program staff follows up to ensure connection to a resource
Crisis Response Pilot – Chicago, IL	911 dispatch	Mental health	M-F 9:30-5:30	Paramedic, crisis counselor, CIT officer, peer recovery coach	2 vans	Unknown
Crisis Response Unit – Olympia, WA	911 or alternate number	Mental health, homelessness	Daily 7am-9pm	Nurse + behavioral health specialist	Van owned by the City	Repeat clients get referred to peer navigation program (Familiar Faces)
Cuyahoga County Mobile Crisis Team – Cuyahoga County, Ohio	National Suicide Prevention Hotline	Mental health	24/7	Licensed clinicians	Unknown	Unknown
Department of Community Response – Sacramento, CA	911 or alternate number	Mental health, homelessness, youth and family crisis, substance use	24/7	Social workers	6 vans	CBO partner will provide connection to longer term care and follow up services
Department of Community Solutions and Public Safety – Ithaca, NY	TBD	Non-violent calls	TBD	Unarmed first responders	TBD	TBD
Downtown Emergency Service Center (DESC) Mobile Crisis Team – King County, WA	911 dispatch	Mental health, substance use	24/7	Mental health professional	Unknown	Unknown

<u>Program</u>	<u>Dispatch</u>	<u>Types of calls</u>	<u>Hours of operation</u>	<u>Crisis team staff</u>	<u>Vehicles</u>	<u>Follow-up process</u>
Expanded Mobile Crisis Outreach Team (EMCOT) – Austin, TX	911 or alternate number	Mental health	24/7	Field staff: two person teams of clinicians Call center staff: mental health professionals	Unmarked vehicles	Post-crisis services available for up to 3 months after initial contact
Georgia Crisis & Access Line (GCAL) – Georgia (statewide)	Alternate number, app	Non-emergency mental health, substance use	24/7	Mental health professionals	Unknown	Unknown
Los Angeles County Department of Mental Health - ACCESS Center – Los Angeles County, CA	Alternate number	Mental health	24/7	Unknown	Unknown	Unknown
Los Angeles County Department of Mental Health - Co-Response Program – Los Angeles County, CA	911 dispatch	Emergency mental health	Unknown	Co-responder (police + clinician)	Police car	Unknown
Los Angeles County Department of Mental Health - Psychiatric Mobile Response Team (PMRT) – Los Angeles County, CA	Alternate number	Mental health crises	Unknown	Psychiatric mobile response team	Unknown	Unknown
Mobile Assistance Community Responders of Oakland (MACRO) – Oakland, CA	911 dispatch	Non-emergency calls	24/7	Unlicensed community member + EMT	Vehicle with radios, mobile data terminal, cell phones	Community Resource Specialist to connect to resources
Mental Health Acute Assessment Team (MHAAT) – Sydney, Australia	Ambulance Control Center	Acute mental health crises	Unknown	Paramedic + mental health nurse	Ambulance	Contacted within 3 days, follow up with referral facility
Mental Health First / Anti-Police Terror Project – Sacramento and Oakland, CA	Alternate number, social media	Mental health, domestic violence, substance use	Fri-Sun 7pm-7am	Peer first responders	Use personal vehicles and meet at the scene; have an RV with supplies	Have relationship with CBOs, staff work to get folks into longer term services
Mental Health Mobile Crisis Team (MHMCT) – Nova Scotia, Canada	911 dispatch	Mental health	24/7	Co-responder (police + clinician) and telephone clinician support	Unknown	Unknown

<u>Program</u>	<u>Dispatch</u>	<u>Types of calls</u>	<u>Hours of operation</u>	<u>Crisis team staff</u>	<u>Vehicles</u>	<u>Follow-up process</u>
Mobile Crisis Assistance Team (MCAT) – Indianapolis, IN	911 dispatch	Mental health, substance use	M-F, not after hours or overnight	Co-responder (police + clinician + paramedics)	Unknown	Conduct follow up visits to encourage connection to care
Mobile Crisis Rapid Response Team (MCRRT) – Hamilton, Ontario, Canada	911 dispatch	Mental health	Unknown	Co-responder (CIT-trained police + clinician)	Police car	Unknown
Mobile Emergency Response Team for Youth (MERTY) – Santa Cruz, CA	Alternate number	Mental health calls for youth	M-F 8am-5pm	Clinician + family specialist	Van with wheelchair lift, comfortable chairs, TV, snacks	Continue to provide services until patient connected with long-term services
Mobile Evaluation Team (MET) – East Oakland, CA	911 or alternate number	Mental health	Mon-Thurs 8am-3:30pm	Co-responder (1-2 mental health clinicians + police officer)	Unmarked police car	Unknown
Psykiatrisk Akut Mobilitet (PAM) Unit, the Psychiatric Emergency Response Team – Stockholm, Sweden	Alarm center	Acute risk of suicidal behavior	Daily 2pm-2am	2 psychiatric nurses and ambulance driver	Ambulance	Unknown
Police and Clinician Emergency Response (PACER) – Australia (several locations)	Dispatched by police	Mental health	Varies	Co-responder (police + clinician)	Unknown	Unknown
Portland Street Response – Portland, OR	911 or alternate number	Low-acuity mental health, substance use, welfare checks	M-F 10am-6pm	EMT and LCSW dispatched to scene; 2 CHWs called in for follow-up	Van with logo	CHWs connect to services; partnerships with CBOs for outreach in encampments
REACH 24/7 Crisis Diversion – Edmonton, Alberta, Canada	Alternate number (211)	Non-violent, non-emergency calls	24/7	2 crisis diversion workers	Have van to transport	Connector role for connection to long-term services

<u>Program</u>	<u>Dispatch</u>	<u>Types of calls</u>	<u>Hours of operation</u>	<u>Crisis team staff</u>	<u>Vehicles</u>	<u>Follow-up process</u>
Seattle Crisis Response Team – Seattle, WA	911 dispatch	Mental health, assault/threat/harassment, suspicious circumstance, disturbance	Unknown	Co-responder (CIT + clinician)	Unknown	Clinicians can follow up with clients
Supported Team Assisted Response (STAR) – Denver, CO	911 dispatch	Mental health, homelessness, substance use	M-F 10am-6pm	Mental health clinician (SW) + paramedic	Civilian van with amber lights, bucket seats on each side with standard front seat	Can hand off to case managers
Street Crisis Response Team (SCRT) – San Francisco, CA	911 calls dispatched on radio	Non-emergency mental health	Daily, 12 hours a day	Social worker/psychologist + paramedic + peer	Van with lights and sirens, currently using old fire department vehicles	Office of Care Coordination provides linkages to other services
Street Triage – England (several locations)	Emergency dispatch	Mental health	Varies	Mental health nurse	Unknown	Unknown
Therapeutic Transportation Pilot Program/Alternative Crisis Response – Los Angeles City and County, CA	911 dispatch	Mental health crisis	24/7	Mental health experts co-respond or take the lead on MH calls	Plan to have van for transports	Level 1 calls will be referred to non-crisis follow up services, folks can step down from crisis receiving to residential program
Toronto Crisis Response – Toronto, Ontario, Canada	TBD	Non-violent, non-emergency calls	TBD	Mental health professionals	TBD	TBD

Internal

EXHIBIT A**SCOPE OF SERVICES**

Agency Name: Bonita House, Inc.
 Contract Period: January 1, 2023 – June 30, 2025
 Program Title: Specialized Care Unit Provider

Bonita House, Inc. (hereafter “Contractor”), will provide the following services, enumerated below, necessary for the implementation of the Specialized Care Unit services (hereafter “the Program”) for individuals on the verge of or experiencing a behavioral health crisis. This contract is for the period commencing January 1, 2023 through June 30, 2025, which may be extended by agreement of the City of Berkeley and Contractor. For services completed in this scope, the City will pay the Contractor a total amount not-to-exceed (NTE) \$4,500,000. Any adjustments to the NTE cost will be required to go through the City’s contract amendment process. While the contract period covers 30 months, actual service time will vary based on ramp-up time needed and availability of funding.

A. Funding Requirements

The Specialized Care Unit pilot program will be funded by two grants: American Rescue Plan Act Coronavirus State and Local Fiscal Recovery Funds (“SLFRF”) program, and the Crisis Care Mobile Units grant, administered through the California Department of Health Care Services (DHCS). Both grants have specific reporting requirements, which the Contractor will be expected to follow. The City will keep the Contractor informed of required data and provide a template for the Contractor to complete for each reporting cycle.

1. American Rescue Plan Act (ARPA)

This program qualifies for implementation of American Rescue Plan Act (ARPA) funds because the program responds to pre-existing disparities in addressing mental health and substance use issues that have been exacerbated by the COVID-19 pandemic. Specifically, the Specialized Care Unit (SCU) will be a behavioral health crisis response team that will respond to Berkeley community members who are experiencing a substance use or mental health event or crisis, without the involvement of law enforcement.

1. Funds provided through this contract are a subaward from the City of Berkeley of federal American Recovery Plan Act (ARPA) Coronavirus Local Fiscal Recovery Funds which together with the State Fiscal Recovery Fund make up the Coronavirus State and Local Fiscal Recovery Funds (“SLFRF”) program, Assistance Listing Number (ALN) 21.207.
2. Funds are being awarded by the City for the City’s Community Crisis Response Project which is an eligible SLFRF activity under 1.10 Mental Health Services.
 Services provided under this contract will provide evidence-based interventions, specifically

Internal

Motivational Interviewing. The goal of these services is to empower people to change by drawing out their own meaning, importance and capacity for change.

3. All activities performed associated with this contract are subject to the applicable federal ARPA SLFRF requirements, including but not limited to the Final Rule, the Compliance and Reporting Guidelines, and the Frequently Asked Questions (FAQ), as updated from time to time. The U.S. Department of the Treasury has made all of these materials available online at: <https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/state-and-local-fiscal-recovery-funds>
4. As an example, the SLFRF guidance makes this subaward subject to 2 CFR Part 200: Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards: <https://www.ecfr.gov/current/title-2/subtitle-A/chapter-II/part-200?toc=1> which requires, among other things:
 1. Use of competitive processes for purchasing, including written procedures for doing so;
 2. Retention of records for 5 years after contract completion; and
 3. A single audit if federal funds received by the agency exceed \$750,000 in the agency's fiscal year.
5. **All invoices and reporting under this contract are due to the City at the earlier of 90 days after operations cease or June 30, 2025.** Since the City must comply with the federal reporting deadline in order to be eligible for these funds, extensions are not expected to be possible.
6. The Contractor must report on a monthly basis, by the 15th of the following month, or the following:

Expenditures:

- Current period obligation
- Cumulative obligation
- Current period expenditure
- Cumulative expenditure

Project Status:

- Not Started
- Completed less than 50 percent
- Completed 50 percent or more
- Completed

2. Crisis Care Mobile Units (CCMU)

CCMU is administered by the California Department of Health Care Services (DHCS). Contractor must report quarterly data to the City of Berkeley for aggregation, review, and submission to DHCS. The Contractor will use a City-provided reporting template to track the necessary data. Specific CCMU reporting requirements include, but are not limited to the following:

- Number of calls/requests for service

Internal

- Referral sources initiating call/request for SCU
- Number of calls/requests resulting in SCU dispatch
 - Primary reason for dispatch
 - number of unduplicated individuals seen, for a specified quarter, without a dispatch (reason for SCU service and number of unduplicated individuals seen without dispatch)
- Number and source of dispatches (and unduplicated individuals) resulting in CCMU services rendered
 - Type of behavioral health condition
- Resolution of CCMU services (unduplicated individuals and percent of total)
 - Calls resolved without a referral (unduplicated individuals and percent of total)
- Response time in minutes
 - Mean and median response time in minutes
 - Length of intervention
- Referrals and warm handoffs
 - Name of agency, type, zip code and number of handoffs
- Individuals transported to secondary location
 - Name of agency receiving individual once transported, type, zip code, and number of handoffs
- Follow-up services post-crisis
 - services received, number of individuals, percent of individuals
- Demographic information
 - Primary diagnosis, Race/Ethnicity, Primary Language, Gender, Age, Living Situation, Sexual Orientation and Gender Identity Expressions (SOGIE) categories, Military Status, Insurance Status, Housing Status

If there are changes to reporting requirements for the CCMU or ARPA grants, the City will alert the Contractor and provide a revised template to complete as a part of the monthly reporting schedule.

C. Program Requirements: Specialized Care Unit

The Specialized Care Unit (SCU) will provide immediate response services to Berkeley community members who are experiencing a behavioral health emergency or who are on the verge of experiencing a crisis. Once implemented, the SCU will operate 24 hours each day, 7 days per week and will be a non-police behavioral health crisis response system that will coordinate closely with the City to perform its duties.

1. Personnel

Each of the Contractor's SCU teams will be composed of an Emergency Medical Technician (EMT), Behavioral Health Clinician, and Peer Support Specialist for each proposed shift: daytime, swing, and nocturnal (NOC). Each team member will be a 1.0 FTE equivalent and additional information is included in Section D. "Budget". With this team structure, Contractor will be able to assess and author psychiatric holds, provide non-emergency medical care, offer emergency basic life support per Alameda County Emergency Medical Technician (EMT) scope of practice, give substance use support, and connect individuals in crisis to resources.

Internal

The Contractor will hire and deploy SCU teams to operate in shifts to provide 24 hours of coverage. The Contractor and City will work together to develop a schedule and staffing structure that fits the needs of the SCU program, per the roles identified. The schedule and staffing structure will be subject to City approval. The EMT will meet the medical needs required of each SCU team. Additionally, the Contractor will employ a part time (0.5 FTE) Nurse Practitioner, on call to provide medication support when needed to meet new state standards, as of 1/1/2023 (new standards were announced via the California Department of Health Care Services memo, “Medi-Cal Mobile Crisis Services Benefit Implementation”). This Nurse Practitioner position will be available using telehealth to field teams to support medication needs in the moment and will support with medication follow up when needed. See Section C for additional personnel details.

The Contractor will propose and discuss any changes or challenges of this staffing structure with the City prior to implementation.

2. Coordination with the City of Berkeley and Other Partners

The Contractor will work in partnership with the City of Berkeley’s Department of Health, Housing, and Community Services (HHCS) to ensure that the SCU adheres to the principles envisioned for this service team included in the Request for Proposals (SPEC# 22-11533-C), guiding reports from Resource Development Associates, and the Steering Committee analysis of implementation recommendations as a part of Berkeley’s broader initiative to reimagine public safety. Adhering to these principles will help meet the needs of community members in crisis and build trust in the SCU pilot program.

The Contractor is expected to work with City of Berkeley departments including, but not limited to: Health, Housing, and Community Services, Berkeley Fire Department, and Berkeley Police Department, including the Communication Center (911 dispatch). By coordinating with these entities, the Contractor and City stakeholders will develop and implement dispatch protocols while establishing a 24/7 SCU Crisis Line that is separate from 911 as well as create and agree to standard operating procedures for teams in the field.

The Contractor will also work closely with the City regarding necessary any equipment purchases, ensuring the physical home-base for the SCU is centrally located and adequate to the project’s activities, participation in the SCU Steering Committee, communications and public outreach to announce and support the SCU project, and development and refinement of a coordinated response system. Additional information regarding equipment and purchases can be found in Exhibit D.

As a part of the first responder network in the City of Berkeley, the Contractor will participate in appropriate City quality improvement and quality assurance (QI/QA) procedures to further improve operations once the SCU is implemented. The Contractor may also be asked to participate in other service provision coordinating groups across the City of Berkeley as appropriate to enhance care networks across the community. The City and Contractor will determine appropriate frequency of these meetings to address concerns while avoiding interference with daily program operations.

Additionally, the Contractor is an experienced partner with Alameda County Behavioral Health

Internal

Crisis Services (BHCS). When appropriate, the Contractor will coordinate client care with ACCESS, 211, other community-based organizations, case management teams, East Bay Regional Center, crisis residential treatment facilities, crisis stabilization units, medical and psychiatric hospitals, shelters, and other community resources. The Contractor will also leverage existing relationships with other programs in Alameda County such as the Bay Area Community Services Amber House, and other existing networks.

3. Equipment

Equipment will be purchased by the City of Berkeley in consultation with the Contractor and leased to the Contractor. The City of Berkeley will purchase vehicles and additional customizations, IT equipment, and other equipment identified by the Contractor and City to support program operations. Additional information regarding specific equipment and policies is in Exhibit D.

4. Training

The Contractor will provide comprehensive crisis training approved by Alameda County Behavioral Healthcare Services (ACBHS). All staff hired to support the Specialized Care Unit will attend more than 60 hours of on-board training focused on de-escalation; working with minors; serious mental health disorders; crisis interventions; vicarious trauma; Motivational Interviewing; brief Cognitive Behavioral Therapy for depression, anxiety, psychosis, insomnia, and suicide prevention; trauma-informed care; culturally specific mental health needs; harm reduction strategies; and local community resources. The Contractor will coordinate with the City of Berkeley Mental Health Division and Alameda County Behavioral Health Services to determine the appropriate 5150/5585 training module for appropriate SCU team members. Prior to entering the field, new SCU team members will also be certified in Pro-Act, a safety course focusing on situational awareness at the scene, de-escalation, and the assault cycle.

In-field training is a central component of on-boarding new crisis response staff. The Contractor's crisis programs have a standard of new staff shadowing a veteran team for five calls and then switching where the veteran team shadows the new staff running a scene for five calls. This model of in-service training has proven extremely helpful in setting clear standards and boosting staff confidence to manage a scene independently. New SCU team members will shadow existing crisis response teams, especially those with a non-law enforcement response. Then, the SCU team will participate in in-field supervision provided by the program supervisors to increase their understanding of working crisis calls. In addition to the comprehensive new hire training, each staff will participate in regular continuing education opportunities for training. Staff will have continual access to the Director of Crisis Services and Crisis Clinical Supervisor for in-field support as needed. Weekly team meetings will be scheduled to address training and programmatic issues as they arise.

The Contractor will work closely with the City to supplement this training plan with other monthly, quarterly or annual training opportunities. The City will provide additional applicable training and consultation opportunities as needed or requested.

5. Service Provision

Internal

Specific services of the City's Specialized Care Unit (SCU) will include, but not limited to: crisis counseling, de-escalation and violence prevention, substance use Harm Reduction, mobile transport, community outreach and referrals.

Contractor will implement support for individuals experiencing a mental health crisis at every stage of the crisis continuum, including crisis prevention, crisis intervention, and post-crisis support. Post-crisis support includes a 6-month program for individuals experiencing mental health or SUD crises which includes supporting individuals through the following:

- **Crisis counseling, de-escalation and violence prevention:** In an effort to divert individuals away from hospitalization and incarceration, SCU staff will be available to support individuals actively in crisis to move through a full range of emotions safely and efficiently. All SCU staff will be trained in evidence-based de-escalation, violence prevention and crisis counseling techniques. Peer counselors, medical specialists and behavioral health clinicians will seek to identify incidence of domestic/sexual violence, trauma, negative psych drug interactions, and support safety planning, alternatives to involuntary treatment, and de-escalation.
- **Substance Use Harm Reduction:** All SCU staff will be trained in evidence-based Harm Reduction interventions and will use these trainings when responding to substance use emergencies, mental health crises, co-occurring emergencies, and preventative outreach visits. Peer counselors, medical specialists and behavioral health clinicians will seek to identify incidence of overdose, consistent substance misuse, negative drug interactions, unsafe IV drug use conditions, and identify opportunities for trust building, drug education, respite referrals and safety planning.
- **Mobile Transport:** The City's SCU will respond to calls for service via a mobile transit van, providing an immediate safe, private secondary space for a client in crisis. The SCU can provide transport to a secondary location (private residence, Community Based Organization [CBO], or public space) as well as transport to a medical facility. The SCU will work in close collaboration with Berkeley Fire's EMS services and contracted Falk services to supplement the SCU transport capacity.
- **Outreach and relationship-building:** The SCU will conduct outreach to areas including downtown Berkeley, encampment communities, UC Berkeley campus, and CBO service provision locations. The SCU will offer material support such as harm reduction kits and basic needs supplies. Such items include Client Support Expenses including, but not limited to: clean needles, sharps disposal bins, condoms, water bottles, snacks, socks, underwear, hats, and access to a mobile charging station, among other resources.
- **Resource connection, referrals and warm handoffs:** Peer counselors, medical specialists and behavioral health clinicians have unique navigation expertise and will be able to facilitate navigation training, resource connection, and support at every stage to ensure warm handoffs and a seamless continuum of care.

Internal

As a new first responder in Berkeley, the Contractor will render these services in an efficient manner by responding to calls within 20 minutes once dispatched, if the unit is not already on a call or returning from a call that has transported out of the City. Response to callers should be prioritized above report writing or other administrative tasks for SCU team members. The City and Contractor will create emergency communication procedures if there is an incident in the field and apply appropriate QI/QA measures in partnership with other key stakeholders including, but not limited to, the Berkeley Fire Department, Berkeley Police Department, and other partner agencies. Responses to calls, as well as the time it takes to respond to calls will continue to be evaluated and appropriately adjusted as the pilot SCU program progresses (i.e. time to respond may increase or decrease based on program operations).

Program difficulties, or obstacles to providing these services as listed above, will be addressed during regular partnership meetings with the City of Berkeley and appropriate stakeholders. The Contractor and the City will use QI/QA measures to overcome challenges and identify solutions that achieve a successful SCU program for the Berkeley community. Any anticipated gaps in service must be discussed with the City prior to the impacted shifts to maintain broader coordination among Berkeley first responders and City stakeholders.

6. Methods for Identifying and Referring Participants in need of higher levels of Crisis Support beyond the SCU's scope

Contractor will develop and maintain relationships with staff at Emergency Rooms and inpatient psychiatric facilities to support clients in crisis making informed decisions about their care needs. The SCU team will have the delegated authority to place or release a 5150 LPS hold, once appropriately trained and verified by either Berkeley Mental Health or Alameda County, and will only do so once all options have been exhausted. The SCU will have access to a CAD radio and call Berkeley Fire for more acute medical emergencies, and Berkeley Police as a measure of last resort if a firearm is confirmed as present and/or violent interactions cannot be otherwise de-escalated.

7. Phased Timeline for Implementation

A phased roll-out plan will facilitate the SCU implementation process. Proposed timeline below:

Phase one: December 2022 to March 2023

- Contractor will work with the City of Berkeley to Execute contracts and begin meeting with the SCU Steering Committee.
- Contractor will begin hiring with the Crisis Clinical Manager and Emergency Medical Services Clinical Manager to build the infrastructure needed to hire the direct service and support staff as soon as possible.
- Working with the City of Berkeley, Contractor will identify a location from which the SCU will work. Contractor will negotiate a lease agreement and move into the location quickly to prepare for team deployment.

Internal

- Contractor will work with the City of Berkeley to purchase needed equipment for implementation of the program. The City will purchase equipment listed in Exhibit D.
- As Staff are hired, Contractor will use a Microsoft's Teams phone line that will ring to Bonita House phones to allow staff to perform an initial screening and send a responding SCU team if appropriate. Contractor will develop call answering and applicable triage procedures.
- Collaborate with City and Stakeholders who will respond to SCU calls if teams are unavailable.
- Contractor will coordinate with the City of Berkeley to access purchased vehicles and conduct necessary customizations. See Exhibit D for additional information.

Phase two: March 2023 to July 2023

- Contractor's first teams begin rolling out and responding to calls. The order of shifts to be filled are first the day shift, followed by the swing shift, and then the night shift.
- Contractor will connect with Berkeley Fire and Police dispatch to develop and establish referral protocols and begin accepting 911 calls appropriate for SCU.
- Contractor will continue to engage City stakeholders to implement processes while identifying needs and collaborating on solutions to any barriers to success of SCU.
- Contractor will engage in community education and public relations to promote the availability of the SCU project.
- City and Contractor will collaborate on continuous development, evaluation, and quality improvement of developed processes, policies, and practices.
- City and Contractor will assess whether further infrastructure is needed for 24/7 call center and hire additional staff if needed.

Phase three: July 2023 and onward

- All staff hired and trained, SCU teams and Crisis Line operational.
- Active ongoing community engagement and education to maintain goodwill and active utilization of the SCU by the community.
- Maintain ongoing connections to community stakeholders and attendance at SCU Steering Committee meetings.
- Continuous training, development, evaluation, and quality improvement of developed processes, policies, and practices.

8. Program Outreach and Engagement Methods

Contractor will provide culturally responsive outreach and engagement methods that include sensitivity to, and inclusion of, issues regarding an including gender identity, race, age, ethnicity, and sexual orientation. Engagement methods will create trusting relationships with individuals which enable a clear assessment of each individual's current level of functioning. Outreach and

Internal

engagement methods will prioritize underserved populations. Prioritized care modalities include but are not limited to:

- Harm Reduction
- Trauma Informed Care
- Motivational Interviewing
- De-Escalation

Harm Reduction: Harm reduction is an approach that emphasizes engaging directly with people who use drugs to prevent overdose and infectious disease transmission, improve the physical, mental, and social wellbeing of those served, and offer low-threshold options for accessing substance use disorder treatment and other health care services.

Trauma Informed Care: A program, organization, or system that is trauma-informed realizes the widespread impact of trauma and understands potential paths for recovery; recognizes the signs and symptoms of trauma in clients, families, staff, and others involved with the system; and responds by fully integrating knowledge about trauma into policies, procedures, and practices, and seeks to actively resist re-traumatization.

De-Escalation: Mirroring SAMHSA's Creating Safe Scenes Training Course, the SCU will use de-escalation as its primary modality for violence prevention during a crisis call. Using de-escalation strategies can reduce and prevent aggressive behavior as well as reduce the need to use seclusion and restraints.

Motivational Interviewing (MI): MI is a guiding style of communication, that sits between following (good listening) and directing (giving information and advice). MI is designed to empower people to change by drawing out their own meaning, importance and capacity for change. MI is based on a respectful and curious way of being with people that facilitates the natural process of change and honors client autonomy. The SCU will use a direct, patient-centered style of interaction to promote behavioral change by helping patients explore and resolve ambivalence. It is designed to strengthen personal motivation for and commitment to a specific goal by eliciting and exploring the person's own reasons for change within an atmosphere of acceptance and compassion.

9. Documentation, Service Outcomes, & Reporting

The Health, Housing & Community Services (HHCS) Department at the City of Berkeley is committed to finding ways to deepen our positive impact on the community, especially for those most vulnerable. To support this effort, HHCS will use a framework called Results Based Accountability (RBA) that has a proven track record of success in improving the quality of life for people and communities. RBA will provide us with a common language and method to better understand, communicate, and ultimately strengthen our programs.

HHCS is incorporating Results Based Accountability into our contact processes including requests for proposals, reporting, contract monitoring activities and evaluations. All new or renewed contracts will provide information and data that address the three basic RBA questions:

- How much work was done?

Internal

- How well was it done?
- Are clients better off as a result of the services provided?

Providers can expect to be asked how they measure whether clients are better off and the quality of the delivered services. HHCS will work with providers to identify appropriate performance measures including service measures and outcomes including the provisions laid out in the funding requirements (*Section A.1-2*). As the program continues, the City and the Contractor may identify additional performance measures and reporting categories. The Contractor agrees to comply with all data requests and utilize any forms the City may provide to report on program data.

Processes will be developed to monitor and improve performance over time. Contractor agrees to participate and develop RBA outcome measurements in the three RBA areas (how much, how well, and is anyone better off) within this contract period. Contractor also agrees to participate in program evaluation design and implementation with the City and other outside partners as requested.

The City of Berkeley will conduct at least one annual Quality Assurance Site Visit.

Contractor will comply with all relevant provisions of the Health Insurance Portability and Accountability Act (“HIPAA”) and all other applicable federal, state, and local privacy laws and regulations including the Confidentiality of Medical Information Act (CMIA). Additional information is included in *Exhibit C: Business Associates Agreement*.

In accordance with RBA, the Contractor will maintain and provide monthly documentation on the outputs referenced in Exhibit A.

EXHIBIT B

PAYMENT

Payment:

Payments will be made by the Finance Accounting Division in arrears within 30 days after receipt and acceptance of proper, itemized, and correct invoices.

The contractor is responsible for submitting monthly invoices and required data reporting elements.

Additionally, the City reserves the right to require the Contractor to submit monthly statements of expense with backup documentation.

Total Not-to-Exceed Amount:

Fees will not exceed \$4,500,000 for all services under Exhibit A.

Submit Invoices to:

HHCS
ATTN: Katherine Hawn, Office of the Director
2180 Milvia Street, 2nd Floor
Berkeley, CA 94704

Cc: Finance Department
2180 Milvia Street, 3rd Floor

Internal

EXHIBIT B

PAYMENT

Agencies that have received an allocation from the City of Berkeley may receive an initial advance. Bonita House can receive an advance equal to \$500,000 per the budget below. In order to receive the initial payment Bonita House must submit the following documentation:

- Advance Payment Terms and Conditions;
- Authorized Signatory;
- Updated insurance;
- Advance payment request; and
- Any overdue reports from prior contract reporting cycles.

Subsequent monthly payments will be released only after contract execution and receipt and approval of previous quarter’s statement of expenses and narrative summary reports as indicated on report sections in Exhibit A.

The agency is responsible for submitting a CITY OF BERKELEY STATEMENT OF EXPENSE verifying the use of the contract funds prior to monthly invoicing after the contract is executed.

The City reserves the right to require contractor to submit monthly invoices with backup documentation in certain situations, i.e., new contractors, contractors, contractors that have previously had difficulties with financial reporting requirements or fail to comply with reporting requirements. Contractor will be notified if the Method of Payment differs from that stated above.

Advance Budget - for 60 days operating funds as the agency ramps up hiring	
Salaries Wages and Benefits	\$247,620
Office Supplies	\$2,400
Rent/Utilities [3]	\$46,200
Secured Parking [3]	\$2,800
Training	\$10,500
Communications & IT	\$14,667
Equipment	\$35,000
Recruitment/hiring costs	\$80,000
Admin. allocation - 15% of total [4]	\$60,813
Estimate needed for startup	\$500,000

MEMORANDUM

To: Dee Williams-Ridley, City Manager
From: Lisa Warhuus, PhD, Director *lw*
Date: February 16, 2023
Subject: Request for Approval to Release an Initial Payment Advance to Bonita House Incorporated (BHI) for the Specialized Care Unit

BHI has requested an initial advance payment prior to the execution of their contract. The contract execution was delayed due to the finalization of the exact terms and the Annual Appropriation Ordinance 2 budget submission.

With the estimated 4-6 week timeframe for contract routing, I am requesting to advance Bonita House's first two months of payment prior to contract execution, as they have submitted required contract documents and the contract has been routed.

Please sign below to indicate either approval or disapproval of the early advance payment in the amount of \$500,000 to Bonita House.

CITY OF BERKELEY

ADVANCE PAYMENT TERMS AND CONDITIONS

As the authorized representative of **Bonita House Incorporated** I agree to the following terms and conditions of receipt of the payment under the Agreement authorized by the Berkeley City Council on December 13, 2022.

1. The Contractor shall use this payment for the operation costs as specified in the forthcoming agreement.
2. The Contractor agrees to abide by the City regulations governing the project, including all terms and conditions outlined in the forthcoming agreement.

I, the undersigned as an authorized representative of Bonita House Incorporated, acknowledge receipt of \$500,000 and agree to the above terms as a condition of receipt of this payment under the Agreement with the City of Berkeley for implementation of the Specialized Care Unit.

Exhibit C
BUSINESS ASSOCIATE ADDENDUM

This Business Associate Addendum (“Addendum”) supplements and is made a part of the contract (“Contract”) by and between City of Berkeley, (hereinafter “Covered Entity”) and Bonita House, Inc., (hereinafter “Business Associate”), dated January 1, 2023. This Addendum is effective as of the effective date of the Amendment to Contract (the “Addendum Effective Date”).

1. Recitals

(a) Covered Entity wishes to disclose certain information to Business Associate pursuant to the terms of the Contract, some of which may constitute Protected Health Information (“PHI”).

(b) Covered Entity and Business Associate intend to protect the privacy and provide for the security of PHI disclosed to Business Associate pursuant to the Contract in compliance with the Health Insurance Portability and Accountability Act of 1996, Public Law 104-191 (“HIPAA”), the Health Information Technology for Economic and Clinical Health Act, Public Law 111-005 (“the HITECH Act”), and regulations promulgated thereunder by the U.S. Department of Health and Human Services and other applicable laws.

(c) Covered Entity is required to enter into an agreement containing specific requirements with Business Associate prior to the disclosure of PHI, as set forth in, but not limited to, Title 45, Sections 164.314(a), 164.502(e) and 164.504(e) of the Code of Federal Regulations (“C.F.R.”) and contained in this Addendum.

2. Definitions

(a) Catch-all definition:

The following terms used in this Agreement shall have the same meaning as those terms in the HIPAA Rules: Breach, Data Aggregation, Designated Record Set, Disclosure, Health Care Operations, Individual, Minimum Necessary, Notice of Privacy Practices, Protected Health Information, Required By Law, Secretary, Security Incident, Subcontractor, Unsecured Protected Health Information, and Use.

(b) Specific definitions:

(1) Business Associate. “Business Associate” shall generally have the same meaning as the term “business associate” at 45 CFR 160.103, and in reference to the party to this agreement, shall mean Worldwide Travel Staffing, Limited.

(2) Covered Entity. “Covered Entity” shall generally have the same meaning as the term “covered entity” at 45 CFR 160.103, and in reference to the party to this agreement, shall mean City of Berkeley.

Internal

(3) HIPAA Rules. “HIPAA Rules” shall mean the Privacy, Security, Breach Notification, and Enforcement Rules at 45 CFR Part 160 and Part 164.

3. Obligations and Activities of Business Associate

Business Associate agrees to the following obligations and activities.

(a) Prohibited disclosures. Business Associate shall not use or disclose protected health information other than as permitted or required by the Agreement or as required by law;

(b) Appropriate safeguards. Business Associate shall use appropriate administrative, technical and physical safeguards, and comply with Subpart C of 45 CFR Part 164 with respect to electronic protected health information, to prevent use or disclosure of PHI other than as provided for by the Contract. Upon request by Covered Entity, Business Associate shall provide a written description of such safeguards.

(c) Reporting of Breach or Security Incident. Business Associate shall report to Covered Entity any use or disclosure of PHI not provided for by the Agreement of which it becomes aware, including breaches of unsecured PHI as required at 45 CFR 164.410, and any security incident of which it becomes aware in writing without unreasonable delay and in no case later than ten (10) calendar days after discovery. The written notice from the Business Associate shall include the name of each individual, with address and other identifiers where known, whose unsecured PHI has been, or is reasonably believed by Business Associate to have been, accessed, acquired, or disclosed during such unauthorized use or disclosure. Business Associate shall investigate any such breach or security incident, and provide a written report of the investigation to Covered Entity’s Privacy Officer within thirty (30) days of discovery at:

Privacy Officer (Katherine Hawn)
Department of Health, Housing & Community Services
City of Berkeley
2180 Milvia Street, Second Floor
Berkeley, CA 94704

(d) Breach Notification. For any breach of PHI attributable to Business Associate or any subcontractor of Business Associate, the Business Associate shall handle on behalf of Covered Entity all breach notifications to individuals, the HHS Office for Civil Rights (OCR), and, if necessary, to the media, as set forth below.

i. *Individuals*. Business Associate shall notify individuals of the breach or unauthorized use or disclosure when notification is required under state or federal law and shall pay any costs of such notifications, as well as any costs associated with the breach. The notifications shall comply with the requirements set forth in 42 U.S.C. Section 17932 and its implementing regulations, including, but not limited to, the requirement that the notifications be made without unreasonable delay and in no event later than 60 calendar days. Business Associate

Internal

shall provide Covered Entity an opportunity to review and approve the time, manner and content of any such notifications before the notifications are made.

- ii. *Secretary and Media.* Business Associate is responsible for all required reporting of the breach as specified in 42 U.S.C. section 17932 and its implementing regulations, including notification to media outlets and to the Secretary. If a breach of unsecured PHI involves more than 500 residents of the State of California or Business Associate's jurisdiction, Business Associate shall notify the Secretary of the breach according to 45 CFR 164.408. Business Associate shall provide Covered Entity with a copy of the notice to the Secretary. Additionally, where media notification is necessary, Business Associate shall provide notification to the media. The Covered Entity shall review and approve the media notification before it is made.
- (e) Subcontractors. In accordance with 45 CFR 164.502(e)(1)(ii) and 164.308(b)(2), if applicable, Business Associate shall ensure that any subcontractors that create, receive, maintain, or transmit PHI on behalf of the Business Associate agree to the same restrictions, conditions, and requirements that apply to the Business Associate with respect to such information. Business Associate shall ensure that any subcontract it maintains in order to perform the services specified in the Contract includes a Business Associate agreement compliant with federal and California law.
- (f) Designated Record Set. Business Associate shall make available PHI in a designated record set to the Covered Entity, within 10 days of request, as necessary to satisfy Covered Entity's obligations under 45 CFR 164.524 and applicable California law, including but not limited to Health and Safety Code Section 123110.
- (g) Amendments to PHI. Business Associate shall make any amendment(s) to PHI in a designated record set as directed or agreed to by the Covered Entity pursuant to 45 CFR 164.526, or take other measures as necessary to satisfy Covered Entity's obligations under 45 CFR 164.526;
- (h) Accounting. Business Associate shall maintain and make available the information required to provide an accounting of disclosures to the Covered Entity as necessary to satisfy Covered Entity's obligations under 45 CFR 164.528;
- (i) Compliance. To the extent the Business Associate is to carry out one or more of Covered Entity's obligation(s) under Subpart E of 45 CFR Part 164, Business Associate shall comply with the requirements of Subpart E that apply to the Covered Entity in the performance of such obligation(s).
- (j) Audit. Business Associate shall make its internal practices, books, and records available to the Secretary for purposes of determining compliance with the HIPAA Rules.

Internal

4. Permitted Uses and Disclosures by Business Associate

(a) Business Associate may only use or disclose PHI as necessary to perform the services set forth in the Contract, except as specifically set forth below.

(b) Business Associate may not use or disclose protected health information in a manner that would violate Subpart E of 45 CFR Part 164 if done by Covered Entity.

(c) Business Associate agrees to limit its uses, disclosures and requests for PHI to the minimum necessary to accomplish the intended use, disclosure or request, respectively. Effective on the date the Secretary issues guidance on what constitutes “minimum necessary” for purposes of the HIPAA Regulations, Business Associate shall limit its use, disclosure or request of PHI to only the minimum necessary as set forth in such guidance.

(d) Business Associate may use or disclose protected health information as required by law.

(e) Business Associate may use protected health information for the proper management and administration of the Business Associate

(f) Business Associate may provide data aggregation services relating to the health care operations of the Covered Entity, but only if specifically required within the scope of services in the Contract or otherwise based on a specific written request of the Covered Entity.

5. Permissible Requests by Covered Entity

Covered Entity shall not request Business Associate to use or disclose protected health information in any manner that would not be permissible under Subpart E of 45 CFR Part 164 if done by Covered Entity.

6. Termination

(a) Material Breach. A breach of any provision of this Addendum by Business Associate, as determined by Covered Entity, shall constitute a material breach of the Contract and shall provide grounds for *immediate* termination of the Contract, any provision in the Contract to the contrary notwithstanding.

(b) Obligations of Business Associate Upon Termination. Upon termination of the Contract for any reason, Business Associate shall return to Covered Entity or, if Covered Entity provides advanced written approval, destroy, all protected health information received from Covered Entity, or created, maintained, or received by Business Associate on behalf of Covered Entity, that the Business Associate still maintains in any form. Business associate shall retain no copies of the protected health information. If Covered Entity elects destruction of the PHI, Business Associate shall certify in writing to Covered Entity that such PHI has been destroyed.

Internal

(c) Survival. The obligations of Business Associate under this Section shall survive the termination of this Agreement.

7. Miscellaneous

(a) Regulatory References. A reference in this Addendum to a section in the HIPAA Rules means the section as in effect or as amended.

(b) Amendment. The Parties agree to take such action as is necessary to amend this Agreement from time to time as is necessary for compliance with the requirements of the HIPAA Rules and any other applicable law.

(c) Interpretation. Any ambiguity in this Addendum and the Contract shall be interpreted as broadly as necessary to implement and comply with HIPAA, the HITECH Act, and the HIPAA Rules.

(d) Disclaimer. Covered Entity makes no warranty or representation that compliance by Business Associate with this Addendum, HIPAA, the HITECH Act, or the HIPAA Rules will be adequate or satisfactory for Business Associate's own purposes. Business Associate is solely responsible for all decisions made by Business Associate regarding the safeguarding of PHI.

(e) Assistance in Litigation or Administrative Proceedings. Business Associate shall make itself, and any subcontractors, employees, or agents assisting Business Associate in the performance of its obligations under the Contract or Addendum, available to Covered Entity, at no cost to Covered Entity, to testify as witnesses, or otherwise, in the event of litigation or administrative proceedings being commenced against Covered Entity, its directors, officers, or employees based upon a claimed violation of HIPAA, the HITECH Act, the HIPAA Rule, or other laws relating to security and privacy, except where Business Associate or its subcontractor, employee or agent is a named adverse party.

(f) No Third-Party Beneficiaries. Nothing express or implied in the Contract or this Addendum is intended to confer, nor shall anything herein confer, upon any person other than Covered Entity, Business Associate and their respective successors or assigns, any rights, remedies, obligations or liabilities whatsoever.

(g) Remedies. Covered Entity shall be entitled to seek immediate injunctive relief as well as to exercise all other rights and remedies which the Covered Entity may have at law or in equity in the event of an unauthorized use or disclosure of PHI by Business Associate or any employee, agent or subcontractor thereof that received PHI from Business Associate.

(h) Preemption. The provisions of this Addendum are intended to establish the minimum requirements regarding Business Associate's use and disclosure of PHI under HIPAA, the HITECH Act, and applicable Regulations. California law also governs the use and disclosure of individually identified health information. To the extent that California law is more stringent with respect to the protection of such information, applicable California law shall govern Business Associate's use and disclosure of confidential information related to the performance of the Contract.

Internal

Exhibit D
EQUIPMENT ADDENDUM

To accomplish the Scope of Work set forth in Exhibit A, the City will purchase and make equipment available to the Contractor for the purpose of this program for the term of this Agreement. Contractor shall keep all such equipment in good, working condition and return all such equipment at the end of the term of this Agreement in the same condition as it was received, except for a normal level of wear appropriate for time and use.

Equipment provided by the City is anticipated to include the following items:

1. Vehicles
 - a. Three (3) Ford Transit vans purchased by the City of Berkeley Fleet Management Unit.
 - b. Vehicle customizations which could include cabinets and other storage will be determined in partnership with the City of Berkeley Department of Health, Housing, and Community Services and Fleet Management Unit.
2. Radios
 - a. Six (6) radios will be provided and programmed by the City's Public Works Radio Shop
 - b. Radios will connect to the Berkeley Communications Center, including the main first responder channel and other SCU team members.
 - c. Contractor will work with City of Berkeley Department of Health, Housing, and Community Services and Public Works Radio Shop to determine if additional programming is needed.
3. Information Technology (IT) equipment including:
 - a. Tablet or equivalent for field data entry
 - b. Mobile phones
 - c. GPS for vans

The City will prepare a list specifying the types, quantity and condition of equipment provided, and the Contractor will confirm receipt in writing. At the conclusion of this contract, City and Contractor will consult this list to coordinate return of all items.

Contractor, including its officers, directors, employees, and agents, shall use any equipment provided by the City solely for the purposes of carrying out the services under this Agreement. Contractor, including its officers, directors, employees, and agents, shall use and maintain any equipment provided by the City consistent with applicable City of Berkeley Administrative Regulations (ARs), as such may be added or amended from time to time. Contractor acknowledges and agrees that applicable ARs include, but are not limited to, AR 2.6, attached hereto as Appendix 1, and AR 7.1, attached hereto as Appendix 2. Contractor further acknowledges and agrees that AR 2.6 is applicable to any radios or IT equipment provided by the City, and AR 7.1 is applicable to any vehicles provided by the City. Failure of the City to insist on strict compliance with any portion of an applicable AR shall not constitute waiver of any rights to defense or indemnity.

Internal

Notwithstanding anything to the contrary in this Agreement, Contractor agrees to defend, indemnify, and hold harmless the City, its officers, agents, volunteers, and employees from and against any and all claims, demands, liability, damages, lawsuits or other actions, including but not limited to, personal injury or death or property damages arising out of or in any way connected with Contractor's failure to adhere to any AR that is applicable under this Exhibit D. Contractor expressly acknowledges and agrees that its automobile liability insurance obligations under this Agreement includes the requirement to maintain coverage that includes any vehicles provided by the City under this Exhibit D.

CITY OF BERKELEY

ADMINISTRATIVE REGULATIONS

SUBJECT: CITY PROPERTY – ISSUANCE AND RETRIEVAL

PURPOSE

City of Berkeley policy is to safeguard City assets held in the custody of its City employees. This is accomplished by the establishment and maintenance of proper transition procedures in the issuance and retrieval of property to include the use of the attached Property Checklist Form. All new hires and terminating employees who are given any City property must complete the form.

POLICY

The objective of a property checklist system is to ensure the proper issuance, monitoring, and return of all City property given to its employees during their employment with the City. These transition procedures will facilitate proper documentation of all City property issued to a new employee. These will also allow proper monitoring of said City property for inventory and location identification. Most important, these transition procedures will facilitate a smooth exit process and ensure reasonable security procedures for the return and retrieval of all City property.

PROCEDURES

1. DEFINITION OF CITY PROPERTY:

City Property is any tangible or intangible property issued to a City employee such as employee I.D. cards, building access cards, door and automobile keys, credit cards, computers, pagers, etc. (see attached City Property Checklist Form). Additional items may need to be added to this form depending on items issued by the user department or changing work conditions and new technology. Therefore, this listing is not inclusive. Intangible property items may include computer access codes, password for business telephone, etc.

2. PROPERTY CHECKLIST:

All departments will be expected to follow and maintain a Property Checklist system. The attached Property Checklist Form is to be used uniformly by all departments for every City employee, regardless of his/her employment status, i.e. career, temporary, transfer, etc., at the time of appointment, transfer, termination or separation. This form requires the signature of both employee and his/her immediate supervisor to fulfill their respective responsibilities.

3. NEW HIRES:

In the case of a new employee, each department is responsible for issuing City property items upon appointment. All new hires will have a Property Checklist Form prepared and maintained in their department for the duration of the service. The new employee shall acknowledge receipt of specific property items (provide manufacturer name/style/serial numbers) listed by signing off on the appropriate box on the form. The Property Checklist Form requires the initials of both the new employee and his/her supervisor and notation of the date that the property item was issued. The supervisors are responsible to safeguard the original Property Checklist Form in a secured location with access to the form restricted to the Department Director or his/her designee. A copy of the Form may be given to the employee to maintain for his/her records.

4. TRANSFERS/PROMOTIONS:

Whenever a City employee changes work location or assignment, the supervisor shall review the Property Checklist Form with the employee to determine whether changes, additions, deletions of property items should be made to the form. When an employee transfers from one City department to another, this procedure shall take place upon departure from the old department with the existing property checklist being sent to the new department to renew process. The transferring employee will have a Property Checklist Form maintained in the new department for the duration of his/her service.

5. SEPARATIONS FROM CITY SERVICE:

With a terminating or separating employee, the Property Checklist Form shall be completed by the last day of his/her employment with the City, at the latest. Departments must complete the exit procedure soon after the employee gives notice of resignation and can return all City property issued. Supervisors must carefully compare the returned item with the descriptive information on the form. Supervisors must document items that are lost with a course of action for recovery of such items. The completed Property Checklist Form and the employee badge for each terminating or separating employee shall be submitted to the Human Resources Department for inclusion in the employee's personnel file. Other items should be retained or disposed of by the employee's department.

6. NETWORK AND FUNDS:

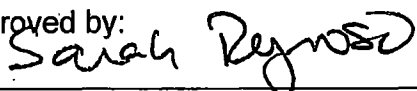

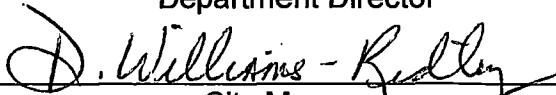

- a. All computer files are the property of the City of Berkeley. Supervisors are responsible for determining the appropriate level of access required for each employee and for requesting authorization for that employee through Information Technology (with a copy to the department director). To provide timely access to email and FUNDS for new hires, the supervisor should request new employee access as soon as the appointment date is confirmed.
- b. Information Technology will authorize access to a specific module through the module leader and notify the supervisor and Department Director of approval. If access is

denied, the module leader will advise the supervisor and Department Director with the reason.

- c. Supervisors must maintain a record of access and authorizations given to an employee and ensure that this access is discontinued at termination (or transfer if appropriate). To facilitate the issuance and cancellation of computer access and authorization the attached Property Checklist contains a section that permits the supervisor to list all computer access codes and system authorizations.
- d. Supervisors must notify the Manager of Information Technology, (copy the Department Director) to cancel or modify access and/or authorizations for the terminated or transferring employee by e-mail, or other means. This notification should include the supervisor's phone number, the terminated/transferring employee's user identification, first and last name, and the effective date for making the change.
- e. Please refer to Administrative Regulation 1.64 Electronic Mail for further procedures and regulations pertaining to the City's electronic mail system. (Reminder: Information Technology will delete the terminating employee's electronic mail and files contained in the I-drive unless requested to save the files to another I-drive by the Department Director.)

7. DEPARTMENT DIRECTORS:

The same procedures shall apply to Department Directors, except that the City Manager or his/her designee will complete the final check out procedure. The departing Department Director shall make an appointment with the City Manager to facilitate this processing out procedure.

RESPONSIBLE DEPARTMENT: Human Resources	Approved by:  Department Director

PURPOSE

The purpose of this regulation is to establish and specify policy on vehicle transportation for officials and employees in the conduct of official business. All vehicles operated by the City of Berkeley or its agencies are subject to this administrative regulation and should be read in conjunction with A.R. 7.2 “Use of Carshare and Privately-Owned Vehicles”, and A.R. 7.6 “Making Travel Choices for Work-Related Trips.

POLICY

Vehicles shall only be used for official business. City of Berkeley fleet vehicles and privately-owned vehicles, including carshare shall be operated in accordance with all safety and legal requirements of the City of Berkeley, Alameda County, the State of California, and any other jurisdiction in which they are operated. All employees subject to this administrative regulation must be in possession of a valid California Driver License.

DEFINITION OF VARIOUS VEHICLE TYPES

For the purpose of this regulation, **City Fleet Vehicles** are defined as all of the following vehicle types, licensed to operate on public roads in the State of California:

- A. **Emergency Vehicle** -- Vehicles used in the Public Safety Department (Police, Fire, etc.) and as defined by the California Motor Vehicle Code, Section 165.
- B. **Fleet Vehicle** -- Any non-emergency vehicle including passenger sedan, van, pick-up truck, SUV, or station wagon. Some of these vehicles are assigned to individual departments (fleet sedans) and others are pooled for use by all departments (pool car).
- C. **Carshare vehicle** – See A.R. 7.2.
- D. **Maintenance Vehicle** -- Trucks and equipment used to maintain public property, right-of-way, etc.

GENERAL INSTRUCTIONSA. **Introduction**

All automotive, heavy duty and maintenance equipment operated by the City is under the general authority of the Equipment Maintenance Division of the Public Works Department. All use of assigned vehicles is to be routinely supervised and monitored by the department to which the vehicle is assigned. Certain assigned vehicles are intended for use by specific persons because of their duties; however, those vehicles should be utilized by others whenever possible. Many departments have a constant and continuing need for the use of fleet vehicles and a number of vehicles are assigned to them.

B. **Criteria for Use of Fleet Vehicle or Private Auto**

To decide whether an individual should be assigned to use a fleet vehicle or receive an auto

reimbursement for use of their own vehicle, the following criteria should be used:

1. If the nature of the City assignment is such that it could be significantly damaging to a vehicle, a fleet vehicle should be used; or
2. If the City assignment demands the use of a vehicle for long periods of time with high mileage, a person should be authorized to use the City Fleet Carshare program, or be assigned a fleet vehicle; or
3. If the use is such that a vehicle will be utilized for extended periods of time with relatively low mileage (less than 1,000 miles annually), a person should be authorized to use the City Fleet Carshare program, or refer to A.R. 7.2 Use of Carshare and Privately-Owned Vehicles.

C. Accessibility of Vehicle Assigned to Department or Individuals

Any vehicle assigned to departments or to individuals shall be made available for use by other authorized fleet vehicle users if the department does not require its use or individual to whom it is assigned. A depository of keys for vehicles assigned to departments and not in constant use shall be kept with the designated department contact.

D. Vehicle Operator Responsibilities

Vehicle operators using City Fleet Vehicles are responsible for the following:

1. Prompt adherence to Preventive Maintenance (PM) schedules.
2. Maintaining proper tire and fluid levels at all times.
3. Keeping the vehicle clean and litter free.
4. Reporting an unsafe vehicle and bringing it in for a safety check.

E. Pool Vehicles

A variety of Fleet Pool Vehicles are available for use by departments that do not have assigned vehicles or that have need of additional vehicles for temporary use. Vehicles are available on a first-come first-serve basis, and individual departments will be billed accordingly. Fleet vehicles that have not been assigned to departments or individuals on a monthly basis shall be used as general City Pool Vehicles.

Department Directors are responsible for enforcing this policy.

PERMISSION TO DRIVE A CITY FLEET VEHICLE

Before any City employee will be permitted to drive a fleet vehicle a "Permission to Drive City Fleet Vehicle" form (Appendix 1) must be approved by their Department Director. (For information on clearance to use a Carshare vehicle, see A.R. 7.2). Additionally, the employee must sign and submit the California Department of Motor Vehicle (DMV) Employee Pull Notice (EPN) form, DMV INF 1101, titled "Authorization for Release of Driver Record Information". A copy of the current DMV INF 1101 form or EPN is found in Appendix 6 and

is required for all employees authorized to drive City Fleet Vehicles.

Upon receipt of the approved forms, the Senior Equipment Maintenance Supervisor will set up a driver's orientation appointment for the applicant. The Equipment Superintendent or his/her delegate will conduct the driver's orientation that includes an explanation of policies and procedures while driving a fleet vehicle, and will test the on-road driving skills of the applicant. No orientation will be administered without a copy of the original approved form signed by their Department Director, and a satisfactory driving record verified through a valid EPN from the DMV. Each department is responsible for making sure that their drivers are complying, and shall provide written documentation that the notice has been checked and that the employee has a satisfactory record. The permission to drive a City vehicle will be re-evaluated annually by Department Directors or designated staff based on review of employee's driving records.

The Equipment Maintenance Division approves or rejects a person to drive a fleet vehicle upon completion of the fleet vehicle orientation. The original signed copy, kept on file by the Equipment Maintenance Division, will be its authorization to issue or refuse the applicant clearance to operate a fleet vehicle. The applicant shall send approved copies of the completed form to their department and to the Human Resources Department.

A. Review and Approval of Driver Training Program

Each department and/or division shall prepare a training program approved by the City's Occupational Health & Safety Officer. A comprehensive training program includes all aspects of vehicle/equipment operation, skills for safe driving or operating equipment, and the responsibility of the driver/operator. Training shall include A.R. 2.14 Use of Cell Phone Policy and all other material related to safe operation.

B. Administration of Driver Training Program

Before any City employee will be permitted to drive or operate any emergency or maintenance vehicle or maintenance equipment, the department/division to which he/she is assigned shall administer and document a driver/operation training program that adequately prepares him/her for the assigned vehicle or equipment. Evidence of training must be maintained in the City's training system and/or the employee's personnel file.

C. Permission to Drive

The "Permission to Drive" form with attachments will be kept on file with the user department, Equipment Maintenance who will send a copy to the Human Resources Department for the employee's file.

PROCEDURE FOR CHECKING OUT A POOL CAR

A. Permission to Drive a Fleet Sedan, Station Wagon, or Van Form

An employee wishing to check out a fleet sedan from the fleet vehicle pool must have a "Permission to Drive City Vehicle" form on file with the Public Works Department Equipment Maintenance Division.

B. Requesting a Pool Vehicle

To request a pool car, the employee's supervisor needs to send a request to PWfleet@ci.berkeley.ca.us or by calling the Mechanic Supervisor at (510) 981-6468. The e-mail will be kept by Public Works as evidence of approval and is subject to audit. Include the following information in your request:

1. Name of Employee,
2. Department/Division or Budget Code,
3. Reason for use, and
4. Date, Time, and Hour(s) or Day(s) needed.

Pool cars can be picked up at the Corporation Yard, 1326 Allston Way, in the Equipment Maintenance building.

C. Area of Use

Pool cars are normally used within the East Bay, San Francisco area. If any use outside these limits is contemplated, the Equipment Maintenance Supervisor must be advised 24 hours prior to the anticipated checkout time.

D. Hours of Use

Pool cars are only to be used during normal working hours (6:00 a.m. to 6:00 p.m.) Monday through Friday except holidays. Any deviations from this must be authorized as stated in Section G.

E. Use of Vehicle During Other Than Normal Hours

If a pool car is to be used overnight, on holidays, or weekends on City business, in compliance with this A.R., the "Request to Use City Vehicle at Night, on Holidays, or Weekends on City Business" form shall be submitted to the Equipment Maintenance Supervisor at the time the vehicle is requested.

F. Returning the Vehicle

Upon returning the vehicle, the employee will return the keys to the Equipment Maintenance Supervisor, confirming that the vehicle has been returned to the Corporation Yard, parked properly and checked back into the pool fleet. When returning a pool vehicle after business hours, lock vehicle up and place keys in the green "Key Drop Box" located to the right of the main entrance of the Equipment Maintenance Shop. The total time of usage will automatically be calculated by the fleet management system. Note that charges will continue if the keys are not returned to the Equipment Maintenance Supervisor.

G. Use of Private Vehicle When No Fleet Vehicles are Available

If a request is made to use a pool vehicle and there are none available, the employee should attempt to use a Carshare vehicle. If the employee is not able to use a Carshare vehicle, and the urgency is such that the employee must use his/her own car, the employee must refer to A.R. 7.2 Use of Carshare and Privately-Owned Vehicles.

H. Notification of Procedural Violations

The Public Works Department will notify the user department of any violations of these procedures.

INSTRUCTIONS FOR USE OF CITY VEHICLES

It is important that City employees exercise good judgment in using City vehicles, otherwise the advantages of a reasonable control policy may be lost because of the indiscretions of a few. City vehicles are provided not as a personal right, but for providing service to the public. Every possible means should be taken by every employee operating a vehicle to assure that its use is in the best interests of the community.

A. Valid California Driver's License

All drivers must have a driver's license, which is valid in the State of California and which is appropriate for the class of vehicle driven.

B. Safe and Courteous Operation

All drivers shall operate City vehicles in a manner that reflects concern for safety and courtesy towards the public. No cell phones may be used while operating a vehicle on City business. Please refer to A.R. 2.14 Cell Phone Use Policy for more detailed information.

C. Prohibited Use of Fleet Vehicles

City vehicles shall not be used to:

1. Conduct personal business
2. Transport members of the family, e.g. transporting children to and from school, family shopping or for pleasure.
3. Transport employees to lunch except in cases where City business is to be considered.
4. *Exceptions to these rules must have written authorization from the Public Works Director.*

D. Use of City Vehicles by Persons Engaged in City Business Only

Except in unusual circumstances, and with the approval of the department, only those persons engaged in City business or travel, necessary to the conduct of City business, shall be transported in City vehicles. This serves to prohibit gratuitous rides to and from the place of employment.

E. Posters or Stickers on City Vehicles

No posters, stickers or advertisements of any kind shall be placed upon City vehicles without prior approval of the City Manager.

F. Seat Belts

No person may drive or ride in a City vehicle unless properly restrained by the occupant restraint device. It shall be the driver's responsibility to ensure that the passengers use the available restraint devices.

G. Smoking Prohibited

In accordance with state and local ordinances, smoking is prohibited inside City vehicles.

H. Fuel and Oil

Every city vehicle is issued a fleet fuel key for use at the Corporation Yard or Transfer Station fuel pumps. All unleaded gasoline, diesel fuel and oil will be obtained from the Equipment Maintenance Division at the Corporation Yard located at 1326 Allston Way. Unleaded gasoline and diesel fuel is available 24 hours a day, 7 days a week at the Corporation Yard.

Only diesel fuel is available at the Transfer Station location (1201 Second Street), during the hours of 6:00am to 5:00pm Monday thru Friday and 6:00am to 2:30pm on Saturdays.

No reimbursement will be made to the employees for the purpose of petroleum products from outside sources unless there is a valid reason for doing so. In cases where an outside purchase is necessary, it will be made with a City fuel card, which is obtained through the Equipment Maintenance Division.

Fuel cards can also be issued to employees scheduled to travel over 100 miles in a City vehicle. Return the fuel card to the Equipment Maintenance Superintendent along with any receipts. These cards can only be used to fill your vehicle with fuel. Food purchases are not allowed!

I. Maintenance

All fleet vehicles will be scheduled for preventive maintenance by the Equipment Maintenance Division. Your department contact person will be notified two weeks in advance for upcoming vehicle scheduled maintenance. Appointments arranged with the departments' contact person are scheduled to minimize inconvenience to the departments.

Vehicle operators will be notified directly by the Equipment Maintenance supervisor or by their department vehicle coordinator when a vehicle's servicing is completed. Normally, services are completed within 24 hours unless necessary repairs are reported by the operator and become part of the service, or our Equipment Maintenance staff discovers additional repairs.

J. Vehicle Wash

City vehicles that need cleaning must go to the Berkeley Touchless Carwash, (corner of Kittredge & Oxford), and ask for the basic carwash service for their City of Berkeley vehicle.

K. Ensuring Safe Operating Condition of City Fleet Vehicle

Operators of all City-owned vehicles are responsible for checking that the vehicle is in safe operating condition. Lights, fluid levels, windshield wipers, tires, horns and other functions displayed on the vehicles' dash warning indicators should all be checked prior to vehicle use and at the end of each work day. Any deficiencies or safety related items should be reported immediately to your supervisor and the Equipment Maintenance Supervisor. If Equipment Maintenance finds the deficiencies present an unsafe condition, they will place the vehicle "OUT OF SERVICE" until Equipment Maintenance determines the vehicle is safe and operational.

L. Traffic and Parking Laws

All traffic and parking laws are to be obeyed. Posted speed limits are not to be exceeded, nor is the vehicle to be operated above safe driving speeds for road conditions. All violations and fines incurred shall be the responsibility of the driver involved.

M. Locking Vehicles

The driver of a City vehicle shall take every precaution to ensure the safety of the vehicle and its contents. The driver shall lock the vehicle and take the keys, except in those instances when a commercial parking garage requires the keys be left with the vehicle.

N. Efficient and Economical Trips

Whenever possible, trips should be planned to coincide with other employee travel requirements so that vehicles are used efficiently and economically.

O. No Idling

1. No vehicle or engines subject to this regulation may idle for more than 5 consecutive minutes.
2. The idling limit does not apply to:
 - a. idling when in line,
 - b. idling to verify that the vehicle is in safe operating condition,
 - c. idling for testing, servicing, repairing or diagnostic purposes,
 - d. idling necessary to accomplish work for which the vehicle was designed (such as operating a crane),
 - e. idling necessary to ensure safe operation of the vehicle.
 - f. Emergency Vehicles

P. Disciplinary Action

Willful disregard of these rules is just cause for disciplinary action.

ACCIDENTS**A. Procedure in Case of an Accident**

In case of an accident, follow these rules no matter how slight the damage is:

1. Immediately call the local Police Department (981-5900) and request a police officer to come to the scene of the accident. In case of injury to vehicle occupants or any pedestrians, call 911 immediately.
2. Telephone the Equipment Maintenance Shop (510) 981-6468 or (510) 981-6620 after hours (3:30 pm to 7:00 am M-F, Saturdays, Sundays) to report a City vehicle has been involved in an accident.
3. Do not move either vehicle. If the owner of the other vehicle insists upon moving his/her car, mark the pavement to show the location of his/her car. If you must move your vehicle to permit heavy traffic to pass, mark its location also.
4. Keep all parties in the accident there, if possible. Get the name and address of the other driver, his/her operator's license number, the make and license of the other vehicle, and, if it is different than that of the other driver, the license number of the vehicles

registered owner.

B. Use of the "Accident Procedures" Form (Appendix 4)

If the Police do not respond and/or any of the parties' witnesses involved in the accident cannot remain at the scene, record all pertinent information on the "Accident Procedures" form located in the glove box of the vehicle. Extra copies of this form are available Equipment Maintenance Division.

C. Insurance Information

If possible, get the names of the insurance carrier of the other driver.

D. Procedure if the Police Do Not Arrive

If you are in Berkeley and a police officer does not come within 20 minutes, call your Supervisor who will contact the Police Captain or Lieutenant.

E. Accident Report

Submit a copy of the vehicle accident report to your supervisor, based upon the data recorded on the "Accident Procedures" form or other sources.

F. Prohibition on Discussion of Accident

DO NOT DISCUSS DETAILS OF THE ACCIDENT WITH ANYONE EXCEPT MEMBERS OF THE POLICE DEPARTMENT OR CITY DEPARTMENTAL REPRESENTATIVES.

EMERGENCY ROAD SERVICE FOR CITY VEHICLES

A. During Hours When Mechanic is on Duty

The Equipment Maintenance Division has mechanics on duty from 7:00 am to 3:30 pm Monday thru Friday at the City Corporation Yard and from 7:00 am to 9:30 pm at the Transfer Station Equipment shop. During these hours, call the Equipment Maintenance Shop (510) 981-6468 or Transfer Station Shop 981-6375 should be called to deal with any emergency road service or equipment breakdowns.

B. During Hours When No Mechanic is on Duty

Between the hours of 9:30 pm and 7:00 am weekdays or on weekends and official City holidays, there is no mechanic on duty at the Corporation yard or Transfer Station maintenance shops. During these hours call (510) 981-6620 for an operator to help direct your call.

C. Area of Service

Emergency Service is available within a ten-mile radius of the City of Berkeley, extending to Richmond and San Pablo on the north and San Leandro on the south. It is a good policy to have the spare tire checked and see if there is a jack in the vehicle before leaving Berkeley.

D. Emergency Service Outside of the Bay Area

In case of major breakdown or accident while out of town, the vehicle should be towed to

the nearest garage and Equipment Maintenance contacted by telephone. Do not authorize any repairs to be made without prior discussion with the Equipment Maintenance at (510) 981-6468 or (510) 981-6620 after hours.

PARKING OF FLEET VEHICLES ON PUBLIC STREETS

A. Parking Violations

Except for police vehicles, ambulances, fire apparatus and other fleet vehicles when on call of an emergency nature, operators of all vehicles (both City-owned and private) are subject to the same parking regulations as any other vehicle using the public streets and City-owned off-street parking lots.

These vehicles are subject to citations when parked in violation of parking laws and regulation, even under unusual circumstances except as provided by BMC 14.08.060. Exemptions of payment of parking fines will be made only upon individual review by the City Manager as set forth in the City's MOUs. City fleet vehicles may not park in the restricted Downtown Zone as regulated by A.R. 7.3.

B. Parking Expenses

Expenses incurred by City employees while engaged in the actual performance of City duties may be reimbursed. Employees must complete a Statement of Expense and submit to their individual department.

PARKING FLEET VEHICLES OVERNIGHT

After regular business hours, all City vehicles that do not have prior approval by the City Manager for use by employees between home and work, must park in the parking area designated by their Department Director. Annually, departments will send updated assigned parking areas for their City vehicles to the Equipment Maintenance Division.

Periodic surprise checks may be conducted to account for vehicles. If a vehicle is not parked in its designated area during this check, and a policy violation has occurred, disciplinary actions will be enforced against the responsible employee.

USE OF FLEET VEHICLES BETWEEN HOME AND WORK

1. Criteria for Allowing Use of Fleet Vehicles Between Home and Work

No City vehicle shall be used regularly for transportation to and from work unless:

1. Approved by the City Manager and Department Director; and
2. The employee who requests such use needs it for:
 - a. The safety and emergency needs of the community, and
 - b. The use of own private vehicle by employee would not meet the needs of the City and community as well as a fleet vehicle.

3. Such use is part of an agreement with a bargaining unit.

Permission to use a City-owned vehicle is reviewable and revocable at any time by the City Manager.

B. Listing of Authorized Employees

The Equipment Superintendent will maintain a current list of employees authorized to use City owned vehicles between home and work. Department Directors annually will notify the Equipment Maintenance Superintendent of the names and positions of employees approved to use a City vehicle between home and work. In addition, changes shall be reported as they occur.

C. Procedures for Use between Home and Work

Employee must have an approved "Permission to Drive City Vehicle" (A.R. 7.1 Appendix 1) form on file in Public Works Equipment Maintenance Division and a copy on file with the originating department and Human Resources Department.

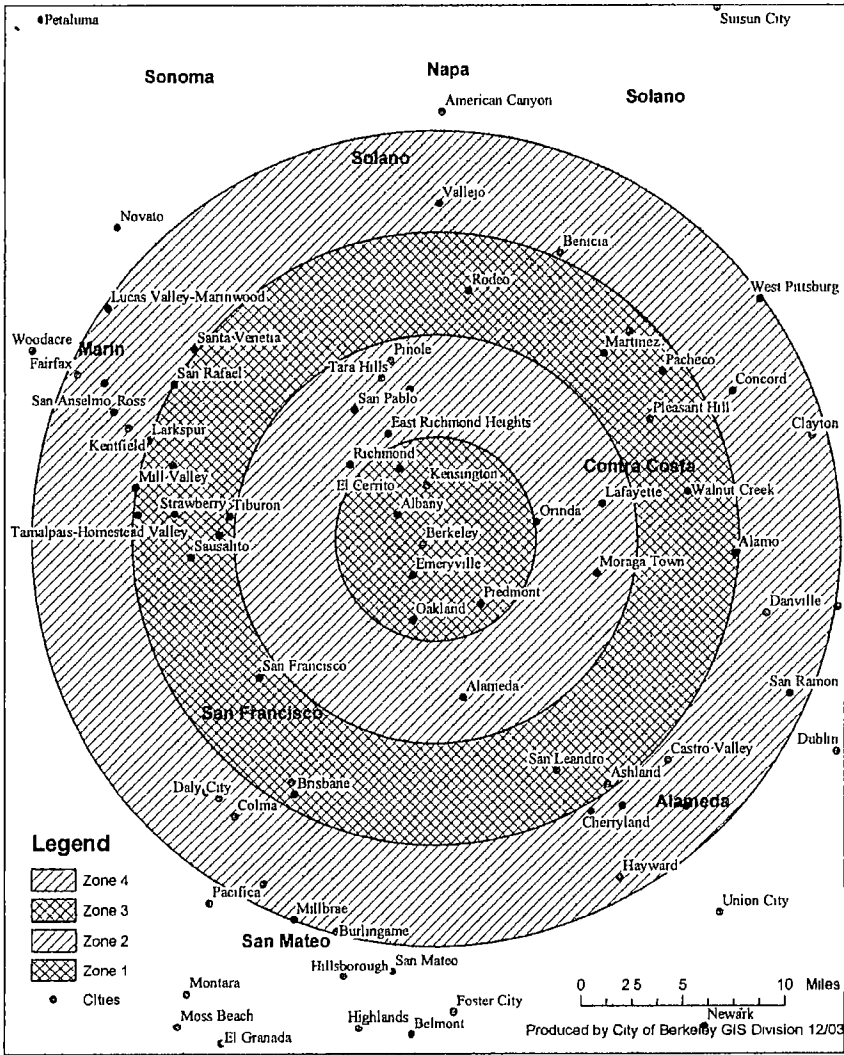

1. A request for use of City vehicles between home and work should be submitted to the City Manager on a "Request for Use of City-Owned Vehicle between Home and Work" form with appropriate backup documentation (A.R. 7.1 Appendix 5). If approved, copies will be sent to the Auditor, Equipment Maintenance and the originating department.
2. The department will notify the City Manager's Office of any changes in the address of an employee assigned to take a vehicle home, any termination of such use, or any new employee assigned to a position authorized to take a vehicle home by submitting a revised "Request for Use of City-Owned Passenger Vehicle Between Home and Work" form.
3. All City employees who are authorized to utilize City vehicles routinely between home and work must reimburse the City for normal commute costs.

The attached reimbursement zone map* shows a series of concentric circles, each drawn in five-mile increments from Civic Center. Each five-mile increment represents a zone, and employees will reimburse the City for use of a fleet vehicle driven between home and work depending on the zone in which they live as follows:

	<u>Distance from City Hall</u>	<u>Charge per Month</u>
Zone 1	0 to 5 miles	\$58.00
Zone 2	over 5 to 10 miles	\$116.00
Zone 3	over 10 to 15 miles	\$174.00
Zone 4	over 15 to 20 miles	\$232.00
Outside of Zone 4	over 20 miles	\$290.00

**The actual driving distance/Zone between civic center and the employee's residence will be verified using an internet mapping service, e.g. Yahoo or Mapquest.*

Reimbursement Zone Map

4. Payment will be made through a deduction from the employee's payroll (a payroll deduction with the approved request must be sent to the Auditor's Office), except in the case of employees whose departmental positions require them to take a vehicle home.

Departments having positions that the City Manager determines require the employee to take a vehicle home must pay the reimbursement from departmental funds. This reimbursement must be paid directly to the Equipment Maintenance Division. Employees with take home vehicles must pay income tax on the value of the take home use. Annually, in December, these employees submit their business and personal mileage records for the year to the Auditor's Office. The additional taxable income is then added to their salary (W-2) records, and any additional tax is calculated and withheld from their final paycheck of the year.

5. If the employee starts a usage of a City fleet vehicle prior to and including the 15th of the month, he/she will be charged for the full month. If he/she starts after the 15th of the month he/she will not be charged until the following month. The same formula will be used for terminating usage. No allowances will be made for sick leave or vacation.
6. Off-street parking (preferable covered), whenever possible should be provided and the vehicle parked off the street at all times when at a place of residence.
7. The vehicle must be turned into the Equipment Maintenance Division or temporarily reassigned to the acting replacement if the employee who is authorized to use the vehicle is absent on leave for a period in excess of three consecutive days. In case of illness and inability to turn the car in, the Equipment Maintenance Division is to be notified immediately.
8. Each employee is expected to exercise the same care with the City vehicle as he/she does with his/her personal car.
9. The vehicle is not personally assigned to the employee. Vehicle assignments may change and all vehicles will continue to be available for other purposes when not being used by the specific employee or department to which they are assigned.
10. Included in the reimbursement rate is an amount adequate to pay for liability insurance or those times when the employee is not on City business.

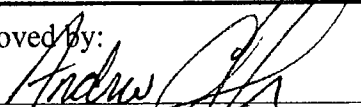

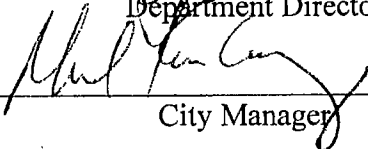

OCCASIONAL USE OF A CITY VEHICLE AT NIGHT, HOLIDAYS OR WEEKENDS

A. Use of Vehicle

Employees not already regularly assigned a City vehicle for use between home and work who are not receiving an auto allowance may arrange to use a fleet vehicle (pool car) at night, holidays, or on weekends for City business. An employee may drive it home and return it on the morning of the next workday, if the circumstances are such that the best interest of the City will be served by such action.

B. Procedure for Obtaining a Vehicle

Requests for use of a pool car must be made on the "Request to Use City Vehicle at Night, Holiday or Weekends" form, approved by the Department Director and Assistant City Manager and sent in advance to the Public Works Equipment Maintenance Division (Appendix 3). The assignment of a pool vehicle under these circumstances will be on the basis of individual review of the situation and subject to the availability of a vehicle. If there are vehicles available within the department for such use and the Department Director gives his/her approval, these vehicles may be used after the request is approved.

RESPONSIBLE DEPARTMENT: Public Works	Approved by:  _____ Department Director
TO BE REVISED: Every year	 _____ City Manager

APPENDICES:

APPENDIX 1: PERMISSION TO DRIVE CITY FLEET VEHICLE

In compliance with Administrative Regulation 7.1, permission to drive a City-owned fleet sedan, station wagon, sports utility vehicle or van on City business for the following reasons: (Explain in detail)

.....
.....
.....

If this request is granted, I understand and agree to the following conditions:

- 1. I (do, do not) have authorization for an auto allowance.
- 2. I have read Administrative Regulation 7.1 and I will comply with the rules and regulations regarding the use of City vehicles.
- 3. I understand that department assigned cars will be used before drawing from the fleet pool.
- 4. I understand that I must have the appropriate class Drivers License to operate a van that seats ten (10) or more persons.

APPROVED _____ DATE _____
Employee's Supervisor

APPROVED _____ DATE _____
Department Director

Send one copy to the employee's file in Human Resources, one copy to Equipment Maintenance and one to the Employee's department.

APPENDIX 4: ACCIDENT PROCEDURES

If you have an accident or damage to the vehicle occurs, follow these rules no matter how slight the damages may appear.

1. Call Equipment Maintenance, (510) 981-6468 or (510) 981-6620 after hours (3:30 pm to 7:00 am M-F, Saturdays, Sundays). You must also call the Berkeley Police Department (510) 981-5911. Request an officer to the scene of the accident. A police report is mandatory.
2. Either Equipment Maintenance or the Police must take pictures of the damage. Ask for the Police photographer if Equipment Maintenance is unable to respond.
3. If at all possible, keep all drivers and witnesses at the scene, make sure you obtain license plate numbers, names, addresses, etc., of both the City vehicle and the other vehicle.
4. If there is no Police response, phone your supervisor within 20 minutes.
5. Report the accident to your supervisor immediately upon completion of the necessary police work. You may phone collect if necessary.
6. If there is damage to the property, make sure you get all details, e.g., name, address, description and picture of damage, etc.
7. Do not discuss details of the accident with anyone except the Police or authorized City representatives.
8. If you need a tow or other mechanic service, phone Equipment Maintenance (510) 981-6468 or after hours (510) 981-6620 (3:30 pm to 7:00 am M-F, Saturdays, Sundays). If there is no response, phone Husted's Garage (510) 843-2402. Heavy equipment (large trucks) should phone Equipment Maintenance or Berry Brothers (510) 465-7215.

Description of Damage (Other: Auto or Property)

A copy of these procedures is in every City vehicle. After an accident, the copies of the completed form must be submitted to your supervisor and to Equipment Maintenance.

APPENDIX 5: REQUEST FOR USE OF CITY-OWNED VEHICLE BETWEEN HOME AND WORK

I hereby request permission to use a City-owned vehicle for transportation between my residence and the place of my employment. This request is made on the basis of convenience to the City and to permit the more effective performance of my job for the following reasons: (Explain in detail -- use the reverse side if necessary).

If this request is granted, I understand and agree to the following conditions:

- 1. Off-street parking is available or will be provided and the vehicle will not be parked on the street when driven home.
- 2. City vehicles shall **NOT be used for**:
 - a. Transportation of employees to lunch where reasonable alternatives are available, except in cases where City business is to be considered.
 - b. **Personal convenience such as transporting members of the family** shopping, etc. However, it is not unreasonable for an employee to attend to personal matters while driving a City-owned car to or from work if this does not involve additional mileage and does not create an unfavorable impression.
 - c. Any use which would subject the City to valid criticism.
- 3. I have already been approved to drive a City vehicle.
- 4. I agree to comply with the regulation regarding the use of City vehicles.

My residence is:
 No. and Street: _____ Employee _____
 City: _____ Position Classification: _____
 Telephone No.: _____ Department: _____

My residence is in zone _____ and I will pay \$ _____ per month for use of a fleet vehicle between my home and work.

Note: Employee must go to Auditor with approved copy and submit a payroll deduction prior to taking the vehicle home.

Approval: _____ Date: _____
Department Director

Approved: _____ Date: _____
City Manager

Employee must submit completed copies to the Auditor, to the Public Works Equipment Superintendent, to the requesting department, and to the authorized employee.

APPENDIX 6: DMV INF 1101 – EMPLOYEE PULL NOTICE

EMPLOYER PULL NOTICE PROGRAM
AUTHORIZATION FOR
RELEASE OF DRIVER RECORD INFORMATION

I, _____, California Driver License Number, _____
hereby authorize the California Department of Motor Vehicles (DMV) to disclose or otherwise make available, my driving
record, to my employer, _____

COMPANY NAME

I understand that my employer may enroll me in the Employer Pull Notice (EPN) program to receive a driver record report at
least once every twelve (12) months or when any subsequent conviction, failure to appear, accident, driver's license suspension,
revocation, or any other action is taken against my driving privilege during my employment.

I am not driving in a capacity that requires mandatory enrollment in the EPN program pursuant to California Vehicle Code
(CVC) Section 1808.1(k). I understand that enrollment in the EPN program is in an effort to promote driver safety, and that my
driver license report will be released to my employer to determine my eligibility as a licensed driver for my employment.

EXECUTED AT CITY COUNTY STATE

DATE SIGNATURE OF EMPLOYEE
X

I, _____, of _____,
AUTHORIZED REPRESENTATIVE COMPANY NAME

do hereby certify under penalty of perjury under the laws in the State of California, that I am an authorized representative of
this company, that the information entered on this document is true and correct, to the best of my knowledge and that I am
requesting driver record information on the above individual to verify the information as provided by said individual. This
record is to be used by this employer in the normal course of business and as a legitimate business need to verify information
relating to a driving position not mandated pursuant to CVC Section 1808.1. The information received will not be used for any
unlawful purpose. I understand that if I have provided false information, I may be subject to prosecution for perjury (Penal
Code Section 118) and false representation (CVC Section 1808.45). These are punishable by a fine not exceeding five
thousand dollars (\$5,000) or by imprisonment in the county jail not exceeding one year, or both fine and imprisonment. I
understand and acknowledge that any failure to maintain confidentiality is both civilly and criminally punishable pursuant to
CVC Sections 1808.45 and 1808.46.

PROPOSALS WILL NOT BE OPENED AND READ PUBLICLY

Dear Proposer:

The City of Berkeley is soliciting written proposals from qualified firms or individuals to work with the City of Berkeley to establish and operate the Specialized Care Unit (SCU), a 24/7 behavioral health crisis response team. This team will respond to individuals in Berkeley who are experiencing a behavioral health crisis without the assistance of law enforcement. As a Request for Proposal (RFP) this is not an invitation to bid and although price is very important, other factors will be taken into consideration.

The project scope, content of proposal, and vendor selection process are summarized in the RFP (attached). **Proposals must be received no later than 2:00 p.m., on Tuesday, August 23, 2022**. Proposals are to be sent via email with the “**Specialized Care Unit Provider**” and **Specification No. 22-11533-C** clearly indicated in the subject line of the email. Please submit one (1) PDF of the technical proposal. Corresponding pricing proposal shall be submitted as a separate document.

Email Proposals to:

City of Berkeley
Finance Department/General Services Division
purchasing@cityofberkeley.info

Proposals will not be accepted after the date and time stated above. Incomplete proposal or proposals that do not conform to the requirements specified herein will not be considered. Issuance of the RFP does not obligate the City to award a contract, nor is the City liable for any costs incurred by the proposer in the preparation and submittal of proposals for the subject work. The City retains the right to award all or parts of this contract to several bidders, to not select any bidders, and/or to re-solicit proposals. The act of submitting a proposal is a declaration that the proposer has read the RFP and understands all the requirements and conditions.

For questions concerning the anticipated work, or scope of the project, please **contact Katherine “Katie” Hawn, Senior Management Analyst**, via email at khawn@cityofberkeley.info no later than **Wednesday, August 16, 2022**. **There will be a non-mandatory Bidder’s Conference on Monday, July 18 from 1-2 p.m. which will be recorded and available for vendors.** Answers to questions will **not** be provided by telephone or email. Answers to all questions or any addenda will be **posted** on the City of Berkeley’s site at [Bid & Proposal Opportunities | City of Berkeley \(berkeleyca.gov\)](http://Bid & Proposal Opportunities | City of Berkeley (berkeleyca.gov)), by clicking ‘additional files’. It is the vendor’s responsibility to check this site. For general questions concerning the submittal process, contact purchasing at 510-981-7320.

We look forward to receiving and reviewing your proposal.

Sincerely,

Darryl Sweet
General Services Manager

2180 Milvia Street, Berkeley, CA 94704 Tel: 510.981.7320 TDD: 510.981.6903

E-mail: purchasing@cityofberkeley.info Website: cityofberkeley.info/finance/

I. BACKGROUND

In response to the killing of George Floyd by Minneapolis police in May 2020 and the ensuing protests across the nation, a conversation emerged about how policing can be done differently. The Berkeley City Council initiated a wide-reaching process to reimagine safety in the City of Berkeley (the "City"). As part of the Re-Imagining Public Safety process, the City has been engaged in research and planning for a Specialized Care Unit (SCU) that will ultimately become a 24/7 mobile unit designed to respond to and support people who are experiencing a mental health or substance use crisis without direct involvement of the police. The SCU will be different than the City's current mobile crisis response that is a police/mental health partnership.

To facilitate a successful design of the Specialized Care Unit that is specific to the needs of the City of Berkeley, the City contracted with Resource Development Associates (RDA) to conduct a feasibility study for a Specialized Care Unit (SCU). This study culminated in three reports created by RDA to assist in creating the SCU:

1. Crisis Models Summary Report which provides an overview of crisis response programs in the U.S. and internationally. See *Attachment 1* for full report.
2. Mental Health Crisis Response and Stakeholder Perspectives Report to provide current perspectives across the City of Berkeley and Alameda County agencies, local community-based organizations (CBOs), community leaders, and utilizers of Berkeley's crisis response systems. See *Attachment 2* for full report.
3. Final Recommendations for the SCU which provides twenty-five recommendations for implementation of the SCU in Berkeley based on the information in the previous reports. See *Attachment 3* for full report.

Additionally, the SCU Steering Committee, consisting of representatives from the Health, Housing, and Community Services Department, the Berkeley Fire Department, appointees of the Mental Health Commission, and community representatives from the Berkeley Community Safety Coalition provided accompanying analysis to the RDA recommendations, provided in *Attachment 4*. With these reports, as well as under the leadership and guidance of the Mayor, City Council, SCU Steering Committee, and City staff, the City of Berkeley is ready to move forward with a qualified community-based organization to establish and implement the SCU for a pilot program of up to two years, with the intention to extend based on lessons learned and financial feasibility.

The purpose of this RFP is to solicit proposals from community-based organizations and service providers that have the expertise and ability to quickly meet the City's need to create a successful pilot program for the Specialized Care Unit in the City of Berkeley.

Through this RFP, the City intends to award federal American Rescue Plan Act (ARPA) State and Local Fiscal Recovery Funds (SLFRF). Additional California Department of Health Care Services (DHCS) funding may be awarded for appropriate expenses to create a successful response team which will serve a diverse community; including individuals from marginalized and vulnerable groups whose past experiences of substance use or other behavioral health challenges may have been caused or exacerbated by the public health emergency of COVID-19. Per the Substance Abuse and Mental Health Services Administration (SAMHSA), behavioral health crises refer to substance use and mental health crises. These implementation of ARPA SLFRF funds for Berkeley's Specialized Care Unit acknowledges that funds may be used to respond to increased rates of behavioral health at a population or individual level, as well as new behavioral health challenges or

exacerbation of challenges that existed prior to the pandemic, which also includes navigating new barriers to accessing treatment. The selected applicant will be required to comply with all applicable requirements for such funds and will be required to report to the City regularly on the use of funds and services beneficiaries.

II. SCOPE OF SERVICES

Applicants are strongly encouraged to read the reports described above and attached as *Attachments 1 to 3* as well as the SCU Steering Committee's comments to the final recommendations found in *Attachment 4* of this RFP. The City welcomes applications that address the need for establishing 24/7 behavioral health crisis response services consistent with the following criteria:

1. Applicants must be able to provide one or more of the services on the following list at a given time:
 - a. 24/7 call-taking for clients through a created crisis line **and** receive appropriate transferred calls from the City of Berkeley 911 Communications Center (Dispatch) and 988 crisis line once implemented;
 - b. Crisis and 5150 evaluation;
 - c. Peer support (from someone with lived experience);
 - d. First aid and non-emergency medical care;
 - e. Substance use;
 - f. Resource connection and warm handoffs, including transportation to services, facilities, or other supportive destinations.
2. Applicants may propose other activities that are consistent with the purpose and intent of the SCU.
3. Contracted provider must have experience as a service provider in Berkeley to build upon existing relationships with marginalized and vulnerable populations in our community. Crisis response services, specifically with de-escalation, trauma-informed, and harm reduction-oriented strategies is preferred.
4. Contracted providers must be able to demonstrate experience conducting services consistent with the SCU model including:
 - a. Crisis response and familiarity with privacy practices and laws including Health Insurance Portability and Accessibility Act, 42 CFR pt 2, CMIA, etc.;
 - b. Collaboration with local government first responder agencies as needed; and
 - c. Leverage county, state, and federal resources such as MediCal, MediCal Administrative Activity (MAA), or Federally Qualified Health Center (FQHC) sources for billing services provided. Note that billing is not necessary for purposes of the pilot, but will likely be necessary to sustain the program beyond the pilot phase.
5. Contracted provider should be able to mobilize quickly to engage in the implementation process, with a phased roll-out planned for as soon as December 2022.
6. Team members will be made up of people with a combination of lived experience, mental health and/or substance use training, and non-emergency medical training who have the skills and capacity to develop meaningful relationships as well as respond to marginalized and vulnerable community members.

7. Contracted provider will be required to work in partnership with the City, specifically maintaining close coordination with 911 Dispatch, Berkeley Fire Department, as well as the Health, Housing, and Community Services Department (HHCS) to ensure coordinated implementation of the SCU as staff are hired and systems established including:
 - a. equipment purchases;
 - b. confirming physical base location (must be able to quickly and reliably respond to any service location within Berkeley in 15 minutes);
 - i. Proposals should identify physical space needs and methodology for quick and reliable response.
 - c. participation on the SCU Steering Committee;
 - d. collaborate regarding communication and public outreach about the SCU program;
 - e. development of a coordinated crisis response system, including collaboration with primary stakeholders and related programs.
8. Contracted provider will also be required to work in partnership with other community agencies including community-based organizations and Alameda County partners to ensure consistent and comprehensive availability of services, and communicate service changes across community and government partners.
9. Contracted provider will provide comprehensive training to SCU staff upon establishment and continuation of the SCU program. Provider should shadow and train with other jurisdictions to maintain awareness of best practices in crisis response without the involvement of law enforcement.
10. Contracted provider will adhere to monitoring, evaluation and reporting standards required by the City of Berkeley by providing the following information on a routine basis:
 - a. Demographic information (e.g. age, sex, sexual orientation, gender identity, response zip code);
 - b. Type of intervention or referral provided (including if a call needed to be escalated to Berkeley Police Department or Berkeley Fire Department);
 - c. Call source (direct, referred from 911 or 988, etc.); and
 - d. Additional data points as identified in the implementation and evaluation processes.
11. The City intends to award federal American Rescue Plan Act (ARPA) State and Local Fiscal Recovery Funds (SLFRF) for these services. The selected provider must comply with all applicable federal requirements associated with these funds, including the Final Rule and the Uniform Guidance 2 CFR 200. This will include at a minimum, quarterly reports to the City on services provided, expenditures, and service beneficiaries.

III. SUBMISSION REQUIREMENTS

All proposals shall include the following information, organized as separate sections of the proposal. The proposal should be concise and to the point.

1. Contractor Identification:

Provide the name of the firm, the firm's principal place of business (see section VII, F. – Local Vendor Preference), the name and telephone number of the contact person and company tax identification number.

2. Client References:

Provide a minimum of *three (3)* client references. References should be California cities or other large public sector entities. Provide the designated person's name, title, organization, address, telephone number, and the project(s) that were completed under that client's direction.

3. Price Proposal:

The proposal shall include pricing for all services and should not exceed \$4.5M for a two-year pilot program. Pricing shall be inclusive of all operating costs, but does **not** need to include equipment purchases such as responder vehicle, cell phones, tablets, GPS, and radios. Pricing proposals shall be a separate document. The Proposal shall itemize all services, including hourly rates for all professional, technical and support personnel, and all other charges related to completion of the work shall be itemized, including indirect costs. Evaluation of price proposals are subject to the local vendor business preference (see section VII.F.). Vendors should use the budget format provided in *Attachment 5*.

Note:

It is the intention of the City of Berkeley to use and learn from this two-year pilot program to inform long-term implementation of the Specialized Care Unit (SCU). The estimated timeline of the pilot begins on the date the contract is executed and ends two years later. However, applicants should base their program, staffing, and other cost projections to include hiring, initial community outreach, and other program start-up activities. Applicants will not be penalized or scored lower for including these ramp-up activities in their timeline for service provision within the pilot program. Similarly, applicants will not be penalized if they need to shorten or extend the estimated 2-year timeline as part of their budget formulations.

4. Contract Terminations:

If your organization has had a contract terminated in the last five (5) years, describe such incident. Termination for default is defined as notice to stop performance due to the vendor's non-performance or poor performance and the issue of performance was either (a) not litigated due to inaction on the part of the vendor, or (b) litigated and such litigation determined that the vendor was in default.

Submit full details of the terms for default including the other party's name, address, and phone number. Present the vendor's position on the matter. The City will evaluate the facts and may, at its sole discretion, reject the proposal on the grounds of the past experience.

If the firm has not experienced any such termination for default or early termination in the past five (5) years, so indicate.

5. **Submission should include the following:**

- a. Project approach narrative and anticipated timeline for implementation (see Note in 3. Price Proposal)
- b. List of representative service projects
- c. Resumes of key staff
- d. Completed budget attachment (**Attachment 5**)

IV. SELECTION CRITERIA

The following criteria will be considered, although not exclusively, in determining which firm is hired.

- 1. Project Approach (incl. training, base location and response procedures, overall approach to SCU relative to attached documents) 30 points
- 2. Expertise & References (incl. relevant experience, expertise and relationships in Berkeley, key staff qualifications, capacity for managing federal funds, etc.) 20 points
- 3. Experience Serving Underserved Populations 20 points
- 4. Costs* (Proposals will be evaluated on their intentional use of all available funds) 15 points
- 5. Incorporation of Attachments (applicability to attached documents within scope of services, references to recommendations, etc.) 15 points

A selection panel will be convened of staff to evaluate and score submittals.

V. PAYMENT

Invoices: Invoices must be fully itemized, and provide sufficient information for approving payment and audit. Invoices must be accompanied by receipt for services in order for payment to be processed. **Email invoices to Accounts Payable;** (List on invoice, Attn: Katie Hawn/HHCS) and reference the contract number.

City of Berkeley
Accounts Payable
P.O. Box 700
Berkeley, CA 94710-700
Email: AccountsPayable@cityofberkeley.info
Phone: 510-981-7310

Payments: The City will make payment to the vendor within 30 days of receipt of a correct, approved and complete invoice.

VI. CITY REQUIREMENTS

A. Non-Discrimination Requirements:

Ordinance No. 5876-N.S. codified in B.M.C. Chapter 13.26 states that, for contracts worth more than \$3,000 bids for supplies or bids or proposals for services shall include a completed Workforce Composition Form. Businesses with fewer than five employees are exempt from submitting this form. (See B.M.C. 13.26.030)

Under B.M.C. section 13.26.060, the City may require any bidder or vendor it believes may have discriminated to submit a Non-Discrimination Program. The Contract Compliance Officer will make this determination. This applies to all contracts and all consultants (contractors). Berkeley Municipal Code section 13.26.070 requires that all contracts with the City contain a non-discrimination clause, in which the contractor agrees not to discriminate and allows the City access to records necessary to monitor compliance. This section also applies to all contracts and all consultants. **Bidders must submit the attached Non-Discrimination Disclosure Form with their proposal.**

B. Nuclear Free Berkeley Disclosure Form:

Berkeley Municipal Code section 12.90.070 prohibits the City from granting contracts to companies that knowingly engage in work for nuclear weapons. This contracting prohibition may be waived if the City Council determines that no reasonable alternative exists to doing business with a company that engages in nuclear weapons work. If your company engages in work for nuclear weapons, explain on the Disclosure Form the nature of such work. **Bidders must submit the attached Nuclear Free Disclosure Form with their proposal.**

C. Oppressive States:

The City of Berkeley prohibits granting of contracts to firms that knowingly provide personal services to specified Countries. This contracting prohibition may be waived if the City Council determines that no reasonable alternative exists to doing business with a company that is covered by City Council Resolution No. 59,853-N.S. If your company or any subsidiary is covered, explain on the Disclosure Form the nature of such work. **Bidders must submit the attached Oppressive States Disclosure Form with their proposal.**

D. Sanctuary City Contracting Ordinance:

Chapter 13.105 of the Berkeley Municipal Code prohibits the City from granting and or retaining contracts with any person or entity that provides Data Broker or Extreme Vetting services to the U.S. Immigration and Customs Enforcement Division of the United States Department of Homeland Security ("ICE"). **Bidders must submit the attached Sanctuary City Compliance Statement with their proposal.**

E. Conflict of Interest:

In the sole judgment of the City, any and all proposals are subject to disqualification on the basis of a conflict of interest. The City may not contract with a vendor if the vendor or an employee, officer or director of the proposer's firm, or any immediate family member of the preceding, has served as an elected official, employee, board or commission member of the City who influences the making of the contract or has a direct or indirect interest in the contract.

Furthermore, the City may not contract with any vendor whose income, investment, or real property interest may be affected by the contract. The City, at its sole option, may disqualify any proposal on the basis of such a conflict of interest. **Please identify any person associated with the firm that has a potential conflict of interest.**

F. Berkeley Living Wage Ordinance:

Chapter 13.27 of the Berkeley Municipal Code requires that contractors offer all eligible employees with City mandated minimum compensation during the term of any contract that may be awarded by the City. If the Contractor is not currently subject to the Living Wage Ordinance, cumulative contracts with the City within a one-year period may subject Contractor to the requirements under B.M.C. Chapter 13.27. A certification of compliance with this ordinance will be required upon execution of a contract. The current Living Wage rate can be found here: https://www.cityofberkeley.info/Finance/Home/Vendors_Living_Wage_Ordinance.aspx. The Living Wage rate is adjusted automatically effective June 30th of each year commensurate with the corresponding increase in the Consumer Price Index published in April of each year. If the Living Wage rate is adjusted during the term of your agreement, you must pay the new adjusted rate to all eligible employees, regardless of what the rate was when the contract was executed.

G. Berkeley Equal Benefits Ordinance:

Chapter 13.29 of the Berkeley Municipal Code requires that contractors offer domestic partners the same access to benefits that are available to spouses. A certification of compliance with this ordinance will be required upon execution of a contract.

H. Statement of Economic Interest:

The City's Conflict of Interest Code designates "consultants" as a category of persons who must complete Form 700, Statement of Economic Interest, at the beginning of the contract period and again at the termination of the contract. The selected contractor will be required to complete the Form 700 before work may begin.

VII. OTHER REQUIREMENTS**A. Insurance**

The selected contractor will be required to maintain general liability insurance in the minimum amount of \$2,000,000, automobile liability insurance in the minimum amount of \$1,000,000 and a professional liability insurance policy in the amount of \$2,000,000 to cover any claims arising out of the performance of the contract. The general liability and automobile insurance must name the City, its officers, agents, volunteers and employees as additional insured.

B. Worker's Compensation Insurance:

A selected contractor who employs any person shall maintain workers' compensation insurance in accordance with state requirements. Sole proprietors with no employees are not required to carry Worker's Compensation Insurance.

C. Business License

Virtually every contractor that does business with the City must obtain a City business license as mandated by B.M.C. Ch. 9.04. The business license requirement applies whether or not the contractor has an office within the City limits. However, a "casual" or "isolated" business transaction (B.M.C. section 9.04.010) does not subject the contractor to the license tax. Warehousing businesses and charitable organizations are the only entities specifically exempted in the code from the license requirement (see B.M.C. sections, 9.04.295 and 9.04.300). Non-profit organizations are granted partial exemptions (see B.M.C. section 9.04.305). Persons who, by reason of physical infirmity, unavoidable misfortune, or unavoidable poverty, may be granted an exemption of one annual free license at the discretion of the Director of Finance. (See B.M.C. sections 9.04.290).

Vendor must apply for a City business license and show proof of application to Purchasing Manager within seven days of being selected as intended contractor.

The Customer Service Division of the Finance Department located at 1947 Center Street, Berkeley, CA 94704, issues business licenses. Contractors should contact this division for questions and/or information on obtaining a City business license, in person, or by calling 510-981-7200.

D. Recycled Paper

Any printed reports for the City required during the performance of the work shall be on 100% recycled paper, and shall be *printed on both sides of the page* whenever practical.

E. State Prevailing Wage:

Certain labor categories under this project may be subject to prevailing wages as identified in the State of California Labor Code commencing in Section 1770 et seq. These labor categories, when employed for any “work performed during the design and preconstruction phases of construction including, but not limited to, inspection and land surveying work,” constitute a “Public Work” within the definition of Section 1720(a)(1) of the California Labor Code requiring payment of prevailing wages.

Wage information is available through the California Division of Industrial Relations web site at: http://www.dir.ca.gov/OPRL/statistics_and_databases.html

VIII. SCHEDULE (Dates are subject to change)

- Issue RFP to Potential Bidders: July 01, 2022
- Questions Due August 16, 2022
- Proposals Due from Potential Bidders August 23, 2022
- Complete Selection Process September 14, 2022
- Council Approval of Contract (over \$50k) November 3, 2022
- Award of Contract November 4, 2022
- Sign and Process Contract December 2, 2022
- Notice to Proceed December 5, 2022

Thank you for your interest in working with the City of Berkeley for this service. We look forward to receiving your proposal.

City of Berkeley Contract Compliance Officer

CITY OF BERKELEY
Nuclear Free Zone Disclosure Form

I (we) certify that:

- 1. I am (we are) fully cognizant of any and all contracts held, products made or otherwise handled by this business entity, and of any such that are anticipated to be entered into, produced or handled for the duration of its contract(s) with the City of Berkeley. (To this end, more than one individual may sign this disclosure form, if a description of which type of contracts each individual is cognizant is attached.)
- 2. I (we) understand that Section 12.90.070 of the Nuclear Free Berkeley Act (Berkeley Municipal Code Ch. 12.90; Ordinance No. 5784-N.S.) prohibits the City of Berkeley from contracting with any person or business that knowingly engages in work for nuclear weapons.
- 3. I (we) understand the meaning of the following terms as set forth in Berkeley Municipal Code Section 12.90.130:

"Work for nuclear weapons" is any work the purpose of which is the development, testing, production, maintenance or storage of nuclear weapons or the components of nuclear weapons; or any secret or classified research or evaluation of nuclear weapons; or any operation, management or administration of such work.

"Nuclear weapon" is any device, the intended explosion of which results from the energy released by reactions involving atomic nuclei, either fission or fusion or both. This definition of nuclear weapons includes the means of transporting, guiding, propelling or triggering the weapon if and only if such means is destroyed or rendered useless in the normal propelling, triggering, or detonation of the weapon.

"Component of a nuclear weapon" is any device, radioactive or non-radioactive, the primary intended function of which is to contribute to the operation of a nuclear weapon (or be a part of a nuclear weapon).

- 4. Neither this business entity nor its parent nor any of its subsidiaries engages in work for nuclear weapons or anticipates entering into such work for the duration of its contract(s) with the City of Berkeley.

Based on the foregoing, the undersigned declares under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

 Business Entity: Bonita House Inc.

Contract Description/Specification No: **Specialized Care Unit Provider/22-11533-C**

CITY OF BERKELEY
Oppressive States Compliance Statement

The undersigned, an authorized agent of Bonita House Inc. (hereafter "Vendor"), has had an opportunity to review the requirements of Berkeley City Council Resolution No. 59,853-N.S. (hereafter "Resolution"). Vendor understands and agrees that the City may choose with whom it will maintain business relations and may refrain from contracting with those Business Entities which maintain business relationships with morally repugnant regimes. Vendor understands the meaning of the following terms used in the Resolution:

"Business Entity" means "any individual, firm, partnership, corporation, association or any other commercial organization, including parent-entities and wholly-owned subsidiaries" (to the extent that their operations are related to the purpose of the contract with the City).

"Oppressive State" means: **Tibet Autonomous Region and the Provinces of Abo, Kham and U-Tsang**

"Personal Services" means "the performance of any work or labor and shall also include acting as an independent contractor or providing any consulting advice or assistance, or otherwise acting as an agent pursuant to a contractual relationship."

Contractor understands that it is not eligible to receive or retain a City contract if at the time the contract is executed, or at any time during the term of the contract it provides Personal Services to:

- a. The governing regime in any Oppressive State.
- b. Any business or corporation organized under the authority of the governing regime of any Oppressive State.
- c. Any person for the express purpose of assisting in business operations or trading with any public or private entity located in any Oppressive State.

Vendor further understands and agrees that Vendor's failure to comply with the Resolution shall constitute a default of the contract and the City Manager may terminate the contract and bar Vendor from bidding on future contracts with the City for five (5) years from the effective date of the contract termination.

The undersigned is familiar with, or has made a reasonable effort to become familiar with, Vendor's business structure and the geographic extent of its operations. By executing the Statement, Vendor certifies that it complies with the requirements of the Resolution and that if any time during the term of the contract it ceases to comply, Vendor will promptly notify the City Manager in writing.

Based on the foregoing, the undersigned declares under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

CITY OF BERKELEY
Sanctuary City Compliance Statement

The undersigned, an authorized agent of Bonita House Inc. (hereafter "Contractor"), has had an opportunity to review the requirements of Berkeley Code Chapter 13.105 (hereafter "Sanctuary City Contracting Ordinance" or "SCCO"). Contractor understands and agrees that the City may choose with whom it will maintain business relations and may refrain from contracting with any person or entity that provides Data Broker or Extreme Vetting services to the U.S. Immigration and Customs Enforcement Division of the United States Department of Homeland Security ("ICE"). Contractor understands the meaning of the following terms used in the SCCO:

- a. "Data Broker" means either of the following:
 - i. The collection of information, including personal information about consumers, from a wide variety of sources for the purposes of reselling such information to their customers, which include both private-sector business and government agencies;
 - ii. The aggregation of data that was collected for another purpose from that for which it is ultimately used.
- b. "Extreme Vetting" means data mining, threat modeling, predictive risk analysis, or other similar services." Extreme Vetting does not include:
 - i. The City's computer-network health and performance tools;
 - ii. Cybersecurity capabilities, technologies and systems used by the City of Berkeley Department of Information Technology to predict, monitor for, prevent, and protect technology infrastructure and systems owned and operated by the City of Berkeley from potential cybersecurity events and cyber-forensic based investigations and prosecutions of illegal computer based activity.

Contractor understands that it is not eligible to receive or retain a City contract if at the time the Contract is executed, or at any time during the term of the Contract, it provides Data Broker or Extreme Vetting services to ICE.

Contractor further understands and agrees that Contractor's failure to comply with the SCCO shall constitute a material default of the Contract and the City Manager may terminate the Contract and bar Contractor from bidding on future contracts with the City for five (5) years from the effective date of the contract termination.

By executing this Statement, Contractor certifies that it complies with the requirements of the SCCO and that if any time during the term of the Contract it ceases to comply, Contractor will promptly notify the City Manager in writing. Any person or entity who knowingly or willingly supplies false information in violation of the SCCO shall be guilty of a misdemeanor and up to a \$1,000 fine.

Based on the foregoing, the undersigned declares under penalty of perjury under the laws of the State of California that the foregoing is true and correct. Executed this 17th day of August, 2022 at Oakland, California.

Living Wage Certification for Providers of Services

TO BE COMPLETED BY ALL PERSONS OR ENTITIES ENGAGING IN A CONTRACT FOR PERSONAL SERVICES WITH THE CITY OF BERKELEY.

The Berkeley Municipal Code Chapter 13.27, Berkeley's Living Wage Ordinance (LWO), provides that contractors who engage in a specified amount of business with the City (except where specifically exempted) under contracts which furnish services to or for the City in any twelve (12) month period of time shall comply with all provisions of this Ordinance. The LWO requires a City contractor to provide City mandated minimum compensation to all eligible employees, as defined in the Ordinance. In order to determine whether this contract is subject to the terms of the LWO, please respond to the questions below. Please note that the LWO applies to those contracts where the contractor has achieved a cumulative dollar contracting amount with the City. Therefore, even if the LWO is inapplicable to this contract, subsequent contracts may be subject to compliance with the LWO. Furthermore, the contract may become subject to the LWO if the status of the Contractor's employees change (i.e. additional employees are hired) so that Contractor falls within the scope of the Ordinance.

Section I.

1. IF YOU ARE A FOR-PROFIT BUSINESS, PLEASE ANSWER THE FOLLOWING QUESTIONS

a. During the previous twelve (12) months, have you entered into contracts, including the present contract, bid, or proposal, with the City of Berkeley for a cumulative amount of \$25,000.00 or more?
YES ___ NO ___

If no, this contract is NOT subject to the requirements of the LWO, and you may continue to Section II. If yes, please continue to question 1(b).

b. Do you have six (6) or more employees, including part-time and stipend workers?
YES ___ NO ___

If you have answered, "YES" to questions 1(a) and 1(b) this contract IS subject to the LWO. If you responded "NO" to 1(b) this contract IS NOT subject to the LWO. Please continue to Section II.

2. IF YOU ARE A NON-PROFIT BUSINESS, AS DEFINED BY SECTION 501(C) OF THE INTERNAL REVENUE CODE OF 1954, PLEASE ANSWER THE FOLLOWING QUESTIONS.

a. During the previous twelve (12) months, have you entered into contracts, including the present contract, bid or proposal, with the City of Berkeley for a cumulative amount of \$100,000.00 or more?
YES X NO ___

If no, this Contract is NOT subject to the requirements of the LWO, and you may continue to Section II. If yes, please continue to question 2(b).

b. Do you have six (6) or more employees, including part-time and stipend workers?
YES X NO ___

If you have answered, "YES" to questions 2(a) and 2(b) this contract IS subject to the LWO. If you responded "NO" to 2(b) this contract IS NOT subject to the LWO. Please continue to Section II.

Section II

Please read, complete, and sign the following:

THIS CONTRACT IS SUBJECT TO THE LIVING WAGE ORDINANCE.
THIS CONTRACT IS NOT SUBJECT TO THE LIVING WAGE ORDINANCE.

Form with checkboxes: one checked (X) and one empty ()

The undersigned, on behalf of himself or herself individually and on behalf of his or her business or organization, hereby certifies that he or she is fully aware of Berkeley's Living Wage Ordinance, and the applicability of the Living Wage Ordinance, and the applicability of the subject contract, as determined herein. The undersigned further agrees to be bound by all of the terms of the Living Wage Ordinance, as mandated in the Berkeley Municipal Code, Chapter 13.27. If, at any time during the term of the contract, the answers to the questions posed herein change so that Contractor would be subject to the LWO, Contractor will promptly notify the City Manager in writing. Contractor further understands and agrees that the failure to comply with the LWO, this certification, or the terms of the Contract as it applies to the LWO, shall constitute a default of the Contract and the City Manager may terminate the contract and bar Contractor from future contracts with the City for five (5) years from the effective date of the Contract termination. If the contractor is a for-profit business and the LWO is applicable to this contract, the contractor must pay a living wage to all employees who spend 25% or more of their compensated time engaged in work directly related to the contract with the City. If the contractor is a non-profit business and the LWO is applicable to this contract, the contractor must pay a living wage to all employees who spend 50% or more of their compensated time engaged in work directly related to the contract with the City.

These statements are made under penalty of perjury under the laws of the state of California.

Contractor/Vendor

Form EBO-1
CITY OF BERKELEY

CERTIFICATION OF COMPLIANCE WITH EQUAL BENEFITS ORDINANCE

If you are a contractor, return this form to the originating department/project manager. If you are a vendor (supplier of goods), return this form to the Purchasing Division of the Finance Dept.

SECTION 1. CONTRACTOR/VENDOR INFORMATION

Name: Bonita House Inc.	Vendor No.:
Address: 6333 Telegraph Ave. Sp. 102 City: Oakland	State: CA ZIP: 94609
Contact Person: Laura Weissberger	Telephone: 510-923-1099
E-mail Address: lauraw@bonitahouse.org	Fax No.: 510-923-0894

SECTION 2. COMPLIANCE QUESTIONS

- A. The EBO is inapplicable to this contract because the contractor/vendor has no employees.
 Yes No (If "Yes," proceed to Section 5; if "No," continue to the next question.)
- B. Does your company provide (or make available at the employees' expense) any employee benefits?
 Yes No
If "Yes," continue to Question C.
If "No," proceed to Section 5. (The EBO is not applicable to you.)

C. Does your company provide (or make available at the employees' expense) any benefits to the spouse of an employee? Yes No

D. Does your company provide (or make available at the employees' expense) any benefits to the domestic partner of an employee? Yes No

If you answered "No" to both Questions C and D, proceed to Section 5. (The EBO is not applicable to this contract.) If you answered "Yes" to both Questions C and D, please continue to Question E. If you answered "Yes" to Question C and "No" to Question D, please continue to Section 3.

E. Are the benefits that are available to the spouse of an employee identical to the benefits that are available to the domestic partner of the employee? Yes No

If you answered "Yes," proceed to Section 4. (You are in compliance with the EBO.)
If you answered "No," continue to Section 3.

SECTION 3. PROVISIONAL COMPLIANCE

- A. Contractor/vendor is not in compliance with the EBO now but will comply by the following date:
 - By the first effective date after the first open enrollment process following the contract start date, not to exceed two years, if the Contractor submits evidence of taking reasonable measures to comply with the EBO; or
 - At such time that administrative steps can be taken to incorporate nondiscrimination in benefits in the Contractor's infrastructure, not to exceed three months; or
 - Upon expiration of the contractor's current collective bargaining agreement(s).

Attachment G (page 1)

B. If you have taken all reasonable measures to comply with the EBO but are unable to do so, do you agree to provide employees with a cash equivalent?* Yes No

* The cash equivalent is the amount of money your company pays for spousal benefits that are unavailable for domestic partners.

SECTION 4. REQUIRED DOCUMENTATION

At time of issuance of purchase order or contract award, you may be required by the City to provide documentation (copy of employee handbook, eligibility statement from your plans, insurance provider statements, etc.) to verify that you do not discriminate in the provision of benefits.

SECTION 5. CERTIFICATION

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that I am authorized to bind this entity contractually. By signing this certification, I further agree to comply with all additional obligations of the Equal Benefits Ordinance that are set forth in the Berkeley Municipal Code and in the terms of the contract or purchase order with the City.

Certification for a Drug-Free Workplace

U.S. Department of Housing and Urban Development

Bonita House Inc.

Applicant Name

Berkeley SCU

Program/Activity Receiving Federal Grant Funding

Acting on behalf of the above named Applicant as its Authorized Official, I make the following certifications and agreements to the Department of Housing and Urban Development (HUD) regarding the sites listed below:

I certify that the above named Applicant will or will continue to provide a drug-free workplace by:

a. Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the Applicant's workplace and specifying the actions that will be taken against employees for violation of such prohibition.

b. Establishing an on-going drug-free awareness program to inform employees ---

- (1) The dangers of drug abuse in the workplace;
(2) The Applicant's policy of maintaining a drug-free workplace;
(3) Any available drug counseling, rehabilitation, and employee assistance programs; and
(4) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace.

c. Making it a requirement that each employee to be engaged in the performance of the grant be given a copy of the statement required by paragraph a.;

d. Notifying the employee in the statement required by paragraph a. that, as a condition of employment under the grant, the employee will ---

- (1) Abide by the terms of the statement; and
(2) Notify the employer in writing of his or her conviction for a violation of a criminal drug statute occurring in the workplace no later than five calendar days after such conviction;

e. Notifying the agency in writing, within ten calendar days after receiving notice under subparagraph d.(2) from an employee or otherwise receiving actual notice of such conviction. Employers of convicted employees must provide notice, including position title, to every grant officer or other designee on whose grant activity the convicted employee was working, unless the Federal agency has designated a central point for the receipt of such notices. Notice shall include the identification number(s) of each affected grant;

f. Taking one of the following actions, within 30 calendar days of receiving notice under subparagraph d.(2), with respect to any employee who is so convicted ---

- (1) Taking appropriate personnel action against such an employee, up to and including termination, consistent with the requirements of the Rehabilitation Act of 1973, as amended; or
(2) Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency;

g. Making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs a. thru f.

2. Sites for Work Performance. The Applicant shall list (on separate pages) the site(s) for the performance of work done in connection with the HUD funding of the program/activity shown above: Place of Performance shall include the street address, city, county, State, and zip code. Identify each sheet with the Applicant name and address and the program/activity receiving grant funding.)

Check here [] if there are workplaces on file that are not identified on the attached sheets.

I hereby certify that all the information stated herein, as well as any information provided in the accompaniment herewith, is true and accurate. Warning: HUD will prosecute false claims and statements. Conviction may result in criminal and/or civil penalties. (18 U.S.C. 1001, 1010, 1012; 31 U.S.C. 3729, 3802)

Attachment H

DECLARATION OF COMPLIANCE WITH THE AMERICANS WITH DISABILITIES ACT

The Americans with Disabilities Act (ADA) requires that private organizations serving the public make their goods, services and facilities accessible to people with disabilities. Furthermore, the City of Berkeley requires that all of its Contractors comply with their ADA obligations and verify such compliance by signing this Declaration of Compliance.

The Contractor certifies that it will comply with the Americans with Disabilities Act by:

- A. Adopting policies, practices and procedures that ensure non-discrimination and equal access to Contractor's goods, services and facilities for people with disabilities;
B. Providing goods, services and facilities to individuals with disabilities in an integrated setting, except when separate programs are required to ensure equal access;
C. Making reasonable modifications in programs, activities and services when necessary to ensure equal access to individuals with disabilities, unless fundamental alteration in the nature of the Contractor's program would result;
D. Removing architectural barriers in existing facilities or providing alternative means of delivering goods and services when removal of barriers is cost-prohibitive;
E. Furnishing auxiliary aids to ensure equally effective communication with persons with disabilities; and
F. If contractor provides transportation to the public, by providing equivalent accessible transportation to people with disabilities.
G. Providing the City of Berkeley Grievance Procedure and Policy form(s) to individuals with disabilities who allege they have been discriminated against based on their disability or denied a requested disability accommodation by the Contractor's staff.

The undersigned authorized representative hereby obligates the Contractor to the above stated conditions under penalty of perjury.

COMMENTS/REMARKS

City of Berkeley, its officers, agents, volunteers & employees are Additional Insured under General Liability per the attached form #CG2026 1219, provided it is required in a written contract between the Named Insured and Additional Insured.

CITY OF BERKELEY
Commercial General and Automobile Liability Endorsement

The attached Certificates of Insurance are hereby certified to be a part of the following policies having the following expiration dates:

Policy No.	Company Providing Policy	Expir. Date
<u>2022-00846</u>	<u>Non Profit Insurance</u>	<u>3/1/23</u>
<u>2022-00846 NPO</u>	<u>Alliance of CA</u>	<u>3/1/23</u>

The scope of the insurance afforded by the policies designated in the attached certificates is not less than that which is afforded by the Insurance Service Organization's or other "Standard Provisions" forms in use by the insurance company in the territory in which coverage is afforded.

Such Policies provide for or are hereby amended to provide for the following:

1. The named insured is Donita House, Inc.
2. CITY OF BERKELEY ("City") is hereby included as an additional insured with respect to liability arising out of the hazards or operations under or in connection with the following agreement:
Specialized Care unit provider

The insurance provided applies as though separate policies are in effect for both the named insured and City, but does not increase the limits of liability set forth in said policies.

3. The limits of liability under the policies are not less than those shown on the certificate to which this endorsement is attached.
4. Cancellation or material reduction of this coverage will not be effective until thirty (30) days following written notice to Office of the Director, Department of HHCS, Berkeley, CA.
5. This insurance is primary and insurer is not entitled to any contribution from insurance in effect for City.

The term "City" includes successors and assigns of City and the officers, employees, agents and volunteers.

Non Profit Insurance Alliance of California
Insurance Company

COMMERCIAL GENERAL LIABILITY
CG 20 26 12 19

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

**ADDITIONAL INSURED – DESIGNATED
PERSON OR ORGANIZATION**

This endorsement modifies insurance provided under the following:

COMMERCIAL GENERAL LIABILITY COVERAGE PART

SCHEDULE

<p>Name Of Additional Insured Person(s) Or Organization(s):</p> <p>Any person or organization that you are required to add as an additional insured on this policy, under a written contract or agreement currently in effect, or becoming effective during the term of this policy. The additional insured status will not be afforded with respect to liability arising out of or related to your activities as a real estate manager for that person or organization.</p>
<p>Information required to complete this Schedule, if not shown above, will be shown in the Declarations.</p>

- A. Section II – Who Is An Insured** is amended to include as an additional insured the person(s) or organization(s) shown in the Schedule, but only with respect to liability for "bodily injury", "property damage" or "personal and advertising injury" caused, in whole or in part, by your acts or omissions or the acts or omissions of those acting on your behalf:
1. In the performance of your ongoing operations; or
 2. In connection with your premises owned by or rented to you.

However:

1. The insurance afforded to such additional insured only applies to the extent permitted by law; and
2. If coverage provided to the additional insured is required by a contract or agreement, the insurance afforded to such additional insured will not be broader than that which you are required by the contract or agreement to provide for such additional insured.

- B. With respect to the insurance afforded to these additional insureds, the following is added to Section III – Limits Of Insurance:**

If coverage provided to the additional insured is required by a contract or agreement, the most we will pay on behalf of the additional insured is the amount of insurance:

1. Required by the contract or agreement; or
2. Available under the applicable Limits of Insurance shown in the Declarations; whichever is less.

This endorsement shall not increase the applicable Limits of Insurance shown in the Declarations.

A Head for Insurance. A Heart for Nonprofits.

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

ADDITIONAL INSURED ENDORSEMENT

This endorsement modifies insurance provided under the following:

BUSINESS AUTO COVERAGE ONLY

In consideration of the premium charged, it is understood and agreed that the following is added as an additional insured:

(If no entry appears above, information required to complete this endorsement will be shown in the Declarations as applicable to this endorsement.)

But only as respects a legally enforceable contractual agreement with the Named Insured and only for liability arising out of the Named Insured's negligence and only for occurrences of coverages not otherwise excluded in the policy to which this endorsement applies.

It is further understood and agreed that irrespective of the number of entities named as insureds under this policy, in no event shall the company's limits of liability exceed the occurrence or aggregate limits as applicable by policy definition or endorsement.

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

AMENDED NOTICE OF CANCELLATION

This endorsement modifies insurance provided under the following:

COMMERCIAL GENERAL LIABILITY COVERAGE PART
BUSINESS AUTO COVERAGE FORM

Cancellation: 30 Days Notice of Cancellation

Person or Organization
City of Berkeley, its officers, agents, volunteers and employees
Eastmont Oakland Associates, LLC c/o Unico Properties LLC

If we cancel this policy for any statutorily permitted reason other than nonpayment of premium, we will mail notice of cancellation to the person or organization shown above. We will mail such notice to the address shown at least the number of days shown for cancellation.

RESOLUTION NO. 70,642-N.S.

CONTRACT: BONITA HOUSE FOR SPECIALIZED CARE UNIT PROVIDER

WHEREAS the City of Berkeley passed an omnibus package to reimagine public safety, including the establishment of a Specialized Care Unit (SCU) to respond to nonviolent behavioral health calls, and

WHEREAS an extensive community and stakeholder engagement effort resulted in design and implementation recommendations from Resource Development Associates and the SCU Steering Committee, and

WHEREAS the City conducted RFP specification number 22-11533-C with proposals due no later than August 23, 2022, and

WHEREAS, the City received three proposals in response to this RFP, and

WHEREAS two finalists were invited to meet with the selection committee for a more in-depth review of their proposal and describe their past work with responding to mental health and substance use crises in the City of Berkeley, resulting in the selection of Bonita House as the best qualified community-based organization.

NOW THEREFORE, BE IT RESOLVED by the Council of the City of Berkeley that the City Manager is authorized to execute a contract and any amendments with Bonita House (Contractor) to implement Berkeley's Specialized Care Unit for a two-year pilot. Services will begin on February 1, 2023 and extend to January 30, 2025. Funding in the amount of \$4,250,000 will be recommended for appropriation through the second amendment to the appropriations ordinance in the American Rescue Plan Act Fund (Fund 354) and funding in the amount of \$250,000 is available in the FY2023 budget in the One-Time Grant Fund (Fund 336) for a total not to exceed of \$4,500,000.

The foregoing Resolution was adopted by the Berkeley City Council on December 13, 2022 by the following vote:

Ayes: Bartlett, Hahn, Harrison, Humbert, Kesarwani, Robinson, Taplin, Wengraf, and Arreguin.

Noes: None.

Absent: None.

Jesse Arreguin, Mayor

Attest: 

Mark Numainville, City Clerk

RECEIVED
APR 10 2023
CITY OF BERKELEY
CITY CLERK DEPARTMENT

Office of the City Manager

INFORMATION CALENDAR
October 3, 2023

To: Honorable Mayor and Members of the City Council
From: Dee Williams-Ridley, City Manager
Submitted by: Jennifer Louis, Chief of Police
Subject: Update on the Implementation of Fair and Impartial Policing Task Force Recommendations

INTRODUCTION

On February 23rd, 2021 during a City Council Special Meeting, Council referred the recommendations from the Mayor's Fair and Impartial Policing (FIP) Task Force to the Berkeley Police Department for implementation. Quarterly updates were requested by Council and the last quarterly update was provided on June 27, 2023.

The following information summarizes the overall work undertaken by the City since the February 2021 direction from Council. Key updates since the last report in June include:

1. Berkeley City Council's referral to the budget process for \$100,000 for consultant work to design and assist with implementing a comprehensive Early Intervention and Risk Management System. This study could support the expansion of the existing departmental early warning system.
2. An update on implementation progress related to the Specialized Care Unit.
3. The finalizing of a contract with Citygate to conduct a departmental capacity study.

CURRENT SITUATION AND ITS EFFECTS

This report provides a quarterly update on the implementation of the Task Force recommendations. Implementation of the FIP Task Force recommendations remains a priority of the Berkeley Police Department. The Professional Standards Division is responsible for managing the project of implementing the recommendations.

Implementation of the recommendations has necessitated the amendment of departmental policies and the establishment of new protocols. As part of the process, members of BPD have met on several occasions with Council and Mayor representatives, Police Review Commission and now Police Accountability Board

Progress of the Implementation of FIP Recommendations

INFORMATION CALENDAR
October 3, 2023

members, FIP Task Force members, and the Police Accountability Board Subcommittee on FIP recommendation implementation. During these meetings, the substance and progress on the implementation of the recommendations were discussed and BPD has been provided feedback and background on the various intentions with each respective recommendation.

The Berkeley Police Department remains committed to equitable and unbiased policing. A policy in the form of a special order has been released to ensure that current and future members of the Berkeley Police Department carry forward and build upon this important foundational work initiated by the Fair and Impartial Task Force.

The following outlines the specific Task Force recommendations and the respective progress:

Implement a New Evidence-Based Traffic Enforcement Model

Task Force Recommendations:

- **Focusing the basis for traffic stops on safety**

Implementation:

Officers have been provided data regarding primary collision factors and have been directed to enforce those violations wherever they are observed. In addition to focusing on the enforcement of primary collision factor violations, sworn personnel are also expected to make investigative stops related to criminal intelligence and information brought forth by the community or our investigations. BPD has implemented and conducted departmental training on a three-prong approach that focuses on primary collision factors, community member reports of dangerous driving or safety issues and community caretaking. Community caretaking considers safety violations that aren't always noted as the primary collision factor but can be a significant contributing factor in serious collisions.

Status:

Recommendation implementation is complete and evaluation and transparency efforts are ongoing. Training for all sworn personnel has concluded. The Traffic Division and the National Highway Traffic Safety Administration continuously collect and provide the Berkeley Police Department with data on primary collision factors and statistics on violations that impact public safety. This data provides officers with current information on what to educate the community on and what violations to focus enforcement towards. The department will continue to review and evaluate data on traffic offenses that affect community safety. This will drive the primary focus on ongoing enforcement and education efforts. Stop data related to this recommendation is shared with the public via BPD's Transparency Hub. Additionally, the focus of traffic enforcement has been formalized as a departmental directive contained within a special order.

Task Force Recommendation:

- **Use a clear, evidence-based definition for stops of criminal suspects**

Implementation:

The Police Department is establishing a precision based policing model that considers data and public safety. This model aims to reduce the number of stops that studies have shown had minimal impact on public safety.

Data driven-tools that enable close to real-time dashboard tracking of calls for service demands have been provided to the Community Services Bureau and Patrol Watch Commanders to help guide officers in their enforcement focus.

The Department implemented a system that employs a feedback loop with information flowing both ways. The system provides the tracking of calls for service with the goal of call analysis for patrol deployment strategies and also allows officers in the field to communicate their observations to the Community Service Bureau. This feedback loop provides information back to the Community Services Bureau and creates an accountability measure so strategies can be evaluated.

Status:

Recommendation implementation complete and ongoing efforts include the development of data-driven tools to enhance a precision-based policing model and approach to enforcement stops. The goal is to have data-driven approaches to violence prevention programs and real time crime and call analysis for patrol deployment strategies. Ensuring that we implement approaches that identify and work to reduce racial disparities will be a cornerstone to our evidence-based approaches. The Berkeley Police Department will continue to only use race and ethnicity as determining factors in stops only when paired with clear, evidence-based criteria. The Transparency Hub streamlines the collection and dissemination of police data. This system allows for exploration of different evidence-based approaches.

Task Force Recommendation:

- **Reaffirming and clarifying that the Berkeley Police Department will only use race and ethnicity as determining factors in stops only when paired with clear, evidence-based criteria.**

Implementation:

Penal code 13519.4 is existing California law that prohibits racial profiling. BPD Policy 401 (Fair and Impartial Policing) also prohibits racial profiling. Section 401.2 explicitly states, "Officers shall not consider race, ethnicity, national origin,

gender, age, religion, sexual orientation/identity or socio-economic status in establishing either reasonable suspicion or probable cause, or when carrying out other law enforcement activities...”

The above policies were reviewed in light of the task force recommendations and found to affirm and clarify police officer responsibilities in stops.

Status:

Recommendation implementation complete and ongoing efforts include: BPD will continue to conduct ongoing training in topics such as implicit bias, racial profiling, and procedural justice concepts. BPD will hold all members to Departmental Policies, especially those strictly and clearly prohibiting racial profiling. Further, stops will be information and evidence based. The BPD Data Analyst Team will continue to develop tools to focus internal efforts using evidence and information and share data publicly about enforcement and related results.

Implement Procedural Justice Reforms

Task Force Recommendation:

- **Refer amendments to existing BPD policy and the creation of an Early Intervention System (EIS) related to traffic, bike and pedestrian stops.**

Implementation:

The current Early Warning System was originally issued in 2004 and revised in 2008. The system mandates the monitoring of officer’s behavior and performance to include, but not limited to attendance, complaints, use of force incidents, and other factors. The Early Warning System serves as a program that identifies and address behavior or training issues before they become a disciplinary matter. Amendments have been made to the Department’s Early Warning System policy (Policy 1041) to include the monitoring of stop data for individual officers.

Status:

Implementation complete via issuance of updated policy reflecting recommendations. Pursuant to the FIP recommendation and after meeting with the FIP task Force stakeholders, language was added to the current Early Warning System policy to include data around traffic, bicycle, and pedestrian stops as a category that supervisors will consider for early intervention if merited. Ongoing efforts include implementing new systems for the monitoring of officer’s individual stop data by their respective supervisors. The Audits and Inspections Sergeant will also conduct separate and random quarterly audits of officer’s stop data, complaints, uses of force incidents, and body-worn camera videos and report the findings to the Chief of Police. Results of these audits are provided to

Progress of the Implementation of FIP Recommendations

INFORMATION CALENDAR
October 3, 2023

the Police Accountability Board. Additionally, the City Council has referred \$100,000 to the June, 2023 Budget Process to enter into a contract to design and assist with implementing a comprehensive Early Intervention and Risk Management System. We are currently in the planning stages of the RFP process in line with Council's referral.

Task Force Recommendation:

- **Adopt a policy to require written consent for all vehicle and residence searches and update the consent search form in alignment with best practice and community feedback.**

Implementation:

A revised written consent form has been created and amendments have been made to our existing search and seizure policy to require written consent for all consent searches. The Department implemented a redesigned Consent Search Form incorporating the collaborative feedback from multiple discussions with the Police Accountability Board.

Status:

Implementation completed via issuance of updated form reflecting recommendations.

Task Force Recommendation:

- **Limit warrantless searches of individuals on supervised release status such as Post Release Community Supervision (PRCS), probation, or parole.**

Implementation:

On February 10, 2021, updates were completed on Policy 311. Sections 311.5 and 311.6 were modified to reflect the above limitations to warrantless searches. The above policies were reviewed and modified in line with the task force recommendations and departmental goals to build trust and collaborate with the community to address crime and safety concerns.

Status:

Recommendation implemented. The update to Policy 311 limits the searches conducted on individuals on supervised release status. On April 18, 2022, the Public Safety Committee made a recommendation for a policy change to this recommendation. On July 26th, 2022 the City Council approved Policy 311 and on August 2nd, 2022 the policy was updated and released. The Department has trained on these updates and will continue to assess and review the impacts of these searches in consideration and support of the tenets of FIP.

Progress of the Implementation of FIP Recommendations

INFORMATION CALENDAR
October 3, 2023**Task Force Recommendation:**

- **Address Profiling by Proxy (PAB Policy Development, Dispatcher Training).**

Implementation:

The Communications Center Operation Manual has been amended to address handling cases involving profiling by proxy. All dispatchers have reviewed the amended manual and are instructed to be cognizant and screen for profiling by proxy calls.

Status:

Recommendation implemented. Berkeley Police Department will continue to educate and train dispatchers on how to identify and address biased based reporting. Officers and supervisors are also expected to screen profiling by proxy calls. The Department as a whole will continue to seek out and train on anti-bias, implicit bias, and profiling by proxy topics to strengthen our ability to identify and address biased based reporting.

Task Force Recommendation:

- **Fire racist police officers identified through social media and other media screens.**

Implementation:

The following existing policies dictate procedures for investigating employees in this area; these policies adhere to due process and Government Section 3300:

Policy 1029 (Employee Speech, Expression and Social Networking) provides accountability to employee personal social media posts. Section 1029.4(b) states "Speech or expression that, while not made pursuant to an official duty, is significantly link to, or related to, the Berkeley Police Department and tends to compromise or damage the mission, function, or reputation of professionalism of the Berkeley police Department or its employee.

PR 232 (Controversial Discussion), PR 235 (Acts –Statements-By employees), PR 238 (Organizational Membership), and PR 250 (enforcement of Law, Impartiality) are also policies that provide accountability for any racist behaviors.

The above policies were reviewed in light of the task force recommendations and found to provide necessary authority to investigate allegations of racism.

Departmental policy clearly identifies discrimination based upon a person's race as misconduct, and requires reporting and prompt investigating of any allegation

of racism. Any employee who becomes aware of or observes any discrimination on the basis of a protected class is required to notify a supervisor by the end of their shift or within 24 hours if they are off duty.

Status:

Recommendation implemented, however the Berkeley Police Department is committed to continuing to explore additional lawful methods to identify and address potentially racist behaviors or actions by our members. If at any time the police department becomes aware of any issues related to these concerns, the matter would be thoroughly investigated and employees will be held accountable.

Task Force Recommendation:

- **Require regular analysis of BPD stop, search, and use of force data;**

Implementation:

The Open Data Portal (ODP) is a public-facing website that gives the public access to police data and is accessible through the City's website. This allows for open and independent analysis and review to foster police accountability and transparency.

The Department will not only collect and report on stop, search and use of force data, but will regularly analyze the data via the Data Analyst Team. That analysis will at a minimum help direct policy, training, and resource allocation.

Status:

Implementation of recommendation complete and the Department will continue ongoing evaluation and data sharing. BPD is committed to transparency and is continuously exploring different ways to provide the public with access to more police data. The Data and Policy Analysis Team developed a Transparency Hub that will facilitate independent review and analysis of police data. This hub was launched after several community and internal stakeholder groups had an opportunity to view and collaborate on design. The Transparency Hub hosts BPD's Open Data Portal along with tools to help the public visualize and analyze the department's data, including interactive dashboards summarizing stop and search data, calls for service, and use of force data. The Transparency Hub updates in near-real time and gives the public access to datasets reaching further back in time than had been available. The 'Crime Mapper' page on the Transparency Hub that includes additional data on cases has been implemented and is now live.

Progress of the Implementation of FIP Recommendations

INFORMATION CALENDAR
October 3, 2023**Task Force Recommendations:**

- **Make resources on police-civilian encounters more publicly available such as through RAHEEM.org;**
- **For any individual detained, BPD officers shall provide a business card with information on the commendation and complaint process with the Police Accountability Board and the Berkeley Police Department, Internal Affairs Bureau.**

Implementation:

BPD Officers shall offer business cards to all detained individuals with information, a QR code and links to the BPD website which provide community members with information on making a commendation or complaint about an interaction with BPD. In addition to the information on how to make a complaint, a link is provided to the ACLU webpage containing information on police-civilian encounters.

Status:

Recommendation implemented. All business cards will continue to be printed with the above information. These resources ensure police accountability as well as provide ways the community can comment on the service BPD has provided.

Refer the following recommendations summarized below to the Reimagine Public Safety process**Task Force Recommendations:**

- **Create a formalized feedback system to gauge community response to ongoing reforms and ensure this constructive input system is institutionalized with the Police Review Commission or its successor and includes a basic report card and quarterly neighborhood check-ins; Conduct a baseline community survey**

Implementation:

BPD actively supported and participated in the work of the Reimagine Public Safety Task Force by providing data and information, answering questions, providing hands-on experience and discussing opportunities, impacts and effects of recommendations. Several community surveys were conducted by consultants as part of the overall Reimagine Public Safety process.

Progress of the Implementation of FIP Recommendations

INFORMATION CALENDAR
October 3, 2023**Status:**

Initial implementation complete. To support feedback systems, the Berkeley Police Department will be seeking ongoing community input and feedback around reform efforts via the Transparency Hub.

Acknowledge and reaffirm the following recommendations summarized below that are already underway**Task Force Recommendation:**

- **BPD released stop, arrest, calls for service and use of force data from 2012 to present to the Working Group;**

Implementation:

The police department released the requested historical data in December of 2020. BPD stop, arrest, and calls for service data are regularly updated in the Open Data Portal and will be updated in near real time on the Transparency Hub.

Status:

Recommendation implemented.

Task Force Recommendation:

- **Fund and implement a specialized care unit (SCU) for mental health crises;**

Implementation:

After completing a competitive proposal process in the summer of 2022, and obtaining City Council approval on December 13, Bonita House has been selected as the provider for the Specialized Care Unit. In collaboration with HHCS and the City of Berkeley, Bonita House will implement the SCU pilot program using the recommendations from RDA (a consulting firm contracted by the city) as well as accompanying Steering Committee analysis.

Status:

SCU implementation continues to move forward and is managed by the Health, Housing and Community Services (HHCS) Department. HHCS continues to coordinate with Bonita House, other City departments, including the Fire and Police Department, and the SCU Steering Committee on a regular basis to receive program updates on the SCU as well as provide support for implementation. Since May 2023, Bonita House has welcomed four new staff members who will be working directly on the SCU team. These staff have received Bonita House's Crisis Academy classroom training and are shadowing current Bonita House crisis teams. HHCS expects the SCU program to launch in a limited capacity on September 5th.

Progress of the Implementation of FIP Recommendations

INFORMATION CALENDAR
October 3, 2023**Task Force Recommendation:**

- **Conduct a Capacity Study of police calls and responses and use of officer time outside of casework.**

Implementation:

The City's Auditor's report was released which analyzed Computer Aided Dispatch data. Recommendations from this analysis were provided to the Police Department and findings were referred to the Reimagine Public Safety Task Force.

Status:

Implementation in progress. An assessment of overall staffing levels as well as patrol beat-specific analysis has been referred to the budget process via the Council's direction on Reimagining Public Safety. Internally the Data Analysts Team has been directed to continue their work to refine the way and type of data that is collected and analyze call response time to support the likely upcoming consultant work. Citygate has been selected to conduct a comprehensive police organizational workload study to assess our organizational structure, resource allocation, and geographical patrol boundaries analysis. A contract with Citygate is anticipated to be completed by the end of August and work will begin immediately after. Citygate's workload study will take approximately nine months.

ENVIRONMENTAL SUSTAINABILITY AND CLIMATE IMPACTS

There are no identifiable environmental effects, climate impacts, or sustainability opportunities associated with the subject of this report.

POSSIBLE FUTURE ACTION

The Police Department will continue to work toward the full implementation of the Task Force recommendations.

FISCAL IMPACTS OF POSSIBLE FUTURE ACTION

Staff time and additional training time to be determined at a later date.

APPENDIX H

Berkeley Police Department MOU (KIND Policing Section)

Memorandum of Understanding

between

City of Berkeley

and

Berkeley Police Association

July 1, 2023 to June 30, 2026

EXCERPT

Homicide Detail shall receive a three percent (3%) salary differential. If a Police Officer is assigned to the Homicide Detail while on regular duty and not while on overtime, this differential for hours worked on regular duty shall be reported to CalPERS as Detective Division Special Assignment Pay.

13.7 Peace Officer Standards and Training (POST)

In addition to the salary set forth in the Exhibit "A" of this Agreement, employees covered by this Agreement who qualify under regulations promulgated by the California Commission on Peace Officer Standards and Training shall receive the following educational/training incentive compensation. To receive the Intermediate Certificate and/or Advanced Certificate differential pay below, employees must submit documents required by the Berkeley Police Department Professional Standards Division verifying POST eligibility, including but not limited to copies of college transcripts, proof of a college degree and other related forms. Failure of the employee to submit documents required by the Professional Standards Division shall delay the POST incentive pay eligibility until such time as the employee provides all required documentation.

13.7.1 Intermediate Certificate: An employee who possess a Peace Officers Standards and Training Intermediate Certificate shall receive a five percent (5%) differential to base salary and such payment shall be reported to CalPERS as Peace Officers Standards and Training Certificate Pay as a form of Educational Pay.

13.7.2 Advanced Certificate: An officer who possess a Peace Officers Standards and Training Advanced Certificate, the employee shall receive a two percent (2%) differential to base salary and such payment shall be reported to CalPERS as Peace Officers Standards and Training Certificate Pay as a form of Educational Pay.

13.7.3 An employee may simultaneously receive the Intermediate and Advanced Certificate differential for a total differential of seven percent (7%).

13.8 Constitutional Humane Impartial Neighborhood and Community Oriented DEI-Centered ("KIND") Policing Education Incentive

Effective September 3, 2023, employees will receive a three percent (3.0%) differential above their base rate for the KIND policing education incentive.

Effective the first full pay period after July 1, 2024, employees will receive an additional one percent (1.0%) for a total four percent (4.0%) differential above their base rate for the KIND policing education incentive.

The City will administer a program of training and recordkeeping for this program and provide paid time for members to attend such trainings. In order to continue to qualify for this incentive, the Department will offer, and members must complete, a minimum 30-hour certification, consisting of classroom and/or field training, by December 31, 2024. Each subsequent year, the Department will offer, and members must complete 15 hours of continuing education by December 31. Trainings must either be provided by the Police Department or approved by the Police Chief or their designee. The City will begin to schedule trainings associated with the KIND incentive within 90 days of the adoption of this Agreement by City Council. Non-departmental trainings must be pre-approved by the Police Chief,

or their designee, and must be obtained through an accredited college or university, a nationally recognized professional organization, or a continuing education course from a certified provider. To satisfy the hourly requirement, trainings must be in the following areas of study and must include trainings across at least (ten) 10 different categories:

- Active Bystandership for Law Enforcement
- Anti-Racism
- Communication Skills
- Community-Oriented Policing
- Constitutional Policing
- Criminal Law and Procedure
- Cultural Competence
- De-escalation Techniques
- Diversity, Equity, Inclusion & Belonging
- Empathy
- Ethics
- Impartial Investigation Techniques
- Implicit Bias Prevention
- Probable Cause
- Procedurally Just Policing
- Respectful Treatment of Others
- Other similar forms of training as approved by the City Manager

Eligibility for the differential will be paused during periods of non-compliance. Once the member has come into compliance by fulfilling all missing hours, the differential will be restored, effective the next full pay period. Training hours that a member completes to come into compliance with a previous year's compliance requirement shall only count toward the previous year's requirement, and the member must separately, fully, and timely complete the current year's required hours to remain in compliance for the current year.

New and lateral hires will have the balance of the calendar year of their hire and the following calendar year to complete their 30-hour certification. The training hours required for compliance will be prorated for members who are on protected leaves according to the length of the leave.

Employees who are disciplined for sustained charges that conflict with the core values of the KIND differential such as excessive force, dishonesty, and/or discrimination/bias will be required to complete additional hours of KIND training, commensurate with the severity of the offense. For sustained offenses warranting suspension in excess of two weeks, members will be required to re-complete the 30-hour certification.

This differential shall be reported to CalPERS as an educational incentive in accordance with California Code of Regulations 571 and 571.1.

ABOUT VISION ZERO

Vision Zero is a strategy to eliminate all traffic fatalities and severe injuries while increasing safe, healthy, and equitable mobility for all. Vision Zero is, first and foremost, an *engineering* strategy that aims to design and build our streets to eliminate all severe and fatal traffic injuries. These engineering efforts are supported by public awareness education and traffic enforcement. Equity-driven Vision Zero traffic enforcement utilizes the best possible data and is focused on areas of Berkeley where engineering and education efforts have already been implemented.

INTRODUCTION

CAPTURING SITES OF FATAL AND SEVERE COLLISIONS

All photos in this plan were taken at locations in Berkeley where someone lost their life or sustained a severe injury in a traffic collision. The images demonstrate that there is rarely any way for someone passing by to know a tragedy took place, since things often continue as they did before. Vision Zero challenges this status quo and strips away the societal acceptance that fatal and severe traffic collisions are a necessary byproduct of mobility. As part of this plan, rapid-response communications and safety project protocols will be established to help tell victims' stories and deliver quick-build projects where engineering countermeasures may effectively improve safety.

Every year, an average of two people die and 21 people are severely injured in Berkeley due to traffic violence. Vision Zero is about recognizing that these deaths and severe injuries are preventable and unacceptable – no one should lose their life or experience a life-altering injury while traveling on Berkeley streets, no matter who they are or how they travel.

We began our commitment to Vision Zero in 2018 through the adoption of a Vision Zero resolution to end all traffic-related deaths and severe injuries on City streets by 2028. Since then, we have established two working groups: a Task Force, comprised of key City staff, elected officials, and partner agencies; and an Advisory Committee, comprised of representatives from advocacy groups, the public, Berkeley Unified School District, and City of Berkeley Commissions. The Task Force and Advisory Committee have worked together to craft the Vision, Guiding Principles, and Actions presented in this plan. To learn more about the process, see **Appendix A: Vision Zero Action Plan Development**.

While every action item introduced in this plan is fundamental to the success of Vision Zero, the priority actions presented on the next page are the near-term focus of Vision Zero in Berkeley, based on feedback from the Task Force and Advisory Committee on existing resources, and staff and community priority. The full list of actions for the City of Berkeley is introduced later in this plan, in “Taking Action.”

Throughout the development of this plan, two key themes were frequently discussed: this plan must be accountable, and this plan must be crafted through an equity lens.

ACCOUNTABILITY

This plan takes strategic and pointed actions to keep Vision Zero front and center in the City of Berkeley – calling for continuous plan updates to remain in line with best practices and trends; an audit conducted by the City Auditor to make sure Vision Zero has the appropriate level of staff and resources to be effective; and building redundancy by integrating Vision Zero actions into other guiding documents, including the Berkeley Strategic Plan and departmental work plans.

EQUITY

This plan is equity-driven, starting with recognizing that we do not understand the full magnitude of inequities today due to gaps in key safety datasets. The plan recommends that we utilize Berkeley Police Department collision report data to better understand who are the victims of traffic collisions; perform a robust assessment of other key gaps in safety datasets as part of the first update to this plan; and elevate community voices to understand the perception of safety and personal security in our most vulnerable communities. This plan also includes actions to create a traffic ticket diversion program for bicyclists and pedestrians, and calls for partnerships with community-based organizations and culturally-relevant and context-specific outreach and educational campaigns. The plan emphasizes engineering and education actions first, supported by equity- and data-driven traffic enforcement conducted consistent with the City of Berkeley’s Fair and Impartial Policing Policy.

PRIORITY ACTIONS

- **Establish a standing Vision Zero Coordinating Committee** consisting of City staff, Commissioners, partner institutions, members of the community, advocacy groups, and community-based organizations who have a role in advancing Vision Zero action items with quarterly meetings organized around a predetermined annual agenda. Seek to establish a funding source to compensate members of the community and community-based organizations to enable their participation.
- **Conduct a citywide Vision Zero Action Plan assessment** of existing staffing and funding capacity to complete Vision Zero action items.
 - **Create a staffing matrix** of existing and proposed staff for the delivery of high-priority Vision Zero action items. New or realigned staff needs are anticipated in Public Works safety project team; Public Works Vision Zero Program support staff; Public Information Officers in key Vision Zero departments, including Police and Health, Housing, and Community Services; Berkeley Police Department Vision Zero collision data analysis; Health, Housing, and Community Service Vision Zero data analysis and public awareness programs.
 - **Establish a milestone staffing and funding schedule** to complete high-priority Vision Zero action items, including City and grant funds.
- **Proactively build capital-intensive and quick-build safety projects** on all Vision Zero High-Injury Streets on a schedule to complete such projects by 2028.

PRIORITIZATION APPROACH

This plan prioritizes engineering, education, and public awareness before enforcement to achieve Vision Zero in Berkeley. Each action item is prioritized based on feedback from the Task Force and Advisory Committee on existing resources, and staff and community priority, as well as the potential transformative impact of each item:

- **Existing Resources:** Actions are prioritized that likely already have the needed resources, both staff and funding, to deliver.
- **Staff Priority:** Actions are prioritized that are of interest and priority to the Task Force and Vision Zero Program staff.
- **Community Priority:** Actions are prioritized that are of interest and priority to the Advisory Committee.
- **Transformative/High Impact:** Actions are prioritized that would have major positive impacts on safety or City collaboration, based on the Institute of Transportation Engineer's *Core Elements of Vision Zero* and ongoing City efforts.

The actions introduced here are the near-term focus for the City of Berkeley. The full list of actions in priority order can be reviewed in **Appendix B: Prioritized Actions Matrix**.

- **Request a Vision Zero Performance Audit** to be performed during the FY21 audit period to evaluate the implementation of the Action Plan and make any additional needed recommendations, including additional and/or realigned staffing and funding, for effective Vision Zero Action Plan implementation. Provide required six-month updates to City Council.
- **Establish a Vision Zero Rapid Response Safety Communication Protocol.** Employ a communication strategy in response to recent severe and fatal collisions aimed at the human element of traffic safety, including health and prevention messaging to the Berkeley community.
- **Support statewide traffic safety legislation** allowing automated speed enforcement by local agencies, designation of speed limits on local streets based on desired safety outcomes rather than the existing prevailing speed, and the reduction of local residential street speed limits to below 25 MPH, which would allow for 20 MPH speed limit on local residential streets, consistent with “20 Is Plenty” campaigns. Utilize existing legislated automated enforcement strategies, such as red light cameras.
- **Establish a Complete Streets Repaving and Development Project Checklist** to ensure proactive and reactive Vision Zero safety infrastructure for people of all ages and abilities are included with each repaving project and in the conditions of approval for development projects. With the Vision Zero Coordinating Committee, consider establishing an equity-driven approach to prioritizing repaving projects.
- **Develop and proactively deliver a Vision Zero branding, promotional, and educational campaign** to increase awareness about Vision Zero and the top traffic violations for severe and fatal injuries in Berkeley, elevating victims’ stories. Regularly update the campaign to ensure it is context-specific, accessible, and culturally relevant. Collaborate with community-based organizations to distribute material and promote messages and public events that normalize active transportation and transit as healthy and responsible transportation choices.
- **Develop a publicly accessible matrix and map to prioritize and track projects.** Prioritize both new/existing requests/referrals and delivery of established infrastructure project lists (e.g., Five Year Repaving Program, BeST Plan, etc.) according to the Vision Zero High-Injury Streets map and equity-driven prioritization from City Council adopted plans such as the Bicycle Plan and forthcoming Pedestrian Plan.
- **Utilize the Berkeley Police Department’s collision report data on parties involved,** such as housing status or whether parties involved are disabled, to help address equity gaps in Statewide Integrated Traffic Records System (SWITRS) collision data. Confirm that Berkeley Police Department report training emphasizes consistent use of these collision report data fields and, if needed, provides training resources for avoiding transportation mode bias in collision reporting. When necessary, update the collision report form to be consistent with emerging mobility modes.
- **Focus traffic enforcement efforts proportionately on the most significant traffic violations for severe and fatal collisions by party at fault.** Focus enforcement efforts on areas of Berkeley where engineering and education efforts have already been implemented. Conduct traffic enforcement consistent with the City of Berkeley’s Fair and Impartial Policing Policy.

GLOSSARY

Equity

Race, ethnicity, gender, age, socioeconomic status, or physical or mental ability can no longer be used to predict access to safe transportation, and safety and access for all groups are improved.

This definition is adapted from the Government Alliance on Race & Equity's *Racial Equity Toolkit*. The City of Berkeley is a core member of the Government Alliance on Race & Equity (GARE).

Severe Injury

A severe injury is based on the reporting police officer's visual assessment of a victim at the scene of the collision. The California Highway Patrol's *Collision Investigation Manual* defines a severe injury as an injury other than a fatal injury which results in broken bones, dislocated or distorted limbs, severe lacerations, or unconsciousness at or when taken from the collision scene. It does not include minor lacerations. Some severe injuries may not be classified as such by the reporting officer if they are not visible or otherwise apparent.

Vulnerable Users

Users of the roadway that are more vulnerable to traffic-related death or injury due to their demographic, socioeconomic status, physical or mental ability, or mode of travel. This may include people of color, people with no or low income, people with no or limited English proficiency, people experiencing homelessness, youth, seniors, people with disabilities, and people who walk and bike.

WHY WE NEED
VISION ZERO?

BERKELEY NEEDS VISION ZERO

Every year, on average two people die and 21 people sustain severe injuries on Berkeley streets due to traffic violence. This is unacceptable and preventable – no one should lose their life or suffer a life-altering injury when traveling in our city. All statistics presented on this page are based on data between 2013 and 2017 - the most recent five years of collision data available through the Statewide Integrated Traffic Records System (SWITRS).

DISPROPORTIONATE BURDEN

We know that people of color, people with no or low income, people with no or limited English proficiency, people experiencing homelessness, youth, seniors, and people with disabilities are over-represented in fatal and severe injury collisions, but we currently have limited data within SWITRS collision reports to understand the magnitude of the disproportionate burden. This plan addresses those data gaps head-on and establishes strategies to start collecting and utilizing more meaningful data to understand inequities on our streets. We also are not waiting for more data to take an equity-driven approach to Vision Zero. Read more about our proposed strategies in “Taking Action.”

VISION ZERO IS ABOUT THE 4%

On average, 4% of collisions on Berkeley streets result in a fatality or severe injury.

That is 4% too many.

VISION ZERO IS ABOUT MODE

Collisions disproportionately impact people riding bicycles and people walking. The numbers are stark – collisions involving someone riding a bicycle or walking make up almost **80%** of collisions that result in death or severe injury, despite making up just **40%** of trips in Berkeley.

Collision Data: SWITRS five-year injury collision data, 2013-2017

Mode Data: California Household Travel Survey for the City of Berkeley, 2012

VISION ZERO IS ABOUT TRAFFIC VIOLATIONS

Every collision involves multiple factors. The top traffic violations reported during the years 2013 to 2017 for collisions in Berkeley that resulted in death or severe injury were **traveling at unsafe speeds, violation of pedestrian right-of-way at a crosswalk, failure to yield while making left or U-turns, failure to stop at a red light, and failure to stop at a stop sign**. Vision Zero focuses on the most significant factors associated with severe and fatal traffic collisions in order to make the greatest impact.

Safety is also about how we share public space and how we interact on our streets. When we consider the primary party at fault, the top traffic violations for severe and fatal vehicle-involved collisions in Berkeley were **drivers not yielding at crosswalks; drivers traveling at unsafe speeds; drivers failing to yield to oncoming traffic when making a left- or U-turn; bicyclists traveling at unsafe speeds; and drivers not yielding at stop signs**. While party at fault data is subjective and may not include the victim’s perspective, it can add to our understanding of the unsafe behaviors that result in severe and fatal collisions.

Violation data tables are provided in **Appendix C: SWITRS Violation Code Data Tables**.

TOP VIOLATIONS IN SEVERE AND FATAL COLLISIONS

TOP VIOLATIONS BY PARTY AT FAULT IN SEVERE AND FATAL COLLISIONS

Collision Data: SWITRS five-year injury collision data, 2013-2017

**WHY DO WE FOCUS ON SPEED?
BECAUSE SPEED KILLS.**

HIT BY A VEHICLE TRAVELING AT:

**20
MPH**

9 out of 10 pedestrians survive

HIT BY A VEHICLE TRAVELING AT:

**30
MPH**

5 out of 10 pedestrians survive

HIT BY A VEHICLE TRAVELING AT:

**40
MPH**

1 out of 10 pedestrians survive

Source: US Department of Transportation, Literature Review on Vehicle Travel Speeds and Pedestrian Injuries March 2000

LOCATIONS OF SEVERE AND FATAL COLLISIONS

This map is not for use in developing focused enforcement efforts

VISION ZERO IS ABOUT STREETS

This map shows the locations of the **237** traffic-related severe injuries and fatalities that occurred on Berkeley streets between 2008 and 2018.

Although only **37%** of streets lie in the Equity Priority Area, **46%** of severe and fatal collisions occur there.

PRIORITIZING EQUITY

Lower income residents and people of color are disproportionately impacted by the risk of traffic injuries and fatalities. The Equity Priority Area considers historic Home Owners' Loan Corporation "redlining," racial/ethnic composition, property value, and cultural centers to guide the City of Berkeley in prioritizing infrastructure projects that remedy systemic inequity. A full description of the Equity Priority Area methodology can be found in the City of Berkeley Pedestrian Plan.

/// Equity Priority Area

Collision Type

- ★ Bicycle - Fatal
- ★ Pedestrian - Fatal
- ★ Driver - Fatal
- Bicycle - Severe Injury
- Pedestrian - Severe Injury
- Driver - Severe Injury

HIGH-INJURY STREETS

This map is not for use in developing focused enforcement efforts

VISION ZERO IS ABOUT STREETS

The High-Injury Streets map represents the City of Berkeley's streets with the most severe injuries and fatalities based on data between 2008 and 2018.

91% of Berkeley's severe and fatal collisions occur on just **16%** of City streets.

PRIORITIZING EQUITY

Lower income residents and people of color are disproportionately impacted by the risk of traffic injuries and fatalities. The Equity Priority Area considers historic Home Owners' Loan Corporation "redlining," racial/ethnic composition, property value, and cultural centers to guide the City of Berkeley in prioritizing infrastructure projects that remedy systemic inequity. A full description of the Equity Priority Area methodology can be found in the City of Berkeley Pedestrian Plan.

Collision Data: SWITRS ten-year injury collision data, 2008-2018

VISION AND GUIDING
PRINCIPLES

The City of Berkeley is committed to an equity-focused, data-driven effort to eliminate traffic deaths and severe injuries on our city streets by 2028.

1. **Safety is our highest priority.** Human life is more important than speed, convenience, or property. We will evaluate trade-offs and make both proactive and reactive engineering decisions about street design based on this value.
2. **Traffic deaths and severe injuries are preventable and unacceptable.** Using a holistic, data-driven, systems-level approach to street design, we will treat fatal and severe collisions as preventable and unacceptable incidents that can and must be addressed.
3. **People make mistakes.** We will design our streets so that mistakes do not result in death or severe injury.
4. **Slower streets are safer streets.** We will design, construct, and operate our streets for slower speeds with the goal of eliminating all fatal and severe collisions, and protecting our most vulnerable street users.
5. **We will create safer transportation options for people who walk, bike, and take transit.** Creating safer and more comfortable transportation options for people to walk, bike, and take transit can make these modes more attractive and reduce the number of car trips in Berkeley. Fewer car trips can mean fewer severe and fatal collisions.

6. **Street safety must be achieved equitably.** We will respond to the disproportionate burden of traffic deaths and severe injuries on people of color, people with no or low income, people with no or limited English proficiency, people experiencing homelessness, youth, seniors, people with disabilities, and people who walk and bike. Enforcement strategies recommended as part of this plan will be designed to minimize racial profiling. Further, this plan emphasizes engineering and education actions first, supported by equity- and data-driven enforcement in an effort to conduct equitable traffic enforcement consistent with the City of Berkeley's Fair and Impartial Policing Policy.
7. **Vision Zero will be accountable, transparent, and data-driven.** Actions will be data-driven to respond to the causal factors of deaths and severe injuries on Berkeley streets. This response will utilize both proven methods and innovative strategies. We will perform annual monitoring, reporting, and evaluation through an equity lens. We will communicate clearly what resources are necessary to achieve Vision Zero, why street design modifications are proposed, and the basis for prioritizing competing improvements.

TAKING ACTION

The City of Berkeley’s Vision Zero action items described on the following pages demonstrate a **comprehensive, integrated approach** to get the City to zero. They rest on three pillars: 1) The Vision Zero Program, 2) Safer Streets for Everyone, and 3) Safer Streets by Everyone. This plan prioritizes engineering, education, and public awareness before enforcement strategies to achieve Vision Zero in Berkeley.

THE VISION ZERO PROGRAM

1.1 Collaboration

Collaborate with City departments, regional and community partners, and mobility providers to achieve Vision Zero goals. Continue commitment from Berkeley elected officials.

1.2 Capacity

Build sustainable funding and staffing to complete Vision Zero action items, including program management, data analysis, infrastructure projects, and education, engagement, and enforcement.

1.3 Transparency and Equity

Establish a milestone reporting schedule. Incorporate equity into data collection, analytics, evaluation, engagement, and reporting.

SAFER STREETS FOR EVERYONE

2.1 Project Planning and Development

Prioritize high-injury streets and the most vulnerable street users.

ACTION ITEM DEVELOPMENT

These actions represent months of collaboration and coordination between the Task Force and Advisory Committee and build on opportunity areas established through a comprehensive review of best practices and Berkeley’s current safety efforts.

2.2 Project Design

Design for vulnerable users of the transportation network, including people of all ages and abilities.

2.3 Project Delivery

Deliver Vision Zero traffic safety infrastructure improvements both reactively and proactively.

SAFER STREETS BY EVERYONE

3.1 Public Awareness

Create a culture of traffic safety by promoting awareness through public information programs and campaigns.

3.2 Enforcement

Transition from a request-based to an equitable and data-driven enforcement strategy focused on the most significant safety violations resulting in fatalities and severe injuries.

I.1 THE VISION ZERO PROGRAM: COLLABORATION

Priority	Action	Lead Department	Timeline
☆	Establish a standing Vision Zero Coordinating Committee consisting of City staff, Commissioners, partner institutions, members of the community, advocacy groups, and community-based organizations who have a role in advancing Vision Zero action items with quarterly meetings organized around a predetermined annual agenda. Seek to establish a funding source to compensate members of the community and community-based organizations to enable their participation.	City Manager's Office	
	Incorporate Vision Zero goals and actions into plan and policy updates of all departments and partner institutions, including the upcoming City of Berkeley Zoning Ordinance update and General Plan Update, UC Berkeley's Long-Range Development Plan, Berkeley Unified School District's Sustainability Plan, the City's Strategic Plan, Departmental Priority Projects Lists, and departmental and individual staff work plans.	City Manager's Office	
	With the Metropolitan Transportation Commission, Alameda County Transportation Commission, and Alameda County Department of Public Health, establish a peer-to-peer Bay Area Vision Zero Network for information-sharing and collaboration on countywide and regional initiatives such as a public health analysis of collision victim hospital data.	Mayor's Office	
	Develop a focused, strategic Vision Zero staff training plan to send key staff responsible for implementing the Vision Zero Action Plan, such as Public Works, Police, Health, Housing, and Community Services, and City Manager's Office and elected officials, to Vision Zero-related conferences and trainings.	City Manager's Office	

I.2 THE VISION ZERO PROGRAM: CAPACITY

Priority	Action	Lead Department	Timeline
☆	<p>Conduct a citywide Vision Zero Action Plan assessment of existing staffing and funding capacity to complete Vision Zero action items.</p> <ul style="list-style-type: none"> • Create a staffing matrix of existing and proposed staff for the delivery of high-priority Vision Zero action items. New or realigned staff needs are anticipated in the areas listed below: <ul style="list-style-type: none"> ○ Public Works safety project team ○ Public Works Vision Zero Program support staff ○ Public Information Officers in key Vision Zero departments including Police and Health, Housing, and Community Services ○ Berkeley Police Department Vision Zero collision data analysis ○ Health, Housing, and Community Services Vision Zero data analysis and public awareness programs • Establish a milestone staffing and funding schedule to complete high-priority Vision Zero action items, including City and grant funds. 	City Manager's Office; Public Works	
☆	<p>Request a Vision Zero Performance Audit to be conducted during the FY21 audit period to evaluate the implementation of the Action Plan and make any needed recommendations, including additional and/or realigned staffing and funding, for effective Vision Zero Action Plan implementation. Provide required six-month updates to City Council.</p>	Public Works	

I.3 THE VISION ZERO PROGRAM: TRANSPARENCY AND EQUITY

Priority	Action	Lead Department	Timeline
☆	<p>Utilize the Berkeley Police Department’s collision report data on parties involved, such as housing status or whether parties involved are disabled, to help address equity gaps in Statewide Integrated Traffic Records System (SWITRS) collision data. Confirm that Berkeley Police Department report training emphasizes consistent use of these collision report data fields and, if needed, provides training resources for avoiding transportation mode bias in collision reporting. When necessary, update the police collision report form to be consistent with emerging mobility modes.</p>	Public Works; Police	
	<p>Provide an annual Vision Zero Progress Report, reviewed by the City Auditor, to City Council, City Department Directors, Vision Zero Coordinating Committee, and Transportation Commission, on progress reducing fatal and severe collisions, including in historically underserved neighborhoods, equity in traffic enforcement, and on meeting the funding, staffing, and Vision Zero program delivery schedules. Include an updated Vision Zero High-Injury Streets map. Utilize Berkeley Police Department collision data to supplement the Statewide Integrated Traffic Records System dataset to avoid lag in data availability.</p>	Public Works	
	<p>Complete a full update of the Vision Zero Action Plan every three years to ensure continued relevancy of the Action Plan by integrating advancements in best practices and technologies. The first update will include an equity evaluation to identify gaps in safety and collision datasets and develop milestones to address inequities, as well as identify strategies to include hospital data provided by Alameda County Department of Public Health, linked to emergency medical services data and police reports, in Vision Zero analyses and maps.</p>	Public Works	
	<p>Maintain an understanding of the Berkeley community’s perception of safety and personal security. Focus direct public engagement to residents of Berkeley’s historically underserved neighborhoods and other vulnerable users.</p>	Health, Housing, and Community Services	

2.1 SAFER STREETS FOR EVERYONE: PROJECT PLANNING AND DEVELOPMENT

Priority	Action	Lead Department	Timeline
☆	Develop a publicly accessible matrix and map to prioritize and track projects. Prioritize both new/existing requests/referrals and delivery of established infrastructure project lists (e.g., Five Year Repaving Program, BeST Plan, etc.) according to the Vision Zero High-Injury Streets map and equity-driven prioritization from City Council adopted plans such as the Bicycle Plan and forthcoming Pedestrian Plan.	City Manager's Office	
☆	Establish a Complete Streets Repaving and Development Project Checklist to ensure proactive and reactive Vision Zero safety infrastructure for people of all ages and abilities are included with each repaving project and in the conditions of approval for development projects. With the Vision Zero Coordinating Committee, consider establishing an equity-driven approach to prioritizing repaving projects.	Public Works	
	Establish a Vision Zero Rapid Response Safety Project Protocol that utilizes data from the renamed Fatal Accident Investigation Team (FAIT), to identify quick-build projects if engineering countermeasures may effectively improve safety. The protocol should outline a path forward for Public Works staff to be a part of the immediate on-the-ground response to an investigation of severe and fatal collisions.	Public Works; Police	
	Conduct before and after studies of a sample of Vision Zero quick-build projects to evaluate countermeasure effectiveness where existing understanding is insufficient.	Public Works	
	Undertake a Standards of Coverage/Response Time Study to provide a data-driven understanding of how safety improvements impact emergency response times.	Fire	
	Establish a pre-approved toolbox of traffic safety infrastructure design treatment improvements with the Vision Zero Coordinating Committee to streamline the implementation of projects.	Public Works	

2.2 SAFER STREETS FOR EVERYONE: PROJECT DESIGN

Priority	Action	Lead Department	Timeline
	Establish Vision Zero Design Guidelines that consolidate policies and design guidelines from Council-adopted plans such as the Pedestrian Plan, Bicycle Plan, and Complete Streets Policy to guide Berkeley's street design, traffic, and parking procedures in order to prioritize safety and reduce the incidence of severe and fatal collisions. Ensure revisions and updates are reviewed by the Vision Zero Coordinating Committee to maintain accessibility for people of all ages and abilities.	Public Works	
	Develop Curbside Management Guidelines and incorporate them into the Vision Zero Guidelines to ensure Berkeley addresses safety concerns at the curb due to existing and emerging mobility options.	Public Works	
	Update the Berkeley Municipal Code to be consistent with the Vision Zero Design Guidelines.	Public Works	
	Refine the existing traffic calming toolbox to include design guidelines for all street types, utilizing Council-adopted plans where applicable. Ensure the traffic calming toolbox is reviewed by the Vision Zero Coordinating Committee to streamline the implementation of projects.	Public Works	

2.3 SAFER STREETS FOR EVERYONE: PROJECT DELIVERY

Priority	Action	Lead Department	Timeline
☆	Proactively build capital-intensive and quick-build safety projects on all Vision Zero High-Injury Streets on a schedule to complete such projects by 2028.	Public Works	
	Reactively build newly identified quick-build projects at locations with recent severe and fatal collisions if engineering countermeasures may effectively improve safety, based on Rapid Response Safety Project Protocol.	Public Works	
	Continue to deliver traffic calming projects. Utilize the traffic calming toolbox and evaluate requests based on an equity- and data-driven approach to implementation for both residential and Vision Zero High-Injury Streets. Increase public awareness of the traffic calming program.	Public Works	

3.1 SAFER STREETS BY EVERYONE: PUBLIC AWARENESS

Priority	Action	Lead Department	Timeline
☆	Develop and proactively deliver a Vision Zero branding, promotional, and educational campaign to increase awareness about Vision Zero and the top traffic violations for severe and fatal injuries in Berkeley, elevating victims' stories. Regularly update the campaign to ensure it is context-specific, accessible, and culturally relevant. Collaborate with community-based organizations to distribute material and promote messages and public events that normalize active transportation and transit as healthy and responsible transportation choices.	Health, Housing, and Community Services	
☆	Establish a Vision Zero Rapid Response Safety Communication Protocol. Employ a communication strategy in response to recent severe and fatal collisions aimed at the human element of traffic safety, including health and prevention messaging to the Berkeley community.	Public Works	
	Partner with UC Berkeley, Berkeley City College, and Berkeley Unified School District to distribute targeted Vision Zero messaging for students.	Public Works	
	Integrate Vision Zero traffic safety awareness and education into training for City employees who drive City vehicles or drive while on City business, including Police, Fire, Public Works, and all City departments and divisions.	City Manager's Office	

3.2 SAFER STREETS BY EVERYONE: ENFORCEMENT

Priority	Action	Lead Department	Timeline
☆	Focus traffic enforcement efforts proportionately on the most significant traffic violations for severe and fatal collisions by party at fault. Focus enforcement efforts on areas of Berkeley where engineering and education efforts have already been implemented. Conduct traffic enforcement consistent with the City of Berkeley's Fair and Impartial Policing Policy.	Police	
☆	Support state-wide traffic safety legislation allowing automated speed enforcement by local agencies, designation of speed limits on local streets based on desired safety outcomes rather than the existing prevailing speed, and the reduction of local residential street speed limits to below 25 MPH, which would allow for 20 MPH speed limit on local residential streets, consistent with "20 Is Plenty" campaigns. Utilize existing legislated automated enforcement strategies, such as red light cameras.	City Manager's Office	
	Rename the Fatal Accident Investigation Team to replace the word "accident" with "collision" and include reference to near-fatal and major collisions, to acknowledge that most collisions are preventable, and to be in line with Vision Zero philosophies.	Police	
	Continue and regularly update a collision data-driven enforcement strategy focusing on collision reports from the renamed Fatal Accident Investigation Team (FAIT) to supplement collision data from SWITRS. Focus on areas of Berkeley where engineering and education efforts have already been implemented. Conduct traffic enforcement consistent with the City of Berkeley's Fair and Impartial Policing policy.	Police	
	Seek opportunities to educate before issuing citations during traffic enforcement.	Police	
	Develop a traffic ticket diversion program for bicycle and pedestrian traffic tickets to promote access to bicycle and pedestrian safety courses and programs.	Police	

APPENDICES

APPENDIX A: VISION ZERO: ACTION PLAN TIMELINE & PROCESS DIAGRAM

The Vision Zero Action Plan development was facilitated by a series of five Task Force and Advisory Committee meetings to build consensus on areas of focus and priority for Vision Zero in Berkeley. This graphic introduces the timeline and key deliverables reviewed at each meeting.

MEETING SCHEDULE

DETAILS & DELIVERABLES

GUIDING PRINCIPLES DEVELOPMENT

An introduction to key Vision Zero concepts that resonate in the City of Berkeley. Meetings included a group exercise to develop Guiding Principles for the Vision Zero Action Plan.

CORE OPPORTUNITY AREAS

A best practices review and benchmarking assessment summarized as core opportunity areas for Berkeley Vision Zero. The best practices review focused on systemic safety strategies from other U.S. cities, while the benchmarking assessment provided an understanding of baseline safety conditions and practices in the City of Berkeley.

ACTION ITEMS

A list of actions to address the identified safety needs, as documented in the Core Opportunity Areas memo.

PRIORITIZED ACTIONS MATRIX

A matrix of prioritized Vision Zero actions for the City of Berkeley, based on input provided throughout the Task Force and Advisory Committee meeting series.

ACTION PLAN

The final summarizing document, documenting the significance of Vision Zero in Berkeley and introducing the City's Vision Zero action items.

APPENDIX B: PRIORITIZED VISION ZERO ACTIONS MATRIX

This matrix documents the action item prioritization for Berkeley's Vision Zero Action Plan. The intention of this prioritization is to help the City determine the list of near-term, immediate actions the City should embark on to achieve Vision Zero. The matrix is not intended to be static – it can be used for each Vision Zero Action Plan update to re-evaluate the near-term focus of Vision Zero for the City. The criteria the prioritization utilizes are:

- **Transformative/High Impact:** Actions are prioritized that would have major positive impacts on safety or City collaboration, based on the Institute of Transportation Engineer's Core Elements of Vision Zero and ongoing City efforts.
- **Existing Resources:** Actions are prioritized that likely already have the needed resources, both staff and funding, to deliver.
- **Staff Priority:** Actions are prioritized that are of interest and priority to the Task Force.
- **Community Priority:** Actions are prioritized that are of interest and priority to the Advisory Committee.

These criteria are based on the existing priorities of the City of Berkeley. The criteria are meant to be fluid and re-evaluated with each new Vision Zero Action Plan update. Each action item will receive a point for each criterion it fulfills. The top performing actions should be the near-term focus of Vision Zero efforts.

PRIORITIZATION RUBRIC

All actions that have a score of 3.5 or greater are considered near-term priorities for the City of Berkeley.

Metric	1	0.5	0
Transformative/ High Impact	Action directly correlates to an ITE Vision Zero Core Element <i>and</i> is an item the City is not currently doing	A Core Element, but lesser transformative impact because the City is already undertaking this effort	Not a Core Element
Existing Resources	High existing staff availability (based on Task Force and Vision Zero Program staff feedback)	Medium existing staff availability	Low existing staff availability
Staff Priority	High priority item (based on Task Force and Vision Zero Program staff feedback)	Medium priority item	Low priority item
Community Priority	High priority item (based on Advisory Committee feedback)	Medium priority item	Low priority item

Pillar	Opportunity Area	Action	Transformative/ High Impact	Existing Resources	Staff Priority	Community Priority	Score

APPENDIX C: SWITRS VIOLATION CODE DATA TABLES

Table I: Cited California Vehicle Code Violation by Party at Fault¹

Cited California Vehicle Code Violation	Party Cited as at Fault						Total
	Driver	Ped	Parked Vehicle	Bicyclist	Other	None Cited	
Traveling at unsafe speeds	11			12			23
Failure to yield at crosswalk	20						20
Failure to yield to oncoming traffic when making a left turn or U-turn	7						7
Failure to stop at a red light	3			3			6
Failure to yield at a stop sign	5						5
Opening door in unsafe conditions	3		1		1		5
Failure to signal	2			2			4
Crossing outside crosswalk or legal crossing	1	3					4
Pedestrian suddenly leaving curb		4					4
Failure to yield to oncoming traffic when entering or crossing road from property or alley	2			1			3
Pedestrian had flashing DON'T WALK		3					3
Passing unsafely	2						2
Driving with 0.04% or more alcohol in blood with a passenger for hire in the vehicle	2						2
Failure to proceed straight or yield properly	1						1
Driving on the wrong side of the road	1						1
Driver passes bicyclist unsafely	1						1
Disobeying traffic control device	1						1
Reckless driving causing bodily injury	1						1
Driving under the influence	1						1

3. This number excludes solo collisions. To understand the total number of severe or fatal collisions, sum this column with the number of solo collisions.

Office of the City Manager

CONSENT CALENDAR

June 28, 2022

To: Honorable Mayor and Members of the City Council

From: Dee Williams-Ridley, City Manager

Submitted by: Liam Garland, Director, Department of Public Works

Subject: Vision Zero Annual Report

RECOMMENDATION

Adopt a Resolution 1) accepting the City of Berkeley Vision Zero Annual Report for 2021-2022; 2) affirming the actions and priorities as stated in the 2020 Berkeley Vision Zero Action Plan; and 3) directing the City Manager to form a Vision Zero Coordinating Committee for guiding the implementation of the 2020 Vision Zero Action Plan, including coordinating with the ongoing Berkeley Department of Transportation (BerKDOT) referral response and the Reimagining Public Safety Task Force, with the goal of developing a Vision Zero Traffic Enforcement policy before proceeding with the “Safer Streets by Everyone: Enforcement” actions described in the Vision Zero Action Plan.

FISCAL IMPACTS OF RECOMMENDATION

The recommendation has no direct fiscal impacts.

CURRENT SITUATION AND ITS EFFECTS

In March 2020, the Berkeley City Council adopted the Berkeley Vision Zero Action Plan (Resolution No. 69,324-N.S). One of the recommended actions in the Plan calls for staff to provide an annual Vision Zero progress report to the Berkeley City Council, describing the City’s progress toward eliminating severe injury and fatal traffic crashes. The Vision Zero Annual Report attached to this staff report is submitted in fulfillment of this recommended action. As described in the Annual Report, the City has made substantial progress on implementing many elements of the Vision Zero Action Plan, while some elements have been temporarily delayed because of the impacts of the COVID-19 pandemic, and other actions are proposed to be elevated in priority for 2022, to strengthen the City’s ability to respond more quickly to severe and fatal traffic crashes. Public Works is supporting these efforts through a combination of City staff and on-call transportation planning and consulting staff.

BACKGROUND

Vision Zero is a safety-first approach to transportation that seeks to eliminate all traffic deaths and severe injuries. In March 2018, the Berkeley City Council adopted a Vision Zero Policy with the goal of eliminating traffic deaths and severe injuries in Berkeley by 2028, and directed staff to form a Vision Zero Task Force and develop a Vision Zero

Action Plan (Resolution No. 68,371-N.S.). Following the March 2018 City Council action, Public Works convened a Vision Zero Task Force and a Vision Zero Advisory Committee. The Task Force consisted of government agency representatives from multiple City of Berkeley Departments and partner agencies, including the Berkeley Police Department; Berkeley Fire Department; Department of Public Works; Department of Health, Housing, and Community Services; AC Transit; the University of California, Berkeley; and the Office of the City Manager. Representatives from the Mayor's and Council Members' offices also participated. The Advisory Committee consisted of members of the public representing various parts of the Berkeley community, including City of Berkeley Commissions, the Berkeley Unified School District Board of Directors, Safe Routes to Schools parents, business associations, and pedestrian and bicycle advocates. In partnership with these two groups, Public Works staff developed a Vision Zero Action Plan.

One of the Plan's priority actions recommended the creation of an ongoing Vision Zero implementation committee. After consultation with the City Clerk, Public Works staff recommended continuation of both the Task Force and the Advisory Committee in one consolidated "Vision Zero Coordinating Committee", formed to advise the City Manager on Action Plan implementation. Similar to the composition of the existing Task Force and Advisory Committee, this new Committee would consist of City staff from affected departments; staff representatives from other relevant public agencies; Commissioners selected by their respective commissions; and other members of the Berkeley community as appropriate. The Committee would be an ad-hoc non-legislative body not subject to the Brown Act, and would meet quarterly to discuss a predetermined work plan and agenda. It would provide quarterly updates to the City Manager that the City Manager would in turn report to the City Council in the form of Information Items. As described in the Annual Report, this item has been delayed due to impacts of the COVID-19 pandemic, and is a high priority for the second half of 2022.

The Draft Vision Zero Action Plan was presented to the Berkeley Transportation Commission on November 21, 2019. The Transportation Commission passed a motion recommending the draft Vision Zero Action Plan for approval by the Berkeley City Council. Transportation Commissioners expressed concern about the Plan's traffic enforcement actions, based on historical patterns of racialized outcomes of traffic enforcement and other equity concerns. In response to these concerns, Public Works staff recommended that new Vision Zero traffic enforcement efforts be undertaken only after the creation of an equity-driven Vision Zero Enforcement Policy, to be developed in partnership with the Berkeley Police Department and with the guidance of the Vision Zero Coordinating Committee. As described in the Annual Report, this item has been delayed pending formation of the Vision Zero Coordinating Committee and the need to coordinate such a policy with the traffic enforcement equity components of the ongoing BerkDOT and Reimagining Public Safety Task Force processes.

As described in the annual report, staff from multiple departments continue to work to elevate in priority certain Vision Zero actions in order to strengthen the City's ability to respond to the most severe, life-changing, near-fatal, and fatal traffic crashes. These actions include the creation of a Quick-build Program as a way to accelerate delivery of traffic safety projects, as well as the development of a Vision Zero Rapid Response Safety Communication Protocol, as a communication strategy in response to recent severe and fatal collisions.

ENVIRONMENTAL SUSTAINABILITY AND CLIMATE IMPACTS

Walking and cycling trips do not release air pollutants or greenhouse gasses. Implementation of the Vision Zero Action Plan as described in the Vision Zero Annual Report aims to increase walking and cycling trips by improving the safety and accessibility of these modes. A survey for the 2017 Berkeley Bicycle Plan found that 71% of Berkeley residents are interested in bicycling, but do not ride because they are concerned about safety. Increasing cycling and walking would help the City achieve the Berkeley Climate Action Plan greenhouse gas emission reduction targets of 80% below year 2000 levels by 2050. The Climate Action Plan states that transportation modes such as walking and cycling must become the primary means of fulfilling the City's mobility needs in order to meet these targets.

RATIONALE FOR RECOMMENDATION

The Berkeley Vision Zero Action Plan outlines a strategic, paradigm-shift approach to eliminating severe and fatal traffic collisions by the year 2028. The Vision Zero Annual report provides an update on progress in implementing the priority actions from this Plan, and affirms the actions and priorities in this Plan.

ALTERNATIVE ACTIONS CONSIDERED

Council could opt not to receive the Annual Report and/or could request updates on Vision Zero via other channels. Council could opt not to affirm the Vision Zero Action Plan actions and priorities, and instead pursue the goal of zero traffic deaths and severe injuries through other, as yet unspecified strategies.

1: Resolution

Exhibit A: Vision Zero Annual Report 2021-2022

RESOLUTION NO. ##,###-N.S.

ACCEPTANCE OF THE BERKELEY VISION ZERO ANNUAL REPORT

WHEREAS, in March 2018 the Berkeley City Council adopted the Vision Zero Policy with a goal of eliminating traffic deaths and severe injuries in Berkeley by 2028, and directed staff to form a Vision Zero Task Force and develop a Vision Zero Action Plan (Resolution No. 68,371-N.S.); and

WHEREAS, in March 2020, the Berkeley City Council adopted the Berkeley Vision Zero Action Plan (Resolution No. 69,324-N.S.); and

WHEREAS, one of the recommended actions in the Plan calls for staff to provide an Annual Vision Zero Progress Report to the Berkeley City Council, describing the City's progress toward eliminating severe injury and fatal traffic crashes; and

WHEREAS, one of the recommended actions in the Plan calls for the creation of an ongoing Vision Zero implementation committee, and creation of this committee has been delayed due to impacts of the COVID-19 pandemic and is a high priority for the second half of 2022; and

WHEREAS, in response to concerns about equity in Vision Zero Traffic Enforcement, Public Works staff recommended that new Vision Zero traffic enforcement efforts be undertaken only after the creation of an equity-driven Vision Zero Enforcement Policy, an item that has been delayed pending formation of a Vision Zero Coordinating Committee and by the need to coordinate such a policy with the ongoing Berkeley Department of Transportation (BerKDOT) organizational process.

NOW THEREFORE, BE IT RESOLVED that the Council of the City of Berkeley hereby accepts the City of Berkeley Vision Zero Annual Report for 2021-2022.

BE IT FURTHER RESOLVED, that the Council of the City of Berkeley affirms the actions and priorities as stated in the 2020 Berkeley Vision Zero Action Plan.

BE IT FURTHER RESOLVED, that the City Manager is directed to form a Vision Zero Coordinating Committee for guiding the implementation of the 2020 Vision Zero Action Plan, including coordinating with the ongoing Berkeley Department of Transportation (BerKDOT) referral response and the Reimagining Public Safety Task Force, with the goal of developing a Vision Zero Traffic Enforcement policy before proceeding with the "Safer Streets by Everyone: Enforcement" actions described in the Vision Zero Action Plan.

VISION ZERO PROGRAM - CORE STAFF

Eric Anderson, Senior Transportation Planner, Vision Zero Program Manager

Matthew Cotterill, Assistant Transportation Planner

Beth Thomas, Principal Transportation Planner

Farid Javandel, Deputy Director of Public Works

Vision Zero is a “One City One Team” effort. In addition to the staff listed above, City workers in nearly every department, including the City Manager’s Office, Public Works, Health Housing and Community Services, the Berkeley Police Department, the Berkeley Fire Department, and others, play an integral role in achieving our goal of zero deaths and severe injuries on Berkeley streets.

ABOUT VISION ZERO

Vision Zero is a strategy to eliminate all traffic fatalities and severe injuries while increasing safe, healthy, and equitable mobility for all. Vision Zero is, first and foremost, an *engineering* strategy that aims to design and build our streets to eliminate all severe and fatal traffic injuries. These engineering efforts are supported by public awareness education and traffic enforcement. Equity-driven Vision Zero traffic enforcement utilizes the best possible data and is focused on areas of Berkeley where engineering and education efforts have already been implemented.

CAPTURING SITES OF FATAL AND SEVERE COLLISIONS

All photos in this report were taken at locations in Berkeley where someone lost their life or sustained a severe injury in a traffic collision. The images demonstrate that there is rarely any way for someone passing by to know a tragedy took place, since things often continue as they did before. Vision Zero challenges this status quo and strips away the societal acceptance that fatal and severe traffic collisions are a necessary byproduct of mobility.

Every year, an average of three people die and at least 33 people are severely injured in Berkeley due to traffic violence. Vision Zero is about recognizing that these deaths and severe injuries are preventable and unacceptable – no one should lose their life or experience a life-altering injury while traveling on Berkeley streets, no matter who they are or how they travel.

We began our commitment to Vision Zero in 2018 through the adoption of a Vision Zero resolution to end all traffic-related deaths and severe injuries on City streets by 2028. We continued this commitment with the adoption of the Vision Zero Action Plan in 2020. The actions described in the Plan and this Annual Report are motivated by the following Vision Statement and Guiding Principles:

The City of Berkeley is committed to an equity-focused, data-driven effort to eliminate traffic deaths and severe injuries on our city streets by 2028.

1. **Safety is our highest priority.**
2. **Traffic deaths and severe injuries are preventable and unacceptable.**
3. **People make mistakes.**
4. **Slower streets are safer streets.**
5. **We will create safer transportation options for people who walk, bike, and take transit.**
6. **Street safety must be achieved equitably.**
7. **Vision Zero will be accountable, transparent, and data-driven.**

While every action item described in the Plan is fundamental to the success of Vision Zero, the Plan's Priority Actions have been the near-term focus of the Vision Zero Program in Berkeley during the year since adoption of the Plan, and are the focus of this progress report. The full list of actions for the City of Berkeley is shown in **Appendix A: Vision Zero Actions**.

**WHY WE NEED
VISION ZERO**

BERKELEY NEEDS VISION ZERO

Every year, on average three people die and at least 33 people sustain severe injuries on Berkeley streets due to traffic violence. This is unacceptable and preventable – no one should lose their life or suffer a life-altering injury when traveling in our city. Unless otherwise noted, all updated traffic crash data in this Annual Report is from the years 2011 to 2020 - the most recent ten years of collision data available through the Statewide Integrated Traffic Records System (SWITRS).

VISION ZERO IS ABOUT THE 2%

On average, 2% of collisions on Berkeley streets result in a fatality or severe injury.

That is 2% too many.

VISION ZERO IS ABOUT MODE

Collisions disproportionately impact people riding bicycles and people walking. The numbers are stark – collisions involving someone riding a bicycle or walking make up almost **61%** of collisions that result in death or severe injury, despite making up just **40%** of trips in Berkeley.

DISPROPORTIONATE BURDEN

We know that people of color, people with no or low income, people with no or limited English proficiency, people experiencing homelessness, youth, seniors, and people with disabilities are over-represented in fatal and severe injury collisions, but we currently have limited data within SWITRS collision reports to understand the magnitude of the disproportionate burden. The Vision Zero Action Plan addresses those data gaps head-on and establishes strategies to start collecting and utilizing more meaningful data to understand inequities on our streets. We also are not waiting for more data to take an equity-driven approach to Vision Zero.

Collision Data: SWITRS ten-year injury collision data, 2011-2020
 Mode Data: California Household Travel Survey for the City of Berkeley, 2012

VISION ZERO IS ABOUT TRAFFIC VIOLATIONS

Every collision involves multiple factors. The top traffic violations reported during the years 2011 to 2020 for collisions in Berkeley that resulted in death or severe injury were **traveling at unsafe speeds; driver not yielding at crosswalk; failing to signal; failure to yield to oncoming traffic while making left or U-turns; pedestrian crossing outside crosswalk or legal crossing.** Vision Zero focuses on the most significant factors associated with severe and fatal traffic collisions in order to make the greatest impact.

Safety is also about how we share public space and how we interact on our streets. When we consider the primary party at fault, the top traffic violations for severe and fatal vehicle-involved collisions in Berkeley were **drivers not yielding at crosswalks; drivers traveling at unsafe speeds; drivers failing to yield to oncoming traffic when making a left- or U-turn; drivers not yielding at stop signs; and pedestrian crossing outside crosswalk or legal crossing.** While party at fault data is subjective and may not include the victim’s perspective, it can add to our understanding of the unsafe behaviors that result in severe and fatal collisions.

Violation data tables are provided in **Appendix B: SWITRS Violation Code Data Tables.**

Collision Data: SWITRS ten-year injury collision data, 2011-2020

GETTING TO ZERO

Berkeley's Vision Zero goal is to reach zero severe and fatal traffic crashes by the year 2028. To this end, the Berkeley Vision Zero Program tracks severe and fatal traffic crashes year-to-year, utilizing the most recently available 10-year SWITRS dataset. The chart on the next page shows severe and fatal crashes by mode for the last 10 years, along with US Census data "Journey to Work" mode share.

Following a peak in 2015 and an apparent decrease in severe and fatal traffic crashes in 2016 and 2017, beginning in 2018 SWITRS crash data appeared to show a substantial increase in severe injury traffic crashes for nearly all modes of transportation in Berkeley. SWITRS is a State of California data clearinghouse that gathers traffic crash data as reported by local police departments using the California Highway Patrol collision report form (CHP 555). Public Works and Berkeley Police Department staff are looking at a variety of data such as changes in mode share (e.g. the number of people walking, biking, driving, or taking public transit or ride-hailing services to work), changes in traffic volumes, or other factors to try to understand this apparent increase in severe injury traffic crashes. As shown by the "Journey to Work" transportation mode share trend lines on the graph, this change does not appear to be correlated with increases in transportation activity. Our preliminary analysis suggests that this apparent increase may be linked to changes in the crash report form (CHP 555) used by officers to record the crash data made available through SWITRS.

In 2017, California changed the terminology to describe the extent of injury on the CHP 555 form. This form previously offered the options: FATAL INJURY – SEVERE INJURY – OTHER VISIBLE INJURY – COMPLAINT OF PAIN. It was revised to offer the options: FATAL INJURY – SUSPECTED SERIOUS INJURY –

SUSPECTED MINOR INJURY – POSSIBLE INJURY. Previously, officers completing the form were required to make an informed judgment as to whether or not an injury was "severe"; the revised form now requires them to assess whether they merely suspect an injury may be "serious". The change in descriptive terminology from severe to serious and the introduction of the new term "suspected" may have inadvertently lowered the standard for characterizing traffic injuries, leading officers to characterize more injuries as "suspected serious" than would have previously been categorized as "severe". As shown on the chart on the following page, the overall number of reported traffic crashes during the 10-year period from 2011-2020 decreased from 2017 to 2020. In absolute numbers, this decrease was mostly in

property damage crashes, from a 10-year high of 1100 crashes in 2017 to a 10-year low of 443 crashes in 2019. Importantly, the total number of injury crashes during this period also decreased: starting in 2017, the total number of injury crashes declined, reaching a 10-year low point of 601 crashes in 2019, with a moderate increase to 691 total injury crashes in 2020. During 2017-2019, while the changes in terminology in the CHP 555 Crash Report form were taking effect, "Possible Injury" crashes (formerly "Complaint of Pain") appeared to decrease dramatically, while "Suspected Minor Injury" (formerly "Visible Injury") and "Suspected Serious Injury" (formerly "Severe Injury") both appeared to increase dramatically. In 2020, the total number of crashes of all types declined, presumably due to reduced transportation activity during the beginning of the COVID-19 pandemic, but as noted above, by contrast the total number of injury crashes increased from 2019 to 2020. This increase was in the least severe category: "Possible Injury", whereas the number of "Suspected Minor" and "Suspected Serious" injuries both declined at a rate greater rate than the rate of decline of the total of all types of crashes.

Collision Data: SWITRS ten-year injury collision data, 2011-2020
 Mode Share Data: US Census, ACS 5-Year Journey to Work, 2011-2020

It is possible that some crashes formerly classified as Complaint of Pain are now being recorded as Suspected Minor Injury or Suspected Severe Injury. As such, apparent trends in crash data since 2017

may be at least in part related to changes to the terminology used on the CHP 555. Public Works staff are discussing potential strategies for working around these inconsistencies in SWITRS data. These issues put additional emphasis on the need to develop an alternative metric that indicates whether Berkeley is successfully moving toward our goal of zero severe injury and fatality traffic crashes by 2028. City staff plans to develop an alternative crash data metric based on local Berkeley Police Department crash report data for the upcoming Vision Zero Action Plan update in 2023.

Collision Data: SWITRS ten-year injury collision data, 2011-2020

APPENDIX I

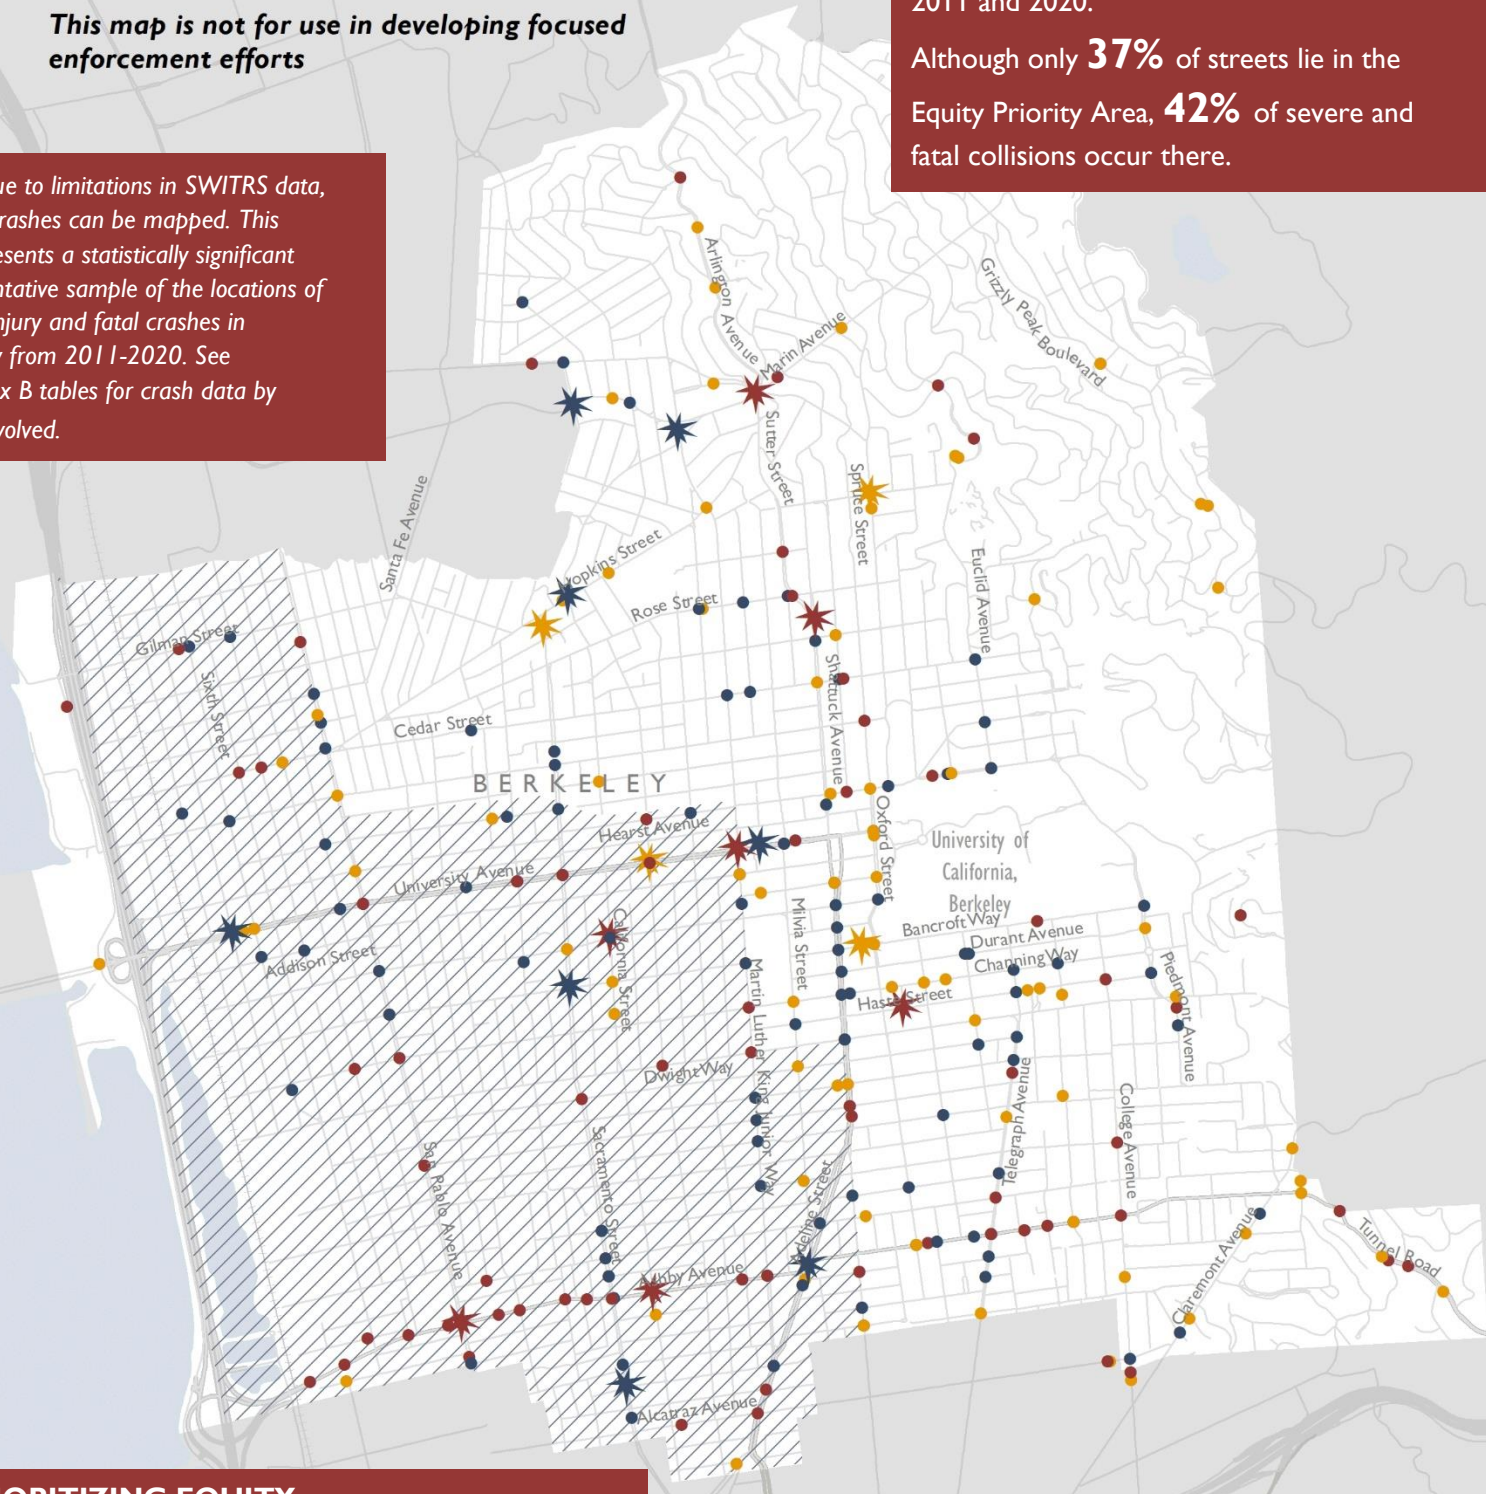

This map shows the locations of **295** of the **357** severe injury and fatality traffic crashes that occurred on Berkeley streets between 2011 and 2020.

Although only **37%** of streets lie in the Equity Priority Area, **42%** of severe and fatal collisions occur there.

LOCATIONS OF SEVERE AND FATAL COLLISIONS

This map is not for use in developing focused enforcement efforts

Note: due to limitations in SWITRS data, not all crashes can be mapped. This map presents a statistically significant representative sample of the locations of severe injury and fatal crashes in Berkeley from 2011-2020. See Appendix B tables for crash data by party involved.

PRIORITIZING EQUITY

Lower income residents and people of color are disproportionately impacted by the risk of traffic injuries and fatalities. The Equity Priority Area considers historic federal Home Owners' Loan Corporation "redlining" practices, racial/ethnic composition, property value, and cultural centers to guide the City of Berkeley in prioritizing infrastructure projects that remedy systemic inequity. A full description of the Equity Priority Area methodology can be found in the City of Berkeley Pedestrian Plan.

/// Equity Priority Area

Collision Type

Bicyclist - Fatal	Bicyclist - Severe Injury
Pedestrian - Fatal	Pedestrian - Severe Injury
Driver - Fatal	Driver - Severe Injury

Collision Data: SWITRS ten-year injury collision data 2011-2020

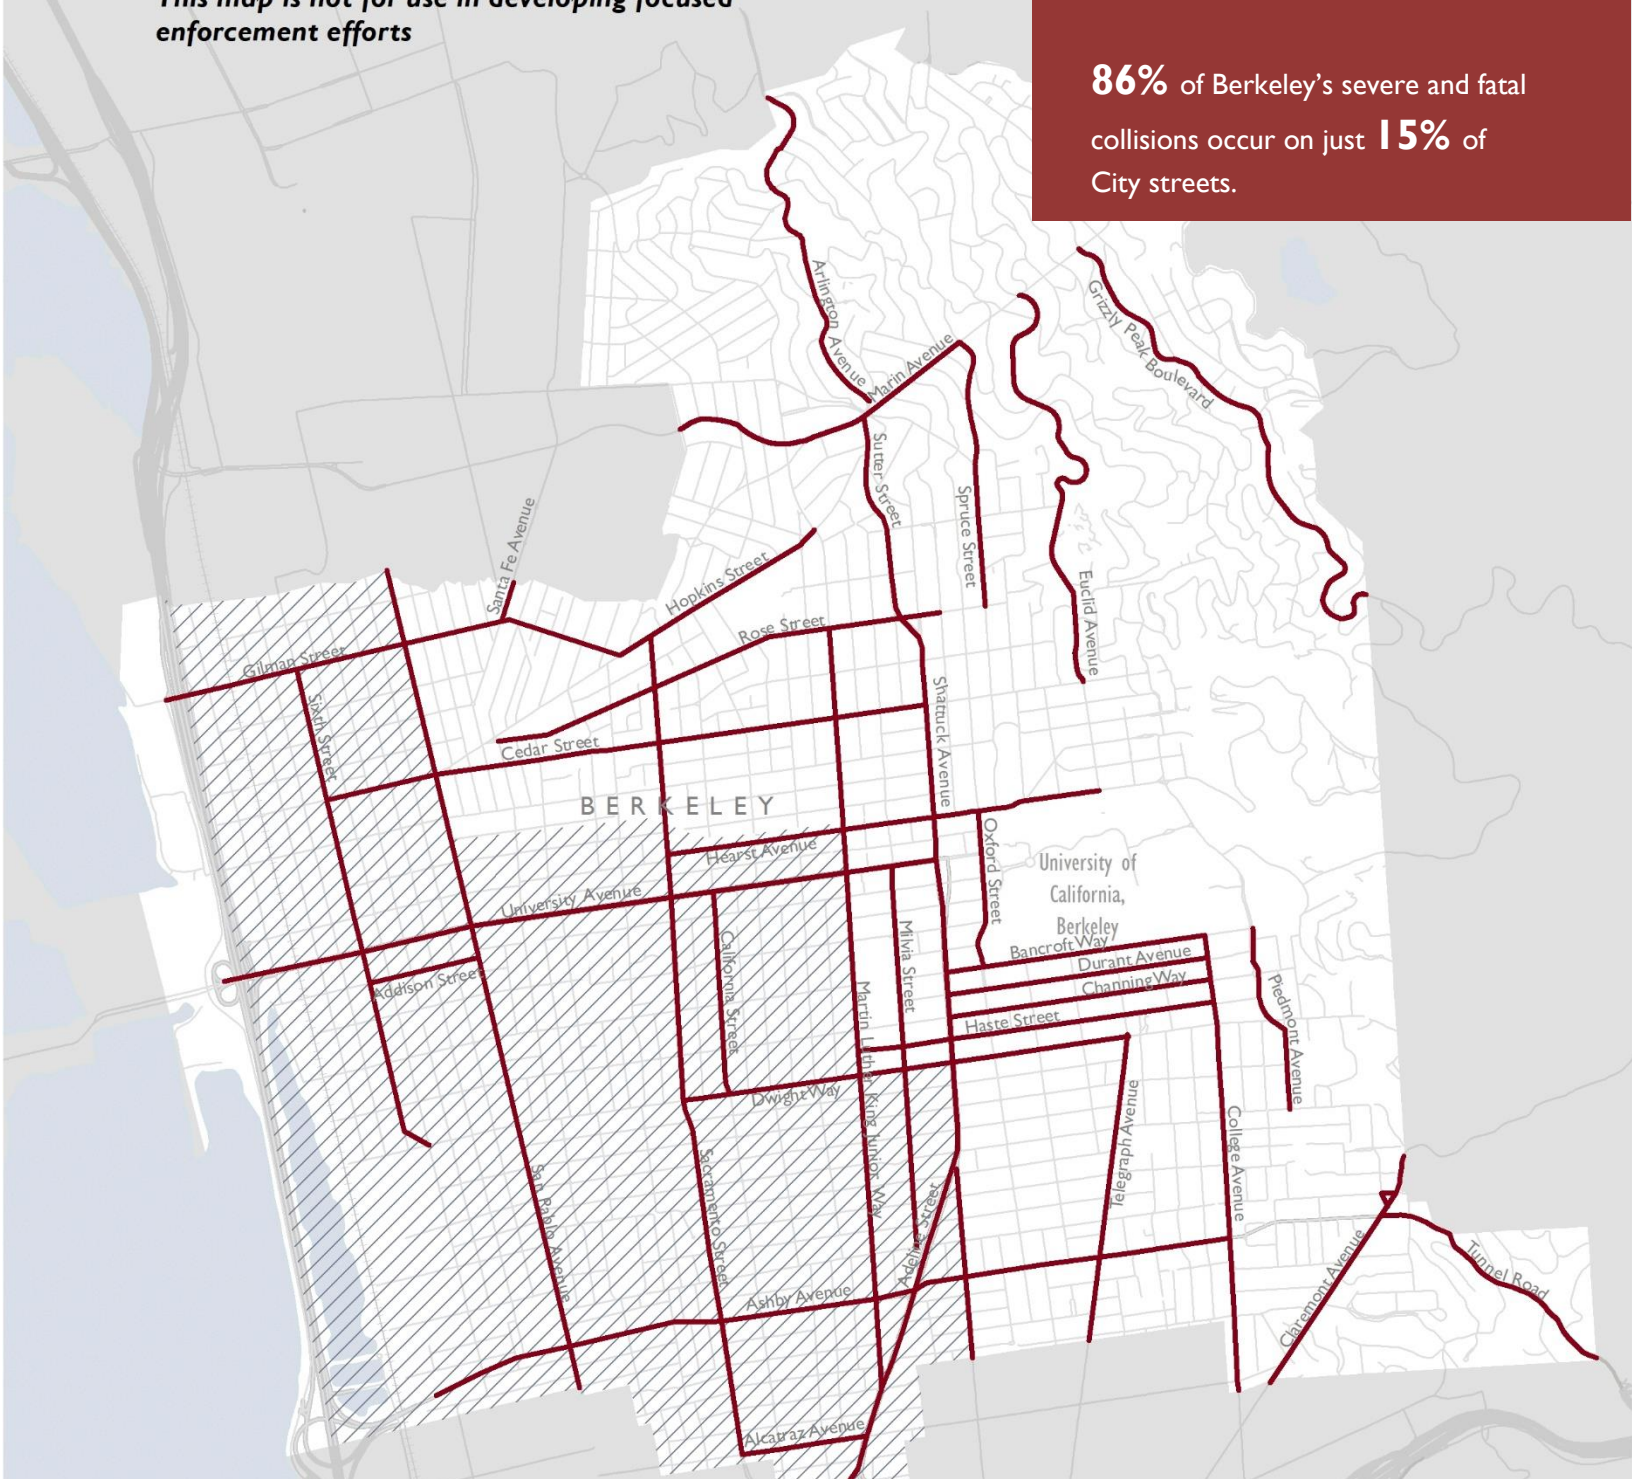

APPENDIX I

The High-Injury Streets map represents the City of Berkeley's streets with the most severe injury and fatality crashes based on data between 2011 and 2020.

86% of Berkeley's severe and fatal collisions occur on just **15%** of City streets.

HIGH-INJURY STREETS

This map is not for use in developing focused enforcement efforts

PRIORITIZING EQUITY

Lower income residents and people of color are disproportionately impacted by the risk of traffic injuries and fatalities. The Equity Priority Area considers historic federal Home Owners' Loan Corporation "redlining" practices, racial/ethnic composition, property value, and cultural centers to guide the City of Berkeley in prioritizing infrastructure projects that remedy systemic inequity. A full description of the Equity Priority Area methodology can be found in the City of Berkeley Pedestrian Plan.

Collision Data: SWITRS ten-year injury collision data, 2011-2020

PRIORITY ACTIONS – PROGRESS AND PRIORITIES

The Vision Zero Action Plan contains 33 recommended actions, prioritized into the 11 Priority Actions listed below. The Plan was adopted by the Berkeley City Council in March 2020, almost exactly one week before the start of COVID-19 Public Health Shelter in Place orders. Despite the ongoing challenges of this unprecedented public health crisis, the City continues to make substantial progress on Vision Zero Priority Actions. Please see Appendix A for a complete list and full descriptions of each action.

- Establish a standing Vision Zero Coordinating Committee:** During COVID-19, existing Commission and Committee meetings were temporarily suspended. Formation of a new committee was not possible during that time, and as such this item has been on hold due to COVID-19. Online Commission meetings were authorized for 2021, and it is anticipated that in-person or hybrid commission and committee meetings will eventually be authorized. The City plans to form this new Committee in 2022, with the goal of holding two quarterly Coordinating Committee meetings during the second half of 2022. Special attention will be given to equity and accessibility in recruitment and retention of members of the Berkeley community to serve on the committee. Formation of this Committee is integral to initiating certain new Vision Zero actions as well as continuing progress on some of the other in-process Vision Zero actions.
- Conduct a citywide Vision Zero Action Plan assessment, including creating a staffing matrix and establishing a milestone staffing and funding schedule:** During COVID-19, City resources were reprioritized to respond to the public health crisis. As such, a citywide assessment of staffing and resources would not have yielded results useful for the Vision Zero program in future years. In 2023 Public Works staff plans to initiate an assessment process following a return to more normal City operations in 2022. Additionally, the Department of Public Works has initiated an organizational analysis related to the possible formation of a Berkeley Department of Transportation (BerkDOT). The BerkDOT process is in response to a July 14, 2020 Berkeley City Council referral to the City Manager to “pursue the creation of a Berkeley Department

What is “Rapid Response”?

City staff from multiple departments are working to strengthen the City’s ability to respond more quickly to the most severe, life-changing, near-fatal, and fatal traffic crashes. This Rapid Response strategy incorporates several Vision Zero Actions: Quick-build Traffic Safety Projects, the Vision Zero Rapid Response Safety Communication Protocol, and the Vision Zero Branding, Promotional, and Educational Campaign.

Public Works has initiated development of a Quick-Build Program to use less expensive, less permanent materials to deliver Vision Zero traffic safety projects more quickly. The Quick-Build Program would respond to severe and fatal traffic crashes with quick-build traffic safety interventions in the hope of preventing future incidents.

Public Works has also initiated development of a Vision Zero Branding, Promotional, and Educational Campaign as well as a Safety Communication Protocol. Together, these two actions would function as a traffic safety public awareness communication strategy, pushing out relevant traffic safety messages in response to recent severe and fatal collisions.

of Transportation (BerKDOT) to ensure a racial justice lens in traffic enforcement and the development of transportation policy, programs, and infrastructure”. Where appropriate, the City intends to address remaining organizational issues related to Vision Zero through the BerKDOT process.

- Proactively build capital-intensive and quick-build safety projects:** Despite the challenges and delays related to COVID-19, the City has continued to make substantial progress delivering traffic safety and transportation improvement projects on Vision Zero High-Injury Streets. Among other capital-intensive projects, within the last year the Department of Public Works continued construction on the final phase of the 9th Street Bicycle Boulevard Pathway, and completed construction on the Sacramento Complete Streets Project and the Milvia Bikeway Project. Public Works initiated the public engagement, design, and engineering process for the Southside Complete Streets project, the City’s largest complete streets project to date, and initiated a grant-funded quick-build pedestrian crossing safety improvements project on Martin Luther King Jr. Way between Dwight Way and Russell Street. Public Works continues to approach repaving projects as “Complete Streets”. Recent repaving projects, such as Center Street in Downtown Berkeley, have included construction of the bikeways called for in the Berkeley Bicycle Plan (2017). Recent grant funding successes include funds for public engagement and preliminary engineering of Adeline Street between MLK Jr. Way and the south city limits, as described in the Adeline Corridor Specific Plan.. Public Works has recently submitted California Active Transportation Program, Alameda County Transportation Commission Capital Improvement Program, and California Highway Safety Improvement Program grant applications for new projects that improve safety along or at crossings of High-Injury Streets in Berkeley. In 2020, Public Works initiated development of a “quick-build” program to formalize the accelerated use of less expensive, less permanent materials to deliver Vision Zero traffic safety projects more quickly and affordably, in order to help meet our 2028 goal of zero traffic deaths and severe injuries. Quick-builds are sometimes called “paint and posts” projects for their use of street markings and traffic delineator posts. However, quick-build projects can include a more aesthetically-appealing toolbox of safety measures and design elements that provide a more lasting investment in our neighborhoods, such as colored pavement and more visible crosswalks; concrete pedestrian crossing islands; planter boxes; and even solar-powered streetlights and pedestrian crossing beacons. In the past, Berkeley has used a quick-build approach to incorporate protected bikeways, bus only lanes, or bus boarding islands into repaving projects such as Bancroft Way between Fulton Street and Dana Street, or Adeline Street between Shattuck Avenue and Ashby Avenue. In 2022 Public Works staff will continue development of a Quick-Build Program, to formalize a design toolbox and accelerate delivery of traffic safety projects from City Council-adopted transportation plans. The Quick-Build Program is one of the actions which Public Works staff has elevated in priority for 2022, to proactively address safety issues and to strengthen the City’s ability to respond to severe and fatal traffic crashes with quick-build traffic safety interventions. For a summary of capital-intensive and quick-build project progress, please see the City’s Vision Zero Story Map: <https://storymaps.arcgis.com/stories/13fc2f8a4eb548c68ca57a099b33b8cd>
- Request a Vision Zero Performance Audit:** Public Works planned to request an audit of the Vision Zero program at the end of year one of the program, as a companion metric to the staffing and funding assessment described above. However, due to the impacts of the COVID-19 response, this

audit request has been delayed pending completion of the assessment and other organizational tasks, potentially in 2023.

- **Establish a Vision Zero Rapid Response Safety Communication Protocol:** Public Works initiated this task in 2020 and continued to work with other City Departments by convening a Rapid Response group meeting in response to each of the fatal crashes that occurred over the last year.. The Vision Zero Rapid Response Safety Communication Protocol is one of the actions which City staff from multiple departments will continue with as a priority for 2022, as a communication strategy in response to recent severe and fatal collisions.
- **Support statewide traffic safety legislation:** Public Works initiated this task in 2020 as part of staff advocacy to encourage the Metropolitan Transportation Commission (MTC) to form a Regional Vision Zero Working Group. MTC has formed a Working Group, and as part of this group's work plan, City staff has asked MTC to leverage the influence of Bay Area communities to influence state traffic safety legislation. This legislative agenda would include allowing cities to lower the statutory speed limit below the current minimum 25 MPH, and allowing automated traffic enforcement. Automated enforcement has also been identified as a traffic enforcement strategy to support the equity goals of Berkeley's Reimagining Public Safety process.
- **Establish a Complete Streets Repaving and Development Project Checklist:** Public Works Transportation Division staff initiated this task in 2020 in partnership with Engineering Division project delivery staff and Planning Department staff. Public Works anticipates completion of this action in 2022 or 2023.
- **Develop and proactively deliver a Vision Zero branding, promotional, and educational campaign:** Public Works staff initiated this task in 2020 and have worked with a consultant to develop preliminary logos and taglines for program branding and preliminary public messaging. The preliminary materials were presented to the Transportation Commission in January 2021. Based on Transportation Commission feedback, before continuing further with the branding and messaging process, Public Works staff plans to seek the input of the Vision Zero Coordinating Committee in 2022, to ensure that all materials are representative of and accessible to all members of the Berkeley community. Following this, Public Works staff will be developing public awareness traffic safety messages that can be deployed as part of a proactive Vision Zero educational campaign, as well as utilized as part of a Rapid Response Communication Protocol following severe injury or fatality crashes.
- **Develop a publicly accessible matrix and map to prioritize and track projects:** In 2020 and continuing through 2021, Public Works staff initiated development of a GIS-based Vision Zero "Story Map" to track capital projects on Vision Zero High-Injury Streets that are part of the City's Capital Improvement Program. In 2022, staff will continue to update this map to show ongoing capital project progress. Public Works Staff anticipates working with the Vision Zero Coordinating Committee to ensure this communication tool meets the needs of the Berkeley Community as articulated by Berkeley residents and stakeholders who participated in the Vision Zero Advisory Committee during development of the Action Plan. The Vision Zero Story Map can be found here:
<https://storymaps.arcgis.com/stories/13fc2f8a4eb548c68ca57a099b33b8cd>

- **Utilize the Berkeley Police Department’s collision report data on parties involved:** Public Works staff initiated this task in 2020 as part of Vision Zero Program liaison activities with Berkeley Police Department Traffic Bureau officers to access and better understand Police crash report data. Public Works staff continued to work on data reporting and analysis with Traffic Bureau officers in 2021, and anticipates working with Police Department officers in developing an alternative crash data metric based on local Berkeley Police Department crash report data for the upcoming Vision Zero Action Plan update in 2023. .
- **Focus traffic enforcement efforts proportionately on the most significant traffic violations for severe and fatal collisions by party at fault:** The Vision Zero Action Plan includes tables of crash data organized by “party at fault” to help us better understand which of our transportation behaviors are putting others at risk on our streets. In 2020, following Council adoption of the Plan, Public Works staff provided these tables to Berkeley Police Department Traffic Bureau staff for use in implementing the 2020-2021 California Office of Traffic Safety (OTS) traffic enforcement grant. As part of the OTS-funded traffic enforcement efforts, Traffic Bureau officers have conducted DUI and distracted driving patrols, as well as traffic enforcement patrols focusing on problematic locations and behaviors, including violations identified by Vision Zero crash data analysis, such as excess speed, failure to yield, and failure to stop at stop signs/signals. These enforcement activities have included both general traffic safety patrols as well as operations focused specifically on pedestrian and bicycle safety. While enforcement activities may engage with anyone walking, biking, or driving on Berkeley streets, due to the nature of the violations these patrols often focus on the Primary Collision Factors (PCFs) where a driver is most often found at fault. Appendix C of this report updates the Vision Zero Action Plan “party at fault” crash data tables to include the most recent 10 years of SWITRS data. At the time the Draft Vision Zero Action Plan was presented to the Berkeley Transportation Commission on November 21, 2019, Commissioners expressed concern about the Plan’s traffic enforcement actions, based on historical patterns of racialized outcomes of traffic enforcement and other equity concerns. In response to these concerns, Public Works staff recommended that new Vision Zero traffic enforcement efforts be undertaken only after the creation of an equity-driven Vision Zero Enforcement Policy, to be developed in partnership with the Berkeley Police Department and with the guidance of the Vision Zero Coordinating Committee. On July 14, 2020, the Berkeley City Council made a historic commitment to reimagine the City’s approach to public safety with the passage of an omnibus package of referrals, resolutions, and directions, with the goal of achieving a new and transformative model of positive, equitable and community-centered public safety for Berkeley. One component of this ongoing process was the formation of a Reimagining Public Safety Task Force. As such, any new Vision Zero traffic enforcement efforts have been delayed pending formation of the Vision Zero Coordinating Committee and the need to coordinate with the traffic enforcement equity components of the ongoing BerkDOT and Reimagining Public Safety Task Force processes. Public Works staff anticipates working with Traffic Bureau staff to implement new Vision Zero traffic enforcement actions consistent with whatever Vision Zero traffic enforcement policy results from Vision Zero Steering Committee and ongoing organizational and public safety processes.

APPENDIX A: VISION ZERO ACTIONS

I.1 THE VISION ZERO PROGRAM: COLLABORATION

Priority	Action	Lead Department	Timeline
☆	Establish a standing Vision Zero Coordinating Committee consisting of City staff, Commissioners, partner institutions, members of the community, advocacy groups, and community-based organizations who have a role in advancing Vision Zero action items with quarterly meetings organized around a predetermined annual agenda. Seek to establish a funding source to compensate members of the community and community-based organizations to enable their participation.	City Manager's Office	
	Incorporate Vision Zero goals and actions into plan and policy updates of all departments and partner institutions, including the upcoming City of Berkeley Zoning Ordinance update and General Plan Update, UC Berkeley's Long-Range Development Plan, Berkeley Unified School District's Sustainability Plan, the City's Strategic Plan, Departmental Priority Projects Lists, and departmental and individual staff work plans.	City Manager's Office	
	With the Metropolitan Transportation Commission, Alameda County Transportation Commission, and Alameda County Department of Public Health, establish a peer-to-peer Bay Area Vision Zero Network for information-sharing and collaboration on countywide and regional initiatives such as a public health analysis of collision victim hospital data.	Mayor's Office	
	Develop a focused, strategic Vision Zero staff training plan to send key staff responsible for implementing the Vision Zero Action Plan, such as Public Works, Police, Health, Housing, and Community Services, and City Manager's Office and elected officials, to Vision Zero-related conferences and trainings.	City Manager's Office	

I.2 THE VISION ZERO PROGRAM: CAPACITY

Priority	Action	Lead Department	Timeline
☆	<p>Conduct a citywide Vision Zero Action Plan assessment of existing staffing and funding capacity to complete Vision Zero action items.</p> <ul style="list-style-type: none"> • Create a staffing matrix of existing and proposed staff for the delivery of high-priority Vision Zero action items. New or realigned staff needs are anticipated in the areas listed below: <ul style="list-style-type: none"> ○ Public Works safety project team ○ Public Works Vision Zero Program support staff ○ Public Information Officers in key Vision Zero departments including Police and Health, Housing, and Community Services ○ Berkeley Police Department Vision Zero collision data analysis ○ Health, Housing, and Community Services Vision Zero data analysis and public awareness programs • Establish a milestone staffing and funding schedule to complete high-priority Vision Zero action items, including City and grant funds. 	City Manager's Office; Public Works	
☆	<p>Request a Vision Zero Performance Audit to be conducted during the FY21 audit period to evaluate the implementation of the Action Plan and make any needed recommendations, including additional and/or realigned staffing and funding, for effective Vision Zero Action Plan implementation. Provide required six-month updates to City Council.</p>	Public Works	

I.3 THE VISION ZERO PROGRAM: TRANSPARENCY AND EQUITY

Priority	Action	Lead Department	Timeline
☆	<p>Utilize the Berkeley Police Department’s collision report data on parties involved, such as housing status or whether parties involved are disabled, to help address equity gaps in Statewide Integrated Traffic Records System (SWITRS) collision data. Confirm that Berkeley Police Department report training emphasizes consistent use of these collision report data fields and, if needed, provides training resources for avoiding transportation mode bias in collision reporting. When necessary, update the police collision report form to be consistent with emerging mobility modes.</p>	Public Works; Police	
	<p>Provide an annual Vision Zero Progress Report, reviewed by the City Auditor, to City Council, City Department Directors, Vision Zero Coordinating Committee, and Transportation Commission, on progress reducing fatal and severe collisions, including in historically underserved neighborhoods, equity in traffic enforcement, and on meeting the funding, staffing, and Vision Zero program delivery schedules. Include an updated Vision Zero High-Injury Streets map. Utilize Berkeley Police Department collision data to supplement the Statewide Integrated Traffic Records System dataset to avoid lag in data availability.</p>	Public Works	
	<p>Complete a full update of the Vision Zero Action Plan every three years to ensure continued relevancy of the Action Plan by integrating advancements in best practices and technologies. The first update will include an equity evaluation to identify gaps in safety and collision datasets and develop milestones to address inequities, as well as identify strategies to include hospital data provided by Alameda County Department of Public Health, linked to emergency medical services data and police reports, in Vision Zero analyses and maps.</p>	Public Works	
	<p>Maintain an understanding of the Berkeley community’s perception of safety and personal security. Focus direct public engagement to residents of Berkeley’s historically underserved neighborhoods and other vulnerable users.</p>	Health, Housing, and Community Services	

2.1 SAFER STREETS FOR EVERYONE: PROJECT PLANNING AND DEVELOPMENT

Priority	Action	Lead Department	Timeline
☆	Develop a publicly accessible matrix and map to prioritize and track projects. Prioritize both new/existing requests/referrals and delivery of established infrastructure project lists (e.g., Five Year Repaving Program, BeST Plan, etc.) according to the Vision Zero High-Injury Streets map and equity-driven prioritization from City Council adopted plans such as the Bicycle Plan and forthcoming Pedestrian Plan.	City Manager's Office	
☆	Establish a Complete Streets Repaving and Development Project Checklist to ensure proactive and reactive Vision Zero safety infrastructure for people of all ages and abilities are included with each repaving project and in the conditions of approval for development projects. With the Vision Zero Coordinating Committee, consider establishing an equity-driven approach to prioritizing repaving projects.	Public Works	
	Establish a Vision Zero Rapid Response Safety Project Protocol that utilizes data from the renamed Fatal Accident Investigation Team (FAIT), to identify quick-build projects if engineering countermeasures may effectively improve safety. The protocol should outline a path forward for Public Works staff to be a part of the immediate on-the-ground response to an investigation of severe and fatal collisions.	Public Works; Police	
	Conduct before and after studies of a sample of Vision Zero quick-build projects to evaluate countermeasure effectiveness where existing understanding is insufficient.	Public Works	
	Undertake a Standards of Coverage/Response Time Study to provide a data-driven understanding of how safety improvements impact emergency response times.	Fire	
	Establish a pre-approved toolbox of traffic safety infrastructure design treatment improvements with the Vision Zero Coordinating Committee to streamline the implementation of projects.	Public Works	

2.2 SAFER STREETS FOR EVERYONE: PROJECT DESIGN

Priority	Action	Lead Department	Timeline
	Establish Vision Zero Design Guidelines that consolidate policies and design guidelines from Council-adopted plans such as the Pedestrian Plan, Bicycle Plan, and Complete Streets Policy to guide Berkeley's street design, traffic, and parking procedures in order to prioritize safety and reduce the incidence of severe and fatal collisions. Ensure revisions and updates are reviewed by the Vision Zero Coordinating Committee to maintain accessibility for people of all ages and abilities.	Public Works	
	Develop Curbside Management Guidelines and incorporate them into the Vision Zero Guidelines to ensure Berkeley addresses safety concerns at the curb due to existing and emerging mobility options.	Public Works	
	Update the Berkeley Municipal Code to be consistent with the Vision Zero Design Guidelines.	Public Works	
	Refine the existing traffic calming toolbox to include design guidelines for all street types, utilizing Council-adopted plans where applicable. Ensure the traffic calming toolbox is reviewed by the Vision Zero Coordinating Committee to streamline the implementation of projects.	Public Works	

2.3 SAFER STREETS FOR EVERYONE: PROJECT DELIVERY

Priority	Action	Lead Department	Timeline
☆	Proactively build capital-intensive and quick-build safety projects on all Vision Zero High-Injury Streets on a schedule to complete such projects by 2028.	Public Works	
	Reactively build newly identified quick-build projects at locations with recent severe and fatal collisions if engineering countermeasures may effectively improve safety, based on Rapid Response Safety Project Protocol.	Public Works	
	Continue to deliver traffic calming projects. Utilize the traffic calming toolbox and evaluate requests based on an equity- and data-driven approach to implementation for both residential and Vision Zero High-Injury Streets. Increase public awareness of the traffic calming program.	Public Works	

3.1 SAFER STREETS BY EVERYONE: PUBLIC AWARENESS

Priority	Action	Lead Department	Timeline
☆	Develop and proactively deliver a Vision Zero branding, promotional, and educational campaign to increase awareness about Vision Zero and the top traffic violations for severe and fatal injuries in Berkeley, elevating victims' stories. Regularly update the campaign to ensure it is context-specific, accessible, and culturally relevant. Collaborate with community-based organizations to distribute material and promote messages and public events that normalize active transportation and transit as healthy and responsible transportation choices.	Health, Housing, and Community Services	
☆	Establish a Vision Zero Rapid Response Safety Communication Protocol. Employ a communication strategy in response to recent severe and fatal collisions aimed at the human element of traffic safety, including health and prevention messaging to the Berkeley community.	Public Works	
	Partner with UC Berkeley, Berkeley City College, and Berkeley Unified School District to distribute targeted Vision Zero messaging for students.	Public Works	
	Integrate Vision Zero traffic safety awareness and education into training for City employees who drive City vehicles or drive while on City business, including Police, Fire, Public Works, and all City departments and divisions.	City Manager's Office	

3.2 SAFER STREETS BY EVERYONE: ENFORCEMENT

Priority	Action	Lead Department	Timeline
☆	Focus traffic enforcement efforts proportionately on the most significant traffic violations for severe and fatal collisions by party at fault. Focus enforcement efforts on areas of Berkeley where engineering and education efforts have already been implemented. Conduct traffic enforcement consistent with the City of Berkeley's Fair and Impartial Policing Policy.	Police	
☆	Support state-wide traffic safety legislation allowing automated speed enforcement by local agencies, designation of speed limits on local streets based on desired safety outcomes rather than the existing prevailing speed, and the reduction of local residential street speed limits to below 25 MPH, which would allow for 20 MPH speed limit on local residential streets, consistent with "20 Is Plenty" campaigns. Utilize existing legislated automated enforcement strategies, such as red light cameras.	City Manager's Office	
	Rename the Fatal Accident Investigation Team to replace the word "accident" with "collision" and include reference to near-fatal and major collisions, to acknowledge that most collisions are preventable, and to be in line with Vision Zero philosophies.	Police	
	Continue and regularly update a collision data-driven enforcement strategy focusing on collision reports from the renamed Fatal Accident Investigation Team (FAIT) to supplement collision data from SWITRS. Focus on areas of Berkeley where engineering and education efforts have already been implemented. Conduct traffic enforcement consistent with the City of Berkeley's Fair and Impartial Policing policy.	Police	
	Seek opportunities to educate before issuing citations during traffic enforcement.	Police	
	Develop a traffic ticket diversion program for bicycle and pedestrian traffic tickets to promote access to bicycle and pedestrian safety courses and programs.	Police	

APPENDIX B: SWITRS VIOLATION CODE DATA TABLES

Cited California Vehicle Code Violation by Party at Fault¹

Cited California Vehicle Code Violation	Party Cited as at Fault						
California Vehicle Code Summary	Driver	Ped	Parked Vehicle	Bicyclist	Other	None cited	Total
Unsafe speed	50	0	0	29	0	1	80
Driver not yielding at crosswalk	62	0	0	0	0	1	63

Notes:

1. SWITRS ten-year severe and fatal injury collision data, 2011-2020
2. Parties involved will not sum to total number of collisions
3. This excludes solo crashes. To understand the total number of severe or fatal collisions, sum this column with the number of solo collisions.

APPENDIX J

Public Works Staffing Update Memos

December 19, 2022

To: Honorable Mayor and Members of the City Council

From:  Dee Williams-Ridley, City Manager

Re: Update on Public Works Transportation Division's Staffing and Work Priorities

This memo shares an update on the Transportation Division's staffing and work priorities. A prior November 15, 2022 memo identified the Public Works department's two most significant challenges in implementing the City Council's direction: the volume of referrals and the high vacancy rate. Since that memo, staffing and vacancies within the Transportation Division worsened.

Transportation Division's Existing Vacancies and Impacts

The division has 47 positions and 8 vacancies, resulting in a 17% vacancy rate. Those vacancies are focused in the planning and engineering units of the Transportation Division. The division has eight planner positions and five are vacant, including a Principal Planner, three Associate Planners, and a Mobility Coordinator. The division also has important vacancies for Associate Traffic Engineers, Traffic Engineering Assistants, and Traffic Maintenance Workers. These positions are responsible for transportation projects' grants seeking, public engagement, adoption of design concepts, as well as the processing, implementation, and maintenance of traffic calming measures.

An October 2022 [Gallup Q12](#) survey of Transportation Division staff was responded to by 32 of the division's full-time staff. Respondents were asked to identify the one priority that would improve their satisfaction with work in the next two years. Division staff identified "fill vacant positions" by a wide margin as the top priority to improve workplace satisfaction. The impact of persistent vacancies is also clear in the survey results. The division's morale was at the 23rd percentile compared to other local public entities. Low morale has many risks and costs, as this may lead to more absenteeism and resignations.

Attachment 1 shows a current update on the Transportation Division's *Programs and Projects*, including those projects that are on hold or delayed due to staffing. Those projects are identified in the *Status* column of Attachment 1. Staff are focusing their time and effort on projects in or near the construction phase, projects at risk of losing grant

funding, and those that are in the department's *Top Goals and Projects* [here](#) (including multiple City Council referrals).

These vacancies will slow important work, including significant planning projects (e.g., update of Strategic Transportation Plan, Bicycle Plan, and Transit First Plan), implementation of existing City policy (e.g., BerkDOT planning, fees, and fines research, and Vision Zero), implementation of adopted budget referrals (e.g., Pedestrian Safety in the Hills, Newbury Street & Ashby traffic diverters, and AB 43 implementation), and detract from baseline services (bicycle parking, transit coordination, and traffic calming).

Next Steps

Recruitments are ongoing for each of the Division's vacancies. Interviewing is occurring for the following vacancies: three Associate Planners (two existing, one Vision Zero FTE approved in the budget), Mobility Coordinator (approved new FTE in the budget), and Associate Transportation Engineer. Those five positions may be filled by March 2023. The Principal Planner vacancy will probably require another 3-6 months before it is filled.

In April 2023, another off agenda memo will be issued with an update on the Department and Division's progress in staffing and the effect on project and program delivery.

Attachment 1: Transportation Division Projects and Programs

cc: LaTanya Bellow, Deputy City Manager
Mark Numainville, City Clerk
Matthai Chakko, Assistant to the City Manager
Jenny Wong, City Auditor

To: Honorable Mayor and Members of the City Council

From:  Dee Williams-Ridley, City Manager

Re: Update on Public Works Transportation Division's Staffing and Work Priorities

This memo shares an update on the Transportation Division's staffing and work priorities. A prior November 15, 2022 memo identified the Public Works department's two most significant challenges in implementing the City Council's direction: the volume of referrals and the high vacancy rate. Since that memo, staffing and vacancies within the Transportation Division worsened.

Transportation Division's Existing Vacancies and Impacts

The division has 47 positions and 8 vacancies, resulting in a 17% vacancy rate. Those vacancies are focused in the planning and engineering units of the Transportation Division. The division has eight planner positions and five are vacant, including a Principal Planner, three Associate Planners, and a Mobility Coordinator. The division also has important vacancies for Associate Traffic Engineers, Traffic Engineering Assistants, and Traffic Maintenance Workers. These positions are responsible for transportation projects' grants seeking, public engagement, adoption of design concepts, as well as the processing, implementation, and maintenance of traffic calming measures.

An October 2022 [Gallup Q12](#) survey of Transportation Division staff was responded to by 32 of the division's full-time staff. Respondents were asked to identify the one priority that would improve their satisfaction with work in the next two years. Division staff identified "fill vacant positions" by a wide margin as the top priority to improve workplace satisfaction. The impact of persistent vacancies is also clear in the survey results. The division's morale was at the 23rd percentile compared to other local public entities. Low morale has many risks and costs, as this may lead to more absenteeism and resignations.

Attachment 1 shows a current update on the Transportation Division's *Programs and Projects*, including those projects that are on hold or delayed due to staffing. Those projects are identified in the *Status* column of Attachment 1. Staff are focusing their time and effort on projects in or near the construction phase, projects at risk of losing grant

funding, and those that are in the department's *Top Goals and Projects* [here](#) (including multiple City Council referrals).

These vacancies will slow important work, including significant planning projects (e.g., update of Strategic Transportation Plan, Bicycle Plan, and Transit First Plan), implementation of existing City policy (e.g., BerkDOT planning, fees, and fines research, and Vision Zero), implementation of adopted budget referrals (e.g., Pedestrian Safety in the Hills, Newbury Street & Ashby traffic diverters, and AB 43 implementation), and detract from baseline services (bicycle parking, transit coordination, and traffic calming).

Next Steps

Recruitments are ongoing for each of the Division's vacancies. Interviewing is occurring for the following vacancies: three Associate Planners (two existing, one Vision Zero FTE approved in the budget), Mobility Coordinator (approved new FTE in the budget), and Associate Transportation Engineer. Those five positions may be filled by March 2023. The Principal Planner vacancy will probably require another 3-6 months before it is filled.

In April 2023, another off agenda memo will be issued with an update on the Department and Division's progress in staffing and the effect on project and program delivery.

October 5, 2023

To: Honorable Mayor and Members of the City Council

From:  Dee Williams-Ridley, City Manager

Re: Update on Public Works Transportation Division's Staffing and Work Priorities

This memo provides additional information regarding the staffing situation and work priorities in the Transportation Division, building on our previous communications of November 15 and December 19, 2022. The division recently completed five projects, 15 projects are in progress, 8 projects are delayed due to staffing and/or funding, 7 budget and non-budget referrals are in progress, 10 budget and non-budget referrals are delayed due to staffing and funding, and 12 referrals are not progressing due to the volume of referrals and staffing. The department's primary challenges in implementing City Council's direction continue to be the volume of referrals and the high vacancy rate.

Transportation Division's Existing Vacancies and Impacts

The division has 47 positions and 15 vacancies, resulting in a 32% vacancy rate. Those existing vacancies include the Parking Services Manager, Senior Planner, Associate Planner, two Associate Civil Engineers, and Traffic Maintenance Worker. These positions are responsible for managing transportation projects' grants, facilitating public engagement, the on- and off-street parking program and policy, and adoption of design concepts and their construction. Additionally, these positions are responsible for the processing, implementation, and maintenance of traffic calming measures. The Transportation Division is under the oversight of a Deputy Director, a position that is also vacant.

As a reminder, an October 2022 [Gallup Q12](#) survey of Transportation Division staff was responded to by 32 of the division's full-time staff. Respondents were asked to identify the one priority that would improve their satisfaction with work in the next two years. Division staff identified "fill vacant positions" by a wide margin as the top priority to improve workplace satisfaction. The impact of persistent vacancies is also clear in the survey results. The division's morale was at the 23rd percentile compared to other local public entities. Low morale has many risks and costs, as low morale staff are absent more and more likely to leave City employment.

The *Employer of Choice* initiative brings improvement to the City's hiring, staff retention, staff development, and business processes. The Transportation Division (and other

divisions in Public Works) will directly benefit from these improvements, and we anticipate staff survey results will improve. In the first half of 2023, the initiative has resulted in 90 eligible lists and reduced citywide workforce attrition by a more than 2:1 ratio.

Attachment 1 shows a current update on the Transportation Division's *Programs and Projects*, including those projects that are on hold or delayed due to staffing. This Attachment has been revised from prior memos to add baseline services and better address City Council's adopted budget and other referrals.

Staff's efforts are focused on projects in or nearing the construction phase, projects at risk of losing grant funding, projects led by other government agencies (e.g., BART, Alameda County Transportation Commission), and those in the department's *Top Goals and Projects*. To view the latter, go [here](#) and click through the *Top Goals and Projects*.

The Transportation Division's vacancies slow important work. Significant planning projects such as the Berkeley Strategic Transportation Plan and Bicycle Plan had already been delayed due to staffing as reported in the prior off agenda memo, and these items will continue to be delayed. Similarly, implementation of BerkDOT, fees and fines research, and Vision Zero Action Plan implementation face continuing delays, as do adopted budget referrals such as Pedestrian Safety in the Hills, AB 43 implementation, and traffic safety improvements at 62nd and King. Vacancies result in slower customer response times, reduced capacity to conduct policy or other analysis, less ability to implement improvements, and generally lower quality and delayed baseline services such as bicycle parking, transit coordination, and Safe Routes to School coordination.

Recruitments are ongoing for both existing and forthcoming vacancies because the HR Department has boosted its capacity to assist Public Works in these recruitments. The Transportation Manager, Principal Planner, and Associate Planner positions have recently been filled, and interviews for the Deputy Director are occurring. My office, the Human Resources Department, and the Public Works Department are collaborating on other resources (temporary staffing, consultants, etc.) to help boost staff's capacity until the division's vacancies are filled.

APPENDIX K

AAO#1 Supporting Documentation for Key Reimagining Public Safety Items

**BERKELEY CITY COUNCIL BUDGET & FINANCE COMMITTEE
SPECIAL MEETING MINUTES**

**Thursday, June 22, 2023
9:00 AM**

2180 Milvia Street, 1st Floor - Cypress Room

Committee Members:

Mayor Jesse Arreguin, Councilmembers Rashi Kesarwani and Kate Harrison
Alternate: Councilmember Sophie Hahn

This meeting will be conducted in a hybrid model with both in-person attendance and virtual participation. For in-person attendees, face coverings or masks that cover both the nose and the mouth are encouraged. If you are feeling sick, please do not attend the meeting in person.

Remote participation by the public is available through Zoom. To access the meeting remotely using the internet: Join from a PC, Mac, iPad, iPhone, or Android device: Use URL - <https://cityofberkeley-info.zoomgov.com/j/1606807814>. If you do not wish for your name to appear on the screen, then use the drop down menu and click on "rename" to rename yourself to be anonymous. To request to speak, use the "raise hand" icon on the screen. To join by phone: Dial **1-669-254-5252 or 1-833-568-8864 (Toll Free)** and Enter Meeting ID: **160 680 7814**. If you wish to comment during the public comment portion of the agenda, press *9 and wait to be recognized by the Chair.

To submit a written communication for the Committee's consideration and inclusion in the public record, email policycommittee@berkeleyca.gov.

Written communications submitted by mail or e-mail to the Budget & Finance Committee by 5:00 p.m. the Friday before the Committee meeting will be distributed to the members of the Committee in advance of the meeting and retained as part of the official record.

AGENDA

Roll Call: 9:06 a.m.

Present: Harrison, Arreguín

Absent: Kesarwani

Public Comment on Non-Agenda Matters – 3 speakers.

Minutes for Approval

Draft minutes for the Committee's consideration and approval.

1. Minutes - June 8, 2023

Action: M/S/C (Harrison/Arreguín) to approve the minutes of June 8, 2023.

Vote: Ayes – Harrison, Arreguín; Noes – None; Abstain – None; Absent – Kesarwani.

Committee Action Items

The public may comment on each item listed on the agenda for action as the item is taken up. The Chair will determine the number of persons interested in speaking on each item. Up to ten (10) speakers may speak for two minutes. If there are more than ten persons interested in speaking, the Chair may limit the public comment for all speakers to one minute per speaker.

Following review and discussion of the items listed below, the Committee may continue an item to a future committee meeting, or refer the item to the City Council.

2. Presentation from the City Attorney on the Department's FY 24 Proposed Budget and Funding Requests

From: City Manager

Contact: Farimah Brown, City Attorney, (510) 981-6950

Action: 1 speaker. Presentation made and discussion held.

3. **FY 24 Proposed Budget** *(Item contains supplemental material)*

From: City Manager

Recommendation: Discuss and provide recommendations on the FY 24 Proposed Budget, including funding requests and Council budget referrals.

Financial Implications: See report

Contact: Sharon Friedrichsen, Budget Manager, (510) 981-7000

Action: 12 speakers. Presentation made and discussion held. M/S/C (Harrison/ Arreguín) Recommending that Council adopt the Mayor’s proposed FY 2024 Supplemental Budget Recommendations with the following conditions:

1. Identify funding for the City Attorney’s request to fund the reallocation of 7 Deputy City Attorney III positions to DCA IV up to \$377,359 and to initiate a change to the classification to make it a deep class;
2. Fund the \$7,000 for etching equipment for catalytic converters through State Prop 172 Fund;
3. Refer and recommend the proposed resolutions to approve the allocation of \$100,000 for Harold Way Placemaking Project Schematic Design and \$100,000 Traffic Safety Upgrades at MLK and Haste from the Downtown Streets and Open Space improvement Fund; and
4. Refer the following reallocated Reimagining Tier 1 requests to the November 2023 Annual Appropriations Ordinance #1 process:

Reimagining Public Safety-Expand Downtown Streets Teams as placement for low-level violations	50,000
Department of Community Safety	250,000
Berk DOT Development	300,000
Transportation fee/fines analysis (PW)	150,000
Hearing Officer Alternative to Fines/Sanctions	150,000

Vote: Ayes – Harrison, Arreguín; Noes – None; Abstain – None; Absent – Kesarwani.

4. **Interim Housing Program at the Super 8 Motel (1619 University Avenue)**

From: City Manager

Recommendation: Receive a presentation on an interim housing program at the Super 8 Motel (1619 University Avenue) and provide a recommendation to City Council regarding the use of Measure P revenues of approximately \$5,016,444 million to support up to two years of operations.

Financial Implications: See report

Contact: Peter Radu, City Manager's Office, (510) 981-7000

Action: 1 speaker. Discussion held. The committee noted that the recommendation had been approved with the action taken on Item #3. No action taken.

5. Presentation on the Status of the Marina Fund

From: City Manager

Recommendation: Receive a presentation on the status of the Marina Fund and options related to the Department of Parks and Recreation, Division of Boating and Waterways loan of \$5.5 million loan for demolition and replacement of Docks D and E at the Berkeley Marina.

Financial implications: See report

Contact: Scott Ferris, Parks, Recreation and Waterfront, (510) 981-6700

Action: 1 speaker. Presentation made and discussion held. M/S/C

(Arreguín/Harrison) Recommending: 1. Closing the gap in the Marina Fund in FY 24 by using the CIP fund for staff (\$310,000), CIP project funds (cost shifting \$350,000), and the Parks Tax by cost shifting 2 Landscape Gardeners (\$267,000); and 2. Pursuing an internal loan from an existing City fund for the California Division of Boating and Waterways loan.

Vote: Ayes – Harrison, Arreguín; Noes – None; Abstain – None; Absent – Kesarwani.

6. Accept the Risk Analysis for Long-Term Debt (Bonding Capacity) Report provided by Government Finance Officers Association (Item contains supplemental material)

From: City Manager

Referred: April 26, 2022

Due: June 30, 2023

Recommendation:

Accept the report titled ‘Risk-Based Analysis and Stress Test of Long-Term Debt Affordability’ as provided by the Government Finance Officers Association (GFOA). This report is based on their research and development of a risk-modeling tool to address issuing long-term debt related to City of Berkeley Vision 2050.

On April 26, 2022, the City Council referred this item to the City Manager and Budget & Finance Committee to return to Council with recommendations or analysis on as many of the following items as possible by October 2022, if feasible. 1)

Consideration of reserves policies for operational funds other than the General Fund; 2) Potential reduction of the maximum indebtedness rate from 15% of assessed property value down to 4-8% range; 3) A new policy to not incur indebtedness when interest rates go above 5% or a different specific threshold; 4) Tools for increased transparency for taxpayers; 5) Updated report and discussion of pension and healthcare costs; 6) Refer the full Report to the Budget & Finance Committee for consideration.

Financial Implications: None

Action: 0 speakers. Deadline extended August 1, 2023 by request of the author. Item continued to a future committee meeting.

7. Recommendation on Climate, Building Electrification, and Sustainable Transportation Budget Priorities for Fiscal Year 2023 and 2024

From: Energy Commission

Referred: May 23, 2023

Due: November 7, 2023

Recommendation: The Energy Commission recommends that the Berkeley City Council prioritize and include in the City’s budget for the Fiscal Years Ending (FYE) 2023 and 2024 several staff positions, pilot projects, investments in electric vehicles and charging infrastructure, and other measures to ensure that the City’s budget is aligned with and provides adequate and needed funding to implement the City’s adopted Climate Action Plan, Electric Mobility Roadmap, Building Emissions Saving Ordinance, 2019 ban on gas in new construction, and the Existing Buildings Electrification Strategy.

Financial Implications: See report

Contact: Billi Romain, Commission Secretary, (510) 981-7400

Action: 0 speakers. Item continued to a future committee meeting.

Unscheduled Items

These items are not scheduled for discussion or action at this meeting. The Committee may schedule these items to the Action Calendar of a future Committee meeting.

8a. Referral of Two Health Educator Positions to the COB FY 2024 Budget Process

From: Peace and Justice Commission

Referred: April 11, 2023

Due: September 26, 2023

Recommendation: Refer to the budget process a request for estimated \$150,000 annually, beginning in FY 2024 or as early as the AAO #2 process in spring 2023, for staffing, materials, and supplies to be able to more broadly and flexibly conduct health education, prevention, and outreach to reduce health disparities, as proposed by the Peace and Justice Commission.

Financial Implications: See report

Contact: Okeya Vance-Dozier, Commission Secretary, (510) 981-7100

8b. Companion Report: Referral of two health educator positions to the COB FY 2024 budget process

From: City Manager

Referred: April 11, 2023

Due: September 26, 2023

Recommendation: Refer to the Peace and Justice Commission’s request for \$150,000 annually for staffing, materials, and supplies for health education and outreach to the Budget and Finance Policy Committee for further deliberation.

Financial Implications: None

**REVISED
AGENDA MATERIAL
for Supplemental Packet 2**

Meeting Date: June 27, 2023

Item Number: 53

Item Description: FY 2024 Proposed Budget Adoption

Submitted by: Sharon Friedrichsen, Budget Manager
City Manager's Office

The agenda report and accompanying budget adoption resolution have been revised to incorporate proposed changes to the FY 2024 Proposed Budget since it was first presented to Council on May 16, 2023. The changes primarily include staffing positions that were not included on May 16, 2023 due to timing as well as the funding of several items as presented within the Mayor's Supplemental Budget Recommendations. These changes are included within Exhibit B, Summary of Changes to the FY 2024 Proposed Budget Update, and Exhibit C, Mayor's Supplemental Budget Recommendations to the resolution Adopting FY 2024 Proposed Budget Update (Attachment 1).

The Budget and Finance Policy Committee met on June 22, 2023 to discuss and provide recommendations on the FY 24 Proposed Budget, including funding requests and Council budget referrals. As reflected within the annotated agenda, the Committee (Vote: Ayes – Harrison, Arreguín; Noes – None; Abstain – None; Absent – Kesarwani) took the following action:

“Recommending that Council adopt the Mayor's proposed FY 2024 Supplemental Budget Recommendations with the following conditions:

1. Identify funding for the City Attorney's request to fund the reallocation of 7 Deputy City Attorney III positions to DCA IV up to \$377,359 and to initiate a change to the classification to make it a deep class;
2. Fund the \$7,000 for etching equipment for catalytic converters through State Prop 172 Fund;

3. Refer and recommend the proposed resolutions to approve the allocation of \$100,000 for Harold Way Placemaking Project Schematic Design and \$100,000 Traffic Safety Upgrades at MLK and Haste from the Downtown Streets and Open Space improvement Fund; and
4. Refer the following reallocated Reimagining Tier 1 requests to the November 2023 Annual Appropriations Ordinance #1 process: Reimagining Public Safety-Expand Downtown Streets Teams as placement for low-level violations (\$50,000); Department of Community Safety (\$250,000); Berk DOT Development (\$300,000); Transportation fee/fines analysis-PW (\$150,000) and Hearing Officer Alternative to Fines/Sanctions (\$150,000).

In accordance with item #3 referenced above, the revised agenda materials also include two additional resolutions pertaining to the eligible use of the Downtown Streets and Open Space Improvement Fund for Council's consideration.

The revised agenda materials also include a fund balance spreadsheet that shows some of the City's major funding sources. It includes FY 2023 Beginning Fund Balances up to FY 2025 Projected Ending Fund Balances. This is a follow-up item from the May 16, 2023 Budget and Finance Policy Committee meeting and Council meeting stemming from the Budget presentation showing use of fund balances to balance the budget.

ACTION CALENDAR
June 27, 2023

To: Honorable Mayor and Members of the City Council
From: Dee Williams-Ridley, City Manager
Submitted by: Sharon Friedrichsen, Budget Manager
Subject: FY 2024 Proposed Budget Update Adoption

RECOMMENDATION

1. Adopt a resolution approving the FY 2024 Proposed Budget Update (“FY 24 Proposed Budget”) as presented to Council on May 16, 2023, and as amended by subsequent Council action.
2. Authorize the City Manager to provide applicable advances to selected community agencies receiving City funds in FY 2024, as reflected in Attachment 2 to the report, and as amended by subsequent Council action.
3. Adopt a resolution designating the Harold Way Placemaking Project as Eligible for Street and Open Space Improvement Plan (SOSIP) Funding.
4. Adopt a resolution designating the MLK Way and Haste Street Intersection Traffic Improvements as Eligible for SOSIP Funding.

FISCAL IMPACTS OF RECOMMENDATION

The FY 2024 Proposed Budget expenditure budget for all funds in FY 2024 is \$728,631,293 (gross appropriations) and \$621,229,929 (net appropriations). The General Fund (Funds 011-099), including Measure P and Measure U1 funds, total is \$283,576,217 and the balance of \$445,055,076 represents the other non-discretionary funds. This fiscal information will be reflected in a separate Annual Appropriation Ordinance on the City Council’s agenda on June 27, 2023.

CURRENT SITUATION AND ITS EFFECTS

The purpose of the FY 24 Proposed Budget is to provide an update on revenue estimates and recommended changes in planned expenditures since the adoption of the biennial budget for Fiscal Years 2023 and 2024 by the City Council on June 28, 2022. The FY 24 Proposed Budget was presented to Council on May 16, 2023 and June 13, 2023.

The FY 24 Proposed Budget Update includes changes to the Update presented to the City Council on May 16 and June 13, 2023 respectively as shown in Exhibit B, *Summary of Changes to the FY 2024 Proposed Budget Update*. These changes primarily reflect new positions within the City Auditor's Office, the Fire Department, HHCS, Human Resources and the Office of the Director of Police Accountability. Other salient changes include (1) reallocating the \$4 million within the FY 24 Budget proposed to pre-fund the repayment to the reserves to cover the increased cost of the City's general liability and property insurance premium and (2) the use of the FY 24 Proposed General Fund allocation to the Workers Compensation Fund for insurance costs and a transfer to the CIP Fund for T1 Projects. Additionally, the FY 24 Proposed Budget incorporates the Mayor's Supplemental Budget Recommendations, which were presented to the Budget and Finance Policy Committee on June 22, 2023, and are included within Exhibit C, *Mayor's Supplemental Budget Recommendations*. The Mayor's Recommendations include reallocating items funded as part of the biennial budget to new expenditures in FY 24, cost-shifting some items to be funded by Measure P and/or Measure U1 revenues and proposing to refer items for funding consideration until FY 24 AAO#1 or as part of the next biennial budget process in FY 25-26.

ENVIRONMENTAL SUSTAINABILITY AND CLIMATE IMPACTS

Actions included in the budget will be developed and implemented in a manner that is consistent with the City's environmental sustainability goals and requirements.

RESOLUTION NO.

ADOPTING THE CITY OF BERKELEY PROPOSED BUDGET UPDATE FOR
FISCAL YEAR 2024

WHEREAS, on June 28, 2022, the City Council adopted the biennial budget for Fiscal Year 2023 and Fiscal Year 2024 Budget; and

WHEREAS, the purpose of the Proposed Budget Update for Fiscal Year 2024 is to provide an update on revenue estimates and recommended changes in planned expenditures since the adoption of the biennial budget; and

WHEREAS, the City Council held a series of meetings to consider the Proposed Budget Update, including public hearings held on May 16, 2023, June 13, 2023 and June 27, 2023; and

WHEREAS, in addition to formal budget adoption, City Council action is required to authorize advances for select community agencies receiving funds in FY 2024. The advances are to be equivalent to 25% of the agency's allocation.

NOW THEREFORE, BE IT RESOLVED, that the Council of the City of Berkeley adopts the FY 2024 Proposed Budget Update.

BE IT FURTHER RESOLVED that the appropriations constituting the FY 2024 Adopted Budget will be reflected in a separate FY 2024 Annual Appropriation Ordinance, as required by Charter.

BE IT FURTHER RESOLVED, that the City Manager is authorized to execute contracts and /or amendments, as necessary, to provide advances to selected community agencies receiving City funds in FY 2024.

BE IT FURTHER RESOLVED, that the City Manager is authorized to use the following invoicing/reporting system in contract administration, but maintains the discretion to amend these requirements depending on risk factors associated with past performance, the amount and type of funding an agency receives, and/or whether or not an agency is a new grantee:

Agencies receiving under \$50,000 in General Fund to provide the following services:

1. Drop-In services only with no intensive case management, meal programs, outreach programs, or recreation programs:
 - Statements of Expense are required quarterly and a General Ledger is required at fiscal year-end; and
 - An end-of-year narrative summary of accomplishments.
2. All other agencies receiving General Fund only:
 - Statements of Expense are required quarterly and a General Ledger is required at fiscal year-end; and
 - Program Reports are required semi-annually.
3. Agencies with State and/or Federal Funding:
 - Statements of Expense are required quarterly and a General Ledger is required at fiscal year-end; and
 - Program Reports are required quarterly.

BE IT FURTHER RESOLVED, that the City Manager is authorized to refuse to execute or amend a contract with any agency that has not provided required contract exhibits and documentation within 60 days of award of funding.

BE IT FURTHER RESOLVED, that the City Manager is authorized to execute other resultant agreement and amendments with other agencies relating to receipt and expenditure under CDBG or CSBG Program in accordance with the proposals for community agency funding approved through the budget process. A record copy of said contracts and any amendments are on file with the Office of the City Clerk.

RESOLUTION NO. ##,###-N.S.

DESIGNATING THE HAROLD WAY PLACEMAKING PROJECT AS ELIGIBLE FOR
SOSIP FUNDING

WHEREAS, on January 29, 2013, the City Council approved the Downtown Streets and Open Space Improvement Plan (“SOSIP”), which provided for a range of pedestrian and recreational improvements in the downtown Berkeley area; and

WHEREAS, on the same date, the City Council approved a Nexus Study in conjunction with its approval of an impact fee to be charged for improvements identified in the SOSIP; and

WHEREAS, the Nexus Study included an appendix listing the specific projects proposed to be funded by the impact fee; and

WHEREAS, the Nexus Study anticipated that in future years, additional improvements would be added to the list of improvements eligible to be funded under the SOSIP;

WHEREAS, Harold Way lies within the SOSIP boundaries.

NOW, THEREFORE, BE IT RESOLVED that the City Council hereby adds the Harold Way Placemaking Project to the list of improvements eligible to be funded by the SOSIP impact fee.

RESOLUTION NO. ##,###-N.S.

DESIGNATING THE MLK WAY AND HASTE STREET INTERSECTION TRAFFIC
IMPROVEMENTS FOR SOSIP FUNDING

WHEREAS, on January 29, 2013, the City Council approved the Downtown Streets and Open Space Improvement Plan (“SOSIP”), which provided for a range of pedestrian and recreational improvements in the downtown Berkeley area; and

WHEREAS, on the same date, the City Council approved a Nexus Study in conjunction with its approval of an impact fee to be charged for improvements identified in the SOSIP; and

WHEREAS, the Nexus Study included an appendix listing the specific projects proposed to be funded by the impact fee; and

WHEREAS, the Nexus Study anticipated that in future years, additional improvements would be added to the list of improvements eligible to be funded under the SOSIP;

WHEREAS, the MLK Way and Haste Street intersection lies within the SOSIP boundaries and serves to link the Downtown and Berkeley High School.

NOW, THEREFORE, BE IT RESOLVED that the City Council hereby adds the MLK Way and Haste Street intersection project to the list of improvements eligible to be funded by the SOSIP impact fee.

Notes:

- (1) In FY 2021, a separate fund was created for Measure U1 with the General Fund revenues being transferred into the fund. Beginning negative fund balance due to split payroll charges to FY 2020.
- (2) Personnel Costs from FY 2025 to FY 2029 assumes an 8 percent increase for increased pension costs
- (3) Staffing consist of a Senior Community Development Project Coordinator, Senior Management Analyst, and an Assistant Management Analyst with U1 funding a portion of these positions along with other federal entitlement funds from HUD and other local funds
- (4) Consist of 1 Senior Community Development Project Coordinator, 1 Program Manager II, and \$10,000 for staffing costs
- (4) Consist of 1 Community Services Specialist I, 1 Program Manager II and \$10,000 for staffing costs
- (6) Consists of Accounting Office Specialist III (Finance) 0.25 FTE - \$38,750; Associate Planner (Rent Stabilization Board) 1 FTE - \$185,670; Office Specialist II (Rent Stabilization Board) 1 FTE - \$115,000; Mailing Costs for Outreach and Noticing (Rent Stabilization Board)\$10,000; 7.4% Overhead Costs for Counselors, General Counsel, and Office of Executive Director (Rent Stabilization Board) \$22,250. Funding in FY 25 and beyond may be shifted to General Fund once revenues are realized.
- (7) The FY 24 Estimate of \$4.9M includes \$3M for the Berkeley Way Hope Center reserves (for a total of \$6,023,365 with the FY23 Berkeley Way funds), \$1,820,865 in predevelopment funding for St. Paul Terrace and \$50,000 for Stuart Street 3rd Amendment. The \$2,500,000 is a placeholder for future years projects.

*The City has over 200 funds, therefore, this is not an exhaustive list. This spreadsheet includes some of the City's major funding sources.

**Fund balance amount does not account for any encumbered and projected carryover amounts from the previous fiscal year. Therefore, actual expenditures might be more than proposed/projected expenditures and might result in a lower fund balance.

*** As a grant, CDBG is not accurate to track with a fund balance. Any revenue received is then used as reimbursement for expenditures and does not gather in a fund balance to be used later

**** Expenditures and Revenue for MH Realignment are unknown given the new CalAIM changes that go into effect 7/1/23. HHCS will be working with a consultant over the next year to assess/project the impact.

***** The PSC Fund balance is high right now due to the number of large projects recently begun. We receive revenue up front on these large projects, but we will have expenditures against these amounts until the projects are complete, which can take several years.

May 8, 2023

Honorable Mayor Jesse Arreguín and Members of the City Council:

The City Manager's Fiscal Year 2024 Proposed Budget Update ("FY 24 Proposed Budget") is submitted herein for your review and consideration. The purpose of the FY 24 Proposed Budget is to provide an update on revenue estimates and recommended changes in planned expenditures since the adoption of the biennial budget for Fiscal Years 2023 and 2024 by the City Council on June 28, 2022. Over the next few weeks, the City's Budget and Finance Policy Committee and City Council will hold several meetings on the FY 24 Proposed Budget subsequent to its adoption on June 27, 2023.

As illustrated in the attached table, "*Summary of FY 2024 Proposed Budget Update by Funding Source*", revenues are anticipated to increase by \$4.6 million, or 0.8%, over the FY 24 Adopted projection for a citywide total of \$608.4 million. In addition to new revenues, fund balance, or prior years' savings, of \$109.7 million will be used to pay for expenses. Expenditures are estimated to decrease by \$7.8 million, or 1.1%, over the FY 24 Adopted to a total of \$718.1 million, due to a variety of factors including decreased medical and dental insurance costs and changes in pension rates.

Staffing levels are expected to grow by 24.4 full-time equivalent (FTE) positions, or 1.4%, over the FY 24 Adopted budget and include positions within Health, Housing and Community Services (9.1 FTE); Public Works (4.9 FTE); Library (3.8 FTE); Human Resources (3.0 FTE) and 1 FTE in the City Manager's Office, Parks, Recreation and Waterfront and Planning and Development departments respectively. Of the proposed staffing of 1,818.1 FTE, the General Fund supports 738.7 FTE, or 40.6%, while the remaining 1,079.4 FTE, or 59.4%, are charged to other funding sources. In addition, several reclassifications either occurred during FY 2023 or are planned for FY 24 to enhance operational effectiveness as noted within the attached table "FY 2024 Position Summary by Department".

The General Fund, including Measure P and U1 funds, contributes \$276.1 million, or 45.4%, of the \$608.4 million in projected revenue. General Fund expenditures are proposed at \$275.3 million. This represents a decrease of \$4.6 million, or 1.6% over the FY 24 Adopted, resulting primarily from projected salary savings (average of 6% among departments) and decreased costs in health insurance and other benefits.

Expenditures, which include Measure P and U1, outpace revenues and require the use of \$3.8 million in fund balance (\$2.6 million in Measure P and \$1.0 million in U1). Once Measure P and Measure U1 revenues and expenditures are omitted, the remaining discretionary General Fund expenditures are projected at \$247.8 million and revenues are estimated at \$248.2 million, leaving a surplus of approximately \$400,000.

Although there are outstanding community needs identified by Council through the budget referral process, as well as resources requested by City departments, no additional General Fund funding requests have been included within the FY 24 Proposed Budget at this time given that the proposed budget is currently balanced. The changes within the departmental financial pages included within this attachment reflect revised personnel costs based upon authorized staffing levels within the General Fund as well as the costs for new staffing requests in FY 2024 for Other Funds.

Deferring additional funding requests and considering such requests during the adjustment to the Annual Appropriation Ordinance process is a prudent fiscal course of action based upon the current status of the FY 24 Proposed Budget as well as potential increases in operational expenditures. The City is currently in labor negotiation with several bargaining unions, units and associations; insurance premiums for the City's general liability and property insurance are likely to increase significantly, and construction costs for approved capital projects and operational expenses related to programs and services continue to rise.

Given looming costs on the horizon, the purpose of the FY 24 Proposed Budget is to focus on critical changes to the fiscal year 2024 operating budget that are necessary at this time. The Adopted Biennial Budget included funding for Council priorities, such as funding for capital needs and infrastructure; contributions to the Section 115 Trust to help mitigate escalating pension costs and funding to replenish the City's reserves, which were borrowed to sustain operations during the COVID-19 pandemic. The FY 24 Proposed Budget strives to balance the immediate funding needs to continue to deliver quality services to the community while also advancing Council priorities. Challenged with finite resources, achieving this balance will be difficult. However, with Council leadership, and with the assistance of the Budget and Finance Policy Committee, I believe we can find the balance to achieve both our short and long-term goals in a fiscally responsible manner. I look forward to continued discussions leading to the adoption of the FY 24 Proposed Budget and, more importantly, beginning the planning and priority-setting in the upcoming months for the next biennial budget cycle in fiscal year 2025-2026.

Respectfully Submitted,

Dee Williams-Ridley
City Manager

Schedule of Changes to the FY 2024 Proposed Budget Update (Revenues)

Fund	FY 2024 Proposed Update	FY 2024 Revised Proposed Update	Variance	Explanation for Change
General Fund	267,199,246	266,418,342	(780,904)	Revise revenues based on updated projections from Director of Finance
GF - Stabilization Reserve	2,200,000	-	(2,200,000)	Remove Pre-Funding of Reserves to use these funds for insurance costs in FY 2024
GF - Catastrophic Reserve	1,800,000	-	(1,800,000)	Remove Pre-Funding of Reserves to use these funds for insurance costs in FY 2024
Library Tax	24,537,495	25,122,748	585,253	Proposed Budget Update assumed 2% increase in the Library Tax. The Library Tax can be increased by the greater of the Consumer Price Index (CPI) or the Personal Income Growth (PIG). The CPI increase is 4.192% while the PIG increase is 4.44% increase. Revised Proposed Update Revenue assumes the tax increase in the PIG since this is higher than the CPI.
Special Tax for Disabled (Measure E)	1,634,739	1,673,845	39,106	Proposed Budget Update assumed 2% increase in the Measure E Tax. The Measure E Tax can be increased by the greater of the Consumer Price Index (CPI) or the Personal Income Growth (PIG). The CPI increase is 4.192% while the PIG increase is 4.44% increase. Revised Proposed Update Revenue assumes the tax increase in the PIG since this is higher than the CPI.
Paramedic Assessment District	4,421,805	4,500,543	78,738	Proposed Budget Update assumed 2% CPI increase and actual increase was 4.19%
State Transportation Tax	6,025,895	6,696,569	670,674	Revised revenue budget to match projected expenditure budget
Measure B Local Streets & Roads	3,047,450	-	(3,047,450)	Revise revenue budget as no revenues will be received in FY 2024
Measure F Alameda County VRF St & Rd	(427,699)	457,637	885,336	Correct revenue budget
Measure BB - Local St & Road	7,627,974	6,750,147	(877,827)	Revise revenue budget to match expenditures
Measure BB - Bike & Pedestrian	-	773,953	773,953	Revise revenue budget
Parks Tax	17,400,964	17,813,646	412,682	Proposed Budget Update assumed 2% increase in the Parks Tax. The Parks Tax can be increased by the greater of the Consumer Price Index (CPI) or the Personal Income Growth (PIG). The CPI increase is 4.192% while the PIG increase is 4.44% increase. Revised Proposed Update Revenue assumes the tax increase in the PIG since this is higher than the CPI.

Schedule of Changes to the FY 2024 Proposed Budget Update (Revenues)

Fund	FY 2024 Proposed Update	FY 2024 Revised Proposed Update	Variance	Explanation for Change
Measure GG - Fire Preparation Tax	5,559,313	5,677,795	118,482	Proposed Budget Update assumed 2% increase in the Measure GG Tax. The Measure GG Tax can be increased by the greater of the Consumer Price Index (CPI) or the Personal Income Growth (PIG). The CPI increase is 4.192% while the PIG increase is 4.44% increase. Revised Proposed Update Revenue assumes the tax increase in the CPI since this is what was approved by the Disaster & Fire Safety Commission.
Measure FF - Public Safety	9,541,974	9,770,233	228,259	Proposed Budget Update assumed 2% increase in the Measure FF Tax. The Measure FF Tax can be increased by the greater of the Consumer Price Index (CPI) or the Personal Income Growth (PIG). The CPI increase is 4.192% while the PIG increase is 4.44% increase. Revised Proposed Update Revenue assumes the tax increase in the PIG since this is higher than the CPI.
Operating Grants - State	912,213	63,475	(848,738)	Revise revenue budget for FY 2024

- Josh Roben *JR*
Contract Administrator (PRINT NAME/SIGN) **APPROVED VIA EMAIL** Date 07/18/2023
- Sharon Friedrichsen
Budget Manager (PRINT NAME/SIGN) Date 08/07/2023

Routing continues to the following persons, who sign directly on the contract:
 6. City Manager (*Will not sign unless all signatures and dates appear above*)
 7. City Clerk: Destruct _____ Review _____

EXHIBIT A**SCOPE OF SERVICES**

Issues of interest to Berkeley Police Department, but not limited to, shall include the following:

- Provide a complete review and analysis of organizational structure; staffing levels based on current workload and projected workload; to include projections of planned population growth and business growth/development; and staffing requirements by function. The determination of appropriate staffing levels should be department-wide, to include all units in the Office of the Chief, Operations Division, Professional Standards Division, Investigations Division and Support Services Division.
- Determine whether the allocation of resources of the divisions are efficient and adequate for the needs of the Berkeley Police Department. Review the current workload data such as: calls for police service, received and dispatched; breakdown of calls for service by type, frequency, distribution, relative priority, and response times.
- Establish performance objectives to include a ratio of calls for service available for proactive/discretionary time.
- Review operations for assessing effectiveness and recommend efficiencies with geographical boundaries of patrol zones based on response times, workload, and resource deployment to consider things such as: number of and availability of units; workload and staffing at various times, locations, and seasons; deployment of allocated units; traffic issues; and planned growth in the City of Berkeley, including growth plans for the University of California.
- Evaluate the current beat structure and deployment model; make recommendations on whether a beat, sector or hybrid model best suits the needs of our City. Provide a deployment model that is scalable and resilient to both a reduction and increase in crime and staffing.
- Evaluate Berkeley Police Department's current rank structure, the number of managers and supervisors at every level and function, and the authority at each level of the chain of command, with an emphasis on effective strategies for professional development.
- Review and evaluate the impact on existing resources and workload to comply with the new laws (SB 1421) requiring review and disclosure of digital evidence and media.
- Evaluate current building facilities relative to current and future staffing, parking, equipment storage, and training needs.
- Define critical issues facing the Berkeley Police Department over the next five years; analyze impact of critical issues on staffing levels and calls for service.
- Project the Department's attrition for the next ten years. Compare attrition rates to similar sized California cities.
- Analyze current ancillary duty assignments to determine what can and should be outsourced or handled as a regional responsibility.

- Forecast future needs taking into consideration both short and long-term objectives, community growth, and any other factors that could change staffing requirements.
- Evaluate the efficiency of online reporting system and assess any additional services that can be enhanced or handled with technology such as video chat, mobile apps, etc.
- Analyze staff overtime causes and identify alternative solutions.
- Any other organizational improvements that can be made to enhance overall service. This will also include consideration for the morale and well-being of the police staff.

The following list of tasks details Citygate’s Workplan.

Task 1: Initiate and Manage the Project

- ◆ Develop detailed Work Plan schedule for the project.
 - We will develop a detailed, integrated work schedule and final project timeline. These tools will assist both the consultants and City staff in monitoring the progress of the study.
- ◆ Conduct on-site project kick-off meeting with City and Department representatives to initiate study.
 - A key to a successful consulting engagement is a mutual understanding of the project’s scope and objectives. The senior members of our team will conduct an on-site meeting with City project representatives to introduce team members, discuss the project schedule, and review the scope of work and available data. Citygate will prepare the agenda.
- ◆ Obtain and review City/Department documentation.
 - We will develop and submit a list of all documents relevant to this project, including the City’s General Plan; growth forecasts; any appropriate prior studies; Department documentation; dispatch data, including a distribution of calls for service by hour of day, day of week, and month; the number and assignments of current personnel; operating costs; and other information.
- ◆ Conduct command staff interviews with Department leadership.
 - To enhance our understanding of the issues at stake in this project, we will conduct interviews—either on-site or via videoconference—as appropriate and directed with the Chief of Police, key members of the Department’s command staff, and other key positions as desired.
- ◆ Issue SWOT (Strengths, Weaknesses, Opportunities, and Threats) questionnaire.

- Assess Department member perceptions and expectations of their services by issuing SWOT questionnaires to employees and, as appropriate, other agency employees that interact with the Department to obtain perceptions of the Department and how it is or is not meeting needs.
- ◆ Provide monthly status reports.
 - Throughout the entire project duration, we will monitor engagement progress and completion of tasks, including providing monthly status reports and oral communications, as needed, to Department leadership.

Task 2: Conduct Stakeholder Interviews and Community Survey

- ◆ Conduct on-site or videoconference interviews with Department, City, and Police Officers' Association members.
 - To develop an understanding of the police organization as it exists today, we will interview, as appropriate and directed, members of the Department (internal stakeholders) including supervisors, officers in-charge of the Department's divisions, others responsible for the various units of the Department, representative(s) of the Police Officers' Association, etc.
 - Citygate recognizes the importance of professional staff to the overall public safety mission of the Department. As such, we believe it is important to conduct interviews with professional staff including, but not limited to, dispatch, records, clerical staff, and volunteers to understand their perspectives.
- ◆ Conduct, review, and analyze a stakeholder survey to evaluate community perception and satisfaction related to police services and determine needed areas for improvement.¹

Task 3: Review of Organizational Functions and Workload

- ◆ Perform a detailed review of core Department functions. As part of this review:
 - We will identify practical opportunities for collaboration and formal partnerships consistent with the strategic priorities of the City and the Department.
 - We will review best practices regarding community-oriented policing and problem solving, intelligence-led policing, and data-driven policing to provide options for the best fit for the City.

¹ The community survey will be internet-based. We would require the assistance of the City in promoting the survey via available City and Department online and social media platforms. We assume that the survey will be in English only. If other languages are desired, modest additional fees will be incurred to create the additional survey(s).

- We will analyze reporting relationships, distribution of Patrol Division resources, the current methodology in responding to calls for service throughout the City, staff retention and experience, adequacy of staff training and experience, and staffing levels based on current and projected workloads.
- We will work with the Department to identify any obstacles to good police work. Often, these obstacles can be found outside the Department. Examples could be delays in processing prisoners at the jail, delays at a hospital when prisoners must receive medical clearance prior to booking, or staffing shortages due to court attendance.
- ◆ Conduct a complete organizational workload review to assess the organizational structure, resource allocation, and geographical patrol boundaries of the Department.
 - We will begin our review with an assessment of community risks and vulnerabilities, including infrastructure, demographics, organized and random crime activity, regional anomalies, and public venues (including entertainment).
 - We will review and analyze available data related to public-generated calls for police services, officer-initiated activity, and incident response statistics to measure the effectiveness to desired goals, response time criteria, and call prioritization relative to the current deployment plan.
 - We will review the Department organizational structure and staffing levels based on current workload and projected workload. Review operations for assessing effectiveness and recommend efficiencies with geographical boundaries of patrol zones based on response times, workload, and resource deployment We will examine the Police Department’s rank structure, the number of managers and supervisors at every level and function, and the authority at each level of the chain of command, with an emphasis on effective strategies for professional development.
 - We will evaluate the current beat structure and deployment model, understanding the goal of providing a deployment model that is scalable and resilient to both a reduction and increase in crime and staffing.
 - We will review and evaluate the impact on existing resources and workload to comply with new laws (SB 1421).
 - We will evaluate building facilities relative to current and future staffing, parking, equipment storage, and training needs.
 - We will evaluate and define critical issues facing the Department over the next five years.

- We will evaluate Department attrition rates, compare them to California cities of similar size, and project the Department's attrition for the next ten years.
- We will analyze current ancillary duty assignments to determine what can and should be outsourced or handled as a regional responsibility.
- We will forecast future needs taking into consideration both short- and long-term objectives, community growth, and any other factors that could change staffing requirements.
- We will evaluate the efficiency of online reporting system and assess any additional services that can be enhanced or handled with technology.
- We will analyze staff overtime causes and identify alternative solutions.
- We will assess other organizational improvements that can be made to enhance overall services, including the morale and well-being of the police staff.
- We will include future projections and goals regarding staffing and geographical boundaries, considering the impact on current and future services posed by the City's growth in population and development.

Task 4: Conduct Mid-Project Review and Provide Financial Implications of Recommendations

- ◆ Conduct videoconference Mid-Project Review with the City Manager, Chief of Police, and/or others.
 - We will conduct a Mid-Project Review utilizing an MS PowerPoint presentation to review the preliminary conclusions and proposed recommendations of the study. This will also be an opportunity for the Department and consultants to perform fact-checks and make mid-course corrections before our recommendations are finalized.

Task 5: Prepare and Review Draft Report

- ◆ The entire Citygate team will prepare a Draft Report, including:
 - Comprehensive assessment of the organizational structure, resource allocation, and geographical patrol boundaries of the Department.
 - Analysis to determine the adequacy of these components, and actionable recommendations regarding how to best optimize Departmental organization to provide the highest level of service within the City.

- Review of the City’s current service context and future projections and goals regarding staffing, geographical boundaries, and a comprehensive, data-driven analysis of workload.
- Full consideration of the City’s current and projected future growth in population and new development, and how these changes are shaping, and will continue to impact services both now and in the future.
- Analysis of calls for service by type, frequency, distribution, relative priority, and response times.
- Recommended staffing levels Department-wide, to include all units in the Office of the Chief, Operations Division, Professional Standards Division, Investigations Division, and Support Services Division.
- Recommended performance objectives to include a ratio of calls for service available for proactive/discretionary time.

Upon completion of the Draft Report, an electronic version in MS Word will be sent to the City Project Manager for comments using the “track changes” and “insert comments” tools.

- ◆ Discuss Draft Report with City.
 - Citygate will conduct a videoconference with the City’s Project Team to present and review the Draft Report.

Task 6: Prepare and Present Final Report

- ◆ Prepare and present Final Report.
 - Based on the results of our Draft Report review process, we will then prepare and deliver a Final Report to the City with sufficient information for policy decisions addressing operational and service options. We will make an on-site presentation using MS PowerPoint to the Executive Team or Mayor and City Council if desired.

5C.5 Project Schedule and Deliverables

Citygate anticipates this project will span approximately eight months. Due to the sensitive and complex nature of evaluating police services staffing and operations, obtaining and analyzing complete and sound data, involving varied stakeholders and a community survey, and accurately costing recommendations, this assessment must be completed correctly the first time. The following schedule shows the completion time per task and key milestones and deliverables throughout the engagement.

Proposed Project Schedule

Task	Month 1	Month 2	Month 3	Month 4	Month 5	Month 6	Month 7	Month 8
1. Initiate and Manage the Project	■							
2. Stakeholder Interviews / Community Survey		■						
3. Review Org. Functions and Workload								
4. Conduct Mid-Project Review					■			
5. Prepare and Review Draft Report								
6. Prepare and Present the Final Report								■

- Issue Document Request
- Mid-Project Review
- Start-Up Meeting/Interviews
- Draft Report
- Internal Stakeholder Interviews
- Deliver/Present Final Report
- Community Survey

13. Funding Model

The following is a high-level financial analysis and projected cost estimates for the ECC recommendations included in this report. FE recommends that Berkeley organize a project task force team immediately to carry out the strategic plan to address the immediate critical needs.

Table 31 - Financial Analysis & Projected Costs Estimates

Financial Analysis & Projected Costs Estimates for ECC				
Category	Term	Comments	One-Time Up-Front Cost Estimate	Three Year Cost
Staffing	Short	In order to implement EMD, an increase of 26 employees is required; cost estimate based on average salary plus benefits & admin support	\$3M	\$9M
Training	Short	Expand/Augment current training program by adopting industry available entry level (basic) for new recruits. The adoption of a core competencies in an on-demand / on-line training format reduces basic introductory in-house training.	\$15K	\$45K
		CTO training targeting new and seasoned instructors including presentation skills, adult learning styles, human relations. Note that this effort does not include wages, time off, or special compensation germane to the delivery and participation in ECC personnel training.	\$25K	\$25K
		Supervisory training geared specifically to ECC supervisors that is ECC specific. This training to include human relations, negotiation skills, intervention, skills, QA/QI methodologies, etc.	\$25K	\$25K
Protocol Implementation	Short	Implementing structured protocols for Emergency Medical Dispatch; includes costs for QA/QI system software.	\$200K	\$20K
Technology	Medium	Conversion of existing workspace to create a dedicated training facility complete with operational workstations configured to augment spikes in ECC call processing.	\$500K	TBD
		Design and implementation of CAD-to-CAD Interface with UC Berkeley PD.	\$250K	\$25K
Accreditation	Medium	Pursue ECC accreditation following the successful implementation of EMD.	\$3K	\$3K

14. High Level Implementation Plan

In this section, we offer a high-level strategic implementation plan; a roadmap that identifies and prioritizes the next best steps for the ECC and its leadership. We have created the strategic implementation plan below which includes area of focus, criticality/priority, followed by a recommended plan of action.

FE recommends that Berkeley create a project team who would be responsible for implementing the recommended steps and strategies. Without staff dedicated to moving forward quickly on the high priority items, it will be difficult to address critical items in a timely manner. This creates additional strain on already low and heavily impacted staffing levels in the ECC, and additional risk in operations.

Staffing is the principal priority that must be addressed immediately in the Berkeley ECC. Staffing recommendations include increases from the current authorized 33 positions, to 53 positions total (with turnover factored in).

Today, there are only 27 positions of the 33 positions that are staffed. The ECC will require an additional 26 Public Safety Dispatchers to meet the minimum staffing recommendations to support current call volume and workload. These figures only include the required frontline positions to achieve minimum staffing in the ECC and do not include any additional staffing increase recommendations for training, quality assurance, accreditation and IT and administrative support. Those recommendations can be found in their respective sections in the report.

Further, while staffing is the priority, there are other areas for improvement, consideration, and implementation that will need to be managed in parallel to a staffing increase, to support the ECC in its immediate and long-term success.

Below is a high-level implementation plan outlining the areas of focus and priority, along with additional information and next steps for the Berkeley ECC and its leadership.

Table 32 - High-Level Implementation Plan

High-Level Implementation Plan		
Area of Focus	Priority	Strategy
Staffing	1	<ul style="list-style-type: none"> Increase Overall Staffing: A total number of 53 ECC employees with turnover factored in. This is necessary to achieve sustainable operations and meet industry performance standards. Today, ECC is authorized for 33 employees, and 27 of these positions are filled. An overall increase of 26 employees is required.

High-Level Implementation Plan		
Area of Focus	Priority	Strategy
		<ul style="list-style-type: none"> Establish Minimum and Optimum Staffing Levels: A minimum staffing complement of eight employees on duty, and a maximum staffing complement of ten employees on duty per shift in the ECC. Work toward implementing staffing recommendations without delay.
Recruiting Process	1	<ul style="list-style-type: none"> Recruiting process must be accelerated Shorten process for entry level applicants Incentivized recruiting program in order to attract qualified candidates. This includes the review of wages, hiring incentives, etc. This will ensure competitiveness in the market. Recruit both lateral experienced candidates along with entry level attracting qualified and experienced candidates.
Facility	1	<ul style="list-style-type: none"> Expand/redesign ECC to accommodate an increase the number of workstations from 8 to 15 Create a backup site that doubles as a Training Facility and/or Emergency Operations Center Create a fully functional training room with workstations and ECC technology – CAD, phone, radio.
Training	1	<ul style="list-style-type: none"> Create and assign a Training and Quality Assurance Coordinator position to plan, coordinate, and support the recruitment and training of new personnel. The candidate must be trained in Emergency Dispatch Quality Assurance (ED-Q) in order to perform QA/QI on EMD calls. Design and implement CTO training including presentation skills, adult learning styles, human relations. Create and implement Supervisor training geared specifically to Berkeley supervisors that is ECC specific. This training to include human relations, negotiation skills, intervention, skills, documenting employee development and performance, QA/QI methodologies, and ED-Q Certification. Implement continuing education & professional development program for all staff.
Technology Needs & Integration	2	<ul style="list-style-type: none"> Work toward accelerated implementation of call-taking and dispatch software and programs. Design and implement a two-way CAD to CAD interface between the ECC and ACRECC. Design and implement a two-way CAD to CAD interface between the ECC and UC Berkeley PD. Review and revise incident types/CAD codes for SCU events. Implement fully automated station alerting technology for fire and EMS dispatch. Explore case management software for SCU events. This enables data
EMD Implementation	2	<ul style="list-style-type: none"> Once staffing levels have been met, implementing a structured commercial protocol system for Emergency Medical Dispatch; and QA/QI system software (AQUA). Ensure that recruits are trained accordingly as a commercial protocol program trains your employees reducing the ECC training workload.

High-Level Implementation Plan		
Area of Focus	Priority	Strategy
		<ul style="list-style-type: none"> • Medium and long-term results are standardization and consistency that is measurable through QA/QI processes, which also improves training, performance, and reduces risk & cost.
Accreditation	2	<ul style="list-style-type: none"> • Pursue Accreditation through IAED EMD and EFD. Once established and have the staffing to do so, can also add CALEA and any Fire Service Accreditation that Police or Fire choose.
Behavioral Healthy/Crisis Response Program	2	<ul style="list-style-type: none"> • Conduct a systems-mapping workshop as the initial first step for SCU December/2022 roll-out. • The workshop must outline the next steps required for planning and implementation of the SCU diversion pilot program.
Organizational Model	3	<ul style="list-style-type: none"> • Staff the Communications Center Manager's position immediately • Require ECC management to have specific Public Safety Communications experience, education, and training. • Work towards an independent Communications Center with its own leadership and support model. • Establish a governance model where equal representation of Public Safety agencies exists • Ensure the model is sustainable for long term success and provides ECC management the autonomy, authority and support necessary to effectively lead the operation.

Gun Violence Prevention (Ceasefire) Related Supporting Documentation

GUN VIOLENCE PREVENTION

Berkeley, California

Abstract

This research extensively reviews the relevant literature on gun crime, crime concentration, gun violence prevention approaches, and small city gun violence prevention taken from other programs. Various interventions are evaluated using specific criteria in the context of Berkeley's "brand" of gun violence. The recommended program is a combination of police and non-police interventions that hopefully brings a holistic sense to the program. This research also makes recommendations as to implementation and program evaluation.

Executive Summary

Gun violence in Berkeley is rising rapidly and becoming a city-wide concern. As such, the City Council has affirmed a \$1 million budget for “Berkeley Ceasefire” that will fund non-police interventions. Within the police department, the Gun Violence Intervention Working Group of the Berkeley Police Department is partnering with a UC Berkeley researcher to develop a program that incorporates both police and non-police interventions.

Causes of this steep rise in gun violence – from seven to over 50 annually in the last five years – are several. 4% have been fatal, 21% have resulted in injury, and 75% were simply “shots fired”. First, Berkeley’s problem is in the context of skyrocketing gun violence nationwide and regionally. Second, the proliferation of ghost guns makes it even more difficult to suppress supply-side dynamics. Third, street-crew shootings and domestic violence make up some portion of shootings. However, much of the gun violence is not categorized and cannot be attributed to any one cause.

This research employs mixed methods. Qualitatively, an extensive literature review was done on major topics around gun violence and prevention, and interviews with experts and practitioners were conducted. Quantitatively, I calculated geospatial point density using ArcGIS to locate “hot spots” and I performed social network analysis (SNA) to identify networks relevant to gun violence. Geospatially, I identified seven key locations for the department and community to focus interventions on. SNA revealed key ideal recipients of both social service outreach and focused deterrence measures.

Hot Spots Identified

Berkeley Shootings Social Network of Offenders and Victims

I considered a basic version of hot spots policing, a problem-solving version of hot spots policing, SNA-based focused deterrence, SNA-based social services, warrants to remove firearms from domestic abusers, street outreach workers, and hospital-based violence intervention programs as components to form a comprehensive gun violence prevention program. Ultimately, I concluded that four of these components will form the basis of the recommendation – problem solving at hot spots, focused deterrence, social services, and street outreach workers. This program option is advantageous because it is holistic and erodes gun violence from multiple angles. Additionally, if one approach is clearly not working or is running up too high of a cost, it can be cut and other portions of the program can remain ongoing instead of rebuilding a new program from scratch. This program should be monitored as closely as possible during its first year followed by an annual pre-test post-test evaluation to determine how close the program is to meeting the benchmark of 10% fewer shootings per year.

Intervention	Description
POP at Shooting Hot Spots	Random patrol idles at and checks on hot spots for 15-20 minutes. Officer notes events, people, or problems that facilitate crime at hot spot.
SNA Focused Deterrence	Social Network Analysis is used to identify who is most likely to be involved in future gun violence and a CBO and police deliver a “hard” deterrence message and the community delivers a “soft” extension of help or social services.
SNA Social Services Outreach	Connected to above but can be done without deterrence. SNA is used to identify people who are at risk and to extend wraparound social services to them, tailored to their specific needs. Case management ideal.
Street Outreach Workers	These individuals have connections to the community and carry legitimacy in their work to diffuse conflict, stop retaliation, and urge non-violence. They also help people exit a violent lifestyle.

Statement of Positionality

I am a white skinned, queer, Latinx woman. I am Venezuelan American. I have never been shot or involved in any violent crime. This research and its findings are part of my Master’s thesis, for the Advanced Policy Analysis course at the Goldman School of Public Policy at the University of California, Berkeley.

Introduction and Problem Analysis

I recommend that Berkeley implement a multi-pronged, holistic gun violence prevention program that incorporates problem-solving at hot spots, street outreach, targeted focused deterrence and social services.

The number of incidents involving firearms is sharply rising in Berkeley, California, a small city in the San Francisco East Bay. Berkeley is not alone. The nation has seen a dramatic rise in gun violence in all cities, spurring policymakers and public safety practitioners to find solutions. The Berkeley Police Department’s Gun Violence Intervention Working Group, city councilmembers, and community leaders are searching for near-term strategies to reduce gun violence.

Many gun violence intervention programs have been developed throughout the country, focusing on everything from place-based or “hot spots” policing to public health epidemiological modeling to a combination of several approaches. There have also been many programs that integrate other city services and departments, as well as Community-Based Organizations (CBOs). All of these programs have all had varying effects and results, not to mention costs and personnel. The challenge Berkeley has is to design a multi-pronged program that is uniquely suited to its mode of gun violence and to also develop a monitoring and evaluation process that the department will implement after some time has passed. Existing models typically have a multi-pronged approach, and often include both police activities and activities taken on by other city departments or CBOs.

Let it be noted that for the purposes of this research problem and design, “gun violence” will be defined as firearm violence between two or more people, and classified as either “shots fired”, shooting-related injury, or shooting-related death. This provides clarity that suicides, although a majority (roughly two-thirds) of firearm violence incidents in the United States¹, are not within the scope or aim of this particular project.

In 2020, Berkeley’s \$1 million Ceasefire Program² was proposed by the City Council³ in response to an alarming rise in shootings – 39 that year. In 2021 there were 50 incidents of gun violence and in 2022 even more, resulting in three dead and 15 injured.⁴ Over the past five years, shootings have risen from 15 in 2017 to 53 in 2022 – an increase of over 353%.⁵ The population of Alameda County has fallen since the 2020 census, primarily attributed to the pandemic.^{6,7} Berkeley’s population likewise has dropped to 117,145 in 2021.⁸ So, there are approximately 45 shootings per 100,000. But, calculating only for injuries and deaths due to firearm violence, that figure drops to approximately 13 per 100,000. For injuries alone the rate is 10 per 100,000. The rate of gun deaths, however, is just 2.6 – far smaller than the state rate of 9 per 100,000. I was unable to find shots fired or firearm injury data for the state as a whole.

This is a policy problem because the police department is in charge of public safety for the City of Berkeley. This charge is represented through city budgeting, city regulations, and internal police policies. Gun violence is a clear threat to public safety and public health, one that represents injuries and loss of life. “Effective violence prevention is

¹ Wintemute, Garen J. “The Epidemiology of Firearm Violence in the Twenty-First Century United States.” *Annual Review of Public Health*, vol. 36, no. 1, Mar. 2015, pp. 5–19. DOI.org (Crossref), <https://doi.org/10.1146/annurev-publhealth-031914-122535>.

² The goal of the Ceasefire Program, formally the “Violence Intervention Initiative”, is to identify community members most likely to engage in violence and surround them in “circles of care” like drug rehabilitation, job training, and available social workers. This is what the fiscal year 2023-2024 budgets for the Ceasefire Program: one full time director, one program manager, five life coaches, three outreach workers, a fringe estimate, and gun violence problem analysis.

⁸ U. S. Census bureau quickfacts: *Berkeley city, California*. (n.d.). Retrieved May 4, 2023, from <https://www.census.gov/quickfacts/berkeleycitycalifornia>

fundamental to community and economic development, mental health, and a decent quality of life”.⁹ Gun violence is also a problem that can be addressed through policy formation and change. This policy formation and change has occurred in cities throughout the country, so there are many blueprints for Berkeley to follow.

“Public safety is foundational to human development, economic development, and a civilized life – and communities beset by violence in all those respects...Gun violence is a multifaceted problem requiring a multifaceted response. But an essential component of any comprehensive effort is more effective policing. Most instances in which one person shoots another are crimes. The police offer a unique capacity for violence prevention that has no good substitute from other institutions, and effective policing could prevent much of the shooting.” – Braga and Cook, 2022¹⁰

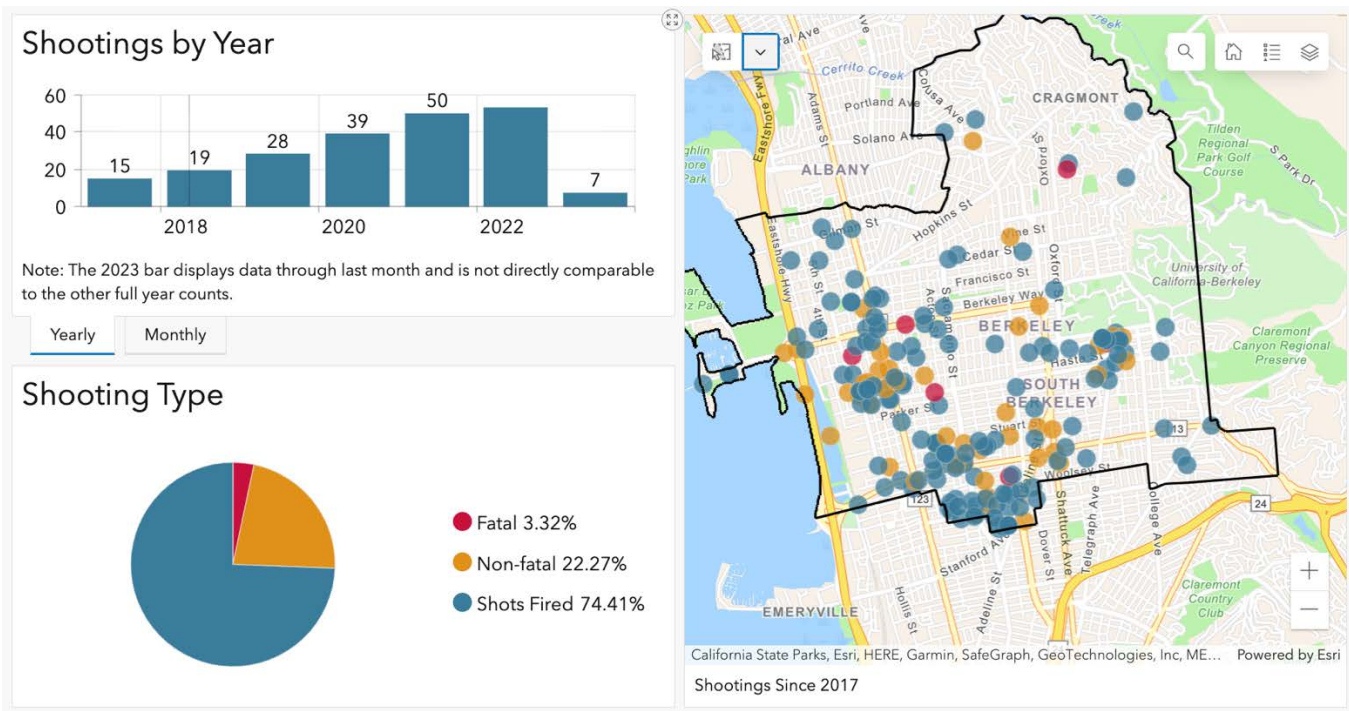

This project is best defined as “programmatically”, “prescriptive”, and “evaluative”. The goal of this project is to design a program for Berkeley to adopt – some policy prescription is needed to do that. And on the back end the program needs a way to be evaluated so that future versions integrate past successes or failures into better addressing the causes of gun violence.

It became clear to the Berkeley City Council that this rise was steep and unusual, prompting action. They are prominent stakeholders in the perseverance of said action, whatever it may be – Berkeley Ceasefire and additional measures taken. But more importantly, so are Berkeley’s inhabitants, workers, and passersby. Over the last several years in Berkeley, families of victims and concerned citizens have held rallies for change as well as vigils in memory of those killed. However, “shots fired” and “shooting-related injuries” affect even more people – not just those directly involved but also their greater neighborhood and even the whole city. Promoting a Berkeley that feels and *is* safe to all people, however lofty, is a theme of this project.

Geographic specificity here matters. (Northeast Berkeley neighborhoods Northside etc.) and the Berkeley hills area (Cragmont etc.), simply put, experience less gun violence of all varieties as defined in this project. Clearly from the map on Berkeley Police Department’s “Transparency Hub”, South (of UC Berkeley) and West Berkeley are where a majority of gun violence incidents occur and where we should be focused.

⁹ Braga, A. A., & Cook, P. J. (2023). *Policing gun violence: Strategic reforms for controlling our most pressing crime problem*. Oxford University Press.

¹⁰ Id.

11

Who is involved in these incidents matters too. South and West Berkeley are home to more people of color, people that are lower income, and who live in more of a “city-scape” proximate to Oakland and the water. In Berkeley, most perpetrators of gun violence in Berkeley are African American and victims are predominantly African American.¹² Nationwide, “Homicide risk is concentrated to a remarkable degree among Black males through much of the life span. At ages 20-29 in 2012, the firearm homicide rate for Black males was at least five times higher than that for Hispanic males and at least 20 times that for White males.”¹³ This is true for Berkeley as well. Arrested subjects, suspects, and detainees were 81% male and 19% female. They were 67% Black, 19% Hispanic, 9% white, 4% Asian, and 2% other. For firearm victims, they were 58% male, 42% female, 40% white, 25% Black, 13% other, 12% Hispanic, and 10% Asian. Notably, this includes victims of property crime, who are more likely to be white, and which distorts the racial percentages of victims. Excluding “shots fired” entirely for victims in order to exclude property damage, the race breakdown does change: 37% Black, 30% white, 15% Hispanic, and 13% other.¹⁴ These figures are for all shootings.

This report does seek to know the “why”. We are interested in *who* is involved in gun violence, *where* the incident took place, *what* happened, and *how* individuals were affected (injury, loss of life, fear). But crucially, “why” gun violence is occurring, and occurring the ways that it currently does in Berkeley, will illuminate our pursuit of the right gun violence

¹¹ *Current trends*. (n.d.). Retrieved March 7, 2023, from <https://bpd-transparency-initiative-berkeleypd.hub.arcgis.com/pages/current-trends>

prevention program and program evaluation. Generally, gun violence is rising in Berkeley because nationwide, cities are seeing spikes in gun violence, locally ghost guns are proliferating, there is some gang- and street-crew gun violence, and there is some firearm-related domestic violence. However, the majority of gun violence cases are not specific to any category and is “random”. This is especially true of when police arrive on scene, possibly have witnesses, but only identify shell casings and do not apprehend a suspect. This happens more often than not.

The client in this case should seek to sustain a continued decrease in gun violence incidents, year after year. The Center for Criminal Justice Violent Crime Working Group states that city leaders and criminal justice advocates should aim for an annual homicide and violent crime reduction of 10% because that goal is both tangible and realistic for cities.¹⁵ At Berkeley’s volume, that’s about six shootings per year. Such a benchmark is helpful but not strict. Any reduction is a good sign and obviously exceeding it is welcome.

Long term, Berkeley should hope to get back to the 2017 rate of less than ten annual gun violence incidents. Over the course of less than ten years, we should expect to return to 2017 levels. If we are to expect the pandemic to continue subsiding, addressing gun violence with a holistic program should decrease gun violence now faster than it rose over the past five years due with that anomaly.¹⁶ This is what happened in Champaign, Illinois after they implemented their multi-pronged, holistic *Blueprint* program.¹⁷ The program should be monitored closely in its first year, following a very thorough annual evaluation. Then, each year there should be an analysis of shootings that occurred, what form gun violence is taking over time, and how close the city is to that 10% reduction.

Gun Crimes and Regulations Legal Landscape in Berkeley

In California, a background check is done at the point of sale for every firearm sold. It requires that everyone with a concealed carry permit complete a training that includes shooting a gun. Open carry requires a permit or is barred altogether, and the state can bar concealed carry permits to be issued to anyone they deem dangerous. The state has so far refused to enact a “Shoot First” law, also known as a “Stand Your Ground” law. Assault weapons are prohibited, except where they have been grandfathered in or modified to be “California compliant”. New handguns are required to have childproofing features and microstamping technology – which marks bullets and cartridge cases with a unique fingerprint each time the firearm is discharged. To abide by state law, firearms must be stored locked, unloaded, and separate from ammunition when a child under 18 can or will access the firearm. Ghost guns are regulated (this is not particularly enforceable), high capacity magazines are prohibited, and there is no legal immunity for the gun industry. Officials are required to trace all guns recovered at crime scenes.

People with violent misdemeanors, felonies, hate crime convictions, a short-term emergency order in place (for domestic abusers), or a history of stalking are prohibited from possessing a firearm. Domestic abusers with misdemeanor convictions or restraining orders in place, and stalkers must relinquish their weapons. Fugitives and those who have been involuntarily committed or deemed a danger to themselves or others are barred from possessing a

¹⁷ *Id.*

weapon. Law enforcement, immediate family members, employers, coworkers, teachers, roommates, people with a child in common or who have a dating relationship in California can petition the court to temporarily take away gun access for those in crisis. There are no guns allowed in K-12 schools, on college campuses, at the state capitol, or in political demonstrations. Dealers are required to be licensed, are barred from completing sales while background checks are ongoing, must release their sales records to law enforcement and notify law enforcement when someone barred from doing so attempts to purchase a weapon. Finally, there are waiting periods to buy a gun. These are the foundational laws related to firearms in California.¹⁸

California also allows localities to enact their own gun safety laws. In Berkeley, discharging a firearm is illegal in all cases *except* where law enforcement is concerned or a citizen is acting in assisting an officer. Violation of this law is a misdemeanor and shall be punished by a fine of not more than one thousand dollars, or by imprisonment not to exceed six months, or by both such fine and imprisonment.¹⁹ Right now in Berkeley, there is “a rise in detection and seizure of firearms lacking serial numbers or other identifying markings, commonly known as “ghost guns””.²⁰ They are prohibited by city ordinance but have been linked to many shootings over the last several years. Each possession and use of a ghost gun (or part or frame of a ghost gun) is a Class 1 misdemeanor. In 2022, BPD seized 47 ghost guns and 72 other guns. It is a rising problem, complicating tracing guns to crimes and to people.

Data Analysis Results

Hot Spot Analysis

Hot spot analysis of shootings in Berkeley shows that they are concentrated at about seven specific sites. ArcGIS was used to do geospatial analysis on five years of shooting data in Berkeley. Because there were fewer than 2,000 data points, we were unable to run Cluster, Hot Spot, or Optimized Hot Spot analysis. Instead, Point Density analysis was used as it can run for smaller datasets.²¹

We knew broadly already that the south (of UC Berkeley) and west parts of Berkeley are where most shootings occur. Although at first shootings appeared to be clustered along long corridors, our Point Density analysis allowed us to further demonstrate what intersections and city blocks are statistically significant points of convergence that deserve attention. Seven locations were foremost identified by the software: 63rd Street & King Street, Acton Street & Russell Street, Channing Street & 8th Street, Channing Street & San Pablo Avenue, Durant Street & Sather Street, Harmon Street & Sacramento Street, and Oregon Street & Park Street (San Pablo Park). Identifiable to BPD from experience is the site just south of UC Berkeley, San Pablo Park, and two sites on Channing that relate to public housing where chronic

²¹ The Point Density Tool calculates a magnitude-per-unit area from point features that fall within an area around each cell. The sum value of points within a search area (neighborhood) is divided by the search area size to get each cell's density value. Conceptually, a neighborhood is defined around each raster cell center, and the number of points that fall within the neighborhood is totaled and divided by the area of the neighborhood. calculates the magnitude per unit area from point features within a neighborhood.

offenders are known to reside. Below we have shown the full picture of the city with the Point Density layered on top. A zoomed in portrait of each of one can be found in Appendix C.

Temporal analysis of shootings in Berkeley reveals very little. There are not clear patterns about how shooting locations have changed over the last five years. There does not seem to be an identifiable pattern when viewing the shootings by quarter year.

Social Network Analysis

“By identifying high-risk individuals and transmission pathways that might not be detected by other means, a contagion-based approach could detect strategic points of intervention that would enable measures to proactively reduce the trauma associated with gun violence rather than just react to past incidents...such a contagion-based approach is centered on the

subjects of gun violence and...has the potential to move the larger public dialogue on gun violence away from efforts that rest largely on geographic or group-based policing efforts that tend to disproportionately affect disadvantaged minority communities.” – Green, Horel, and Papachristos (2017)²²

Social Network Analysis allowed us to see clearly that what Berkeley has is akin to other cities. We have a large network of incidents, suspects/detained parties/arrested, and victims. Within that network is a denser, more interconnected network at the center compared to the larger network. See below:

It is important that the distal effects of exposure are considered. With any SNA intervention, we should include not just immediate ties to victims and perpetrators but also their indirect 2nd degree and higher order ties.²³ Likelihood of victimization is two to three times greater if one has a social tie to a victim than if they have no exposure to victims.²⁴ This accounts for how transmissible victimization within networks.²⁵ In Boston’s Cape Verdean network, researchers found 85% of victims in the large component.²⁶ In Newark, 33% of all shootings occurred in network components comprising approximately less than 4% of the entire population.²⁷ Clustering also occurs *within* a network – you can

see dense pockets of individuals connected to each other by a small number of ties. While perhaps not as extreme, Berkeley's network follows a similar dynamic, as is visually apparent.

Key Criteria

Do not allow non-police interventions in a program to amount to more than the allotted \$1 million. Berkeley Police explained to me that that budget was for non-police interventions. The annual Ceasefire budget that was passed by the City Council is for non-police interventions of one million dollars in sum. Anything of that nature under the umbrella of the program cannot exceed this amount annually. This is the most difficult criterion to fulfill, as we will see that most non-police program elements likely surpass this budget. It is probable more funds will need to be procured, and demonstrated project success will help the city to prioritize and justify more funding.

Reduction of shootings by 10% per year.²⁸ For Berkeley this amounts to about 5 shootings per year. This is the basic measure of effectiveness for the project, supported by literature – specifically it is the recommendation to law enforcement by the Council on Criminal Justice. This criterion is essential, although it may take time to achieve. Any reduction should be seen as a success. But, the program should be flexible enough to allow for alterations to be made continually to enable the program to get to a 10% reduction in shootings annually.

The program needs to be workable to the City Manager's Office that will authorize the program. This report will be read and implemented by the Office of the City Manager. It is necessary that the report is understandable from their point of view and also acceptable from a political standpoint. The city is still hiring for the specific position of Assistant to the City Manager so it is impossible to know the constraints they will bring to the project.

This program needs to avoid delegitimizing the Berkeley police, instilling fear of crime in Berkeley residents, and decreasing the community's collective efficacy.^{29, 30} These metrics are signs that the community-police relationship is breaking down. Police legitimacy means that the public consents to police authority and sees their part of the contract as obeying city laws. Crime spikes or hostility toward police are signs that police legitimacy is decreasing. Fear of crime can occur when a portion of the city is visually seeing more police in their immediate vicinity and interpreting this as a sign that crime has increased. When fear of crime increases in a city, fewer people interact with their neighbors or report incidents that they feel are happening all the time. Collective efficacy is the social cohesion of a group, which allows for residents to enforce mutually agreed upon norms and rules for their neighborhood. Ensuring community-police relationship success is critical to the mission of reducing gun violence. Even if short-term goals are achieved, a breakdown could offset any gains in long-term crime control.³¹ A community survey or way for residents to report how they are feeling and behaving in their neighborhood after the treatment begins would be a good start to evaluating this

³¹ Id.

metric. If funds allow, having a polling agency do this work formally would go a long way to ensuring the health of the community-police relationship.

Continually monitor the program and analyze progress to ensure success. Ensure that there are personnel to monitor and evaluate the program in its infancy and on the annual. Both budget and effectiveness need to be monitored. The budget constraints are above, and it needs to be reviewed not only annually but as the program goes along to make sure that non-police interventions will not exceed the one million dollar figure at year's end. In terms of effectiveness we know that our aim is about 5 fewer shootings per year. *But*, we want to stay in touch with different safety practitioners to make sure that what is being seen and heard on the ground lines up with this goal – even before the year is over.

Use of police and non-police resources. It is well known that the police are not a multitool for all public safety issues. Many issues can be addressed or improved using city services or community-based organizations (CBOs). The gun violence intervention program needs to utilize both the capabilities of law enforcement and the different services available through the city or CBOs.

Program components

Component #1: Hot Spots Policing/Place-based Policing

Based on a long history of experimental and quasi-experimental studies and evidence, it is now known that hot spots policing – focusing on places not people – is an effective crime prevention strategy.^{32, 33, 34} Hot spots are identified by creating a crime map, usually with a GIS mapping system, plotting incidents, and using one of the various mathematical hot spot tools to highlight where crime convergence is unusually high compared to other micro-units of a city. Police randomly idle at hot spots every several hours and remain there for 15-20 minutes.³⁵ An absolute minimum of 10 minutes must be spent there to have a crime control effect and some “survival time”.³⁶ Survival time is the amount of time after police leave that an area remains disorder- and crime-free.³⁷ Koper (1995) studied the residual deterrent effects of police patrols in hot spots and whether longer “dosages” (time spent at a hot spot) created stronger effects. He found that each additional minute of police presence increased survival time by 23%.³⁸

Two theories underpin this strategy. First, deterrence: police can maximize crime and disorder reduction at hot spots simply by being visible randomly and intermittently, thus maximizing deterrence and minimizing the amount of

³² Weisburd, D., & Telep, C. W. (2014). Hot spots policing: What we know and what we need to know. *Journal of Contemporary Criminal Justice*, 30(2), 200–220. <https://doi.org/10.1177/1043986214525083>

³⁶ Id.

³⁷ Id.

³⁸ Id.

unnecessary time spent at hot spots. Second, crime opportunity reduction: police presence modifies the opportunity structure to cause crime and disorder at hot spots.³⁹

The concern has often been, if you are patrolling certain micro-locations more often, you might encounter negative crime spillover effects to neighboring areas as the hot spot is recognized to encounter police more often.⁴⁰ However, several studies have shown that what is more likely is the diffusion of crime control benefits into the surrounding areas, not crime displacement.^{41, 42, 43, 44}

In one small city in the Midwest, continual adjustment of hot spots, and active management and tracking of patrols helped keep officers diligent as a trend has been that effectiveness of this intervention decreases over time. This study showed that without deep problem solving efforts, a sustained visible presence approach can also serve to impact crime over the long run.⁴⁵ This strategy can easily be operationalized for Berkeley gun violence. For this report, hot spot analysis was run and seven locations were identified [12].

Component #2: Hot Spots Policing Version of Problem-Oriented Policing (POP)

The same theories of deterrence and opportunity reduction underlie POP at hot spots. Braga (2012) found that POP programs that incorporate hot spots policing produced effect sizes more than double those produced by hot spots studies only on police presence.⁴⁶ POP is associated with statistically significant impacts on crime reduction and shows no evidence of crime displacement.⁴⁷

The first step to POP at each hot spot is identifying the spots, bumping up police presence for the near future, and spending that same 15 minutes every few hours of patrol at the spot, patrolling and scanning for potential problems

using the SARA method (see Literature Review [50]). Regarding what to do at each spot, most traditionally the S.A.R.A. method (Scanning-Analysis-Response-Assessment) is used when applying POP.⁴⁸

Police presence is theorized to deter would-be criminal acts from occurring, and this bears out in the research.⁴⁹ This deterrence is key, but in practice it cannot go on forever. While there, police document problems that could facilitate crime, whether they be social or environmental. That is where other entities, and the police department staff that liaises with them, come into play. Depending on the unique environment of each hot spot, the department would come together and determine what non-police interventions would transform the location. This could involve street teams to diffuse possibly violent situations, street lighting, the addition of green space, among many other interventions. If these transformations cause the area to be perceived differently by would-be criminals (again, this bears out in the research), the program's impact has the staying power to continue to deter gun violence longer than simply patrolling hot spots.

Social Network Analysis, Focused Deterrence, and Social Services

Some social network analysis (SNA) was done for this report. Further SNA may have to be done as time passes or as other alternatives are identified. "Gunshot violence follows an epidemic-like process of social contagion that is transmitted through networks of people by social interactions."⁵⁰ Social network analysis allows police to see clearly which people are most connected to incidents of gun violence and either victims or perpetrators of gun violence.^{51, 52, 53} Studies show that it is these individuals who are most at risk of becoming involved in gun violence for the first time or again. The theories of change here are deterrence and social supports.

Component #3: SNA and Focused Deterrence/Custom Notifications

From SNA the police can identify those most at-risk of gun violence perpetration or victimization. The task then is to deliver a message that violence will no longer be tolerated in the community and that any violence will be met with swift consequences. Champaign, Illinois has a program where these "custom notifications" are not done by law enforcement

⁴⁸ Eck, J. E., & Spelman, W. (1987). *Problem-solving: Problem-oriented policing in Newport News*. U.S. Dept. of Justice, National Institute of Justice.

⁵² Papachristos, A. V., Braga, A. A., & Hureau, D. M. (2012). Social networks and the risk of gunshot injury. *Journal of Urban Health*, 89(6), 992–1003. <https://doi.org/10.1007/s11524-012-9703-9>

⁵³ Papachristos, A. V., Wildeman, C., & Roberto, E. (2015). Tragic, but not random: The social contagion of nonfatal gunshot injuries. *Social Science & Medicine*, 125, 139–150. <https://doi.org/10.1016/j.socscimed.2014.01.056>

but by a community-based organization.⁵⁴ This is because when police do notifications, receptivity of that “hard” message by individuals can be very low.⁵⁵

At the least, in Berkeley, street outreach or social workers would need to accompany the police for the delivery of the custom notification and/or provide a written notice of zero tolerance signed by the police chief. The notice would detail that individual’s legal vulnerabilities for their specific criminal history. Avoidance of punishment, theoretically and empirically, is what drives gun violence down. So, for focused deterrence to work, the desire to avoid punishment needs to be there.

After the individual is given the “hard” message, the CBO can deliver the helping or “soft” message. The “soft” message is that neither the CBO nor the police nor the individual’s family want to see them dead from gun violence, and essentially, they all want to help lift this person out of a violent future. They offer the individual various services to help them navigate a new way forward. The downside to this intervention is that the individual can reject both messages, stay involved in violence, and refuse social services. Focused deterrence has credibility in the literature but is by no means the only way the police can utilize SNA.

Component #4: SNA and Social Services

Through identification using SNA, the police can connect at-risk people with community-based organization case managers and thus to social services. This can include case management broadly, mental health services, housing assistance, reentry services for the formerly incarcerated, economic opportunity (employment, training), restorative justice, among other services.

The vast majority of these types of interventions would require the city to partner with CBOs or other city departments⁵⁶ and, as with environmental improvements in Problem Solving Policing, require some sort of go-between for the Berkeley Police Department to monitor the course of the program. The theory of change here is that with additional social supports, the impetus to turn to delinquency and gun violence decreases.⁵⁷ For example, for the young man who is occasionally dealing drugs with a gun and has many connections to gunshot victims, perhaps job training and employment may provide him financial incentive to refrain from carrying a handgun and dealing drugs. For the older gang member, perhaps stable housing opportunities for their family would remove them from the geographic area the gang operates in and provide a way out of life on the street. These are just examples, but very targeted social services can and do change people’s motivations for engaging in violence.⁵⁸ There is not much of a role for law enforcement to play in this intervention, it is more a city-CBO partnership that precludes the “hard” message described above.

⁵⁸ Id.

Component #5 Warrants to Remove Firearms from Domestic Abusers (DVROs) and Individuals Posing a Danger to Themselves or Others (GVROs), Court-Issued Protective Orders, and Criminal Protective Orders (CPOs)

Combining the use of DVROs with GVROs, Court-Issued Protective Orders, and CPOs might be impactful. Each of these are aimed at preventing people deemed to be a danger to themselves or others from possessing a firearm.⁵⁹ GVROs – also referred to as “red flag laws” – are court-issued orders that temporarily suspend a person’s access to firearms when they are found to pose a significant risk to themselves or others by having legal access to firearms or ammunition. Court-Issued Protective Orders are certain orders from a court prohibiting specified persons (also called the “restrained party” or “respondent”) from possessing firearms or ammunition. CPOs are like DVROs, but are issued by a court during a criminal case, or after a finding of guilt. Like GVROs and DVROs, CPOs prohibit the subject of the order from possessing firearms or ammunitions.⁶⁰ Using each of these more and in addition to DVROs would augment the strategy of using DVROs more often in the community.

Component #6 Street Outreach Workers/Violence Interrupters

Out of the public health science of behavioral epidemiology emerged the idea that violence is a social contagion capable of spreading from individual to individual based on exposure.⁶¹ Street Outreach Workers or “Violence Interrupters” address this cause by being a presence on the street, stopping the spread of the contagion of violence. Street Outreach Workers help identify violence and interrupt or mediate it in real time. They are credible messengers, often formerly incarcerated or have been involved in or affected by violence in the past. They bolster any law enforcement intervention they aid due to that credibility.⁶² They often have connections to or knowledge of the street life, culture, and “code”, and can be a quality “go-between” for those living a life of violence and the larger gun violence intervention program.⁶³

Operating beneath this strategy is the aim to increasing informal social controls – or fortifying a community’s collective norms and standards of conduct, and encouraging community members to uphold them. When done well it “marries the goal of strengthening a community’s moral voice against violence with the imperative to offer help to its highest risk population.⁶⁴ It also lends itself to concrete violence interventions, such as controlling rumors during moments of

conflict, calming people down to defuse potential retaliation, and mentoring people at high risk of hurting someone or being hurt”.⁶⁵

Component #7 Hospital-Based Violence Intervention

Hospital-Based Violence Intervention Programs identify violently injured patients and intervene at their hospital bedside immediately following a violent victimization. Patients are assigned a case manager or social worker who evaluates patients based on the patient’s perception of their own psychosocial, emotional, or financial needs and connects them with providers in the community that are capable of addressing those needs. Various models tend to emphasize that case workers need to be culturally competent and it is beneficial if they come from similar environments as patients. In the San Francisco Bay Area, there are two such programs. The Wraparound Program is run by Zuckerberg San Francisco General Hospital, and they utilize hospital social worker staff to work with patients if they opt in.⁶⁶ The other is run through Highland Hospital in Oakland by YouthAlive! – a CBO.⁶⁷ I was unable to reach these programs to better understand their similarities and differences. That said, gunshot victims in Berkeley go to Highland Hospital as it is the local Trauma 1 hospital.

Component #8 Gun Buyback Programs

Gun buyback programs are a supply-side oriented tactic to reduce gun violence. Gun buyback programs are “no-questions-asked”, anonymous forums for community members to relinquish weapons in exchange for monetary value – usually cash or a gift card. The theory of change here is financial – money incentivizes those willing to part with their weapon to do so, thereby the community becomes safer for each gun collected in the buyback program.

Longer Term Solutions Addressing the Root Causes of Gun Violence

It is indisputable that addressing the root causes of negative social phenomena improves well-being and has a decreasing effect on violence overall. Berkeley should either start or continue to improve public schools, lessen income inequality and poverty, invest in quality public housing and public services, and build social bridges so under-resourced community members can thrive. They should continue to minimize easy access to firearms by high-risk people – legislatively or via the warrant described above. However, the urgency of this issue makes these longer term solutions drive change over the course of years not months, and are thus outside the particular scope of this project. These solutions should, however, absolutely be part of the normal operations of the city of Berkeley.

Evaluating Components Using Criteria

Hot Spots Policing

⁶⁵ Considering the place of streetwork in violence interventions. (n.d.). *National Network for Safe Communities (NNSC)*. Retrieved March 31, 2023, from <https://nnscommunities.org/guides/considering-the-place-of-streetwork-in-violence-interventions/>

⁶⁷ O’Brien, J. (2019, June 20). Dinner honors clients, highland social workers. *Youth ALIVE!* <https://www.youthalive.org/dinner-honors-clients-highland-social-workers/>

The majority of the U.S. public believes policing is more cost-effective than incarceration and supports focus on sentinel patrols (patrolling and prevention rather than solving crimes already committed) and crime Hot Spots Policing (HSP).⁶⁸ This is relevant because it is common knowledge that Berkeley is to the political left of the U.S. average and therefore is less punitive.

There is very robust evidence not only that hot spots policing is an effective crime prevention strategy but that it has significant diffusion of crime control benefits rather than crime displacement.⁶⁹ It is well established that mere presence of law enforcement at hot spots is sufficient to deter crime.^{70, 71, 72, 73} “Crime prevention is maximized when police focus resources on these micro-units of geography.” While this may seem controversial at the outset, understanding that the micro-units examined here are street segments or intersections. No neighborhood or city area is targeted broadly. Hot spots here are hyper-local locations where there has been a convergence of shootings surrounding that spot. 20 out of 25 experimental or quasi-experimental evaluations report crime reductions, so the vast majority, suggest that when police focus in on this micro-unit they can positively impact public safety in that area.⁷⁴

The Berkeley Police Department says that HSP could be accomplished without increasing costs, with officers spending more time at hot spots along their regular beats. During the day shift there are 14 beats (down from 16 due to staffing shortages). During the night shift they collapse into seven. Each hot spot would require officer presence for 15 minutes every few hours at random.⁷⁵ The main cost of this alternative is a department-wide training where all officers would be taught the efficacy and responsibilities of performing Hot Spots Policing.

City of Berkeley
Police Beats

*Berkeley Daytime Beats (collapse into eight at night)*⁷⁶

Crime concentration has been studied in small cities some, and those studies have concluded that crime concentrates more not less in small cities. Generally, “reducing crime by 20% at hot spots that generate 50% of a jurisdiction’s crime should reduce the locality’s overall crime level by roughly 10%.”⁷⁷ “City leaders should commit to tangible reductions in these measures. Annual 10% reductions in homicides and non-fatal shootings are realistic goals.”⁷⁸ It is likely that this intervention will reduce shootings by 10% annually for as long as the program can be maintained. I am confident in this

⁷⁶ Berkeley Police Department, 2023

⁷⁷ Nagin, D. S., & Sampson, R. J. (2019). The real gold standard: Measuring counterfactual worlds that matter most to social science and policy. *Annual Review of Criminology*, 2(1), 123–145. <https://doi.org/10.1146/annurev-criminol-011518-024838>

⁷⁸ Saving lives: Ten essential actions can take to reduce violence now. (2022, January 12). *Council on Criminal Justice*. <https://counciloncj.org/10-essential-actions/>

with one strong caveat: the gun violence concentration in hot spots does not reach 50% of overall levels, so it is harder to project just how much gun violence will drop.

I am also confident that the issue of gun violence is poignant enough to make this intervention politically feasible. It is BPD's experience that the city council has an appetite for law enforcement action to address gun violence. While the Assistant to the City Manager has not been hired yet, we can have moderate confidence in interpreting this appetite as consistent in city government.

"It is not entirely clear whether police can achieve and maintain such 'system-level' impacts through HSP."⁷⁹ There is strong evidence of eventual of deterrence decay – due to either police loss of focus or fatigue.⁸⁰ Another weakness of this alternative is that it is truly short-term and difficult to maintain. Decay can also be caused by non-geographical crime displacement such as offense type, target, or temporal displacement.⁸¹ Displacement by type is when offenders switch crime; displacement by target is when they change who they are victimizing; and displacement temporally is when time or date is altered to avoid detection.⁸²

"Prior studies of HSP, which have often focused on pilot or other temporary programs, have mostly used follow-up periods ranging from a few months or less (in most studies) to 1–2 years; very rarely have they gone beyond 2 or 3 years to assess the long-term institutionalization and impacts of these strategies. Notably, the studies of HSP's aggregate-level effects highlighted above spanned several months at most."⁸³ In one exception, a study of the HSP program in Manhattan, Kansas over the course of 8 years, violent crime dropped by 39.8% over 8 years. But, strength of the effect did weaken over time.⁸⁴

The perception of aggressive policing may drive a wedge between the community and police. Studies have conflicted on whether HSP produces a negative impact on police legitimacy but most study data do not support that concern.⁸⁵ Resident fear of crime at hot spots is relatively unaffected by increased police intervention. There is little empirical evidence to date on the impact of HSP approaches on citizens in targeted areas in terms of fear, collective efficacy, or

attitudes toward the police more generally.⁸⁶ Based on these overall findings, I am very confident that HSP has low or no negative impact on fear, collective efficacy, or police legitimacy.

Hot Spots Version of Problem-Oriented Policing (POP)

Implementing POP at hot spots would use normal staff hours and beats, not increasing costs. It *would* require training, redirecting patrols, or rearranging staff activities (including researcher/analyst capacity) which would likely cost less than \$1 million, but this intervention is not beholden to that criterion. It would require heavy use of the Violence Prevention Working Group and the Crime Prevention Through Environmental Design (CPTED) strategies – a multi-disciplinary approach to reduce opportunities for crime that are inherent in structure design, architectural planning and design, and the management of natural environments.⁸⁷ According to John Eck, Ph.D., this approach needs to recognize who has power over places, and that is primarily property owners – landlords, homeowners, public housing authorities, and businesses that own their buildings. These people need to buy in to whatever changes Berkeley wants to make to specific environments that are relevant to them.

Few studies have done cost-benefit analysis on this intervention but in all cases where cost-benefit was measured, POP projects were associated with a substantial cost savings.⁸⁸ A meta-analysis of POP programs shows statistically significant reduction in crime by 34%. But, specifically, violent crime studies did not yield a significant effect but the reduction was still positive, 9.5%. There are some violent crime studies in the meta-analysis but they don't have the same large drops that property crime studies show. Still, studies show evidence of some impact of POP programs.⁸⁹ It shows no evidence of crime displacement and possibly diffusion of crime benefits.⁹⁰ It is proven that things that are aggressive do not work as well as things that are problem-solving.⁹¹ I am somewhat confident that it is likely to reduce shootings by about 10%.

Because this strategy does not direct patrols only, but focuses on problem-solving and may leverage non-police resources like city services, it is less controversial as there is less of a chance of increased enforcement on low-income neighborhoods of color. This will make it more palatable to Berkeley residents and politicians. These changes, unlike altered patrolling alone, are far more sustainable over time. POP (and CPTED) is more capable of maintaining its negative impact on crime over time. You may have multiple iterations of solving the problem (e.g. maintaining green space) but this is doable.

In the meta-analysis of P.O.P. Six, eight, and three studies collectively show limited impact on police legitimacy, fear of crime, and collective efficacy respectively. The most rigorous study designs show little to no decrease on police legitimacy but, the studies are not consistent with one another. Often, they show that people who live near target

problem sites are more susceptible to fear of crime.⁹² Collectively, they show mixed and inconsistent effects on collective efficacy.

According to John Eck, Ph.D., the main downside to this is that it is most likely to reduce shootings over a period of months or years, not necessarily right away. There will need to be interim solutions while that success is being developed. Hot spots patrol can certainly fill that gap, or other interventions.⁹³ Depending on urgency and how easily the “problems” can be addressed, this may or may not be preferable in Berkeley.

SNA and Focused Deterrence

SNA and focused deterrence require normal data analyst personnel hours which use existing staff time and adds \$0. It requires officer training, which is exempt from the cost criterion but would likely meet it. However, this also requires contracting with a CBO and monitoring their participation, which likely costs around \$1 million. Social network analysis models gun violence in a way that helps identify who could be victimized in the future and to target individuals with law enforcement messages.⁹⁴ The literature shows that these individuals would have to adopt permanent lifestyle changes in order to sustain lower tendency toward gun violence. Also, new high-risk individuals would need to be prevented from entering the pool of violence, so SNA would need to be iterative for the program to be successful. Gun violence reduction strategies are best served by directing intervention and prevention toward high-risk social networks.⁹⁵ A “hard” message with a “soft” message can beneficially leverage both law enforcement and social services. Focused deterrence studies conclude that they statistically significantly reduce gun violence, making me somewhat confident that reductions could meet 10% annually.

According to Cody Telep Ph.D., “focused deterrence can be effective in a smaller city if violence is concentrated among a small group of individuals. There is some good evidence from places like Lowell, MA that are similar in size to Berkeley.⁹⁶ The challenging part for a small city can just be coordinating all the criminal justice organizations and resources needed to create [credible deterrence] to make the program successful in a small environment.”⁹⁷

The Berkeley Ceasefire D2 Ad Hoc Advisory Group Brief reflects a sole focus on social services and a lack of political will to engage law enforcement directly with at-risk individuals. This intervention has moderate political feasibility, as the Brief does mention that BPD is already playing a role in SNA. While there is no literature evidence, logic says that because this affects a very small group of people rather than a neighborhood or hot spot, it is not voluminous enough to cause fear of crime to rise, or police legitimacy or collective efficacy to fall. I am very confident in this low risk.

SNA and Social Services

SNA and requires normal data analyst and office personnel hours (to identify individuals and liaise with the CBO respectively) which uses existing staff time and adds \$0. This does require contracting with a CBO and monitoring their participation, which adds costs likely around \$1 million. Finding out just how much it will cost is based on first estimating, how many individuals you want to serve, and second, what size case load is manageable and appropriate for a case manager. Once again, modeling gun violence helps identify who could be victimized by or perpetrate gun violence in the future, and target social services to those individuals.⁹⁸ Gun violence reduction strategies are best served by directing intervention and prevention toward high-risk social networks.⁹⁹ However, this intervention is unlikely to reduce shootings without additional “hard message”. If it reduces shootings, I am somewhat confident that it is unlikely to reach the 10% annual goal.

The Berkeley Ceasefire D2 Ad Hoc Advisory Group Brief makes clear that a targeted social services approach is incredibly politically palatable in Berkeley. Again, individuals would have to adopt permanent lifestyle changes in order to sustain lower tendency toward gun violence. Also, new high-risk individuals would need to be prevented from entering the pool of violence, so SNA would need to be iterative for the program to be successful. While there is no literature evidence, logic confidently illustrates that because this does not involve police it cannot cause police legitimacy or collective efficacy to fall, or fear of crime to rise.

Papachristos, Ph.D., recognizes the relatively high average age of those involved in violence in his study – 29 – and says that this high age actually means the services needed by the population are many and vary widely. Health and housing, he says, are the big two, but jobs, job training, education, psychological help, and childcare are also important for many individuals. Street Outreach is there to build trust and relationships, and stop violence, but it cannot be a replacement for the dire need of clinicians – both mental and physical health clinicians – for this population.¹⁰⁰

The literature is not as supportive of these programs and they are understudied and do not have as much empirical success. Since they are opt-in, a program’s success could also simply reflect the less vulnerable nature of those who are likely to take up the program. This component very much reflects the vision for Berkeley to “surround individuals in circles of care”. It is certainly possible to extend social services proactively but there is no guarantee they will be taken up.

Warrants to Remove Firearms from Domestic Abusers (DVROs), Individuals Posing a Danger to Themselves or Others (GVROs), Court-Issued Protective Orders, and Criminal Protective Orders (CPOs)

When there is a gun in the home, domestic violence is more likely to escalate to murder.¹⁰¹ Removing firearms from homes of abusers is rated one of the most effective and most frequently used interventions according to a national survey of local police departments.¹⁰² Domestic violence restraining order firearm-prohibition laws are associated with 10% reductions in Intimate Partner Homicide, but those results are only statistically significant when the law covers dating partners and ex-parte orders.¹⁰³¹⁰⁴ California law does both of these things. Upon being served with a domestic violence protective order in California, the respondent must relinquish his or her firearm by surrendering it immediately upon request of any law enforcement officer, or within 24 hours if no request is made.¹⁰⁵

This requires staff time and liaising with the courts to get warrants for these interventions. Expert opinion within the police department states that routine staff hours are used up until liaising with the courts, which requires more. Sometimes the Community Services Bureau will look at calls or cases and proactively seek a GVRO. In some cases it is based on the continued behavior of a subject. If BPD gets a seizure order/warrant, based on the nature of the situation, it will likely cost overtime in the form of BPD's SRT (SWAT) serving the search warrant. This only applies if someone is not in custody when BPD is granted the seizure order. Most cases will likely be the former, in which BPD takes someone into custody responding to a call and contemporaneously seizes the guns by consent or warrant. I can confidently say that this intervention has minimal costs, with the exception of the overtime.¹⁰⁶

The downside of this component is that domestic violence-related firearm incidents are just not that common in Berkeley, and even very successful interventions of this nature would not reduce overall gun violence much. There are only a handful of Domestic Violence cases annually that include firearms. I can confidently say that this would not amount to a 10% reduction in shootings – the cases are not frequent enough. Also, it is known that acquiring a firearm illegally is easy locally, especially with the proliferation of ghost guns.¹⁰⁷

As California is one of the friendliest states to gun regulations and Berkeley is an epicenter of progressive gun reforms, this intervention should not be politically problematic. Restraining orders and protective orders are, by their very definition, temporary. So, logically, I am confident that this would not have long-lasting effects, although it may reduce

the number of shootings by a few. This intervention occurs siloed away in individual homes. Neighbors would see the police on scene but overall there logically should be no impact on police legitimacy, fear of crime, or collective efficacy.

Street Outreach Workers/Violence Interrupters

Acquiring street outreach workers involves contracting with a CBO and monitoring their participation, which adds costs likely around \$1 million. If they are already operating in Oakland or Richmond it would be worth exploring if they could expand operations to include Berkeley as well. I reached out to several CBOs for input and did not manage to connect with any of them.

Street teams can be very effective. But that assessment is based on high-risk community members opting in and having contact with a street team member. Of people that participated in Chicago's CRED program, victimization rates were 50% lower than non-participants.¹⁰⁸ I am unsure of what percentage reduction in shootings would occur because it is based on opting-in, and we don't know the likelihood of any one person opting in to the program. Andrew Papachristos, Ph.D. claims that there will also be reports coming out soon that show a positive programmatic effect at an individual and a community level.¹⁰⁹ What is unrealistic, he says, is "level setting" – claiming a specific amount of impact for any program. While sometimes it has been effective, sometimes it also hasn't.

The National Network for Safe Communities (NNSC) highlights the imperative of strong working relationships between street outreach workers and police departments for street work to be successful as part of a larger gun violence initiative.¹¹⁰ This is the case in Stockton, California, Los Angeles, California, Chicago, Illinois, and New York City, New York.¹¹¹ Unfortunately, there is not such affirming research on street teams in small cities. However, there could be much added value to custom notifications (focused deterrence) if street outreach workers accompanied Berkeley police to deliver messages to high-risk individuals. It would increase credibility of the police and the message, and the optics would be more genuine.¹¹²

Again, referencing the Berkeley Ceasefire D2 Ad Hoc Advisory Group Brief, there is strong evidence that social services and community interventions that do not involve law enforcement are extremely palatable to politicians. Participants chose CRED and remained enrolled in CRED to avoid pervasive community violence and attempt to improve their own situations. Those individuals were receptive to CRED recruitment efforts, citing the program's immediate, tangible

benefits and fulfilling relationships with staff as key reasons for remaining engaged.¹¹³ There is some evidence of long-lasting effects but only for those that take up the program.

This intervention tangentially involves police but mostly uses community members as credible messengers for peace, so it maintains trust between street teams and community members. Papachristos states that, “in the 90s in Boston, you actually saw people recognize that there are different lanes, and people stayed in their lanes and shared relevant information and it actually went without much drama...outreach organizations and police for their part, they don’t want to be seen crossing the line. I do not think street outreach should be informants nor do I think that cops should be using intelligence to do so.”¹¹⁴ If those boundaries can be maintained, street outreach will likely have no impact on police legitimacy. If done well, it would diffuse street tensions and likelihood of shootings/crime, leading to a decrease in fear of crime. Street workers ostensibly create more accountability by leveraging existing relationships in the community, thereby increasing collective efficacy.

Reviewing shootings that have just occurred and having information flow unidirectionally from police to streetworkers would identify high risk individuals and also likely prevent future violence. Protocols and boundaries need to be established prior to their work. Information should not flow from streetworkers to police, but rather only from police to streetworkers in terms of intelligence. This preserves the credibility of street outreach among community members. The only times they should be together are during intelligence meetings (shooting reviews, violence reviews) and custom notifications. If this working agreement can be designed, a mutually beneficial relationship can be formed, sustained, and trusted, street outreach can be effective in Berkeley.

Hospital Based Violence Intervention

YouthAlive! is a CBO currently doing bedside interventions at Highland Hospital in Oakland, which is the local Trauma 1 hospital for Berkeley.¹¹⁵ Shooting victims are nearly always sent to the local Trauma 1 hospital according to DHHS. While attempts to contact YouthAlive! to understand the logistics and determine the efficacy of their ongoing program have not been successful, this intervention is already being done.

Youth Alive! is doing bedside intervention when there is an act of violence to stop retaliation and connect victims with services. It stands to reason that, as it is already happening, hospital-based violence intervention is already being paid for and we do not need to consider it as a program component. More research is necessary to understand their approach and its efficacy, but since it is ongoing and shootings are still rising, it has little to no chance of reaching a 10% annual reduction in shootings. By the same token, this is already happening and not causing any political friction. In terms of how long its effects endure, this is a one-on-one interaction that hopefully has a positive effect on others in the victim’s social network. But, shootings are still increasing so it is unlikely to have long term or notable spillover effects.

¹¹⁵ Berkeley Police Department, 2023

Because this does not involve police and does not occur in a neighborhood, I can confidently conclude that it has little to no effect on police legitimacy, fear of crime, or collective efficacy.

Gun Buyback Programs

While the low cost is very attractive – a simple multiple of however many guns are turned in – the efficacy of gun buyback programs to curb firearm violence is seriously limited.¹¹⁶ Many studies have shown gun violence is a serious public emergency.¹¹⁷ Studies also show that buybacks do indeed have the ability to collect many weapons from the community.¹¹⁸ However, studies fail to show how buybacks are causal drivers in any reduction of violence or attract participants that are also involved in community violence. In this last respect programs have deeply failed, with participants lacking most characteristics of violent offenders, other than being mostly male. The typical buyback participant is over 55, white, and either inherited a gun they did not want or have no use for a gun.¹¹⁹ For more on these shortcomings, see Gun Buyback Programs [44] in the Literature Review. That said, buyback programs have no chance of increasing fear of crime, or decreasing police legitimacy or collective efficacy. Law enforcement plays a passive role, simply facilitating the collection of weapons.

Packaged components into programs

Alternative #1: Problem Oriented Policing (POP) at Hot Spots + Street Outreach Workers

A POP approach would allow for longer-term systemic impacts to be made at hot spots than hot spots policing on its own. While law enforcement would be analyzing and spending time at hot spots, street outreach workers would be building rapport with offenders and possible victims as well as diffusing tensions among individuals.

Alternative #2: Problem Oriented Policing (POP) at Hot Spots + Street Outreach Workers + SNA Focused Deterrence

A POP approach would allow for longer-term systemic impacts to be made at hot spots than hot spots policing on its own. While law enforcement would be analyzing and spending time at hot spots, street outreach workers would be building rapport with offenders and possible victims as well as diffusing tensions among individuals. Street outreach workers would also help in the custom notification process, to balance the deterrent message by offering support and social services.

Alternative #3: Problem Oriented Policing (POP) at Hot Spots + Street Outreach Workers + SNA Focused Deterrence + Social Services

A POP approach would allow for longer-term systemic impacts to be made at hot spots than hot spots policing on its own. While law enforcement would be analyzing and spending time at hot spots, street outreach workers would be building rapport with offenders and possible victims as well as diffusing tensions among individuals. Street outreach workers would also help in the custom notification process, to balance the deterrent message by offering support and social services. In this package, the city would invest additional money in case management for at-risk individuals, making both focused deterrence and social services key applications of the social network analysis.

Program recommendation

I recommend that the City of Berkeley and Berkeley Police Department implement Alternative #3: Problem Oriented Policing (POP) at Hot Spots + Street Outreach Workers + SNA Focused Deterrence + Social Services. As long as the budget can make it work, I highly recommend doing the most programmatically that can be done as gun violence takes human lives.

These programs are complementary but not interdependent. So, it is additionally advantageous, if any part of the program fails to produce results or runs up too high of a cost it can be cut while other measures are already active. The remaining measures would not be harmed. This is more convenient than having to start from scratch with new program ideas. If the same CBO is being funded for multiple programs, it is critical that it is clear how much of their funding goes to each program. In the slight way that focused deterrence is related to social services and street outreach, it is most likely helpful not harmful if community members recognize the same workers in different roles. More frequent, positive encounters promote trust and mutual respect.

In the analysis of outcomes, POP at hot spots has the potential for negative community-level effects, which could be counteracted by street workers that develop trust and cohesion in a neighborhood. The “hard” message of focused deterrence is similarly counteracted through the offering of social services. Bundling, in this sense, ensures that Berkeley achieves its goals without creating significant deleterious side effects due to one component or another. Having such a multipronged program is aspirational and as such may not be feasible – that is really up to the city.

Eroding violence from multiple angles is a goal of this recommendation. It recognizes that the roots of gun violence are complex, many, and intertwined. If we can simultaneously activate this multi-pronged program, we will be joining other small cities (Champaign, IL, Lowell, MA) in attempting to curb gun violence from a law enforcement perspective and a human perspective.

Implementation

The program as a whole would benefit from one additional administrative staff member assigned to the Community Services Bureau and one additional patrol officer. The administrative staff member will ensure that officers know to whom they should make their reports related to the program and would be available to communicate with CBOs or other municipal services regarding ongoing programmatic matters. The additional patrol officer would be able to fill any

gaps created by POP at hot spots in overall patrol. I realize this may be difficult, with patrol downsizing and the hiring crisis being what it is.

It is ideal if the City of Berkeley can find a CBO willing and able to manage focused deterrence, street outreach, and the extension of social services. Even if it costs more budgetarily, this makes sense from an efficiency standpoint and from an information standpoint. It is much easier if one CBO houses all the information necessary to do all three jobs and it can be reasoned that each one would be enhanced by the others.

POP at Hot Spots

Ideally, the department would select a few (2-5) crime concentrations in specific places identified (7) in this research on which to focus.¹²⁰ The police would need to incorporate the mapped gun violence incident data from this report but also possibly do their own crime mapping if it would be more up-to-date by the time this report is read.

Police should use the S.A.R.A. method when operationalizing problem-solving. “Scanning” involves the identification and prioritization of potential problems that may be causing crime within a jurisdiction. “Analysis” involves an in-depth evaluation of problems using a variety of data sources so the most appropriate response can be developed. This is not just about problem outcomes like traditional policing but concerned with the underlying processes that lead to problems. “Response” is the development and implementation of an intervention tailored to the nature of the problem distilled in the analysis phase. Response searches should be broad, involving law enforcement and non-law enforcement methods, other agencies, community groups and members. “Assessment” is the ongoing monitoring and evaluation of the response effect on targeted problem(s). This process is intended to lead to continual improvements and refinement in further iterations of the response.¹²¹

When not answering calls for service, officers should visit the locations on their beat, on a random basis, and patrol (including foot patrol) for 15-20 minutes. A minimum of 10 minutes must be spent in each hot spot to have any deterrent effect.¹²² This should be repeated periodically and unpredictably. This will likely require a reorganization or reorientation of patrol, to enable them to spend 15 minutes every several hours (but randomly – for example not every three hours on the dot just several times a shift) in each hot spot. If problems are inside a store or business, walk inside of that location in addition to outside patrol.¹²³ While patrolling hot spots, officers should record anything notable that facilitates crime, from the same individuals to substantial debris to a deserted lot used as a loitering area. These notes should be used in the future to alter these spaces in ways where crime control is long lasting.

¹²⁰ How many hot spots are addressed at one time depends on the capabilities of the police force. If they can treat multiple locations with enough dosage that may make sense from a public safety perspective. But if they are experimenting to see which approach works best they might want to begin with a small number of places.

It is well within the capacity of the Berkeley Police Department to undertake POP, especially because they have some degree of a head start. Some police officers already use a POP approach to their beats. To do POP at hot spots, they would need evolving data analysis, personnel to devote to, at minimum, two hot spots for a limited amount of time, and administrative personnel to liaise with other departments and CBOs regarding non-police interventions. BPD says that both POP and hot spots policing could both be accomplished with “staff time,” with officers incorporating POP approaches along their regular beats. Additionally, there already are some staff that could liaise with other city departments without increasing costs. POP at hot spots will require a training for all patrol officers and office staff who would be coordinating city or community services regarding problems cited by patrol.

Focused Deterrence/Custom Notifications

Focused deterrence will require a training for all officers that will be utilized for this specialized program as well as any CBO actors partnered with for this purpose. Other criminal justice agencies (e.g. parole, probation) need to be identified early on, and if they can also participate in the trainings that is ideal. The earlier who does what can be determined all the better. The CBO needs to be amenable to delivering the “soft” message while working in tandem with the police and others as they deliver the “hard” message. The officers involved in this intervention need to be selected extremely carefully. Not only do they need to believe in deterrence but they need to be able to deliver the message with great care. The Community Services Bureau (CSB) in tandem with the Personnel and Training Department’s Subject Matter Experts (SMEs) on focused deterrence should coordinate internal training for these officers. CSB is dedicated to liaising with the public and should be responsible for all communications regarding training for this highly specialized team. Not only do they have experts on doing so but they have powerful data analysis personnel and tools (coding, GIS mapping, network analysis), allowing them to zero in on key people.

A best practices process to custom notifications is encouraged by COPS – Community Oriented Policing Services at the U.S. Department of Justice¹²⁴. First, impact players are identified, using SNA if possible. Next, custom legal assessments are done for each impact player that law enforcement plans on notifying. Third, positive influentials in impact players’ lives are identified and community, social services, and street outreach workers are mobilized. Lastly, written documents and support materials are created to aid with the notification.

Identifying impact players is straightforward. The first thing is to talk to frontline personnel – beat officers, special units, probation, parole, corrections staff, and/or confidential informants. They have the greatest knowledge of who is at the center of ongoing violence. If violence has just occurred, convene right away to determine the groups involved, key players, and instigating factors. Debrief all the same parties, review incident data, crosscheck lists of groups and their members, conduct criminal history reviews of active group members, perform social network analysis, and create a final list of impact players. Get input from street outreach workers and community members, and use social network analysis to focus resources strategically on those at highest risk of violence. Identify as many impact players as possible to notify.¹²⁵

¹²⁴ Kennedy, D. M., & Friedrich, M. A. (2014). *Custom Notifications: Individualized Communication in the Group Violence Intervention*. U.S. Department of Justice COPS Community Oriented Policing Services. https://nnscommunities.org/wp-content/uploads/2017/10/GVI_Custom_Notifications_Guide.pdf

¹²⁵ At this stage, it unnecessary for evidence to meet legal standards for arrest because arrests are not goal of custom notifications. Their purpose is to communicate to impact players that violence is unacceptable, let them know their custom legal exposure, and to offer them opportunities for help. As such, evidence can be based on broad range of information that officers and community members provide about impact players.

An influential is a person close to an impact player who has their respect and can help them make positive choices. This may be someone within their family or a person with moral standing and credibility within the community. Asking the impact player is the best way to identify an influential, followed by examining personal connections – family, friends, partners, coaches, barbers, school resource officers, or street outreach workers. A last resort is looking at people who have posted their bail or attended hearings. An influential is only relevant in this context if they are a positive influence on the individual and not committed to the street code – the set of norms that mandates violence as a response to disrespect, indifference to prison, and antagonism to the police. If an impact player cannot be directly reached, delivering the message both orally and in writing to the influential seems to be an effective substitute.¹²⁶

It is important that custom legal assessments are made for each person to whom a notification is given. A meeting should be held with prosecutors to determine the individual's personal legal exposure from past violent crimes, especially those with a firearm, and compile the potential state and federal sanctions for further violent crimes. "Compiling custom legal assessments of this sort requires a close working partnership between police and prosecutors at local, state, and federal levels. After police perform an incident review to identify the impact players they want to notify, they pass their names to the [prosecutor]. The state prosecutor reviews the criminal records and determines potential sanctions for a range of violent offenses [sometimes] consulting with the federal prosecutor to establish whether grounds exist for a federal case."¹²⁷ The custom legal assessment should be finalized in writing that is plain and easily understood.

Street Outreach Workers

The first step required is identifying a CBO that is ready and willing to take on street outreach. It is smart to check with neighboring cities (Oakland, Richmond) that are already overseeing similar work. This will require approximately bimonthly meetings between the CBO and the Berkeley Police. This is so that the police can provide any intelligence that may help the CBO on the street and so that the police can monitor and get an idea of the effectiveness of the street outreach. While these meetings may not cost any money per se, it will take dedicated staff time and record keeping within the Community Services Bureau. During these meetings it is important to go over cost effectiveness and budget items of the CBO's program to create an accountability structure for the funding they are getting from the city. It is also important that the city apply for grants to fund this program, so it makes sense for there to be dedicated personnel specializing in grant research and applications at least at the city level. Champaign, IL found such positions essential for its CBO programs within their gun violence initiative.¹²⁸

Social Services

This has the same steps as above – it first requires identifying a CBO that is ready and willing to take on social services case management and checking with neighboring cities is the logical first step. It is my understanding that many community members in Berkeley have case managers through many different CBOs. It is important that, once SNA identifies who should be targeted for social services based on risk, those people should all be managed through one CBO.

¹²⁶ Ruderman, W. (2013, March 3). To Stem Juvenile Robbers, Police Trail Youth Before the Crime. *New York Times*.

¹²⁷ Kennedy, D. M., & Friedrich, M. A. (2014). *Custom Notifications: Individualized Communication in the Group Violence Intervention*. U.S. Department of Justice COPS Community Oriented Policing Services. https://nnscommunities.org/wp-content/uploads/2017/10/GVI_Custom_Notifications_Guide.pdf

¹²⁸ Elvir, J. (2023, March 22). *Community Relations Manager Champaign, Illinois Blueprint Program* [Zoom].

This will also require a bimonthly meeting between the CBO and police. This is so that the police can monitor and get an idea of the effectiveness of the case management by the CBO. It may also help police to know what services people are taking up or which seem to be most needed. While these meetings may not cost any money per se, it will take dedicated staff time and record keeping, within the Community Services Bureau. During these meetings it is important to go over cost effectiveness and budget items of the CBO's program to create an accountability structure for the funding they are getting from the city. It is also important that the city apply for grants to fund this program, so it makes sense for there to be dedicated personnel specializing in grant research and applications at least at the city level. Champaign, IL found such positions essential for its CBO programs within their gun violence initiative.¹²⁹

Program Evaluation

Program Evaluation Recommendation

According to David Weisburd, Ph.D., "It is important to begin assessment when a program begins so that you can see how the intervention affected the street over time. As a rule, if the purpose is to assess the impacts of the program it is better to select sites and then randomize them to receive the intervention. If you have control conditions that have not been treated, that will provide the best comparison for assessing whether the intervention is having an impact. Those "control" sites can then receive the treatment later if it turns out that the intervention is effective. Sometimes such rigor is not possible in the everyday realities of policing, but it is still important to try to identify comparison places that are similar to those receiving the intervention if you want a valid assessment of the program's utility. It is a good idea of police agencies to team up with researchers if they are trying to assess outcomes."¹³⁰

As previously stated, the client in this case should seek to sustain a continued decrease in gun violence incidents, year after year. The Center for Criminal Justice Violent Crime Working Group states that city leaders and criminal justice advocates should aim for an annual homicide and violent crime reduction of 10%.¹³¹ The program should be monitored closely in its first year, following a very thorough annual evaluation. No randomized control trial is possible, due to this program operating in the real world. Not just because of legal and ethical constraints, but you could not leave a part of Berkeley without police services just to test a hypothesis. But, what would be possible is applying alternatives 2 and 3 differentially – applying social services in one part of the city and not in a different part. If the department really wants to know if an intervention is effective this is a good choice. The question then becomes, which parts of the city are comparable enough to give different treatments? Only police intelligence and data analysis of violence can answer this question.

Berkeley's trend should be regularly compared to the rest of Alameda County and the state to see where it sits contextually. In a **one-group pretest-posttest design**, the dependent variable is measured once before the treatment is implemented and once after it is implemented. This is a stronger evaluative measure than simply a posttest evaluation. This would mean comparing the number of shootings prior to the intervention to the number after the intervention begins. It might also make sense to compare shots fired pre-test to shots fired post-test, and likewise with firearm

injuries and firearm fatalities. This would be informative by allowing practitioners and researchers to see from which category the most change is coming from.

Conclusion

The value of law enforcement partnerships with academic researchers is a cornerstone of data-driven, smart policing. Especially in this turbulent time, where policing is under strict scrutiny by the public, it is imperative that the foundations of policing be navigated and calculated with scientific precision. I selected this Advanced Policy Analysis with an optimistic eye toward these foundations as we move forward in our search for stronger policies around policing. “Police chiefs benefit immensely from having a respected academic representative standing next to them affirming that the choices and decisions made by the police follow best practices developed by research, study, and assessment.”¹³²

Gun violence takes human lives, and we should pilot as many prongs of a program as can be sustained budgetarily and practically. It is my hope that these recommendations are undertaken with as much aspiration as they are intended, and that the consistency of the science underpinning policing remains in place. “Promising partnerships are developing between American police agencies and universities as well as abroad. If carefully cultivated and nurtured, these relationships may well be the third police research tradition that is essential for enhancing police practices.”¹³³

The past lack of “real-world” value of academic police research mainly was reflected in the absence of implementation recommendations. “It would be naïve to suggest that the working relationship is always smooth.”¹³⁴ “Academics are very good at detecting, describing, and documenting the problems in police practices. Academics are also very good at theorizing and providing innovative ways to enhance policing practices...however, academics have not traditionally been good at providing the necessary guidance regarding implementation.”¹³⁵ This is why I have included a relatively detailed implementation process for each prong of the program that I am recommending. However, much of implementation changes as programs go along, incorporating real-time data and experience.

Ultimately, we cannot solve the crime problems of today, including the rise in gun violence, without smart and evidence-based solutions. It is well documented “why police administrators should strongly consider the work generated by the academic community...and why academics need to better listen to and understand police”.^{136, 137} This research has carefully considered the policies, procedures, and politics underlying professional policing and sought to overcome past

¹³⁶ Id.

¹³⁷ There are four primary reasons for police administrators to strongly consider the research and viewpoints of the academic world when making important decisions about the leadership of a police department: (1) operational effectiveness and efficiency, (2) external validity, (3) cooperative transparency, and (4) the information technology revolution. (Engel & Whalen, 2010)

barriers of “the ivory tower versus the real world”.¹³⁸ I hope that this research and any that follows can continue the new trend in police-academic partnerships that is grounded in practical, applicable methods that practitioners can use.

¹³⁸ Original quotation

Appendices

Appendix A: Research Approach and Methodology

I employ a mixed methods approach in this report, focusing on a review of the scholarly literature, an examination of interventions that could or could not apply to the City of Berkeley’s gun violence, qualitative interviews, and Berkeley Police Department shooting data. Quantitatively, I performed point density analysis to identify geospatial points of convergence or gun violence “hot spots”, and Social Network Analysis to identify individuals at risk of gun violence perpetration and victimization.

Overview of Research Sources

Source Category	Source
Legal	California Penal Code Berkeley Municipal Code
Scholarly	UC Berkeley Library
Departmental – Police	2018-2022 Shooting Data on Location, Type, Date and Time 2017-2022 Data on All Persons Involved in Shootings and Their Race, Gender, and Age
Public	Berkeley Police Department Transparency Hub

Interview Protocol

I developed a step-by-step approach to guide requests for interviews, the interview process, and the follow-up. After initially developing this approach, I integrated feedback from a GSPP Faculty Advisor, and refined the final approach:

Step 1: Send email to request interview using email template

Step 2: Set up time to schedule interview

Interviews completed by the end of March / early April

Step 3: Find category of interview and look at question bank

Log all interviews and notes in Interview Running Notes document

Step 4: Send thank you and any other follow-up message(s) to interviewee

Step 5: Consolidate takeaways

Interview Practices Employed

I am experienced with policy work related to public safety more generally, but much research was done in order to target the right subjects. I contacted the subjects and scheduled the interviews. In all but one case I recorded the sessions with permission so that notes could be taken later. This made space for follow-up questions and comments.

Interview Subjects

Appendix B Literature Review

Crime Concentration/Place-Based Policing

It is a well-known in criminology that crime in general is concentrated in a very small amount of micro-geographic units. Or, more scientifically the “Law of Crime Concentration” says that “for a defined measure of crime at a specific micro-geographic unit, the concentration of crime will fall within a narrow bandwidth of percentages for a defined cumulative proportion of crime.”¹³⁹ Specifically, gun violence is concentrated in small portions of the country and within even smaller geographic portions of cities, particularly in under resourced and disadvantaged neighborhoods. This results in an “uneven distribution of race and place,” further complicating how police address it and what issues fall out of those interventions.¹⁴⁰

Weisburd’s “law of crime concentration” says that crime at a specific micro-geographic unit, the concentration of crime will fall within a narrow bandwidth of percentages (eg. 25% or 50%) for a defined proportion of crime, even when there is extreme volatility in the total number of crime incidents.¹⁴¹ Weisburd (2004, 2015) and Braga (2010), among others, find strong support for the law of crime concentration.¹⁴² For example, in Seattle it was found that 50% of crime incidents occurred at only 4.5% of street segments.¹⁴³

For example, over the course of 30 years in Boston, 89% of street segments and intersections had zero ABDW (Assault and Battery with a Dangerous Weapon) firearm incidents and another 6% experienced just one. The remainder was responsible for the overwhelming majority of ABDW firearm incidents.¹⁴⁴ This trend was stable over the course of the 30-year period. Due to this crime concentration, it has been productive and impactful for police to focus on the small proportion of cities that generates the most crime. In his study of crime concentration in different sized cities, Weisburd looks at small cities: Brooklyn Park, MN, Redlands, CA, and Ventura, CA. He finds that 50% of crime is concentrated in between 2.1 and 3.5% of the cities. This is remarkable because he finds that it is *even more concentrated* than his sample of large cities (New York, NY, Cincinnati, OH etc.).¹⁴⁵

Braga (2013) finds that 89% of Boston’s street segments and intersections had zero firearm assaults with a deadly weapon. 6% experienced 1. The remaining 5% was responsible for virtually *all* of Boston’s gun violence. The epidemic

and later downturn of gun violence is credited to trends at 3% of micro-places that experienced volatility in gun violence through that time.¹⁴⁶

So far as it has been studied, smaller cities have higher levels of crime concentration. Scholars caution applying big city trends and solutions to less dense cities, suburbs, and rural areas. Weisburd (2015) looked at three small cities, including Ventura, CA which is comparable to Berkeley’s size. The data suggest that crime concentration can be different in smaller cities, like simply being on a few specific high-density streets. They have fewer overall crime incidents and their street segments are generally much longer. Small city phenomena are just beginning to be studied.¹⁴⁷

148

The street segment has been identified as a useful division of a city because it is a sort of “micro-community,” in that a block has certain culture, closeness, norms, activities, boundaries, and historical evolution. These qualities make it “an important theoretical unit in the studying of crime at place”.¹⁴⁹ The “street segment” is two block faces on both sides of a street between two intersections.¹⁵⁰ It is a better micro-unit choice than smaller units, such as addresses, and makes for less complicated data gathering and analysis. Intersections have, on occasion, been used in addition to street segments. “City level gun violence trends are understood best by the analyses of trends at a very small number of micro places, such as street segments and intersections, rather than analyses of trends at larger areal units such as neighborhoods, arbitrarily-defined policing districts, or Census tracts.”¹⁵¹ Knowing this has positively impacted gun violence policing and public policy. The more we learn about the concentration of gun violence, the more we are able to concentrate treatments for gun violence (policing, social services etc.) in those specific areas.¹⁵² What are now referred to generally as “Place-Based Policing” and “Hot Spots Policing” originate from these studies and conclusions.

The natural conclusion from this, with the caveat of having only few small city studies, is that if crime is indeed so concentrated, policing and prevention resources should be similarly geospatially concentrated.¹⁵³ Interventions should

focus on very specific location and not larger neighborhoods or “beats”.¹⁵⁴ This conclusion extends beyond criminal justice intervention and applies as well to social interventions that may ameliorate gun violence. The concept of treating city “hot spots” in prevention efforts grows out of the now established fact of crime concentration.

Gun Buyback Programs

Gun buyback programs theoretically decrease the supply of guns in a community. Buyback programs encourage participation by offering cash or gift cards in exchange for weapons voluntarily surrendered and by using a “no questions asked” policy. Several studies have been done on who participates in a gun buyback program once it exists, but less studies have illuminated their effect on overall gun violence. “Additional research is needed to determine effective methods to target individuals who would have the greatest impact on gun violence if they relinquished their weapons.”¹⁵⁵ Less ambiguously, these individuals are *not* relinquishing their guns during gun buybacks, which is why research is needed on *how* to get high-risk individuals to participate.

For example, some characteristics of participants in a Worcester, Massachusetts buyback program from 2009 to 2015 are that 68% had gun safety training and a majority were white males over 55 years old who did not themselves buy the gun. Most commonly, those surveyed inherited the gun they turned in, and there was a strong positive relationship between inheriting a gun and turning it in.¹⁵⁶ This is significantly different than the population of individuals involved in gun violence. In fact, 98% of gun buyback participants were white when just 65% of Worcester’s population is white.^{157,158} This study illustrates that guns are a public health risk and that buybacks take in guns, but it fails to illustrate how buybacks increase public safety by removing guns accessible to individuals at risk of violence. Even they state, “Our program has so far failed to attract significant numbers of young minority community members. Improving upon this is particularly important, given the higher burden of gun violence experienced among minority communities. A recent New York Times review article explored 358 national armed encounters occurring in 2015 where four or more people were killed or wounded. They found that 73% of the victims were black, 72% were males, and the average age was 27.”¹⁵⁹

A study that looks at three cities’ programs (Worcester, MA included) found that more than half of participants (55%) did not purchase the firearm, but acquired it through inheritance, gift, or random find.¹⁶⁰ “The primary goal of gun

buyback programs is the removal of unwanted firearms from the community,” not necessarily the increase of safety and decrease of gun violence. “To improve the effectiveness of gun buyback programs, it is necessary to understand the demographic that is likely to participate. The majority of participants in our gun buyback program study were white males. Most have additional weapons at home. Participants are more likely to reside in suburban affluent communities than in urban locations, which is similar to other reports.”¹⁶¹ As there has not yet been innovation in how to attract likely perpetrators and likely victims of gun violence to these gun buybacks, and as we know the demography of said population, gun buybacks are not linked causally to less gun violence.

TABLE 2. Reasons Cited for Turning in Firearm: Worcester Gun Buyback Program

	N	%*
Reason*		
Didn't need the firearm	51	47%
Miscellaneous reason**	17	16%
A family member asked you to	15	14%
Concerned that children had access	14	13%
Wanted gift certificates	10	9.2%
Cannot store it properly	7	6.4%
Afraid of the firearm	7	6.4%
Did not answer	7	6.4%
Concerned might be used against you	4	3.7%
No longer being used	3	2.8%
Old gun	2	1.8%

*Participants were able to choose more than one answer, percent adds up to more than 100%.

**Miscellaneous reasons cited for turning in gun: didn't want it, turning in for a friend, too many guns, it would be stolen, gun not accurate, inherited, owner passed.

163

Hot Spots Policing

It is a generally known fact that hot spots policing is effective at reducing crime. The effectiveness of hot spots policing bears out in the extensive body of research that includes numerous experimental and quasi-experimental studies.¹⁶⁴

Braga (2007) stated, “extant evaluation research seems to provide fairly robust evidence that hot spots policing is an effective crime prevention strategy”.¹⁶⁵

Hot spots policing originated out of the widespread acknowledgement that crime, including gun violence, is clustered heavily around very small geospatial units within a city. It is a strategy that focuses prevention resources on specific locations where crime is highly concentrated.¹⁶⁶ It is widely accepted that a very small percentage of units of analysis of place is responsible for a majority of crime incidents.¹⁶⁷ Simply stated, when focused on small units of geography with high rates of crime, police can effectively tackle crime and disorder.¹⁶⁸

Instead of larger units, hot spots policing can adopt a range of responses focused on street segments and intersections. This contrasts with the traditional policing strategy which focuses on individuals.¹⁶⁹ Police records can be analyzed to identify gun violence concentration in such places and how that concentration changes – or is stable – over time.

There is the question of what activities officers should undertake while in these hot spots. Just increasing officer presence at a hot spot has a deterrent effect on crime.¹⁷⁰ In the Minneapolis Hot Spots Patrol Experiment, police were not given specific instructions other than to increase patrol at hot spots. Increased police presence alone had a statistically significant effect on deterring crime.¹⁷¹ The theory of change here is that criminals will note the police presence and be deterred due to the increased cost of offending. Analysis by Koper (1995) concluded that the ideal time spent at each hot spot is 15 minutes. After that interval, police presence has diminished marginal returns. This phenomenon is known as the “Koper curve”.¹⁷² “Survival time” is the amount of time it takes for crime or disorder to happen after an officer has departed. When officers are just present for 15 minutes, survival time increased by 23%.¹⁷³

Although mere presence produces crime control benefits, when police undertake tailored and specific interventions at each hot spot, the more effective the program at reducing crime after police depart and in the long-run.¹⁷⁴ The more diverse the intervention strategy at place, the greater deterrence it is shown to have in hot spots. This strategy is known as Problem-Oriented Policing and is described later in this report. Problem-Oriented Policing programs that incorporate these tailored responses produce effect sizes that are more than double those produced by hot spots studies focused only on police presence.

The “question of displacement versus deterrence is crucial to evaluation costs and benefits of the policies but also has implications for understanding criminal incentives and behavior.”¹⁷⁵ The larger body of literature on hot spots policing and displacement concludes that violent crime simply does not displace geospatially to neighboring areas. Displacement is the idea that interventions at a place will cause crime to shift spatially to a neighboring or new area as offenders evaluate risks related to certain areas and relocate. If anything, hot spots policing actually sees a diffusion of crime control *benefits* to neighboring areas.

A large, city-wide study conducted in Bogotá, Colombia is an outlier. It did find displacement of property crimes but found no evidence of displacement for violent crimes. This is significant because, there is something specific about violent crimes (“crimes of passion”) that does not spill over into neighboring areas or other parts of the city. This is consistent with the idea that offenders with sustained motives (like theft) respond strategically to targeted police presence and choose to relocate. Crimes of passion might be easier to deter, given that they target a specific person in a specific place. This suggests that policymakers should consider carefully if the crime patterns in their city can be deterred by place-based hot spots policing.¹⁷⁶ Gun violence is usually a “crime of passion,” not one of convenience, and therefore it is likely that the hot spots policing model would effectively address such crimes.

Displacement that is not nearby or geospatial in nature, however, is understudied and not fully understood. Perhaps there is displacement of the crime type – the specific crime of gun violence does not occur but another type of crime is committed instead.¹⁷⁷ Or, displacement could occur but much farther away, although they did not find this for violent crime in Bogotá.¹⁷⁸

There are three possible counter-effective outcomes of hot spots policing. First, increasing police presence in an area may lead residents to believe crime has increased, thereby producing fear. Out of fear, residents can retreat from the community and the social controls that deter crime can break down.¹⁷⁹ Second, if hot spots policing decreases collective efficacy, it could increase crime over the long run and any short-term crime control gains would be offset. “Collective

efficacy” means the ability of a community to operate with common values and regulate behavior within it through strong relationships and mutual trust.¹⁸⁰ Weisburd et al. (2004) found that the “hotter” the spot, the lower the rates of collective efficacy.¹⁸¹ Lastly, a concern of hot spots policing is that it may decrease police legitimacy. To do their job, police need support and cooperation from the public, and their willingness to defer to their authority. If this breaks down, long term, a community could become lawless and even attract crime from elsewhere.¹⁸² Essentially, can simple everyday police methods produce long-term crime reductions at hot spots without deeper structural change to address inequities at the heart of crime?¹⁸³ Each of the above counter-effects could in the long-term offset the short-term gains made from hot spots policing.

While the theories underpinning the potential downsides of hot spots policing are valid, none have been studied to the degree where experts feel confident expressing that they ring true. In particular, there are conflicting studies regarding the impact of hot spots policing on police legitimacy. There is not enough research to make a judgment call on these concerns.¹⁸⁴ The police and criminal justice practitioners must monitor and evaluate their own community’s fear of crime, collective efficacy, and police legitimacy to understand the possible or likely impacts of a hot spots policing program in their city.

In addition to not knowing the full range of hot spots policing effects, we also do not fully understand the impacts of hot spots policing on rural areas or smaller cities.¹⁸⁵ Larger cities are almost always the focus of the literature with few exceptions. One study of San Bernardino County looked at hot spots in a suburban sprawl environment. While lower-activity places may still be “crime hot spots” in smaller jurisdictions, the ability of the police to influence crime at such places may be different. The number of events at each hot spot in San Bernardino County was too small to allow for statistically powerful outcomes. This is likely to be a serious barrier to evaluation in many smaller cities or in rural areas.

One study of Manhattan, Kansas evaluated their Operation Laser Point.¹⁸⁶ In it, the police targeted micro-hot spot locations and instituted regular, daily directed patrol visits, community engagement, and problem solving techniques. Crime decreased after the program began and held fairly steady throughout the program and afterward. Crime also declined in areas outside the hot spots, supporting prior research showing diffusion of crime control benefits. This study

shows that hot spots policing can be effective as a long-term crime control strategy in small cities – positive evidence for suburban areas and in lower crime areas of large cities.¹⁸⁷

Problem Oriented Policing

“Problem-Oriented Policing” or POP was developed by Herman Goldstein as an alternative method to traditional reactive efforts to address chronic problems.¹⁸⁸ It was his view that American policing had fallen ill with “means over ends” syndrome, placing more emphasis in their improvement efforts on organization and operating methods (number of arrests, average response time) than on the substantive outcome of their work”.¹⁸⁹ Essentially, they became so focused on means of policing, like staffing and management, that they were ignoring the things they were meant to solve. POP, he suggested, would refocus police on crime and disorder. This, he believed, would be a paradigm shift that would replace incident-driven, reactive “standard” policing with a model that required police to be proactive.¹⁹⁰

POP emphasizes the analysis of crime trends and root causes of crime in a community. It can be applied in neighborhoods, non-residential areas, or whole cities. This approach requires police to take a proactive stance by closely examining violence trends and customizing interventions for specific issues. While law enforcement plays a significant role in overseeing and participating in POP, non-law enforcement entities such as community organizations, healthcare services, other city departments and municipal actors may also have a part to play in addressing some problems. These non-law enforcement partnerships were key to ameliorating crime and disorder, in Goldstein’s vision of POP. Additionally, POP demands that law enforcement evaluate their strategies and determine whether they have achieved their goals.¹⁹¹ Because of this systematic method, Goldstein emphasized the importance of having personnel trained in research and assessment.¹⁹²

Most traditionally, the S.A.R.A. method (Scanning-Analysis-Response-Assessment) is used when applying POP. Eck and Spelman developed the method in 1987 as a “framework for uncovering complex mechanisms at play in crime problems and for developing tailor-made interventions to address the underlying conditions that cause crime problems”.¹⁹³ “Scanning” involves the identification and prioritization of potential problems that may be causing crime within a jurisdiction. “Analysis” involves an in-depth evaluation of problems using a variety of data sources so the most appropriate response can be developed. This is not just about problem outcomes like traditional policing but concerned with the underlying processes that lead to problems. “Response” is the development and implementation of an intervention tailored to the nature of the problem distilled in the analysis phase. Response searches should be broad,

involving law enforcement and non-law enforcement methods, other agencies, community groups and members. “Assessment” is the ongoing monitoring and evaluation of the response effect on targeted problem(s). This process is intended lead to continual improvements and refinement in further iterations of the response.¹⁹⁴

The three musts in conducting POP are that problems must be defined specifically, information must be collected from sources outside the department, and agencies must engage in a broad search for solutions. The best solutions tend to involve public and private entities that have a stake in solving the problem. Officers tend to get a more satisfying experience doing POP than traditional police work because they directly observe the results of their work, although it does require additional training and management.¹⁹⁵

Recently, it has been theorized that there are four “types” of crime-involved places that problem solving would benefit – crime sites, convergent settings, comfort spaces, and corrupting spots. Crime sites are those which analysts can identify on a map, through hot spot analysis or observation alone. Convergent settings are public places where people come together. For example, there is a bus depot in Cincinnati, Ohio where buses converge, and this space is a meeting spot for delinquent teenagers. Depending on the circumstances, there may or may not be crime occurring at a convergent setting. Third, comfort spaces are those which are private locations that offenders use for a variety of reasons, from hanging out to storing supplies to surveilling for the presence of law enforcement. Offenders prefer that crimes are not committed in comfort spaces.¹⁹⁶ Lastly, corrupting spots are those that are often businesses that allow for the facilitation of crime. An example is an auto repair shop that takes stolen car parts. Identifying these locations can, according to John Eck, Ph.D. and Lt. Matt Hammer, Ph.D., go a long way in dismantling place systems underlying crime.¹⁹⁷

A meta-analysis of POP suggests a statistically significant average decline (-33.8%) in general crime and disorder in treatment areas as opposed to controls. The analysis did not find significant spatial displacement of crime to other areas, but it did find evidence of some diffusion of crime control *benefits* to neighboring areas.¹⁹⁸ In terms of cost-effectiveness, crime “crackdowns”, or person-based programs where services have to be continually delivered, are less effective at lasting crime decline than programs where lasting change is instituted. The former sees deterrent effects erode when a program ends.¹⁹⁹

The greatest deterrence results are found when police combine hot spots policing with POP (situational prevention strategies). Disrupting situational dynamics that are catalysts to gun violence increases the necessary risk or effort in offending, or reduces attractiveness of possible victims. These interventions can range from an officer patrolling the block or city services creating green space or installing better street lighting. Razing abandoned buildings and cleaning

up graffiti are also common implementations of POP in hot spots. Despite this, POP often addresses non-geographic crime concentration – repeat offenders, repeat victims, hot products etc. While POP can be a type of Hot Spots Policing, many hot spots programs do not use the systematic approach of POP, which itself does not favor any particular intervention.²⁰⁰

Potential pitfalls to POP implementation are similar to those for hot spot policing: increased fear of crime, and decreased collective efficacy and police legitimacy.

Social Network Analysis as it Relates to Gun Violence

The epidemiological approach to behavior promises community leaders a better way to prevent gun violence – through Social Network Analysis (SNA) and identification of individuals vulnerable to perpetration and victimization.²⁰¹ A social network is a bounded number of social actors connected by various relationships (“ties”) – family, friendship, schooling, neighborhood, sexual relationships, etc.²⁰². Theoretically, SNA refers to the statistical analysis of how actors, usually people, are connected and influence each other’s thoughts, feelings, and actions.^{203,204} “As with other important health problems, most cases of firearm violence arise from large but low-risk subsets of the population”.²⁰⁵

Like many health phenomena, gun violence has been widely studied as a social contagion, in that it has been shown repeatedly to diffuse in a population, transmitted from person to person through social interaction.²⁰⁶ This means that individuals that have been exposed to gun violence, or exposed to individuals that have been perpetrators or victims of gun violence, have greater risk of victimization or perpetration when compared to those that have not.²⁰⁷ A study of homicides in Newark, NJ found that homicides were “not random but...moved [by a] similar process to an infectious disease, with firearms and gangs operating as infectious agents”.²⁰⁸ Direct exposure has a larger positive relationship to involvement with gun violence, although even small amounts of exposure can increase the likelihood of future victimization.²⁰⁹ One study of nonfatal gunshot victim social networks determined that a 1% increase in exposure to

gunshot victims in one’s immediate network increases the odds of becoming a victim by 1.1%. It also found that 10 percent exposure to victims at distances ≤ 2 ties increases the odds of gunshot victimization by 27.0 percent, and 25 percent exposure to victims increases the odds by 81.6 percent.²¹⁰

While gun violence may seem random, studying the social network underlying it can shed light on just how connected exposure is to future perpetration or future victimization. For example, we know from empirical and anecdotal data that young minority males are the most likely victims of gunshot injuries. Homicide risk is concentrated to a remarkable degree among Black males over the life course. At ages 20 to 29 in 2012, the firearm homicide rate for Black males was at least five times higher than that for Hispanic males and at least 20 times that for White males.²¹¹

Fig. 2. Rates of nonfatal gunshot victimization in Chicago, 2006–2012.

212

But, we cannot know why, between two young men with identical risk factors, one ends up victimized and one does not. “Defining the at-risk population as including young, minority males living in disadvantaged neighborhoods is not refined enough to capture the extreme concentration of gun violence in urban environments. Urban gun violence trends may be best understood as generated by a very small number of high-risk individuals who participate in high-risk social networks

and perpetrate their shootings at a very small number of high-risk micro places”.²¹³ This is where social network analysis, rather than examining neighborhoods or census tracts, can be useful in identifying at-risk individuals. SNA theorists claim that violence prevention efforts accounting for social contagion, in addition to demographics, have the potential to prevent more shootings than efforts that focus only on demographics.²¹⁴

Many studies on gun violence networks show that while all victims are in one very large and possibly additional smaller networks, gun violence is even more concentrated *within* networks. Only with SNA can we more precisely predict an individual’s risk within a certain network. One study of Boston shootings found that 85% of all gunshot injuries in a sample occurred within just one social network and that the closer one is to a gunshot victim (in number of ties), the greater the probability of one’s own victimization.²¹⁵ In the Newark, NJ study mentioned above, one third of all fatal and nonfatal shootings occurred in a network of less than 4% of the city’s population. This phenomenon has tremendous implications for public policy interventions aimed at reducing gun violence. If gun violence is affecting one very small subset of a larger network, police, along with city departments and social service organizations can most efficiently target those individuals for maximum violence prevention.

Gangs and Gang Membership

It has been widely studied and concluded that membership in a gang is highly associated with violent victimization.²¹⁶ Social Network Analysis (SNA) can provide mathematical understanding of gang-related networks and violent involvement in crime. Violence, specifically gun violence, can spread within co-offending networks from gang members to non-gang members.²¹⁷ A co-offending network is a network of individuals who have committed crimes together in the past, regardless of gang status. Some offenders in these networks are gang members and some are not, as not all criminal associates of gang members are necessarily in gangs.²¹⁸ Co-offending networks have been well documented in criminology as a base for the sociological processes underpinning crime and violence.²¹⁹ Co-offending as a mechanism to study gunshot violence has been used several times to understand the effect of past history of violent crime (or gang membership) on future risk of violent crime.

One co-offender network study of gang members in Newark, NJ found that gang membership increases the odds of gunshot victimization by 344%.²²⁰ That study also concluded that one or more ties to a gang member, or the closer in proximity to a gang member (even when not direct) within the co-offending network significantly increases the probability that one will experience fatal or non-fatal gunshot victimization.²²¹ Almost one third of all fatal or non-fatal shootings occurred in a network comprised of less than 4% of the city's population. If a subset of a city's gun violence is gang related, it is clear that performing SNA and locating individuals most at risk for intervention would be an effective and logical step toward reducing gun violence.

Domestic Violence and Firearm Accessibility

Nicholas Kristoff with the New York Times writes that we already bar felons from owning guns, and we should go a step further and bar violent misdemeanor offenders from possessing guns.²²² California has taken this step. In California, there is a domestic violence misdemeanor firearm prohibition, required firearm relinquishment for domestic violence misdemeanors, and required reporting of domestic violence misdemeanors to national databases.

Stalking, domestic violence, and alcohol abuse are particular warning signs of future violence. A study on femicide in intimate partner relationships states that “an abusive partner's access to a firearm is a serious threat to victims of domestic violence, making it five times more likely that [they] will be killed”.²²³ States that bar those subject to active domestic violence restraining orders from accessing guns have seen a 13% reduction in intimate partner homicides involving firearms.²²⁴ Removal of guns from domestic violence offenders is one of the most frequently used and effective strategies *as rated by local police* throughout the country.²²⁵

Those who have been an abuse victim of an intimate partner need intervention to “prevent further escalation of violence. Healthcare practitioners should question individuals not only about domestic violence but also about abusers' access to a gun and should provide appropriate referrals to services and information regarding serious risk in such

situations.^{226, 227} The most important thing clinicians can do is inform a victim of domestic violence that Extreme Risk Protection Orders exist.

Police can only act on active restraining orders and Extreme Risk Protection Orders, so direction should be given to victims on how to obtain one. An Extreme Risk Protection Order (ERPO) is a civil order that temporarily prohibits individuals who pose a danger to themselves or others from purchasing and possessing firearms. In California, law enforcement or clinicians, a family or household member, employers, co-workers, and employees and teachers at secondary and post-secondary schools can petition for an individual to be under an ERPO.²²⁸ In California, these laws can also apply to dating partners (not true in every state).

There is both objective and anecdotal evidence that these actions work when they happen and do reduce violence.

Hospital Based Violence Intervention Programs (HVIPs)

The rationale for a Hospital-Based Violence Intervention Program is a public health one. Their goal is to improve the pre-existing social determinants of health (such as poverty, a low level of education, and substance abuse) that may have led to violent victimization and, in doing so, prevent reinjury.²²⁹ One of the strongest predictors of future injury is past injury, and victims of violent injury are more than twice as likely to die a violent death compared to matched control subjects.^{79, 230} Gunshot victims or victims of violent assault are almost always taken to trauma I hospitals. The window after an injury is considered a valuable time for intervention, while that patient is still being treated in the hospital. It has really been just over the last 20 years that these programs have emerged to take advantage of that time to break the cycle of violence.²³¹

Hospital-Based Violence Intervention Programs identify violently injured patients and intervene at their bedside immediately following a violent victimization injury. Typically, the hospital assigns patients a case manager or social worker who evaluates patients based on the patient's perception of their own psychosocial, emotional, or financial needs and connects them with providers in the community that are capable of addressing those needs. Various models tend to emphasize that case workers need to be culturally competent and it is beneficial if they come from similar environments as patients.

Zuckerberg San Francisco General Hospital is the only Trauma I facility serving the whole city and county of San Francisco. Since 2005 the Wraparound Program has been implemented as its HVIP. They offer enrollment in the program to all victims of intentional injuries that are between 10-35 years old that they determine via a screening process to be at high-risk of reinjury. The victim must also be injured or live in San Francisco. Notably, patients excluded are those whose injuries are a result of domestic violence or child abuse, or if self-inflicted. Patients must consent to participation and then an initial intake and needs assessment is done. The program provides up to one year of intensive case management including mentorship, advocacy, and services from community providers. There are challenges in evaluating this program because bias is introduced by self-selection (which would likely decrease the rate of reinjury) and the fact that only patients screened to be high-risk are selected (which would likely increase the rate of reinjury). However, the injury recidivism rate decreased from 8.4% to 4.9% after its institution at Zuckerberg in 2006. A study of the Violence Intervention Advocacy Program at Boston Medical Center similarly finds that it effectively serves the population choosing the program.²³² The HVIP at University Hospital in Newark, New Jersey has also been studied and found achieve patient-stated short-term health and social goals in half of its enrollees during 2020.²³³

“Recidivism has been used as an outcome measure of HVIPs for several years. Although it adds a layer of complexity, its measurement has been linked to the cost–benefit ratio for hospitals and communities to use in obtaining grant funding and convincing administrators of the utility of HVIPs.”²³⁴

In Alameda County, a CBO program called Caught in the Crossfire does hospital bed interventions similar to the Wraparound Program but, it is not directly managed by hospitals; they rely on hospital buy-in.²³⁵ Their stated goals are to convince the victims, their friends, and their family not to retaliate, to reduce hostilities, and provide victims pathways to a safer life.²³⁶

Focused Deterrence (Custom Notifications)

The theory of change in focused deterrence is that violence can be prevented if individuals believe that the costs of violence outweigh its potential benefits.²³⁷ The strategy identifies those most at risk of becoming a perpetrator of gun violence and delivers a “hard” message – that violence will not be tolerated and any of it will be met with swift arrests and criminal justice consequences. There is also the “soft” message delivery, that the police and (usually a CBO) are here to help connect the individual with resources that they can then leverage to transition away from violence.

Historically, custom notifications were delivered as part of a larger “call-in”, where group members are all called to the same place and a message is communicated that “affected communities want the violence to stop, there is help available to group members who want it, and meaningful legal consequences will follow if the violence does not stop.”

²³⁶ Id.

²³⁷ Braga, A. A. (2008). Pulling levers focused deterrence strategies and the prevention of gun homicide. *Journal of Criminal Justice*, 36(4), 332–343. <https://doi.org/10.1016/j.jcrimjus.2008.06.009>

These, however, assume group violence is at a certain height and also require a large amount of pre-work to be done to gather the right people and communicate the messages tailored to the full group as well as to the individuals. Therefore, they are not tactical because it is not possible to get one together to prevent violence likely to occur within a day or two.

Instead, it has been valuable instead to focus just on individuals in their homes with appropriate personnel, such as probation, parole, and police officers, as well as community voices and positive “influentials” such as family members. Custom notifications have many advantages on their own. They can be delivered to anyone, regardless of whether they are on parole, probation, or in a larger group. They can be delivered to a smaller number of impact players, who often are not under court supervision and cannot be mandated to attend a call-in. They are flexible and implemented with short notice and can be delivered by law enforcement alone, community figures alone, or a combination. They can incorporate an “influential”, someone close to the individual who represents a consistent, positive influence.

Incorporating influentials as partners with community members, law enforcement, and social service providers gives a strong message about making good choices and the consequences of violence. They are powerful tools for interrupting gang “beefs”, heading off retaliation after a violent event, calming down outbreaks of violence and bolstering the core gun violence program. They can incorporate highly specific information meaningful to the person being notified, such as the help they personally may need or particular legal vulnerabilities they face if they continue offending. These messages can be delivered to parolees or probationers as they prepare to reenter society.²³⁸ Lastly, custom notifications can create spillover violence reduction effects on group members who are socially tied to others engaged in violence, so you reach more than just those individuals that were selected for direct contact. This is especially true if Social Network Analysis is used to identify them.

It is emphasized in the literature that partnering with a CBO, such as California Partnership for Safe Communities, is ideal. A social service provider, community group, faith-based organization, or street outreach worker can increase the credibility of law enforcement and connect more genuinely with the individual. Mobilizing such organizations is critical so that the “soft” message is extended, and the individual feels cared about, related to, and that someone wants to help them. They can deliver antiviolence messages on their own or alongside law enforcement. In Cincinnati, community representatives take the lead in the notification process, speaking to impact players on their own before police, social services, and street outreach workers visit. Street outreach workers often have history of being group-involved or incarcerated and can be able to reach impact players not easily located by law enforcement. Their personal histories better able them to relate to impact players on the falsehood of the street code and what the street code has cost them.

Street Outreach Teams/Violence Interrupters

“Street Outreach organizations do a lot more for public safety than just trying to stop gun violence: they are anchoring institutions for neighborhood safety and well-being, dealing with issues related to housing, mental health, education, and justice.”²³⁹ Street Outreach Workers are credible messengers, often formerly incarcerated or have been involved in or affected by violence in the past, that help identify violence and interrupt or mediate it in real time. They have inroads

²³⁸ A New York initiative replicates the work of Chicago’s Project Safe Neighborhoods (PSN), which achieved large violence reductions selecting districts through delivery of individualized messages to parolees about legal exposure and services available. Chicago districts participating in PSN communication saw a 37% reduction in homicide and a 30% decrease in recidivism among notified offenders.

²³⁹ *Op-ed: What we know (And don’t know) about street outreach and gun violence prevention.* (2021, October 25). Chicago Tribune. <https://www.chicagotribune.com/opinion/commentary/ct-opinion-chicago-gun-violence-street-outreach-20211025-6pylamxs5jzhhyya3x3nb3eya-story.html>

to vulnerable groups that police do not, act as a conduit between group members and other participants in a city's violence reduction program, and help people make the transition away from street violence.

The overall theory of change is a public health one – that violence is like a contagious disease and its spread can be interrupted.²⁴⁰ Operating beneath this strategy is the aim to increasing informal social controls – or fortifying a community's collective norms and standards of conduct and encouraging community members to uphold them. When done well it “marries the goal of strengthening a community's moral voice against violence with the imperative to offer help to its highest risk population. It also lends itself to concrete violence interventions, such as controlling rumors during moments of conflict, calming people down to defuse potential retaliation, and mentoring people at high risk of hurting someone or being hurt”.²⁴¹

“Safe Streets” in Baltimore, Maryland, and “Ceasefire” in Chicago, Illinois both used the same model and showed statistically significant decreases in the overall level of violence in treatment areas. Unfortunately, this is not a consistent outcome. While many programs do reflect the essential nature of credible messengers and violence interruption, others have either null or negative results. Often, those that have negative effects are programs that stand alone, not within broader violence reduction programs. It is also not useful to work with gangs *as gangs* – as that gives them recognition and can even increase gang cohesion. Also, programs that prioritize job or educational outcomes but don't focus primarily on street violence do not achieve their stated goal to reduce it. Even where street work has been successful and demonstrated positive effects, it has been too limited in scope and impact to reduce overall levels of violence in a city.²⁴²

Many street outreach programs do not work or communicate with law enforcement or other entities with the same goals. While they may have principled reasons for this, it undermines the interagency partnership that has been the “hallmark of effective violence interventions”. Understandably, Street Outreach workers can be wary of police – it could threaten their credibility with the population they serve and need access to. Cities have ameliorated much of this by working with street workers to establish clear boundaries and clear times when they do work in tandem. Both police and street workers establish protocols in advance of their work, about how and under what conditions they will collaborate, what information they will share, and how they will address the public concern about their working together. Street workers protect the names of people they work with and do not share information with police or help them build and solve cases. Both sides need training on these protocols to maintain accountability and partnership.²⁴³ The “triangle protocol” in Los Angeles establishes the city violence reduction initiative as a partner to the LAPD and their streetwork agencies, linking victims with services, brokering peace, and communicating with police about incidents. New York City has a similar organization with the Mayor's Office to Prevent Gun Violence, working in tandem with streetworkers and the NYPD. Recent Evaluation has shown this structure to be highly effective in preventing retaliatory shootings.²⁴⁴

Andrew Papachristos, Ph.D. describes a pilot project where twice a week he and partners sit down and do network analysis *with* the outreach staff. He says that data is starting to be brought to outreach. “We do know,” he says, “that when police and outreach are doing their jobs right they’re actually working with the same people.” Including street outreach in shooting reviews where mapping is done has shown to be beneficial in Boston and Oakland.

Operation Peacekeeper in Stockton, California exemplifies these best practices when it comes to streetwork. At one time, they used to walk a neighborhood with the police after a shooting to offer care and services. They observed that this compromised their capital with the community and the Peacekeepers ended that with support from the police. Nevertheless, the two organizations still successfully navigate violence prevention in partnership and produce public safety. The Stockton Police Department does not expect or want information from Peacekeepers and believes that their clients need to be protected to preserve Peacekeepers’ legitimacy. After gun violence, Peacekeepers’ priority is stopping further violence or retaliation. They offer services and support but do not enter active crime scenes. Peacekeepers and police collaborate on “shooting reviews” to track recent violence and prevent new violence. Information is unidirectional, flowing only and carefully from police to streetworkers so they can focus on those most at risk. Sometimes, Stockton streetworkers accompany police to deliver in-person messages known as “custom notifications” to people with the highest risk of gun violence involvement. The process has been developed to warn high-risk individuals that violence will not be tolerated and to offer community resources to support them and keep them safe. Oakland, California also does this as part of their gun violence reduction work.²⁴⁵

Chicago CRED is a Street Outreach initiative that incorporates life skills training, as well as educational and employment programming.²⁴⁶ Early evidence suggests that street outreach reduces gun violence or at least saves the lives of participants. 18 months after beginning the program, participants in the Chicago CRED and similar programs have victimization rates 50% lower than non-participants. 63% of CRED participants that did not have a high school diploma prior to the program received one while in the program. Participants were 79% less likely to be arrested for shootings and homicides.²⁴⁷

Chicago CRED, despite its success and more than 250 active employees on the street, hasn’t decreased the overall level of gun violence. At its scale in Chicago, for every participant in the program there are 20 more in the same neighborhood lacking equal services. Also, violence is entrenched in societies beyond the individual and their ties to others and violent situations. Although not a panacea, Dr. Papachristos of Northwestern University says that Street Outreach is a necessary component for any city looking to adopt a multi-pronged violence prevention program, but any program that doesn’t consider the full neighborhood context will fall short.²⁴⁸

In Oakland, YouthALIVE!, the same CBO that does Hospital-Based Violence Prevention, does violence interruption.²⁴⁹

Root Causes of Gun Violence

Contrary to popular thought, mental illness is not a primary contributor to interpersonal firearm violence.^{250,251} Access to firearms and firearm ownership remain the most potent determinants of an individual's likelihood to engage in any type of gun violence.²⁵² Other predictors for future gun violence involvement are prior history of violence (especially domestic violence²⁵³) and substance abuse. The leading cause of death for teenagers and young adults is firearm violence, and homicide risk is extremely concentrated among Black males regardless of age, although it does diminish in later years.²⁵⁴ The next most at-risk subset is Hispanic males, but the rate for Black men remains five times higher than for Hispanic men and 20 times higher than for white men.²⁵⁵ The most common environment for gun violence is minority and economically disadvantaged neighborhoods. However, SNA reveals that the vast majority of Black and Hispanic men in these neighborhoods do *not* become victims or perpetrators, but rather the phenomenon is highly concentrated among people within a much larger network that includes, but is not limited to, that neighborhood.²⁵⁶

The Educational Fund to Stop Gun Violence (EFSGV) released a report in 2020 citing seven central root causes to gun violence – income inequality, poverty, underfunded public housing, under-resourced public services, underperforming schools, lack of opportunity and perception of hopelessness, and easy access to firearms by high-risk people.²⁵⁷ Notably, only the last of these is something that police have any direct power over, and that power has been expressly curbed by the Fifth U.S. Circuit Court of Appeals in three states.²⁵⁸ However, California officials remain able to confiscate firearms from domestic abusers unless that ruling is appealed and upheld by the U.S. Supreme Court. The remainder of these root causes must be the jurisdiction of community-based organizations and a long term partnership with their municipalities or counties. A police department could, however, lead the way for these partnerships.

²⁵³ The presence of a gun in a domestic violence situation increases the risk of homicide by 500%. A study of women in 67 California domestic violence shelters found that abusive intimate partners used handguns to harm, threaten, or scare 32.1% of study participants; long guns were used to harm, threaten, or scare 15.9% of participants. 39.1% reported that the abusive intimate partner owned a firearm during the relationship, almost twice the rate of gun ownership in California. Of participants in gun-owning households, 64.5% said a gun had been used against them. (National Coalition Against Domestic Violence)

April 2023

Memorandum on Berkeley Ceasefire D2 Ad Hoc Advisory Group

The District 2 Council office convened a series of meetings with local stakeholders and subject matter experts to better understand the operations of violence prevention programs and the challenges local governments may face in implementation.

However, pursuant to the Charter of the City of Berkeley, Article VII § 28(c), the City Manager holds the exclusive power of policy implementation and “administration of all affairs of the city.” As the City Manager’s office undergoes the process of procurement and staffing for the \$1M Ceasefire program, the group sought to provide guidance on best practices and cultural competency to ensure that holistic wraparound services can effectively maximize positive public health and safety outcomes. To preclude any potential influence over the RFP (Request for Proposals) process, identifying information of individual participants and organizations represented in this Advisory Group will not be included in this memorandum.

Participants reflected a general consensus that Ceasefire efforts should be a grassroots community-driven effort. However, several considerations arose for optimal implementation through the community, broadly summarized under three categories: *institutional*, *individual*, and *geographical*.

Institutional considerations

- Violence prevention programs should include school outreach, and closely integrate with family, youth, and mental health services. Gun violence is one manifestation of broader systemic issues, and exposure to violence can begin as early as preschool. Thus, school-based violence intervention should include all ages, including continuing education at BUSD’s Adult School.
 - BPD’s School Resource Officer is experienced with prevention programs.
- Social services should seek to be proactive rather than merely reactive *post hoc* to specific incidents of violence.
- CALLES, a community-based street intervention program run by HOMEY in San Francisco’s Mission District, offers a robust model for intervention, diversion, youth advocacy, and wraparound services.
 - Richmond’s Advance Peace also did stipends for at-risk youth community members to disincentivize truancy, in addition to its Peacekeeper Fellowships for street outreach.
- Funding for services should ensure good compensation for service providers, and leverage other funding sources such as MediCal.
- Service providers and City staff should have robust cultural competency and anti-racism training.
- Generally, efforts should be on synergizing and streamlining rather than duplicating work. The broader the scope of a program, the greater the risk of path dependencies that could hinder the efficacy of service provision (e.g. narrower pool of qualified contractors or infeasible workloads).

Office of the City Manager

October 12, 2022

To: *DWR* Honorable Mayor and Members of the City Council

From: Dee Williams-Ridley, City Manager

Subject: Progress Update on Violence Intervention Initiative (Berkeley Ceasefire)

BACKGROUND:

On June 28, 2022, the City of Berkeley ratified a budget for FY 2023 & FY 2024 with an allocation of funds dedicated to addressing the increase in gun violence that the city of Berkeley has experienced in recent years. The budget item, titled “Ceasefire”, is predicated on prior discussions on potential community-based violence prevention strategies.

For purposes of the FY 23/FY 24 budget process, funding allocations were identified as follows:

- Full time Director: \$120,000-\$140,000
- Program Manager/Supervisor: \$80,000-90,000
- 5 Life Coaches: \$70,000 each for a total of \$350,000
- 3 Outreach Workers - \$62,000 each for a total of \$186,000
- Fringe (25%): \$190,250
- Gun Violence Problem Analysis: \$35,000

Based on the estimated costs of the positions noted above, a Ceasefire program will cost approximately \$1 million annually. We anticipate that the services provided by the various positions could be delivered by community-based organizations, with the exception of the Director position which would be a City staff position.

Community-based violence prevention strategies with trained and qualified life coaches invest in the community by building constructive relationships with mentors who have lived experience. The Berkeley Police Department recognizes that such programs by their very nature must deeply engage the community and empower those community members that already have meaningful ties to the community in need. The department will play a role in the successful implementation and success of violence intervention

initiatives by supporting the overall program efforts, collaborating and assisting where appropriate, and sharing data to inform engagement decisions.

PROGRESS TO DATE:

- Berkeley Police Department (BPD) has established an internal team to engage in the implementation process. The team is conducting preliminary analyses and connecting regularly with other early-phase stakeholders. The department continues to build out the Transparency Hub with data and analysis designed to support the Ceasefire process and inform our community of our efforts in this space. Soon, we will publish a dashboard that details information about shooting trends and other efforts to address gun violence.
- Council Member Taplin has coordinated two advisory group meetings inviting a number of community stakeholders and experts in violence reduction programs. These meetings included faith leaders and community-based organizations in our City. The meetings involved identifying current systems and other stakeholders who should be engaged in the process as well as discussions as to what strategies would work best in Berkeley.
- Developing an overall network in support of violence intervention and reduction is crucial to treating violence as a public health issue. To that end, BPD is actively exploring other resources and support for these programs. This involves reviewing and considering grant proposals and other funding sources for violence intervention approaches.
- This public health issue is developing an overall network in support of violence intervention and reduction.
- BPD will expand its partnership with UC Berkeley (currently we are working with data science students on a parallel project) to include a collaboration with the Goldman School of Public Policy to design a program evaluation plan including the definition of success metrics and independent analysis thereof.
- BPD currently engages with Ceasefire programs in surrounding cities and other violence prevention programs when there are Berkeley connections to crime in other jurisdictions.

The City Manager's Office will oversee the management of the community-based violence prevention strategies by way of an Assistant to the City Manager that will be responsible for the Reimagining Public Safety initiative. Recruitment for this position is planned to occur prior to the end of the year with recruitment for the remaining positions to occur in 2023. The City Manager's office is particularly well-placed to manage the program because of its pre-existing relationships with non-profit organizations in the community.

NEXT STEPS:

Work is underway to develop City-specific and appropriate violence prevention strategies (Berkeley Ceasefire) with the goals of intervening in conflicts and reducing retaliation or escalation, and in a more general sense, diverting people away from the criminal justice system. Next steps include:

- BPD will continue to work with the City Manager's Office to identify who should lead on next steps and implementation to ensure that forward progress continues.
- BPD will conduct a preliminary analysis of gun violence in Berkeley.
- BPD will build automated data visualization tools for violence prevention program stakeholders to track relevant statistics through the duration of the program.
- BPD and the City Manager's office will identify a broader local stakeholder group to include faith-based, school and youth-focused community groups as well as county probation.

cc: Jennifer Louis, Interim Chief of Police
Mark Numainville, City Clerk

Individual considerations

- Because a smaller at-risk population contributes a disproportionate share of violent incidents in Alameda County, improving health and educational outcomes in these populations can have outsized benefits for public safety outcomes. Services targeted at highest-risk individuals are not necessarily best tracked by performance metrics based on net count of individuals served.
 - By way of example, hospital-based intervention is a critical tool for linking at-risk individuals to wraparound services and disrupting patterns of violence.
- Individual profiles are important to capture in the data on community violence and may provide critical information that would not be as salient in population-wide trends. For case management with youth, tracking and incentivizing GPA and educational attainment has been especially helpful for CALLES in SF.
- Outreach workers will need to form close trusting relationships with the individuals they serve, as well other service providers in the area. Community members and CBOs are well-suited for individual-level interventions, including life coaching and counseling, and City programs should lean into “homegrown” networks. Nevertheless, interventions are significant labor-intensive efforts that often involve overlapping jurisdictions.
 - Likewise, cultural competency and anti-racism should be central to life coaching service provider standards.
- Life coaching is most effective when paired with mental health treatment and other services, such as Healthy Black Families and McGee Ave Baptist Church’s nutrition education and health equity programs.
 - Life coaching can work with cognitive behavior therapy, life mapping, and other intervention frameworks, but it is important that service providers never excuse or condone criminal behavior.
 - While the Alameda County District Attorney’s manages post-arrest mental health diversion programs, BPD will be looking closely at the Specialized Care Unit and other initiatives to support mental health interventions.
- Case management and continuity in violence intervention service can be complicated when an individual turns 18/21. Thus, community relationships may provide critical support if and when individuals fall through “cracks” in the system.
- Reducing the supply and distribution of deadly firearms remains a significant challenge in the absence of much-needed state and federal reforms. However, local and individual incentives remain important. For example, while “gun buy-back” programs have been shown to *only* be effective at reducing violence when directly paired with wraparound services, their cost-effectiveness remains a significant barrier, since jurisdictions would have to offer prices at least at par or higher than replacement value of firearms most likely to be used for criminal activity (est. \$1k-2k), rather than only purchasing more depreciated firearms at the lower end of the resale market.

Geographical considerations

- Because Bay Area communities extend far beyond municipal borders, so do patterns of systemic violence. Interjurisdictional collaboration is integral to the success of violence intervention programs at the local level.

- At the same time, federal and state intervention may primarily focus on jurisdictions with major cases such as in Oakland and San Francisco, rather than devoting resources to Berkeley, where rates of gun violence have also increased but are lower than larger neighboring cities overall.
- Leveraging linkages with county resources can improve cost-effectiveness and regional durability of positive outcomes. For example, the Alameda County Probation Department has a \$15 million annual budget for violence prevention services. The Deputy Sheriff's Activities League (DSAL) provides youth recreation & fitness programming, food assistance, and community farms in Hayward, Fremont, and Union City.
 - The City of Oakland's Ceasefire program often collaborates on grant funding initiatives with Alameda County partners.
- Inevitably, individuals in Berkeley are already involved in call-ins and other intervention efforts in Oakland's Ceasefire program. Local program management can leverage existing networks both at the neighborhood and regional level.
- Data analysis and "violence affected networks" mapping is underway in BPD and will be essential for partnerships with CBOs and other service providers.

CONSENT CALENDAR
May 31, 2022

To: Honorable Mayor and Members of the City Council
From: Councilmember Taplin
Subject: Budget Referral: Ceasefire Program Staffing

RECOMMENDATION

Refer \$1,000,000 (\$1M) to the budget process to provide full staffing for a Berkeley Ceasefire program.

FINANCIAL IMPLICATIONS

\$1 million in General Fund costs per annum in FY 23-24 biennial budget.

According to the Everytown Economic Cost of Gun Violence Calculator Tool, a single gun homicide directly costs state taxpayers \$1 million, and costs Californians \$9 million when including externalities imposed on family members, survivors, and the community at large.¹

CURRENT SITUATION AND ITS EFFECTS

Berkeley Ceasefire is a Strategic Plan Priority Project, advancing our goal to create a resilient, safe, connected, and prepared city.

Gun violence is increasing at an alarming rate in the city of Berkeley. In 2021, there was a 30% increase in reported gun violence in Berkeley, with 52 confirmed shooting incidents compared to 40 in 2020. In 2021, the Berkeley Police Department recovered a total of 118 firearms, an increase of 38.8%. In 2021, 33 of the firearms seized were ghost guns compared to 6 in 2020 and 8 in 2019.²

On November 9, 2021, the Berkeley City Council unanimously approved a budget referral for \$200,000 in consulting costs to begin developing a multi-jurisdictional Gun Violence Intervention (GVI) program, a.k.a. Ceasefire, in Berkeley. On May 5, 2022, the City Council approved an omnibus budget referral to pursue a phased approach to the Reimagining Public Safety process, which included an additional \$200,000 for Ceasefire.

BACKGROUND

¹ <https://everytownresearch.org/report/economic-cost-calculator/>

² <https://berkeleyca.gov/sites/default/files/2022-04/2022-02-22%20Item%2033%202021%20Year%20End%20Crime.pdf>

Budget Referral: Ceasefire Staffing

David Muhammad, Executive Director of the National Institute for Criminal Justice (NICJR), has provided the following cost estimates for a fully staffed Ceasefire program in Berkeley:

- Full time Director: \$120-\$140k
- Program Manager/Supervisor: \$80-90k
- 5 Life Coaches: \$70k each - \$350k
- 3 Outreach Workers - \$62k each -- \$186k
- Fringe (25%): \$190,250
- Gun Violence Problem Analysis: \$35k

Total: \$986,250

The National Network for Safe Communities defines GVI programs as “a partnership of law enforcement, community members, and social service providers with a common goal but distinct roles,” each role “conveying a powerful community message about disapproval for violence and in support of community aspirations; concrete opportunities for both immediate and longer term assistance and support; and clear prior notice of the legal risks associated with continued violence.”³

Ceasefire programs are credited with major reductions in homicide rates in cities that have implemented them, including Stockton⁴ and Richmond.⁵

APPENDIX O

Downtown Streets Team Supporting Documentation

Office of the City Manager

CONSENT CALENDAR
May 31, 2022

To: Honorable Mayor and Members of the City Council

From: Dee Williams-Ridley, City Manager

Submitted by: Liam Garland, Director, Public Works

Subject: Contract No. 31900031 Amendment: Downtown Streets Team for Expanded Services

RECOMMENDATION

Adopt a Resolution authorizing the City Manager or designee to amend Contract No. 31900031 with Downtown Streets Team (DST) to:

1. Increase the contract by \$400,000 for a new not to exceed amount of \$1,675,304 and extend the contract term through December 31, 2023; and
2. Expand DST services to include the cleanup of litter and illegally dumped materials at encampment sites and adjacent neighborhoods throughout the City of Berkeley as needed; and
3. Sole-source negotiate new pricing, contract terms, and scope of services in support of the Clean Cities Program for the continuation of leaf and litter removal, graffiti abatement, and poster removal services for various commercial districts in Fiscal Year 2024.

FISCAL IMPACTS OF RECOMMENDATION

Funding in the amount of \$100,000 is available in the FY22 General Fund 011 (budget code: 011-54-625-714-0000-000-431-612990-PWSUCC2201) and \$300,000 is available in Zero Waste Fund 601 (budget code: 601-54-625-714-0000-000-472-612990).

CURRENT SITUATION AND ITS EFFECTS

This contract amendment will continue funding baseline services, in support of the Clean City Program, which promotes beautification of the City's commercial districts by performing hand sweeping, graffiti abatement, and poster removal services. Additionally, this contract amendment provides for continued DST services that were initiated to fund bi-weekly (once every two weeks) cleaning of populated encampment sites and adjacent neighborhoods. These services include the cleanup of litter and illegally dumped materials in areas throughout Berkeley, currently enhancing services in South and West Berkeley neighborhoods.

Furthermore, if adopted, this resolution will allow for City staff to enter into sole source negotiations with DST for new pricing, contract terms, and scope of services in support of the Clean Cities Program for the continuation of leaf and litter removal, graffiti abatement, and poster removal services for various commercial districts in Fiscal Years 2024 and 2025

Amending the contract supports the Strategic Plan Priority of advancing our goal to provide state-of-the-art, well-maintained infrastructure, amenities, and facilities.

BACKGROUND

DST works extensively with the low income, un-housed community to promote self-sufficiency through job training and leadership opportunities to rebuild effective work habits, as well as providing assistance to the un-housed in securing permanent housing. DST works cooperatively with local community agencies to ensure local, low-income and homeless residents have access to, and receive training for, jobs created by this contract.

Since August 2018, DST has supported the City's Clean City Program by hand sweeping to remove excess leaves, litter, and trash from sidewalks and gutters throughout the City, and helping keep the City's commercial districts clean.

On April 27, 2021, City Council approved the adoption of Resolution No. 69,820 N.S., authorizing the City Manager to amend the DST contract to address enhanced needs for services. The enhanced services provide for the cleanup of litter and illegally dumped materials around encampments and adjacent neighborhoods throughout Berkeley consistent with the Equitable Clean Streets Budget Referral adopted by City Council on October 27th 2020. This was followed by the adoption of another resolution (Resolution No. 70,109 N.S.) to expand the enhanced services to three new zones serving residential areas near Adeline Avenue, South Shattuck Avenue, and West Berkeley.

Since the adoption of both resolutions, DST has applied the enhanced services to both South and West Berkeley neighborhoods. These areas currently include Adeline Street, from Alcatraz Avenue to Ashby Avenue, plus side streets; and University Avenue, from San Pablo Avenue to Sixth Street, plus side streets. Additionally, the enhanced services may extend to the Gilman District area as well, specifically on Gilman Avenue, between San Pablo and Sixth Street, including side streets. However, DST is currently experiencing significant staffing shortages so the Gilman District services will not be able to commence until Fall of 2022.

ENVIRONMENTAL SUSTAINABILITY AND CLIMATE IMPACTS

The Clean City Program is an integral part of the City's Zero Waste Goal. Additionally, the Municipal Regional Stormwater Permit (MRP) requires the City to reduce the

amount of trash flowing into local waterways and the Bay via the City's storm drainage system. Hand sweeping removes excess leaves, litter, and debris from sidewalks and gutters which prevents these items from getting into the City's storm drainage system.

RATIONALE FOR RECOMMENDATION

Additional funding will allow for the Downtown Streets Team to continue current services plus expand the City's program to address enhanced needs throughout the City where services are needed.

ALTERNATIVE ACTIONS CONSIDERED

None.

1: Resolution

RESOLUTION NO. ##,###-N.S.

CONTRACT NO. 31900031 AMENDMENT: DOWNTOWN STREETS TEAM FOR EXPANDED SERVICES

WHEREAS, in August, 2018 City Council authorized Resolution No. 68,497 N.S. authorizing Contract No. 31900031 with Downtown Streets Team for leaf and litter removal and related services with a not to exceed amount of \$645,304 for a two year contract term; and

WHEREAS, in September, 2020 City Council Resolution No. 69,545 N.S. authorized Contract No. 31900031 Amendment with Downtown Streets Team to add additional scope of work, increase the not to exceed amount by \$225,000 to \$870,304 and to extend the Contract term through June 30, 2022; and

WHEREAS, in April, 2021 City Council Resolution No. 69,820 N.S. authorized Contract Amendment No. 31900031 with Downtown Streets Team to add additional scope of work to hire two Streets Team Enterprises C.A.R.E. Fellows to address enhanced needs for services in neighborhoods and around encampment hot spots and increase the contract by \$50,000 for a new not to exceed amount of \$920,304; and

WHEREAS, in November, 2021 City Council Resolution No. 70,109 N.S. authorized Contract Amendment No. 3190031 with Downtown Streets Team to add additional scope to expand services to three new zones serving residential areas near Adeline, South Shattuck and West Berkeley, and increase the contract by \$335,000 for a new not to exceed amount of \$1,275,304; and

WHEREAS, Downtown Streets Team is an organization committed to helping low-income and un-housed members in the local community achieve health and self-sufficiency; and

WHEREAS, funding is available in the General Fund (budget code: 011-54-625-714-0000-000-431-612990-PWSUCC2201) in the amount of \$100,000 and Zero Waste Fund 601 (budget code: 601-54-625-714-0000-000-472-612990) in the amount of \$300,000.

NOW THEREFORE, BE IT RESOLVED by the Council of the City of Berkeley that the City Manager or her designee is authorized to execute an amendment to Contract No. 31900031 with Downtown Streets Team to 1) increase the contract by \$400,000 for a new not to exceed amount of \$1,675,304 and extend the contract term through December 31, 2023; 2) expand services to include the cleanup of litter and illegally dumped materials at encampment sites and adjacent neighborhoods throughout the City of Berkeley as needed; and 3) negotiate new pricing, contract terms, and scope of services in support of the Clean Cities Program for the continuation of leaf and litter removal, graffiti abatement, and poster removal services for various commercial districts in Fiscal Year 2024.

Office of the City Manager

CONSENT CALENDAR
June 27, 2023

To: Honorable Mayor and Members of the City Council

From: Dee Williams-Ridley, City Manager

Submitted by: Liam Garland, Director, Public Works

Subject: Contract: Downtown Streets Team for hand sweeping, graffiti and litter abatement, poster removal, and low barrier volunteer work experience program

RECOMMENDATION

Adopt a Resolution authorizing the City Manager or her designee to execute a contract, and any amendments or extensions, with Downtown Streets Team for hand sweeping, graffiti and litter abatement, poster removal, and low barrier volunteer work experience program. The contract will be in an amount not to exceed \$1,625,500 for the period August 1, 2023 through August 30, 2027.

FISCAL IMPACTS OF RECOMMENDATION

Annual expected costs are anticipated to be approximately \$530,000. Funding in the amount of \$225,000 is available in FY 2024 in the General Fund. Funding in the amount of \$331,250 is available in the Zero Waste Fund. There is additional one-time funding of \$100,000 in the General Fund that will be appropriated as part of the FY 2024 budget to support expansion to the Gilman District and support efforts to place low-level violators into the Downtown Streets program.

Future funding is subject to appropriation in the FY 2025 and FY 2026 budgets.

CURRENT SITUATION AND ITS EFFECTS

On May 31, 2022, City Council approved Resolution No. 70, 394-N.S to allow for City staff to enter into sole source negotiations with DST for new pricing, contract terms, and scope of services in support of the Clean Cities Program for the continuation of hand sweeping, leaf and litter removal, graffiti abatement, and poster removal services for various commercial districts.

Public Works and the City Manager's Homeless Response Team worked on new pricing and scope of services to continue the important work of the Downtown Streets Team (DST). DST is a volunteer work experience model in which unhoused Team Members beautify their community in exchange for supportive services such as employment services and a basic needs stipend. Through their work, team members build effective work habits, take on leadership opportunities, further their education, and ready

Contract: Downtown Streets Team

CONSENT CALENDAR

June 27, 2023

themselves to reenter the workforce and housing through the support of a positive community. DST has placed over 1,500 individuals into employment (lasting at least 90 days) and almost 1,200 into permanent housing.

DST will focus in the following areas of the city: North Shattuck, Elmwood, Solano, Downtown, Adeline, Telegraph, West Berkeley, and Gilman. DST will provide regular reports on their team members, amount of debris collected, and other key metrics.

This contract supports the Strategic Plan Priorities of advancing our goal to provide state-of-the-art, well-maintained infrastructure, amenities, and facilities and providing housing support services for our most vulnerable community members.

BACKGROUND

Since August 2018, DST has supported the City's Clean City Program by hand sweeping to remove excess leaves, litter, and trash from sidewalks and gutters throughout the City, and strive for clean, safe, beautiful commercial districts. Downtown Streets Team (DST) was selected (Specification No. 18-11185-C) as the lowest responsive and best-qualified bidder to meet the Clean City Program's needs; demonstrating both a thorough comprehension of the scope of services to be delivered and a proven program model by which very low income, unhoused persons, receive employment services, training, and other support to promote self-sufficiency in preparation for reentering the workforce and securing permanent housing.

ENVIRONMENTAL SUSTAINABILITY AND CLIMATE IMPACTS

The Clean City Program supports the City's Zero Waste Program by ensuring litter and debris is properly removed from the City. Also, the Municipal Regional Stormwater Permit (MRP) requires the City to reduce the amount of trash flowing into local waterways and the Bay via the City's storm drainage system. Hand sweeping removes excess leaves, litter, and debris from sidewalks and gutters which prevents these items from getting into the City's storm drainage system.

RATIONALE FOR RECOMMENDATION

Public Works does not have sufficient staff to absorb the hand sweeping, debris, and litter abatement duties performed by DST.

ALTERNATIVE ACTIONS CONSIDERED

RESOLUTION NO. ##,###-N.S.

CONTRACT: DOWNTOWN STREETS TEAM FOR HANDSWEEPING, LEAF AND LITTER REMOVAL, GRAFFITI ABATEMENT, POSTER REMOVAL AND LOW BARRIER VOLUNTEER WORK EXPERIENCE PROGRAM

WHEREAS, Downtown Streets Team is an organization committed to helping low-income and un-housed members in the local community achieve health and self-sufficiency; and

WHEREAS, Downtown Streets Team supports the Public Works Clean City program by providing additional cleaning services in select neighborhoods and around encampment hot spots; and

WHEREAS, Downtown Streets Team is a proven partner of Public Works supporting the Clean City program in areas throughout the City: and

WHEREAS, on May 31, 2022, City Council approved Resolution No. 70, 394-N.S to allow for City staff to enter into sole source negotiations with Downtown Streets Team for new pricing, contract terms, and scope of services in support of the Clean Cities Program for the continuation of hand sweeping, leaf and litter removal, graffiti abatement, and poster removal services for various commercial districts through their low barrier volunteer work experience program; and

WHEREAS, annually, General Fund Measure P funding is available in the amount of \$225,000 and Zero Waste Fund in the amount of \$331,250 is available in the FY 2024 baseline budget.

NOW THEREFORE, BE IT RESOLVED by the Council of the City of Berkeley that the City Manager or her designee is authorized to execute a contract with Downtown Streets Team hand sweeping, graffiti and litter abatement, poster removal, and low barrier volunteer work experience program for a not to exceed amount of \$1,625,500 for the period August 1, 2023 through August 30, 2027.

Office of the City Manager

CONSENT CALENDAR
November 30, 2021

To: Honorable Mayor and Members of the City Council

From: Dee Williams-Ridley, City Manager

Submitted by: Lisa Warhuus, Director, Health, Housing & Community Services

Subject: Contract Award: Community Crisis Response Services

RECOMMENDATION

Adopt three Resolutions authorizing the City Manager or her designee to execute contracts and any amendments or extensions with Alameda County Network of Mental Health Clients (Berkeley Drop-in Center), Options Recovery, and Women's Daytime Drop-in Center for Community Crisis Response Services, in an amount not to exceed \$1,200,000.

FISCAL IMPACTS OF RECOMMENDATION

Funds for these contracts in the amount of \$1,200,000 are available in ERMA GL Code 354-51-501-501-0000-000-451-612240-, drawn entirely from the federal American Rescue Plan Act (ARPA) and State and Local Fiscal Recovery Funds (SLFRF).

CURRENT SITUATION AND ITS EFFECTS

Upon releasing a Request for Proposals for non-police crisis bridge services, the City of Berkeley received proposals from three local organizations, Alameda County Network of Mental Health Clients (Berkeley Drop-in Center), Options Recovery, and Women's Daytime Drop-in Center, each with intent to expand their current service offerings. The review committee, consisting of representatives from the Health, Housing and Community Services Department, the Fire Department, the Mental Health Commission, and the Berkeley Community Safety Coalition, recommended funding all three contracts.

These contracts will provide financial support to: 1) Alameda County Network of Mental Health Clients (Berkeley Drop-in Center) to expand their peer support programming for crisis prevention, crisis intervention and post-crisis support 2) Options Recovery for hiring Substance Use Disorder (SUD) Navigators for culturally competent stage-matched interventions, and 3) Women's Daytime Drop-in Center for enhanced mental health care services to the community including assessment, linkages, workshops, and goal-setting.

For all three contracts, funds will be allocated to ensure adequate data collection and evaluation in accordance with the City's preferred evaluation procedures and reporting

required by ARPA. Staff recommend allocating \$50,000 to hire a consultant to evaluate the service model and inform SCU roll out and future initiatives.

Agency/Use	Recommended Funding Allocation
Alameda County Network of Mental Health Clients (Berkeley Drop-in Center)	\$390,000
Options Recovery	\$640,000
Women's Daytime Drop-in Center	\$120,000
Program evaluator – Future RFP	\$50,000
Total funds	\$1,200,000

BACKGROUND

As part of the Re-Imagining Public Safety process, the City has been engaged in planning for a Specialized Care Unit (SCU) that will ultimately become a 24/7 mobile unit designed to respond to and support people who are experiencing a mental health or substance abuse crisis without direct involvement with the police. The SCU is currently in its design phase, with the intention to roll out by Summer 2022.

While this process and foundational work is taking place, there are immediate needs to strengthen non-police relationships and supports on the ground for individuals on the verge of crisis. Therefore, on June 29, 2021, Berkeley City Council allocated up to \$1,200,000 in the FY 2022 budget from the American Rescue Plan in support of services (Community Crisis Response [CCR]), which will provide such supports until the SCU can be implemented. The intention is to put these services in place as soon as possible, while following all federal and City procurement requirements.

Preliminary findings from the SCU planning process suggest that non-violent and non-threatening situations would be much better served through a multidisciplinary, relationship-based response within the caring (rather than enforcement) professions, and should include services such as:

- Crisis counseling/emotional support
- Peer support (i.e. from someone with lived experience)
- First aid and non-emergency medical care
- Substance abuse
- Resource connection and warm handoffs
- Transportation to what is needed
- Crisis respite

The City solicited proposals from community-based organizations and community groups with expertise and the ability to quickly provide the supportive services listed

above that can deepen existing coordinated outreach and respond to individuals on the verge of crisis while the SCU model is being designed and implemented.

ENVIRONMENTAL SUSTAINABILITY AND CLIMATE IMPACTS

There are no identifiable environmental effects, climate impacts or sustainability opportunities associated with the subject of this report.

RATIONALE FOR RECOMMENDATION

The three agencies referenced in this report were selected through a competitive RFP process, and the evaluation panel for the RFP included both City Staff and community stakeholders. Each agency proposed services that will enhance the City's current capacity for responding to people in crisis. Given their significant experience in providing supportive services and implementing complex projects, these agencies are uniquely qualified to perform the services required.

ALTERNATIVE ACTIONS CONSIDERED

These deliverables could be solicited through a new Request for Proposals process.

RESOLUTION NO. ##,###-N.S.

CONTRACT: ALAMEDA COUNTY NETWORK OF MENTAL HEALTH CLIENTS
(BERKELEY DROP-IN CENTER) FOR COMMUNITY CRISIS RESPONSE BRIDGE
SERVICES

WHEREAS, on July 14, 2020, the City Council of the City Berkeley passed a package of items providing direction for the development of a new paradigm of public safety in Berkeley that included direction to the City Manager to analyze and develop a pilot program to re-assign non-criminal police service calls to a Specialized Care Unit (SCU); and

WHEREAS, City of Berkeley community members would prefer a 24/7 mental health crisis response system that does not so heavily involve law enforcement; and

WHEREAS, on December 1, 2020 by Resolution No. 69,621-N.S. City Council approved Contract No. 32100082 with Resource Development Associates (RDA) for SCU design; and RDA conducted a comprehensive feasibility study, program design and implementation plan for an SCU to respond to public safety calls that do not require presence of law enforcement; and

WHEREAS, the SCU is currently in its design phase, with the intention to roll out by Summer 2022; and

WHEREAS, the Community Crisis Response services included in this contract will provide necessary supports and enhancement to the mental health system until the SCU can be implemented; and

WHEREAS, services included in this contract aligns with the Strategic Plan goal to champion and demonstrate social and racial equity; and

WHEREAS, Alameda County Network of Mental Health Clients (Berkeley Drop-in Center), was selected through a competitive Request for Proposals process; and

WHEREAS, the City received federal American Rescue Plan Act (ARPA) and State and Local Fiscal Recovery Funds (SLFRF) which can be used to improve the behavioral health system's capacity to serve underserved populations.

NOW THEREFORE, BE IT RESOLVED by the Council of the City of Berkeley that the City Manager or her designee is hereby authorized to execute a contract and any amendments with Alameda County Network of Mental Health Clients (Berkeley Drop-in Center) for Community Crisis Response Bridge services in an amount not to exceed \$390,000. A signed copy of said agreement will be kept on file in the Office of the City Clerk.

EXHIBIT A

SCOPE OF SERVICES

Agency Name: Alameda County Network of Mental Health Clients (Berkeley Drop-in Center)

Contract Period: January 1, 2022 – December 31, 2022

Program Title: Community Crisis Response Bridge Services

Alameda County Network of Mental Health Clients (Berkeley Drop-in Center) (hereafter “Contractor”), will provide the following services, enumerated below, necessary for the implementation of the Community Crisis Response Bridge Services (hereafter “the Program”) for individuals on the verge of or experiencing a mental health crisis. This contract is for the period commencing January 1, 2022 through December 31, 2022, which may be extended by agreement of the City of Berkeley and Contractor.

A. American Rescue Plan Act (ARPA) Funding Requirements

This program qualifies for implementation of American Rescue Plan Act (ARPA) funds because of its response to pre-existing disparities to address mental health and substance use issues that have been exacerbated by the COVID-19 pandemic. Specifically, this program will provide drop-in services for Berkeley community members through expanded access to evidence-based services for individuals experiencing or on the verge of experiencing a mental health crisis. The use of ARPA funds to implement this program will support equitable access to reduce disparities in access to high-quality treatment for Berkeley community members.

1. Funds provided through this contract are a subaward from the City of Berkeley of federal American Recovery Plan Act (ARPA) Coronavirus Local Fiscal Recovery Funds which together with the State Fiscal Recovery Fund make up the Coronavirus State and Local Fiscal Recovery Funds (“SLFRF”) program, Assistance Listing Number (ALN) 21.207.
2. Funds are being awarded by the City for the City’s Community Crisis Response Project which is an eligible SLFRF activity under the Behavioral Health Expenditure category 1.12 Mental Health Services. Programs will primarily serve disproportionately impacted communities through outreach conducted in South Berkeley, including large homeless encampments. Reporting requirements listed below will support this ARPA requirement. Services provided under this contract will provide evidence-based interventions, specifically Motivational Interviewing. The goal of these services is to empower people to change by drawing out their own meaning, importance and capacity for change.

3. ARPA funds will also support the use of the evidence-based practice of a Wellness Recovery Action Plan (WRAP) curriculum which allows participants to create a personal wellness toolbox, daily wellness maintenance plan, a list of triggers and a triggers action plan, list of early warning signs as well as an action plan, a crisis plan, and a post crisis plan. Additional information about the WRAP curriculum and cited studies can be found here: https://mfpc.samhsa.gov/ENewsArticles/Article03b_2018.aspx
4. Participants who engage in the Contractor’s WRAP curriculum will receive transportation stipends to support costs of getting to and from the Berkeley Drop-In Center location at 3234 Adeline Street for tailored post-crisis group sessions. This is an applicable use of funds per ARPA SLFRF requirements in the Final Rule explicitly through “services that respond to the impacts of the public health emergency may include services across the continuum of care...outreach to individuals not yet engaged in treatment, harm reduction, and supports for long-term recovery (e.g. peer support or recovery coaching, housing, transportation, employment services).” In addition, ARPA SLFRF Final Rule lists that “recipients may use funds for programs or services to support equitable access to services and reduce racial, ethnic, or socioeconomic disparities in access to high-quality treatment.” Additional guidance from the ARPA Final Rule can be found here: <https://home.treasury.gov/system/files/136/SLFRF-Final-Rule.pdf>
5. All activities performed associated with this contract are subject to the applicable federal ARPA SLFRF requirements, including but not limited to the Interim Final Rule, the Compliance and Reporting Guidelines, and the Frequently Asked Questions (FAQ), as updated from time to time. The U.S. Department of the Treasury has made all of these materials available online at: <https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/state-and-local-fiscal-recovery-funds>
6. As an example, the SLFRF guidance makes this subaward subject to 2 CFR Part 200: Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards: <https://www.ecfr.gov/current/title-2/subtitle-A/chapter-II/part-200?toc=1>, which requires, among other things:
 - a. Use of competitive processes for purchasing, including written procedures for doing so;
 - b. Retention of records for 5 years after contract completion; and
 - c. A single audit if federal funds received by the agency exceed \$750,000 in the agency’s fiscal year.
7. All invoices and reporting under this contract are due to the City at the earlier of 90 days after operations cease or December 31, 2022.
8. The (Vendor) must report on a monthly basis, by the 15th of the following month, or the following:

Expenditures:

- Current period obligation
- Cumulative obligation
- Current period expenditure

- Cumulative expenditure

Project Status:

- Not Started
- Completed less than 50 percent
- Completed 50 percent or more
- Completed

B. Program-Specific Requirements: Community Crisis Response Bridge Services

1. Target Population

Individuals residing in Berkeley or Albany, who are experiencing mental health-related issues and are on the verge or are experiencing a mental health crisis.

2. Goals

Expand upon existing community-based service offerings to provide non-police crisis support and therefore more comprehensive and effective engagement in every stage of the crisis continuum.

3. Services

Contractor will offer bridge services while the City's Specialized Care Unit (SCU) is being implemented, with the possibility of continued growth and collaboration, after the SCU has been successfully implemented, to ensure the continued presence of Peer support in crisis support structures.

Contractor will implement support for individuals experiencing a mental health crisis at every stage of the crisis continuum, including crisis prevention, crisis intervention, and post-crisis support. Post-crisis support includes a 6-month program for individuals experiencing mental health or SUD crises which includes supporting individuals through the following:

- **Crisis counseling/emotional support:** Crisis Prevention and Post Crisis support groups will be offered and follow a tailored WRAP curriculum. Support groups will also include SUD and harm reduction services using evidence-based practices. Participants will receive transportation stipends for each session to encourage participation.
- **Peer support:** Two Peer Support Specialists (PSS) will be available for drop-in Peer counseling and support during regular business hours (9:00 am - 4:00 pm)
- **Substance abuse:** A Substance Use Disorder Peer Specialist will be available at the Contractor's location 20 hours per week and utilized evidence-based practices in their work.

- **Basic outreach and relationship-building:** PSS will conduct outreach within a 5-block (i.e. walkable) radius of Contractor's physical office to identify individuals on the verge of crisis and in crisis, and to provide necessary support.
- **Resource connection and warm handoffs:** Two Resource Specialists (including one housing specialist), One SUD Specialists, and Six Peer Support Specialists, all of which have unique navigation expertise will be able to facilitate navigation training, resource connection, and support at every stage to ensure warm handoffs and a seamless continuum of care.
- **Crisis (Peer) Respite:** Two sleep cots, one shower, and one designated Peer-respite room with crisis supportive materials will be made available during regular business hours for individuals who are actively in crisis. In an effort to divert individuals away from hospitalization and incarceration, PSS Specialists will be available to support individuals actively in crisis to move through a full range of emotions safely and efficiently.

4. **Methods for Identifying and Referring Participants in need of Crisis Support or other Community Resources**

Contractor will develop and maintain relationships with other community agencies providing crisis bridge services so individuals can be directed and assisted to engage in programs and supports that will meet their individual needs. Contractor will monitor participants' needs and will make referrals to appropriate community resources as needed.

5. **Program Outreach and Engagement Methods**

Contractor will provide culturally responsive outreach and engagement methods that include sensitivity to, and inclusion of, issues regarding an including gender identity, race, age, ethnicity, and sexual orientation. Engagement methods will create trusting relationships with individuals which enable a clear assessment of each individual's current level of functioning. Outreach and engagement methods will prioritize underserved populations.

Contractor will utilize the evidence-based practice of motivational interviewing (MI) when working with individuals. Motivational interviewing is an evidence-based counseling approach that health care providers can use to help patients adhere to treatment recommendations. It emphasizes using a directive, patient-centered style of interaction to promote behavioral change by helping patients explore and resolve ambivalence. It is designed to strengthen personal motivation for and commitment to a specific goal by eliciting and exploring the person's own reasons for change within an atmosphere of acceptance and compassion. <https://pubmed.ncbi.nlm.nih.gov/17895731/>

MI is a guiding style of communication, that sits between following (good listening) and directing (giving information and advice). MI is designed to empower people to change by drawing out their own meaning, importance and capacity for change. MI is based on a respectful and curious way of being with people that facilitates the natural process of change and honors client autonomy.

6. Documentation, Service Outcomes, & Reporting

The Health, Housing & Community Services (HHCS) Department at the City of Berkeley is committed to finding ways to deepen our positive impact on the community, especially for those most vulnerable. To support this effort, HHCS will use a framework called Results Based Accountability (RBA) that has a proven track record of success in improving the quality of life for people and communities. RBA will provide us with a common language and method to better understand, communicate, and ultimately strengthen our programs.

HHCS is incorporating Results Based Accountability into our contact processes including requests for proposals, reporting, contract monitoring activities and evaluations. All new or renewed contracts will provide information and data that address the three basic RBA questions: How much work was done? How well was it done? And, are clients better off as a result of the services provided? Providers can expect to be asked how they measure whether clients are better off and the quality of the delivered services. HHCS will work with providers to identify appropriate performance measures including service measures and outcomes. Processes will be developed to monitor and improve performance over time. Contractor agrees to participate and develop RBA outcomes in the three RBA areas (how much, how well, and is anyone better off) within this contract period.

The Contractor agrees to comply with all data requests and utilize any forms the City may provide to report on program data.

The City of Berkeley will conduct at least one annual Quality Assurance Site Visit.

Contractor will comply with all relevant provisions of the Health Insurance Portability and Accountability Act (“HIPAA”) and all other applicable federal, state, and local privacy laws and regulations.

In accordance with RBA, the Contractor will be expected to maintain and provide monthly documentation on the following:

- **How many services were provided, and to who? (Outputs)**
 - Number of individuals who received each type of service including, but not limited to
 - # of instances where peer crisis respite was provided
 - total # of unduplicated individuals who received peer crisis respite
 - # of days where outreach within 5 block radius was conducted
 - # of individuals who are referred to other support services
 - # of unduplicated individuals who participated in the 6-month post-crisis program
 - Individuals should also be broken down into those who participated for 1, 2, 3, 4, or 5 months to track attrition
 - # of transportation stipends provided to participants

- Demographics on each individual who received services, including gender identity, race, age, ethnicity, and sexual orientation
- **How well were services administered in alignment with service model?**
 - % of peer staff who report that they felt well prepared to support individuals in crisis (Survey of peer staff at 3, 6, 9 and 12 months)
 - % of individuals who received peer respite services who said they were appropriately served. Responses will be gathered through a post-crisis survey and include questions such as:
 - Were your needs met/heard today? Did you feel supported today? / Did you have / Do you have needs that were unmet? If so, was a referral given?
- **Is anyone better off due to services? (Outcomes)**
 - % of individuals who received peer crisis support and felt comfortable or prepared to return to community post support without higher level of care

In addition to the RBA methodology, explicit reporting must be conducted to track all transportation stipends provided to post-crisis session participants. In order for the City of Berkeley to pay invoices for transportation stipends provided, the Contractor must provide the following:

- Written policy stating eligibility criteria to receive a transportation stipend and specific amounts of each transportation stipend provided per eligibility requirements
 - Policy must follow the Contractor’s procedures for cash handling and be submitted to the City of Berkeley for approval prior to payment for the first invoice.
 - Policy must list the type of transportation stipend provided (i.e. voucher, gift card) and provide additional information around purchasing and use.
- For each transportation stipend provided, Contractor will maintain a log with the following information available to the City upon request:
 - Who received each transportation stipend and date the participant received the transportation stipend
 - Amount of each transportation stipend

TOTAL EXPENSE		\$390,000

EXHIBIT B

PAYMENT

Payment:

Payments will be made by the Finance Accounting Division in arrears within 30 days after receipt and acceptance of proper, itemized, and correct invoices.

The contractor is responsible for submitting monthly invoices and required data reporting elements.

Additionally, the City reserves the right to require the Contractor to submit monthly statements of expense with backup documentation.

Total Not-to-Exceed Amount:

Fees will not exceed \$390,000 for all services under Exhibit A.

Submit Invoices to:

**FOR PROPOSALS (RFP)
Specification No. 22-11472-C
FOR
COMMUNITY CRISIS RESPONSE
PROPOSALS WILL NOT BE OPENED AND READ PUBLICLY**

Dear Proposer:

The City of Berkeley is soliciting written proposals from qualified firms or individuals for Community Crisis Response Services. As a Request for Proposal (RFP) this is not an invitation to bid and although price is very important, other factors will be taken into consideration.

The project scope, content of proposal, and vendor selection process are summarized in the RFP (attached).

Proposals must be received no later than 2:00 pm, on [REDACTED], 2021. Proposals are to be sent via email with the “Community Crisis Response” and **Specification No. 22-11472-C** clearly indicated in the subject line of the email. Please submit one (1) PDF of the technical proposal. Corresponding pricing proposal shall be submitted as a separate document.

Email Proposals to:

City of Berkeley
Finance Department/General Services Division
purchasing@cityofberkeley.info

Proposals will not be accepted after the date and time stated above. Incomplete proposal or proposals that do not conform to the requirements specified herein will not be considered. Issuance of the RFP does not obligate the City to award a contract, nor is the City liable for any costs incurred by the proposer in the preparation and submittal of proposals for the subject work. The City retains the right to award all or parts of this contract to several bidders, to not select any bidders, and/or to re-solicit proposals. The act of submitting a proposal is a declaration that the proposer has read the RFP and understands all the requirements and conditions.

For questions concerning the anticipated work, or scope of the project, please **contact [REDACTED]** via email at [\[REDACTED\]](mailto:[REDACTED]) no later than **[REDACTED]**. Answers to questions will **not** be provided by telephone or email. Answers to all questions or any addenda will be **posted** on the City of Berkeley’s site at <http://www.cityofberkeley.info/ContentDisplay.aspx?id=7128>. It is the vendor’s responsibility to check this site. For general questions concerning the submittal process, contact purchasing at 510-981-7320.

We look forward to receiving and reviewing your proposal.

Sincerely,

Darryl Sweet
General Services Manager

I. BACKGROUND

As part of the Re-Imagining Public Safety process,¹ the City of Berkeley (the “City”) has been engaged in planning for a Specialized Care Unit (SCU) that will ultimately become a 24/7 mobile unit designed to respond to and support people who are experiencing a mental health or substance abuse crisis without direct involvement with the police. The SCU will be different than the City’s current mobile crisis response that is a police/mental health partnership. The SCU is currently in the design phase, with the intention to initiate roll out by Summer 2022.

While people who have experienced and/or witnessed a mental health or substance abuse crisis have varying experiences when police have been involved (ranging from very negative to very positive), there is deep frustration in the community that the police, far too often, are the primary responders; even in situations that are non-violent or non-threatening. Preliminary findings from the SCU planning process suggest that these types of situations would be much better served through a multidisciplinary, relationship-based response within the caring (rather than enforcement) professions, and should include services such as:

- Crisis counseling/emotional support
- Peer support (i.e. from someone with lived experience)
- First aid and non-emergency medical care
- Substance abuse
- Resource connection and warm handoffs
- Transportation to what is needed
- Crisis respite

A steering committee consisting of representatives from the Health, Housing and Community Services Department, Fire, the Mental Health Commission, and the Berkeley Community Safety Coalition is leading this process. Based on community input early on, and with the support of Resource Development Associates (RDA, a consultant), the steering committee has supported a deep community engagement and input process that utilized interviews, focus groups, forums, and written feedback, and prioritized diverse groups and individuals that have lived experience with crisis response (as clients and/or as responders), in order to inform the best SCU model for Berkeley. This process is complete and RDA is finalizing release of three (3) reports by the beginning of October:

- Alternate Crisis Response Models & Best Practices Research (in which 40 non-police crisis response models across the country have been studied and compared)
- Current State & Community Outreach Findings
- SCU Model Recommendations for Berkeley

These findings will be the foundation for finalizing the design, creating the infrastructure, and implementing the SCU.

While this process and foundational work is taking place, there are immediate needs to strengthen non-police relationships and supports on the ground for individuals on the verge of crisis. Therefore, on 6/29/2021, Berkeley City Council allocated up to 1.2 million dollars in the FY 2022 budget from the American Rescue Plan in support of services (Community Crisis Response (CCR)) that will provide such supports until the SCU can be implemented. The intention is to put these services in place as soon as possible, while following all federal and City procurement requirements.

¹ <https://www.cityofberkeley.info/RIPST.aspx>

The purpose of this RFP is to solicit proposals from community-based organizations and community groups that currently have the expertise and ability to quickly provide supportive services teams that can deepen existing coordinated outreach and respond to individuals on the verge of crisis while the SCU model is being designed and implemented. It is likely that multiple contracts will be awarded.

Through this RFP the City intends to award federal American Rescue Plan Act (ARPA) State and Local Fiscal Recovery Funds (SLFRF). The selected applicant(s) will be required to comply with all applicable requirements for such funds and will be required to report to the City regularly on the use of funds and services beneficiaries.

II. SCOPE OF SERVICES

The City welcomes applications that address the need for outreach and crisis services consistent with the following criteria:

1. Applicants can provide one (1) or multiple services from the following list:
 - Crisis counseling/emotional support
 - Peer support (i.e. from someone with lived experience)
 - First aid and non-emergency medical care
 - Substance abuse
 - Resource connection and warm handoffs
 - Transportation to what is needed
 - Crisis respite
2. Applicants may propose other activities that are consistent with the purpose of the CCU.
3. Contracted providers must have experience as a service provider in Berkeley to build upon existing relationships with vulnerable populations in our community.
4. Contracted providers must be able to demonstrate experience conducting services for which they are proposing to provide.
5. Services should be able to be mobilized quickly once the contract is awarded, currently planned for no later than January 2022 and for up to one (1) year to allow for the final development and initial implementation of the SCU.
6. Services must be provided in Berkeley and the preference is for proposals that provide services beyond traditional M-F 9-5 hours.
7. Team members will be made up of people with a combination of lived experience, mental health and/or substance use training, and non-emergency medical training who have the skills and capacity to develop meaningful relationships with vulnerable community members.
8. Contracted providers will be required to work in partnership with the City and other funded agencies to ensure consistent and comprehensive availability of services and to avoid duplication and confusion.

9. The City intends to award federal American Rescue Plan Act (ARPA) State and Local Fiscal Recovery Funds (SLFRF) for these services. The selected vendor(s) must comply with all applicable federal requirements associated with the funds, including the Interim Final Rule, the forthcoming Final Rule and the Uniform Guidance 2 CFR 200. This will include at a minimum quarterly reports to the City on services provided, expenditures and service beneficiaries.

III. **SUBMISSION REQUIREMENTS**

All proposals shall include the following information, organized as separate sections of the proposal. The proposal should be concise and to the point.

1. **Contractor Identification:**

Provide the name of the firm, the firm's principal place of business, the name, email and telephone number of the contact person and company tax identification number.

2. **Client References:**

Provide a minimum of two (2) client references. References should be California cities or other large public sector entities. Provide the designated person's name, title, organization, address, telephone number, and the project(s) that were completed under that client's direction.

3. **Contractor Qualifications.**

Please describe the organization's or group's qualifications and experience relevant to providing the proposed services, including

- Experience providing services to vulnerable populations in Berkeley.
- Experience conducting outreach and field services.
- Any prior experience managing federal funds.

Since the City is seeking to build on existing outreach and crisis response services, please specify which services this proposal will expand on.

4. **Service Proposal.**

Please describe in detail the scope of services proposed to be provided, including the type of services, the hours of availability, and the team proposed to provide such services. Please describe the proposed timeline for program implementation from date of receiving approval for funding. Make sure to review the scope carefully for consistency with the criteria outlined above.

Please include a budget narrative explanation for operating costs in the Program Expense, Rent, Transportation, Equipment and Indirect Cost categories.

5. Price Proposal:

The proposal shall include pricing for all services. Pricing shall be all inclusive unless indicated otherwise. The price proposal will be submitted on the Excel spreadsheet template included as **Attachment J**, which includes required tabs for both the proposed budget and the organizational budget. Note on maintenance cost: If equipment is being purchased in this RFP, and future maintenance of the equipment can only be provided by the equipment supplier, the maintenance cost for three (3) years beyond the initial warranty period must be requested in the RFP pricing section. The maintenance cost must be included and evaluated as part of the pricing evaluation.

6. Contract Terminations:

If your organization has had a contract terminated in the last five (5) years, describe such incident. Termination for default is defined as notice to stop performance due to the vendor's non-performance or poor performance and the issue of performance was either (a) not litigated due to inaction on the part of the vendor, or (b) litigated and such litigation determined that the vendor was in default.

Submit full details of the terms for default including the other party's name, address, and phone number. Present the vendor's position on the matter. The City will evaluate the facts and may, at its sole discretion, reject the proposal on the grounds of the past experience.

If the firm has not experienced any such termination for default or early termination in the past five (5) years, so indicate.

IV. SELECTION CRITERIA

The following criteria will be considered, although not exclusively, in determining which firm is hired.

1. **References** (10 points)
2. **Consistency of Costs and Proposed Services** (25 points)
3. **Provider Qualifications** (25 points)
(Experience and existing services alignment with current needs)
4. **Proposed Services** (30 points)
(Consistency with needs identified, potential to achieve goals for CCR, availability to provide services outside of traditional M-F 9-5 hours)
5. **Timeliness** (10 points)
(Realistic plan to begin to provide services quickly after awarding of funds.)

A selection panel will be convened of City staff and members of the SCU steering committee to review proposals and recommend funding to the City Council.

V. PAYMENT

Invoices: Invoices must be fully itemized, and provide sufficient information for approving payment and audit. Invoices must be accompanied by receipt for services in order for payment to be processed. **Email invoices to Accounts Payable** and reference the Project Manager and contract number on the invoice.

City of Berkeley
Accounts Payable
PO Box 700
Berkeley, CA 94701
Email: AccountsPayable@cityofberkeley.info
Attn: Amy Davidson

Payments: The City will make payment to the vendor within 30 days of receipt of a correct, approved and complete invoice.

VI. CITY REQUIREMENTS

A. Non-Discrimination Requirements:

Ordinance No. 5876-N.S. codified in B.M.C. Chapter 13.26 states that, for contracts worth more than \$3,000 bids for supplies or bids or proposals for services shall include a completed Workforce Composition Form. Businesses with fewer than five employees are exempt from submitting this form. (See B.M.C. 13.26.030)

Under B.M.C. section 13.26.060, the City may require any bidder or vendor it believes may have discriminated to submit a Non-Discrimination Program. The Contract Compliance Officer will make this determination. This applies to all contracts and all consultants (contractors). Berkeley Municipal Code section 13.26.070 requires that all contracts with the City contain a non-discrimination clause, in which the contractor agrees not to discriminate and allows the City access to records necessary to monitor compliance. This section also applies to all contracts and all consultants. **Bidders must submit the attached Non-Discrimination Disclosure Form with their proposal.**

B. Nuclear Free Berkeley Disclosure Form:

Berkeley Municipal Code section 12.90.070 prohibits the City from granting contracts to companies that knowingly engage in work for nuclear weapons. This contracting prohibition may be waived if the City Council determines that no reasonable alternative exists to doing business with a company that engages in nuclear weapons work. If your company engages in work for nuclear weapons, explain on the Disclosure Form the nature of such work. **Bidders must submit the attached Nuclear Free Disclosure Form with their proposal.**

C. Oppressive States:

The City of Berkeley prohibits granting of contracts to firms that knowingly provide personal services to specified Countries. This contracting prohibition may be waived if the City Council determines that no reasonable alternative exists to doing business with a company that is covered by City Council Resolution No. 59,853-N.S. If your company or any subsidiary is covered, explain on the Disclosure Form the nature of such work. **Bidders must submit the attached Oppressive States Disclosure Form with their proposal.**

D. Sanctuary City Contracting Ordinance:

Chapter 13.105 of the Berkeley Municipal Code prohibits the City from granting and or retaining contracts with any person or entity that provides Data Broker or Extreme Vetting services to the U.S. Immigration and Customs Enforcement Division of the United States Department of Homeland Security ("ICE"). **Bidders must submit the attached Sanctuary City Compliance Statement with their proposal.**

E. Conflict of Interest:

In the sole judgment of the City, any and all proposals are subject to disqualification on the basis of a conflict of interest. The City may not contract with a vendor if the vendor or an employee, officer or director of the proposer's firm, or any immediate family member of the preceding, has served as an elected official, employee, board or commission member of the City who influences the making of the contract or has a direct or indirect interest in the contract.

Furthermore, the City may not contract with any vendor whose income, investment, or real property interest may be affected by the contract. The City, at its sole option, may disqualify any proposal on the basis of such a conflict of interest. **Please identify any person associated with the firm that has a potential conflict of interest.**

F. Berkeley Living Wage Ordinance:

Chapter 13.27 of the Berkeley Municipal Code requires that contractors offer all eligible employees with City mandated minimum compensation during the term of any contract that may be awarded by the City. If the Contractor is not currently subject to the Living Wage Ordinance, cumulative contracts with the City within a one-year period may subject Contractor to the requirements under B.M.C. Chapter 13.27. A certification of compliance with this ordinance will be required upon execution of a contract. The current Living Wage rate can be found here: https://www.cityofberkeley.info/Finance/Home/Vendors_Living_Wage_Ordinance.aspx. The Living Wage rate is adjusted automatically effective June 30th of each year commensurate with the corresponding increase in the Consumer Price Index published in April of each year. If the Living Wage rate is adjusted during the term of your agreement, you must pay the new adjusted rate to all eligible employees, regardless of what the rate was when the contract was executed.

G. Berkeley Equal Benefits Ordinance:

Chapter 13.29 of the Berkeley Municipal Code requires that contractors offer domestic partners the same access to benefits that are available to spouses. A certification of compliance with this ordinance will be required upon execution of a contract.

H. Statement of Economic Interest:

The City's Conflict of Interest Code designates "consultants" as a category of persons who must complete Form 700, Statement of Economic Interest, at the beginning of the contract period and again at the termination of the contract. The selected contractor will be required to complete the Form 700 before work may begin.

VII. OTHER REQUIREMENTS

A. Insurance

The selected contractor will be required to maintain general liability insurance in the minimum amount of \$2,000,000, automobile liability insurance in the minimum amount of \$1,000,000 and a professional liability insurance policy in the amount of \$2,000,000 to cover any claims arising out of the performance of the contract. The general liability and automobile insurance must name the City, its officers, agents, volunteers and employees as additional insureds.

B. Worker's Compensation Insurance

A selected contractor who employs any person shall maintain workers' compensation insurance in accordance with state requirements. Sole proprietors with no employees are not required to carry Worker's Compensation Insurance.

C Business License

Virtually every contractor that does business with the City must obtain a City business license as mandated by B.M.C. Ch. 9.04. The business license requirement applies whether or not the contractor has an office within the City limits. However, a "casual" or "isolated" business transaction (B.M.C. section 9.04.010) does not subject the contractor to the license tax. Warehousing businesses and charitable organizations are the only entities specifically exempted in the code from the license requirement (see B.M.C. sections, 9.04.295 and 9.04.300). Non-profit organizations are granted partial exemptions (see B.M.C. section 9.04.305). Persons who, by reason of physical infirmity, unavoidable misfortune, or unavoidable poverty, may be granted an exemption of one annual free license at the discretion of the Director of Finance. (see B.M.C. sections 9.04.290).

Vendor must apply for a City business license and show proof of application to Purchasing Manager within seven days of being selected as intended contractor.

The Customer Service Division of the Finance Department located at 1947 Center Street, Berkeley, CA 94704, issues business licenses. Contractors should contact this division for questions and/or information on obtaining a City business license, in person, or by calling 510-981-7200.

D Recycled Paper

Any printed reports for the City required during the performance of the work shall be on 100% recycled paper, and shall be *printed on both sides of the page* whenever practical.

E State Prevailing Wage

Certain labor categories under this project may be subject to prevailing wages as identified in the State of California Labor Code commencing in Section 1770 et. seq. These labor categories, when employed for any "work performed during the design and preconstruction phases of construction including, but not limited to, inspection and land surveying work," constitute a "Public Work" within the definition of Section 1720(a)(1) of the California Labor Code requiring payment of prevailing wages.

Wage information is available through the California Division of Industrial Relations web site at: http://www.dir.ca.gov/OPRL/statistics_and_databases.html

CITY OF BERKELEY
Nuclear Free Zone Disclosure Form

I (we) certify that:

1. I am (we are) fully cognizant of any and all contracts held, products made or otherwise handled by this business entity, and of any such that are anticipated to be entered into, produced or handled for the duration of its contract(s) with the City of Berkeley. (To this end, more than one individual may sign this disclosure form, if a description of which type of contracts each individual is cognizant is attached.)
2. I (we) understand that Section 12.90.070 of the Nuclear Free Berkeley Act (Berkeley Municipal Code Ch. 12.90; Ordinance No. 5784-N.S.) prohibits the City of Berkeley from contracting with any person or business that knowingly engages in work for nuclear weapons.
3. I (we) understand the meaning of the following terms as set forth in Berkeley Municipal Code Section 12.90.130:

"Work for nuclear weapons" is any work the purpose of which is the development, testing, production, maintenance or storage of nuclear weapons or the components of nuclear weapons; or any secret or classified research or evaluation of nuclear weapons; or any operation, management or administration of such work.

"Nuclear weapon" is any device, the intended explosion of which results from the energy released by reactions involving atomic nuclei, either fission or fusion or both. This definition of nuclear weapons includes the means of transporting, guiding, propelling or triggering the weapon if and only if such means is destroyed or rendered useless in the normal propelling, triggering, or detonation of the weapon.

"Component of a nuclear weapon" is any device, radioactive or non-radioactive, the primary intended function of which is to contribute to the operation of a nuclear weapon (or be a part of a nuclear weapon).

4. Neither this business entity nor its parent nor any of its subsidiaries engages in work for nuclear weapons or anticipates entering into such work for the duration of its contract(s) with the City of Berkeley.

Based on the foregoing, the undersigned declares under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

CITY OF BERKELEY
Sanctuary City Compliance Statement

The undersigned, an authorized agent of Alameda County Network of Mental Health Clinics (hereafter "Contractor"), has had an opportunity to review the requirements of Berkeley Code Chapter 13.105 (hereafter "Sanctuary City Contracting Ordinance" or "SCCO"). Contractor understands and agrees that the City may choose with whom it will maintain business relations and may refrain from contracting with any person or entity that provides Data Broker or Extreme Vetting services to the U.S. Immigration and Customs Enforcement Division of the United States Department of Homeland Security ("ICE"). Contractor understands the meaning of the following terms used in the SCCO:

- a. "Data Broker" means either of the following:
 - i. The collection of information, including personal information about consumers, from a wide variety of sources for the purposes of reselling such information to their customers, which include both private-sector business and government agencies;
 - ii. The aggregation of data that was collected for another purpose from that for which it is ultimately used.
- b. "Extreme Vetting" means data mining, threat modeling, predictive risk analysis, or other similar services." Extreme Vetting does not include:
 - i. The City's computer-network health and performance tools;
 - ii. Cybersecurity capabilities, technologies and systems used by the City of Berkeley Department of Information Technology to predict, monitor for, prevent, and protect technology infrastructure and systems owned and operated by the City of Berkeley from potential cybersecurity events and cyber-forensic based investigations and prosecutions of illegal computer based activity.

Contractor understands that it is not eligible to receive or retain a City contract if at the time the Contract is executed, or at any time during the term of the Contract, it provides Data Broker or Extreme Vetting services to ICE.

Contractor further understands and agrees that Contractor 's failure to comply with the SCCO shall constitute a material default of the Contract and the City Manager may terminate the Contract and bar Contractor from bidding on future contracts with the City for five (5) years from the effective date of the contract termination.

By executing this Statement, Contractor certifies that it complies with the requirements of the SCCO and that if any time during the term of the Contract it ceases to comply, Contractor will promptly notify the City Manager in writing. Any person or entity who knowingly or willingly supplies false information in violation of the SCCO shall be guilty of a misdemeanor and up to a \$1,000 fine.

Based on the foregoing, the undersigned declares under penalty of perjury under the laws of the State of California that the foregoing is true and correct. Executed this 1 day of February, 2022 at Berkeley, California.

CITY OF BERKELEY
Living Wage Certification for Providers of Services

TO BE COMPLETED BY ALL PERSONS OR ENTITIES ENGAGING IN A CONTRACT FOR PERSONAL SERVICES WITH THE CITY OF BERKELEY.

The Berkeley Municipal Code Chapter 13.27, Berkeley's Living Wage Ordinance (LWO), provides that contractors who engage in a specified amount of business with the City (except where specifically exempted) under contracts which furnish services to or for the City in any twelve (12) month period of time shall comply with all provisions of this Ordinance.

Section I.

1. IF YOU ARE A FOR-PROFIT BUSINESS, PLEASE ANSWER THE FOLLOWING QUESTIONS

a. During the previous twelve (12) months, have you entered into contracts, including the present contract, bid, or proposal, with the City of Berkeley for a cumulative amount of \$25,000.00 or more?

YES ___ NO ___

If no, this contract is NOT subject to the requirements of the LWO, and you may continue to Section II. If yes, please continue to question 1(b).

b. Do you have six (6) or more employees, including part-time and stipend workers?

YES ___ NO ___

If you have answered, "YES" to questions 1(a) and 1(b) this contract IS subject to the LWO. If you responded "NO" to 1(b) this contract IS NOT subject to the LWO. Please continue to Section II.

2. IF YOU ARE A NON-PROFIT BUSINESS, AS DEFINED BY SECTION 501(C) OF THE INTERNAL REVENUE CODE OF 1954, PLEASE ANSWER THE FOLLOWING QUESTIONS.

a. During the previous twelve (12) months, have you entered into contracts, including the present contract, bid or proposal, with the City of Berkeley for a cumulative amount of \$100,000.00 or more?

YES [checked] ___ NO ___

If no, this Contract is NOT subject to the requirements of the LWO, and you may continue to Section II. If yes, please continue to question 2(b).

b. Do you have six (6) or more employees, including part-time and stipend workers?

YES [checked] ___ NO ___

If you have answered, "YES" to questions 2(a) and 2(b) this contract IS subject to the LWO. If you responded "NO" to 2(b) this contract IS NOT subject to the LWO. Please continue to Section II.

Section II

Please read, complete, and sign the following:

THIS CONTRACT IS SUBJECT TO THE LIVING WAGE ORDINANCE.
THIS CONTRACT IS NOT SUBJECT TO THE LIVING WAGE ORDINANCE.

The undersigned, on behalf of himself or herself individually and on behalf of his or her business or organization, hereby certifies that he or she is fully aware of Berkeley's Living Wage Ordinance, and the applicability of the Living Wage Ordinance, and the applicability of the subject contract, as determined herein. The undersigned further agrees to be bound by all of the terms of the Living Wage Ordinance, as mandated in the Berkeley Municipal Code, Chapter 13.27. If, at any time during the term of the contract, the answers to the questions posed herein change so that Contractor would be subject to the LWO, Contractor will promptly notify the City Manager in writing. Contractor further understands and agrees that the failure to comply with the LWO, this certification, or the terms of the Contract as it applies to the LWO, shall constitute a default of the Contract and the City Manager may terminate the contract and bar Contractor from future contracts with the City for five (5) years from the effective date of the Contract termination. If the contractor is a for-profit business and the LWO is applicable to this contract, the contractor must pay a living wage to all employees who spend 25% or more of their compensated time engaged in work directly related to the contract with the City. If the contractor is a non-profit business and the LWO is applicable to this contract, the contractor must pay a living wage to all employees who spend 50% or more of their compensated time engaged in work directly related to the contract with the City.

These statements are made under penalty of perjury under the laws of the state of California.

To be completed by Contractor/Vendor

Form EBO-1 CITY OF BERKELEY

CERTIFICATION OF COMPLIANCE WITH EQUAL BENEFITS ORDINANCE

If you are a contractor, return this form to the originating department/project manager. If you are a vendor (supplier of goods), return this form to the Purchasing Division of the Finance Dept.

SECTION 1. CONTRACTOR/VENDOR INFORMATION

Name: Alameda County Network of Mental Health Clients Vendor No.:
Address: 3238 Adeline St. City: Berkeley State: CA ZIP: 94703
Contact Person: Katrina Killian Telephone: 510. 652.5891
E-mail Address: kkillian@acnetmhe.org Fax No.:

SECTION 2. COMPLIANCE QUESTIONS

- A. The EBO is inapplicable to this contract because the contractor/vendor has no employees.
B. Does your company provide (or make available at the employees' expense) any employee benefits?
C. Does your company provide (or make available at the employees' expense) any benefits to the spouse of an employee?
D. Does your company provide (or make available at the employees' expense) any benefits to the domestic partner of an employee?
E. Are the benefits that are available to the spouse of an employee identical to the benefits that are available to the domestic partner of the employee?

SECTION 3. PROVISIONAL COMPLIANCE

- A. Contractor/vendor is not in compliance with the EBO now but will comply by the following date:
B. If you have taken all reasonable measures to comply with the EBO but are unable to do so, do you agree to provide employees with a cash equivalent?*

SECTION 4. REQUIRED DOCUMENTATION

At time of issuance of purchase order or contract award, you may be required by the City to provide documentation (copy of employee handbook, eligibility statement from your plans, insurance provider statements, etc.) to verify that you do not discriminate in the provision of benefits.

SECTION 5. CERTIFICATION

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that I am authorized to bind this entity contractually. By signing this certification, I further agree to comply with all additional obligations of the Equal Benefits Ordinance that are set forth in the Berkeley Municipal Code and in the terms of the contract or purchase order with the City.

DECLARATION OF COMPLIANCE WITH THE AMERICANS WITH DISABILITIES ACT

The Americans with Disabilities Act (ADA) requires that private organizations serving the public make their goods, services and facilities accessible to people with disabilities. Furthermore, the City of Berkeley requires that all of its Contractors comply with their ADA obligations and verify such compliance by signing this Declaration of Compliance.

The Contractor certifies that it will comply with the Americans with Disabilities Act by:

- A. Adopting policies, practices and procedures that ensure non-discrimination and equal access to Contractor's goods, services and facilities for people with disabilities;
B. Providing goods, services and facilities to individuals with disabilities in an integrated setting, except when separate programs are required to ensure equal access;
C. Making reasonable modifications in programs, activities and services when necessary to ensure equal access to individuals with disabilities, unless fundamental alteration in the nature of the Contractor's program would result;
D. Removing architectural barriers in existing facilities or providing alternative means of delivering goods and services when removal of barriers is cost-prohibitive;
E. Furnishing auxiliary aids to ensure equally effective communication with persons with disabilities; and
F. If contractor provides transportation to the public, by providing equivalent accessible transportation to people with disabilities.
G. Providing the City of Berkeley Grievance Procedure and Policy form(s) to individuals with disabilities who allege they have been discriminated against based on their disability or denied a requested disability accommodation by the Contractor's staff.

The undersigned authorized representative hereby obligates the Contractor to the above stated conditions under penalty of perjury.

**HIRED AND NON-OWNED AUTO EXCESS LIABILITY –
NOT-FOR-PROFIT ORGANIZATIONS**

This endorsement modifies insurance provided under the following:

COMMERCIAL GENERAL LIABILITY COVERAGE PART

SCHEDULE

Insurance is provided only for those coverages for which a specific premium charge is shown in the Schedule below.

Limit Of Insurance Per Occurrence:	\$ 1,000,000
Premium:	
Hired Auto Liability	\$ 224
Non-Owned Auto Liability	\$ 114
Information required to complete this Schedule, if not shown above, will be shown in the Declarations.	

A. Hired Auto Liability

The insurance provided under **SECTION I – COVERAGES, COVERAGE A - BODILY INJURY AND PROPERTY DAMAGE LIABILITY** applies to "bodily injury" or "property damage" arising out of the maintenance or use of a "hired auto" by you or your "employees" in the course of your business as a not-for-profit organization.

B. Non-Owned Auto Liability

The insurance provided under **SECTION I – COVERAGES, COVERAGE A - BODILY INJURY AND PROPERTY DAMAGE LIABILITY** applies to "bodily injury" or "property damage" arising out of the use of a "non-owned auto" by any person in the course of your business as a not-for-profit organization.

C. Exclusions

With respect to the insurance provided by this endorsement, the exclusions under Paragraph 2. **Exclusions of SECTION I – COVERAGES, COVERAGE A - BODILY INJURY AND PROPERTY DAMAGE LIABILITY**, other than exclusions **a., b., d., f. and i.** are deleted and replaced by the following:

a. "Bodily injury" to:

(1) An "employee" of the insured arising out of and in the course of:

- (a) Employment by the insured; or
- (b) Performing duties related to the conduct of the insured's business; or

(2) The spouse, child, parent, brother or sister of that "employee" as a consequence of Paragraph (1) above.

This exclusion applies:

- (1) Whether the insured may be liable as an employer or in any other capacity; and
- (2) To any obligation to share damages with or repay someone else who must pay the damages because of the injury.

This exclusion does not apply to:

- (1) Liability assumed by the insured under an "insured contract"; or
- (2) "Bodily injury" to domestic "employees" not entitled to workers' compensation benefits.

b. "Property damage" to:

- (1) Property owned or being transported by, or rented or loaned to the insured; or
- (2) Property in the care, custody or control of the insured.

COMMERCIAL GENERAL LIABILITY

D. WHO IS AN INSURED

For the purposes of this endorsement only, **SECTION II – WHO IS AN INSURED** is deleted and replaced by the following:

1. Each of the following is an insured under this insurance to the extent set forth below:
 - a. You;
 - b. Any other person using a "hired auto" with your permission;
 - c. For a "non-owned auto":
 - (1) Any partner or "executive officer" of yours; or
 - (2) Any "employee" or "volunteer worker" of yours;
 but only while such "non-owned auto" is being used in your business as a not-for-profit organization; and
 - d. Any other person or organization, but only with respect to their liability because of acts or omissions of an insured under Paragraphs a., b. or c. above.
2. None of the following is an insured:
 - a. Any person engaged in the business of his or her employer with respect to "bodily injury" to any co-"employee" of such person injured in the course of employment, or to the spouse, child, parent, brother or sister of that co-"employee" as a consequence of such "bodily injury", or for any obligation to share damages with or repay someone else who must pay damages because of the injury;
 - b. Any partner or "executive officer" with respect to any "auto" owned by such partner or officer or a member of his or her household;
 - c. Any person while employed in or otherwise engaged in performing duties related to the conduct of an "auto business", other than an "auto business" you operate;
 - d. The owner or lessee (of whom you are a sub-lessee) of a "hired auto" or the owner of a "non-owned auto" or any agent or "employee" of any such owner or lessee; or
 - e. Any person or organization with respect to the conduct of any current or past partnership, joint venture or limited liability company that is not shown as a Named Insured in the Declarations.

E. LIMITS OF INSURANCE

For the purposes of this endorsement only, **SECTION III - LIMITS OF INSURANCE** is deleted and replaced by the following:

1. Regardless of the number of "hired autos", "non-owned autos", insureds, premiums paid, claims made or vehicles involved in the "occurrence", the most we will pay for all damages resulting from any one "occurrence" involving "hired auto" liability or "non-owned auto" liability is the applicable limit shown in the Schedule above.
2. The General Aggregate Limit of Insurance shown in the Declarations does not apply to coverage provided by this endorsement.

F. For the purposes of this endorsement only, Paragraph 4. Other Insurance of SECTION IV – COMMERCIAL GENERAL LIABILITY CONDITIONS is deleted and replaced by the following:

This insurance is excess over any of the other insurance, whether primary, excess, contingent, or on any other basis, that applies to "bodily injury" or "property damage" arising out of the maintenance or use of a "hired auto" or "non-owned auto".

G. DEFINITIONS

For the purposes of this endorsement, **SECTION V – DEFINITIONS** is amended as follows:

1. The following definitions are added:
 - a. "Auto business" means the business or occupation of selling, repairing, servicing, storing or parking "autos".
 - b. "Hired auto" means any "auto" you lease, hire, rent or borrow, but does not include:
 - (1) Any "auto" you lease, hire, rent or borrow from any of your "employees", "volunteer workers", partners or your "executive officers", or members of their households; or
 - (2) Any "auto" you lease, hire or rent under a lease or rental agreement for a period of 180 days or more.
 - c. "Non-owned auto" means any "auto" you do not own, lease, hire, rent or borrow which is used in connection with your business. This includes "autos" owned by your "employees", your partners or your "executive officers", or members of their households, but only while used in connection with your business.

COMMERCIAL GENERAL LIABILITY

2. The following definitions are amended:
 - a. "Coverage territory" means:
 - (1) The United States of America;
 - (2) The territories and possessions of the United States of America;
 - (3) Puerto Rico;
 - (4) Canada; and
 - (5) Anywhere in the world if a covered "auto" of the private passenger type is leased, hired, rented or borrowed without a driver for a period of 30 days or less, provided that the insured's responsibility to pay damages is determined in a "suit" on the merits, in the territory described in Paragraph a. above, or in a settlement we agree to.
 - b. "Insured contract" is amended by the addition of the following exception to Paragraph f.: Paragraph f. does not include that part of any contract or agreement:
 - (1) That pertains to the loan, lease or rental of an "auto" to you or any of your "employees" or "volunteer workers", if the "auto" is loaned, leased or rented with a driver; or
 - (2) That holds a person or organization engaged in the business of transporting property by "auto" for hire harmless for your use of a covered "auto" over a route or territory that person or organization is authorized to serve by public authority.

All other terms and conditions of the policy remain unchanged.

RESOLUTION NO. 70,123-N.S.

CONTRACT: ALAMEDA COUNTY NETWORK OF MENTAL HEALTH CLIENTS (BERKELEY DROP-IN CENTER) FOR COMMUNITY CRISIS RESPONSE BRIDGE SERVICES

WHEREAS, on July 14, 2020, the City Council of the City Berkeley passed a package of items providing direction for the development of a new paradigm of public safety in Berkeley that included direction to the City Manager to analyze and develop a pilot program to re-assign non-criminal police service calls to a Specialized Care Unit (SCU); and

WHEREAS, City of Berkeley community members would prefer a 24/7 mental health crisis response system that does not so heavily involve law enforcement; and

WHEREAS, on December 1, 2020 by Resolution No. 69,621-N.S. City Council approved Contract No. 32100082 with Resource Development Associates (RDA) for SCU design; and RDA conducted a comprehensive feasibility study, program design and implementation plan for an SCU to respond to public safety calls that do not require presence of law enforcement; and

WHEREAS, the SCU is currently in its design phase, with the intention to roll out by Summer 2022; and

WHEREAS, the Community Crisis Response services included in this contract will provide necessary supports and enhancement to the mental health system until the SCU can be implemented; and

WHEREAS, services included in this contract aligns with the Strategic Plan goal to champion and demonstrate social and racial equity; and

WHEREAS, Alameda County Network of Mental Health Clients (Berkeley Drop-in Center), was selected through a competitive Request for Proposals process; and

WHEREAS, the City received federal American Rescue Plan Act (ARPA) and State and Local Fiscal Recovery Funds (SLFRF) which can be used to improve the behavioral health system's capacity to serve underserved populations.

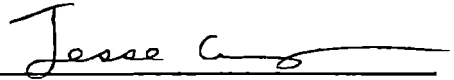

NOW THEREFORE, BE IT RESOLVED by the Council of the City of Berkeley that the City Manager or her designee is hereby authorized to execute a contract and any amendments with Alameda County Network of Mental Health Clients (Berkeley Drop-in Center) for Community Crisis Response Bridge services in an amount not to exceed \$390,000. A signed copy of said agreement will be kept on file in the Office of the City Clerk.

The foregoing Resolution was adopted by the Berkeley City Council on November 30, 2021 by the following vote:

Ayes: Bartlett, Droste, Hahn, Harrison, Kesarwani, Robinson, Taplin, Wengraf, and Arreguin.

Noes: None.

Absent: None.

Jesse Arreguin, Mayor

EXHIBIT A

SCOPE OF SERVICES

Agency Name: Options Recovery
 Contract Period: January 1, 2022 – December 31, 2022
 Program Title: Community Crisis Response Bridge Services

Options Recovery (hereafter “Contractor”), will provide the following services, enumerated below, necessary for the implementation of the Community Crisis Response Bridge Services (hereafter “the Program”) for individuals on the verge of or experiencing a mental health crisis. This contract is for the period commencing January 1, 2022 through December 31, 2022, which may be extended by agreement of the City of Berkeley and Contractor.

A. Implementation of American Rescue Plan Act (ARPA) Funds & Requirements

This program qualifies for implementation of American Rescue Plan Act (ARPA) funds because of its response to pre-existing disparities to address mental health and substance use issues that have been exacerbated by the COVID-19 pandemic. Specifically, this program will provide outreach to individuals not yet engaged in treatment, harm reduction, and long-term recovery support through expanded access to evidence-based services for opioid use disorder prevention, treatment, harm reduction, and recovery. The use of ARPA funds to implement this program will support equitable access to reduce disparities in access to high-quality treatment for Berkeley community members.

1. Funds provided through this contract are a subaward from the City of Berkeley of federal American Recovery Plan Act (ARPA) Coronavirus Local Fiscal Recovery Funds which together with the State Fiscal Recovery Fund make up the Coronavirus State and Local Fiscal Recovery Funds (“SLFRF”) program, Assistance Listing Number (ALN) 21.207.
2. Funds are being awarded by the City for the City’s Community Crisis Response Project which is an eligible SLFRF activity under 1.11 Substance Use Services. Services provided under this contract will provide evidence-based interventions, specifically Motivational Interviewing. The goal of these services is to empower people to change by drawing out their own meaning, importance and capacity for change.
3. All activities performed associated with this contract are subject to the applicable federal ARPA SLFRF requirements, including but not limited to the Interim Final Rule, the Compliance and Reporting Guidelines, and the Frequently Asked Questions (FAQ), as updated from time to time. The U.S. Department of the Treasury has made all of these materials available online at: <https://home.treasury.gov/policy->

issues/coronavirus/assistance-for-state-local-and-tribal-governments/state-and-local-fiscal-recovery-funds

4. As an example, the SLFRF guidance makes this subaward subject to 2 CFR Part 200: Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards: <https://www.ecfr.gov/current/title-2/subtitle-A/chapter-II/part-200?toc=1> which requires, among other things:
 - a. Use of competitive processes for purchasing, including written procedures for doing so;
 - b. Retention of records for 5 years after contract completion; and
 - c. A single audit if federal funds received by the agency exceed \$750,000 in the agency's fiscal year.
5. All invoices and reporting under this contract are due to the City at the earlier of 90 days after operations cease or June 30, 2024.
6. The (Vendor) must report on a monthly basis, by the 15th of the following month, or the following:

Expenditures:

- Current period obligation
- Cumulative obligation
- Current period expenditure
- Cumulative expenditure

Project Status:

- Not Started
- Completed less than 50 percent
- Completed 50 percent or more
- Completed

B. Program-Specific Requirements: Community Crisis Response Bridge Services

1. Target Population

Individuals residing in Berkeley or Albany, who are experiencing mental health-related issues and are on the verge or are experiencing a mental health crisis.

2. Goals

Expand upon existing community-based service offerings to provide non-police crisis support and therefore more comprehensive and effective engagement in every stage of the crisis continuum.

3. Services

Contractor will offer bridge services while the City's Specialized Care Unit (SCU) is being implemented, with the possibility of continued growth and collaboration, after the SCU has been

successfully implemented, to ensure the continued presence of non-police support in crisis support structures.

Contractor will proactively and responsively engage Berkeley's unhoused substance-using community members by providing stage-matched interventions leading to positive outcomes through the following:

- **Community Outreach:** Contractor will hire and exclusively utilize teams of Substance Use Disorder (SUD) Navigators to engage and work directly with Berkeley's unhoused residents in the field, including shelters, housing navigation centers, community parks, and or any geographic area of Berkeley as identified by the City of Berkeley. SUD Navigators will use a welcoming and non-judgmental approach to services provided based on unhoused residents assessed stage of change related to their readiness to change their substance using behavior.
- **Relationship-building & Education:** SUD Navigators will actively build rapport and educate / provide information to unhoused residents and residents in crisis while assessing their immediate SUD and other needs in accordance with evidence-based practices such as contingency management, motivational interviewing and stage-matched interventions.
- **Linkages & Resource Referrals:** In the case a community member needs immediate medical or mental health attention the SUD Navigators will facilitate, coordinate and safely transport the community member to the appropriate service as needed.
- **Extended Hours of Operation:** Contractor will work with City staff to design a communications system and protocol for contacts that meets the needs of the City and stakeholders for a comprehensive crisis response service beyond the M-F 9:00 am-5:00 pm timeframe. In this design, partnerships and collaboration will be prioritized to ensure consistent and comprehensive availability of services and to avoid duplication and confusion. Services will be available from M-F, 8:00 am-10:00pm. Saturday and Sunday will be added to the schedule as needed.

4. Methods for Identifying and Referring Participants in need of Crisis Support or other Community Resources

Contractor will develop and maintain relationships with other community agencies providing crisis bridge services so individuals can be directed and assisted to engage in programs and supports that will meet their individual needs. Contractor will monitor participants' needs and will make referrals to appropriate community resources as needed.

5. Program Outreach and Engagement Methods

Contractor will provide culturally responsive outreach and engagement methods that include sensitivity to, and inclusion of, issues regarding an including gender identity, race, age, ethnicity, and sexual orientation. Engagement methods will create trusting relationships with individuals

which enable a clear assessment of each individual's current level of functioning. Outreach and engagement methods will prioritize underserved populations.

Contractor will utilize the evidence-based practice of motivational interviewing (MI) when working with individuals. Motivational interviewing is an evidenced-based counseling approach that health care providers can use to help patients adhere to treatment recommendations. It emphasizes using a directive, patient-centered style of interaction to promote behavioral change by helping patients explore and resolve ambivalence. It is designed to strengthen personal motivation for and commitment to a specific goal by eliciting and exploring the person's own reasons for change within an atmosphere of acceptance and compassion.

<https://pubmed.ncbi.nlm.nih.gov/17895731/>

MI is a guiding style of communication, that sits between following (good listening) and directing (giving information and advice). MI is designed to empower people to change by drawing out their own meaning, importance and capacity for change. MI is based on a respectful and curious way of being with people that facilitates the natural process of change and honors client autonomy.

6. Documentation, Service Outcomes, & Reporting

The Health, Housing & Community Services (HHCS) Department at the City of Berkeley is committed to finding ways to deepen our positive impact on the community, especially for those most vulnerable. To support this effort, HHCS will use a framework called Results Based Accountability (RBA) that has a proven track record of success in improving the quality of life for people and communities. RBA will provide us with a common language and method to better understand, communicate, and ultimately strengthen our programs.

HHCS is incorporating Results Based Accountability into our contact processes including requests for proposals, reporting, contract monitoring activities and evaluations. All new or renewed contracts will provide information and data that address the three basic RBA questions: How much work was done? How well was it done? And, are clients better off as a result of the services provided? Providers can expect to be asked how they measure whether clients are better off and the quality of the delivered services. HHCS will work with providers to identify appropriate performance measures including service measures and outcomes. Processes will be developed to monitor and improve performance over time. Contractor agrees to participate and develop RBA outcomes in the three RBA areas (how much, how well, and is anyone better off) within this contract period.

The Contractor agrees to comply with all data requests and utilize any forms the City may provide to report on program data.

The City of Berkeley will conduct at least one annual Quality Assurance Site Visit.

Contractor will comply with all relevant provisions of the Health Insurance Portability Accountability Act ("HIPAA") and all other applicable federal, state, and local privacy laws and

regulations.

In accordance with RBA, Contractor will be expected to maintain and provide monthly documentation on the following:

- **How many services were provided, and to who? (Outputs)**
 - # of days where outreach was conducted.
 - # of sites where outreach was conducted, including Berkeley zip code.
 - # of individuals who received each type of intervention
 - # of referrals made by type:
 - SUD
 - MH
 - Physical Health
 - Other
 - # of individuals actually transported to referral destination, or received additional support from ORS to complete the referral.
 - Demographics on each individual who received services, including gender identity, race, age, ethnicity, and sexual orientation
- **How well were services administered in alignment with service model?**
 - # of clients referred to a clinically-appropriate intervention per their corresponding stage of change and potential for follow through
 - # of clients who followed up on the intervention referral
 - SUD Navigators report confident or very confident use of evidence-based support to clients via motivational interviewing with patients (Survey of SUD Navigators at 3, 6, 9 and 12 months)
 - % of time when program was fully staffed
 - Client satisfaction survey or focus group
- **Is anyone better off due to services? (Outcomes)**
 - # of individuals who actually began SUD treatment
 - % of individuals who entered SUD treatment that remained in treatment for at least 10 days

**FOR PROPOSALS (RFP)
Specification No. 22-11472-C
FOR
COMMUNITY CRISIS RESPONSE
PROPOSALS WILL NOT BE OPENED AND READ PUBLICLY**

Dear Proposer:

The City of Berkeley is soliciting written proposals from qualified firms or individuals for Community Crisis Response Services. As a Request for Proposal (RFP) this is not an invitation to bid and although price is very important, other factors will be taken into consideration.

The project scope, content of proposal, and vendor selection process are summarized in the RFP (attached). **Proposals must be received no later than 2:00 pm, on Tuesday October 19, 2021.** Proposals are to be sent via email with the “Community Crisis Response” and **Specification No. 22-11472-C** clearly indicated in the subject line of the email. Please submit one (1) PDF of the technical proposal. Corresponding pricing proposal shall be submitted as a separate document.

Email Proposals to:
City of Berkeley
Finance Department/General Services Division
purchasing@cityofberkeley.info

Proposals will not be accepted after the date and time stated above. Incomplete proposal or proposals that do not conform to the requirements specified herein will not be considered. Issuance of the RFP does not obligate the City to award a contract, nor is the City liable for any costs incurred by the proposer in the preparation and submittal of proposals for the subject work. The City retains the right to award all or parts of this contract to several bidders, to not select any bidders, and/or to re-solicit proposals. The act of submitting a proposal is a declaration that the proposer has read the RFP and understands all the requirements and conditions.

For questions concerning the anticipated work, or scope of the project, please **contact Lisa Warhuus Director, Health, Housing and Community Services**, via email at Lwarhuus@ci.berkeley.ca.us no later than **October 12, 2021**. Answers to questions will **not** be provided by telephone or email. Answers to all questions or any addenda will be **posted** on the City of Berkeley’s site at <http://www.cityofberkeley.info/ContentDisplay.aspx?id=7128>. It is the vendor’s responsibility to check this site. For general questions concerning the submittal process, contact purchasing at 510-981-7320.

We look forward to receiving and reviewing your proposal.

Sincerely,

Darryl Sweet
General Services Manager

I. BACKGROUND

As part of the Re-Imagining Public Safety process,¹ the City of Berkeley (the “City”) has been engaged in planning for a Specialized Care Unit (SCU) that will ultimately become a 24/7 mobile unit designed to respond to and support people who are experiencing a mental health or substance abuse crisis without direct involvement with the police. The SCU will be different than the City’s current mobile crisis response that is a police/mental health partnership. The SCU is currently in the design phase, with the intention to initiate roll out by Summer 2022.

While people who have experienced and/or witnessed a mental health or substance abuse crisis have varying experiences when police have been involved (ranging from very negative to very positive), there is deep frustration in the community that the police, far too often, are the primary responders; even in situations that are non-violent or non-threatening. Preliminary findings from the SCU planning process suggest that these types of situations would be much better served through a multidisciplinary, relationship-based response within the caring (rather than enforcement) professions, and should include services such as:

- Crisis counseling/emotional support
- Peer support (i.e. from someone with lived experience)
- First aid and non-emergency medical care
- Substance abuse
- Resource connection and warm handoffs
- Transportation to what is needed
- Crisis respite

A steering committee consisting of representatives from the Health, Housing and Community Services Department, Fire, the Mental Health Commission, and the Berkeley Community Safety Coalition is leading this process. Based on community input early on, and with the support of Resource Development Associates (RDA, a consultant), the steering committee has supported a deep community engagement and input process that utilized interviews, focus groups, forums, and written feedback, and prioritized diverse groups and individuals that have lived experience with crisis response (as clients and/or as responders), in order to inform the best SCU model for Berkeley. This process is complete and RDA is finalizing release of three (3) reports by the beginning of October:

- Alternate Crisis Response Models & Best Practices Research (in which 40 non-police crisis response models across the country have been studied and compared)
- Current State & Community Outreach Findings
- SCU Model Recommendations for Berkeley

These findings will be the foundation for finalizing the design, creating the infrastructure, and implementing the SCU.

While this process and foundational work is taking place, there are immediate needs to strengthen non-police relationships and supports on the ground for individuals on the verge of crisis. Therefore, on 6/29/2021, Berkeley City Council allocated up to 1.2 million dollars in the FY 2022 budget from the American Rescue Plan in support of services (Community Crisis Response (CCR)) that will provide such supports until the SCU can be implemented. The intention is to put these services in place as soon as possible, while following all federal and City procurement requirements.

¹ <https://www.cityofberkeley.info/RIPST.aspx>

The purpose of this RFP is to solicit proposals from community-based organizations and community groups that currently have the expertise and ability to quickly provide supportive services teams that can deepen existing coordinated outreach and respond to individuals on the verge of crisis while the SCU model is being designed and implemented. It is likely that multiple contracts will be awarded.

Through this RFP the City intends to award federal American Rescue Plan Act (ARPA) State and Local Fiscal Recovery Funds (SLFRF). The selected applicant(s) will be required to comply with all applicable requirements for such funds and will be required to report to the City regularly on the use of funds and services beneficiaries.

II. SCOPE OF SERVICES

The City welcomes applications that address the need for outreach and crisis services consistent with the following criteria:

1. Applicants can provide one (1) or multiple services from the following list:
 - Crisis counseling/emotional support
 - Peer support (i.e. from someone with lived experience)
 - First aid and non-emergency medical care
 - Substance abuse
 - Resource connection and warm handoffs
 - Transportation to what is needed
 - Crisis respite
2. Applicants may propose other activities that are consistent with the purpose of the CCU.
3. Contracted providers must have experience as a service provider in Berkeley to build upon existing relationships with vulnerable populations in our community.
4. Contracted providers must be able to demonstrate experience conducting services for which they are proposing to provide.
5. Services should be able to be mobilized quickly once the contract is awarded, currently planned for no later than January 2022 and for up to one (1) year to allow for the final development and initial implementation of the SCU.
6. Services must be provided in Berkeley and the preference is for proposals that provide services beyond traditional M-F 9-5 hours.
7. Team members will be made up of people with a combination of lived experience, mental health and/or substance use training, and non-emergency medical training who have the skills and capacity to develop meaningful relationships with vulnerable community members.
8. Contracted providers will be required to work in partnership with the City and other funded agencies to ensure consistent and comprehensive availability of services and to avoid duplication and confusion.

9. The City intends to award federal American Rescue Plan Act (ARPA) State and Local Fiscal Recovery Funds (SLFRF) for these services. The selected vendor(s) must comply with all applicable federal requirements associated with the funds, including the Interim Final Rule, the forthcoming Final Rule and the Uniform Guidance 2 CFR 200. This will include at a minimum quarterly reports to the City on services provided, expenditures and service beneficiaries.

III. SUBMISSION REQUIREMENTS

All proposals shall include the following information, organized as separate sections of the proposal. The proposal should be concise and to the point.

1. Contractor Identification:

Provide the name of the firm, the firm's principal place of business, the name, email and telephone number of the contact person and company tax identification number.

2. Client References:

Provide a minimum of two (2) client references. References should be California cities or other large public sector entities. Provide the designated person's name, title, organization, address, telephone number, and the project(s) that were completed under that client's direction.

3. Contractor Qualifications.

Please describe the organization's or group's qualifications and experience relevant to providing the proposed services, including

- Experience providing services to vulnerable populations in Berkeley.
- Experience conducting outreach and field services.
- Any prior experience managing federal funds.

Since the City is seeking to build on existing outreach and crisis response services, please specify which services this proposal will expand on.

4. Service Proposal.

Please describe in detail the scope of services proposed to be provided, including the type of services, the hours of availability, and the team proposed to provide such services. Please describe the proposed timeline for program implementation from date of receiving approval for funding. Make sure to review the scope carefully for consistency with the criteria outlined above.

Please include a budget narrative explanation for operating costs in the Program Expense, Rent, Transportation, Equipment and Indirect Cost categories.

5. Price Proposal:

The proposal shall include pricing for all services. Pricing shall be all inclusive unless indicated otherwise. The price proposal will be submitted on the Excel spreadsheet template included as **Attachment J**, which includes required tabs for both the proposed budget and the organizational budget. Note on maintenance cost: If equipment is being purchased in this RFP, and future maintenance of the equipment can only be provided by the equipment supplier, the maintenance cost for three (3) years beyond the initial warranty period must be requested in the RFP pricing section. The maintenance cost must be included and evaluated as part of the pricing evaluation.

6. Contract Terminations:

If your organization has had a contract terminated in the last five (5) years, describe such incident. Termination for default is defined as notice to stop performance due to the vendor's non-performance or poor performance and the issue of performance was either (a) not litigated due to inaction on the part of the vendor, or (b) litigated and such litigation determined that the vendor was in default.

Submit full details of the terms for default including the other party's name, address, and phone number. Present the vendor's position on the matter. The City will evaluate the facts and may, at its sole discretion, reject the proposal on the grounds of the past experience.

If the firm has not experienced any such termination for default or early termination in the past five (5) years, so indicate.

IV. SELECTION CRITERIA

The following criteria will be considered, although not exclusively, in determining which firm is hired.

1. **References** (10 points)
2. **Consistency of Costs and Proposed Services** (25 points)
3. **Provider Qualifications** (25 points)
(Experience and existing services alignment with current needs)
4. **Proposed Services** (30 points)
(Consistency with needs identified, potential to achieve goals for CCR, availability to provide services outside of traditional M-F 9-5 hours)
5. **Timeliness** (10 points)
(Realistic plan to begin to provide services quickly after awarding of funds.)

A selection panel will be convened of City staff and members of the SCU steering committee to review proposals and recommend funding to the City Council.

V. PAYMENT

Invoices: Invoices must be fully itemized, and provide sufficient information for approving payment and audit. Invoices must be accompanied by receipt for services in order for payment to be processed. **Email invoices to Accounts Payable** and reference the Project Manager and contract number on the invoice.

City of Berkeley
Accounts Payable
PO Box 700
Berkeley, CA 94701
Email: AccountsPayable@cityofberkeley.info
Attn: Amy Davidson

Payments: The City will make payment to the vendor within 30 days of receipt of a correct, approved and complete invoice.

VI. CITY REQUIREMENTS

A. Non-Discrimination Requirements:

Ordinance No. 5876-N.S. codified in B.M.C. Chapter 13.26 states that, for contracts worth more than \$3,000 bids for supplies or bids or proposals for services shall include a completed Workforce Composition Form. Businesses with fewer than five employees are exempt from submitting this form. (See B.M.C. 13.26.030)

Under B.M.C. section 13.26.060, the City may require any bidder or vendor it believes may have discriminated to submit a Non-Discrimination Program. The Contract Compliance Officer will make this determination. This applies to all contracts and all consultants (contractors). Berkeley Municipal Code section 13.26.070 requires that all contracts with the City contain a non-discrimination clause, in which the contractor agrees not to discriminate and allows the City access to records necessary to monitor compliance. This section also applies to all contracts and all consultants. **Bidders must submit the attached Non-Discrimination Disclosure Form with their proposal.**

B. Nuclear Free Berkeley Disclosure Form:

Berkeley Municipal Code section 12.90.070 prohibits the City from granting contracts to companies that knowingly engage in work for nuclear weapons. This contracting prohibition may be waived if the City Council determines that no reasonable alternative exists to doing business with a company that engages in nuclear weapons work. If your company engages in work for nuclear weapons, explain on the Disclosure Form the nature of such work. **Bidders must submit the attached Nuclear Free Disclosure Form with their proposal.**

C. Oppressive States:

The City of Berkeley prohibits granting of contracts to firms that knowingly provide personal services to specified Countries. This contracting prohibition may be waived if the City Council determines that no reasonable alternative exists to doing business with a company that is covered by City Council Resolution No. 59,853-N.S. If your company or any subsidiary is covered, explain on the Disclosure Form the nature of such work. **Bidders must submit the attached Oppressive States Disclosure Form with their proposal.**

D. Sanctuary City Contracting Ordinance:

Chapter 13.105 of the Berkeley Municipal Code prohibits the City from granting and or retaining contracts with any person or entity that provides Data Broker or Extreme Vetting services to the U.S. Immigration and Customs Enforcement Division of the United States Department of Homeland Security ("ICE"). **Bidders must submit the attached Sanctuary City Compliance Statement with their proposal.**

E. Conflict of Interest:

In the sole judgment of the City, any and all proposals are subject to disqualification on the basis of a conflict of interest. The City may not contract with a vendor if the vendor or an employee, officer or director of the proposer's firm, or any immediate family member of the preceding, has served as an elected official, employee, board or commission member of the City who influences the making of the contract or has a direct or indirect interest in the contract.

Furthermore, the City may not contract with any vendor whose income, investment, or real property interest may be affected by the contract. The City, at its sole option, may disqualify any proposal on the basis of such a conflict of interest. **Please identify any person associated with the firm that has a potential conflict of interest.**

F. Berkeley Living Wage Ordinance:

Chapter 13.27 of the Berkeley Municipal Code requires that contractors offer all eligible employees with City mandated minimum compensation during the term of any contract that may be awarded by the City. If the Contractor is not currently subject to the Living Wage Ordinance, cumulative contracts with the City within a one-year period may subject Contractor to the requirements under B.M.C. Chapter 13.27. A certification of compliance with this ordinance will be required upon execution of a contract. The current Living Wage rate can be found here: https://www.cityofberkeley.info/Finance/Home/Vendors_Living_Wage_Ordinance.aspx. The Living Wage rate is adjusted automatically effective June 30th of each year commensurate with the corresponding increase in the Consumer Price Index published in April of each year. If the Living Wage rate is adjusted during the term of your agreement, you must pay the new adjusted rate to all eligible employees, regardless of what the rate was when the contract was executed.

G. Berkeley Equal Benefits Ordinance:

Chapter 13.29 of the Berkeley Municipal Code requires that contractors offer domestic partners the same access to benefits that are available to spouses. A certification of compliance with this ordinance will be required upon execution of a contract.

H. Statement of Economic Interest:

The City's Conflict of Interest Code designates "consultants" as a category of persons who must complete Form 700, Statement of Economic Interest, at the beginning of the contract period and again at the termination of the contract. The selected contractor will be required to complete the Form 700 before work may begin.

VII. OTHER REQUIREMENTS

A. Insurance

The selected contractor will be required to maintain general liability insurance in the minimum amount of \$2,000,000, automobile liability insurance in the minimum amount of \$1,000,000 and a professional liability insurance policy in the amount of \$2,000,000 to cover any claims arising out of the performance of the contract. The general liability and automobile insurance must name the City, its officers, agents, volunteers and employees as additional insureds.

B. Worker's Compensation Insurance

A selected contractor who employs any person shall maintain workers' compensation insurance in accordance with state requirements. Sole proprietors with no employees are not required to carry Worker's Compensation Insurance.

C Business License

Virtually every contractor that does business with the City must obtain a City business license as mandated by B.M.C. Ch. 9.04. The business license requirement applies whether or not the contractor has an office within the City limits. However, a "casual" or "isolated" business transaction (B.M.C. section 9.04.010) does not subject the contractor to the license tax. Warehousing businesses and charitable organizations are the only entities specifically exempted in the code from the license requirement (see B.M.C. sections, 9.04.295 and 9.04.300). Non-profit organizations are granted partial exemptions (see B.M.C. section 9.04.305). Persons who, by reason of physical infirmity, unavoidable misfortune, or unavoidable poverty, may be granted an exemption of one annual free license at the discretion of the Director of Finance. (see B.M.C. sections 9.04.290).

Vendor must apply for a City business license and show proof of application to Purchasing Manager within seven days of being selected as intended contractor.

The Customer Service Division of the Finance Department located at 1947 Center Street, Berkeley, CA 94704, issues business licenses. Contractors should contact this division for questions and/or information on obtaining a City business license, in person, or by calling 510-981-7200.

D Recycled Paper

Any printed reports for the City required during the performance of the work shall be on 100% recycled paper, and shall be *printed on both sides of the page* whenever practical.

E State Prevailing Wage

Certain labor categories under this project may be subject to prevailing wages as identified in the State of California Labor Code commencing in Section 1770 et. seq. These labor categories, when employed for any "work performed during the design and preconstruction phases of construction including, but not limited to, inspection and land surveying work," constitute a "Public Work" within the definition of Section 1720(a)(1) of the California Labor Code requiring payment of prevailing wages.

Wage information is available through the California Division of Industrial Relations web site at:
http://www.dir.ca.gov/OPRL/statistics_and_databases.html

 City of Berkeley Contract Administrator

CITY OF BERKELEY
Nuclear Free Zone Disclosure Form

I (we) certify that:

1. I am (we are) fully cognizant of any and all contracts held, products made or otherwise handled by this business entity, and of any such that are anticipated to be entered into, produced or handled for the duration of its contract(s) with the City of Berkeley. (To this end, more than one individual may sign this disclosure form, if a description of which type of contracts each individual is cognizant is attached.)
2. I (we) understand that Section 12.90.070 of the Nuclear Free Berkeley Act (Berkeley Municipal Code Ch. 12.90; Ordinance No. 5784-N.S.) prohibits the City of Berkeley from contracting with any person or business that knowingly engages in work for nuclear weapons.
3. I (we) understand the meaning of the following terms as set forth in Berkeley Municipal Code Section 12.90.130:

"Work for nuclear weapons" is any work the purpose of which is the development, testing, production, maintenance or storage of nuclear weapons or the components of nuclear weapons; or any secret or classified research or evaluation of nuclear weapons; or any operation, management or administration of such work.

"Nuclear weapon" is any device, the intended explosion of which results from the energy released by reactions involving atomic nuclei, either fission or fusion or both. This definition of nuclear weapons includes the means of transporting, guiding, propelling or triggering the weapon if and only if such means is destroyed or rendered useless in the normal propelling, triggering, or detonation of the weapon.

"Component of a nuclear weapon" is any device, radioactive or non-radioactive, the primary intended function of which is to contribute to the operation of a nuclear weapon (or be a part of a nuclear weapon).

4. Neither this business entity nor its parent nor any of its subsidiaries engages in work for nuclear weapons or anticipates entering into such work for the duration of its contract(s) with the City of Berkeley.

Based on the foregoing, the undersigned declares under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

CITY OF BERKELEY
Sanctuary City Compliance Statement

The undersigned, an authorized agent of OPTIONS RECOVERY SERVICES (hereafter "Contractor"), has had an opportunity to review the requirements of Berkeley Code Chapter 13.105 (hereafter "Sanctuary City Contracting Ordinance" or "SCCO"). Contractor understands and agrees that the City may choose with whom it will maintain business relations and may refrain from contracting with any person or entity that provides Data Broker or Extreme Vetting services to the U.S. Immigration and Customs Enforcement Division of the United States Department of Homeland Security ("ICE"). Contractor understands the meaning of the following terms used in the SCCO:

- a. "Data Broker" means either of the following:
 - i. The collection of information, including personal information about consumers, from a wide variety of sources for the purposes of reselling such information to their customers, which include both private-sector business and government agencies;
 - ii. The aggregation of data that was collected for another purpose from that for which it is ultimately used.
- b. "Extreme Vetting" means data mining, threat modeling, predictive risk analysis, or other similar services." Extreme Vetting does not include:
 - i. The City's computer-network health and performance tools;
 - ii. Cybersecurity capabilities, technologies and systems used by the City of Berkeley Department of Information Technology to predict, monitor for, prevent, and protect technology infrastructure and systems owned and operated by the City of Berkeley from potential cybersecurity events and cyber-forensic based investigations and prosecutions of illegal computer based activity.

Contractor understands that it is not eligible to receive or retain a City contract if at the time the Contract is executed, or at any time during the term of the Contract, it provides Data Broker or Extreme Vetting services to ICE.

Contractor further understands and agrees that Contractor's failure to comply with the SCCO shall constitute a material default of the Contract and the City Manager may terminate the Contract and bar Contractor from bidding on future contracts with the City for five (5) years from the effective date of the contract termination.

By executing this Statement, Contractor certifies that it complies with the requirements of the SCCO and that if any time during the term of the Contract it ceases to comply, Contractor will promptly notify the City Manager in writing. Any person or entity who knowingly or willingly supplies false information in violation of the SCCO shall be guilty of a misdemeanor and up to a \$1,000 fine.

Based on the foregoing, the undersigned declares under penalty of perjury under the laws of the State of California that the foregoing is true and correct. Executed this 25 day of NOV., 2021 at BERKELEY, California.

CITY OF BERKELEY
Living Wage Certification for Providers of Personal Services

TO BE COMPLETED BY ALL PERSONS OR ENTITIES ENGAGING IN A CONTRACT FOR PERSONAL SERVICES WITH THE CITY OF BERKELEY.

The Berkeley Municipal Code Chapter 13.27, Berkeley's Living Wage Ordinance (LWO), provides that contractors who engage in a specified amount of business with the City (except where specifically exempted) under contracts which furnish services to or for the City in any twelve (12) month period of time shall comply with all provisions of this Ordinance.

Section I.

1. IF YOU ARE A FOR-PROFIT BUSINESS, PLEASE ANSWER THE FOLLOWING QUESTIONS

a. During the previous twelve (12) months, have you entered into contracts, including the present contract, bid, or proposal, with the City of Berkeley for a cumulative amount of \$25,000.00 or more?
YES ___ NO ___

If no, this contract is NOT subject to the requirements of the LWO, and you may continue to Section II. If yes, please continue to question 1(b).

b. Do you have six (6) or more employees, including part-time and stipend workers?
YES ___ NO ___

If you have answered, "YES" to questions 1(a) and 1(b) this contract IS subject to the LWO. If you responded "NO" to 1(b) this contract IS NOT subject to the LWO. Please continue to Section II.

2. IF YOU ARE A NON-PROFIT BUSINESS, AS DEFINED BY SECTION 501(C) OF THE INTERNAL REVENUE CODE OF 1954, PLEASE ANSWER THE FOLLOWING QUESTIONS.

a. During the previous twelve (12) months, have you entered into contracts, including the present contract, bid or proposal, with the City of Berkeley for a cumulative amount of \$100,000.00 or more?
YES X NO ___

If no, this Contract is NOT subject to the requirements of the LWO, and you may continue to Section II. If yes, please continue to question 2(b).

b. Do you have six (6) or more employees, including part-time and stipend workers?
YES X NO ___

If you have answered, "YES" to questions 2(a) and 2(b) this contract IS subject to the LWO. If you responded "NO" to 2(b) this contract IS NOT subject to the LWO. Please continue to Section II.

Section II

Please read, complete, and sign the following:

THIS CONTRACT IS SUBJECT TO THE LIVING WAGE ORDINANCE. [X]
THIS CONTRACT IS NOT SUBJECT TO THE LIVING WAGE ORDINANCE. []

The undersigned, on behalf of himself or herself individually and on behalf of his or her business or organization, hereby certifies that he or she is fully aware of Berkeley's Living Wage Ordinance, and the applicability of the Living Wage Ordinance, and the applicability of the subject contract, as determined herein. The undersigned further agrees to be bound by all of the terms of the Living Wage Ordinance, as mandated in the Berkeley Municipal Code, Chapter 13.27. If, at any time during the term of the contract, the answers to the questions posed herein change so that Contractor would be subject to the LWO, Contractor will promptly notify the City Manager in writing. Contractor further understands and agrees that the failure to comply with the LWO, this certification, or the terms of the Contract as it applies to the LWO, shall constitute a default of the Contract and the City Manager may terminate the contract and bar Contractor from future contracts with the City for five (5) years from the effective date of the Contract termination. If the contractor is a for-profit business and the LWO is applicable to this contract, the contractor must pay a living wage to all employees who spend 25% or more of their compensated time engaged in work directly related to the contract with the City. If the contractor is a non-profit business and the LWO is applicable to this contract, the contractor must pay a living wage to all employees who spend 50% or more of their compensated time engaged in work directly related to the contract with the City.

These statements are made under penalty of perjury under the laws of the state of California.

Form EBO-1 CITY OF BERKELEY

CERTIFICATION OF COMPLIANCE WITH EQUAL BENEFITS ORDINANCE

If you are a contractor, return this form to the originating department/project manager. If you are a vendor (supplier of goods), return this form to the Purchasing Division of the Finance Dept.

SECTION 1. CONTRACTOR/VENDOR INFORMATION

Form with fields for Name, Address, City, State, ZIP, Contact Person, Telephone, E-mail Address, and Fax No. Handwritten entries include Justin Phillips / Options Recovery Services, 1835 Allston Way, Berkeley, CA, 94709, Justin Phillips, 510-666-9552, and JPHILLIPS@OPTIONSRECOVERY-ORP.

SECTION 2. COMPLIANCE QUESTIONS

- Questions A through E regarding EBO applicability, employee benefits, and spousal benefits. Includes checkboxes for Yes/No and instructions for proceeding to other sections.

SECTION 3. PROVISIONAL COMPLIANCE

- Questions A and B regarding provisional compliance dates and cash equivalents for spousal benefits.

* The cash equivalent is the amount of money your company pays for spousal benefits that are unavailable for domestic partners.

SECTION 4. REQUIRED DOCUMENTATION

At time of issuance of purchase order or contract award, you may be required by the City to provide documentation (copy of employee handbook, eligibility statement from your plans, insurance provider statements, etc.) to verify that you do not discriminate in the provision of benefits.

SECTION 5. CERTIFICATION

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that I am authorized to bind this entity contractually. By signing this certification, I further agree to comply with all additional obligations of the Equal Benefits Ordinance that are set forth in the Berkeley Municipal Code and in the terms of the contract or purchase order with the City.

DECLARATION OF COMPLIANCE WITH THE AMERICANS WITH DISABILITIES ACT

The Americans with Disabilities Act (ADA) requires that private organizations serving the public make their goods, services and facilities accessible to people with disabilities. Furthermore, the City of Berkeley requires that all of its Contractors comply with their ADA obligations and verify such compliance by signing this Declaration of Compliance.

The Contractor certifies that it will comply with the Americans with Disabilities Act by:

- A. Adopting policies, practices and procedures that ensure non-discrimination and equal access to Contractor's goods, services and facilities for people with disabilities;
B. Providing goods, services and facilities to individuals with disabilities in an integrated setting, except when separate programs are required to ensure equal access;
C. Making reasonable modifications in programs, activities and services when necessary to ensure equal access to individuals with disabilities, unless fundamental alteration in the nature of the Contractor's program would result;
D. Removing architectural barriers in existing facilities or providing alternative means of delivering goods and services when removal of barriers is cost-prohibitive;
E. Furnishing auxiliary aids to ensure equally effective communication with persons with disabilities; and
F. If contractor provides transportation to the public, by providing equivalent accessible transportation to people with disabilities.
G. Providing the City of Berkeley Grievance Procedure and Policy form(s) to individuals with disabilities who allege they have been discriminated against based on their disability or denied a requested disability accommodation by the Contractor's staff.

The undersigned authorized representative hereby obligates the Contractor to the above stated conditions under penalty of perjury.

EXHIBIT A

SCOPE OF SERVICES

Agency Name: Women’s Daytime Drop-in Center

Contract Period: January 1, 2022 – December 31, 2022

Program Title: Community Crisis Response Bridge Services

Women’s Daytime Drop-in Center (hereafter “Contractor”), will provide the following services, enumerated below, necessary for the implementation of the Community Crisis Response Bridge Services (hereafter “the Program”) for individuals on the verge of or experiencing a mental health crisis. This contract is for the period commencing January 1, 2022 through December 31, 2022, which may be extended by agreement of the City of Berkeley and Contractor.

A. American Rescue Plan Act (ARPA) Funding Requirements

This program qualifies for implementation of American Rescue Plan Act (ARPA) funds because of its response to pre-existing disparities to address mental health and substance use issues that have been exacerbated by the COVID-19 pandemic. Specifically, this program will provide drop-in services for women and families through expanded access to evidence-based services for individuals experiencing or on the verge of experiencing a mental health crisis. The use of ARPA funds to implement this program will support equitable access to reduce disparities in access to high-quality treatment for Berkeley community members.

1. Funds provided through this contract are a subaward from the City of Berkeley of federal American Recovery Plan Act (ARPA) Coronavirus Local Fiscal Recovery Funds which together with the State Fiscal Recovery Fund make up the Coronavirus State and Local Fiscal Recovery Funds (“SLFRF”) program, Assistance Listing Number (ALN) 21.207.
2. Funds are being awarded by the City for the City’s Community Crisis Response Project which is an eligible SLFRF activity under 1.10 Mental Health Services. Services provided under this contract will provide evidence-based interventions, specifically Motivational Interviewing. The goal of these services is to empower people to change by drawing out their own meaning, importance and capacity for change.
3. All activities performed associated with this contract are subject to the applicable federal ARPA SLFRF requirements, including but not limited to the Interim Final Rule, the Compliance and Reporting Guidelines, and the Frequently Asked Questions (FAQ), as updated from time to time. The U.S. Department of the Treasury has made all of these

materials available online at: <https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/state-and-local-fiscal-recovery-funds>

4. As an example, the SLFRF guidance makes this subaward subject to 2 CFR Part 200: Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards: <https://www.ecfr.gov/current/title-2/subtitle-A/chapter-II/part-200?toc=1> which requires, among other things:
 - a. Use of competitive processes for purchasing, including written procedures for doing so;
 - b. Retention of records for 5 years after contract completion; and
 - c. A single audit if federal funds received by the agency exceed \$750,000 in the agency's fiscal year.
5. All invoices and reporting under this contract are due to the City and must be processed prior to the contract end date on December 31, 2022.
6. The (Vendor) must report on a monthly basis, by the 15th of the following month, or the following:

Expenditures:

- Current period obligation
- Cumulative obligation
- Current period expenditure
- Cumulative expenditure

Project Status:

- Not Started
- Completed less than 50 percent
- Completed 50 percent or more
- Completed

B. Program-Specific Requirements: Community Crisis Response Bridge Services

1. Target Population

Individuals residing in Berkeley or Albany, who are experiencing mental health-related issues and are on the verge or are experiencing a mental health crisis.

2. Goals

Expand upon existing community-based service offerings to provide non-police crisis support and therefore more comprehensive and effective engagement in every stage of the crisis continuum.

3. Services

Contractor will offer bridge services while the City's Specialized Care Unit (SCU) is being implemented, with the possibility of continued growth and collaboration, after the SCU has been

successfully implemented, to ensure the continued presence of non-police support in crisis support structures.

Contractor will hire new staff with mental health expertise to augment the existing six-person staff onsite that regularly provides services to 30-50 people daily. Contractor will utilize existing infrastructure in the provision of additional mental health services.

- **Drop-in Services:** Contractor will hire a mental health staff member to work 20 hours per week at the minimum to provide drop-in services. If there are opportunities to include additional support from Lifelong Medical or local internship programs, Contractor may be able to extend to 30 hours.
- **Goal-setting:** Clients identified as needing mental health support will receive an assessment by a qualified clinician to create a health action plan supported.
- **Weekly Meetings:** Contractor will meet with clients monthly to chart progress, and weekly whenever possible. Data on effectiveness of this program will be utilized for grant reporting and any likely continuation of the program through other grant sources once the SCU is up and running.
- **Women's Workshops:** Contractor will reconvene monthly women's workshops to bolster the health progress that can be created through acquisition of specialized onsite mental health support staff.

4. Methods for Identifying and Referring Participants in need of Crisis Support or other Community Resources

Contractor will develop and maintain relationships with other community agencies providing crisis bridge services so individuals can be directed and assisted to engage in programs and supports that will meet their individual needs. Contractor will monitor participants' needs and will make referrals to appropriate community resources as needed.

5. Program Outreach and Engagement Methods

Contractor will provide culturally responsive outreach and engagement methods that include sensitivity to, and inclusion of, issues regarding an including gender identity, race, age, ethnicity, and sexual orientation. Engagement methods will create trusting relationships with individuals which enable a clear assessment of each individual's current level of functioning. Outreach and engagement methods will prioritize underserved populations.

Contractor will utilize the evidence-based practice of motivational interviewing (MI) when working with individuals. Motivational interviewing is an evidenced-based counseling approach that health care providers can use to help patients adhere to treatment recommendations. It emphasizes using a directive, patient-centered style of interaction to promote behavioral change by helping patients explore and resolve ambivalence. It is designed to strengthen personal motivation for and commitment to a specific goal by eliciting and exploring the person's own reasons for change within an atmosphere of acceptance and compassion.

<https://pubmed.ncbi.nlm.nih.gov/17895731/>

MI is a guiding style of communication, that sits between following (good listening) and directing (giving information and advice). MI is designed to empower people to change by drawing out their own meaning, importance and capacity for change. MI is based on a respectful and curious way of being with people that facilitates the natural process of change and honors client autonomy.

6. Documentation, Service Outcomes, & Reporting

The Health, Housing & Community Services (HHCS) Department at the City of Berkeley is committed to finding ways to deepen our positive impact on the community, especially for those most vulnerable. To support this effort, HHCS will use a framework called Results Based Accountability (RBA) that has a proven track record of success in improving the quality of life for people and communities. RBA will provide us with a common language and method to better understand, communicate, and ultimately strengthen our programs.

HHCS is incorporating Results Based Accountability into our contact processes including requests for proposals, reporting, contract monitoring activities and evaluations. All new or renewed contracts will provide information and data that address the three basic RBA questions: How much work was done? How well was it done? And, are clients better off as a result of the services provided? Providers can expect to be asked how they measure whether clients are better off and the quality of the delivered services. HHCS will work with providers to identify appropriate performance measures including service measures and outcomes. Processes will be developed to monitor and improve performance over time. Contractor agrees to participate and develop RBA outcomes in the three RBA areas (how much, how well, and is anyone better off) within this contract period.

The Contractor agrees to comply with all data requests and utilize any forms the City may provide to report on program data.

The City of Berkeley will conduct at least one annual Quality Assurance Site Visit.

Contractor will comply with all relevant provisions of the Health Insurance Portability and Accountability Act (“HIPAA”) and all other applicable federal, state, and local privacy laws and regulations.

In accordance with RBA, Contractor will be expected to maintain and provide documentation on the following:

- **How many services were provided, and to who? (Outputs)**
 - Number of individuals who received each type of service, including:
 - # of individuals receiving weekly client meeting for at least 4 weeks
 - # of individuals who attend a monthly women’s workshop
 - # of individuals receiving a clinical assessment from the mental health clinician

- Number of monthly women’s workshops conducted
- Demographics on each individual who received services, including gender identity, race, age, ethnicity, and sexual orientation
- **How well were services administered in alignment with service model?**
 - % of attendees of monthly women’s workshops who report the workshop was helpful or very helpful
 - % of clients who report that weekly client meetings are helpful or very helpful
 - % of time when program is fully staffed
- **Is anyone better off due to services? (Outcomes)**
 - # of clients who receive referrals
 - # of clients who receive incentives for following up on referrals (as applicable)

C. Crisis Services Budget

**FOR PROPOSALS (RFP)
Specification No. 22-11472-C
FOR
COMMUNITY CRISIS RESPONSE
PROPOSALS WILL NOT BE OPENED AND READ PUBLICLY**

Dear Proposer:

The City of Berkeley is soliciting written proposals from qualified firms or individuals for Community Crisis Response Services. As a Request for Proposal (RFP) this is not an invitation to bid and although price is very important, other factors will be taken into consideration.

The project scope, content of proposal, and vendor selection process are summarized in the RFP (attached).

Proposals must be received no later than 2:00 pm, on Tuesday October 19, 2021. Proposals are to be sent via email with the “Community Crisis Response” and **Specification No. 22-11472-C** clearly indicated in the subject line of the email. Please submit one (1) PDF of the technical proposal. Corresponding pricing proposal shall be submitted as a separate document.

Email Proposals to:

City of Berkeley
Finance Department/General Services Division
purchasing@cityofberkeley.info

Proposals will not be accepted after the date and time stated above. Incomplete proposal or proposals that do not conform to the requirements specified herein will not be considered. Issuance of the RFP does not obligate the City to award a contract, nor is the City liable for any costs incurred by the proposer in the preparation and submittal of proposals for the subject work. The City retains the right to award all or parts of this contract to several bidders, to not select any bidders, and/or to re-solicit proposals. The act of submitting a proposal is a declaration that the proposer has read the RFP and understands all the requirements and conditions.

For questions concerning the anticipated work, or scope of the project, please **contact Lisa Warhuus Director, Health, Housing and Community Services**, via email at Lwarhuus@ci.berkeley.ca.us no later than **October 12, 2021**. Answers to questions will **not** be provided by telephone or email. Answers to all questions or any addenda will be **posted** on the City of Berkeley’s site at <http://www.cityofberkeley.info/ContentDisplay.aspx?id=7128>. It is the vendor’s responsibility to check this site. For general questions concerning the submittal process, contact purchasing at 510-981-7320.

We look forward to receiving and reviewing your proposal.

Sincerely,

Darryl Sweet
General Services Manager

I. BACKGROUND

As part of the Re-Imagining Public Safety process,¹ the City of Berkeley (the “City”) has been engaged in planning for a Specialized Care Unit (SCU) that will ultimately become a 24/7 mobile unit designed to respond to and support people who are experiencing a mental health or substance abuse crisis without direct involvement with the police. The SCU will be different than the City’s current mobile crisis response that is a police/mental health partnership. The SCU is currently in the design phase, with the intention to initiate roll out by Summer 2022.

While people who have experienced and/or witnessed a mental health or substance abuse crisis have varying experiences when police have been involved (ranging from very negative to very positive), there is deep frustration in the community that the police, far too often, are the primary responders; even in situations that are non-violent or non-threatening. Preliminary findings from the SCU planning process suggest that these types of situations would be much better served through a multidisciplinary, relationship-based response within the caring (rather than enforcement) professions, and should include services such as:

- Crisis counseling/emotional support
- Peer support (i.e. from someone with lived experience)
- First aid and non-emergency medical care
- Substance abuse
- Resource connection and warm handoffs
- Transportation to what is needed
- Crisis respite

A steering committee consisting of representatives from the Health, Housing and Community Services Department, Fire, the Mental Health Commission, and the Berkeley Community Safety Coalition is leading this process. Based on community input early on, and with the support of Resource Development Associates (RDA, a consultant), the steering committee has supported a deep community engagement and input process that utilized interviews, focus groups, forums, and written feedback, and prioritized diverse groups and individuals that have lived experience with crisis response (as clients and/or as responders), in order to inform the best SCU model for Berkeley. This process is complete and RDA is finalizing release of three (3) reports by the beginning of October:

- Alternate Crisis Response Models & Best Practices Research (in which 40 non-police crisis response models across the country have been studied and compared)
- Current State & Community Outreach Findings
- SCU Model Recommendations for Berkeley

These findings will be the foundation for finalizing the design, creating the infrastructure, and implementing the SCU.

While this process and foundational work is taking place, there are immediate needs to strengthen non-police relationships and supports on the ground for individuals on the verge of crisis. Therefore, on 6/29/2021, Berkeley City Council allocated up to 1.2 million dollars in the FY 2022 budget from the American Rescue Plan in support of services (Community Crisis Response (CCR)) that will provide such supports until the SCU can be implemented. The intention is to put these services in place as soon as possible, while following all federal and City procurement requirements.

¹ <https://www.cityofberkeley.info/RIPST.aspx>

The purpose of this RFP is to solicit proposals from community-based organizations and community groups that currently have the expertise and ability to quickly provide supportive services teams that can deepen existing coordinated outreach and respond to individuals on the verge of crisis while the SCU model is being designed and implemented. It is likely that multiple contracts will be awarded.

Through this RFP the City intends to award federal American Rescue Plan Act (ARPA) State and Local Fiscal Recovery Funds (SLFRF). The selected applicant(s) will be required to comply with all applicable requirements for such funds and will be required to report to the City regularly on the use of funds and services beneficiaries.

II. SCOPE OF SERVICES

The City welcomes applications that address the need for outreach and crisis services consistent with the following criteria:

1. Applicants can provide one (1) or multiple services from the following list:
 - Crisis counseling/emotional support
 - Peer support (i.e. from someone with lived experience)
 - First aid and non-emergency medical care
 - Substance abuse
 - Resource connection and warm handoffs
 - Transportation to what is needed
 - Crisis respite
2. Applicants may propose other activities that are consistent with the purpose of the CCU.
3. Contracted providers must have experience as a service provider in Berkeley to build upon existing relationships with vulnerable populations in our community.
4. Contracted providers must be able to demonstrate experience conducting services for which they are proposing to provide.
5. Services should be able to be mobilized quickly once the contract is awarded, currently planned for no later than January 2022 and for up to one (1) year to allow for the final development and initial implementation of the SCU.
6. Services must be provided in Berkeley and the preference is for proposals that provide services beyond traditional M-F 9-5 hours.
7. Team members will be made up of people with a combination of lived experience, mental health and/or substance use training, and non-emergency medical training who have the skills and capacity to develop meaningful relationships with vulnerable community members.
8. Contracted providers will be required to work in partnership with the City and other funded agencies to ensure consistent and comprehensive availability of services and to avoid duplication and confusion.

9. The City intends to award federal American Rescue Plan Act (ARPA) State and Local Fiscal Recovery Funds (SLFRF) for these services. The selected vendor(s) must comply with all applicable federal requirements associated with the funds, including the Interim Final Rule, the forthcoming Final Rule and the Uniform Guidance 2 CFR 200. This will include at a minimum quarterly reports to the City on services provided, expenditures and service beneficiaries.

III. SUBMISSION REQUIREMENTS

All proposals shall include the following information, organized as separate sections of the proposal. The proposal should be concise and to the point.

1. Contractor Identification:

Provide the name of the firm, the firm's principal place of business, the name, email and telephone number of the contact person and company tax identification number.

2. Client References:

Provide a minimum of two (2) client references. References should be California cities or other large public sector entities. Provide the designated person's name, title, organization, address, telephone number, and the project(s) that were completed under that client's direction.

3. Contractor Qualifications.

Please describe the organization's or group's qualifications and experience relevant to providing the proposed services, including

- Experience providing services to vulnerable populations in Berkeley.
- Experience conducting outreach and field services.
- Any prior experience managing federal funds.

Since the City is seeking to build on existing outreach and crisis response services, please specify which services this proposal will expand on.

4. Service Proposal.

Please describe in detail the scope of services proposed to be provided, including the type of services, the hours of availability, and the team proposed to provide such services. Please describe the proposed timeline for program implementation from date of receiving approval for funding. Make sure to review the scope carefully for consistency with the criteria outlined above.

Please include a budget narrative explanation for operating costs in the Program Expense, Rent, Transportation, Equipment and Indirect Cost categories.

5. Price Proposal:

The proposal shall include pricing for all services. Pricing shall be all inclusive unless indicated otherwise. The price proposal will be submitted on the Excel spreadsheet template included as **Attachment J**, which includes required tabs for both the proposed budget and the organizational budget. Note on maintenance cost: If equipment is being purchased in this RFP, and future maintenance of the equipment can only be provided by the equipment supplier, the maintenance cost for three (3) years beyond the initial warranty period must be requested in the RFP pricing section. The maintenance cost must be included and evaluated as part of the pricing evaluation.

6. Contract Terminations:

If your organization has had a contract terminated in the last five (5) years, describe such incident. Termination for default is defined as notice to stop performance due to the vendor's non-performance or poor performance and the issue of performance was either (a) not litigated due to inaction on the part of the vendor, or (b) litigated and such litigation determined that the vendor was in default.

Submit full details of the terms for default including the other party's name, address, and phone number. Present the vendor's position on the matter. The City will evaluate the facts and may, at its sole discretion, reject the proposal on the grounds of the past experience.

If the firm has not experienced any such termination for default or early termination in the past five (5) years, so indicate.

IV. SELECTION CRITERIA

The following criteria will be considered, although not exclusively, in determining which firm is hired.

1. **References** (10 points)
2. **Consistency of Costs and Proposed Services** (25 points)
3. **Provider Qualifications** (25 points)
(Experience and existing services alignment with current needs)
4. **Proposed Services** (30 points)
(Consistency with needs identified, potential to achieve goals for CCR, availability to provide services outside of traditional M-F 9-5 hours)
5. **Timeliness** (10 points)
(Realistic plan to begin to provide services quickly after awarding of funds.)

A selection panel will be convened of City staff and members of the SCU steering committee to review proposals and recommend funding to the City Council.

V. PAYMENT

Invoices: Invoices must be fully itemized, and provide sufficient information for approving payment and audit. Invoices must be accompanied by receipt for services in order for payment to be processed. **Email invoices to Accounts Payable** and reference the Project Manager and contract number on the invoice.

City of Berkeley
Accounts Payable
PO Box 700
Berkeley, CA 94701
Email: AccountsPayable@cityofberkeley.info
Attn: Amy Davidson

Payments: The City will make payment to the vendor within 30 days of receipt of a correct, approved and complete invoice.

VI. CITY REQUIREMENTS

A. Non-Discrimination Requirements:

Ordinance No. 5876-N.S. codified in B.M.C. Chapter 13.26 states that, for contracts worth more than \$3,000 bids for supplies or bids or proposals for services shall include a completed Workforce Composition Form. Businesses with fewer than five employees are exempt from submitting this form. (See B.M.C. 13.26.030)

Under B.M.C. section 13.26.060, the City may require any bidder or vendor it believes may have discriminated to submit a Non-Discrimination Program. The Contract Compliance Officer will make this determination. This applies to all contracts and all consultants (contractors). Berkeley Municipal Code section 13.26.070 requires that all contracts with the City contain a non-discrimination clause, in which the contractor agrees not to discriminate and allows the City access to records necessary to monitor compliance. This section also applies to all contracts and all consultants. **Bidders must submit the attached Non-Discrimination Disclosure Form with their proposal.**

B. Nuclear Free Berkeley Disclosure Form:

Berkeley Municipal Code section 12.90.070 prohibits the City from granting contracts to companies that knowingly engage in work for nuclear weapons. This contracting prohibition may be waived if the City Council determines that no reasonable alternative exists to doing business with a company that engages in nuclear weapons work. If your company engages in work for nuclear weapons, explain on the Disclosure Form the nature of such work. **Bidders must submit the attached Nuclear Free Disclosure Form with their proposal.**

C. Oppressive States:

The City of Berkeley prohibits granting of contracts to firms that knowingly provide personal services to specified Countries. This contracting prohibition may be waived if the City Council determines that no reasonable alternative exists to doing business with a company that is covered by City Council Resolution No. 59,853-N.S. If your company or any subsidiary is covered, explain on the Disclosure Form the nature of such work. **Bidders must submit the attached Oppressive States Disclosure Form with their proposal.**

D. Sanctuary City Contracting Ordinance:

Chapter 13.105 of the Berkeley Municipal Code prohibits the City from granting and or retaining contracts with any person or entity that provides Data Broker or Extreme Vetting services to the U.S. Immigration and Customs Enforcement Division of the United States Department of Homeland Security ("ICE"). **Bidders must submit the attached Sanctuary City Compliance Statement with their proposal.**

E. Conflict of Interest:

In the sole judgment of the City, any and all proposals are subject to disqualification on the basis of a conflict of interest. The City may not contract with a vendor if the vendor or an employee, officer or director of the proposer's firm, or any immediate family member of the preceding, has served as an elected official, employee, board or commission member of the City who influences the making of the contract or has a direct or indirect interest in the contract.

Furthermore, the City may not contract with any vendor whose income, investment, or real property interest may be affected by the contract. The City, at its sole option, may disqualify any proposal on the basis of such a conflict of interest. **Please identify any person associated with the firm that has a potential conflict of interest.**

F. Berkeley Living Wage Ordinance:

Chapter 13.27 of the Berkeley Municipal Code requires that contractors offer all eligible employees with City mandated minimum compensation during the term of any contract that may be awarded by the City. If the Contractor is not currently subject to the Living Wage Ordinance, cumulative contracts with the City within a one-year period may subject Contractor to the requirements under B.M.C. Chapter 13.27. A certification of compliance with this ordinance will be required upon execution of a contract. The current Living Wage rate can be found here: https://www.cityofberkeley.info/Finance/Home/Vendors_Living_Wage_Ordinance.aspx. The Living Wage rate is adjusted automatically effective June 30th of each year commensurate with the corresponding increase in the Consumer Price Index published in April of each year. If the Living Wage rate is adjusted during the term of your agreement, you must pay the new adjusted rate to all eligible employees, regardless of what the rate was when the contract was executed.

G. Berkeley Equal Benefits Ordinance:

Chapter 13.29 of the Berkeley Municipal Code requires that contractors offer domestic partners the same access to benefits that are available to spouses. A certification of compliance with this ordinance will be required upon execution of a contract.

H. Statement of Economic Interest:

The City's Conflict of Interest Code designates "consultants" as a category of persons who must complete Form 700, Statement of Economic Interest, at the beginning of the contract period and again at the termination of the contract. The selected contractor will be required to complete the Form 700 before work may begin.

VII. OTHER REQUIREMENTS

A. Insurance

The selected contractor will be required to maintain general liability insurance in the minimum amount of \$2,000,000, automobile liability insurance in the minimum amount of \$1,000,000 and a professional liability insurance policy in the amount of \$2,000,000 to cover any claims arising out of the performance of the contract. The general liability and automobile insurance must name the City, its officers, agents, volunteers and employees as additional insureds.

B. Worker's Compensation Insurance

A selected contractor who employs any person shall maintain workers' compensation insurance in accordance with state requirements. Sole proprietors with no employees are not required to carry Worker's Compensation Insurance.

C Business License

Virtually every contractor that does business with the City must obtain a City business license as mandated by B.M.C. Ch. 9.04. The business license requirement applies whether or not the contractor has an office within the City limits. However, a "casual" or "isolated" business transaction (B.M.C. section 9.04.010) does not subject the contractor to the license tax. Warehousing businesses and charitable organizations are the only entities specifically exempted in the code from the license requirement (see B.M.C. sections, 9.04.295 and 9.04.300). Non-profit organizations are granted partial exemptions (see B.M.C. section 9.04.305). Persons who, by reason of physical infirmity, unavoidable misfortune, or unavoidable poverty, may be granted an exemption of one annual free license at the discretion of the Director of Finance. (see B.M.C. sections 9.04.290).

Vendor must apply for a City business license and show proof of application to Purchasing Manager within seven days of being selected as intended contractor.

The Customer Service Division of the Finance Department located at 1947 Center Street, Berkeley, CA 94704, issues business licenses. Contractors should contact this division for questions and/or information on obtaining a City business license, in person, or by calling 510-981-7200.

D Recycled Paper

Any printed reports for the City required during the performance of the work shall be on 100% recycled paper, and shall be *printed on both sides of the page* whenever practical.

E State Prevailing Wage

Certain labor categories under this project may be subject to prevailing wages as identified in the State of California Labor Code commencing in Section 1770 et. seq. These labor categories, when employed for any "work performed during the design and preconstruction phases of construction including, but not limited to, inspection and land surveying work," constitute a "Public Work" within the definition of Section 1720(a)(1) of the California Labor Code requiring payment of prevailing wages.

Wage information is available through the California Division of Industrial Relations web site at: http://www.dir.ca.gov/OPRL/statistics_and_databases.html

VIII. SCHEDULE (dates are subject to change)

City of Berkeley Contract Administrator

CITY OF BERKELEY
Nuclear Free Zone Disclosure Form

I (we) certify that:

- 1. I am (we are) fully cognizant of any and all contracts held, products made or otherwise handled by this business entity, and of any such that are anticipated to be entered into, produced or handled for the duration of its contract(s) with the City of Berkeley. (To this end, more than one individual may sign this disclosure form, if a description of which type of contracts each individual is cognizant is attached.)
- 2. I (we) understand that Section 12.90.070 of the Nuclear Free Berkeley Act (Berkeley Municipal Code Ch. 12.90; Ordinance No. 5784-N.S.) prohibits the City of Berkeley from contracting with any person or business that knowingly engages in work for nuclear weapons.
- 3. I (we) understand the meaning of the following terms as set forth in Berkeley Municipal Code Section 12.90.130:

"Work for nuclear weapons" is any work the purpose of which is the development, testing, production, maintenance or storage of nuclear weapons or the components of nuclear weapons; or any secret or classified research or evaluation of nuclear weapons, or any operation, management or administration of such work.

"Nuclear weapon" is any device, the intended explosion of which results from the energy released by reactions involving atomic nuclei, either fission or fusion or both. This definition of nuclear weapons includes the means of transporting, guiding, propelling or triggering the weapon if and only if such means is destroyed or rendered useless in the normal propelling, triggering, or detonation of the weapon.

"Component of a nuclear weapon" is any device, radioactive or non-radioactive, the primary intended function of which is to contribute to the operation of a nuclear weapon (or be a part of a nuclear weapon).

- 4. Neither this business entity nor its parent nor any of its subsidiaries engages in work for nuclear weapons or anticipates entering into such work for the duration of its contract(s) with the City of Berkeley.

Based on the foregoing, the undersigned declares under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

CITY OF BERKELEY
Oppressive States Compliance Statement

The undersigned, an authorized agent of Women's Daytime Drop In Center (hereafter "Vendor"), has had an opportunity to review the requirements of Berkeley City Council Resolution No. 59,853 -N.S. (hereafter "Resolution"). Vendor understands and agrees that the City may choose with whom it will maintain business relations and may refrain from contracting with those Business Entities which maintain business relationships with morally repugnant regimes. Vendor understands the meaning of the following terms used in the Resolution:

"Business Entity" means "any individual, firm, partnership, corporation, association or any other commercial organization, including parent-entities and wholly-owned subsidiaries" (to the extent that their operations are related to the purpose of the contract with the City).

"Oppressive State" means: **Tibet Autonomous Region and the Provinces of Abo, Kham and U-Tsang**

"Personal Services" means "the performance of any work or labor and shall also include acting as an independent contractor or providing any consulting advice or assistance, or otherwise acting as an agent pursuant to a contractual relationship."

Contractor understands that it is not eligible to receive or retain a City contract if at the time the contract is executed, or at any time during the term of the contract it provides Personal Services to:

- a. The governing regime in any Oppressive State.
- b. Any business or corporation organized under the authority of the governing regime of any Oppressive State.
- c. Any person for the express purpose of assisting in business operations or trading with any public or private entity located in any Oppressive State.

Vendor further understands and agrees that Vendor's failure to comply with the Resolution shall constitute a default of the contract and the City Manager may terminate the contract and bar Vendor from bidding on future contracts with the City for five (5) years from the effective date of the contract termination.

The undersigned is familiar with, or has made a reasonable effort to become familiar with, Vendor's business structure and the geographic extent of its operations. By executing the Statement, Vendor certifies that it complies with the requirements of the Resolution and that if any time during the term of the contract it ceases to comply, Vendor will promptly notify the City Manager in writing.

Based on the foregoing, the undersigned declares under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Attachment D

CITY OF BERKELEY
Sanctuary City Compliance Statement

The undersigned, an authorized agent of Women's Daycare Drop In Center (hereafter "Contractor"), has had an opportunity to review the requirements of Berkeley Code Chapter 13.105 (hereafter "Sanctuary City Contracting Ordinance" or "SCCO"). Contractor understands and agrees that the City may choose with whom it will maintain business relations and may refrain from contracting with any person or entity that provides Data Broker or Extreme Vetting services to the U.S. Immigration and Customs Enforcement Division of the United States Department of Homeland Security ("ICE"). Contractor understands the meaning of the following terms used in the SCCO:

- a. "Data Broker" means either of the following:
 - i. The collection of information, including personal information about consumers, from a wide variety of sources for the purposes of reselling such information to their customers, which include both private-sector business and government agencies;
 - ii. The aggregation of data that was collected for another purpose from that for which it is ultimately used.
- b. "Extreme Vetting" means data mining, threat modeling, predictive risk analysis, or other similar services." Extreme Vetting does not include:
 - i. The City's computer-network health and performance tools;
 - ii. Cybersecurity capabilities, technologies and systems used by the City of Berkeley Department of Information Technology to predict, monitor for, prevent, and protect technology infrastructure and systems owned and operated by the City of Berkeley from potential cybersecurity events and cyber-forensic based investigations and prosecutions of illegal computer based activity.

Contractor understands that it is not eligible to receive or retain a City contract if at the time the Contract is executed, or at any time during the term of the Contract, it provides Data Broker or Extreme Vetting services to ICE.

Contractor further understands and agrees that Contractor's failure to comply with the SCCO shall constitute a material default of the Contract and the City Manager may terminate the Contract and bar Contractor from bidding on future contracts with the City for five (5) years from the effective date of the contract termination.

By executing this Statement, Contractor certifies that it complies with the requirements of the SCCO and that if any time during the term of the Contract it ceases to comply. Contractor will promptly notify the City Manager in writing. Any person or entity who knowingly or willingly supplies false information in violation of the SCCO shall be guilty of a misdemeanor and up to a \$1,000 fine.

Based on the foregoing, the undersigned declares under penalty of perjury under the laws of the State of California that the foregoing is true and correct. Executed this 27 day of Jan., 2022, at Sausalito, California.

DECLARATION OF COMPLIANCE WITH THE AMERICANS WITH DISABILITIES ACT

The Americans with Disabilities Act (ADA) requires that private organizations serving the public make their goods, services and facilities accessible to people with disabilities. Furthermore, the City of Berkeley requires that all of its Contractors comply with their ADA obligations and verify such compliance by signing this Declaration of Compliance.

The Contractor certifies that it will comply with the Americans with Disabilities Act by:

- A. Adopting policies, practices and procedures that ensure non-discrimination and equal access to Contractor's goods, services and facilities for people with disabilities;
- B. Providing goods, services and facilities to individuals with disabilities in an integrated setting, except when separate programs are required to ensure equal access;
- C. Making reasonable modifications in programs, activities and services when necessary to ensure equal access to individuals with disabilities, unless fundamental alteration in the nature of the Contractor's program would result;
- D. Removing architectural barriers in existing facilities or providing alternative means of delivering goods and services when removal of barriers is cost-prohibitive;
- E. Furnishing auxiliary aids to ensure equally effective communication with persons with disabilities; and
- F. If contractor provides transportation to the public, by providing equivalent accessible transportation to people with disabilities.
- G. Providing the City of Berkeley Grievance Procedure and Policy form(s) to individuals with disabilities who allege they have been discriminated against based on their disability or denied a requested disability accommodation by the Contractor's staff.

The undersigned authorized representative hereby obligates the Contractor to the above stated conditions under penalty of perjury.

CITY OF BERKELEY
Living Wage Certification for Providers of Services

TO BE COMPLETED BY ALL PERSONS OR ENTITIES ENGAGING IN A CONTRACT FOR PERSONAL SERVICES WITH THE CITY OF BERKELEY.

The Berkeley Municipal Code Chapter 13.27, Berkeley's Living Wage Ordinance (LWO), provides that contractors who engage in a specified amount of business with the City (except where specifically exempted) under contracts which furnish services to or for the City in any twelve (12) month period of time shall comply with all provisions of this Ordinance. The LWO requires a City contractor to provide City mandated minimum compensation to all eligible employees, as defined in the Ordinance. In order to determine whether this contract is subject to the terms of the LWO, please respond to the questions below. Please note that the LWO applies to those contracts where the contractor has achieved a cumulative dollar contracting amount with the City. Therefore, even if the LWO is inapplicable to this contract, subsequent contracts may be subject to compliance with the LWO. Furthermore, the contract may become subject to the LWO if the status of the Contractor's employees change (i.e. additional employees are hired) so that Contractor falls within the scope of the Ordinance.

Section I.

1. IF YOU ARE A FOR-PROFIT BUSINESS, PLEASE ANSWER THE FOLLOWING QUESTIONS

a. During the previous twelve (12) months, have you entered into contracts, including the present contract, bid, or proposal, with the City of Berkeley for a cumulative amount of \$25,000.00 or more?
YES NO

If no, this contract is NOT subject to the requirements of the LWO, and you may continue to Section II. If yes, please continue to question 1(b).

b. Do you have six (6) or more employees, including part-time and stipend workers?
YES NO

If you have answered, "YES" to questions 1(a) and 1(b) this contract IS subject to the LWO. If you responded "NO" to 1(b) this contract IS NOT subject to the LWO. Please continue to Section II.

2. IF YOU ARE A NON-PROFIT BUSINESS, AS DEFINED BY SECTION 501(C) OF THE INTERNAL REVENUE CODE OF 1954, PLEASE ANSWER THE FOLLOWING QUESTIONS.

a. During the previous twelve (12) months, have you entered into contracts, including the present contract, bid or proposal, with the City of Berkeley for a cumulative amount of \$100,000.00 or more?
YES NO

If no, this Contract is NOT subject to the requirements of the LWO, and you may continue to Section II. If yes, please continue to question 2(b).

b. Do you have six (6) or more employees, including part-time and stipend workers?
YES NO

If you have answered, "YES" to questions 2(a) and 2(b) this contract IS subject to the LWO. If you responded "NO" to 2(b) this contract IS NOT subject to the LWO. Please continue to Section II.

Section II

Please read, complete, and sign the following:

THIS CONTRACT IS SUBJECT TO THE LIVING WAGE ORDINANCE.
THIS CONTRACT IS NOT SUBJECT TO THE LIVING WAGE ORDINANCE.

WDP e

The undersigned, on behalf of himself or herself individually and on behalf of his or her business or organization, hereby certifies that he or she is fully aware of Berkeley's Living Wage Ordinance, and the applicability of the Living Wage Ordinance, and the applicability of the subject contract, as determined herein. The undersigned further agrees to be bound by all of the terms of the Living Wage Ordinance, as mandated in the Berkeley Municipal Code, Chapter 13.27. If, at any time during the term of the contract, the answers to the questions posed herein change so that Contractor would be subject to the LWO, Contractor will promptly notify the City Manager in writing. Contractor further understands and agrees that the failure to comply with the LWO, this certification, or the terms of the Contract as it applies to the LWO, shall constitute a default of the Contract and the City Manager may terminate the contract and bar Contractor from future contracts with the City for five (5) years from the effective date of the Contract termination. If the contractor is a for-profit business and the LWO is applicable to this contract, the contractor must pay a living wage to all employees who spend 25% or more of their compensated time engaged in work directly related to the contract with the City. If the contractor is a non-profit business and the LWO is applicable to this contract, the contractor must pay a living wage to all employees who spend 50% or more of their compensated time engaged in work directly related to the contract with the City.

These statements are made under penalty of perjury under the laws of the state of California.

Form EBO-1
CITY OF BERKELEY

CERTIFICATION OF COMPLIANCE WITH EQUAL BENEFITS ORDINANCE

If you are a contractor, return this form to the originating department/project manager. If you are a vendor (supplier of goods), return this form to the Purchasing Division of the Finance Dept.

SECTION 1. CONTRACTOR/VENDOR INFORMATION

Name: Women's Daytime Drop-In Center Vendor No.:
Address: 2218 Adorn St City: Berkeley State: CA ZIP: 94702
Contact Person: Leslie Berkler Telephone: 916 548-2884
E-mail Address: Leslie@womensdropin.org Fax No.:

SECTION 2. COMPLIANCE QUESTIONS

- A. The EBO is inapplicable to this contract because the contractor/vendor has no employees. [] Yes [x] No
B. Does your company provide (or make available at the employees' expense) any employee benefits? [x] Yes [] No
C. Does your company provide (or make available at the employees' expense) any benefits to the spouse of an employee? [] Yes [x] No
D. Does your company provide (or make available at the employees' expense) any benefits to the domestic partner of an employee? [] Yes [x] No
E. Are the benefits that are available to the spouse of an employee identical to the benefits that are available to the domestic partner of the employee? [x] Yes [] No

SECTION 3. PROVISIONAL COMPLIANCE

- A. Contractor/vendor is not in compliance with the EBO now but will comply by the following date. [] By the first effective date after the first open enrollment process... [] At such time that administrative steps can be taken... [] Upon expiration of the contractor's current collective bargaining agreement(s).
B. If you have taken all reasonable measures to comply with the EBO but are unable to do so, do you agree to provide employees with a cash equivalent? [] Yes [] No

* The cash equivalent is the amount of money your company pays for spousal benefits that are unavailable for domestic partners.

SECTION 4. REQUIRED DOCUMENTATION

At time of issuance of purchase order or contract award, you may be required by the City to provide documentation (copy of employee handbook, eligibility statement from your plans, insurance provider statements, etc.) to verify that you do not discriminate in the provision of benefits.

SECTION 5. CERTIFICATION

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that I am authorized to bind this entity contractually. By signing this certification, I further agree to comply with all additional obligations of the Equal Benefits Ordinance that are set forth in the Berkeley Municipal Code and in the terms of the contract or purchase order with the City.

COMMERCIAL GENERAL LIABILITY COVERAGE PART

SCHEDULE

Name Of Additional Insured Person(s) Or Organization(s):

Any person or organization that you are required to add as an additional insured on this policy, under a written contract or agreement currently in effect, or becoming effective during the term of this policy. The additional insured status will not be afforded with respect to liability arising out of or related to your activities as a real estate manager for that person or organization.

Information required to complete this Schedule, if not shown above, will be shown in the Declarations.

- A. Section II – Who Is An Insured** is amended to include as an additional insured the person(s) or organization(s) shown in the Schedule, but only with respect to liability for "bodily injury", "property damage" or "personal and advertising injury" caused, in whole or in part, by your acts or omissions or the acts or omissions of those acting on your behalf:
1. In the performance of your ongoing operations; or
 2. In connection with your premises owned by or rented to you.

However:

1. The insurance afforded to such additional insured only applies to the extent permitted by law; and
2. If coverage provided to the additional insured is required by a contract or agreement, the insurance afforded to such additional insured will not be broader than that which you are required by the contract or agreement to provide for such additional insured.

- B. With respect to the insurance afforded to these additional insureds, the following is added to Section III – Limits Of Insurance:**

If coverage provided to the additional insured is required by a contract or agreement, the most we will pay on behalf of the additional insured is the amount of insurance:

1. Required by the contract or agreement; or
2. Available under the applicable Limits of Insurance shown in the Declarations; whichever is less.

This endorsement shall not increase the applicable Limits of Insurance shown in the Declarations.

A Head for Insurance. A Heart for Nonprofits.

Name Of Additional Insured Person(s) Or Organization(s):

Any person or organization that you are required to add as an additional insured on this policy, under a written contract or agreement currently in effect, or becoming effective during the term of this policy. The additional insured status will not be afforded with respect to liability arising out of or related to your activities as a real estate manager for that person or organization.

Section II — Who Is An Insured is amended to include as an additional insured the person(s) or organization(s) shown in the Schedule, but only with respect to liability for "damages" caused, in whole or in part, by your acts or omissions or the acts or omissions of those acting on your behalf in the performance of your ongoing operations.

The insurance extended by this endorsement is primary coverage when you have so agreed in a written contract or agreement and will be considered non-contributory with the additional insured(s) own insurance.

RESOLUTION NO. 70,125-N.S.

CONTRACT: WOMEN'S DAYTIME DROP-IN CENTER FOR COMMUNITY CRISIS
RESPONSE BRIDGE SERVICES

WHEREAS, on July 14, 2020, the City Council of the City Berkeley passed a package of items providing direction for the development of a new paradigm of public safety in Berkeley that included direction to the City Manager to analyze and develop a pilot program to re-assign non-criminal police service calls to a Specialized Care Unit (SCU); and

WHEREAS, City of Berkeley community members would prefer a 24/7 mental health crisis response system that does not so heavily involve law enforcement; and

WHEREAS, on December 1, 2020 by Resolution No. 69,621-N.S. City Council approved Contract No. 32100082 with Resource Development Associates (RDA) for SCU design; and RDA conducted a comprehensive feasibility study, program design and implementation plan for an SCU to respond to public safety calls that do not require presence of law enforcement; and

WHEREAS, the SCU is currently in its design phase, with the intention to roll out by Summer 2022; and

WHEREAS, the Community Crisis Response services included in this contract will provide necessary supports and enhancement to the mental health system until the SCU can be implemented; and

WHEREAS, services included in this contract aligns with the Strategic Plan goal to champion and demonstrate social and racial equity; and

WHEREAS, Women's Daytime Drop-in Center was selected through a competitive Request for Proposals process; and

WHEREAS, the City received federal American Rescue Plan Act (ARPA) and State and Local Fiscal Recovery Funds (SLFRF) which can be used to improve the behavioral health system's capacity to serve underserved populations.

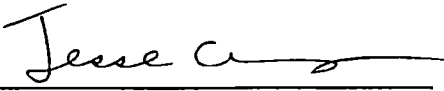

NOW THEREFORE, BE IT RESOLVED by the Council of the City of Berkeley that the City Manager or her designee is hereby authorized to execute a contract and any amendments with Women's Daytime Drop-in Center for Community Crisis Response Bridge services in an amount not to exceed \$120,000. A signed copy of said agreement will be kept on file in the Office of the City Clerk.

The foregoing Resolution was adopted by the Berkeley City Council on November 30, 2021 by the following vote:

Ayes: Bartlett, Droste, Hahn, Harrison, Kesarwani, Robinson, Taplin, Wengraf, and Arreguin.

Noes: None.

Absent: None.

Jesse Arreguin, Mayor

EXHIBIT ASCOPE OF SERVICES

Agency Name: Berkeley Unified School District
 Contact Period: June 26, 2023 – June 30, 2025
 Program Title: Mental Health and Wellbeing Coordinator at Berkeley High School

Berkeley Unified School District (BUSD) is contracting with the City of Berkeley's Department of Health, Housing, and Community Services (HHCS) to hire a Mental Health and Wellbeing (MHW) Coordinator at Berkeley High School to strengthen the system of mental health and wellbeing at BHS.

A. Scope of Work

Through this contract, HHCS agrees to fund a new MHW Coordinator position at Berkeley High School for two years providing funding not to exceed \$350,000. BUSD is responsible for recruiting and hiring for the position, providing supervision (by the Vice Principal of Climate and Wellness), workspace and supplies, and supporting collaborative working relationships among the MHW Coordinator and BHS administration, staff, and students, the HHCS Health Center, and other partners/stakeholders. BUSD is also responsible for ensuring that the MHW Coordinator meets the requirements/qualifications and desired attributes and effectively fulfills the responsibilities delineated in attached Mental Health and Wellbeing Coordinator (Temporary) duties statement.

B. BUSD Project Contributions

BUSD will provide the following in-kind match to ensure the success of the Mental Health and Wellbeing Coordinator:

1. BUSD will provide office space, equipment, and furnishings at Berkeley High School for the MHW Coordinator.
2. BUSD will continue to maintain the current Mental Health Counselor position at BHS to complement the role of the MHW Coordinator.
3. BUSD will cover the costs of build out, supplies, equipment, etc. for the BHS Wellness Center through the allocation of a minimum of \$50,000 provided for infrastructure. This funding will be supplemented by a \$30,000 grant from the Berkeley High School Development Group.
4. BUSD will remove all prior occupant materials from the BHS Wellness Center (room H104) no later than June 30, 2023.
5. BUSD will complete refurbishment of the Wellness Center (H104) by 8/15/23 with an

opening for services and programming by September 2, 2023.

6. BUSD will fully furnish the Wellness Center per Implementation Team specifications (Preferably all additional furnishings, materials, and supplies will have arrived, or at least be ordered prior to that date).
7. BUSD will provide ongoing utilities and maintenance through 6/30/25.

By entering into the contract, BUSD also agrees to the following:

1. BUSD will meet quarterly with HHCS, starting in August 2023 through the term of this contract, to further collaboration and assess impact. BUSD will be responsible for scheduling and creating agendas, with input from HHCS, for these quarterly meetings.
2. BUSD understands that the essential purpose of the MHW Coordinator is to fulfill a common interest and public good by expanding the mental health and wellness services to students. While this school-based role is intended to be filled by a professional with both administrative and mental or behavioral health experience, the position is not intended to function as a typical BHS administrator. For example, this role is not disciplinary in nature, nor should teacher or staff evaluations be assigned, nor regular supervision of the campus. Any material changes to the role beyond what is included in the attached duties statement must be approved by HHCS and must not stray from the core intent of this position to coordinate mental health and wellness.
3. BUSD will promote positive, collaborative working partnerships among the HHCS Health Center, the BHS Wellness Center and Berkeley High School administration, staff, and students.
4. Should the two-year cost (salary and fringe benefits) of the MHW surpass the \$350,000 funded by HHCS, BUSD will be responsible for funding the difference.

If any of the above are not satisfied, HHCS may cease funding this project.

C. Project Benchmarks and Deliverables

The following mutually agreed upon benchmarks:

Benchmark/Deliverable	Due Date
MHW Coordinator hired/starts work at BHS	July 15, 2023
Wellness Center refurbishment and furnishing completed	August 15, 2023
Wellness Center soft opening	August 15, 2023
Preliminary student intake data collected (who, how often, which services, etc.)	August 31, 2023 and ongoing
BUSD -HHCS Collaboration Meeting	August 2023 (and quarterly through June 30, 2025)
Outreach activities to introduce MHW Coordinator to	August – October 2023 and ongoing

BUSD staff, students, and parents (as appropriate)	
Weekly Wellness Center activity and services schedule posted and disseminated	August 31, 2023 and ongoing
Official opening of Wellness Center (with BUSD and CoB elected officials, leaders and stakeholders)	September 21, 2023
BUSD submits project evaluation plan to HHCS (see more on evaluation below)	November 30, 2023
Evaluation #1 due to HHCS (for the period of June 26, 2023 – June 30, 2024)	July 15, 2024
Evaluation #2 due to HHCS (for the period of July 1, 2024 – June 30, 2025)	July 15, 2025

D. Project Evaluation

BUSD will develop a project evaluation plan for approval by HHCS no later than November 30, 2023. The evaluation plan will focus on answering the following questions:

1. What changes have occurred in the numbers and demographics of students receiving mental health and wellbeing services through BHS?
2. What types of mental health and wellness services/activities are students receiving/participating in?
3. What, if any, indication do you have that BHS students are receiving more appropriate services?
4. How specifically have mental health services, activities, and/or approaches changed/improved at Berkeley High as a result of the work of the Mental Health and Wellbeing Coordinator?

The plan will include methods for collecting usage data of students (by grade, ethnicity, SED, gender, etc.) of BHS mental health and wellness services, including types of services, frequency of use, etc.

The plan will also provide student feedback on mental health and wellbeing services and activities.

In addition, the plan will provide an assessment by the VP of Culture and Climate on the MHW Coordinator’s impact on student mental health and wellbeing at BHS.

E. Budget

Work will be billed through quarterly invoices consistent with the funding breakdown contained in the budget below.

Mental Health and Wellbeing Coordinator - Project Budget
 City of Berkeley/Health, Housing and Community Services Contract (CoB/HHCS) Funding

	FY 2023-24 (6/24/23 - 6/30/24)	FY 2024-25 (7/1/24 - 6/30/25)	TOTAL	Budget Narrative/Justification
Salary	\$ 139,258	\$ 142,739	\$ 281,996	The salary range for the position was determined by BUSD's Human Resources Department and the Union Review Board. The salary range is based on analysis of the activities, responsibilities, and qualifications associated with the position. The reviewers determined that this position falls into the Coordinator salary range (\$123,833 - \$131,375 per year depending on the selected candidate's qualifications). This budget assumes that the candidate receives the top step. The figures incorporate a 6% salary increase as of July 1, 2023 and an additional 2.5% COLA as of July 1, 2024.
Benefits	\$ 33,491	\$ 34,329	\$ 67,820	The benefit range was calculated based on BUSD's standard fringe (non-salary employee cost) rate of 24.05% of salary. This figure includes employer contribution to: STRS, Medicare, Workers Comp, Unemployment Insurance.
Total Project Cost	\$ 172,749	\$ 177,068	\$ 349,817	
City of Berkeley/HHCS Funding	\$ 172,749	\$ 177,261	\$ 350,000	CoB/HHCS's Total Funding for this project shall not exceed \$350,000 for 6/24/23 - 6/30/25. By entering into this contract, BUSD agrees to cover all costs associated with this position that go above the \$350,000 from CoB/HHCS through 6/30/25.

Quarterly costs will not exceed \$44,313 to ensure that the contract does not exceed \$350,000 for the term.

Berkeley Unified School District Job Opportunity**Mental Health and Wellbeing Coordinator (Temporary)****Salary Range:** \$123,833 - \$131,375 Annually

This is a 1.0 full time position

The Mental Health and Wellbeing (MHW) Coordinator is a newly established BUSD position, funded by the City of Berkeley, housed at Berkeley High School. This position is responsible for strengthening, expanding and coordinating services and resources that promote student mental health and wellbeing in partnership with Berkeley High School's Administration and the Berkeley High School Health Center. This position, under the supervision of the Vice Principal of School Climate & Student Wellness, is responsible for day-to-day operations of Berkeley High School's Wellness Center (*opening fall 2023*).

This position also assesses the existing behavioral health service system at BHS, identifying strengths, gaps and needs. The MHW Coordinator co-develops and implements a targeted work plan that builds on existing assets and, where needed, introduces new best practice strategies for strengthening the system. The MHW Coordinator builds connections between Berkeley High School, the City of Berkeley and community partners, and approaches all work and partnerships with a focus on equity and positive youth development.

GENERAL RESPONSIBILITIES:

Under supervision from Berkeley High School's Administrator of School Climate & Student Wellness and in partnership with the BHS/BTA Health Center and Office of the Director in HHCS, the MHW Coordinator will:

- a. Implement the vision and priorities/goals for student wellness services and programming established by the BHS Wellness Implementation Team by overseeing the day-to-day operations of the Wellness Center, ensuring that student access and engagement is aligned to outlined priorities and that data is being collected for program and service analysis/evaluation/growth.
- b. Serve as a liaison with community-based organizations, school, district, and City personnel to improve coordination and collaboration of services to improve the health and wellbeing of BHS youth.
- c. Establish and strengthen communication networks between teachers, counselors, internal and external programs to facilitate better and more timely access to mental health and wellbeing services.
- d. Provide mental health trainings and consultation to teachers, staff, partners, and administrators to support mental health awareness, identification and referrals, strengthen student-adult relationships and engage all adults in creating a more positive and safe climate for learning.
- e. Coordinate, implement and/or consult on school-wide wrap-around efforts to create positive, culturally inclusive, learning environments.
- f. Collaborate with BHS leadership, BHS Coordination of Services Team, the BUSD Mental Health Coordinator, and the Health Center's mental health leadership to create, clarify, publicize and/or improve policies, practices, and systems that promote student wellness, support social emotional learning and development, increase student resilience, decrease risk factors, and strengthen family engagement.
- g. Nurture and promote opportunities for positive youth development, including by providing coaching, facilitation and support for youth-led (peer-to-peer) groups designed to strengthen individual identity, promote racial affinity, develop safe, healthy peer relationships, provide mental health education and build youth leadership.

- h. As necessary, establish new partnerships and engage existing community agency partners, students and families to strengthen collaboration and effectiveness in service of BHS student mental health and wellbeing.
- i. Drawing from recent assessments¹ and surveys², stakeholder feedback and observations, identify assets, gaps, inequities and untapped opportunities in BHS current mental health and wellbeing systems and strategies.
- j. Work with health center leadership and school administrators to maintain and widely share resources, such as social media, resource webpage/directory³ of City of Berkeley, BUSD and community mental health and wellbeing services/supports, including the City of Berkeley’s free mental health apps. Ensure that this information is culturally and linguistically accessible to and appropriate for BHS’s diverse population.
- k. Utilize knowledge of appropriate multi-tiered supports and to provide guidance and screening questions to help site managers, specialists, teachers to choose and implement appropriate academic or socio-emotional strategies and/or select appropriate providers.⁴
- l. Other duties as assigned.

REQUIREMENTS / QUALIFICATIONS

Letter of Interest

Resume

Must hold a valid California Administrative Services Credential

Must hold a valid California Teaching or Pupil Personnel Services Credential

Must hold a valid California Driver’s License

EL Authorization or CLAD

DESIRED ATTRIBUTES: We seek a creative problem-solver who is eager to take initiative and able to effectively juggle multiple responsibilities. **A candidate with prior administrative experience and a history of serving students in urban public schools, a school leader who has demonstrated success facilitating professional development to adults.** A strong candidate will have experience working on mental health issues, preferably with ethnically/racially diverse young people in **school settings**. Outstanding relationship-building, teamwork and organizational skills are essential. We seek someone who is a systems thinker and is skilled at making sense of complexity. They should be able to: catalog and analyze numerous mental health/wellbeing needs and services; identify unmet needs and new opportunities; and weave these services together into a coherent, accessible schema and working system that improves the mental health and wellbeing of high school students. The right candidate will have a strong working knowledge of children’s mental health prevention, early intervention and crisis response. We seek somebody who is adept at building strong partnerships with a wide range of providers and partners, and who has a track record of improving systems within and/or across agencies. We are looking for a candidate who thrives working collaboratively and independently. The right candidate will be skilled at listening to and integrating the ideas of others and also at coaching others through, sometimes challenging, systems change. The right candidate will have a deep commitment to racial equity and a steadfast determination to make progress on entrenched societal challenges.

¹ Recent assessments include the *Berkeley High School Health Needs Assessment*, Center for Healthy Schools and Communities, Alameda County Health Care Service Agency (August 30, 2017) and Berkeley High’s *Wellness and Support Project*.

² The *Healthy Kids Surveys* from 2017-18 and 2021-22 may be particularly helpful.

³ At a minimum, this list will include agency and/or provider names, current contact information, location, eligibility criteria, cost and links to where students and their families can find additional information. This list also will include information about private therapists in and nearby Berkeley for those families that are able to pay for unsubsidized services.

⁴ <https://www.healthline.com/health/how-to-find-a-therapist> is an example (but maybe not the best example) of such a resource.

EXHIBIT B

PAYMENT

GENERAL: Contract Not to Exceed amount is \$350,000.

BILLING: Contractor will submit quarterly invoices for services rendered per the identified budget in Exhibit A.

INVOICES: Invoices must be fully itemized, and provide sufficient information for approving payment and audit. Invoices must be accompanied by receipt for services in order for payment to be processed. **Email invoices to Accounts Payable and cc' ngoldman@berkeleyca.gov** (List on invoice. Attn: Nina Goldman, Office of the Director/Health, Housing and Community Services) and reference the contract number.

PAYMENTS: The City will make payment to the vendor within 30 days of receipt of a correct, approved and complete invoice.

Evaluation reports are due by July 15, 2024 and July 15, 2025. Outstanding invoices will be paid upon receipt and approval of these evaluation reports by HHCS.

EXHIBIT C

BUSINESS ASSOCIATE ADDENDUM

This Business Associate Addendum (“Addendum”) supplements and is made a part of the contract (“Contract”) by and between City of Berkeley, (hereinafter “Covered Entity” and Berkeley Unified School District, (hereinafter “Business Associate”), dated June 2, 2023. This addendum is effective as of the effective date of the Contract (the “Addendum Effective Date”).

1. Recitals

(a) Covered Entity wishes to disclose certain information to Business Associate pursuant to the terms of the Contract, some of which may constitute Protected Health Information (“PHI”).

(b) Covered Entity and Business Associate intend to protect the privacy and provide for the security of PHI disclosed to Business Associate pursuant to the Contract in compliance with the Health Insurance Portability and Accountability Act of 1996, Public Law 104-191 (“HIPAA”), the Health Information Technology for Economic and Clinical Health Act, Public Law 111-005 (“the HITECH Act”), and regulations promulgated thereunder by the U.S. Department of Health and Human Services and other applicable laws.

(c) Covered Entity is required to enter into an agreement containing specific requirements with Business Associate prior to the disclosure of PHI, as set forth in, but not limited to, Title 45, Sections 164.314(a), 164.502(e) and 164.504(e) of the Code of Federal Regulations (“C.F.R.”) and contained in this Addendum.

2. Definitions(a) Catch-all definition:

The following terms used in this Agreement shall have the same meaning as those terms in the HIPAA Rules: Breach, Data Aggregation, Designated Record Set, Disclosure, Health Care Operations, Individual, Minimum Necessary, Notice of Privacy Practices, Protected Health Information, Required By Law, Secretary, Security Incident, Subcontractor, Unsecured Protected Health Information, and Use.

(b) Specific definitions:

(1) Business Associate. “Business Associate” shall generally have the same meaning as the term “business associate” at 45 CFR 160.103, and in reference to the party to this agreement, shall mean Berkeley Unified School District.

(2) Covered Entity. “Covered Entity” shall generally have the same meaning as the term “covered entity” at 45 CFR 160.103, and in reference to the party to this agreement, shall mean City of Berkeley.

(3) HIPAA Rules. “HIPAA Rules” shall mean the Privacy, Security, Breach Notification, and Enforcement Rules at 45 CFR Part 160 and Part 164.

3. Obligations and Activities of Business Associate

Business Associate agrees to the following obligations and activities.

(a) Prohibited disclosures. Business Associate shall not use or disclose protected health information other than as permitted or required by the Agreement or as required by law;

(b) Appropriate safeguards. Business Associate shall use appropriate administrative, technical and physical safeguards, and comply with Subpart C of 45 CFR Part 164 with respect to electronic protected health information, to prevent use or disclosure of PHI other than as provided for by the Contract. Upon request by Covered Entity, Business Associate shall provide a written description of such safeguards.

(c) Reporting of Breach or Security Incident. Business Associate shall report to Covered Entity any use or disclosure of PHI not provided for by the Agreement of which it becomes aware, including breaches of unsecured PHI as required at 45 CFR 164.410, and any security incident of which it becomes aware in writing without unreasonable delay and in no case later than ten (10) calendar days after discovery. The written notice from the Business Associate shall include the name of each individual, with address and other identifiers where known, whose unsecured PHI has been, or is reasonably believed by Business Associate to have been, accessed, acquired, or disclosed during such unauthorized use or disclosure. Business Associate shall investigate any such breach or security incident, and provide a written report of the investigation to Covered Entity's Privacy Officer within thirty (30) days of discovery at:

Privacy Officer
Department of Health, Housing & Community Services
City of Berkeley
2180 Milvia Street, Second Floor
Berkeley, CA 94704

(d) Breach Notification. For any breach of PHI attributable to Business Associate or any subcontractor of Business Associate, the Business Associate shall handle on behalf of Covered Entity all breach notifications to individuals, the HHS Office for Civil Rights (OCR), and, if necessary, to the media, as set forth below.

i. *Individuals*. Business Associate shall notify individuals of the breach or unauthorized use or disclosure when notification is required under state or federal law and shall pay any costs of such notifications, as well as any costs associated with the breach. The notifications shall comply with the requirements set forth in 42 U.S.C. Section 17932 and its implementing regulations, including, but not limited to, the requirement that the notifications be made without unreasonable delay and in no event later than 60 calendar days. Business Associate shall provide Covered Entity an opportunity to review and approve the time, manner and content of any such notifications before the notifications are made.

ii. *Secretary and Media.* Business Associate is responsible for all required reporting of the breach as specified in 42 U.S.C. section 17932 and its implementing regulations, including notification to media outlets and to the Secretary. If a breach of unsecured PHI involves more than 500 residents of the State of California or Business Associate's jurisdiction, Business Associate shall notify the Secretary of the breach according to 45 CFR 164.408. Business Associate shall provide Covered Entity with a copy of the notice to the Secretary. Additionally, where media notification is necessary, Business Associate shall provide notification to the media. The Covered Entity shall review and approve the media notification before it is made.

(e) Subcontractors. In accordance with 45 CFR 164.502(e)(1)(ii) and 164.308(b)(2), if applicable, Business Associate shall ensure that any subcontractors that create, receive, maintain, or transmit PHI on behalf of the Business Associate agree to the same restrictions, conditions, and requirements that apply to the Business Associate with respect to such information. Business Associate shall ensure that any subcontract it maintains in order to perform the services specified in the Contract includes a Business Associate agreement compliant with federal and California law.

(f) Designated Record Set. Business Associate shall make available PHI in a designated record set to the Covered Entity, within 10 days of request, as necessary to satisfy Covered Entity's obligations under 45 CFR 164.524 and applicable California law, including but not limited to Health and Safety Code Section 123110.

(g) Amendments to PHI. Business Associate shall make any amendment(s) to PHI in a designated record set as directed or agreed to by the Covered Entity pursuant to 45 CFR 164.526, or take other measures as necessary to satisfy Covered Entity's obligations under 45 CFR 164.526;

(h) Accounting. Business Associate shall maintain and make available the information required to provide an accounting of disclosures to the Covered Entity as necessary to satisfy Covered Entity's obligations under 45 CFR 164.528;

(i) Compliance. To the extent the Business Associate is to carry out one or more of Covered Entity's obligation(s) under Subpart E of 45 CFR Part 164, Business Associate shall comply with the requirements of Subpart E that apply to the Covered Entity in the performance of such obligation(s).

(j) Audit. Business Associate shall make its internal practices, books, and records available to the Secretary for purposes of determining compliance with the HIPAA Rules.

4. **Permitted Uses and Disclosures by Business Associate**

(a) Business Associate may only use or disclose PHI as necessary to perform the services set forth in the Contract, except as specifically set forth below.

(b) Business Associate may not use or disclose protected health information in a manner that would violate Subpart E of 45 CFR Part 164 if done by Covered Entity.

(c) Business Associate agrees to limit its uses, disclosures and requests for PHI to the minimum necessary to accomplish the intended use, disclosure or request, respectively. Effective on the date the Secretary issues guidance on what constitutes “minimum necessary” for purposes of the HIPAA Regulations, Business Associate shall limit its use, disclosure or request of PHI to only the minimum necessary as set forth in such guidance.

(d) Business Associate may use or disclose protected health information as required by law.

(e) Business Associate may use protected health information for the proper management and administration of the Business Associate

(f) Business Associate may provide data aggregation services relating to the health care operations of the Covered Entity, but only if specifically required within the scope of services in the Contract or otherwise based on a specific written request of the Covered Entity.

5. Permissible Requests by Covered Entity

Covered Entity shall not request Business Associate to use or disclose protected health information in any manner that would not be permissible under Subpart E of 45 CFR Part 164 if done by Covered Entity.

6. Termination

(a) Material Breach. A breach of any provision of this Addendum by Business Associate, as determined by Covered Entity, shall constitute a material breach of the Contract and shall provide grounds for *immediate* termination of the Contract, any provision in the Contract to the contrary notwithstanding.

(b) Obligations of Business Associate Upon Termination. Upon termination of the Contract for any reason, Business Associate shall return to Covered Entity or, if Covered Entity provides advanced written approval, destroy, all protected health information received from Covered Entity, or created, maintained, or received by Business Associate on behalf of Covered Entity, that the Business Associate still maintains in any form. Business associate shall retain no copies of the protected health information. If Covered Entity elects destruction of the PHI, Business Associate shall certify in writing to Covered Entity that such PHI has been destroyed.

(c) Survival. The obligations of Business Associate under this Section shall survive the termination of this Agreement.

7. Miscellaneous

(a) Regulatory References. A reference in this Addendum to a section in the HIPAA Rules means the section as in effect or as amended.

(b) Amendment. The Parties agree to take such action as is necessary to amend this Agreement from time to time as is necessary for compliance with the requirements of the HIPAA Rules and any other applicable law.

- (c) Interpretation. Any ambiguity in this Addendum and the Contract shall be interpreted as broadly as necessary to implement and comply with HIPAA, the HITECH Act, and the HIPAA Rules.
- (d) Disclaimer. Covered Entity makes no warranty or representation that compliance by Business Associate with this Addendum, HIPAA, the HITECH Act, or the HIPAA Rules will be adequate or satisfactory for Business Associate's own purposes. Business Associate is solely responsible for all decisions made by Business Associate regarding the safeguarding of PHI.
- (e) Assistance in Litigation or Administrative Proceedings. Business Associate shall make itself, and any subcontractors, employees, or agents assisting Business Associate in the performance of its obligations under the Contract or Addendum, available to Covered Entity, at no cost to Covered Entity, to testify as witnesses, or otherwise, in the event of litigation or administrative proceedings being commenced against Covered Entity, its directors, officers, or employees based upon a claimed violation of HIPAA, the HITECH Act, the HIPAA Rule, or other laws relating to security and privacy, except where Business Associate or its subcontractor, employee or agent is a named adverse party.
- (f) No Third-Party Beneficiaries. Nothing express or implied in the Contract or this Addendum is intended to confer, nor shall anything herein confer, upon any person other than Covered Entity, Business Associate and their respective successors or assigns, any rights, remedies, obligations or liabilities whatsoever.
- (g) Remedies. Covered Entity shall be entitled to seek immediate injunctive relief as well as to exercise all other rights and remedies which the Covered Entity may have at law or in equity in the event of an unauthorized use or disclosure of PHI by Business Associate or any employee, agent or subcontractor thereof that received PHI from Business Associate.
- (h) Preemption. The provisions of this Addendum are intended to establish the minimum requirements regarding Business Associate's use and disclosure of PHI under HIPAA, the HITECH Act, and applicable Regulations. California law also governs the use and disclosure of individually identified health information. To the extent that California law is more stringent with respect to the protection of such information, applicable California law shall govern Business Associate's use and disclosure of confidential information related to the performance of the Contract.

NON-DISCRIMINATION/WORKFORCE COMPOSITION FORM FOR NON-CONSTRUCTION CONTRACTS

To assist the City of Berkeley in implementing its Non-Discrimination policy, it is requested that you furnish information regarding your personnel as requested below and return it to the City Department handling your contract:

Attachment D (page 1)

CITY OF BERKELEY
Nuclear Free Zone Disclosure Form

I (we) certify that:

1. I am (we are) fully cognizant of any and all contracts held, products made or otherwise handled by this business entity, and of any such that are anticipated to be entered into, produced or handled for the duration of its contract(s) with the City of Berkeley. (To this end, more than one individual may sign this disclosure form, if a description of which type of contracts each individual is cognizant is attached.)
2. I (we) understand that Section 12.90.070 of the Nuclear Free Berkeley Act (Berkeley Municipal Code Ch. 12.90; Ordinance No. 5784-N.S.) prohibits the City of Berkeley from contracting with any person or business that knowingly engages in work for nuclear weapons.
3. I (we) understand the meaning of the following terms as set forth in Berkeley Municipal Code Section 12.90.130:

"Work for nuclear weapons" is any work the purpose of which is the development, testing, production, maintenance or storage of nuclear weapons or the components of nuclear weapons; or any secret or classified research or evaluation of nuclear weapons; or any operation, management or administration of such work.

"Nuclear weapon" is any device, the intended explosion of which results from the energy released by reactions involving atomic nuclei, either fission or fusion or both. This definition of nuclear weapons includes the means of transporting, guiding, propelling or triggering the weapon if and only if such means is destroyed or rendered useless in the normal propelling, triggering, or detonation of the weapon.

"Component of a nuclear weapon" is any device, radioactive or non-radioactive, the primary intended function of which is to contribute to the operation of a nuclear weapon (or be a part of a nuclear weapon).

4. Neither this business entity nor its parent nor any of its subsidiaries engages in work for nuclear weapons or anticipates entering into such work for the duration of its contract(s) with the City of Berkeley.

Based on the foregoing, the undersigned declares under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

CITY OF BERKELEY
Oppressive States Compliance Statement for Personal Services

The undersigned, an authorized agent of Berkeley Unified Schools (hereafter "Vendor"), has had an opportunity to review the requirements of Berkeley City Council Resolution Nos. 59,853-N.S., 60,382-N.S., and 70,606-N.S., (hereafter "Resolutions"). Vendor understands and agrees that the City may choose with whom it will maintain business relations and may refrain from contracting with those Business Entities which maintain business relationships with morally repugnant regimes. Vendor understands the meaning of the following terms used in the Resolutions:

"Business Entity" means "any individual, firm, partnership, corporation, association or any other commercial organization, including parent-entities and wholly-owned subsidiaries" (to the extent that their operations are related to the purpose of the contract with the City).

"Oppressive State" means: **Tibet Autonomous Region, the provinces of Aho, Kham, and U-Tsang; and Burma (Myanmar)**

"Personal Services" means "the performance of any work or labor and shall also include acting as an independent contractor or providing any consulting advice or assistance, or otherwise acting as an agent pursuant to a contractual relationship."

Contractor understands that it is not eligible to receive or retain a City contract if at the time the contract is executed, or at any time during the term of the contract it provides Personal Services to:

- a. The governing regime in any Oppressive State.
- b. Any business or corporation organized under the authority of the governing regime of any Oppressive State.
- c. Any person for the express purpose of assisting in business operations or trading with any public or private entity located in any Oppressive State.

Vendor further understands and agrees that Vendor's failure to comply with the Resolution shall constitute a default of the contract and the City Manager may terminate the contract and bar Vendor from bidding on future contracts with the City for five (5) years from the effective date of the contract termination.

The undersigned is familiar with, or has made a reasonable effort to become familiar with, Vendor's business structure and the geographic extent of its operations. By executing the Statement, Vendor certifies that it complies with the requirements of the Resolution and that if any time during the term of the contract it ceases to comply, Vendor will promptly notify the City Manager in writing.

Based on the foregoing, the undersigned declares under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Printed Name: Pauline Follansbee Title: Asst. Superintendent Bus. Services
Signature: [Handwritten Signature] Date: 6/1/23

Business Entity: _____

I am unable to execute this Statement; however, Vendor is exempt under Section VII of the Resolution. I have attached a separate statement explaining the reason(s) Vendor cannot comply and the basis for any requested exemption.

Attachment D

CITY OF BERKELEY
Sanctuary City Compliance Statement

The undersigned, an authorized agent of Berkeley Unified Schools (hereafter "Contractor"), has had an opportunity to review the requirements of Berkeley Code Chapter 13.105 (hereafter "Sanctuary City Contracting Ordinance" or "SCCO"). Contractor understands and agrees that the City may choose with whom it will maintain business relations and may refrain from contracting with any person or entity that provides Data Broker or Extreme Vetting services to the U.S. Immigration and Customs Enforcement Division of the United States Department of Homeland Security ("ICE"). Contractor understands the meaning of the following terms used in the SCCO:

- a. "Data Broker" means either of the following:
 - i. The collection of information, including personal information about consumers, from a wide variety of sources for the purposes of reselling such information to their customers, which include both private-sector business and government agencies;
 - ii. The aggregation of data that was collected for another purpose from that for which it is ultimately used.
- b. "Extreme Vetting" means data mining, threat modeling, predictive risk analysis, or other similar services." Extreme Vetting does not include:
 - i. The City's computer-network health and performance tools;
 - ii. Cybersecurity capabilities, technologies and systems used by the City of Berkeley Department of Information Technology to predict, monitor for, prevent, and protect technology infrastructure and systems owned and operated by the City of Berkeley from potential cybersecurity events and cyber-forensic based investigations and prosecutions of illegal computer based activity.

Contractor understands that it is not eligible to receive or retain a City contract if at the time the Contract is executed, or at any time during the term of the Contract, it provides Data Broker or Extreme Vetting services to ICE.

Contractor further understands and agrees that Contractor's failure to comply with the SCCO shall constitute a material default of the Contract and the City Manager may terminate the Contract and bar Contractor from bidding on future contracts with the City for five (5) years from the effective date of the contract termination.

By executing this Statement, Contractor certifies that it complies with the requirements of the SCCO and that if any time during the term of the Contract it ceases to comply, Contractor will promptly notify the City Manager in writing. Any person or entity who knowingly or willingly supplies false information in violation of the SCCO shall be guilty of a misdemeanor and up to a \$1,000 fine.

Based on the foregoing, the undersigned declares under penalty of perjury under the laws of the State of California that the foregoing is true and correct. Executed this 1 day of June, 2022, at Berkeley, California.

CITY OF BERKELEY
Living Wage Certification for Providers of Personal Services

TO BE COMPLETED BY ALL PERSONS OR ENTITIES ENGAGING IN A CONTRACT FOR PERSONAL SERVICES WITH THE CITY OF BERKELEY.

The Berkeley Municipal Code Chapter 13.27, Berkeley's Living Wage Ordinance (LWO), provides that contractors who engage in a specified amount of business with the City (except where specifically exempted) under contracts which furnish services to or for the City in any twelve (12) month period of time shall comply with all provisions of this Ordinance. The LWO requires a City contractor to provide City mandated minimum compensation to all eligible employees, as defined in the Ordinance. In order to determine whether this contract is subject to the terms of the LWO, please respond to the questions below. Please note that the LWO applies to those contracts where the contractor has achieved a cumulative dollar contracting amount with the City. Therefore, even if the LWO is inapplicable to this contract, subsequent contracts may be subject to compliance with the LWO. Furthermore, the contract may become subject to the LWO if the status of the Contractor's employees change (i.e. additional employees are hired) so that Contractor falls within the scope of the Ordinance.

Section I.

1. IF YOU ARE A FOR-PROFIT BUSINESS, PLEASE ANSWER THE FOLLOWING QUESTIONS

a. During the previous twelve (12) months, have you entered into contracts, including the present contract, bid, or proposal, with the City of Berkeley for a cumulative amount of \$25,000.00 or more?
 YES NO

If no, this contract is NOT subject to the requirements of the LWO, and you may continue to Section II. If yes, please continue to question 1(b).

b. Do you have six (6) or more employees, including part-time and stipend workers?
 YES NO

If you have answered, "YES" to questions 1(a) and 1(b) this contract IS subject to the LWO. If you responded "NO" to 1(b) this contract IS NOT subject to the LWO. Please continue to Section II.

2. IF YOU ARE A NON-PROFIT BUSINESS, AS DEFINED BY SECTION 501(C) OF THE INTERNAL REVENUE CODE OF 1954, PLEASE ANSWER THE FOLLOWING QUESTIONS.

a. During the previous twelve (12) months, have you entered into contracts, including the present contract, bid or proposal, with the City of Berkeley for a cumulative amount of \$100,000.00 or more?
 YES NO

If no, this Contract is NOT subject to the requirements of the LWO, and you may continue to Section II. If yes, please continue to question 2(b).

b. Do you have six (6) or more employees, including part-time and stipend workers?
 YES NO

If you have answered, "YES" to questions 2(a) and 2(b) this contract IS subject to the LWO. If you responded "NO" to 2(b) this contract IS NOT subject to the LWO. Please continue to Section II.

Section II

Please read, complete, and sign the following:

THIS CONTRACT IS SUBJECT TO THE LIVING WAGE ORDINANCE.

THIS CONTRACT IS NOT SUBJECT TO THE LIVING WAGE ORDINANCE.

The undersigned, on behalf of himself or herself individually and on behalf of his or her business or organization, hereby certifies that he or she is fully aware of Berkeley's Living Wage Ordinance, and the applicability of the Living Wage Ordinance, and the applicability of the subject contract, as determined herein. The undersigned further agrees to be bound by all of the terms of the Living Wage Ordinance, as mandated in the Berkeley Municipal Code, Chapter 13.27. If, at any time during the term of the contract, the answers to the questions posed herein change so that Contractor would be subject to the LWO, Contractor will promptly notify the City Manager in writing. Contractor further understands and agrees that the failure to comply with the LWO, this certification, or the terms of the Contract as it applies to the LWO, shall constitute a default of the Contract and the City Manager may terminate the contract and bar Contractor from future contracts with the City for five (5) years from the effective date of the Contract termination. If the contractor is a for-profit business and the LWO is applicable to this contract, the contractor must pay a living wage to all employees who spend 25% or more of their compensated time engaged in work directly related to the contract with the City. If the contractor is a non-profit business and the LWO is applicable to this contract, the contractor must pay a living wage to all employees who spend 50% or more of their compensated time engaged in work directly related to the contract with the City.

These statements are made under penalty of perjury under the laws of the state of California.

To be completed by Contractor Vendor

Form EBO-1 CITY OF BERKELEY

CERTIFICATION OF COMPLIANCE WITH EQUAL BENEFITS ORDINANCE

If you are a contractor, return this form to the originating department/project manager. If you are a vendor (supplier of goods), return this form to the Purchasing Division of the Finance Dept.

SECTION 1. CONTRACTOR/VENDOR INFORMATION

Name: Berkeley Unified Schools Vendor No.:
Address: 2020 Bonar Street City: Berkeley State: CA ZIP: 94702
Contact Person: Pauline Follansbee Telephone: 510.644.8593
E-mail Address: paulinefollansbee@berkeley.net Fax No.:

SECTION 2. COMPLIANCE QUESTIONS

- A. The EBO is inapplicable to this contract because the contractor/vendor has no employees.
B. Does your company provide (or make available at the employees' expense) any employee benefits?
C. Does your company provide (or make available at the employees' expense) any benefits to the spouse of an employee?
D. Does your company provide (or make available at the employees' expense) any benefits to the domestic partner of an employee?
E. Are the benefits that are available to the spouse of an employee identical to the benefits that are available to the domestic partner of the employee?

SECTION 3. PROVISIONAL COMPLIANCE

- A. Contractor/vendor is not in compliance with the EBO now but will comply by the following date:
B. If you have taken all reasonable measures to comply with the EBO but are unable to do so, do you agree to provide employees with a cash equivalent?*

* The cash equivalent is the amount of money your company pays for spousal benefits that are unavailable for domestic partners.

SECTION 4. REQUIRED DOCUMENTATION

At time of issuance of purchase order or contract award, you may be required by the City to provide documentation (copy of employee handbook, eligibility statement from your plans, insurance provider statements, etc.) to verify that you do not discriminate in the provision of benefits.

SECTION 5. CERTIFICATION

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that I am authorized to bind this entity contractually. By signing this certification, I further agree to comply with all additional obligations of the Equal Benefits Ordinance that are set forth in the Berkeley Municipal Code and in the terms of the contract or purchase order with the City.

RESOLUTION NO. 70,886-N.S.

CONTRACT: BERKELEY UNIFIED SCHOOL DISTRICT FOR MENTAL HEALTH AND WELLBEING COORDINATOR

WHEREAS, on May 31, 2022, City Council approved a Budget Referral: Fund Mental Health Wellness Support and Services Coordinator at the Berkeley High School Health Center; and

WHEREAS, the approved Budget Referral allocated funding not to exceed \$350,000 for FY 2023 and FY 2024 to support this position; and

WHEREAS, working in partnership with HHCS, Berkeley Unified School District has established a new position, Mental Health and Wellbeing Coordinator, at Berkeley High School, to strengthen, expand, and coordinate services and resources that promote student mental health and wellbeing; and

WHEREAS, the Berkeley Unified School District has been a trusted partner in the implementation of a variety of programs in collaboration with the City; and

WHEREAS, funds in the amount of \$350,000 are available for this contract in the amount of \$175,000 in FY 2023 and \$175,000 FY 2024 in General Fund (Fund 011).

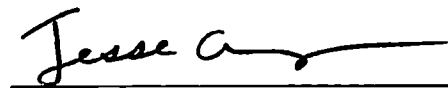

NOW THEREFORE, BE IT RESOLVED by the Council of the City of Berkeley that the City Manager or her designee is authorized to execute a contract with the Berkeley Unified School District for a Mental Health and Wellbeing Coordinator position at Berkeley High School through June 30, 2025 in an amount not to exceed \$350,000. A record signature copy of said contract and any amendments shall be on file in the Office of the City Clerk.

The foregoing Resolution was adopted by the Berkeley City Council on June 13, 2023 by the following vote:

Ayes: Hahn, Harrison, Humbert, Kesarwani, Robinson, Taplin, and Wengraf.

Noes: None.

Absent: Bartlett and Arreguin.

Jesse Arreguin, Mayor

Attest: 
Mark Numainville, City Clerk

EXHIBIT A

SCOPE OF SERVICES

As directed by the Parks, Recreation and Waterfront Department (PRW) California Consulting shall provide grant writing for the following tasks at an hourly rate of services \$125/hour plus reimbursement of any out of pocket expenses.

1. **Needs Assessment:** meetings with Department Head and PM to review priorities and funding needs for PRW (Parks, Recreation and Waterfront).
2. **Facilitation of Department Decision Making Processes:** assist in deciding which grants make the most sense to meet the funding needs identified.
3. **Grant Research and Identification:** conduct thorough research on an ongoing basis, track current and upcoming grant, including what is available and what is recommended for specific project. Regular tracking of grant opportunities on an ongoing basis. California Consulting will provide a Grant Activity Report monthly detailing the grants available, grants in progress and grants submitted.
4. **Grant Preparation Process:** once a grant has been selected California Consulting will develop a checklist and schedule. The checklist and schedule will include what PRW will be responsible for and when those items will need to be submitted. The Project Manager will provide grant portions along the way to review for content accuracy.

A. Below is a list of general tasks for our grant process:

- a. Create a task timeline with due dates
 - b. Ensure the proposed project meets the grant agency's requirements
 - c. Review similar successful grant applications and apply where possible
 - d. Collect information on the project
 - e. Meet with staff to create an accurate scope of work, budget, timeline, narratives, and cost analysis
 - f. Obtain letters of support when necessary
 - g. Draft proposals and send to staff for review
 - h. Incorporate staff edits in final drafts
 - i. Submit completed application timely
 - j. Monitor funding agency until grant awards are announced.
5. **Quality Assurance:** Grant Managers will conduct group meetings with Project Managers regularly and meet individually to review. These meetings thoroughly discuss each PRW need, what grants are being worked on and what additional grants may be a good fit.
 6. **Facilitation of Partnership Meetings:** arrange and schedule meetings with key personnel to review all grants prior to submission to ensure application accuracy.

7. **Timely Submission:** create a precise timeline to ensure the grant is submitted on time and create other deadlines in order to obtain the information needed for quality submission.
8. **Funding Agency Monitoring:** monitor the Funding Agency until grant awards are announced.
9. **Grant Administration:** prepare required agency reports, submit them by the required due date, provide grant reporting and evaluation services.
10. **Monthly Progress Reporting:** prepare a monthly report reflecting grants in progress, grants submitted and grants awarded.

Internal

EXHIBIT B**PAYMENT**

GENERAL: Contract Not to Exceed amount is \$47,000.00 for the term of July 20, 2023 to July 20, 2024.

BILLING: Contractor will submit invoices for services rendered, on a monthly basis.

INVOICES: Invoices must be fully itemized, and provide sufficient information for approving payment and audit. Invoices must be accompanied by receipt for services in order for payment to be processed. **Email invoices to Accounts Payable and cc' Roger Miller at RMiller@berkeleyca.gov**; (List on invoice, **Attn: Roger Miller / PRW**) and reference the contract number.

City of Berkeley
Accounts Payable
P.O. Box 700
Berkeley, CA 94710-700
Email: AccountsPayable@berkeleyca.gov
Phone: 510-981-7310

PAYMENTS: The City will make payment to the vendor within 30 days of receipt of a correct, approved and complete invoice.

APPENDIX S

Berkeley Police Department Updates on Audit Recommendation Status

Office of the City Manager

CONSENT CALENDAR

November 7, 2023

To: Honorable Mayor and Members of the City Council

From: Dee Williams-Ridley, City Manager

Submitted by: Jennifer Louis, Chief of Police

Subject: Audit Recommendation Status - Data Analysis of the City of Berkeley's Police Response

CURRENT SITUATION AND ITS EFFECTS

The City Auditor's report included 2 recommendations. Both of the recommendations have been implemented and the audit is closed. This item was referred to the Public Safety Policy Committee by a Councilmember at the City Council meeting on 5/23/23.

POLICY COMMITTEE RECOMMENDATION

On September 18, 2023, the Public Safety Committee adopted the following action: M/S/C (Taplin/Wengraf) to forward the item to Council with a positive recommendation. Vote: All Ayes.

BACKGROUND

On July 2, 2021, the City Auditor's Office issued its audit, *Data Analysis of the City of Berkeley's Police*¹ This audit report included 2 recommendations. The purpose of this report is to update the Public Safety Policy Committee on the Police Department's completion of the City Auditor's recommendations. In brief, multiple datasets including Crime Mapping, Use of Force, Calls for Service, RIPA, the Arrest and Booking Logs are now published and available on the BPD Transparency Hub. The Transparency Hub also information where there was a documented mental health or homelessness component involved: <https://bpd-transparency-initiative-berkeleypd.hub.arcgis.com/>.

ENVIRONMENTAL SUSTAINABILITY

There are no identifiable environmental effects or opportunities associated with the subject of this report.

Berkeley Police Department can better track mental health and homelessness calls.	2.1	To improve access to data, we recommend the Berkeley Police Department identify all calls for service where there is an apparent mental health issue and/or homelessness component in a manner that protects the privacy rights of the individuals involved.	Police	6/29/2022	<p><u>Status: Implemented</u></p> <p>Starting July 1, 2021, the department formally began utilizing "H" homeless and "MH" mental health disposition codes when closing out any call involving a homeless person or a person with mental health issues. Officers were instructed that they were not required to ask people what their housing status is unless necessary for identification purposes. Unless there are mental health issues which are related to the call, they are not required to ask them what their mental health status is either. Officers are expected to use their best judgement / perception in determining if a call is related to a homeless issue or someone suffering from a mental health issue. If so, they are directed to add the "H" and/or "MH" disposition to the CAD disposition.</p>

Update on Audit Recommendations

DATA ANALYSIS OF BERKELEY'S POLICE RESPONSE

Findings

1. Berkeley Police Department can better track mental health and homelessness calls.
2. The City can improve the transparency of Police Department activity data on the Open Data Portal.

Implementation Status Overview

2 total recommendations

 2 implemented

Recommendation 1.1

To improve access to data, we recommend the Berkeley Police Department identify all calls for service where there is an apparent mental health issue and/or homelessness component in a manner that protects the privacy rights of the individuals involved..

- Starting July 1, 2021, the department formally began utilizing “H” homeless and “MH” mental health disposition codes when closing out any call involving a homeless person or a person with mental health issues. Officers were instructed that they were not required to ask people what their housing status is unless necessary for identification purposes. Unless there are mental health issues which are related to the call, they are not required to ask them what their mental health status is either. Officers are expected to use their best judgement / perception in determining if a call is related to a homeless issue or someone suffering from a mental health issue. If so, they are directed to add the “H” and/or “MH” disposition to the CAD disposition.

Recommendation 2.1

To improve access to data, we recommend the Berkeley Police Department make calls for service data available on the City's Open Data Portal for all call types allowable by Berkeley Police Department policy and law, and update regularly to facilitate transparency. This data should be published in machine ready format, and contain as many years of data as is available.

- Multiple datasets including Crime Mapping, Use of Force, Calls for Service, RIPA, the Arrest and Booking Logs are published and available on the BPD Transparency Hub: <https://bpd-transparency-initiative-berkeleypd.hub.arcgis.com/>.

Kendle Kuechle, Auditor I
Pauline Miller, Auditor I

Staff Shortages: City Services Constrained Staff Retention Challenges and Delayed Hiring

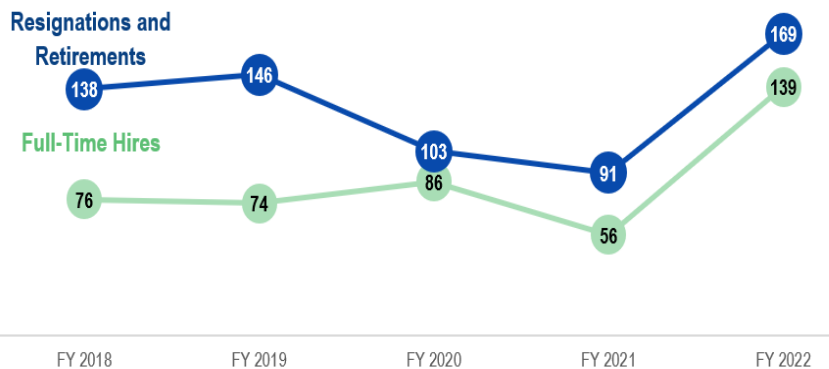

Report Highlights

June 22, 2023

Findings

1. Berkeley's staff shortages constrained city services, but the City did not have a clear strategy to improve retention during our audit period. More employees left the City than were hired in each year of the audit period, contributing to the staff shortage.

Resignations and retirements outpaced full-time hires during the audit period.

Source: ERMA, FUND\$, and NEOGOV

2. Employee dissatisfaction made it harder for the City to retain staff. Surveyed employees reported dissatisfaction with workloads, professional development opportunities, pay, and communication and support from city leadership.
3. Instability in Human Resources delayed hiring and impacted internal services. The average time it took to hire new employees increased from 4.9 months in fiscal year 2018 to 7.7 months in fiscal year 2022.
4. Telework can benefit the City and help retain some employees but the current policy is limited.
5. The City lacked reliable data to monitor trends and address staff shortages.

Recommendations

We recommend that the City establish retention goals, conduct an analysis of staff needed for city services and consider staff capacity around new legislation. We also recommend that the City take steps to address employee satisfaction and improve the recruiting and hiring process. We also recommend that the City expand the telework policy to align with best practices and regularly collect data on employee satisfaction and on diversity, equity, inclusion, and accessibility.

Objectives

1. How do staff shortages affect city services?
2. What is the state of employee satisfaction?
3. What internal factors impact the City's ability to fill vacancies?
4. How does telework affect the City's ability to retain employees?
5. How does the City use data to address staff shortages?

Why This Audit Is Important

Berkeley government has faced difficulties retaining employees, which caused staff shortages that limited the City's ability to provide services to residents. Staff shortages can make workloads for current employees unmanageable, which can drive down morale and worsen employee retention. Combined, these issues can lead to an increase in employee errors, a decrease in the quality of services, and an overall increase in the City's financial risks and other liabilities. The inability to retain employees can also be costly to the City in the long run, as it may be more expensive to hire and train new employees than it is to retain productive employees.

Introduction

We identified employee retention in the City of Berkeley as an area needing independent assessment based on our observation of challenges with employee retention and staff shortages in previous audits.¹ **Employee retention** refers to an organization’s ability to keep employees and reduce turnover. Staff shortages can limit Berkeley government’s ability to provide public services and programs. For example, understaffing in the Police department and 911 dispatch center can increase 911 call response times for the Berkeley community and result in officer burnout and fatigue, contributing to health and safety risks. Understaffing in financial oversight roles can increase the risk of fraud. Employee retention is essential to maintaining enough staff to provide high quality services to Berkeley residents.

¹ Past audits identifying workforce retention issues include an audit of [Police overtime and outside security work](#), an audit of [911 dispatcher staffing and overtime](#), and an audit of the [Code Enforcement unit](#).

Our audit examines the root causes of the City’s retention challenges and provides recommendations to prevent the City from facing a staffing crisis of this magnitude in the future. While some departments have unique retention challenges based on the nature of their work, the purpose of this audit is to understand citywide challenges and provide recommendations to improve retention across all departments. We initially started work on this audit in November 2019, but postponed our work at the onset of the COVID-19 pandemic as audit staff were diverted to the Emergency Operations Center. We resumed this audit in March 2022. In September 2022, the City contracted with consulting firm MRG Associates to develop a separate *Employer of Choice* report. Some themes of this audit are similar to MRG’s report, but our work follows audit standards as specified in the City Charter.

Objectives, Scope, and Methodology

Our objectives were to answer the following questions:

1. How do staff shortages affect city services?
2. What is the state of employee satisfaction?
3. What internal factors impact the City’s ability to fill vacancies?
4. How does telework affect the City’s ability to retain employees?
5. How does the City use data to address staff shortages?

We evaluated employee retention data for fiscal years (FY) 2018 through 2022. We analyzed data on hiring, vacancies, longevity, and employee demographics. To understand employee perspectives, we surveyed current employees about their job satisfaction, and surveyed employees who voluntarily resigned or retired from the City about why they left. We also interviewed every department director in the City and offered to meet with union representatives from employee labor groups. Lastly, we reviewed best practices from leading human resource organizations along with staffing data from local jurisdictions to compare to Berkeley. For more information on the methodology, see page 49.

Background

City of Berkeley’s Workforce

The City of Berkeley has 1,792 budgeted full-time equivalent (FTE) positions as of fiscal year 2023.² The three largest departments are Public Works, Police, and Health, Housing, and Community Services (Table 1).

Table 1. Budgeted Full-Time Equivalent Positions by Department, Fiscal Year 2023

Department	Budgeted FTEs
Public Works	340.00
Police	313.20
Health, Housing and Community Services	265.58
Fire	203.00
Parks, Recreation, and Waterfront	165.62
Planning and Development	116.04
Library	115.60
Finance	56.00
Information Technology	52.00
City Manager	45.50
Rent Board	23.55
Human Resources	22.00
Mayor and Council	19.00
City Attorney	17.00
City Auditor	14.75
City Clerk	10.00
Economic Development	8.00
Office of the Director of Police Accountability	5.00

Source: Berkeley’s FY 2023 and FY 2024 Budget Book

Employee retention is important in government organizations to ensure there are enough staff to deliver services and programs effectively. City of Berkeley staff have a wide range of responsibilities that affect the Berkeley community, including road maintenance, public safety, transportation, housing assistance, city planning, and many others. City staffing challenges can therefore impact almost everyone who lives in, works in, or visits Berkeley.

² Some of these budgeted positions may be vacant.

Retention Challenges

Many employers are currently facing challenges retaining employees. About a year after the onset of the COVID-19 pandemic, people began leaving their jobs nationwide at increasing rates. This phenomenon became known as the Great Resignation. According to a survey by Pew Research Center, around 1 in 5 adults left their job voluntarily during 2021 due to various reasons, including childcare needs, salary, lack of career advancement, COVID-19 concerns, and a desire for more flexibility or work-life balance. The retirement rate also increased nationwide by 13 percent among the baby boomer generation in 2020. In the City of Berkeley, nearly 20 percent of the workforce is eligible for retirement as of 2022, which will increase to 28 percent by 2025. An increase in retirements may worsen retention issues in the coming years. Therefore, improving retention of remaining staff should be a high priority for the City of Berkeley.

Though outside factors such as the Great Resignation provide a larger context for employee retention, workforce retention in Berkeley was a problem before the pandemic and the Great Resignation, which are not solely responsible for citywide retention challenges. Our analysis of employee perspectives provides information on internal factors that affect retention.³

Some level of employee turnover is necessary in healthy organizations. Employees leave for many reasons other than job dissatisfaction, such as retirement or relocation. Employee turnover also allows new talent to enter the organization. However, too much employee turnover becomes costly and makes it difficult for organizations to function. Excessive turnover can also lower the morale of the remaining staff in an organization and impact service delivery.

³ Finding 2 on page 12 outlines the primary causes of employee dissatisfaction leading to retention issues in the City of Berkeley.

Staff shortages constrained city services.

Berkeley had a high vacancy rate, reflecting staff shortages. These shortages have caused reductions in basic services for community members, such as delayed staff responses and facility closures. Though the City's strategic plan includes a goal to attract and retain a talented and diverse workforce, the City did not have a clear and data-driven strategy to improve retention or address the root causes of excessive turnover during our audit period.

Berkeley's high vacancy rate reflected staff shortages.

Berkeley has experienced a staff shortage, as indicated by its vacancy rate (the percentage of budgeted positions that are vacant). Compared to other cities in the Bay Area with available vacancy data, Berkeley's citywide vacancy rate was the second highest at 19 percent in 2022 (Figure 1).

Figure 1. Berkeley had the second highest vacancy rate compared to other Bay Area cities in 2022.

Note: Berkeley and San Francisco vacancy data are from October 2022, and all other data is from June 2022. These were the most recent dates available to compare vacancy rates at the time of our data request.

Sources: City of Berkeley, City of San Francisco Human Resources, City of Oakland Human Resources

Berkeley's vacancy rate is based on counts from department directors in October 2022. Some department directors reported that the high vacancy rate was a problem before the pandemic. However, we were unable to quantify how the vacancy rate has changed over the years due to data limitations (see Finding 5 on page 36 for more information on the City's data challenges).

The City did not hire enough employees to address the gap between voluntary separations (resignations and retirements) and new hires. Figure 2 shows that there were more resignations and retirements than full-time hires in each year of our audit period.⁴ As a result, the cumulative hiring need increased, as the City did not hire enough employees each year to make up for the number of employees who left in previous years.

Figure 2. Resignations and retirements outpaced full-time hires during the audit period.

Note: Full-time hires refers to staff hired into full-time permanent positions. Resignations and retirements do not include medical separations or disability retirements. The data does not include internal transfers or promotions.

Source: ERMA, FUND\$, and NEOGOV

Staff shortages impaired services to the community and other departments.

An increase in vacant positions reduced the number of staff available to ensure city programs and services functioned as intended. In response to our satisfaction survey, some employees explained that staff shortages made it difficult to deliver basic services to the community. According to one employee:

When departments are stretched thin, they cannot do a good job of supporting the community or other departments. [...] When departments experience turnover, it is very difficult to absorb the responsibilities, train new staff, and still deliver baseline services.

⁴ According to the Human Resources Director, from January to March 2023, the City hired more than twice as many new employees as the number of employees who left the City.

In a presentation to City Council on December 13, 2022, the City Manager outlined how vacancies reduced city services. For example, there were reduced services or hours of operation at clinics and senior centers, and temporary closures of some fire stations.

Additionally, understaffing in public safety increased the need for mandatory overtime in both the Police and Fire departments. According to the City Manager, vacancies in the Transportation division have also contributed to delays in a major transportation project. Such delays may limit the City's ability to achieve goals such as reducing greenhouse gas emissions or improving traffic safety.

Vacancies also affected services that some departments provide to support the City's internal operations. For example, according to an Information Technology (IT) manager, understaffing in IT caused delays in technical assistance to employees. These types of delays impact employees' ability to do their jobs efficiently, which can in turn impact the delivery of services to the Berkeley community.

Vacant positions can also increase risk to the City. For example, lack of sufficient supervisory review can increase risk of overpayments, missed payments, or fraud. When employees leave, it may take years for new employees to gain that same level of knowledge.

A high vacancy rate combined with decreased employee tenure (the length of time an employee has worked for an organization) can also impact services if staff do not have institutional knowledge or are not yet fully trained. Departments may also lose specialized knowledge or knowledge of a particular city process when the employee managing that function leaves. One former employee stated:

At the time I began working for [the City], the office culture and knowledge from within was superior. As time went on and more people left, the office began to fail.

Employee tenure varies by department (Figure 3). The two departments with the lowest average employee tenure are the City Attorney's Office and Human Resources (HR). Low average tenure may present challenges to some important internal services due to lost institutional knowledge.

Figure 3. Average Years of Employee Tenure by Department, 2022

Note: Each data point refers to the average employee tenure in each department as of October 2022.

Source: ERMA

The City lacked a clear and data-driven retention strategy.

The City did not have a clear strategic approach during our audit period to address the root causes of excessive turnover and meet its strategic plan goal. The City’s strategic plan includes a goal to attract and retain a talented and diverse city government workforce. According to the 2022 strategic plan update, the City has revised some personnel rules and regulations and expanded employee wellness and resiliency programs in the Police department. The City also implemented the skilled worker academy, an in-depth program for some frontline staff to gain computer skills and other professional skills in September 2022. However, some department directors cited a lack of clarity around an overall retention strategy from city management or HR, or a perception that the City does not have the data and staff to sustain successful retention initiatives. The Society for Human Resources Management, an association of HR professionals, recommends organizations develop targeted strategies to improve retention. Data can help identify the areas where an organization needs to improve and inform strategies to address these issues. During the audit period, the City did not have reliable data on retention and employee satisfaction to inform a data-driven retention strategy (see Finding 5 on page 36 for more information on the City’s data challenges).

Additionally, the City has not conducted an analysis of staffing levels needed for city operations and services. This may include working with department directors to identify the optimal number of FTEs and type of positions in each department, and aligning those positions with the department's goals for successful city operations and services. Based on guidance issued by the Government Finance Officers Association, it is a best practice for governments to determine the optimal level and type of staff needed to meet the organization's goals and objectives in light of cost constraints. It will be difficult for the City to develop targeted strategies to address retention challenges without this data.

Recommendations

To better manage retention, we recommend the City Manager's Office:

- 1.1 Establish citywide retention goals and report to City Council on progress towards those goals biennially.
- 1.2 Conduct a staffing analysis based on critical needs to identify the number and type of full-time equivalent positions needed for successful city operations and services. The City may consider conducting this analysis one department at a time based on available resources.

Some surveyed employees reported dissatisfaction and many have contemplated leaving.

Employee satisfaction is a major factor in employee retention. Fifty-five percent of surveyed employees reported being satisfied with their job, which is lower than a federal government average. Factors impacting satisfaction among survey respondents were workloads, professional development opportunities, pay,⁵ and communication and support from city leadership.

Some City of Berkeley employees reported low job satisfaction and over half have contemplated leaving.

Only 55 percent of current city employees who responded to our survey reported that they were satisfied or somewhat satisfied with their job. This is lower than the job satisfaction rate among federal government agencies, which is 73 percent (Figure 4).

Figure 4. Surveyed City of Berkeley employees reported lower job satisfaction than federal government employees in similar-sized agencies.

Note: Federal employee data is from medium-sized agencies with 1,000-9,999 employees; Berkeley had 1,468 full-time employees as of 2022. Job satisfaction data from local government agencies was not readily available.

Sources: 2022 City of Berkeley employee satisfaction survey and 2022 federal employee viewpoint survey

Many current employees we surveyed also contemplated leaving the City. Over half, or 55 percent of current employees surveyed reported looking for another job in the year before taking the survey. Additionally, about 47 percent of surveyed former employees reported that organizational culture problems were among their primary reasons for leaving the City (Appendix II).

⁵ We did not review city pay structures, as it was outside the scope of this audit.

Employee dissatisfaction is one of the main causes of turnover, according to the Society for Human Resources Management. High turnover is costly and affects an organization’s performance. Benchmarking data estimates that the total cost to recruit, train and develop a new hire may be at least half to two times that employee’s salary.

Some employees reported unmanageable workloads related to staff shortages, new work, and inefficient systems.

Some surveyed employees reported that one of the primary reasons they looked for a job in the past year was because they had a high workload due in part to staff shortages. Only 44 percent of current employees felt their workload was manageable (Figure 5). For comparison, in a survey of federal government employees, 61 percent agreed that their workload was reasonable. Nearly a quarter of surveyed former employees also listed high workload as one reason for leaving the City.

Figure 5. Forty-four percent of surveyed employees reported that their workload was manageable.

Source: 2022 satisfaction survey

Staff Perspectives

“There are not enough positions in my unit for the workload. I have demonstrated this time and again, and the solution from management has been for me, as the lowest level employee in my functional area exempt from overtime, to work 50 hours a week or more.” – Current employee

“The department I worked for was understaffed and lacked the resources to support city employees. I was provided insufficient training and had trouble keeping up with the workload. The workload and lack of support were primary reasons why I opted to look for new opportunities less than six months after starting at the City of Berkeley.” – Former employee

“When there are vacancies, it affects staff’s ability to do the work. It also impacts morale when people are stressed out. Some people left the department due to the unreasonable volume of work they were expected to produce.” – Department director

Sources: 2022 exit and satisfaction surveys, employee interviews

One department director also noted that certain job descriptions are out of date, which can make it difficult to recruit new employees to fill vacancies and help relieve the workload for current employees. The Chair of the Personnel Board also stated that the City has not reviewed certain job descriptions in recent years. Updated job descriptions can help ensure that city job postings accurately reflect job duties.

Employees receive new work beyond their regular duties, including referrals from City Council or public commissions, or additional items assigned in each department as noted in the *Employer of Choice* report.⁶ Some employees reported that because service delivery expectations remained the same when their department or division lacked adequate staffing, they were overloaded with work during periods of short staffing, which compounded their already unmanageable workload. City Council has a process to prioritize referrals to staff, though that process was not used in fiscal year 2020 and fiscal year 2021 due to the COVID-19 pandemic. However, it does not include a formal method of accounting for staffing impacts when assigning additional work. Without limiting or prioritizing referrals based on staff capacity, staff may not be able to balance council referrals with their regular duties or providing baseline services.

Employee workload is also exacerbated by ineffective internal and administrative systems. As one department director stated, “The substandard internal systems we have make a lot of our work inefficient.” This includes software systems such as ERMA, the City’s financial management platform. The City switched to ERMA from FUND\$, their prior HR/payroll management system, in January 2021. Some employees explained that this transition added to their workload significantly. Other employees described city systems as antiquated, with IT assistance, timesheets, telephones, and key access cited as examples. Some technology and system issues may be affected by retention challenges if an employee in charge of managing a system is new or not fully trained. Some employees and department directors expressed a sense that internal systems are outdated and hard to use, which is a source of frustration and affects their ability to do their jobs efficiently.

⁶ Council referrals are short or long-term projects assigned to departments based on City Council’s direction. Since the City starting tracking referrals in 2014, there have been approximately 500 referrals assigned. About 255 of the referrals are completed, 18 are in progress, and the rest have not yet been started or have been rejected by Council action.

Opportunities for professional development were limited.

Lack of career opportunities impacted retention.

Some surveyed employees reported dissatisfaction with career advancement opportunities in the City. Approximately 27 percent of surveyed former employees cited inadequate promotional opportunities as one of their primary reasons for leaving the City of Berkeley. Forty percent of surveyed current employees were also dissatisfied with their career advancement opportunities, compared to 41 percent who were satisfied, with 19 percent neutral (Figure 6).

Figure 6. Forty percent of surveyed employees reported being dissatisfied with career advancement opportunities.

Source: 2022 satisfaction survey

Staff Perspectives

“The promotions process is ambiguous and not transparent. People get promoted and those who do not are left wondering what they could have done to improve themselves and their chances for promotion. The promotional criteria are a mystery. Rather than continue waiting for a possible promotion, I decided to retire.” – Former employee

“Berkeley does not have many opportunities for advancement which has caused some people to leave the department.” – Department director

Source: 2022 exit survey, employee interviews

Berkeley is a mid-sized city, therefore options for career advancement might be more limited than in larger jurisdictions. However, there may be opportunities to improve promotional pathways through succession planning with a cross-training component. Succession planning identifies long range needs and cultivates internal talent to meet those needs and prepare for new roles in the organization. Cross-training is an approach to employee development that places employees in a position to learn skills and abilities that are not part of their current roles. The City can use cross-training in conjunction with succession planning to facilitate knowledge and skill transfer to current employees, which can help them meet the qualifications for future career advancement.

Though some departments have an internal succession planning process, there was no citywide initiative during the audit period. The City listed succession planning as a priority in its 2018-2019 Strategic Plan report, but placed the project on hold during the pandemic according to a July 2022 update. A stronger effort to upskill employees could help Berkeley better prepare for future retirements while broadening career advancement opportunities.

Providing adequate professional development opportunities is a best practice for employee retention. Employees will be more likely to remain at an organization if they are able to improve their job title, salary and/or responsibilities. This can help ensure that programs continue to run successfully through staffing changes, ultimately benefiting the Berkeley community.

Over half of surveyed employees did not receive regular performance evaluations.

Sixty-seven percent of surveyed employees reported that they did not receive a performance evaluation in the prior year. However, it is difficult to determine how often evaluations were happening and how that varied by department, as HR does not consistently keep records of past employee performance evaluations.

67%

of surveyed employees reported that they did not receive a performance evaluation in the past year.

Along with constructive guidance and regular feedback, performance evaluations are one component of successful employee performance management. Well-functioning performance management programs improve individual and team performance, and make organizations more effective. Performance evaluations also allow supervisors and employees to discuss areas for skill development, and identify learning opportunities for future advancement.

Some surveyed employees were dissatisfied with trainings and professional development opportunities.

Trainings and professional development opportunities are essential for employee satisfaction and can support career growth. Continuous skill development ensures employees have the tools they need to succeed, and it helps organizations retain top talent. However, many current employees reported dissatisfaction with Berkeley's available training opportunities. Among surveyed employees, 40 percent were dissatisfied with citywide trainings and professional development opportunities, compared to 27 percent who were satisfied, with 33 percent neutral (Figure 7).

Figure 7. Forty percent of surveyed employees were dissatisfied with citywide training and professional development opportunities.

Source: 2022 satisfaction survey

Staff Perspectives

“Citywide training and professional development opportunities are nearly non-existent. The training opportunities that do exist are generally subpar and not many employees know how to access them.” – Current employee

“Citywide training has a great deal of room for improvement and offers no tailored opportunities for public safety, which has different challenges than other departments.” – Current employee

“The City should be intentional in its efforts to prepare all employees who transition into leadership roles. To have high expectations of our supervisors, we should provide meaningful training and education so they are better prepared for these critical roles throughout the City.” – Department director

Source: 2022 satisfaction survey and employee interviews

Among surveyed supervisors, 40 percent found their citywide supervision training inadequate, compared to 38 percent who found it adequate (22 percent neutral). Supervisors are an important resource to the City in employee retention and satisfaction. Thirty-five percent of former employees who responded to our survey stated that a poor relationship with their supervisor was a primary consideration for leaving the City. This indicates that the relationship between supervisees and supervisors is a factor in retention. The City used to organize a leadership development program for supervisors, but has not conducted that training since prior to the pandemic. Consistent citywide training for supervisors may help foster a positive relationship with supervisees and improve retention.

Prior to March 2020, many trainings received positive evaluations. The City put a pause on most trainings at the start of the COVID-19 pandemic in March 2020. The City resumed some regular trainings in June of 2021 and developed more trainings in 2022. The skilled workers academy is one example of a comprehensive training program that the City started in 2022 to help some employees develop professional skills and computer skills, among others. However, there are not similar professional development opportunities available for employees at all levels across all departments, and current dissatisfaction levels with city trainings suggest a need for improvement in this area. According to the HR Director, the City is currently looking at ways to provide specialized training to more employees.

HR's training division also had record keeping challenges during the audit period. California law requires that all employers of five or more people provide one to two hours of sexual harassment prevention training to staff every two years. According to the HR Director, since at least 2022 the City has been out of compliance with state-mandated sexual harassment prevention training. Due to inadequate data, we were unable to determine how long the City has been out of compliance with this law. In March 2023, the City set a goal to ensure all employees complete mandatory trainings by December 31, 2023.

Some surveyed employees were dissatisfied with pay.

Pay was a common issue among surveyed employees, and some department directors also reported issues with pay. We did not perform a salary analysis of Berkeley's compensation compared to market rates for similar positions as it was outside the scope of this audit. However, there are opportunities to improve retention by addressing some specific issues in Berkeley.

Some employees and department directors expressed in surveys and interviews that dissatisfaction with pay impacts employee retention. Thirty-seven percent of employees surveyed were dissatisfied with their compensation, while 47 percent were satisfied (16 percent neutral). Comparatively, 56 percent of federal employees were satisfied with their pay in 2022. Satisfaction survey data also shows that the longer employees worked for the City, the less satisfied they generally were with their compensation (Figure 8).

Figure 8. Pay satisfaction generally decreased as employee tenure increased.

Source: 2022 satisfaction survey

When asked to elaborate on pay and benefits, some surveyed employees expressed perceptions that their pay is not commensurate with their job duties. One department director noted that some staff are underpaid relative to staff performing the same work in other jurisdictions. Other surveyed employees expressed dissatisfaction with differences in pension benefit compensation. According to a 2019 report from union members, there is a significant difference in pension benefit compensation between Classic and California Public Employees’ Pension Reform Act members represented by Local One and Service Employees International Union bargaining groups, as well as unrepresented employees.⁷ Additionally, many surveyed employees expressed a perception that the City’s cost of living adjustments (COLAs) to salaries are inadequate, or that the City needs to develop a plan to have more frequent COLAs.

⁷ The California Public Employees’ Pension Reform Act (PEPRA) took effect in January, 2013. The law changed the way the state’s public employee retirement and health benefits are applied, and placed compensation limits on new members. In the City of Berkeley, the Pay Equity Committee for PEPRA members noted in 2019 that Classic members contributed 8.64 percent of their paycheck to the pension fund, whereas PEPRA members contributed 15.25 percent. In 2022, the City agreed to reduce some PEPRA members’ pension contributions, though the terms of that ramp down varied by bargaining group.

The City typically renegotiates certain elements of employee pay about once every three years with each employee union. In the satisfaction survey, some employees expressed perceptions that the City's pay system is inflexible or unfair based on workload, classification or job duties. Pay may also be a factor in the recruitment and retention of specialized positions. Some specialized positions are particularly hard to recruit for based on the labor market. For example, some hiring managers stated that it has been difficult for the City to recruit firefighters, engineers, and mental health clinicians, among others, which may be related to the labor market in those fields. One director noted that this difficulty in recruiting made it hard to fill vacancies, which contributed to burnout among employees. Identifying ways to ensure that pay is competitive may improve recruitment and retention of these positions.

Staff Perspectives

"Positions, job duties, and classifications are not equitable. People doing basically the same job but in different classifications can have upward of a \$30k difference in pay."

– Current employee

"I realize terms are limited by union agreements, but it is my opinion that the compensation system is not nimble and cannot respond to the severe cost of living conditions at this time. Wage increases seriously lag the cost of living, and cannot adequately respond to current inflation conditions." – Current employee

Source: 2022 satisfaction survey

High turnover is costly, therefore organizations that invest in employee compensation may avoid recruitment and hiring costs that come with turnover. While the City must consider available revenue streams when making pay decisions, improved retention may ultimately lead to reduced turnover costs for the City. Ensuring pay is commensurate with comparable jurisdictions is frequently cited as an important aspect of employee retention.

Communication and support from city leadership may have impacted employee satisfaction.

Almost half, or 48 percent, of surveyed employees did not feel that city management communicated well when making decisions that affect Berkeley employees, compared to 23 percent who were satisfied with city management's communication, with 29 percent neutral (Figure 9). When asked to elaborate, surveyed employees gave examples including too little communication from city management, confusing communication, lack of transparency in communication, and too few opportunities to provide feedback.

Figure 9. Almost half of surveyed employees did not believe city management communicates well when making decisions that impact employees.

Source: 2022 satisfaction survey

One example of insufficient communication was a lack of clarity around COVID-19 policies. In the satisfaction survey, some employees expressed confusion around COVID-19 reporting, notifications, or inconsistencies around mask policy enforcement upon returning to the office. Lapses in communication can increase risk to the City and employees if they are not connected to the correct resources during emergencies, disasters or other important situations. For example, one employee described receiving inadequate information from city management around safety issues such as threats to employee safety. Effective communication is also important in building employee morale, satisfaction, and engagement.

Maintaining frequent and organized internal communication is often listed as a best practice for employee retention. Effective communication is essential for proper employee management, as it helps employees understand the terms of their employment, gives employees opportunities to provide feedback which is important for internal satisfaction, and reduces potential employee grievances due to misunderstandings.

Staff Perspectives

“I believe the translation of what city management is asking or saying gets lost when transferring the information back to the individual departments. Like a bad game of telephone, you get some of the information, none of the information, or a lot of bad information.” – Current employee

“I feel far removed from city management and that I am the last to find out about decisions from city management. I wish there was a way to bridge this gap.” – Current employee

Source: 2022 satisfaction survey

Lack of support from city or department management was among the most common reasons why surveyed employees looked for another job in the year prior. Additionally, 46 percent of surveyed employees reported that they did not believe city management cares about employees, compared to 27 percent who did (27 percent neutral). These responses suggest there may be opportunities for city and department leaders to build stronger communication with employees and develop strategies to ensure employees feel adequately supported at all levels of the organization.

Recommendations

To ensure job duties align with job descriptions, we recommend the City Manager's Office:

2.1 Review the highest priority city job descriptions to ensure they accurately reflect job duties.

To alleviate workloads associated with Council referrals, we recommend:

2.2 City Council consider staff capacity when introducing new legislation, and limit or prioritize new legislation during periods of short staffing.

2.3 The City Manager's Office report on the status of approved projects to City Council, including information about delays caused by staff vacancies.

To improve employee satisfaction, we recommend the City Manager's Office:

2.4 Improve pathways for promotion in the City through a citywide succession plan, which may include cross-training for positions.

2.5 Direct departments to ensure that all employees receive an annual performance evaluation.

To improve employee satisfaction, we recommend Human Resources:

2.6 Implement a comprehensive training program that ensures staff at all levels receive the training they need to fulfill their job duties and develop their job skills as needed. Consider increasing the training budget and redesigning the training curriculum to best address the needs of a post-pandemic workforce, improving training for supervisors and managers, ensuring that experts conduct trainings, and allowing employees to request specific trainings.

To improve transparency, we recommend Human Resources:

2.7 Ensure that all city employees complete mandatory trainings in accordance with the state law. Report data on mandated trainings to Council annually.

We also recommend the City Manager's Office:

- 2.8** Update City Council on the recruitment status of hard-to-fill positions during the biennial budget process, as well as steps taken to fill these positions.
- 2.9** Identify positions that are hard-to-recruit and retain and consider reassessing pay for those positions.

To improve communication channels in the City, we recommend the City Manager's Office:

- 2.10** Assess employees' needs regarding communication from the City Manager's Office and design a communication strategy that addresses those needs.

Instability in Human Resources delayed hiring and impacted internal services.

The average time it takes to hire increased by almost three months between fiscal years 2018 and 2022, from 4.9 months to 7.7 months. Understaffing and instability in HR contributed to these hiring delays during our audit period. Additionally, increases in the number of budgeted positions in HR did not keep pace with increases in budgeted positions citywide. Thus, remaining staff in HR were burdened with heavy workloads to manage the City’s hiring needs. There are opportunities for HR to improve citywide hiring practices as well as onboarding for new employees.

The average time to hire increased by almost three months.

One of HR’s established performance measures is to reduce the average time to hire each year, but it has increased since fiscal year 2018. According to Berkeley’s internal hiring data, the average time it takes for Berkeley to hire new employees increased from 4.9 to 7.7 months between fiscal years 2018 and 2022 (Figure 10).⁸ During the audit period, HR did not hire fast enough to address the growing gap between resignations and retirements compared to new hires as shown in Figure 2 (page 8).

Figure 10. The average time to hire increased since fiscal year 2018.

Source: NEOGOV

⁸ The time to hire calculation measures the average time between the date the department created a requisition to hire a new employee and the date of the employee’s first day on the job.

One explanation for the hiring timeline increase may be the citywide hiring freeze that lasted from April 2020 to September 2022. The City asked departments to suspend all hiring activities, though they could request exceptions to be approved by the City Manager on a case-by-case basis. The additional approval may have lengthened the hiring timeline.

Another factor of the increased hiring timeline may be HR’s instability due to their staff shortage. HR had the highest vacancy rate among departments in October 2022, at 45 percent (Figure 11). HR’s vacancy rate more than quadrupled between 2018 and 2022, from 10 percent to 45 percent.⁹ Therefore, fewer HR staff were available to work on hiring and filling vacancies in other departments. There was also a loss of institutional knowledge in the department when many employees departed. Some positions turned over multiple times—26 HR employees left the City between fiscal year 2018 and fiscal year 2022. For context, HR was budgeted to have 21 FTEs in fiscal year 2018, and 22 FTEs beginning in fiscal year 2020. As of September 2022, the average employee tenure in HR was 3.1 years compared to the citywide average tenure of 10.4 years. According to the Society for Human Resources Management, losing key employees can impact workflow and result in productivity losses. These impacts were felt around the City, as HR provides hiring support and other internal services to every department.

Figure 11. Human Resources had the City’s highest vacancy rate in October 2022.

Source: Department directors

⁹ This number is based on a point-in-time count using payroll data from October 2018 and a department director interview from 2022.

There has additionally been instability within HR leadership. During the audit period, there were four different people in the role of HR Director. Leadership turnover can lead to organizational instability, lower employee morale and productivity, and decrease employee retention.

In addition to vacancy challenges, the number of budgeted positions in HR has not kept pace with citywide increases in the number of FTEs. The City added about 126 additional full-time positions between fiscal years 2018 and 2022, but only one of these new positions was allocated to the HR department. According to the HR Director, the 126 new positions increased recruitment and hiring demands, as well as the need for HR support in areas including transactions, training, employee relations, benefits, equal employment opportunity investigations, occupational safety, and workers' compensation. The HR Director also noted that some of these HR functions were staffed by a single member of the department. If a staff member took time off or left the City, there may have been no one managing an essential HR function. This combined with HR's high vacancy rate may have contributed to the issues with personnel data we discuss in Finding 5 on page 36.

HR was faced with a cyclical problem over the audit period: the City's average time to hire increased (Figure 10) due in part to lack of staff capacity in HR (Figure 11). Some former employees reported that they left the City because of an unmanageable workload tied to staff shortages, which only increased the overall number of vacancies for HR to help fill. The *Employer of Choice* report also identified the importance of investing in HR and recommended hiring up to six additional FTEs in HR. As of May 2023, City Council authorized HR to hire three additional HR staff members.

HR is now in the process of stabilizing. As of May 2023, HR has staffed 95 percent of the department's original 22 FTEs. Other department directors have noticed a positive change, with one stating:

The team that has been assembled is responsive, informative, and has demonstrated an ability to support our needs, which is not an easy task. Having an effective, responsive and knowledgeable HR team is critical to maintaining operations throughout the City and I am so grateful to the team as I know how hard they are working to support us.

Ineffective procedures may have contributed to hiring challenges.

There are opportunities for HR to modernize, streamline, and standardize hiring procedures. Updating hiring processes can help the City attract and hire qualified candidates in order to fill vacancies.

HR did not generally use modern hiring processes during the audit period. For example, HR has not historically used LinkedIn, or other job boards such as college and university job boards as recruiting platforms. Additionally, according to one manager, application processes could be lengthy due to multiple supplemental questions included in the application. Best practices for hiring recommended by the Society for Human Resources Management include using social media to advertise positions, making sure the application process is streamlined and easy-to-use, and collaborating with universities, colleges and high schools to increase the applicant pool. Some department directors also expressed that the management approval process for new positions slowed down the hiring process.

HR did not provide department hiring managers with comprehensive procedures or trainings for the hiring process during the audit period. One department director stated that they never received any training from HR on citywide recruitment processes, and they had to learn the City's hiring system NEOGOV on an ad hoc basis.¹⁰ The former Interim HR Director also noted that the department had no one to train HR employees on how to use NEOGOV. According to the current HR Director, HR has recently developed trainings on the City's hiring process and how to use NEOGOV, and they have conducted these trainings with some departments. The HR Director also stated that every department now has an assigned HR analyst who works with departments to strategize for recruitments.

Some surveyed employees reported inadequate onboarding.

Thirty-eight percent of surveyed employees did not believe that HR provided them with adequate onboarding to the City, compared to 36 percent who did (26 percent neutral). Onboarding involves providing the employee with the tools and information they need to become a productive member of the team. According to the Society for Human Resources Management, a well-designed onboarding process can improve employee engagement and retention.

38%

of surveyed employees did not think HR provided them with adequate onboarding to the City.

¹⁰ NEOGOV is a talent management system used by many public sector agencies, including the City of Berkeley. The City uses NEOGOV software to support the City's hiring process.

Of the surveyed employees who answered demographic questions, 51 percent of employees hired within the past two years were dissatisfied with their onboarding, compared to 37 percent of employees hired before then. This may indicate that the quality of the City's onboarding process has declined in recent years. This time period overlaps with the COVID-19 pandemic, which may have impacted employees' onboarding experiences. Nevertheless, it is still important to ensure employees receive adequate onboarding so that they feel welcomed and understand their role and responsibilities.

Recommendations

To improve hiring procedures, we recommend the City Manager's Office:

- 3.1** Assess the level of staff and resources needed to meet the City's recruitment and hiring needs. Prioritize filling these positions when vacancies in this area fall below a level that would jeopardize the City's ability to hire quickly.
- 3.2** Assess the approval process for hiring new employees and identify opportunities to reduce inefficiencies.

We also recommend Human Resources:

- 3.3** Develop and execute a plan to modernize recruitment and hiring using social media and community engagement.
- 3.4** Communicate standard procedures and trainings for NEOGOV and the City's hiring process to all department heads and hiring managers.
- 3.5** Improve the employee onboarding process so employees have the tools and information they need to do their jobs.

Telework can benefit the City but the current policy is limited.

Among surveyed employees who were able to telework, 64 percent reported being satisfied with their experience. In addition to other benefits, telework may help retain employees by increasing employee satisfaction, performance, and commitment to the organization. It may also serve as a draw to potential applicants. Telework may also produce additional environmental and financial benefits to the City. Still, the current telework policy is not comprehensive and lacks accountability.

Most surveyed city employees report being satisfied with telework.

In March of 2020, the City began allowing some employees the option to telework in response to the COVID-19 pandemic. The City prohibited teleworking prior to 2020. This policy was implemented quickly due to the pandemic emergency, and there has not been much analysis on the impact of telework on employees. Therefore, we asked current employees about their satisfaction with telework.

Sixty-seven percent of all survey respondents believed they could do some or all of their work remotely, while 33 percent did not. Though some employees cannot telework based on their job duties—public safety officers, maintenance workers, and others—the majority of city employees have some job duties that can be done remotely. Of the employees we surveyed who were able to telework, 64 percent reported being satisfied with their experience. Only 15 percent reported being dissatisfied with telework (21 percent neutral). When asked to elaborate on their telework responses, the majority of employees described the positive impacts of telework on their life. This included decreased commute time, improved job satisfaction, improved work-life balance, and improved workplace safety. Seventy-five percent of surveyed employees who telework reported still feeling connected to their colleagues. Fifty-two percent of surveyed employees who telework also stated they would look for other employment if they are not able to telework at least some of the time. This indicates that telework is an important factor in retaining Berkeley employees.

52%

of surveyed employees who telework said they would seek other employment if the City removes the option to telework.

Staff Perspectives

“I am grateful for the City’s decision to continue telework. It allows me to save time and money on commuting. [...] My colleagues and I all work effectively from home and stay connected via phone, email, Teams chat and conference calls. Remote work is a primary consideration for staying with the City.” – Current employee

“Being able to telework is a fantastic aspect of working with the City. The City’s COVID rules are rarely followed in the offices, so being able to cut down on exposure time is great, especially because I have a young infant and an immunocompromised spouse at home.” – Current employee

Source: 2022 satisfaction survey

Telework is one method of reducing employee commute times, which may increase employee satisfaction. Many City of Berkeley employees have long work commutes, as only 17 percent of full-time employees live in Berkeley. The majority of surveyed employees reported commuting 30 minutes or more to their worksite, with a quarter reporting a commute of an hour or more (Figure 12). Telework can therefore alleviate the burden of a long commute for these employees and the time spent commuting can be replaced with something more valuable to the employee.

Figure 12. A quarter of surveyed employees reported commuting an hour or more to work.

Source: 2022 satisfaction survey

Telework likely increased employee wellbeing and overall satisfaction for those who were able to telework during the pandemic, but some employees expressed needing telework policies that were fairer and more flexible. Over a quarter of surveyed employees expressed that they did not feel safe going to their worksite because of COVID-19. In open-ended survey responses, employees expressed different opinions regarding COVID-19 safety. Some believed the City provided enough protection around the virus, while others expressed concern about contracting COVID-19 at their worksite. Some felt that the City was inflexible around telework allowances, even for employees with underlying health conditions.

Telework may have additional benefits to the City.

There may be additional recruitment, environmental, financial, and disaster preparedness benefits associated with telework.

Telework can improve the recruitment pipeline by increasing the pool of available applicants to city positions. Many job seekers specifically look for flexible and remote working arrangements in an organization, therefore, Berkeley may be a more attractive employer by offering telework. Additionally, if Berkeley lacks funding to invest in improving workspaces, allowing employees to telework is one way to remain competitive with other organizations hiring from the same candidate pool. Other government organizations are also responding to job seekers' increased desire for telework. A recent NEOGOV survey of public sector HR directors found that 30 percent of organizations had expanded telework opportunities in order to attract more job candidates. This number will likely increase in the coming years as the public sector adapts to changing workforce norms.

Telework can also reduce carbon emissions created from employee commutes. An analysis of carbon emissions shows that if full-time career employees commute to Berkeley five days a week, this will generate approximately 4,307 metric tons of carbon annually. By allowing employees to work from home, the City can reduce its carbon footprint generated by employee commutes. We estimate that the City could reduce carbon emissions tied to employee commutes between 575 and 1,724 metric tons per year depending on the level of telework (Figure 13). Decreasing the emissions from employee commutes also aligns with Berkeley's Climate Action Plan goal to reduce the year 2000 emission levels by 80 percent by 2050.

Figure 13. Telework can reduce the amount of CO₂ produced by employee commutes.

Note: This calculation assumes 67 percent of full-time, career employees are participating in telework program. The current telework policy states employees can telework up to three days per week. We did not receive information on the number of city employees teleworking or how often they are teleworking.

Source: Berkeley City Auditor analysis

Telework can potentially reduce some costs for the City. Based on an analysis conducted by Global Workplace Analytics, *Telework in the 21st Century*, employers can save an estimated \$11,000 per half-time telecommuter per year.¹¹ Their estimate includes cost savings as a result of increased productivity, lower real estate costs, reduced absenteeism and turnover, and better disaster preparedness. We did not conduct an analysis of potential savings in the City of Berkeley.

Having a telework plan is a critical component of any emergency operations plan. During the COVID-19 pandemic, telework allowed the City to continue providing essential city services when employees could not be in their normal worksites. However, because the City did not have any teleworking policy or practice in place prior to the pandemic, there was no infrastructure in place for employees and managers to transition to working remotely. Having a practiced and thorough telework program would enable the City to adapt quickly to any event requiring the closure of city buildings without compromising service delivery.

¹¹ *Telework in the 21st Century*: <https://globalworkplaceanalytics.com/telecommuting-statistics>

The telework policy is not comprehensive and lacks accountability elements.

Despite employees' overall support for telework, the City's existing telework policy is not comprehensive, and does not address accountability issues. In February 2023, the City indicated that the telework policy would continue indefinitely after notifying employees that the COVID-19 masking and vaccine mandates would end at the end of that month. As of May 2023, no updates were made to create a more robust, long-term policy, though the contractor that produced the *Employer of Choice* report was developing a hybrid workplace best practices guide. One city employee union also pointed out the need for predictable and fair work from home policies as telework continues. A comprehensive telework policy should define eligibility, work expectations, and equipment and resource requirements.

Staff Perspectives

"Accountability needs to be redefined to make telework successful. Rather than physical presence as a measure of productivity, there should be performance benchmarks linked to clear goals with timeframes to make telework more equitable across the City. It would refocus accountability on results rather than physical presence (which is a poor indicator of productivity anyways)." – Current employee

"The City needs to identify ways to increase accountability in teleworking for it to be sustainable." – Current employee

"Berkeley doesn't provide a lot of guidance on telework policies, so we aren't able to give candidates clear information on how much flexibility they can expect." – Manager

Source: 2022 satisfaction survey, employee interviews

In open-ended survey responses, 24 employees expressed feeling that there are equity issues between teleworking and non-teleworking staff. According to a peer reviewed study, a perceived telework disparity can potentially lead to job dissatisfaction, a decrease in productivity, and difficulty retaining non-teleworking employees.¹² Transparency is one way to reduce perceived telework disparity. To realize the maximum benefits of teleworking, practices and policies should be made as transparent as possible. Additionally, teleworkers should provide their telework schedule and availability as well as having regular and fixed times to give updates to supervisors and colleagues.

¹² A Dark Side of Telework: A Social Comparison-Based Study from the Perspective of Office Workers: <https://rdcu.be/c8plU>

Updates to the telework policy can help improve transparency and encourage accountability. The current telework policy does not contain eligibility guidance, but leaves the determination of eligibility up to departments. It states that workers must be available by phone, email, or other specified method of communication during scheduled work hours, and it requires each remote worker to indicate how often they will check their email or phone during the workday. However, there appears to be no best practice guidelines in Berkeley's policy for these communication levels, and no accountability element if a remote employee is unresponsive. Berkeley's policy also does not require supervisors to justify their decision to deny telework requests.

Additionally, it is unclear which standard work equipment the City can provide to teleworkers. The policy only states that employees should contact their supervisor if they need equipment, but offers no guidance to supervisors on what they are allowed to provide to teleworkers. One department director said that the City did not consistently offer adequate training for supervisors of teleworking employees during the audit period.

The State of California, Alameda County, and the City and County of San Francisco developed comprehensive telework policies and guides for their employees (Table 2). These telework policies all require employees to receive training before teleworking, as well as specific trainings for supervisors to effectively manage their teleworking teams. These policies also outline a clear process for requesting equipment. Alameda County's policy has a checklist that managers must review before allowing a supervisee to telework, to ensure that the employee will be successful. Supervisors in the State of California and Alameda County are additionally required to justify their decision to deny or request a modification to employees' telework requests.

Table 2. The City of Berkeley does not have a comprehensive telework policy.

Elements of a Comprehensive Policy	State of California	Alameda County	City and County of San Francisco	City of Berkeley
The policy requires employees to be available for contact while teleworking.	✓	✓	✓	✓
The policy states that employees must comply with health and safety requirements at their telework site.	✓	✓	✓	✓
The policy has specific eligibility guidance.	✓	✓	✓	✗
The policy has clear communication guidelines and expectations.	✓	✓	✗	✗
There is an accountability element for unresponsive employees.	✓	✓	✓	✗
There are clear instructions for requesting equipment.	✓	✓	✓	✗
There are training resources and requirements.	✓	✓	✓	✗
Supervisors must provide justification for denying telework requests.	✓	✓	✗	✗

Source: State of California telework guide, Alameda County telework policy, City and County of San Francisco’s teleworking policy, City of Berkeley telework policy

Recommendations

To improve the telework policy, we recommend the City Manager’s Office:

- 4.1 Identify ways of reducing unused space in city buildings to save on overhead costs. This initiative may require additional resources beyond city staff.
- 4.2 Expand the citywide telework policy to include elements that align with best practices. This can include eligibility, employee accountability, equipment requests, telework training, and justifications for denying employee requests to telework.

The City lacked reliable data to address staff shortages.

Berkeley did not maintain accurate data to track retention trends. The City's internal personnel data system, ERMA, was unable to produce reliable reports on vacancy and turnover rates during our audit period. Inaccurate data may impact the City's service delivery if it cannot identify and respond to department vacancies or staff shortages in real-time. The City also has not consistently collected data on employee satisfaction. HR has not consistently sent exit surveys to departing employees or shared the data with departments. Additionally, city management has not reported sufficient data in recent years to track progress towards its diversity, equity, inclusion and accessibility goals and identify opportunities for improvement.

The City did not have reliable data on retention trends.

According to data systems owners in the City, ERMA was unable to produce reliable vacancy reports during our audit period. This means department directors did not receive vacancy data from HR and had to manually calculate vacancy rates. The **vacancy rate** is the percent of vacant positions within an organization. ERMA was also unable to produce accurate turnover reports during the audit period. The **turnover rate** measures the number of employees who leave in a given time period. Due to the City's data challenges, we could not report on any information regarding employee turnover.

Table 3. Key Retention Data Was Unreliable

Data	Definition	Status
Vacancy rate	Percent of total positions that are vacant.	Unreliable
Turnover rate	Percent of employees to leave an organization during a given time period.	Unreliable

Source: Auditor conclusion

Calculating turnover allows organizations to monitor the movement of employees out of an organization over a specific time period rather than a single point in time. Tracking data on employee retention such as vacancies and turnover rates helps organizations identify and proactively address employee retention challenges. The International Public Management Association, an organization that represents HR professionals in government, states that HR professionals must have access to accurate, real time workforce data. Maintaining accurate workforce data is also important when developing the budget. The Government Finance Officers Association notes that since salaries generally make up the greatest portion of the expenditure budget, governments should use personnel data to account for the number of budgeted positions and expected vacancies. According to the HR Director, the City's ability to produce accurate and reliable vacancy and turnover reports are limited by pre-set data fields in ERMA which do not always capture data that HR would like to track. Custom data fields do not feed automated dashboards but must be manually extracted. The City is currently working on solutions to improve ERMA's reporting capabilities.

The City's personnel system is cumbersome and prone to errors. According to data system owners, migrating data from the previous system FUND\$ to ERMA in 2021 resulted in errors. Consequently, certain employee information was missing or incorrect in ERMA. Other data errors may have been due to the system's inability to accurately represent underfilled positions, or data entry errors that went unresolved. According to the former Interim HR Director, there were no established procedures around entering and managing personnel data in ERMA.

With these data limitations, the City will not be able to easily track or report on retention. This could affect the City's service delivery if it does not have the data to proactively identify concerning trends in vacancies and turnover. It also increases departments' workload as they manually calculate and update this data, instead of using ERMA to quickly produce a report. According to the HR Director, HR has made progress in cleaning up personnel data and engaged a consultant to produce accurate reports in ERMA.

The City did not consistently collect data on employee satisfaction or conduct exit surveys.

With the exception of the recent *Employer of Choice* report, the City has very little data on employee satisfaction and does not share available data with departments. While HR has an exit survey, they have not sent it to every employee who resigns, and the number of responses is low. Additionally, the data HR does collect is not shared with departments, and it is unclear how the City uses the data. Further, there is currently no process in place for ongoing monitoring of retention and satisfaction data.

Most of the departments we interviewed have some method of conducting exit interviews with departing employees, though exit interviews are sometimes sporadic depending on the size of the department and their available resources. The Public Works department additionally collects yearly internal satisfaction data. However, there is no organized citywide effort to collect satisfaction data and compare trends.

Collecting satisfaction data can help organizations understand employee experiences and take steps to reduce internal dissatisfaction, thus improving retention. For example, the U.S. Office of Personnel Management conducts an annual survey on employee engagement—the Federal Employee Viewpoint Survey—in order to report on trends in employee satisfaction. Surveys or interview data can identify the most common causes of dissatisfaction, thus allowing the City to develop a targeted approach to improving retention.

Employee engagement refers to the sense of purpose and commitment employees feel toward their employer and its mission.

Employee satisfaction is a measure of how satisfied employees are with different aspects of their work including their job, organization, pay, and others.

The City lacked a robust data-informed approach to meet its diversity, equity, inclusion, and accessibility workforce goals.

The City recognizes the importance of maintaining a diverse workforce, however, it has not reported sufficient data in recent years to track progress towards its goals and identify opportunities for improvement.

Promoting diversity in the government workforce is important for a number of reasons, including retention. Fostering a diverse and inclusive workplace can help organizations reduce turnover, increase employee retention across demographic groups and improve morale. Regular assessment of employee satisfaction could help the City uncover diversity, equity, inclusion and accessibility (DEIA) concerns that impact retention. As noted in the previous section, the City does not regularly collect data on employee satisfaction, including employees' perceptions of DEIA in the workplace. Some employees raised concerns about DEIA in their open-ended survey responses, which suggests that it is an important factor in employee satisfaction.¹³ A regular citywide survey of employees would allow the City to target common DEIA concerns among employees or prioritize interventions to address those concerns. The U.S. Office of Personnel Management has demonstrated how to do this by recently adding DEIA questions to its Federal Employee Viewpoint Survey, along with a DEIA score based on survey responses.

¹³ These concerns echoed some of the issues brought forth by 20 current and former employees who filed complaints with the Berkeley Branch of the NAACP and were interviewed by Mason Tillman Associates in 2014. Mason Tillman Associates noted the following dominant themes which emerged from their analysis: absence of transparency in the hiring and promotion process; failure to hold supervisors, managers and directors accountable for their actions; and inconsistent application of rules and regulations in the hiring and promotion process.

One of the City's strategic plan goals is to attract and retain a talented and diverse City government workforce. According to the proposed budget for fiscal years 2023 and 2024, one of HR's performance measures is to ensure that City demographics reach parity with Alameda County demographics and identify and address racial and ethnic disparities in the City workforce. In the past, the City's Equal Employment Office has provided the Personnel Board with Year End Workforce reports which analyze demographic trends across indicators like hires, promotions, and leadership roles compared to the U.S. Census American Community Survey (ACS) data for Alameda County. However, the reports have not been produced since fiscal year 2020. According to HR, the department plans to produce these reports again and is exploring the feasibility of automating these reports.

A full demographic analysis of the city workforce was outside the scope of this audit. However, we identified some retention trends in the Year End Workforce reports that merit closer attention. For example, in fiscal year 2020, Hispanic or Latino employees made up 19 percent of all employees, 9 percent of supervisors and managers, and there were no Hispanic or Latino employees in deputy director or director roles. This is based on the most recent report available; there may have been demographic changes since the fiscal year 2020 report.

While comparing the demographic breakdown of Berkeley's workforce to the Alameda County ACS sheds light on where Berkeley stands compared to one relevant labor market, it is also important to monitor workforce trends across all levels of the City employee population (i.e. staff, managers, and supervisors) to gain a better sense of representation within the organization. The City's performance measure on employee diversity does not report on all levels of employment. However, looking at the data in this way could highlight potential barriers, for example, pipelines into manager- or director-level roles.

Recommendations

To improve internal data systems, we recommend Human Resources:

- 5.1 Clean up personnel data in ERMA to ensure all employee data is accurate.
- 5.2 Develop standardized procedures for entering and managing personnel data in ERMA.
- 5.3 Produce reports that can be used to inform retention and hiring efforts, which may include data on vacancies, recruitments, turnover, or other useful data. Human Resources should also report to City Council on staff vacancies by department and how long those positions have been vacant.
- 5.4 Consistently conduct exit surveys or interviews and share results with departments.

To better manage retention efforts, we recommend City Council:

- 5.5 Determine the appropriate city department or other body to regularly collect data on employee satisfaction. Data collection should include employees' perceptions about diversity, equity, inclusion, and accessibility in the workplace. The department should consider publishing the data and comparing it to previous years to help inform retention efforts.

To improve reporting on diversity, equity, inclusion, and accessibility, we recommend the City Manager's Office and Human Resources:

- 5.6 Resume data collection and production of Year End Workforce Reports on demographic workforce trends at least annually. Consider expanding Human Resources' performance measure reported in the budget book to capture diversity at all levels of city employment.

Recommendations and Management Response

We provided a draft of this report to city management and HR for review and comment. City management agreed with our findings, conclusions, and recommendations. We generally expect the City to implement audit recommendations within two years of report issuance. Some of the following recommendations may be implemented immediately, or require a longer timeframe to implement depending on available resources. We believe these recommendations are a worthwhile investment for the City.

- 1.1** To better manage retention, we recommend the City Manager’s Office establish citywide retention goals and report to City Council on progress towards those goals biennially.
- Implementation Date:** 1 year
- Corrective Action Plan:** Upon stabilizing the City’s hiring crisis, Human Resources will establish staffing goals (e.g., hiring over attrition) and metrics by which to measure them (e.g., reductions in vacancy rates).
- 1.2** To better manage retention, we recommend the City Manager’s Office conduct a staffing analysis based on critical needs to identify the number and type of full-time equivalent positions needed for successful city operations and services. The City may consider conducting this analysis one department at a time based on available resources.
- Implementation Date:** 2+ years
- Corrective Action Plan:** A staffing analysis of the recommended scale – involving operational departments, Human Resources, and the Budget team – is beyond the capacity of the City’s current staff. In order to be implemented, the recommendation would need funding and external resources (i.e., the involvement of a consulting firm) or a drastic reduction of current priorities.
- 2.1** To ensure job duties align with job descriptions, we recommend the City Manager’s Office review the highest priority city job descriptions to ensure they accurately reflect job duties.
- Implementation Date:** 2 years
- Corrective Action Plan:** Human Resources has already embarked on this endeavor, working with departments and the Personnel Board to revise key classification specs as vacancies occur. Revisions, however, are time-consuming, since they involve researching changes to the job class, drafting new language, negotiating the edits with labor groups, conducting a compensation study and submitting the change proposals to the Personnel Board for review and approval and then to council for adoption. Given that HR has limited staff and a slew of other deliverables, the revision process will necessarily move forward in priority order over the course of two years, unless resources are invested for outside contractors to assist with the workload.

- 2.2** To alleviate workloads associated with Council referrals, we recommend City Council consider staff capacity when introducing new legislation, and limit or prioritize new legislation during periods of short staffing.
- Implementation Date:** 1 year
- Corrective Action Plan:** Staff currently articulate in staff reports and communications to the City Council regarding staff capacity to implement new legislation. In addition, the City Manager presented in December 2022 to the City Council regarding the staffing crisis the City is currently facing. Opportunities to enhance communications of this nature can be explored with the City Council.
- 2.3** To alleviate workloads associated with Council referrals, we recommend the City Manager’s Office report on the status of approved projects to City Council, including information about delays caused by staff vacancies.
- Implementation Date:** 1 year
- Corrective Action Plan:** Staff currently articulate in staff reports and communications to the City Council regarding staff capacity to implement new legislation. In addition, the City Manager presented in December 2022 to the City Council regarding the staffing crisis the City is currently facing. Opportunities to enhance communications of this nature can be explored with the City Council.
- 2.4** To improve employee satisfaction, we recommend the City Manager’s Office improve pathways for promotion in the City through a citywide succession plan, which may include cross-training for positions.
- Implementation Date:** 2 years
- Corrective Action Plan:** Human Resources will plan for promotional pathways through succession planning and cross-training while being mindful of inherent restrictions imposed on this effort by the relatively modest size of the City’s workforce, particularly in smaller City departments/divisions.
- 2.5** To improve employee satisfaction, we recommend the City Manager’s Office direct departments to ensure that all employees receive an annual performance evaluation.
- Implementation Date:** 18 months
- Corrective Action Plan:** Human Resources will reconfigure the employee evaluation process with the mindset that performance assessment and feedback should be continuous, constructive, and growth-minded, rather than limited to 12-month intervals.

- 2.6** To improve employee satisfaction, we recommend Human Resources implement a comprehensive training program that ensures staff at all levels receive the training they need to fulfill their job duties and develop their job skills as needed. Consider increasing the training budget and redesigning the training curriculum to best address the needs of a post-pandemic workforce, improving training for supervisors and managers, ensuring that experts conduct trainings, and allowing employees to request specific trainings.
- Implementation Date:** 18 months
- Corrective Action Plan:** Human Resources has already initiated a re-imagining of the workforce training curriculum, with specific focus on supervisory, non-supervisory, and safety-sensitive positions. This effort includes a redesign of the Leadership Development Program and the new Skilled Workers Academy to maximize efficiency and effectiveness. Many current employees have gone through this program already.
- 2.7** To improve transparency, we recommend Human Resources ensure that all city employees complete mandatory trainings in accordance with the state law. Report data on mandated trainings to Council annually.
- Implementation Date:** 1 year
- Corrective Action Plan:** Human Resources has already identified compliance with mandatory trainings as a top priority for the 2023 calendar year. Departments are asked to meet compliance milestones throughout the year, reaching 100% by December 31.
- 2.8** To improve transparency, we recommend the City Manager's Office update City Council on the recruitment status of hard-to-fill positions during the biennial budget process, as well as steps taken to fill these positions.
- Implementation Date:** 18 months
- Corrective Action Plan:** Human Resources has already instituted a system of prioritizing departments' most critical hiring needs. Once vacancy rates are stabilized, HR will highlight remaining hard-to-fill positions during every biennial budget process, along with articulating the measures implemented to recruit for them.

2.9 To improve transparency, we recommend the City Manager’s Office identify positions that are hard-to-recruit and retain and consider reassessing pay for those positions.

Implementation Date: 18 months

Corrective Action Plan: The City is already piloting a hiring pay incentive for certain positions in the Police Department but is mindful that reassessing pay for hard-to-recruit positions involves a complex set of considerations, including internal alignment (affecting supervisory or related classifications), internal equity, and labor negotiations.

2.10 To improve communication channels in the City, we recommend the City Manager’s Office assess employees’ needs regarding communication from the City Manager’s Office and design a communication strategy that addresses those needs.

Implementation Date: 1 year

Corrective Action Plan: This effort is currently underway as part of the Employer of Choice initiative. The Communications Division is currently meeting regularly with departments to assess communication needs. Additionally, a quarterly Employer of Choice newsletter goes out to all employees, in addition to the already-existing Berkeley Matters publication available to all employees. The City Manager's Office will continue to explore ways to enhance employee communications as envisioned by the Employer of Choice initiative.

3.1 To improve hiring procedures, we recommend the City Manager’s Office assess the level of staff and resources needed to meet the City’s recruitment and hiring needs. Prioritize filling these positions when vacancies in this area fall below a level that would jeopardize the City’s ability to hire quickly.

Implementation Date: 6 months

Corrective Action Plan: Recommendations to increase staffing within the Human Resources Department were made by the Municipal Resource Group (MRG) as part of its Employer of Choice roadmap, and the City Council has already allocated three additional positions for HR, two of which have been filled; requests for another three positions are pending.

3.2 To improve hiring procedures, we recommend the City Manager’s Office assess the approval process for hiring new employees and identify opportunities to reduce inefficiencies.

Implementation Date: 6 months

Corrective Action Plan: Human Resources has already re-ordered the sequence in which hiring approvals are processed but will seek out further opportunities to enhance efficiencies.

3.3 To improve hiring procedures, we recommend Human Resources develop and execute a plan to modernize recruitment and hiring using social media and community engagement.

Implementation Date: 1 year

Corrective Action Plan: Human Resources has already commenced these efforts pursuant to the Employer of Choice initiative. With funding allocated by Council, the department is in the process of issuing a Request for Proposal to engage a marketing firm that will provide a full suite of recruitment services on digital platforms and social media in order to broaden outreach to high-caliber candidates of diverse backgrounds.

3.4 To improve hiring procedures, we recommend Human Resources communicate standard procedures and trainings for NEOGOV and the City’s hiring process to all department heads and hiring managers.

Implementation Date: 6 months

Corrective Action Plan: Human Resources has already designed trainings on the use of NEOGOV for maximized efficiency in the hiring process, including the scheduling of interviews and the issuance of e-offers and e-reference checks. HR has conducted this training for the hiring managers of the largest departments, including Public Works, Planning, and Health, Housing & Community Services (HHCS), and will roll it to out all remaining departments before the end of the calendar year.

3.5 To improve hiring procedures, we recommend Human Resources improve the employee onboarding process so employees have the tools and information they need to do their jobs.

Implementation Date: 6 months

Corrective Action Plan: Human Resources has already automated the onboarding process so that new employees can submit pre-employment paperwork, make benefits selections, and review City policies electronically. Within the next six months, HR will develop and implement a broader “Welcome to Berkeley” onboarding initiative designed to ease new employees into their jobs and provide them with all necessary tools for success.

- 4.1** To improve the telework policy, we recommend the City Manager’s Office identify ways of reducing unused space in city buildings to save on overhead costs. This initiative may require additional resources beyond city staff.
- Implementation Date:** 2+ years
- Corrective Action Plan:** In order to be implemented citywide, this recommendation would need significant funding and external resources allocated. Currently, the City is making incremental progress on exploring more efficient use of space on a department-by-department basis.
- 4.2** To improve the telework policy, we recommend the City Manager’s Office expand the citywide telework policy to include elements that align with best practices. This can include eligibility, employee accountability, equipment requests, telework training, and justifications for denying employee requests to telework.
- Implementation Date:** 6 months
- Corrective Action Plan:** Efforts are already underway in this regard, as the consulting firm Municipal Resource Group (MRG) is preparing a Hybrid Workplace Best Practice Guide as a supplement to its Employer of Choice roadmap.
- 5.1** To improve internal data systems, we recommend Human Resources clean up personnel data in ERMA to ensure all employee data is accurate.
- Implementation Date:** 6 months
- Corrective Action Plan:** Human Resources has already completed the bulk of this work but will continually review and refine data in order to ensure maximum accuracy.
- 5.2** To improve internal data systems, we recommend Human Resources develop standardized procedures for entering and managing personnel data in ERMA.
- Implementation Date:** 6 months
- Corrective Action Plan:** Human Resources has already implemented methods of standardizing data input and management, and will continue to refine them while navigating limitations with the ERMA system itself.

5.3 To improve internal data systems, we recommend Human Resources produce reports that can be used to inform retention and hiring efforts, which may include data on vacancies, recruitments, turnover, or other useful data. Human Resources should also report to City Council on staff vacancies by department and how long those positions have been vacant.

Implementation Date: 6 months

Corrective Action Plan: Human Resources has already undertaken this effort by engaging a data consultant to design reports and dashboards in ERMA and in NEOGOV; however, limitations in those systems (particularly ERMA) pose impediments to this effort. Departments do provide their vacancy rates when they complete department presentations during budget and finance development each year.

5.4 To improve internal data systems, we recommend Human Resources consistently conduct exit surveys or interviews and share results with departments.

Implementation Date: 2 years

Corrective Action Plan: Human Resources currently sends out exit surveys but lacks capacity for robust follow through, analysis, and subsequent dialogue with departments. Meaningful implementation of this recommendation would require a modest investment in staffing (e.g., a dedicated part-time HR intern).

5.5 To better manage retention efforts, we recommend City Council determine the appropriate city department or other body to regularly collect data on employee satisfaction. The department should consider publishing the data and comparing it to previous years to help inform retention efforts. Data collection should include employees' perceptions about diversity, equity, inclusion, and accessibility in the workplace.

Implementation Date: 2 years

Corrective Action Plan: The Special Projects team working on the Employer of Choice initiative will collaborate with the to-be-hired DEI officer to implement a methodology to collect and report back on employees' perceptions about diversity, equity, inclusion, and accessibility in the workplace. This will be additional to the work being done to address the items presented in the Employer of Choice roadmap produced by MRG.

5.6 To improve reporting on diversity, equity, inclusion, and accessibility, we recommend the City Manager’s Office and Human Resources resume producing Year End Workforce Reports on demographic workforce trends at least annually. Consider expanding Human Resources’ performance measure reported in the budget book to capture diversity at all levels of city employment.

Implementation Date: 1 year

Corrective Action Plan: Human Resources will resume reporting on demographic trends and diversity levels as part of its data analytics efforts referenced in Recommendation No. 5.3.

Methodology and Statement of Compliance

We audited the City's approach to staff retention, including reviewing relevant Human Resources (HR) department's operations for fiscal years 2018 through 2022. We performed a risk assessment of HR's practices and procedures to identify potential internal control weaknesses, including fraud risks, within the context of our audit objectives. This included a review of selected policies and procedures, as well as interviews with subject matter experts, HR staff, department directors, and current and former employees.

To gain an understanding of HR's operations and internal controls and to achieve our audit objectives, we reviewed the following:

- Survey responses from a satisfaction survey we designed and sent to current employees,
- Survey responses from an exit survey we designed and sent to former employees who voluntarily resigned or retired,
- Survey responses from an exit survey that the HR department sent,
- Internal staffing data from the City's current employee information system ERMA (January 2021 – June 2022) and FUND\$ (July 2018 – December 2020),
- NEOGOV data on the City's new hires and promotions,
- Previous audit findings and recommendations regarding understaffing and vacancies,
- City of Berkeley HR policies and procedures,
- National media on public sector hiring and retention issues,
- Professional literature and best practices for hiring and retaining employees, including telework,
- Staffing data and telework policies from local jurisdictions to compare to Berkeley, and
- Other audits in comparison cities related to employee retention.

We also conducted interviews with:

- HR staff members, including the former Interim HR Director, and the current HR Director,
- Current and former city employees,
- Union representatives from City of Berkeley bargaining groups,
- City department directors,
- City leadership including the City Manager and City Councilmembers,
- A climate policy consultant, and
- The Chair of the Personnel Board.

We analyzed:

- Satisfaction and exit survey responses,
- Vacancy rate data from department directors,
- Resignation and retirement data from FUND\$ and ERMA,
- NEOGOV data on the City's new hires and promotions,
- Commuter carbon emissions data, and
- Year End Workforce Reports from fiscal years 2018-2020, i.e. reports produced by the City showing demographic trends in the City's workforce.

We included quotes from current employees, former employees, and department directors. To protect confidentiality, we did not include any identifiable information. Further, each quote featured in this report was only edited for clarity, length, or grammar.

Data Reliability

There are inherent limitations in using survey data to gauge employee satisfaction. However, even with those limitations, providing an anonymous survey was the most effective and efficient way to hear from a large number of current and former employees who could respond freely. During our audit, we kept the following in mind: 1) Many factors can impact a respondent's frame of mind when completing the survey, which could influence their responses either positively or negatively; 2) People who are dissatisfied are more apt to reply to the survey and ongoing changes within the City would impact perceptions day to day; 3) Unless the survey achieves a 100 percent response rate, some opinions may not be reflected in the quantitative analysis of responses; and 4) Despite our extensive preparation, respondents could have interpreted questions differently than we intended. Because the overall goal was to set a baseline of the morale at a point in time, we determined that the above factors would not create a significant risk to the accuracy of our audit findings, conclusions, and recommendations. The number of responses for both surveys was a strong indicator that the results were reliable, and the responses agreed with comments made during interviews, including discussions with employees, supervisors, and management.

We assessed the reliability of ERMA, FUND\$, and NEOGOV data by reviewing it for completeness, appropriateness, and consistency. We determined that ERMA data is reliable for the audit's purpose, with some caveats. ERMA data was reliable for pulling employee reports including resignation, retirement, hire, and service dates after January 1st, 2021. We determined the reliability of ERMA data by interviewing data owners and performing logic testing on the data. We could not confirm the accuracy of the vacancy rate or turnover data and therefore could not use it for analysis or use past employee data to analyze retention trends.

We also assessed the reliability of employee payroll data in the FUND\$ system and determined it is sufficiently reliable for the purposes of our analysis. We assessed reliability by reviewing two prior data reliability assessments from previous audits, as both audits used FUND\$ as a data source and found it to be reliable.

We additionally determined that NEOGOV data are sufficiently reliable for the audit's purpose. We determined data reliability by interviewing knowledgeable data owners, reviewing data manuals, and performing logic testing on the data. We noted a limitation in the data: there are nine new hires and five promotions whose start date was before their requisition create date. According to HR, these are employees who were hired before being entered into NEOGOV. Therefore, their requisition was created after their start date. These limitations did not significantly impact our analysis.

Independence

Payroll Audit is a Division of the City Auditor's Office. The Payroll Audit Division performs citywide payroll functions and is a module leader for the payroll/personnel module used to record payroll costs. HR and department payroll clerks are responsible for entering employee data and collecting relevant documentation. Payroll Audit is not responsible for verifying the employee's time or the use of budget codes by the department. Further, Payroll Audit limits its review of sufficient documentation for the reported time or transaction; HR and department payroll clerks are responsible for making adjustments to ensure the accuracy of the information in the system.

To reduce the threat to our independence, we limited our work to exclude areas overseen by our office. We also selected data from closed payroll periods that was in read only status.

We relied on previous consultations with representatives from the U.S. Government Accountability Office to assess the safeguards we put in place. Based on this, we determined that the safeguards mentioned above reduced the identified threats to our independence to an acceptable level to proceed with the audit.

Statement of Compliance

We conducted this performance audit in accordance with Generally Accepted Government Auditing Standards. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objectives.

Appendix I. Satisfaction Survey Responses

To measure employee satisfaction levels, we surveyed current employees between August 30 and September 18, 2022. We received 771 total responses out of 2094 active employees, including part-time and temporary staff, with a response rate of 37 percent. We measured most responses on a scale from “agree”, “somewhat agree”, “neutral”, “somewhat disagree” to “disagree”. When displaying results, we combined the “agree” and “somewhat agree” responses, along with the “disagree” and “somewhat disagree” responses for simplicity. Certain questions were only accessible based on the respondent’s previous answers, for example, only supervisors could access questions about their supervising experience. To ensure employee confidentiality, the information in this report does not include individually identifiable information from the survey responses. Responses are displayed below.

Job

My job allows me to balance my work and personal life.

I am satisfied with my career advancement opportunities.

HR provided me with adequate onboarding to begin my job when I was hired.

I would recommend working at the City of Berkeley to a friend.

I am satisfied with my job.

I have looked for another job in the past year.

Workload

My workload is manageable.

If disagree, how long has this been a problem?

City Management

City management cares about employees.

I am satisfied with citywide training and professional development opportunities.

City management communicates well when making decisions that impact City of Berkeley employees.

Compensation and Benefits

I am satisfied with my compensation.

I am satisfied with my benefits package.

Commute and Telework

Given my current duties, I believe that some or all of my work can be successfully conducted remotely.

The City provides me with the materials, equipment, and training I need to successfully telework.

I feel connected to my colleagues.

If I am not permitted to telework (at least some of the time), I will find other employment.

I am satisfied with my teleworking experience.

COVID-19

The City provides employees with adequate communication around COVID-19.

Regarding COVID-19, I feel safe going to my work site.

I am satisfied with the City's efforts to protect employees from COVID-19.

Fraud, Waste and Abuse

I know what to do if I encounter fraud, waste, or abuse of city resources in the workplace.

Appendix II. Exit Survey Responses

We asked employees who left the City to respond to an exit survey. We sent the exit survey to former employees who voluntarily left the City—indicated by a termination reason marked as resignation, retirement, medical separation or disability retirement in ERMA—between fiscal years 2018 and 2022. Respondents could fill out the online survey using SurveyMonkey, or they could fill out the paper survey that we mailed to their address. We received a total of 142 responses out of 495 former employees who received the survey. We decided to conduct our own exit survey because the City received only 38 responses to its exit survey between October 2018 and June 2022.

What were your reasons for leaving the City of Berkeley?

Note: We asked survey respondents to provide their five primary reasons for leaving the City out of the options above. This figure shows the percent of respondents who listed each reason as one of their primary reasons for leaving.

Source: 2022 exit survey

How would you rate your experience working for the City?

Note: Figure is an average of all responses. Respondents were asked to rate their experience from worst (1) to best (5).

Source: 2022 exit survey

What did you like best about working for the City?

Source: 2022 exit survey

Did you receive an exit survey upon leaving the City?

Source: 2022 exit survey

Appendix III. Satisfaction Survey Respondents by Department

We asked City of Berkeley employees to respond to a job satisfaction survey. In order to determine how well the responses represented the opinions of employees in different departments, we compared survey response data to citywide data. Employees from every department responded to the survey.

Figure 14. Full-Time Employees Who Responded to Satisfaction Survey by Department Compared to Citywide Data

Note: This figure reflects satisfaction survey respondents who indicated they were a full-time employee; some respondents skipped this question and therefore may not be captured in this graphic. Citywide data captures all full-time employees as of September 9, 2022.

BERKELEY CITY AUDITOR

To: Honorable Mayor and Members of the City Council
From: Jenny Wong, City Auditor *zw*
Subject: Staff Shortages: City Services Constrained by Staff Retention Challenges and Delayed Hiring

RECOMMENDATION

We recommend City Council request that the City Manager report back by January 2024, and every six months thereafter, regarding the status of our audit recommendations until reported fully implemented. Some of our recommendations include: establish retention goals and conduct an analysis of staff needed for city operations and services; consider staff capacity around new legislation; take steps to improve employee satisfaction; identify opportunities for efficiency in the hiring process, and modernize its recruiting process; expand the telework policy to align with best practices; and regularly collect data on employee satisfaction and on diversity, equity, inclusion, and accessibility.

FISCAL IMPACTS OF RECOMMENDATION

Implementing the recommendations outlined in the audit *Staff Shortages: City Services Constrained by Staff Retention Challenges and Delayed Hiring* will have fiscal implications for the city. While the exact financial impact will depend on specific implementation strategies and timelines, it is crucial to allocate adequate resources to ensure the successful execution of these initiatives. The long-term benefits of improved employee retention, such as enhanced service delivery, reduced recruitment and onboarding costs, and increased employee productivity, will outweigh the initial investments.

CURRENT SITUATION AND ITS EFFECTS

During the audit period of fiscal year 2018 to fiscal year 2022, Berkeley experienced staff shortages that impacted the delivery of crucial city services. The City lacked a clear and data-driven retention strategy, exacerbating the problem. Employee dissatisfaction emerged as a key factor contributing to staff turnover, with voluntary separations (resignations and retirements) surpassing new hires each year of the audit period. Outcomes of the employee satisfaction survey that we performed as part of the audit highlight concerns related to workload, outdated internal systems, limited professional development opportunities, employee pay, and inadequate support and communication from city management. In a survey of former employees, 47 percent reported that organizational culture problems were among their primary reasons for leaving the City.

The instability in the Human Resources department further impeded Berkeley's ability to fill vacancies effectively. Over the audit period, the average time to hire new employees increased substantially, from 4.9 months in fiscal year 2018 to 7.7 months in fiscal year 2022, causing

delays in crucial recruitment processes. Additionally, while telework showed potential in retaining employees, the City's existing telework policy is limited and in need of enhancement. We also found a lack of reliable data for monitoring workforce retention trends, including accurate information on vacancies and employee satisfaction.

BACKGROUND

The City of Berkeley has 1,792 budgeted full-time equivalent (FTE) positions as of FY 2023. Retaining employees is important for government organizations to ensure there are enough staff to deliver services and programs effectively. Though outside factors such as the Great Resignation provide a larger context for employee retention, retaining employees in Berkeley was a problem before the pandemic and the Great Resignation, which are not solely responsible for citywide retention challenges.

Some level of employee turnover is necessary in healthy organizations. Employees leave for many reasons other than job dissatisfaction, including retirement, or relocation. Employee turnover also allows new talent and people with new skillsets to enter the organization. However, too much employee turnover becomes costly and makes it more difficult for organizations to function. Excessive turnover can also lower the morale of the remaining staff in an organization.

ENVIRONMENTAL SUSTAINABILITY

In our report, we identify opportunities to reduce greenhouse gas emissions created from employee commutes through the use of telework. Decreasing emissions aligns with Berkeley's Climate Action Plan goal to reduce the year 2000 emissions by 80 percent by 2050.

RATIONALE FOR RECOMMENDATION

Implementing our recommendations will improve the City's management of employee retention and mitigate risks associated with excessive turnover and vacancies.

APPENDIX V

Employer of Choice Initiative Supporting Documentation

Office of the City Manager

ACTION CALENDAR
February 28, 2023

To: Honorable Mayor and Members of the City Council
 From: Dee Williams-Ridley, City Manager
 Submitted by: Dee Williams-Ridley, City Manager
 Subject: The City of Berkeley Employer of Choice Initiative

RECOMMENDATION

Adopt a resolution to support and endorse the City Manager's workplan to implement the City of Berkeley's Employer of Choice initiative. The workplan provides actionable recommendations by Municipal Resource Group (MRG), an independent consultant firm specializing in providing cities, counties, and government agencies with professional strategic services.

Consistent with MRG's 90-day Action Plan recommendations, the City Manager is currently requesting authorization to 1) hire two Associate HR Analysts and one Assistant HR Analyst, 2) contract with a branding and marketing agency in an amount not to exceed \$250,000 to help attract, outreach and recruit talent for the City workforce in support of the Human Resources Department; and 3) enhance communications and social media content planning and strategy including support for department communications in a combined amount not to exceed \$200,000.

FISCAL IMPACTS OF RECOMMENDATION

Costs associated with the resources identified within this initial 90-day workplan are offset by unanticipated salary savings within the General Fund, resulting in no net increase to the Fiscal Year 2023 Adopted Budget. The ongoing cost of increased personnel, as well as other potential resources required to effectively implement the Roadmap, will be presented as part of the Fiscal Year 2024 Mid-Biennial Budget Update.

CURRENT SITUATION AND ITS EFFECTS

The City of Berkeley provides a portfolio of services to the community that is unparalleled in California for a city of its size. The quality of this broad array of services to residents, business, students and visitors is directly impacted by the ability of the City to retain and recruit talented and committed staff. Ensuring budgeted positions are filled with motivated employees is key. Fully staffing an organization that functions efficiently helps limit turnover, retain institutional knowledge and effectively implement the City's programs and policy initiatives.

In September 2022, the City engaged MRG to provide a Roadmap to help the City become an Employer of Choice. A team of three MRG consultants was selected for this project based on their broad experience managing public organizations at the executive level. The goal of the project was to assess the organization’s needs and craft an actionable plan titled the “Employer of Choice Roadmap” to retain and attract employees. This Roadmap creates six thematic areas of focus with a total of forty-eight (48) initiative areas. MRG was also asked to prepare a Hybrid Best Practices Guide which will be shared with Human Resources, labor unions, and employees through a separate process.

The MRG team conducted meetings and focus groups with employees, department heads, and bargaining units from all departments to identify Employer of Choice issues and strategies. Interviews and focus groups were confidential. Participants were assured that no specific quotes would be assigned to any one individual; rather, input would be integrated into general themes and recommendations.

After review of the Roadmap, the City Manager is recommending a Phase 1 focused workplan to address key 90-day deliverables in three defined areas. These recommendations are in alignment with the priority areas recommended by MRG.

Focus area	Resources Needed	Cost
Invest in HR and fill vacancies	Hire two Associate HR Analysts	\$131,312 (FY 23) \$448,468 (beginning in FY 24)
Invest in HR and fill vacancies	Hire one Assistant HR analyst	\$53,515 (FY 23) \$182,762 (beginning in FY 24)
Invest in HR and fill vacancies	Contract with a branding/marketing consultant to assist HR in attracting and recruiting top talent through effective outreach methods	\$250,000 (one-time funding)

Launch updated communication efforts	Enhance communications and social media content planning and strategy including support for departmental communications	\$200,000 (one-time funding)
Elevate and update internal systems and administrative services	Initial 90-day plan will be absorbed within the Office of Special Projects	No financial support requested at this time.

The attached report identifies three focus areas for the City to address immediately. They are 1) invest in HR and fill vacancies, 2) launch updated communications efforts and 3) elevate and update internal systems.

The Human Resources Department is requesting investment in two areas. The first is to build internal capacity with more staff with the addition of two Associate HR Analysts and one Assistant HR Analyst to be more agile in responding to the hiring demands of the organization. Increased capacity will be essential to hiring above attrition for several successive years in order to bridge the vacancy gaps hampering operations across City departments. The addition of analysts will increase the number of exams administered, will shorten the time required to establish eligible lists, will speed up hiring and onboarding processes, and will furnish adequate support to new employees through orientation, training, and benefits.

In order to expand the applicant pool and attract top talent, the Human Resources Department needs a communications consultant to support branding, marketing and recruitment presence on digital platforms, including social media. A full-service agency will be integral to developing recruitment campaign themes and visuals (including promotional videos) and launching them on digital platforms through strategic ads.

To update communication efforts and determine how best to open access to the website and social media use for departmental ease in community engagement, the plan also includes additional consulting resources to work with the City Manager’s Office.

To elevate and update internal systems, the City Manager’s Special Projects Division will work with the Organization to determine business processes and develop a plan using strike teams and/or business process teams to revamp internal and administrative systems for greater efficiency and effectiveness.

The second deliverable is a hybrid workplace best practices guide. This guide is in development incorporating the information from focus groups, what local and other government organizations are doing, and outlining evolving practices. The report will be delivered directly to Human Resources upon completion.

BACKGROUND

There are a number of national issues facing government sector workplaces with an unusually high vacancy rate. The Great Resignation is a term used to describe a recently developed and ongoing trend of employees voluntarily leaving their places of employment. There is a need for defining new norms in the COVID realignment and remote work assessment process, which reflects the demand for more flexible workplace and hybrid options, and the demand for work/life balance and employers being more focused on employee wellbeing.

Traditional means of recruiting, retaining, and engaging employees are proving insufficient to address this trend. Jurisdictions around the country, including the City of Berkeley, need to understand these trends and associated changes, identify and tailor methods of retaining, recruiting and engaging employees for future workforce development. Employers that are not responding to this trend by quickly adapting may be in danger of losing excellent employees and being unable to compete for top talent.

In September 2022, the City engaged MRG to provide a Roadmap to help the City become an Employer of Choice. A team of three MRG consultants was selected for this project based on their broad experience managing public organizations at the executive level. (See Attachment 2 of the Roadmap for information on MRG.) The goal of the project was to assess the organization's needs and craft an actionable plan titled the "Employer of Choice Roadmap" to retain and attract employees. This Roadmap creates six thematic areas of focus with a total of forty-eight (48) initiative areas.

The City Manager provided a presentation to Council on October 11, 2022 that highlighted why this work was important to address our needs and provided a workplan with timelines to research best practices, engage in employee focus groups, including time set aside to engage management and labor. The City Manager also provided a "Workforce Analysis" presentation to the City Council on December 13, 2022 highlighting the current status of recruitment challenges and resulting organizational impacts. With launch of the Employer of Choice report, the City Manager committed to return to the Council with a presentation in February 2023.

The City Manager, MRG and the Senior Executive Team met to review the Roadmap recommendations in late January. The consensus for immediate action and effort were: (1) invest in Human Resources with the goal of filling vacant positions and improving the City's branding and recruitment outreach, (2) enhance communication internally with employees and externally with the public including providing more department access and agility with use of social media and website information; and (3) improve internal and administrative business processes and practices to improve efficiency, effectiveness and customer service. Based on this, the City Manager is recommending the following initial investment to jump start these efforts:

1) Hire two Associate HR Analysts and one Assistant HR Analyst;

2) Contract with a branding and marketing agency in an amount not to exceed \$250,000 to help attract, outreach and recruit talent for the City workforce in support of the Human Resources Department; and

3) Enhance communications and social media content planning and strategy including support for department communications in a combined amount not to exceed \$200,000.

ENVIRONMENTAL SUSTAINABILITY AND CLIMATE IMPACTS

Several of the recommendations focus on streamlining business processes, creating efficiencies, and greater adoption of technological solutions which will reduce paper and other waste associated with less-than-optimally efficient business practices.

RATIONALE FOR RECOMMENDATION

The City of Berkeley is at a crucial point in its need to both retain our valued staff and attract the best candidates for positions within the organization. To this end, we must transform our processes and implement new tools to be an Employer of Choice. It is imperative that we move with speed and agility to implement key activities defined within the proposed Roadmap. These actions are the key establishing a strong and stable Berkeley workforce to meet the demands and growth of the community. The City of Berkeley has been a leader in many initiatives, and we are looking to become a leader in workforce development.

ALTERNATIVE ACTIONS CONSIDERED

The City moved swiftly to gather this pertinent information to develop the action plan. It was clear that a third-party was needed to conduct the assessment. No other action was considered.

1. Resolution
2. Employer of Choice Roadmap Report from Municipal Resource Group

RESOLUTION NO. ##,###-N.S.

THE EMPLOYER OF CHOICE INITIATIVE

WHEREAS, it is critical for the City of Berkeley to implement an initiative to respond to the major changes in employee attraction, retention and engagement due to COVID-19 and the resulting Great Resignation; and

WHEREAS, The Great Resignation is a term used to describe a recently developed and ongoing trend of employees voluntarily leaving their places of employment; and

WHEREAS, Municipal Resource Group (MRG) is an independent consultant firm specializing in providing cities, counties and government agencies with professional strategic services.

NOW THEREFORE, BE IT RESOLVED by the Council of the City of Berkeley to adopt a resolution to support and endorse the City Manager's workplan to implement the Employer of Choice initiative, which will establish and make actionable the recommendations provided in the Roadmap by Municipal Resource Group (MRG), an independent consultant firm specializing in providing cities, counties and government agencies with professional strategic services.

BE IT FURTHER RESOLVED that the Council of the City of Berkeley authorizes the City Manager to proceed with the following actions in the first phase of implementation of the Employer of Choice initiative: 1) hire two Associate HR Analysts and one Assistant HR Analyst, 2) contract with a branding and marketing agency in an amount not to exceed \$250,000 to help attract, outreach and recruit talent for the City workforce in support of the Human Resources Department; and 3) enhance communications and social media content planning and strategy including support for department communications in a combined amount not to exceed \$200,000.

CITY OF BERKELEY

Employer of Choice Roadmap

February 15, 2023

Prepared by MRG

The City of Berkeley wishes to establish itself as an "Employer of Choice" -- to attract and retain high quality employees and foster an organization committed to health and long-term success of the city organization and its workforce.

The goal of this ROADMAP is to strengthen the culture of the organization in a way that improves the work environment and increases job satisfaction -- making Berkeley an exciting and supportive place to work and thrive.

Project Overview

In September 2022, the City of Berkeley (“City”) engaged Municipal Resource Group (“MRG”) to provide a Roadmap to help the City become an **Employer of Choice** to support the City’s Strategic Plan goal to attract and retain a talented and diverse City government workforce. The COVID-19 pandemic continues to have myriad impacts on our community and the world—including the phenomenon known as the Great Resignation. The Great Resignation is a term used to describe a recently developed and ongoing trend of employees voluntarily leaving their places of employment.

Today, Berkeley is facing significant vacancies across the organization and is experiencing challenges recruiting and retaining employees. Jurisdictions around the country, including the City of Berkeley, need to identify and tailor new methods of recruiting, retaining and engaging employees, and to plan for future workforce development. Employers that are not adapting and advancing their organizations are at danger of losing excellent employees and being unable to retain or compete for top talent.

A team of three MRG consultants were selected for this project based on their broad experience managing public organizations at the executive level. See Appendix B for information on MRG. The goal of the project was to assess the organization’s needs and craft an actionable plan to retain and attract employees titled the “Employer of Choice Roadmap”. This Roadmap creates six thematic areas of focus with a total of forty-eight (48) initiative areas. MRG was also asked to prepare a Hybrid Best Practices Guide which will be shared with Human Resources, labor and employees through a separate process.

The City of Berkeley provides a portfolio of services to the community that is unparalleled in California for a city of its size. The quality of this broad array of services to residents, business, students and visitors is directly impacted by the ability of the City to retain and recruit talented and committed staff. Ensuring budgeted positions are filled with motivated employees is key. Fully staffing an organization that functions efficiently helps limit turnover, retain institutional knowledge and effectively implements the City’s programs and policy initiatives.

“Berkeley is in a staffing emergency! All the great work that the Council and community is used to seeing accomplished is being profoundly impacted. The level of work is not going to be as great and the Berkeley performance will be reduced until we can stabilize and rebuild the organization.”

-Berkeley Employee Voice

WHAT SUCCESS LOOKS LIKE ...

Once the City of Berkeley implements the Roadmap and is established as an “Employer of Choice”, the organization will:

- ✓ *Attract and retain high performing employees, who demonstrate a commitment to the long-term success of the city organization;*
- ✓ *Secure engaged employees that feel valued and see the purpose and impact of their work;*
- ✓ *Communicate regularly within the organization to build culture and employee engagement and to the public to build awareness and*
- ✓ *Enhance investment in training, career development, safety and health of staff; and*
- ✓ *Deliver efficient administrative service functions that support employees and enhanced delivery of programs to Berkeley residents.*

HOW WAS THE ROADMAP DEVELOPED?

MRG believes that most good ideas regarding improving customer service and organizational performance come from within the organization. The MRG team conducted meetings and focus groups with employees and department heads labor groups from all departments in addition to labor groups to identify Employer of Choice issues and strategies. Interviews and focus groups were confidential. Participants were assured that no specific quotes would be assigned to any one individual; rather, input would be integrated into general themes and recommendations. These meetings were very productive with active engagement from all participants. The City Council and community should be proud of its workforce and its employees’ commitment to improve the organization.

WHAT ARE EMPLOYEE RECRUITMENT AND RETENTION TRENDS?

Hiring and retaining high performing public agency employees in 2023 is extremely challenging especially in the hyper-competitive Bay Area job market. The “Great Resignation” of the pandemic was actually a “great re-evaluation” of work which has forever changed how we work and how we think about our careers and life. The Pulse of the American Worker Survey [Fact Sheet](#) from March 2022 states that nearly a quarter of workers (22%) have switched employers since the start of the pandemic – up from 13% in April 2021. In addition, half of workers are actively searching or are considering looking for a new job. Demographic trends, the changing dynamic of in-person vs. remote work, retirements and an increased competition from the private sector in many job classifications are key drivers. Faced with this, many public employers are struggling to retain and hire key staff for important positions. The City of Berkeley is no exception. The most comprehensive data on the challenges facing the public sector’s hiring is NEOGOV’s recent [report](#), “*The Quiet Crisis in the Public Sector*”. By utilizing its GovernmentJobs.com site and its expertise as the provider of HR management solutions for the public sector, NEOGOV offers the following findings.

- ✓ **Key Drivers** -- Based on insights from public sector HR professionals, the biggest drivers for the increase in recent job openings are shown below with voluntary turnover (83%) as the largest contributor.
- ✓ **Lack of Qualified Candidates** – 79% of agencies cannot currently find qualified candidates for open positions.

Candidates want higher pay, flexible work options, and more meaningful work, and they aren’t afraid to leave for better opportunities elsewhere.

Candidates also want clear and concise recruitment process, active communication and timeliness.

-NEOGOVS, The Quiet Crisis in the Public Sector

- ✓ **Lower Number of Applicants** -- The number of applicants is dramatically declining in the public sector while at the same time there are more job openings/vacancies.

Chart #1 – NEOGOV Drivers of Job Openings

Chart #2 – NEOGOV # of Applicants

- Since 2021, there has been a 45% increase in public sector job openings. At the same time, there was a 56% decrease in applicants per job. Another way to think about this is that 50% of jobs are getting fewer than 10 applicants – which doesn’t take into account that the applicants may not meet basic requirements of the job.
- This change becomes even more alarming when this trend is reviewed over the past six years. NEOGOV found that applicants per job in the public sector have decreased by 74%.

✓ **Impact of Unfilled Recruitments** – The impact of not filling positions dramatically affects the remaining workforce and public services. Chart #3 from the NEOGOV report illustrates the challenges of not being able to hire. Locally, the Berkeley City Manager presented a [Workforce Analysis](#) overview to the City Council on December 13, 2022 which outlined key causes for the national labor shortage, recruitment and workforce challenges, and impacts of vacancies on services in a number of departments. Similar to national issues, Berkeley is facing these impacts:

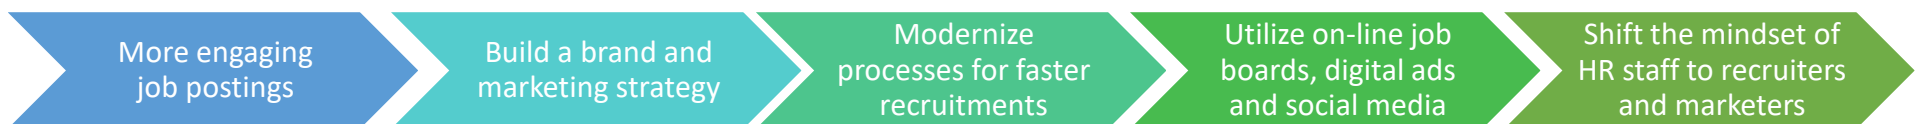

- Reduction in services and programs-- Increase in caseloads, reduction in service hours, reduction in programs, reduction in service quality, delays in service delivery.
- Temporary closure of facilities on certain days or during certain shifts.
- Prioritization of violent crimes over lower-priority property crimes and diminished ability for extra patrols.
- Decreased capacity to manage existing programs and projects.
- Reduction in maintenance standards and services for community amenities, parks and streets.
- Challenges meeting grant requirements and deliverables.
- Backlog of service requests, maintenance, infrastructure projects.
- Staff burnout, increased stress and frustrations; forced overtime; denial of time-off requests.

Chart #3 – NEOGOV Hiring Challenges

NEOGOV Recommendations:

To improve public sector recruitments, NEOGOV recommends the following actions:

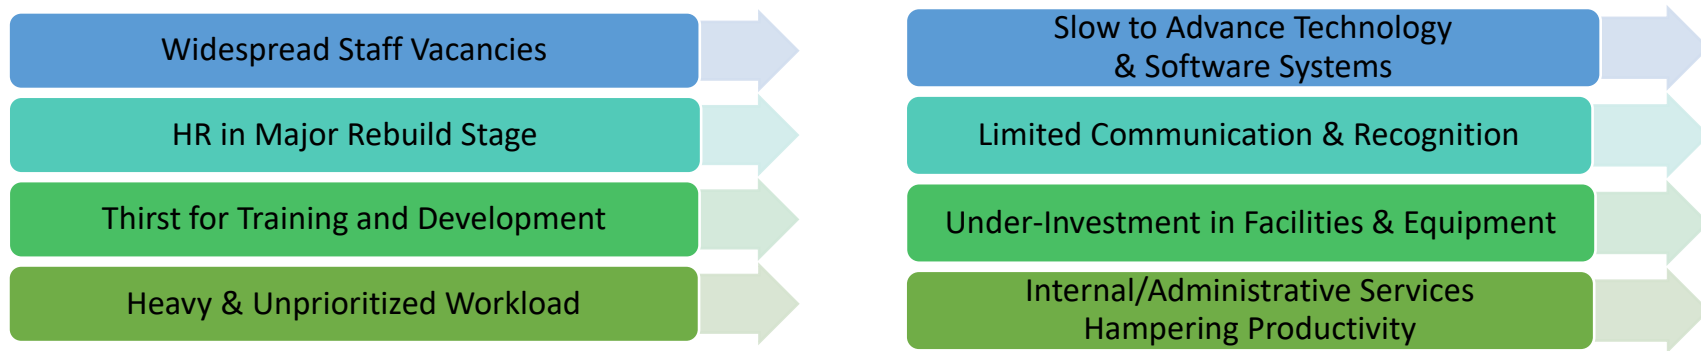

From MRG’s research and best practices, it is important to recognize that employee retention has multiple layers. Key components for employee retention include the following.

- ✓ Competitive compensation and benefits.
- ✓ Purpose and meaning in the work being performed by employees.
- ✓ Flexibility and a desire for life balance which is requiring employers to embrace alternative work schedules and remote work.
- ✓ High desire to work for organizations that are committed to growth, training, and career development in their employees – which is especially true for Millennials.
- ✓ Recognition and appreciation for work efforts and accomplishments with an overall positive organizational culture.
- ✓ Competent and capable supervisors and managers committed to good communication, teamwork and active employee engagement.
- ✓ Organizations that invest in tools, technology, and business systems that let employees complete their work with ease and effectiveness.
- ✓ Comprehensive onboarding process that helps new employees find their footing, launch into their new role, and delivers a clear vision of the organization’s values, culture and expectations.
- ✓ Prioritized and organized work that allows thorough and strategic work delivery.

When these conditions are met together as a package, the organization’s culture and organizational operations all improve and move toward optimal. The Roadmap evaluates these layers and creates a work plan for the City to retain and attract a strong, talented and agile workforce.

KEY FINDINGS

Below are the key findings that are impacting the City’s ability to attract and retain employees. The impact of these issues results in City employees feeling tired, overworked, frustrated and underappreciated. The number one priority expressed by staff was to fill vacant positions first in order to improve customer service, reduce overtime, increase capacity, and reduce the level of work for current employees.

The City Council’s leadership is a key ingredient in the success of the Employer of Choice Roadmap. Initially, MRG sees three important roles for the City Council.

1. **Financial Support and Resources** – As outlined later in the report, the Roadmap will require one-time and ongoing financial resources for staff, tools, technology and equipment. Without secured financial support and investment, the Roadmap will not be successful. MRG recommends that the City Manager bring forward an initial list of resources for the first 90 Day Action Plan to then be supplemented with a more comprehensive multi-year budget.
2. **Compensation & Benefits** – While the Roadmap does not make specific recommendations regarding salary and benefits, compensation is critical in the recruitment and retention of employees. Appenix A outlines organization feedback that MRG received regarding compensation and benefits. A strategic assessment of the City’s compensation system ahead of labor negotiations is important.
3. **Priority Setting and Workload** -- The City’s latest Strategic Plan was created in 2017/2018 for work in FY 2018-2019 and has nine (9) long term goals. New initiatives creating workload enter the City various ways including State/Federal requirements, annual budget process, staff recommendations, and the City’s legislative and agnda process. The City of Berkeley legislative process accepts proposals from the Mayor, City Councilmembers, the Auditor, Commissions, and the City Manager. This process of direct legislation results in a high volume of agenda items, usually in the range of 850 – 950 total items annually. For legislative proposals from the Mayor and Council, there are multiple avenues through the legislative process. Items submitted for the agenda process may go directly to the full Council, or they may be referred to a policy subcommittee for review and amendment before being considered by the full Council. (There are additional City Council work items that are not captured in Chart #5 below.) As of January 2023, there are 351 Long Term Referrals and 149 Short Term Referrals.

City staff appreciates the City Council’s ideas for creative and entrepreneurial projects and initiatives to improve and serve the community, yet the volume of referrals impacts the delivery of core services to the community. New Council initiatives are regularly added and become staff’s priority. This results in City staff shifting resources to new initiatives and consequently, some prior projects are left partially completed or stalled. The high workload and shifting of priorities are impacting employee retention and project completion.

Chart #5 – CURRENT CITY COUNCIL REFERRALS (as of Jan. 2023)				
REFERRALS	Long Term	Short Term	Total	Total (%)
Not Active	162	13	175	35%
Completed	100	129	229	46%
In Process	89	7	96	19%
Sub-Total	351	149	500	100%
Rescinded	51			
TOTAL	402			

It is a best practice in cities to create an annual City Council approved work plan built on multi-year strategic goals with periodic opportunities for additions throughout the year. For each organization, it is a balancing act to find a process that retains the ability for individual City Council Members to bring forward ideas and initiatives, while at the same time having a procedure where the full Council defines the priorities and work of the organization. MRG understands that Agenda & Rules Policy Committee is beginning a discussion on enhancements to the City’s legislative process, including referrals. MRG supports this review of the legislative process and recommends developing a more integrated system for goal and priority setting to establish an achievable work plan for the organization.

Organization of Recommendations

Becoming an Employer of Choice requires culture change and organizational development. The Employer of Choice Road Map in this document provides specific recommendations in the following themed areas (lanes) as shown in this diagram.

IMPLEMENTATION

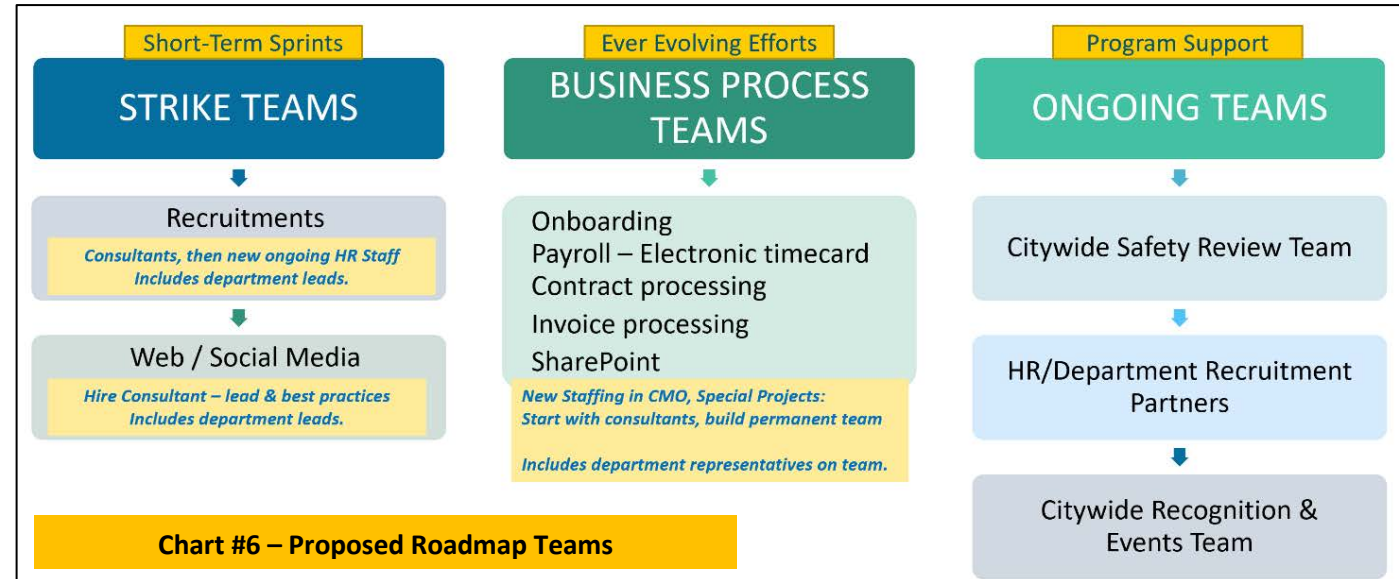

The Need to Move Quickly

The City should implement certain changes quickly to move towards becoming an Employer of Choice. While a complete implementation of the Roadmap is estimated to take three years, immediate action and resolve is required. Quick action will demonstrate to staff and the community that the City is committed to retaining and attracting employees and enhancing community services. The following implementation methodologies are recommended:

1. **Executive Leadership & Project Champion** – This initiative crosses all departments and is foundational for how the organization will operate in the future. Committed executive leadership is required to ensure organizational change occurs and the Roadmap is implemented.
2. **Seasoned Project Manager** – The Employer of Choice Roadmap will require a seasoned manager to lead these interdepartmental efforts with the full support of the executive champion.
3. **Department Commitment** – Each Department Head needs to be committed to the Roadmap including supporting their staff to work on various project teams.
4. **1X & Ongoing Financial Resources** – New investments in the organization for staff, consultants, technology, equipment, supplies, etc. are all required to implement the Roadmap. The funding needs should be identified and set aside for upcoming three years to ensure this organizational effort has the resources to complete its projected outcomes.
5. **Rolling 90-Day Action Plans** – Large organizational initiatives like this often get stalled over time by the size of the recommendations and overall projected work. From the time the Roadmap is accepted by the City Council, it will take the City staff a few months to organize the implementation of the full Roadmap. By taking strategic and targeted 90-day Action Plans, Berkeley can weave this project in with other city priorities and ensure solutions move forward with proactive results. After a relatively short start-up period (no more than 60 days), the first 90-Day Action Plan should be created, launched and communicated to the organization.

6. **Transparency & Reporting Out** – Communication, reports, and current dashboards should be created. Celebrations of successes and recognition internally and externally is critical for maintaining momentum and honoring the work.
7. **Empowered Teams** – Many of the recommendations in the Roadmap require City staff from different departments or work units to collaborate, analyze, and execute phases of implementation. New ways of working and an investment in “strike teams” and “business process teams” will require new staffing and some consultant assistance. MRG recommends three different types of “teams” as shown in Chart #6.

8. **Prioritization** – There are 48 individual recommendations outlined in the Roadmap. While all are important, there are three key areas for initial focus and priority investment.

- **Invest in HR / Fill Vacancies** – Invest in staffing and consultant support to bring immediate additional resources to HR, streamline processes, work with line departments as business partners, leverage software and technology, and activate social media tools in recruitments.
- **Launch Communication** – Jump start internal communication from the City Manager’s Office and departments to employees, including open access to the website and social media for active use by departments in their community information and engagement efforts.
- **Elevate & Update Internal Systems** – Create Strike Teams and Business Process Teams to review and revamp internal and administrative systems for greater efficiency and effectiveness.

Implementation of these recommendations will require City Council support, executive leadership, staff resolve and significant changed behaviors. There is a lot to do. The City has the talent and resources to do it!

1.0 - RECRUITING FOR TALENT

Recruiting for employees requires proactive marketing/branding and the development of a talent pipeline. Strong recruitment operations regularly build their employer’s brand, treat candidates as customers/future employees throughout the process, and have streamlined systems that work in partnership with line departments. At this time, for Berkeley, **the single most important action is to fill vacant positions** throughout the organization. Filling budgeted, vacant positions will demonstrate a commitment to existing employees resulting in rebalanced workloads and reduction in stress over time. Community services will be enhanced by a more fully staffed organization able to attract the highest quality talent possible.

Enhanced HR staffing and full utilization of modernized recruitment tools are critical to improve recruitments. By actively deploying social media sites in the recruitment process and creating a hiring campaign, an overall intentional and aligned marketing program can be launched. The first day and first few months of an employee’s time as an employee set the stage for their overall satisfaction and retention.

Staffing & HR Role

1.1	Invest In Human Resources Department (HR) Staffing Levels	<p>Immediately expand authorized HR staffing in key functions:</p> <ul style="list-style-type: none"> ▪ Recruitment operations (initially 3 additional FTE) ▪ Labor Relations & Training (initially up to 3 additional FTE) <p>Continue to use consultant resources on a short-term basis as needed to augment staff resources until additional HR staff can be hired.</p> <p>Direct City Manager and HR Director to bring forward recommendations for right sized staffing of Human Resources Department in AAO and FY 2023/24 Proposed Budget.</p>
1.2	Streamline Recruitment Process – Strike Team	<p>Create a small and agile Recruitment Strike Team comprised of HR, labor representatives and department staff that meets for four months. Issues to solve:</p> <ul style="list-style-type: none"> ▪ Use department ideas on how to improve recruitment process and practices; Establish responsibility checklist - Department and HR roles in new recruitments; and ▪ Authorize initiation of recruitments ahead of actual vacancies.
1.3	Act as Business Partners with Departments	<p>Reposition HR recruitment staff as business partners with departments. Reinstigate assignment of individual HR staff to work with each department’s designated point of contact. Two-person team should discuss and agree on responsibilities for:</p> <ul style="list-style-type: none"> ▪ Outreach plan for each recruitment including overall timeline and assigned responsibilities; ▪ Review of minimum qualifications; and, ▪ Interview and examination process.

Marketing & Branding

1.4	Create Recruitment Brand & Marketing Strategy	<p>Develop a clear brand for the City of Berkeley’s recruitment efforts. “Recruitment Brand” should communicate Berkeley’s values, work culture, opportunities, and strengths as an organization. Create clear and consistent messages in all recruitments to denote Berkeley as an Employer of Choice including:</p> <ul style="list-style-type: none"> ▪ Color, information, style, graphics;
-----	---	--

		<ul style="list-style-type: none"> ▪ Modern design and formatting for consistent look and feel for recruitment brochures and flyers; ▪ Compelling description of Berkeley as world class City including descriptions of the organization and departments; ▪ Clear, compelling and articulated description of the role of the position being recruited including key upcoming opportunities and projects (this is not just language from the job description). ▪ Create a marketing program to highlight Berkeley’s hiring efforts (e.g., add branded hiring tag lines to employee’s email signatures, purchase advertising on buses, banners and other visual, high impact locations).
1.5	Upgrade Jobs/Career Web Presence	<p>Upgrade the current Human Resources web site with a consistent “Recruitment Brand” Job Opportunities launch page. Create a launch page with more information and context regarding working for the City of Berkeley and then direct candidates to the NEOGOV site. The following agencies can be used as examples:</p> <ul style="list-style-type: none"> ▪ City of Roseville – Strong primary “Job Opportunities” page with visuals, video, employee profile, approachable and culture themed message from the City Manager, helpful tips for applying. [Link] ▪ City of Palo Alto – First job page links to “Careers with the City of Palo Alto” with information about the community, city team, benefits, leave, remote and flexible work, commuter programs, wellness & counseling services. [Link] <p>Support departments to create their own dedicated recruitment and career web pages or website within the parameters of the City’s “Recruitment Brand”. Particularly important for police and fire where this is a standard approach among agencies competing for talent.</p>
1.6	Utilize Social Media	<p>Modernize, expand and decentralize the City’s approach to social media.</p> <p>Create LinkedIn, Instagram and Facebook pages and use City’s Twitter account for recruitment marketing.</p> <p>Allow departments to create and deploy targeted recruitment outreach and marketing efforts. Ensure department efforts align with City “Recruitment Brand”, but provide more specialized department information. Department program initiatives, accomplishments, videos, employee profiles and operational updates should be marketed via social media.</p> <p>Additional information and recommendations for outreach and social media include:</p> <ul style="list-style-type: none"> ▪ Leverage NEOGOV -- NEOGOV offers external advertising on other internet sites from selected partners, which can be purchased via Insight as needed by utilizing the “Advertise Job” link on the Insight Dashboard. Target use of Recruitics, Glassdoor and other sites depending on specific position. ▪ CareersinGovernment.com – With a nominal annual agreement, the City can publish all recruitments listings on CareersinGovernment.com which then pushes the recruitment through to their social media partners (LinkedIn, Instagram, Facebook and Twitter). ▪ Use #Hashtags – Include hashtags on the job posting. Web crawlers will find the hashtag, so an agencies’ job posting will appear in searches initiated by job seekers. Example hashtag inserted at the bottom of a recent job announcement: #Engineer, #PublicWorks, #Transportation.
1.7	Hire Graphic Design & Social Media Expertise	<p>Add funding for graphic artist and social media expertise in HR budget. Funding would be used to enhance:</p> <ul style="list-style-type: none"> ▪ Marketing (Presentation of City to prospective applicants). ▪ Advertising (Targeted outreach for individual job openings).

1.8	Referral Bonus for Current Employees	<p>Develop an employee referral bonus program.</p> <p>Provide \$1,000 referral bonus for current employees who help attract a new employee.</p> <p>Examples of other agencies with employee referral bonus programs include: UC Berkeley, San Mateo County, City of Torrance.</p>
1.9	Local Outreach & Targeted Programs	<p>Develop additional Community Technical Education (CTE) pathway programs in collaboration with the Berkeley Unified School District (BUSD) that begin to expose students and prepare them for good paying, benefited careers within the City. Support CTE pathways with a variety of volunteer and paid internships, explorer programs and other opportunities to develop these potential future employees of the City.</p> <p>Develop robust internship program with UC Berkeley to bring on students into a variety of local government positions. Create a program that results in an annual “graduating” class of 10-15 interns across the organization who can be streamlined into the application process.</p>
HR Systems & Data		
1.9	Resources & Tools Ready on Day 1	<p>Provide new employees with the tools, equipment, and workspace ready for them to begin work on their first day of employment. Create on-line checklist for workspace readiness with department responsibilities outlined.</p> <p>Document roles of HR and Information Technology Department to ensure new employees have computer, login access, phone and any other necessary equipment ready to go on Day 1.</p> <p>Document roles of Public Works maintenance staff and the hiring Department to ensure a clean fully equipped workspace is available upon arrival.</p> <p>Deliver welcome letter from City Manager/Department Head and/or scheduling meet and greet on new employees first day of work.</p>
1.10	HR Performance Metrics & Reporting	<p>Once HR staffing is stabilized, update and further develop department performance metrics, procedures for accurate data collections, and a high-level dashboard for monthly reporting to City Manager and Department Heads.</p> <p>Information to include the following minimum data:</p> <ul style="list-style-type: none"> ▪ Current vacancies by department, ▪ Resignations by month by department including reasons for employee’s departure, ▪ Number of active recruitments in process, ▪ Time to hire from department request for recruitment to hiring, ▪ Number of candidates for positions sorted by meeting MQs and not meeting MQs, and ▪ Number and why candidates decline Berkeley job offer. <p>Once Recruitment Backlog is Eliminated – Establish the following performance metrics for time it takes to fill positions:</p> <ul style="list-style-type: none"> ▪ From budget authority/vacancy to job posting (30 days). ▪ Filling positions from Day 0 (the time from budget authority/vacancy) to Day 45 (Job posting) to Day 100 (First day of work for new employee). Different metrics will be required for specialty recruitments (i.e. Police Officers). ▪ Target vacancy rate of 5% of all budgeted positions in the organization.

		Produce a vacancy report card with recruitment, hiring and current vacancy information and post on-line every three months beginning on 7/1/23.
	Workforce Analysis Report - Annual	Build data and systems in order to create an annual Workforce Analysis Report for annual reporting to departments and the City Council. It will take a number of years before HR is positioned to prepare this document as they building capacity, systems and data. See example from San Mateo County Link .
1.11	Training & User Guides for ERMA & NEOGOV	Enhance training and user guides for ERMA, City’s financial and HRIS system, and NEOGOV, the City’s recruitment and applicant tracking software. Provide target deployment dates for full deployment of system capabilities to increase efficiencies and reduce staff workload.
1.12	Update Key Job Classifications	Create and maintain (in collaboration with department reps and labor) targeted list of key job classifications to be reviewed and updated with target timeframes. Prioritize hard to fill positions (e.g. Information Technology classifications) that provide essential internal administrative services.

2.0 - RETAINING OUR EMPLOYEES

The impact of employee turnover is high – for the organization, community and employee – those that leave and more so for those that remain. There are eight key benefits to having programs and a clear strategy to retain employees: (1) reduced costs, (2) improved morale, (3) retained experienced employees, (4) efficacy in recruitment and training, (5) increased productivity, (6) elevated customer experience, (7) improved culture, and (8) improved employee satisfaction. It is more efficient to retain a quality employee than to recruit, train and orient a replacement employee of the same quality.

A comprehensive employee retention program can play a vital role in both attracting and retaining key employees, as well as in reducing turnover and its related costs. Retaining employees starts during the onboarding and socialization process to the organization. Recognition, appreciation, and employee engagement are central to building culture and having employees feel seen, heard, and valued. Employees also want to feel productive and see that their work is valued and impactful. A balanced workload with clear priorities allows employees to complete initiatives/tasks with pride and to align their accomplishments with the organization’s overall strategic priorities.

From MRG’s interviews and focus groups, there is significant work necessary by the City in this area.

HR Systems

<p>2.1</p>	<p>Overhaul Onboarding Program</p>	<p>Recreate HR Onboarding Program for new employees to include the following elements:</p> <ul style="list-style-type: none"> ▪ Brand the Onboarding Program with a unique title and tag line. [Example – BERKELEY ONBOARD, “Welcome to Our Team”] ▪ Overview and training on City internal services processes and software (e.g. agenda, timesheets, travel reimbursements, communication, NEOGOV, ERMA, Microsoft Teams, contracts, invoices, etc.). ▪ Meet the City Manager and respective Department Head for welcome, expectations and culture briefing. ▪ Tour City facilities to connect the new employee to the broader organization’s efforts and locations. ▪ Schedule mandatory training requirements needed during the first 6 months of employment. ▪ Create separate orientation for first line supervisors and management in terms of their role, resources and processes for supervision and management duties. ▪ Invest in personal touches such as welcome cards, coffee mug or other small treats to help welcome the new employee. ▪ Assign a peer employee “buddy” within the hiring department to each new hire. This staffer is available to answer questions, explain culture and practices that may not be in rules and serve as a mentor for the first 3-6 months of employment. <p>Use NEOGOV module to maximize use of on-line information for HR program.</p> <p>Gather feedback via a survey to all new employees after the 6-month orientation to gain feedback on how to continue to improve the Onboarding Program.</p> <p>Develop template for all Departments to create their own Department Onboarding Program, modeled off successful department programs currently in place.</p> <p>See sample Onboarding site [Link].</p>
------------	------------------------------------	--

2.2	Reform Eligibility List Process	Establish a Labor / HR working group to develop modifications to the Eligibility List process by 9/1/23.
2.3	Continue to Improve HR Communications (<i>Berkeley Matters</i>)	<p>Major improvements to <i>Berkeley Matters</i> (HR’s E-Newsletter and Job Opportunities Internal Promotion Listings) were completed in December 2022 with streamlining of relevant information, enhanced graphics, and weekly publishing of recruitment/promotional lists.</p> <p>Continue to refocus and upgrade <i>Berkeley Matters</i> and develop other HR communications to all employees.</p> <p>Ensure easy access for all employees whether office or field staff.</p>
2.4	Performance Evaluation and Feedback	<p>Implement comprehensive review and update for the City’s performance management system including all evaluation forms. Review length of documents, timing, and inclusion of career development and training plans as a component. Ensure that all employees receive regular feedback and accountability.</p> <p>Support regular communication and coaching by management with increased training and support.</p> <p>Develop and implement a standard “stay interview” processes with current employees to ascertain specific needs and desires to maintain their employment with the City.</p> <p>Explore a 360-evaluation system for supervisors and managers to receive feedback from employees.</p> <p>Use Gallup employee survey tool as a means to gain feedback from employees regarding the performance of supervisors and managers.</p>
2.5	Upgrade Exit Interview Process	<p>Develop clear and robust exit interview process with confidential survey and 1x1 phone/in-person interview.</p> <p>Produce annual citywide and department report with summary information regarding reasons for employee departures.</p>
Recognition & Appreciation		
2.6	Create a Comprehensive City Recognition Program	<p>Create an inter-departmental team to enhance the City’s Recognition Program. Consider the following ideas:</p> <ul style="list-style-type: none"> ▪ Annual employee recognition event. ▪ Employee award programs are important tools to show appreciation and celebrate excellence and the way employees demonstrate the organization’s values. There are many samples of general employee award programs. Some organizations have an “Employee of the Quarter” program to recognize high performing employees that embody the values of the City’s and demonstrate their good work and talents. ▪ Flexible and immediate recognition program where managers can recognize employee’s efforts with cards, notes and gift cards. ▪ Program where employees can also show appreciation to their colleagues. ▪ Ways to award extra hard work or key accomplishments of staff such as performance bonuses.
2.7	Restart Longevity Awards Program	<p>Reinstitute and revitalize a recognition program to honor employees at key benchmarks (every 5 years of service) for their length of service. Consider the following components:</p> <ul style="list-style-type: none"> ▪ Include employee’s names and years of service at 5-year benchmarks in a report to the City Council that is distributed to all employees.

		<ul style="list-style-type: none"> ▪ Hold quarterly recognition event sponsored by the City Manager’s Office with attendance by Department Heads. Employees would receive a certificate or other form of recognition and their supervisor/Department Head would talk about the employee’s work and accomplishments. ▪ Review and upgrade recognition gifts for employees. Employees with 20, 25 and more years of service should receive special recognition. ▪ Provide 5-year pins for employees to add to their lanyards or display in other ways. ▪ Explore opportunity for leave cash-out at key service increments as a way to provide additional monetary compensation.
Organization Priority Setting and Workload		
2.8	Focus Priorities & Initiatives by City Council	Review and redesign the legislative process to ensure Council priorities are accomplished while balancing the capacity of the organization. An updated legislative process needs to ensure Council initiatives are accomplished within a framework of enhanced planning and priority setting to allow the organization to better budget, deploy resources and align implementation.

3.0 - CULTURE, COMMUNICATION & EMPLOYEE ENGAGEMENT

Authentic communication is the connectivity fuel needed to build trust, culture, and relationships. An organization requires strong relationships and people that know and respect each other to deliver excellence with efficiency and effectiveness. With good communication, managers can gain understanding and commitment from employees, achieve organizational goals and develop rapport with the people on their team. High performing organizations have various ways that employees can voice their ideas and concerns while being engaged in helping improve the organization.

Communication externally is also critical to building relationships and trust with the community. City departments need to be able to communicate with greater agility and timeliness with the public. While transactional information is important to the public, the City also needs to tell its own story of its work – to communicate the “why” and the “what”. In today’s world, the public is used to watching videos, reading blogs, and watching podcasts. A City’s external communication tools need to allow for creativity and voices by departments.

Communication

3.1	Invest in Internal Communication	<p>The following actions are recommended:</p> <ul style="list-style-type: none"> ▪ <u>City Manager Monthly E-Newsletter</u> -- Develop and deliver a monthly newsletter to all employees from the City Manager with updates on key City projects, highlights of key accomplishments, recognition of employees, and other items. A focus would include building the City’s culture around values and mission. Ensure newsletter is delivered in a timely manner to staff without regular access to computers or email in the course of their daily work. This initial work can likely be absorbed initially within the City Manager’s Office, but over time will require additional staffing resources focused on employee engagement and support. ▪ <u>Department Communication</u> – Provide email update and other communication to all department employees at least monthly. Department heads should also conduct in person meetings with each division no less than two times per year and hold an in person all department meeting no less than two times per year. Build in time for information sharing, department strategic updates and relationship building in these meetings. ▪ <u>Management Team Meetings</u> – Facilitate mid-managers half day in person meeting with Senior Executive Team (SET) + division managers three times per year. Purpose is strategic planning, training, special initiatives, and cross-department relationship building.
3.2	Foster Cross Department Collaboration	<p>Facilitate events in which staff from different departments interact and understand other dept. priorities (e.g., three times per year Senior Executive Team + mid-manager meeting).</p> <p>Utilize cross-department task forces to gain employee input on ideas and projects.</p>
3.3	Open Department Access to Website & Social Media Use	<p>Create parameters for outgoing content and authorize designated contacts in City Departments to communicate via social media and email.</p> <p>Allow designated department staff to add content to their department web pages and issue press releases.</p>

		Hire an expert public agency public information consultant to quickly develop a game plan and work with departments and Public Information to allow more access and flexibility with the City’s website and social media within standards that can be operationalized.
Team Building & Culture		
3.4	Invest in Cross Department Relationship Building	<p>Create a team of staff from different levels and different departments to create events, fun and activities. Ideas:</p> <ul style="list-style-type: none"> ▪ <u>Reimagine Department Open Houses</u> -- Create rotating Open House where each department would host a gathering time and sharing about their department with the rest of the City staff. ▪ <u>Potlucks, Coffees & Ice Cream Socials</u> – Hold monthly or quarterly coffees, potlucks or ice cream socials to bring people together with some fun activities both within departments and across departments. Provide some city funding for these activities. ▪ <u>“Volunteering” for Community Improvement Projects</u> – Support staff to volunteers to join teams (department and inter-departmental) on important community activities such as cleaning a community garden, working on a Habitat for Humanity project, or doing a project for a local school or non-profit. Employees would be paid for the time and allowed to use 1-2 works days per year for these community activities. This type of program connects employees together and also connects employees to the community in ways that they may not be able to in their day-to-day public service.
3.5	Link to New DEI Program	<p>The City is hiring a dedicated DEI Coordinator. For the first 90 days, the newly appointed DEI Coordinator will be to reviewing Berkeley’s current status and needs with an eye towards best practices to create a DEI Work Plan.</p> <p>While many DEI efforts may be focused around hiring and promotion, consider investments in how the City organization can be culturally inclusive including training, communication, learning and collaboration.</p>

4.0 - TRAINING & PROFESSIONAL DEVELOPMENT

New and future employees are looking for organizations that will invest and support their growth and career development. Employees were clear in their desire for more growth and development opportunities – formally and informally. Providing various forms of professional development will build loyalty to the organization and develop employee’s individual talents to support internal advancement. A well-trained workforce supports innovation and a higher level of customer service to the community, plus employees have the opportunity to grow and progress within the organization as they promote.

Training Strategy & Programs

4.1	Develop Training Strategy & Plan for Learning Culture	<p>Invest in a learning culture and professional development for all employees as a key driver for employee retention. Review training program and determine which training should be done in-house and what to outsource or send employees to external training. Develop an initial Training and Professional Development Strategy for the City. Consider the following elements:</p> <ul style="list-style-type: none"> ▪ Utilize NEOGOV for monitoring and mandatory training. ▪ Provide training opportunities for all level of employees. ▪ Develop and deploy an annual survey for employees to gain ideas for the types of training and areas of interest. ▪ Incorporate training discussion into regular 1:1 supervisor/employee meetings and annual performance reviews. ▪ Include and track required department training on shared tracking department file (e.g., SharePoint) in common format across organization. <p>Establish standards for training (e.g. # hours per employee per year).</p> <p>Ensure sufficient department training budgets are developed and discussed with the City Manager's Office in the preparation of the City's annual budget and line item allocations are included in proposed budgets.</p>
4.2	Invest In Learning Academies & Specialized Training	<p>Employees and management across the organization see the need for modern, effective and strategic investments in training and professional development.</p> <p><u>Employee Academies</u> -- Implement the following Employee Academies robust learning programs:</p> <ul style="list-style-type: none"> ▪ Academy for Managers ▪ Supervisory Academy for First Line supervisors ▪ Seasoned Supervisors Academy for supervisors who want or need a refresher course in managing employees and/or updates and new information that needs to be communicated to sitting supervisors. ▪ Skilled Worker Academy -- The City has just launched its first Skilled Worker Academy. After its beta year, a thorough evaluation should occur for continued refinement. ▪ Administrative Assistant Academy ▪ Analytical & Project Management Academy <p><u>Employee Relations Training</u> – The City is a member of an Employer Relations Consortium comprised of a number of local public agencies in the Bay Area. The Consortium and services are provided by Liebert Cassidy Whitmore. To fully take advantage of this resource:</p> <ul style="list-style-type: none"> ▪ Create a curriculum of courses to be taken by a First-time Supervisors and Managers over 2-3 years.

		<ul style="list-style-type: none"> Require all supervisors and managers to take a minimum of two courses per year. Recognize this learning and investment with the City’s own certificate programs using LCW curriculum.
4.3	Invest in Coaching	Develop internal (trained HR staff) and/or external (consultant) resources with management coaching experience and make coaches available to managers. Coaching can be done individually or in groups. Provide specialized training for public safety supervisors.
4.4	Invest in Learning Management Software	Implement learning management system software (e.g. NEOGOV Learn) for the administration, documentation, tracking, reporting, automation, and delivery of educational courses, training programs, materials or learning and development programs across the organization.
4.5	Invest In Technology Training	Specialized training in the areas of software and technology is needed throughout the organization including Microsoft Office and other software systems. Encourage departments to authorize on site, off site or on-line training to maximize staff proficiency in relevant technology. Utilize assessment tools to help employees understand their current competency and which technology classes to take to learn and grow.
4.6	Develop Hybrid Management Training	Develop specialized training for supervisors and managers to augment skills and approaches for managing in a hybrid work environment.
Systems & Financial Support		
4.7	Use Credit Cards to Ease Training Procurement	Assign credit cards to management employees and supervisors for various expenditures including signing up for training and any associated travel costs. This will expedite current 4-8 week turnaround on check requests for training.
4.8	Upgrade Financial Support for Training & Education	<p>Implement the following programs to support enhanced staff skills and customer service:</p> <ul style="list-style-type: none"> <u>Tuition Reimbursement</u> -- Review existing protocols for tuition reimbursement for greater flexibility and ease of approval. Explore creating financial consistency across all labor groups. <u>Professional Association Memberships</u> – Authorize and create consistency across the organization for City payment of membership in professional associations to take advantage of training and best practices resources. Municipal professional associations include organizations such as American Planning Association, Municipal Management Assistants of Northern California, California Code Enforcement Association, etc. Develop list of authorized City sponsored memberships that are affiliated with position duties and include funding for memberships in department budgets. <u>Conferences</u> – Support attendance at professional conferences. Many professional associations hold annual conferences with extensive training and learning opportunities. <p>Broaden the organization’s philosophy regarding the City’s sponsorship (financial and time) of employee professional development to support general training and educational advancement even if the subject is not directly related to current work or classification. Align with individual professional goals and career advancement.</p>

5.0 - HEALTH, SAFETY & WELLNESS

In today’s world, employers need to ensure their workforce is – and feels – safe. Employers need to strengthen their safety cultures like never before plus include a broader view of health and wellness. COVID has stretched organizations to breaking points as we learned and adjusted to a worldwide pandemic. Increasing violence and reductions in civility put employees in difficult circumstances. Without proper investment and maintenance, our facilities are tired and lacking in many features. Wellness today includes physical and mental health, plus opportunities for flexibility and life balance including hybrid and alternative work schedules. Investing in and caring for the health, safety and wellness of employees is a critical element for employee retention.

Employee Health

5.1	Clear & Consistent COVID Safety Protocols & Practices	<p>Clarify vaccination and masking requirements across organization and communicate current policy to all employees.</p> <p>Send monthly updates regarding the policy, even if it has not changed since the previous month.</p> <p>Ensure safety requirements across the organization and within departments are clear, up to date and reviewed with all employees on a regular basis. Include current status on COVID safety protocols and practices on enhanced Intranet site or post in locations visible to field employees.</p>
5.2	Invest in Mental & Physical Health Services for Employees	<p>Explore current and potential mental and physical health services for employees. Review internal programs for areas to expand and mirror (Berkeley Fire has a strong peer counseling internal program; Berkeley Police has a strong fitness program). Research best practices of other public agencies regarding strong mental and physical health programs and services.</p> <p>Review resources available with all employees on a regular basis.</p> <p>Develop programs and activities to support physical health (e.g. ergonomic, lunch walk programs, gym membership partial reimbursements).</p> <p>Explore fun ways to incorporate healthy activities into training, culture and internal community-building events and activities.</p>

Employee Safety

5.3	Create a Citywide Safety Team	<p>Create a multi-disciplinary, multi-department Citywide Safety Review Team:</p> <ul style="list-style-type: none"> ▪ Assess and review workplace safety or potentially threatening situations that employees might be facing. ▪ Bring forward recommendations for training, building changes, and other suggestions to improve the safety of staff and customers. Create system for employee input and feedback. ▪ Review accidents and provide recommendations to implement additional safety measures as needed.
5.4	De-Escalation And High Conflict Training	<p>Provide training and tools to prioritize employee safety and deescalate work with high conflict individuals in order to improve safety for employees and the public.</p>

Work Schedules & Flexibility

5.5	Explore Expanding Alternative Work Schedules	<p>Review and update the City’s policies and practices regarding alternative work schedules as a means to providing more employee work flexibility while ensuring service delivery to customers. Consider 9/80 and 4/10 schedules if customer service can be maintained.</p>
-----	--	--

		Alternative Work Schedules provide employees with flexibility and additional time for life balance. While a Hybrid Work Schedule may not be possible for field staff or direct customer serving staff, an Alternative Work Schedule can be provided to these employees and provide them with some of the same benefits.
5.6	Formalize Hybrid Work Program	<p>Hybrid work is a critical tool to attract and retain employees. Support the use of Hybrid Work Schedules on a permanent basis throughout the organization while balancing flexibility for the employee and customer service / organizational connectivity for the departments.</p> <p>Provide clear guidelines to support departments in implementing Hybrid Work.</p> <p>Provide training to management to learn to manage in this new environment.</p>
Facilities & Equipment		
5.7	Adequately Fund Capital Improvement Program & Replacement Reserves	<p>Ensure Capital Improvement Program prioritizes deficiencies in City facilities with annual budget allocation.</p> <p>Establish budgeted replacement reserves for building and equipment replacement.</p> <p>Contract out more maintenance as needed to address current critical deficiencies.</p>
5.8	Prioritize Investments in Buildings, Vehicles, & Equipment	<p>Ensure health and safety of staff and customers is prioritized within City facilities. Ensure functional, safe and clean systems:</p> <ul style="list-style-type: none"> ▪ HVAC with appropriate filters; ▪ Windows; ▪ Carpeting / flooring; and, ▪ Physical security of sites. <p>Provide security for staff and customers as needed.</p> <p>Ensure public safety and public works facilities are regularly maintained and replaced to professional standards.</p> <p>Ensure Equipment & Vehicle Safety is prioritized to ensure safety of employees and the public.</p> <p>Use outside resources (e.g. Fire Department equipment) if needed to ensure proper maintenance and repair.</p>

6.0 - ELEVATE INTERNAL PROCESSES

Elevating the importance and effectiveness of the City’s administrative functions is necessary if the City of Berkeley is to become an Employer of Choice. Berkeley is known for its community innovation and willingness to try new approaches to community problems. The same innovation should be encouraged and rewarded for internal process improvements. Innovation applied to internal processes will support organizational effectiveness, relationship building, and efficiency. By reducing inefficiencies and improving processes and use of technology, employees can reduce their frustration and focus their time and expertise on customer service and public improvements.

Structure & Programs

6.1	Restructure Reporting of Administrative Services (HR, IT, Finance, Contracts) to One Deputy City Manager	<p>Realign the management reporting structure so that the Human Resources, Information Technology, Finance and Contracts report to the same executive (Deputy City Manager).</p> <p>Encourage collaboration and coordination among the three departments to problem solve, share staff resources and innovate.</p>
6.2	Elevate Importance of Service-Oriented Administrative Services & Customer Connectivity	<p>Ensure administrative services departments deliver elevated level of customer service to departments and function as true business partners with line departments.</p> <p>Schedule regular bi-monthly meetings with Finance and IT department representatives to provide feedback, ideas, advise and help improve systems for each function. These meetings will facilitate to provide input on the most critical short- and long-term internal service needs of the departments.</p> <p>Develop service level metrics and provide regular reports on status of work orders and key initiatives.</p>
6.3	Create An Innovation Program	<p>Create an Innovation Program that reviews and rewards employees for creative and innovative ideas that save the organization time and money. Explore other ideas such as Innovation Labs, etc.</p>

Business Improvements

6.4	Empower Strike Teams / Interdepartmental Work Groups	<p>Create a Strike Team Model to accelerate implementation of improvements to internal processes across the organization. Empower the Strike Team with the authority to review systems, processes and technology and make improvements.</p> <p>Hire a Business Process Team (under Special Projects in CMO) to lead Strike Teams, document and realign key business processes (e.g., payroll, onboarding, staff report writing, technology acquisition) to affect efficiency and effectiveness of technology and practices/systems. Provide and coordinate staff training on processes.</p>
6.5	Provide Training on Common Administrative Practices & Procedures	<p>Employees and managers need to know how to process a contract, pay an invoice, start a recruitment, utilize an eligibility list, or prepare an evaluation.</p> <p>Create user guides, screen shots, and training manuals to help staff navigate the processes and procedures that are required for HR, IT, Contracts and Finance. Videos and training sessions should also be explored.</p>
6.6	Maximize Intranet as an Employee Resource	<p>Review and revamp as necessary, the City’s Intranet (i.e. SharePoint and Microsoft Suite of services), to create a vibrant, well organized, and content rich system for employees and managers to access and utilize.</p>

		<p>Identify an owner of these systems and complete buildout and deployment. Provide departments access to update within guidelines and naming conventions. Examples of content include training videos, communication templates, access to employee benefit resources, documentation of common processes.</p>
<p>6.7</p>	<p>Implement Business Practice Improvements in Finance, Information Technology, Payroll, HR and Contracts</p>	<p>Prioritize implementation of these services to support efficient operations across the organization:</p> <p><u>Finance / Payroll</u> -- Establish implementation deadlines for:</p> <ol style="list-style-type: none"> 1. On-line electronic timesheets for Payroll integrated with the City’s financial management system. 2. ERMA modules implementation <p><u>Information Technology</u> -- Prioritize implementation of basic services to support efficient operations across the organization:</p> <ol style="list-style-type: none"> 1. File sharing - Consistency software and retention conventions across the organization. 2. TEAMs - Deployment of full capabilities with access when working on-site or remotely. 3. Cell phones - Consider change in cell phone policy that allows for reimbursement v. City issued cell phones. 4. Work Order System – Enhance transparency to provide departments with estimated time of service delivery and status on IT service requests. <p><u>Contracts</u> -- Enhance common processes with modern templates and software.</p> <ol style="list-style-type: none"> 1. Request for Proposals / Purchasing solicitations – Deploy standard templates for various types of RFPs and solicitations. Ensure vendor quality and performance is integrated into consistent purchasing solicitation processes throughout organization. 2. Vendor performance standards – Establish basic standards to ensure satisfactory service from City vendors. <p><u>Signature Authority</u> – Update levels of signing authority for City Manager and City Attorney to levels similar to other organizations of Berkeley’s complexity. Allows for greater efficiency and effectiveness in business processing. A quarterly report can be provided to Council to ensure transparency.</p> <ol style="list-style-type: none"> 1. <u>City Manager Signing Authority</u> -- Increase City Manager’s signature authority from \$50,000 to a minimum for \$100,000. Conduct a study of other similar size municipalities to learn about the practices of other agencies in this authority for additional increase. 2. <u>City Attorney Settlement Authority</u> – Increase City Attorney’s signature Authority from \$15,000 for an individual liability claim to \$50,000. Conduct a study of other similar size municipalities to learn about the practices of other agencies in this authority for additional increase.

COMPENSATION & BENEFITS – ORGANIZATIONAL FEEDBACK

Compensation and benefits are key ingredients in the attraction and retention of employees. There was a range of feedback provided to MRG regarding Berkeley's competitive position in the marketplace and compensation. Many employees and managers participating in interviews and focus groups raised concerns about aspects of the City's compensation portfolio. During MRG's interviews and focus groups, comments and suggestions were collected, and themes developed regarding compensation and benefits.

These items are subject to bargaining with labor unions and require negotiations and/or a meet and confer process. In addition, many compensation concerns require additional research and analysis before recommendations could be developed which was beyond the scope of this study. For these reasons, MRG did not include compensation and benefits recommendations within the formal Roadmap. However, these items should be reviewed by the City and labor as negotiations are initiated.

The City does not have a formal compensation policy or philosophy for the City as a whole that supports benefit structure and continuity across all labor groups. Many non-salary benefits have been negotiated over time by each individual labor group creating inconsistencies among labor groups. These different levels create perceptions of unfairness. In addition, these individual differences create added administrative complexity for the Human Resources Department, Auditor's Office and Finance Departments. It takes time to align core benefits across all labor groups, but the gains are worth the work for the employee and the organization. Below are comments and themes provided to MRG during interviews and focus groups.

SALARY

- Many concerns from employees, labor groups, and management regarding base salary levels for all levels of employees and compaction issues. Very difficult to recruit and retain specialized technical positions such as engineers, information technology staff, public safety, and electricians. MRG was told of numerous instances where prospective candidates chose to not accept employment offers from Berkeley based on the salary and benefits offered.
- Employees that worked in the office during COVID versus remotely feel that there should be some financial appreciation for their work.
- Explore mechanisms to allow an employee to be moved to a higher step based on equity, retention, or performance. Review longevity pay or retention differentials as tools to retain employees at key intervals.

BENEFITS

Benefits – Comprehensive Review

- Consider a comprehensive review of benefits looking forward to what employees value now versus when the current benefit system was developed decades ago. Employees are generally seeking more value now versus the value for a future retirement (which will be less for PEPRA employees).
- Consider making benefit levels that same for all employees for as many basic health and wellbeing benefits as possible. This would simplify benefit administration and remove equity concerns.

Retirement – PERS

- Concerns remain regarding the ramp down and equalization of Classic and PEPRA for existing and prospective employees.

Health Related Benefits

- Medical Benefits – Deep appreciation for the rich health benefit with limited co-pays.
- Vision -- No vision plan offered by City except to IBEW Local 1245. Relatively inexpensive benefit. High interest from employees.

Leave Benefits

- Vacation Leave – Various ideas offered for vacation leave.
 - Leave Accrual Rates – Concerns about the rate of accruals at various years of service.
 - Lateral Hires -- Interest in being able to offer seasoned public employees coming from other agencies with higher level of vacation leave as a starting point. Want to attract seasoned lateral talent without starting over with only 2 weeks of vacation leave. Explore way to provide years of service credit from other public agencies into Berkeley’s leave accrual rates. (Ability to hire lateral police and fire personnel is critical.)
 - Desire for vacation cash out with management of leave caps.
- Administrative Leave – Administrative Leave is low (50 hours/year) compared to other agencies. Most Bay Area agencies provide higher hours of Administrative Leave to recognize the additional hours of work provided by management and professional staff including commission, committees and other night meetings while being exempt from overtime.
- Family / Elder Care Leave – No City paid Family Leave and Elder Care leave in place. Current practice allows for 1 year of leave with no pay and City provided medical benefits.

Commuter Subsidy and Employee Parking Benefits

- Transit / Parking Benefits -- Extensive frustration and comments regarding the Commuter Subsidy and employee parking. A review and update of parking and transit programs and benefits would be well received by employees.
 - While the City wants to encourage public transit for environmental sustainability, it’s not convenient nor usable by many employees based on where they live.
 - Parking is cumbersome and costly for employees working downtown. Many employees park many blocks away from City Hall to ensure free parking. When it is dark outside, staff doesn’t always feel safe walking to and from their vehicle. Employees stated that the convenient City Center lot frequently has capacity that is underutilized, but the cost is too high for employees without some City subsidy.
 - Enhancements to the parking and transit benefits can be seen as a way to recognize the efforts of employees who are coming into the office every day and have extra costs associated with their work for the City of Berkeley.

Miscellaneous Benefits

- Gym / Health Membership – The City pays for YMCA membership located in Berkeley. Consider providing benefit to employees using gyms outside of Berkeley.
- Employee Assistance Program – Provide additional mental health visits under base contract.

Management Benefits

- Interest in exploring car allowance, performance bonus, additional Administrative or Management Leave, enhanced wellness program, a sabbatical after determined term of service.

JOB CLASSIFICATION

- Many job classifications are outdated in terms of titles, requirements and descriptions of duties with affects on recruitment and promotional opportunities. Specifically, MRG heard concerns raised regarding Information Technology and Public Health.

Municipal Resource Group, LLC is an experienced, full-service consulting firm dedicated to assisting client agencies in attaining their strategic goals. MRG was founded in 2009 by highly skilled and broadly experienced professionals. MRG has a team of professionals who work to address challenges for both public and private sector clients. Our consultants have extensive experience in all aspects of Organizational Assessment & Development, Human Resources, including staffing and effectiveness analyses. Our team is experienced in working with elected officials, agency executives, managers, and staff.

- ✓ Full-service professional management consulting firm with over 60 affiliated consultants.
- ✓ Offices in Sacramento and Southern California.
- ✓ Deep HR and organizational development expertise.
- ✓ Deliver transformational solutions to leadership, governance, human resource, financial management and other complex organizational challenges.
- ✓ Help agencies rethink historic practices and review what is possible within agency-specific rules and standards.

Project Team:

MARY EGAN

Managing Partner/CEO

- Executive Coaching, Workplace Investigation, & Crisis Navigation
- Delivering truth to governing boards/leaders to solve complex problems

CATHY CAPRIOLA

Project Manager

- 30 years – local government
- Retired City Manager
- Organization Development, Leadership & Team Coaching
- Developer of people & organizations to the next tier

CRAIG WHITTON

Consultant

- 31 years - local government
- Retired DH & Assistant City Manager
- Driver of actionable service delivery improvements

MARCIE SCOTT

Consultant

- 20 years as HR Director & Manager in cities
- Seasoned guide for personnel management & employee relations
