Emergency Response Plan/Contingency Plan

The following items are elements of a comprehensive emergency response plan/contingency plan that meets state requirements. If your facility has a written plan, or if you are to prepare one, make sure all the elements listed are covered by your plan. Small facilities with simple operations may complete the boxes below to be in compliance with the written emergency plan requirement. Please submit a copy of your written response plan or complete and submit this form.

I. Facility Information

Facility Name: THE MODEL GARAGE, INC.	Phone: 510 540-5899
Address: 2920 SHATTUCK AVENUE	
City: BERKELEY	Zip: 94705

II. Emergency Coordinators

Primary Coordinator	Secondary Coordinator
Name: DONALD WORTH.	Name:
Title: OWNER / VICE PRESIDENT.	Title:
Work Phone: 510 540 5899	Work Phone:
After hours Phone: 510 525-6912	After hours Phone:
Pager: 510 517 6313	Pager:

III. Emergency Telephone Numbers and Arrangements

The emergency coordinator shall immediately notify the following whenever a release, fire, or explosion threatens human health or the environment:

Agency	Phone
Fire Department	911
California Emergency Management Agency	(916) 845-8911
City of Berkeley Toxics Management Division	(510) 981-7460 or 911
Hospital/Medical Center (if injuries)	
EBMUD Waste Water Treatment Facility (if to sewer)	(510) 287-1651
Hazardous Waste Contractor (if clean up needed)	
Bay Area Air Quality Management District	(800) 334-6367
Other agencies:	

Arrangements: (Please check one box)

- ☒ We have no formalized written agreements with any emergency response agency or contractor.
- ☐ We have formalized written agreements with _____

  Telephone: _____ for emergency response.

IV. Earthquake Response

Identify the areas and/or mechanical equipment or other systems that could require immediate inspection or isolation because of their vulnerability to earthquake related ground motion.

Areas/equipment identified to be inspected immediately after an earthquake:	HAZARDOUS MATERIAL STORAGE TANKS (COOLANT, WASTE OIL, NEW MOTOR OIL), STORAGE SHED, AUTOMOBILE LIFTS, INDIVIDUAL MECHANIC WORKSTATIONS.

V. Emergency Equipment Inventory Table

EQUIPMENT CATEGORY	✓ if these are provided	Equipment	Location*	Description**
Personal Protective Equipment, Safety Equipment, First Aid Equipment		Chemical Protective Boots		
		Chemical Protective Gloves		
		Safety Glasses/Goggles/Face shields		
		Chemical Protective Clothing		
		Hard Hats		
		Chemical Monitoring Equipment (describe)		
	✓	First Aid Kits	SOUTH WALL	BEHIND SERVICE DESK (BASIC KIT)
	✓	Eye Wash Stations	SOUTH WALL	BEHIND SERVICE DESK (SINGLE-USE)
		Safety Showers		
		Cartridge Respirators and Cartridges (describe)		
		Self-Contained Breathing Apparatus (SCBA)		
		Other (describe)		
Fire Extinguishing Systems	✓	Fire Extinguishers	VARIOUS	10 TOTAL, INCLUDING 1 UPSTAIRS
		Automatic Fire Systems		
		Fire Alarm Boxes		
Spill Control Equipment, Decontamination Equipment	✓	Absorbents, Neutralizers (describe)	SHED	GREASE SWEEP (DIATOMACEOUS EARTH) SMALL QTY.
	✓	Shovels/Brooms/Squeegees	FRONT OF SHOP	
		Overpack drum/Spill drum		
		Berms/Dikes (describe)		
		Decontamination Equipment (describe)		
		Gas cylinder leak repair kits (describe)		
		Other (describe)		
Communications and Alarm Systems	✓	Telephones	5	4 DOWNSTAIRS, 1 UPSTAIRS.
		Intercoms/PA systems		
		Portable 2 way radios		
		UST leak detection monitors		
		Chemical alarms (describe)		
Additional Equipment (Use additional pages if needed)				

* If appropriate, use the location code(s) from your Hazardous Materials Business Plan.

** Describe the equipment, such as type and quantity, and its capabilities. If applicable, specify any testing/maintenance procedures/intervals.

VI. Evacuation Information:

Evacuation Announcement	☐ Bell ☐ PA System Other _____ ☐ Horn ☒ Shouting
Evacuation Route	☐ Map Other X
Assembly Area	Location: SOUTH OF SHOP, IN FRONT of COPY STORE
Re-entry Procedures	

VII. Emergency Procedures:

Emergency Coordinator Responsibilities:

1. Whenever there is an imminent or actual emergency situation such as a explosion, fire, or release, the emergency coordinator *(or his/her designee when the emergency coordinator is on call)* shall:
   a. Identify the character, exact source, amount, and aerial extent of any released hazardous materials.
   b. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects *(e.g. the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.)*.
   c. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
   d. Notify appropriate local authorities *(i.e., call 911)*.
   e. Notify the State Office of Emergency Services at 1-800-852-7550.
   f. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
   g. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.

2. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
   a. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from a explosion, fire, or release at the facility.
   b. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
   c. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
   d. Notify the Cal/EPA's Department of Toxic Substances Control and the City of Berkeley Toxics Management Division that the facility is in compliance with requirements 2-a and 2-b, above.

Special site specific procedures:

Emergency	Response Action
Hazardous Material & Hazardous Waste Spills/Releases:	OIL / COOLANT: ABSORB WITH RAGS FIRST, SWEEP RESIDUE AWAY WITH MINIMAL AMOUNTS of GREASE SWEEP.
Fire	VOICE WARNING, USE of EXTINGUISHERS WHEN POSSIBLE AND APPROPRIATE. CALL 911 if FIRE IS UNCONTROLLABLE
Explosion	EVACUATE, MEET AT PREDETERMINED MEETING PLACE. CALL 911 if APPROPRIATE.
Earthquake	EVACUATE BUILDING. MEET AT PREDETERMINED LOCATION.
Other	

Employee Training Plan

1. Scope

This plan is designed to provide employees with training on hazardous materials and hazardous waste that will satisfy the requirements of the California Health and Safety Code Chapter 6.95 and Chapter 6.5.

Facility Name:	THE MODEL GARAGE, INC.
Address:	2920 SHATTUCK AVENUE
Main Activity:	MAINTENANCE + REPAIR of AUTOMOBILES.
Building or Areas where hazardous materials/wastes are found:	SIDE SHED, AREA IMMEDIATELY OUTSIDE of SOUTH-WESTERN ROLL-DOWN DOOR. VARIOUS LOCATIONS THROUGHOUT THE SHOP.

2. Responsibilities

The following persons are responsible for ensuring that this Training Plan is implemented:

Name/Title	Training Responsibility
DONALD WORTH.	OUTLINING/IDENTIFYING TRAINING GOALS/OBJECTIVES
MORGAN WORTH.	HANDS-ON TRAINING/DEMONSTRATION

3. Employees/New Employees

New employees are trained during orientation, before starting on a job? ☒ YES ☐ NO

New employees who handle hazardous waste are trained in hazardous waste management within six months of hire date? ☒ YES ☐ NO

4. New Assignments or Changes in Operations

In the event of new assignments or of changes in operation, affected employees are trained before the new assignment or the change in operation takes place. ☒ YES ☐ NO

5. Refresher Training

Refresher training will be provided MONTHLY (how often). The method used will be: *(check all that apply)*

- ☐ Outside classes
- ☒ Safety meetings
- ☐ In-house classes provided by contractor
- ☐ In-house classes conducted by in-house trainers

6. Training Topics

The following table indicates the training topics covered for this facility, as indicated with a ☑. Other documentation on these training topics is maintained and are available to the inspector upon request.

All employees are trained to do the following procedures, as appropriate:	
☒	1. Initiate, activate, or recognize internal alarms and other emergency announcements.
☒	2. Notify internal or on-site emergency responders listed in the emergency response/contingency plan.
☒	3. Notify agencies listed in the emergency/contingency plan.
☒	4. Locate and review contents of written emergency response/contingency plan.
☒	5. Initiate, conduct, or follow evacuation procedures as described in the emergency response/contingency plan.
Hazardous materials/waste handlers are additionally trained in the following subjects:	
☒	1. Safe methods for handling and storage of hazardous materials and hazardous waste.
☒	2. Locations and proper use of personal protective equipment.
☒	3. Locations and proper use of fire and spill control equipment.
☒	4. Specific hazards of each chemical or waste to which they may be exposed, including the pathways of exposure (i.e. skin absorption, inhalation, ingestion).
☒	5. Follow emergency procedures for chemical/waste spills, earthquake, fire, and/or medical emergencies as described in the emergency response/contingency plan.
☒	6. Hazardous waste handlers/managers are also trained in all aspects of hazardous waste management specific to their job duties (e.g. accumulation time, storage period, labels, inspection of containers and storage areas, uniform hazardous waste manifests, etc.)

7. Emergency Response Team

This facility has a formally organized Emergency Response Team. ☐ YES ☒ NO

Emergency Response Team members are additionally trained for the following activities:	
☐	1. Personnel rescue procedures.
☐	2. Shutdown of operations.
☐	3. Liaison with emergency response agencies.
☐	4. Use, maintenance, and replacement of emergency response equipment.
☐	5. Emergency response drills are conducted, at least *(specify frequency)* [ ] times a year.
☐	6. Refresher training is provided, at least annually.

8. Recordkeeping

Employee training and other records are maintained at the facility. These include the following:

☑	1. Record of training for each employee (date and duration of training, subject matter covered, instructor, etc.).
☑	2. Training records of current and former employees. (For current employees, records are to be retained until closure of the facility. For former employees, training records are to be retained for at least 3 years after termination of employment.
☑	3. Description of introductory and continuing training programs for each employee classification.
☑	4. Current emergency response, contingency, and/or spill response plan (for underground or aboveground tanks).
☑	5. Description and documentation of emergency response drills.
☐	6. Record of reportable/recordable accidental releases of hazardous material/waste.
☑	7. Record of inspections of hazardous material/waste storage areas.
☐	8. Record of daily inspection of hazardous waste tanks.
☐	9. Inspection procedures for identified earthquake-sensitive areas and systems in the facility.

Note: The above list does not necessarily include every type of record required to be maintained by your facility.

Training records are maintained in the following location: OFFICE FILING CABINET LABELED "HAZARDOUS WASTE".

SUMMARY OF VIOLATIONS, CORRECTIVE ACTIONS, FINDINGS:

Class (M, II, I)	Violation Code/ Observation and PE	Citation, Description, Corrective Action Required, and/or Observation
M.	HW.2.2	CCR 66262.34(f)
		Facility failed to label mobile used oil roll-arounds. Label with the words "Used Oil", "hazardous waste", accumulation start date (empty weekly/biweekly), name + address of generator, hazardous properties of waste. Corrective action: Label hazardous waste containers
M	HW.2.7	CCR 66262.34(d)(2)
		Facility failed to keep hazardous waste containers closed except for adding + removing waste. Observed open keg of waste oil, open funnel/bung of waste antifreeze, ~~open aqueous parts washer~~ Corrective action: Keep containers closed unless adding or removing waste.

Note: The facility is subject to re-inspection at any time (re-inspection fees may apply).

☒ CUPA violations cited on page(s) 1-2 shall be corrected within 30 days.
☐ SW violations cited shall be corrected within____ days or before the next rain event.
☒ Submit Certification of Return to Compliance form within 30 days.

Form Deficiencies

- ☐ Owner Operator Form: Invalid/Missing Business Name/Address
- ☐ Owner Operator Form: Invalid/Missing Business Owner Name/Address
- ☐ Owner Operator Form: Invalid/Missing Environmental Contact
- ☐ Owner Operator Form: Invalid/Missing Emergency Contacts
- ☐ Chemical Description Form: Invalid/Missing Location - Map# and/or Grid#
- ☐ Chemical Description Form: Invalid/Missing Fire Code Hazard Classes
- ☐ Chemical Description Form: Invalid/Missing Physical state
- ☐ Chemical Description Form: Invalid/Missing Average daily amount and or Maximum daily amount
- ☐ Chemical Description Form: Invalid/Missing Units
- ☐ Emergency Plan Form: The plan does not adequately address Release Prevention, Immediate Notification and Evacuation, and Emergency Response Protocols and Cleanup Procedures
- ☐ None

Other Form Deficiencies

Map Deficiencies

- ☐ Map is illegible (or does not scan well)
- ☐ Map lacks orientation (North arrow)
- ☐ Map lacks facility name and address
- ☐ Streets on map are not labeled
- ☐ Map is significantly off scale
- ☐ Structures are not outlined

FEE SUMMARY SHEET
For Permit Period FY13 (Base Reporting Period: 2012)

Business Name: The Model Garage [CID: 158]

Address: 2920 Shattuck

Total Aggregate Quantities Stored or Handled at This Facility

The row heading "Hazardous Materials" requires a sum of all amounts reported on the Chemical Description pages, including data reported for hazardous wastes.

Quantities Summarized:

Chemicals:	CY2012 ***Liquids***	CY2012 ***Solids***	CY2012 ***Gases***	Last Reported	FY2013 Permit
Total number of ***all*** chemicals:	9	~~0~~	5	14	14
Total no. of ***waste*** chemicals:	4	~~0~~			
	Gallons ***All liquids***	***Pounds*** ***All solids***	***Cu. Ft.*** ***All gases***		
Hazardous Materials: (***ALL*** Chemicals) - Sum of *all* Box 218s – Max. Daily Amt.	806	~~0~~	758	B3	B3
Hazardous Wastes: (***ONLY*** Wastes) – Sum of *all* Box 219s – Annual Waste Amt.	2660	~~0~~		L25	L12
Underground Storage Tanks: No. of USTs: _____					
Universal Waste:	CESQUWG —	HANDLER —	DESTINATION —	Date entered into HTE (and initials)	
Other Billing Categories:	Tiered —	etiologic —	radiologic —		
inert gas fee — / nano —	CalARP —	EPCRA —	APSA —		

Completed by: Michael A Pinkerton Date: 4/22/13

BUSINESS ACTIVITIES

I. FACILITY IDENTIFICATION

FACILITY ID # (Agency Use Only)	FA0000021 1	EPA ID # (Hazardous Waste Only) 2	CAD983642786
BUSINESS NAME (Same as Facility Name of DBA-Doing Business As) 3	THE MODEL GARAGE INC.		
BUSINESS SITE ADDRESS 103	2920 SHATTUCK AVE		
BUSINESS SITE CITY 104	BERKELEY	CA	ZIP CODE 94705 105

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page.

Does your facility…	If Yes, please complete these pages of the UPCF….	
A. HAZARDOUS MATERIALS Have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION
B. REGULATED SUBSTANCES Have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	☐ YES	Coordinate with your local agency responsible for CalARP.
C. UNDERGROUND STORAGE TANKS (USTs) Own or operate underground storage tanks?	☐ YES	UST FACILITY (Formerly SWRCB Form A) UST TANK (one page per tank) (Formerly Form B)
D. ABOVE GROUND PETROLEUM STORAGE Own or operate ASTs above these thresholds: Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	☐ YES	NO FORM REQUIRED TO CUPAs
E. HAZARDOUS WASTE Generate hazardous waste?	☒ YES	EPA ID NUMBER – provide at the top of this page
Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	☐ YES	RECYCLABLE MATERIALS REPORT (one per recycler)
Treat hazardous waste on-site?	☐ YES	ON-SITE HAZARDOUS WASTE TREATMENT – FACILITY ON-SITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit)
Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES	CERTIFICATION OF FINANCIAL ASSURANCE
Consolidate hazardous waste generated at a remote site?	☐ YES	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION
Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	☐ YES	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION
Generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	☐ YES	Obtain federal EPA ID Number, file Biennial Report (EPA Form 8700-13A/B), and satisfy requirements for RCRA Large Quantity Generator.
Household Hazardous Waste (HHW) Collection site?	☐ YES	See CUPA for required forms.

F. LOCAL REQUIREMENTS 15

(You may also be required to provide additional information by your CUPA or local agency.)

CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS)

CONSOLIDATED EMERGENCY RESPONSE / CONTINGENCY PLAN

Prior to completing this Plan, please refer to the INSTRUCTIONS FOR COMPLETING A CONSOLIDATED CONTINGENCY PLAN

A. FACILITY IDENTIFICATION AND OPERATIONS OVERVIEW

FACILITY ID # 1.	CERS ID A1.	DATE OF PLAN PREPARATION/REVISION A2.
FA0000211		02/13/2013

BUSINESS NAME *(Same as Facility Name or DBA - Doing Business As)* 3.
THE MODEL GARAGE INC.

BUSINESS SITE ADDRESS 103.
2920 SHATTUCK AVE

BUSINESS SITE CITY 104.		ZIP CODE 105.
BERKELEY	CA	94705

TYPE OF BUSINESS (e.g., Painting Contractor) A3.	INCIDENTAL OPERATIONS (e.g., Fleet Maintenance) A4.
Automobile repair	

THIS PLAN COVERS CHEMICAL SPILLS, FIRES, AND EARTHQUAKES INVOLVING: (Check all that apply) A5.
☒ 1. HAZARDOUS MATERIALS; ☒ 2. HAZARDOUS WASTES

B. INTERNAL RESPONSE

INTERNAL FACILITY EMERGENCY RESPONSE WILL OCCUR VIA: (Check all that apply) B1.
☒ 1. CALLING PUBLIC EMERGENCY RESPONDERS (i.e., 9-1-1)
☒ 2. CALLING HAZARDOUS WASTE CONTRACTOR
☒ 3. ACTIVATING IN-HOUSE EMERGENCY RESPONSE TEAM

C. EMERGENCY COMMUNICATIONS, PHONE NUMBERS AND NOTIFICATIONS

Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the Emergency Coordinator (or his/her designee when the Emergency Coordinator is on call) shall:
1. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
2. Notify appropriate local authorities (i.e., call 9-1-1).
3. Notify the California Emergency Management Agency at (800) 852-7550.

Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall notify the California Department of Toxic Substances Control (DTSC), the local Unified Program Agency (UPA), and the local fire department's hazardous materials program that the facility is in compliance with requirements to:
1. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility; and
2. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.

INTERNAL FACILITY EMERGENCY COMMUNICATIONS OR ALARM NOTIFICATION WILL OCCUR VIA: (Check all that apply) C1.

☒ 1. VERBAL WARNINGS;	☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM;	☒ 3. TELEPHONE;
☐ 4. PAGERS;	☐ 5. ALARM SYSTEM;	☐ 6. PORTABLE RADIO

NOTIFICATIONS TO NEIGHBORING FACILITIES THAT MAY BE AFFECTED BY AN OFF-SITE RELEASE WILL OCCUR BY: (Check all that apply) C2.

☒ 1. VERBAL WARNINGS;	☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM;	☒ 3. TELEPHONE;
☐ 4. PAGERS;	☐ 5. ALARM SYSTEM;	☐ 6. PORTABLE RADIO

D. EMERGENCY CONTAINMENT AND CLEANUP PROCEDURES

SPILL PREVENTION, CONTAINMENT, AND CLEANUP PROCEDURES: (Check all boxes that apply to indicate your procedures for containing spills, releases, fires or explosions; and. preventing and mitigating associated harm to persons, property, and the environment.)

D1.

- ☒ 1. MONITOR FOR LEAKS, RUPTURES, PRESSURE BUILD-UP, ETC.;
- ☐ 2. PROVIDE STRUCTURAL PHYSICAL BARRIERS (e.g., Portable spill containment walls);
- ☐ 3. PROVIDE ABSORBENT PHYSICAL BARRIERS (e.g., Pads, pigs, pillows);
- ☐ 4. COVER OR BLOCK FLOOR AND/ OR STORM DRAINS;
- ☐ 5. BUILT-IN BERM IN WORK / STORAGE AREA;
- ☐ 6. AUTOMATIC FIRE SUPPRESSION SYSTEM;
- ☐ 7. ELIMINATE SOURCES OF IGNITION FOR FLAMMABLE HAZARDS (e.g. Flammable liquids, Propane);
- ☒ 8. STOP PROCESSES AND/OR OPERATIONS;
- ☐ 9. AUTOMATIC / ELECTRONIC EQUIPMENT SHUT-OFF SYSTEM;
- ☒ 10. SHUT-OFF WATER, GAS, ELECTRICAL UTILITIES AS APPROPRIATE;
- ☒ 11. CALL 9-1-1 FOR PUBLIC EMERGENCY RESPONDER ASSISTANCE / MEDICAL AID;
- ☒ 12. NOTIFY AND EVACUATE PERSONS IN ALL THREATENED AREAS;
- ☒ 13. ACCOUNT FOR EVACUATED PERSONS IMMEDIATELY AFTER EVACUATION CALL;
- ☐ 14. PROVIDE PROTECTIVE EQUIPMENT FOR ON-SITE RESPONSE TEAM;
- ☐ 15. REMOVE OR ISOLATE CONTAINERS / AREA AS APPROPRIATE;
- ☒ 16. HIRE LICENSED HAZARDOUS WASTE CONTRACTOR;
- ☒ 17. USE ABSORBENT MATERIAL FOR SPILLS WITH SUBSEQUENT PROPER LABELING, STORAGE, AND HAZARDOUS WASTE DISPOSAL AS APPROPRIATE;
- ☒ 18. SUCTION USING SHOP VACUUM WITH SUBSEQUENT PROPER LABELING, STORAGE, AND HAZARDOUS WASTE DISPOSAL AS APPROPRIATE;
- ☐ 19. WASH / DECONTAMINATE EQUIPMENT W/ CONTAINMENT and DISPOSAL OF EFFLUENT / RINSATE AS HAZARDOUS WASTE;
- ☐ 20. PROVIDE SAFE TEMPORARY STORAGE OF EMERGENCY-GENERATED WASTES;
- ☐ 21. OTHER (Specify):

D2.

E. FACILITY EVACUATION

THE FOLLOWING ALARM SIGNAL(S) WILL BE USED TO BEGIN EVACUATION OF THE FACILITY (CHECK ALL THAT APPLY): E1.

- ☐ 1. BELLS;
- ☐ 2. HORNS/SIRENS;
- ☒ 3. VERBAL (i.e., SHOUTING);
- ☐ 4. OTHER (Specify): E2.

THE FOLLOWING LOCATION(S) IS/ARE EVACUEE EMERGENCY ASSEMBLY AREA(S) (i.e., Front parking lot, specific street corner, etc.) E3.

Sidewalk by EasyCopy Center.

Note: The Emergency Coordinator must account for all on site employees and/or site visitors after evacuation.

☐ EVACUATION ROUTE MAP(S) POSTED AS REQUIRED E4.

Note: The map(s) must show primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas, and must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

F. ARRANGEMENTS FOR EMERGENCY SERVICES

Explanation of Requirement: Advance arrangements with local fire and police departments, hospitals, and/or emergency services contractors should be made as appropriate for your facility. You may determine that such arrangements are not necessary.

ADVANCE ARRANGEMENTS FOR LOCAL EMERGENCY SERVICES (Check one of the following) F1.

- ☒ 1. HAVE BEEN DETERMINED NOT NECESSARY; *or*
- ☐ 2. THE FOLLOWING ARRANGEMENTS HAVE BEEN MADE (Specify):

F2.

G. EMERGENCY EQUIPMENT

Check all boxes that apply to list emergency response equipment available at the facility and identify the location(s) where the equipment is kept and the equipment's capability, if applicable. [e.g., ☒ CHEMICAL PROTECTIVE GLOVES | Spill response kit | One time use, Oil & solvent resistant only.]

H. EARTHQUAKE VULNERABILITY

Identify areas of the facility that are vulnerable to hazardous materials releases / spills due to earthquake-related motion. These areas require immediate isolation and inspection.

VULNERABLE AREAS: (Check all that apply)	H1.	LOCATIONS (e.g., shop, outdoor shed, forensic lab)	
☒ 1. HAZARDOUS MATERIALS / WASTE STORAGE AREA		Shed and shop.	H2.
☒ 2. PROCESS LINES / PIPING		Shed and shop.	H3.
☐ 3. LABORATORY			H4.
☐ 4. WASTE TREATMENT AREA			H5.

Identify mechanical systems vulnerable to releases / spills due to earthquake-related motion. These systems require immediate isolation and inspection.

VULNERABLE SYSTEMS: (Check all that apply)	H6.	LOCATIONS	
☒ 1. SHELVES, CABINETS AND RACKS		Shed and shop.	H7.
☒ 2. TANKS (EMERGENCY SHUTOFF)		Shed	H8.
☒ 3. PORTABLE GAS CYLINDERS		Shop	H9.
☒ 4. EMERGENCY SHUTOFF AND/OR UTILITY VALVES		Shed.	H10.
☐ 5. SPRINKLER SYSTEMS			H11.
☐ 6. STATIONARY PRESSURIZED CONTAINERS (e.g., Propane dispensing tank)			H12.

I. EMPLOYEE TRAINING

Explanation of Requirement: Employee training is required for all employees handling hazardous materials and hazardous wastes in day-to-day or clean-up operations including volunteers and/or contractors. Training must be:

- Provided within 6 months for new hires;
- Amended as necessary prior to change in process or work assignment;
- Given upon modification to the Emergency Response / Contingency Plan, and updated/refreshed annually for all employees.

Required content includes all of the following:

- Material Safety Data Sheets;
- Hazard communication related to health and safety;
- Methods for safe handling of hazardous substances;
- Fire hazards of materials / processes;
- Conditions likely to worsen emergencies;
- Coordination of emergency response;
- Notification procedures;
- Applicable laws and regulations;
- Communication and alarm systems;
- Personal protective equipment;
- Use of emergency response equipment (e.g. Fire extinguishers, respirators, etc.);
- Decontamination procedures;
- Evacuation procedures;
- Control and containment procedures;
- UST monitoring system equipment and procedures (if applicable).

INDICATE HOW EMPLOYEE TRAINING PROGRAM IS ADMINISTERED (Check all that apply) I1.

☐ 1. FORMAL CLASSROOM; ☐ 2. VIDEOS; ☒ 3. SAFETY / TAILGATE MEETINGS;

☐ 4. STUDY GUIDES / MANUALS (Specify): _____ I2.

☐ 5. OTHER (Specify): _____ I3.

☐ 6. NOT APPLICABLE BECAUSE FACILITY HAS NO EMPLOYEES

Large Quantity Generator (LQG) Training Records: Large quantity hazardous waste generators (i.e., who generate more than 270 gallons/1,000 kilograms of hazardous waste per month) must retain written documentation of employee hazardous waste management training sessions which includes:

- A written outline/agenda of the type and amount of both introductory and continuing training that will be given to persons filling each job position having responsibility for the management of hazardous waste (e.g., labeling, manifesting, compliance with accumulation time limits, etc.).
- The name, job title, and date of training for each hazardous waste management training session given to an employee filling such a job position; and
- A written job description for each of the above job positions that describes job duties and the skills, education, or other qualifications required of personnel assigned to the position.
- Current employee training records must be retained until closure of the facility.
- Former employee training records must be retained at least three years after termination of employment.

UNIFIED PROGRAM CONSOLIDATED PERMIT AND REGISTRATION
City of Berkeley Toxics Management Division

CONDITIONS:

In order to maintain this Consolidated Permit and Registration, the permittee/registrant must comply with the following:

1. This permit is subject to all applicable local, state and federal ordinances, laws, statutes, codes, rules and regulations relating to the storage, handling, generation and disposal of hazardous materials and/or hazardous waste.

2. This permit is not transferable. Any permit or registration issued to a particular person or for a designated place, operation, purpose or object shall not be valid for use by or for any other person, place, operation, purpose or object.

3. The permittee/registrant shall retain this permit at its facility, immediately available upon request by an inspector or the hazardous materials manager.

4. The permittee/registrant shall notify the Toxics Management Division within 30 days of any changes in the operation of the facility that may affect the permit, or changes of the owner or operator.

5. The permittee/registrant shall pay an annual fee as designated each year, and all applicable state surcharge fees.

6. The permittee/registrant shall authorize representatives of the Toxics Management Division to enter the facility for inspection purposes to ascertain compliance and cause correction of any violation of the Unified Program Permit/Registration Conditions and of any applicable ordinances, codes, laws, statutes, rules, or regulations.

7. The permittee/registrant shall take all necessary steps to ensure the discovery, containment and clean up of any confirmed or unconfirmed unauthorized release of any hazardous material/hazardous waste and shall notify the Toxics Management Division of such unauthorized release if the release or threatened release presents or may present a significant threat to human life, property or the environment.

8. For hazardous materials sites, at least 45 days prior to the closure of a regulated unit or the facility, the permittee/registrant will submit a closure application to the Toxics Management Division addressing the appropriate removal of all hazardous materials and hazardous wastes from the facility.

Failure to comply with any of the foregoing conditions may result in revocation of this permit and/or a penalty assessment.

BUSINESS SITE ADDRESS 103	2920 SHATTUCK AVE		
BUSINESS SITE CITY 104	BERKELEY	CA	ZIP CODE 94705 105

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page.

Does your facility…	If Yes, please complete these pages of the UPCF….	
A. HAZARDOUS MATERIALS Have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION
B. REGULATED SUBSTANCES Have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	☐ YES	Coordinate with your local agency responsible for CalARP.
C. UNDERGROUND STORAGE TANKS (USTs) Own or operate underground storage tanks?	☐ YES	UST FACILITY (Formerly SWRCB Form A) UST TANK (one page per tank) (Formerly Form B)
D. ABOVE GROUND PETROLEUM STORAGE Own or operate ASTs above these thresholds: Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	☐ YES	NO FORM REQUIRED TO CUPAs
E. HAZARDOUS WASTE Generate hazardous waste?	☒ YES	EPA ID NUMBER – provide at the top of this page
Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	☐ YES	RECYCLABLE MATERIALS REPORT (one per recycler)
Treat hazardous waste on-site?	☐ YES	ON-SITE HAZARDOUS WASTE TREATMENT – FACILITY ON-SITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit)
Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES	CERTIFICATION OF FINANCIAL ASSURANCE
Consolidate hazardous waste generated at a remote site?	☐ YES	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION
Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	☐ YES	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION
Generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	☐ YES	Obtain federal EPA ID Number, file Biennial Report (EPA Form 8700-13A/B), and satisfy requirements for RCRA Large Quantity Generator.
Household Hazardous Waste (HHW) Collection site?	☐ YES	See CUPA for required forms.

F. LOCAL REQUIREMENTS 15

CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS)

CONSOLIDATED EMERGENCY RESPONSE / CONTINGENCY PLAN

Prior to completing this Plan, please refer to the INSTRUCTIONS FOR COMPLETING A CONSOLIDATED CONTINGENCY PLAN

A. FACILITY IDENTIFICATION AND OPERATIONS OVERVIEW

FACILITY ID # 1.	CERS ID A1.	DATE OF PLAN PREPARATION/REVISION A2.
FA0000211		02/13/2013

BUSINESS NAME *(Same as Facility Name or DBA - Doing Business As)* 3.
THE MODEL GARAGE INC.

BUSINESS SITE ADDRESS 103.
2920 SHATTUCK AVE

BUSINESS SITE CITY 104.		ZIP CODE 105.
BERKELEY	CA	94705

TYPE OF BUSINESS (e.g., Painting Contractor) A3.	INCIDENTAL OPERATIONS (e.g., Fleet Maintenance) A4.
Automobile repair	

THIS PLAN COVERS CHEMICAL SPILLS, FIRES, AND EARTHQUAKES INVOLVING: (Check all that apply) A5.
☒ 1. HAZARDOUS MATERIALS; ☒ 2. HAZARDOUS WASTES

B. INTERNAL RESPONSE

INTERNAL FACILITY EMERGENCY RESPONSE WILL OCCUR VIA: (Check all that apply) B1.
☒ 1. CALLING PUBLIC EMERGENCY RESPONDERS (i.e., 9-1-1)
☒ 2. CALLING HAZARDOUS WASTE CONTRACTOR
☒ 3. ACTIVATING IN-HOUSE EMERGENCY RESPONSE TEAM

C. EMERGENCY COMMUNICATIONS, PHONE NUMBERS AND NOTIFICATIONS

Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the Emergency Coordinator (or his/her designee when the Emergency Coordinator is on call) shall:
1. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
2. Notify appropriate local authorities (i.e., call 9-1-1).
3. Notify the California Emergency Management Agency at (800) 852-7550.

Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall notify the California Department of Toxic Substances Control (DTSC), the local Unified Program Agency (UPA), and the local fire department's hazardous materials program that the facility is in compliance with requirements to:
1. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility; and
2. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.

INTERNAL FACILITY EMERGENCY COMMUNICATIONS OR ALARM NOTIFICATION WILL OCCUR VIA: (Check all that apply) C1.

☒ 1. VERBAL WARNINGS;	☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM;	☒ 3. TELEPHONE;
☐ 4. PAGERS;	☐ 5. ALARM SYSTEM;	☐ 6. PORTABLE RADIO

NOTIFICATIONS TO NEIGHBORING FACILITIES THAT MAY BE AFFECTED BY AN OFF-SITE RELEASE WILL OCCUR BY: (Check all that apply) C2.

☒ 1. VERBAL WARNINGS;	☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM;	☒ 3. TELEPHONE;
☐ 4. PAGERS;	☐ 5. ALARM SYSTEM;	☐ 6. PORTABLE RADIO

EMERGENCY RESPONSE PHONE NUMBERS:

AMBULANCE, FIRE, POLICE AND CHP	9-1-1
CALIFORNIA EMERGENCY MANAGEMENT AGENCY (CAL/EMA)	(800) 852-7550

OTHER (Specify): C11.	C12.

D. EMERGENCY CONTAINMENT AND CLEANUP PROCEDURES

SPILL PREVENTION, CONTAINMENT, AND CLEANUP PROCEDURES: (Check all boxes that apply to indicate your procedures for containing spills, releases, fires or explosions; and. preventing and mitigating associated harm to persons, property, and the environment.)

D1.

- ☒ 1. MONITOR FOR LEAKS, RUPTURES, PRESSURE BUILD-UP, ETC.;
- ☐ 2. PROVIDE STRUCTURAL PHYSICAL BARRIERS (e.g., Portable spill containment walls);
- ☐ 3. PROVIDE ABSORBENT PHYSICAL BARRIERS (e.g., Pads, pigs, pillows);
- ☐ 4. COVER OR BLOCK FLOOR AND/ OR STORM DRAINS;
- ☐ 5. BUILT-IN BERM IN WORK / STORAGE AREA;
- ☐ 6. AUTOMATIC FIRE SUPPRESSION SYSTEM;
- ☐ 7. ELIMINATE SOURCES OF IGNITION FOR FLAMMABLE HAZARDS (e.g. Flammable liquids, Propane);
- ☒ 8. STOP PROCESSES AND/OR OPERATIONS;
- ☐ 9. AUTOMATIC / ELECTRONIC EQUIPMENT SHUT-OFF SYSTEM;
- ☒ 10. SHUT-OFF WATER, GAS, ELECTRICAL UTILITIES AS APPROPRIATE;
- ☒ 11. CALL 9-1-1 FOR PUBLIC EMERGENCY RESPONDER ASSISTANCE / MEDICAL AID;
- ☒ 12. NOTIFY AND EVACUATE PERSONS IN ALL THREATENED AREAS;
- ☒ 13. ACCOUNT FOR EVACUATED PERSONS IMMEDIATELY AFTER EVACUATION CALL;
- ☐ 14. PROVIDE PROTECTIVE EQUIPMENT FOR ON-SITE RESPONSE TEAM;
- ☐ 15. REMOVE OR ISOLATE CONTAINERS / AREA AS APPROPRIATE;
- ☒ 16. HIRE LICENSED HAZARDOUS WASTE CONTRACTOR;
- ☒ 17. USE ABSORBENT MATERIAL FOR SPILLS WITH SUBSEQUENT PROPER LABELING, STORAGE, AND HAZARDOUS WASTE DISPOSAL AS APPROPRIATE;
- ☒ 18. SUCTION USING SHOP VACUUM WITH SUBSEQUENT PROPER LABELING, STORAGE, AND HAZARDOUS WASTE DISPOSAL AS APPROPRIATE;
- ☐ 19. WASH / DECONTAMINATE EQUIPMENT W/ CONTAINMENT and DISPOSAL OF EFFLUENT / RINSATE AS HAZARDOUS WASTE;
- ☐ 20. PROVIDE SAFE TEMPORARY STORAGE OF EMERGENCY-GENERATED WASTES;
- ☐ 21. OTHER (Specify):

D2.

E. FACILITY EVACUATION

THE FOLLOWING ALARM SIGNAL(S) WILL BE USED TO BEGIN EVACUATION OF THE FACILITY (CHECK ALL THAT APPLY): E1.

- ☐ 1. BELLS;
- ☐ 2. HORNS/SIRENS;
- ☒ 3. VERBAL (i.e., SHOUTING);
- ☐ 4. OTHER (Specify): E2.

THE FOLLOWING LOCATION(S) IS/ARE EVACUEE EMERGENCY ASSEMBLY AREA(S) (i.e., Front parking lot, specific street corner, etc.) E3.

Sidewalk by EasyCopy Center.

Note: The Emergency Coordinator must account for all on site employees and/or site visitors after evacuation.

☐ EVACUATION ROUTE MAP(S) POSTED AS REQUIRED E4.

Note: The map(s) must show primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas, and must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

F. ARRANGEMENTS FOR EMERGENCY SERVICES

Explanation of Requirement: Advance arrangements with local fire and police departments, hospitals, and/or emergency services contractors should be made as appropriate for your facility. You may determine that such arrangements are not necessary.

ADVANCE ARRANGEMENTS FOR LOCAL EMERGENCY SERVICES (Check one of the following) F1.

- ☒ 1. HAVE BEEN DETERMINED NOT NECESSARY; *or*
- ☐ 2. THE FOLLOWING ARRANGEMENTS HAVE BEEN MADE (Specify):

F2.

G. EMERGENCY EQUIPMENT

Check all boxes that apply to list emergency response equipment available at the facility and identify the location(s) where the equipment is kept and the equipment's capability, if applicable. [e.g., ☒ CHEMICAL PROTECTIVE GLOVES | Spill response kit | One time use, Oil & solvent resistant only.]

H. EARTHQUAKE VULNERABILITY

Identify areas of the facility that are vulnerable to hazardous materials releases / spills due to earthquake-related motion. These areas require immediate isolation and inspection.

VULNERABLE AREAS: (Check all that apply)		LOCATIONS (e.g., shop, outdoor shed, forensic lab)	
☒ 1. HAZARDOUS MATERIALS / WASTE STORAGE AREA		Shed and shop.	H2.
☒ 2. PROCESS LINES / PIPING		Shed and shop.	H3.
☐ 3. LABORATORY			H4.
☐ 4. WASTE TREATMENT AREA			H5.

Identify mechanical systems vulnerable to releases / spills due to earthquake-related motion. These systems require immediate isolation and inspection.

VULNERABLE SYSTEMS: (Check all that apply)		LOCATIONS	
☒ 1. SHELVES, CABINETS AND RACKS		Shed and shop.	H7.
☒ 2. TANKS (EMERGENCY SHUTOFF)		Shed	H8.
☒ 3. PORTABLE GAS CYLINDERS		Shop	H9.
☒ 4. EMERGENCY SHUTOFF AND/OR UTILITY VALVES		Shed.	H10.
☐ 5. SPRINKLER SYSTEMS			H11.
☐ 6. STATIONARY PRESSURIZED CONTAINERS (e.g., Propane dispensing tank)			H12.

I. EMPLOYEE TRAINING

Explanation of Requirement: Employee training is required for all employees handling hazardous materials and hazardous wastes in day-to-day or clean-up operations including volunteers and/or contractors. Training must be:

- Provided within 6 months for new hires;
- Amended as necessary prior to change in process or work assignment;
- Given upon modification to the Emergency Response / Contingency Plan, and updated/refreshed annually for all employees.

Required content includes all of the following:

- Material Safety Data Sheets;
- Hazard communication related to health and safety;
- Methods for safe handling of hazardous substances;
- Fire hazards of materials / processes;
- Conditions likely to worsen emergencies;
- Coordination of emergency response;
- Notification procedures;
- Applicable laws and regulations;
- Communication and alarm systems;
- Personal protective equipment;
- Use of emergency response equipment (e.g. Fire extinguishers, respirators, etc.);
- Decontamination procedures;
- Evacuation procedures;
- Control and containment procedures;
- UST monitoring system equipment and procedures (if applicable).

INDICATE HOW EMPLOYEE TRAINING PROGRAM IS ADMINISTERED (Check all that apply) I1.

☐ 1. FORMAL CLASSROOM; ☐ 2. VIDEOS; ☒ 3. SAFETY / TAILGATE MEETINGS;

☐ 4. STUDY GUIDES / MANUALS (Specify): _____ I2.

☐ 5. OTHER (Specify): _____ I3.

☐ 6. NOT APPLICABLE BECAUSE FACILITY HAS NO EMPLOYEES

Large Quantity Generator (LQG) Training Records: Large quantity hazardous waste generators (i.e., who generate more than 270 gallons/1,000 kilograms of hazardous waste per month) must retain written documentation of employee hazardous waste management training sessions which includes:

- A written outline/agenda of the type and amount of both introductory and continuing training that will be given to persons filling each job position having responsibility for the management of hazardous waste (e.g., labeling, manifesting, compliance with accumulation time limits, etc.).
- The name, job title, and date of training for each hazardous waste management training session given to an employee filling such a job position; and
- A written job description for each of the above job positions that describes job duties and the skills, education, or other qualifications required of personnel assigned to the position.
- Current employee training records must be retained until closure of the facility.
- Former employee training records must be retained at least three years after termination of employment.

UNIFIED PROGRAM CONSOLIDATED PERMIT AND REGISTRATION
City of Berkeley Toxics Management Division

CONDITIONS:

In order to maintain this Consolidated Permit and Registration, the permittee/registrant must comply with the following:

1697. This permit is subject to all applicable local, state and federal ordinances, laws, statutes, codes, rules and regulations relating to the storage, handling, generation and disposal of hazardous materials and/or hazardous waste.

1698. This permit is not transferable. Any permit or registration issued to a particular person or for a designated place, operation, purpose or object shall not be valid for use by or for any other person, place, operation, purpose or object.

1699. The permittee/registrant shall retain this permit at its facility, immediately available upon request by an inspector or the hazardous materials manager.

1700. The permittee/registrant shall notify the Toxics Management Division within 30 days of any changes in the operation of the facility that may affect the permit, or changes of the owner or operator.

1701. The permittee/registrant shall pay an annual fee as designated each year, and all applicable state surcharge fees.

1702. The permittee/registrant shall authorize representatives of the Toxics Management Division to enter the facility for inspection purposes to ascertain compliance and cause correction of any violation of the Unified Program Permit/Registration Conditions and of any applicable ordinances, codes, laws, statutes, rules, or regulations.

1703. The permittee/registrant shall take all necessary steps to ensure the discovery, containment and clean up of any confirmed or unconfirmed unauthorized release of any hazardous material/hazardous waste and shall notify the Toxics Management Division of such unauthorized release if the release or threatened release presents or may present a significant threat to human life, property or the environment.

1704. For hazardous materials sites, at least 45 days prior to the closure of a regulated unit or the facility, the permittee/registrant will submit a closure application to the Toxics Management Division addressing the appropriate removal of all hazardous materials and hazardous wastes from the facility.

Failure to comply with any of the foregoing conditions may result in revocation of this permit and/or a penalty assessment.

FACILITY INFORMATION

BUSINESS ACTIVITIES

I. FACILITY IDENTIFICATION

FACILITY ID # (Agency Use Only)	FA0000021 1	EPA ID # (Hazardous Waste Only) 2	CAD983642786
BUSINESS NAME (Same as Facility Name of DBA-Doing Business As) 3	THE MODEL GARAGE INC.		
BUSINESS SITE ADDRESS 103	2920 SHATTUCK AVE		
BUSINESS SITE CITY 104	BERKELEY	CA	ZIP CODE 94705 105

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page.

Does your facility…	If Yes, please complete these pages of the UPCF….	
A. HAZARDOUS MATERIALS Have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION
B. REGULATED SUBSTANCES Have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	☐ YES	Coordinate with your local agency responsible for CalARP.
C. UNDERGROUND STORAGE TANKS (USTs) Own or operate underground storage tanks?	☐ YES	UST FACILITY (Formerly SWRCB Form A) UST TANK (one page per tank) (Formerly Form B)
D. ABOVE GROUND PETROLEUM STORAGE Own or operate ASTs above these thresholds: Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	☐ YES	NO FORM REQUIRED TO CUPAs
E. HAZARDOUS WASTE Generate hazardous waste?	☒ YES	EPA ID NUMBER – provide at the top of this page
Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	☐ YES	RECYCLABLE MATERIALS REPORT (one per recycler)
Treat hazardous waste on-site?	☐ YES	ON-SITE HAZARDOUS WASTE TREATMENT – FACILITY ON-SITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit)
Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES	CERTIFICATION OF FINANCIAL ASSURANCE
Consolidate hazardous waste generated at a remote site?	☐ YES	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION
Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	☐ YES	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION
Generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	☐ YES	Obtain federal EPA ID Number, file Biennial Report (EPA Form 8700-13A/B), and satisfy requirements for RCRA Large Quantity Generator.
Household Hazardous Waste (HHW) Collection site?	☐ YES	See CUPA for required forms.

F. LOCAL REQUIREMENTS 15

(You may also be required to provide additional information by your CUPA or local agency.)

CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS)

CONSOLIDATED EMERGENCY RESPONSE / CONTINGENCY PLAN

Prior to completing this Plan, please refer to the INSTRUCTIONS FOR COMPLETING A CONSOLIDATED CONTINGENCY PLAN

A. FACILITY IDENTIFICATION AND OPERATIONS OVERVIEW

FACILITY ID # 1.	CERS ID A1.	DATE OF PLAN PREPARATION/REVISION A2.
FA0000211		02/13/2013

BUSINESS NAME *(Same as Facility Name or DBA - Doing Business As)* 3.
THE MODEL GARAGE INC.

BUSINESS SITE ADDRESS 103.
2920 SHATTUCK AVE

BUSINESS SITE CITY 104.		ZIP CODE 105.
BERKELEY	CA	94705

TYPE OF BUSINESS (e.g., Painting Contractor) A3.	INCIDENTAL OPERATIONS (e.g., Fleet Maintenance) A4.
Automobile repair	

THIS PLAN COVERS CHEMICAL SPILLS, FIRES, AND EARTHQUAKES INVOLVING: (Check all that apply) A5.
☒ 1. HAZARDOUS MATERIALS; ☒ 2. HAZARDOUS WASTES

B. INTERNAL RESPONSE

INTERNAL FACILITY EMERGENCY RESPONSE WILL OCCUR VIA: (Check all that apply) B1.
☒ 1. CALLING PUBLIC EMERGENCY RESPONDERS (i.e., 9-1-1)
☒ 2. CALLING HAZARDOUS WASTE CONTRACTOR
☒ 3. ACTIVATING IN-HOUSE EMERGENCY RESPONSE TEAM

C. EMERGENCY COMMUNICATIONS, PHONE NUMBERS AND NOTIFICATIONS

Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the Emergency Coordinator (or his/her designee when the Emergency Coordinator is on call) shall:
1. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
2. Notify appropriate local authorities (i.e., call 9-1-1).
3. Notify the California Emergency Management Agency at (800) 852-7550.

Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall notify the California Department of Toxic Substances Control (DTSC), the local Unified Program Agency (UPA), and the local fire department's hazardous materials program that the facility is in compliance with requirements to:
1. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility; and
2. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.

INTERNAL FACILITY EMERGENCY COMMUNICATIONS OR ALARM NOTIFICATION WILL OCCUR VIA: (Check all that apply) C1.

☒ 1. VERBAL WARNINGS;	☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM;	☒ 3. TELEPHONE;
☐ 4. PAGERS;	☐ 5. ALARM SYSTEM;	☐ 6. PORTABLE RADIO

NOTIFICATIONS TO NEIGHBORING FACILITIES THAT MAY BE AFFECTED BY AN OFF-SITE RELEASE WILL OCCUR BY: (Check all that apply) C2.

☒ 1. VERBAL WARNINGS;	☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM;	☒ 3. TELEPHONE;
☐ 4. PAGERS;	☐ 5. ALARM SYSTEM;	☐ 6. PORTABLE RADIO

EMERGENCY RESPONSE PHONE NUMBERS:

AMBULANCE, FIRE, POLICE AND CHP	9-1-1
CALIFORNIA EMERGENCY MANAGEMENT AGENCY (CAL/EMA)	(800) 852-7550
NATIONAL RESPONSE CENTER (NRC)	(800) 424-8802
POISON CONTROL CENTER	(800) 222-1222
LOCAL UNIFIED PROGRAM AGENCY (UPA/CUPA)	(510) 981-7460 City of Berkeley Toxic Mgt. Div C3.
OTHER (Specify): C4.	C5.

NEAREST MEDICAL FACILITY / HOSPITAL NAME: Alta Bates Hospital Berkeley C6. | Alta Bates Hospital (510) 20 C7.

AGENCY NOTIFICATION PHONE NUMBERS:

CALIFORNIA DEPT. OF TOXIC SUBSTANCES CONTROL (DTSC)	(916) 255-3545
REGIONAL WATER QUALITY CONTROL BOARD	(510) 622-2300 SF Bay Regio C8.
U.S. ENVIRONMENTAL PROTECTION AGENCY (US EPA)	(800) 300-2193

OTHER (Specify): C9.	C10.
OTHER (Specify): C11.	C12.

D. EMERGENCY CONTAINMENT AND CLEANUP PROCEDURES

SPILL PREVENTION, CONTAINMENT, AND CLEANUP PROCEDURES: (Check all boxes that apply to indicate your procedures for containing spills, releases, fires or explosions; and. preventing and mitigating associated harm to persons, property, and the environment.)

D1.

- ☒ 1. MONITOR FOR LEAKS, RUPTURES, PRESSURE BUILD-UP, ETC.;
- ☐ 2. PROVIDE STRUCTURAL PHYSICAL BARRIERS (e.g., Portable spill containment walls);
- ☐ 3. PROVIDE ABSORBENT PHYSICAL BARRIERS (e.g., Pads, pigs, pillows);
- ☐ 4. COVER OR BLOCK FLOOR AND/ OR STORM DRAINS;
- ☐ 5. BUILT-IN BERM IN WORK / STORAGE AREA;
- ☐ 6. AUTOMATIC FIRE SUPPRESSION SYSTEM;
- ☐ 7. ELIMINATE SOURCES OF IGNITION FOR FLAMMABLE HAZARDS (e.g. Flammable liquids, Propane);
- ☒ 8. STOP PROCESSES AND/OR OPERATIONS;
- ☐ 9. AUTOMATIC / ELECTRONIC EQUIPMENT SHUT-OFF SYSTEM;
- ☒ 10. SHUT-OFF WATER, GAS, ELECTRICAL UTILITIES AS APPROPRIATE;
- ☒ 11. CALL 9-1-1 FOR PUBLIC EMERGENCY RESPONDER ASSISTANCE / MEDICAL AID;
- ☒ 12. NOTIFY AND EVACUATE PERSONS IN ALL THREATENED AREAS;
- ☒ 13. ACCOUNT FOR EVACUATED PERSONS IMMEDIATELY AFTER EVACUATION CALL;
- ☐ 14. PROVIDE PROTECTIVE EQUIPMENT FOR ON-SITE RESPONSE TEAM;
- ☐ 15. REMOVE OR ISOLATE CONTAINERS / AREA AS APPROPRIATE;
- ☒ 16. HIRE LICENSED HAZARDOUS WASTE CONTRACTOR;
- ☒ 17. USE ABSORBENT MATERIAL FOR SPILLS WITH SUBSEQUENT PROPER LABELING, STORAGE, AND HAZARDOUS WASTE DISPOSAL AS APPROPRIATE;
- ☒ 18. SUCTION USING SHOP VACUUM WITH SUBSEQUENT PROPER LABELING, STORAGE, AND HAZARDOUS WASTE DISPOSAL AS APPROPRIATE;
- ☐ 19. WASH / DECONTAMINATE EQUIPMENT W/ CONTAINMENT and DISPOSAL OF EFFLUENT / RINSATE AS HAZARDOUS WASTE;
- ☐ 20. PROVIDE SAFE TEMPORARY STORAGE OF EMERGENCY-GENERATED WASTES;
- ☐ 21. OTHER (Specify):

D2.

E. FACILITY EVACUATION

THE FOLLOWING ALARM SIGNAL(S) WILL BE USED TO BEGIN EVACUATION OF THE FACILITY (CHECK ALL THAT APPLY): E1.

- ☐ 1. BELLS;
- ☐ 2. HORNS/SIRENS;
- ☒ 3. VERBAL (i.e., SHOUTING);
- ☐ 4. OTHER (Specify): E2.

THE FOLLOWING LOCATION(S) IS/ARE EVACUEE EMERGENCY ASSEMBLY AREA(S) (i.e., Front parking lot, specific street corner, etc.) E3.

Sidewalk by EasyCopy Center.

Note: The Emergency Coordinator must account for all on site employees and/or site visitors after evacuation.

☐ EVACUATION ROUTE MAP(S) POSTED AS REQUIRED E4.

Note: The map(s) must show primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas, and must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

F. ARRANGEMENTS FOR EMERGENCY SERVICES

Explanation of Requirement: Advance arrangements with local fire and police departments, hospitals, and/or emergency services contractors should be made as appropriate for your facility. You may determine that such arrangements are not necessary.

ADVANCE ARRANGEMENTS FOR LOCAL EMERGENCY SERVICES (Check one of the following) F1.

- ☒ 1. HAVE BEEN DETERMINED NOT NECESSARY; *or*
- ☐ 2. THE FOLLOWING ARRANGEMENTS HAVE BEEN MADE (Specify):

F2.

G. EMERGENCY EQUIPMENT

Check all boxes that apply to list emergency response equipment available at the facility and identify the location(s) where the equipment is kept and the equipment's capability, if applicable. [e.g., ☒ CHEMICAL PROTECTIVE GLOVES | Spill response kit | One time use, Oil & solvent resistant only.]

TYPE	EQUIPMENT AVAILABLE G1.	LOCATION	CAPABILITY *(If applicable)*

	35. ☐ OTHER	G70.	G71.

H. EARTHQUAKE VULNERABILITY

Identify areas of the facility that are vulnerable to hazardous materials releases / spills due to earthquake-related motion. These areas require immediate isolation and inspection.

VULNERABLE AREAS: (Check all that apply)		LOCATIONS (e.g., shop, outdoor shed, forensic lab)	
☒ 1. HAZARDOUS MATERIALS / WASTE STORAGE AREA		Shed and shop.	H2.
☒ 2. PROCESS LINES / PIPING		Shed and shop.	H3.
☐ 3. LABORATORY			H4.
☐ 4. WASTE TREATMENT AREA			H5.

Identify mechanical systems vulnerable to releases / spills due to earthquake-related motion. These systems require immediate isolation and inspection.

VULNERABLE SYSTEMS: (Check all that apply)		LOCATIONS	
☒ 1. SHELVES, CABINETS AND RACKS		Shed and shop.	H7.
☒ 2. TANKS (EMERGENCY SHUTOFF)		Shed	H8.
☒ 3. PORTABLE GAS CYLINDERS		Shop	H9.
☒ 4. EMERGENCY SHUTOFF AND/OR UTILITY VALVES		Shed.	H10.
☐ 5. SPRINKLER SYSTEMS			H11.
☐ 6. STATIONARY PRESSURIZED CONTAINERS (e.g., Propane dispensing tank)			H12.

I. EMPLOYEE TRAINING

Explanation of Requirement: Employee training is required for all employees handling hazardous materials and hazardous wastes in day-to-day or clean-up operations including volunteers and/or contractors. Training must be:

- Provided within 6 months for new hires;
- Amended as necessary prior to change in process or work assignment;
- Given upon modification to the Emergency Response / Contingency Plan, and updated/refreshed annually for all employees.

Required content includes all of the following:

- Material Safety Data Sheets;
- Hazard communication related to health and safety;
- Methods for safe handling of hazardous substances;
- Fire hazards of materials / processes;
- Conditions likely to worsen emergencies;
- Coordination of emergency response;
- Notification procedures;
- Applicable laws and regulations;
- Communication and alarm systems;
- Personal protective equipment;
- Use of emergency response equipment (e.g. Fire extinguishers, respirators, etc.);
- Decontamination procedures;
- Evacuation procedures;
- Control and containment procedures;
- UST monitoring system equipment and procedures (if applicable).

INDICATE HOW EMPLOYEE TRAINING PROGRAM IS ADMINISTERED (Check all that apply) I1.

☐ 1. FORMAL CLASSROOM; ☐ 2. VIDEOS; ☒ 3. SAFETY / TAILGATE MEETINGS;

☐ 4. STUDY GUIDES / MANUALS (Specify): _____ I2.

☐ 5. OTHER (Specify): _____ I3.

☐ 6. NOT APPLICABLE BECAUSE FACILITY HAS NO EMPLOYEES

Large Quantity Generator (LQG) Training Records: Large quantity hazardous waste generators (i.e., who generate more than 270 gallons/1,000 kilograms of hazardous waste per month) must retain written documentation of employee hazardous waste management training sessions which includes:

- A written outline/agenda of the type and amount of both introductory and continuing training that will be given to persons filling each job position having responsibility for the management of hazardous waste (e.g., labeling, manifesting, compliance with accumulation time limits, etc.).
- The name, job title, and date of training for each hazardous waste management training session given to an employee filling such a job position; and
- A written job description for each of the above job positions that describes job duties and the skills, education, or other qualifications required of personnel assigned to the position.
- Current employee training records must be retained until closure of the facility.
- Former employee training records must be retained at least three years after termination of employment.

J. LIST OF ATTACHMENTS

(Check one of the following) J1.

☐ 1. NO ATTACHMENTS ARE REQUIRED; *or*

☐ 2. THE FOLLOWING DOCUMENTS ARE ATTACHED: J2.

K. SIGNATURE / CERTIFICATION

Certification: Based on my inquiry of those individuals responsible for obtaining the information, I certify under penalty of law that I have personally examined and am familiar with the information submitted and believe the information is true, accurate, and complete, and that a copy is available on site.

INSPECTION FORM

Facility Name: The Model Garage Date: 1/27/2017

Address: 2920 Shattuck Avenue Contact: Matt Bernard

Phone: _____ Page 1 of 1

Met Matt Bernard with Pangea Environmental Services for work under Permit # 17-EB-37. Five soil borings noted as red circle on site plan.

B-2 and B-4 to 5 feet and B-1, B-3 and B-5 to 20 feet. Matt indicates they don't have enough groundwater at this time to close out the borings. Updated site plan to reflect actual drilled locations of the borings.

TMD approved leaving till Monday to pull groundwater samples. B-2 and B-4 grouted.

According to Matt, B-1 was drilled to 25 feet. All three deeper borings were tremie grouted on 1/30/2017

OFFICIAL INSPECTION REPORT

City Of Berkeley Toxics Management Division
1947 Center Street, First Floor
Berkeley, CA 94704
(510) 981-7460
toxics@cityofberkeley.info

Facility Name : THE MODEL GARAGE INC.
Site Address : 2920 Shattuck AVE
Facility Phone : (510) 540-5899
Owner : Donald B Worth
Facility ID : FA0000211
Inspection Date : 3/16/18

Consent Granted By: Don Worth

☐ Photos Taken ☐ Samples Taken

Inspections completed on this date at this facility

Inspection Number	Inspection Type	Record ID	Program
DA0PAE6IQ	ROUTINE INSPECTION	PR0000181	HMBP
DAAYOJ1PO	ROUTINE INSPECTION	PR0002493	STORMWATER
DARTTZWFQ	ROUTINE INSPECTION	PR0000680	HAZ WASTE GENERATOR

An inspection of your facility revealed the following violations of the California Health and Safety Code, the California Code of Regulations, and/or Title 15 of the Berkeley Municipal Code. The facility is subject to re-inspection at any time. A re-inspection fee may be assessed.

Summary of Violations and Notice to Comply

HAZ WASTE GENERATOR

Violation Observed: **3030007** **MINOR VIOLATION** **Comply by 4/15/2018**

Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date. 22 CCR 12 66262.34(f)

Observation and Corrective Action:

Business failed to properly label hazardous waste in that the accumulation start date was not indicated. Corrective action: Add accumulation start dates to all hazardous waste containers that have begun accumulating.

HMBP

Violation Observed: **1020002** **MINOR VIOLATION** **Comply by 4/15/2018**

Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years. HSC 6.95 25505(a)(4)

Observation and Corrective Action:

Business failed to provide annual training to all employees. Corrective action: Complete hazardous materials/waste training for all employees and submit records to Toxics Management Division.

General Comments and Observations

HMBP

Hazardous materials onsite are consistent with the materials reported on CERS. Facility map accurately depicts locations of hazardous materials and waste. Annual training for hazard communication and hazardous material/waste handling has not been completed since 2015.

HAZ WASTE GENERATOR

EPA ID Number, CAD 983 642 786, is active. Waste is kept outside under a shelter. Waste is consistent with the inventory provided on CERS. Observed Used Oil, used coolant, waste filters (paper and metal separated), waste aerosols. Hazardous waste manifests were reviewed for past 3 years, records were compliant. Fire extinguishers are up to date.

This report shall serve as a "Notice to Comply" for minor violations, and a "Notice of Violation" for Major violations. You are hereby ordered to correct the above noted violations within 30 days, or as noted in the Summary of Violations above. Formal enforcement and/or penalty assessment may be initiated for any violations noted, and for those not corrected in a timely manner.

By signing this document, I have been notified of the regulatory violations noted in this report. I understand that failure to return to compliance within the specified time frame could result in a re-inspection of this facility with an additional fee and possible enforcement action including penalties.

Facility Representative Signature Donald Worth Owner

Date Signed 03/16/2018

Viviana Garcia
Hazardous Materials Specialist I

Within 5 days of achieving compliance, or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report, along with supporting documentation, if applicable, to TMD.

Certification of Return to Compliance
I certify under penalty of perjury that this facility has complied with directives specified in this Notice to Comply

Subject: Re: PUBLIC RECORDS REQUEST 22-14820

Thank you for contacting Alameda County Department of Environmental Health (ACDEH) Certified Unified Program Agency (CUPA) File Review Request:

Berkeley is out of our jurisdiction.

Please try calling Berkeley City Toxics Management Division - 510-981-7460.

**Please note that ACDEH only has files for sites within its jurisdiction. Many cities within Alameda County are not part of ACDEH CUPA jurisdiction.

In those cases we advise that you try contacting that cities Fire or Planning Departments for any records.

Please view our Jurisdiction List:
https://deh.acgov.org/hazmat-assets/docs/CUPA-jurisdictions.pdf

Thank you,
Joel Dooha-Chambers

Hello,

The record you asked on Feb 28, 2022, under PRA #22-224 *"environmental site assessment, I request all available documents such as environmental report documents, storage tank documents, hazmat documents, permits, violations, or inspections (between January 1 1950 and today) for the property at: 2487 Shattuck Avenue, Berkeley, CA 94705"* does not exist.

Closing this PRA as you submitted another request under PRA# 22-221 for other departments to provide information.

Thank you,

Public Works Admin

Requirements for Use or Change of Occupancy: B-2 Occupancy
Occupant Load 676

1. Provide a minimum of three (3) exits from the auditorium area. These shall conform to requirements of the Uniform Building Code as to size, type and location. This shall include two (2) exits from the restaurant area.

2. All required exits shall have direct access to a public thoroughfare.

3. All required exits shall open out or in the direction of exit travel.

4. Provide exit signs at every required doorway and wherever otherwise required to clearly indicate the direction of egress, an exit sign with letters at least five (5") inches high. Signs shall be illuminated and be supplied by two (2) separate sources of power.

5. All required exit doors shall be openable from the inside without the use of a key or any special knowledge or effort and same shall be provided with panic hardware.

6. Required exit doors shall not swing over public property.

7. Openings in the south wall shall be closed. (The wall in question is the one between the areas that have a concrete floor and the area that has the wood floor.)

8. Provide light and ventilation as required by Sec. 605 of the Uniform Building Code.

9. If other than fixed seating are used, (chairs, etc.) same shall be bonded together in groups of not less than three (3) and not more than seven (7).

10. Aisles in auditorium area shall conform to the requirements of the Uniform Building Code, chapter 33, Sec. 3313.

11. Provide sanitary facilities as required by Chapter 6, sec. 605:
Women-3 toilets, 2 lavatories
Men -2 toilets, 2 urinals and 2 lavatories.

12. If toilet facilities are adjacent to the area where food is either prepared or served, provide two (2) tight fitting doors between the toilet area and the serving area as required by Sec. 1105 of the Uniform Building Code.

13. The floors and walls in the toilet area to a height of four (4') feet shall be of a hard, smooth, non-absorbent surface of cement, tile or approved equal.

14. Provide an approved fire alarm system. This system shall have an interior auxiliary pull box as well as a street alarm box at the curb. This shall be connected to the fire alarm board, City of Berkeley. Provide plan.

June 6, 1967
Ref: 2900 Shattuck Ave.
Berkeley, Calif.

Requirements for Use or Change of Occupancy:

15. Provide at least two (2) wet standpipes. These shall conform to the Uniform Building Code, City of Berkeley.

16. All curtains, drapes, hangings, decorations etc., shall be of flameproof material or shall be flameproofed by an approved agency. If flameproofed, provide two (2) copies of the Certificate to this office.

17. Provide fire extinguishers as follows: A minimum of two (2) -2½ gallon water type for the auditorium area. One (1) water type and one (1) 10# Co2 or comparable dry chemical extinguisher for the restaurant area. The exact number and placement shall be decided prior to opening for business.

18. All central heating units, hot water heaters, etc. shall be enclosed in a one (1) hour fire restrictive enclosure.

19. Provide an approved outside gas shut-off valve. Same shall be conspicuously marked.

20. The maximum room capacity shall be posted in a conspicuous place near the main exit of the area. For the auditorium the occupancy load is five hundred seventy-five (575). In the restaurant area, one hundred (100) persons.

21. Cooking and handling of food shall conform to the requirements of the Health Department, City of Berkeley. This includes floor finishes, wall finishes, equipment, etc.

22. Electrical installations, equipment, etc., shall conform to the Electrical Code, City of Berkeley.

23. Plumbing installations, equipment, etc., shall conform to the Plumbing Code, City of Berkeley.

24. Provide two (2) copies of working plans for the remodeling and use of the building.

25. Obtain all related building permits.

26. All required exit doors shall be not less than thirty-six (36") inches wide.

27. No permanent projection equipment will be permitted without a review of the building and facilities and exit.

28. All required exit facilities shall be lighted in an approved manner to a public thoroughfare.

29. Provide a minimum of fourteen (14') lin. feet of exit area. A minimum of six (6') feet for the front entrance and four (4') feet for each side exit.

Dear Mr. Orth:
The attached report describes the soil sampling and laboratory test results for a tank removal project at:

Southwick Chrysler-Plymouth
2900 Shattuck Ave.
Berkeley, CA

The tank removal work was performed on March 10, 1988.
If you have any questions after reading the report, please feel free to call our office.

Sincerely,
Thomas S. Nett

Soil Sampling Report - Underground Storage Tank

Name of Business: Southwick Chrysler-Plymouth

Site address: 2900 Shattuck Ave., Berkeley, CA

Type of work performed: Soil samples taken for laboratory testing during removal of an underground storage tank.

Date sampled: March 10,1988

Number of tanks removed: One

Tank - capacity (approx.), contents, type, depth to bottom:

500 gallon, waste oil, steel, 6.0ft.

Soil sample:

Sample #	Depth(ft)	Location description (See attached Site Map)
TP219-1	8.0	Beneath center of tank.

Condition of tank:

Rusty with numerous holes. 1/8" hole on end opposite fill. More than 13 small holes on fill end at mid-level.

Condition of soil taken for sample from excavation pit:

Native soil is dark brown silty clay.

Laboratory results: (lab report attached)

Sample Number	Tested for:	Test results (In ppm)
TP219-1	Total extractable hydrocarbons	<3
	Volatile Organic Compounds (EPA Method 8240): Priority Pollutants	
	Acetone	0.16
	2-Butanone	0.036
	4-Methyl-2-Pentanone	0.013
	2-Hexanone	0.033
	Ethanol	0.17
	2-Methlypropanol	0.045
	Butanal	0.035
	1-Butanol	0.025
	Ethenylesterformicacid	0.11

TAL

TOTAL EXTRACTABLE HYDROCARBONS (TEH)

Method:

This method is from the "Guidelines for Addressing Fuel Leaks" by the California Regional Water Quality Control Board San Francisco Bay Region as revised 11/8/85. The full name of the procedure is Total Petroleum Hydrocarbons Analysis (High boiling point hydrocarbons).

Sample Preparation:

EPA Method 3510 (separatory funnel liquid - liquid extraction) is used to prepare water samples. Sample is added to a separatory funnel, methylene chloride is added, and the funnel is shaken. The extract is collected and the process performed two more times. The extract is concentrated in a Kuderna-Danish apparatus.

EPA Method 3550 (sonication extraction) is used to prepare soil samples. Soil is placed into a vessel with a 1:1 hexane and acetone solution. The sample is sonicated for 15 minutes. The liquid is collected and the process performed two more times. The extract is concentrated in a Kuderna-Danish apparatus.

Sample Introduction:

The extracted samples are directly injected into the gas chromatograph (GC).

Gas Chromatography Analysis:

The extractable hydrocarbons are separated by a 6 ft. x 2 mm 10% SP-2100 on Supelcoport column, then quantitated by a flame ionization detector (FID).

Gas Chromatograph Conditions:

CARRIER GAS:	Nitrogen or Helium
FLOW RATE:	30 ml/min
INJECTOR TEMPERATURE:	250° C
DETECTOR TEMPERATURE:	300° C
INITIAL TEMPERATURE:	40° C
Hold for 3 minutes	
PROGRAM RATE:	10° C/min
FINAL TEMPERATURE:	300° C
Hold for 3 minutes	

Calculation:

TEH is quantified by comparing the area of all peaks from the sample, as determined by the FID, to the area of all peaks in the standard. The standard may be diesel, kerosene, jet fuel, or other compound depending on the source of the sample.

Trace Analysis Laboratory, Inc.
3423 Investment Boulevard, #8 • Hayward, California 94545 (415) 783-6960

TAL

OIL AND GREASE 503E

Method:

This method is from Standard Methods for the Examination of Water and Wastewater, 16th edition. The full name of the procedure is Oil and Grease, 503E Hydrocarbons. This test eliminates oil and grease from animal and vegetable sources.

Sample Preparation and Analysis:

EPA Method 3510 (separatory funnel liquid-liquid extraction) is used to prepare water samples. Sample is added to a separatory funnel, freon is added, and the funnel is shaken. The extract is collected and the process performed two more times.

EPA Method 3550 (sonication extraction) is used to prepare soil samples. Approximately 10 grams of soil are placed into a vessel with 30 ml of freon. The sample is sonicated for 15 minutes. The liquid is collected and the process performed two more times.

The freon extract is transferred to another container and is treated with silica gel. Non-petroleum oil and grease is removed by absorption onto the silica gel. The remaining extract is poured into a tared aluminum dish and left to dry.

Calculation:

The dried pan is reweighed and the final weight minus the initial weight is the reported result.

Small structure fire. Fire was located on the street side of the building. First fire company noticed light smoke coming from the front of the structure above the front door. A ventillation hole was made to the roof area directly above the smoke and an overhaul hole to the front of the building where the smoke was showing. A small flame was uncovered and quickly extinguished. There was no extension of the fire. It was intially thought that the fire was caused by an electrical origin. On further investigation, it was determined that the originof the fire was probably started from the outside to the tirm/facade above the store front windows. The exact material that started the fire was not determined. We were able to piece together 3 pieces of wood of the origin. It was probably a source that was thrown up to the trim work, such as a cigarette. The grandson of the owner was made aware of a structural header that was cut through. The structural member ran the width of the building. The ends of the cut member needed to be supported. The grandson, a general contractor, acknowledged the problem and stated he would support it and contact the building department.

Personal Identifying Information

Comments

BLA inspection included with reinspection.
Recommend installing single-station smoke detectors in each occupied space per manufacturer instructions (main office, printing room, shared corridor, loft storage area).
Most violations apply to shared spaces -- maybe responsibility of property owner/management.
Recommend coordinating with other tenants &/or property management to fix safety problems ASAP.

Violation Summary

Status	Violation	Location
Violation Pending Resolution	703.1 - Repair Openings Walls/Ceilings The required fire-resistance rating of fire-resistance-rated construction, including, but not limited to, walls, firestops, shaft enclosures, partitions, smoke barriers, floors, fire-resistive coatings and sprayed fire-resistant materials applied to structural members and fire-resistant joint systems, shall be maintained. Openings made therein for the passage of pipes, electrical conduit, wires, ducts, air transfer openings and holes made for any reason shall be protected with approved methods capable of resisting the passage of smoke and fire. Openings through fire-resistance-rated assemblies shall be protected by self- or automatic-closing doors of approved construction meeting the fire protection requirements for the assembly.	Pivot printing room, rear door & shared corridor.
	Comments Previously noted at Paco Collars inspection -- replace ceiling tiles, and close up any other openings. Coordinate with other tenants &/or property management to fix. Update 1/28/2020: repairs complete in Pivot space. Shared space still needs attention. Rear exit door is not installed properly.	
Violation	1031.3 - Remove Obstruction(s)	Shared corridor between

Pending Resolution	A means of egress shall be free from obstructions that would prevent its use, including the accumulation of snow and ice.	Pivot & other tenant spaces
	Comments Exit paths & sign partially blocked between Pivot rear door and other tenant spaces. Excessive combustible storage & electrical hazards within exposed wood enclosure. Coordinate with other tenants &/or property management to fix. Update 1/28/2020: path has been cleared. Combustible storage still in place. Corridor width is still questionable.	
Violation Abated/Resolved	1013.3 - Provide Illuminated Exit Signs Exit signs shall be internally or externally illuminated.	Pivot front door & shared corridor
	Comments Coordinate with other tenants &/or property management to fix.	
Violation Abated/Resolved	906.9 - Mount 3ft - 5ft High Above Floor Portable fire extinguishers having a gross weight not exceeding 40 pounds (18 kg) shall be installed so that their tops are not more than 5 feet (1524 mm) above the floor.	Pivot
	Comments Recommend installing second extinguisher near an exit door.	
Violation Abated/Resolved	315.3.1 - Ceiling Clearance Storage shall be maintained 2 feet (610 mm) or more below the ceiling in nonsprinklered areas of buildings.	Pivot printing room & shared corridor
	Comments Coordinate with other tenants &/or property management to fix.	
Violation Pending Resolution	1010.1.9.3 Locks and lat - Locks and latches shall be permitted to prevent operation of doors where any of the following exist: BFC 1010.1.9.3 - "Locks and latches shall be permitted to prevent operation of doors where any of the following exist: 1. Places of detention or restraint. 2. In buildings in occupancy Group A having an occupant load of 300 or less, Groups B, F, M and S, and in places of religious worship, the main door or doors are permitted to be equipped with key-operated locking devices from the egress side provided: 2.1 The locking device is readily distinguishable as locked. 2.2 A readily visible durable sign is posted on the egress side on or adjacent to the door stating: THIS DOOR TO REMAIN UNLOCKED WHEN THIS SPACE IS OCCUPIED. The sign shall be in letters 1 inch high on a contrasting background. 2.3 The use of the key-operated locking device is revocable by the fire code official for due cause."	Pivot front & rear doors
	Comments See section 2.2 of text. Rear door is not installed properly.	
Violation Pending Resolution	BMC 9.04.035 - Business License Required It shall be unlawful for any person, either for himself/herself or for any other person, to commence or carry on any business specified in this chapter, in the City, without first having procured a license from the City to do so, or without complying with any and all regulations of such business contained in this chapter. The carrying on of any business without first having procured a license from the City to do so, or without complying with any and all regulations of the chapter, shall constitute a separate violation of this chapter for each and every day that such business is so carried on. (Ord. 5017-NS § I (part), 1977)	Art + Music Education Fund
	Comments BLA shown as void/canceled. Space still appears occupied, but inaccessible.	
Violation Pending Resolution	105.1 - Permit Required An operational permit is required. Apply the permit at the City of Berkeley Permit Service Center.	Shared corridor between Pivot & other tenant spaces
	Comments Stair construction from ground floor to storage loft needs to be permitted & built to code, or removed. Coordinate with other tenants &/or property management to fix.

L Remarks

Full assignment dispatched for flames seen coming from the garage of Wheelchairs of Berkeley. 2275 was first on scene and stated that BPD had extinguished a small fire at the base of a roll up door with a dry chem extinguisher. 2275 knocked on the door and the occupants who had been working in the rear were unaware that anything had happened.

A bottle of Kingsford charcoal lighter and a one gallon plastic bottle with gasoline in it were found at the base of the door. 2275 states that they saw no ordinary combustible fuel, just what appeared to be flammable liquid burning. BPD initiated an arson investigation. A suspect appeared on scenem who smelled of gasoline. He admitted to setting the fire and was arrested. There was no involvement of the building, only smoke and heat damage to the lower portion of the door.

The building is equipped with a fire alarm, but I found no detectors of any kind and no pull stations. The building is fully sprinklered. The fire alarm did not activate.

Violation Summary

Status	Violation	Location
Violation Pending Resolution	1006.1 - 1 Illumination required. The means of egress, including the exit discharge, shall be illuminated at all times the building space served by the means of egress is occupied. Exceptions: 1. Occupancies in Group U. 2. Aisle accessways in Group A. 3. Dwelling units and sleeping units in Groups R-1, R-2 and R-3. 4. Sleeping units of Group I occupancies and Group R-4.	
Violation Pending Resolution	906.2 - 2 General requirements. Portable fire extinguishers shall be selected, installed and maintained in accordance with this section and Chapter 3, Title 19 California Code of Regulations. Exceptions: 1. The travel distance to reach an extinguisher shall not apply to the spectator seating portions of Group A-5 occupancies. 2. Thirty-day inspections shall not be required for portable fire extinguishers that are supervised by a listed and approved electronic monitoring device, provided that all of the following conditions are met: 2.1. Electronic monitoring shall confirm that extinguishers are properly positioned, properly charged and unobstructed. 2.2. Loss of power or circuit continuity to the electronic monitoring device shall initiate a trouble signal.	

2.3. The extinguishers shall be installed inside of a building or cabinet in a noncorrosive environment.

2.4. Electronic monitoring devices and supervisory circuits shall be tested when extinguisher maintenance is performed.

2.5. A written log of required hydrostatic test dates for extinguishers shall be maintained by the owner to ensure that hydrostatic tests are conducted at the frequency required by Chapter 3, Title 19 California Code of Regulations.

L Remarks
Called for the report of water leaking from a stand-pipe. Upon arrival met with RP. We advised her that the standpipe is the responsibility of the property owner. Owner also appeared at this time and she wasn't aware of the situation and said she would take care of it. Leak was a very small one, just dripping intermittently.

RE: PRA 21-0704 RECORDS REQUEST 22-14820

WM
Wong, Melinda@Waterboards <Melinda.Wong@waterboards.ca.gov>
To GEM Group

Reply | Reply All | Forward

Mon 3/7/2022 2:12 PM

Follow up. Start by Monday, March 7, 2022. Due by Monday, March 7, 2022.

Hello Dana,

The San Francisco Bay Regional Water Board received your February 28, 2022 file review request, which seeks records related to the addresses as described below. Based on a thorough search, the San Francisco Bay Water Board does not possess any additional records responsive to your request. It appears in Geotracker database as a closed case file number 01-1419 for the address located at 2900 Shattuck Avenue, Berkeley, CA that was regulated and closed by the local agency, a site document is available to access online.

I was unable to find any record information for the address located at 2920 Shattuck Avenue, Berkeley, CA.

I would recommend contacting the local agency, City of Berkeley for any further information they may have.

Thank you,

Melinda Wong

CAUTION: This email originated from outside of the District. Do not click links or open attachments unless you recognize the sender and know the content is safe.

ACWD Records Request Form

Instructions
Use this form to request water-related records pertaining to Fremont, Newark, or Union City. Please read the following instructions prior to completing the form.

1. Provide contact information and describe the records as specifically as possible. You will be contacted once the records are assembled.

2. For duplication requests, you will be notified of an estimated amount due. Copies will be made upon receipt of payment. If more than 25 copies are made, you will be

charged 10 cents/page (15 cents for larger than 11x17) and 75 cents per CD. Each certification is $1. Postage will be charged if applicable. For data compilation, extraction, or programming needed to produce records, there will be a $50/hour charge for all time expended in excess of 15 minutes.

3. You will be notified within 10 days of the status of your request. You will then have 10 days to inspect the records. Requests expire 20 days from the date of request. For additional questions, please call (510) 668-4202.

EXECUTIVE SUMMARY

Years researched covering your site or adjacent sites:

1950	**1911**			

Years researched NOT covering your site or adjacent sites:

1894				

ERS's Hybrid Fire Insurance Map represents a combination of a Fire Insurance Map directly overlaid and imbedded into a current parcel map of the subject property and all nearby and adjacent sites (usually at least a block surrounding the subject property). The Hybrid Fire Insurance Map is a sophisticated tool for Environmental Professionals, thereby saving them time and increasing their accuracy. Note: Due to COVID-19, Fire Insurance Maps after 1950, if they exist, may not be reasonably ascertainable.

ERS's research has been limited to the facts presented on fire insurance maps only. All terms, conditions, and limitations normally associated with work contracted by ERS and presented or associated with the fire insurance maps are in effect at all times. This Hybrid Map, all its information and content have been derived, reconfigured and reformatted (creating an entirely new map) from and relies upon fire insurance maps originally published by The Sanborn Map Company or other publishers and local agency parcel maps. "Digital Sanborn Maps, 1867-1970" is owned by ProQuest, LLC, licensed from Environmental Data Resources, Inc., and some are protected by copyright and other laws that recognize the rights of copyright holders. ERS's research has only been based on these maps; ERS did not perform any type of independent investigation of any type, including as to the accuracy and/or completeness of the information derived or otherwise obtained from the secondary source or sources including those maps received from the Library of Congress.

EXECUTIVE SUMMARY

INFORMATION ON THE REQUESTED LOCATION

Site Address:	2900-2920 Shattuck Avenue Berkeley, CA 94705
Client Project Name/Number:	22-14820
Coordinates:	N 37-51-23, W 122-16-1 (NAD 83) 37.856527, -122.26685
Date of Report	March 10, 2022
ERS Project Number:	2104761550
Subject Site Listed on the following lists:	Multiple Agency Lists
Subject Site Listed as Map ID#:	Multiple Map IDs
USGS 7.5 Minute Quad Map:	Oakland West (Date Unavailable)
Subject Site Located within a Potential Area of Concern:	No
Township, Section and Range:	Township: 01S Range: 04W Section: 11 Baseline: Mt. Diablo
Site Elevation: (feet above or below (-) mean sea level)	148
Flood Zone: (Digital Flood Insurance Rate Maps - DFIRMs) Only available digital data is provided	Panel: 06001C0057G, Effective Date: 8/3/2009 Zone X - Area of minimal flood hazard, usually depicted on FIRMs as above the 500-year flood level.
Fire Insurance Map Coverage:	There may be coverage of your site.
Radon Information:	EPA Radon Zone: 2 (Predicted avg for county: 2 to 4 pCi/L) For zip code 94705: Number of tests per zip code: 6 Number of tests where radon is > 4 pCi/L: 0 Percentage of test where radon is > 4 pCi/L: 0.00% Other Information: Not Reported
Search Radius Expansion Size: (In Miles)	0

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in **RED** are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in **YELLOW** have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in **GREEN** are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

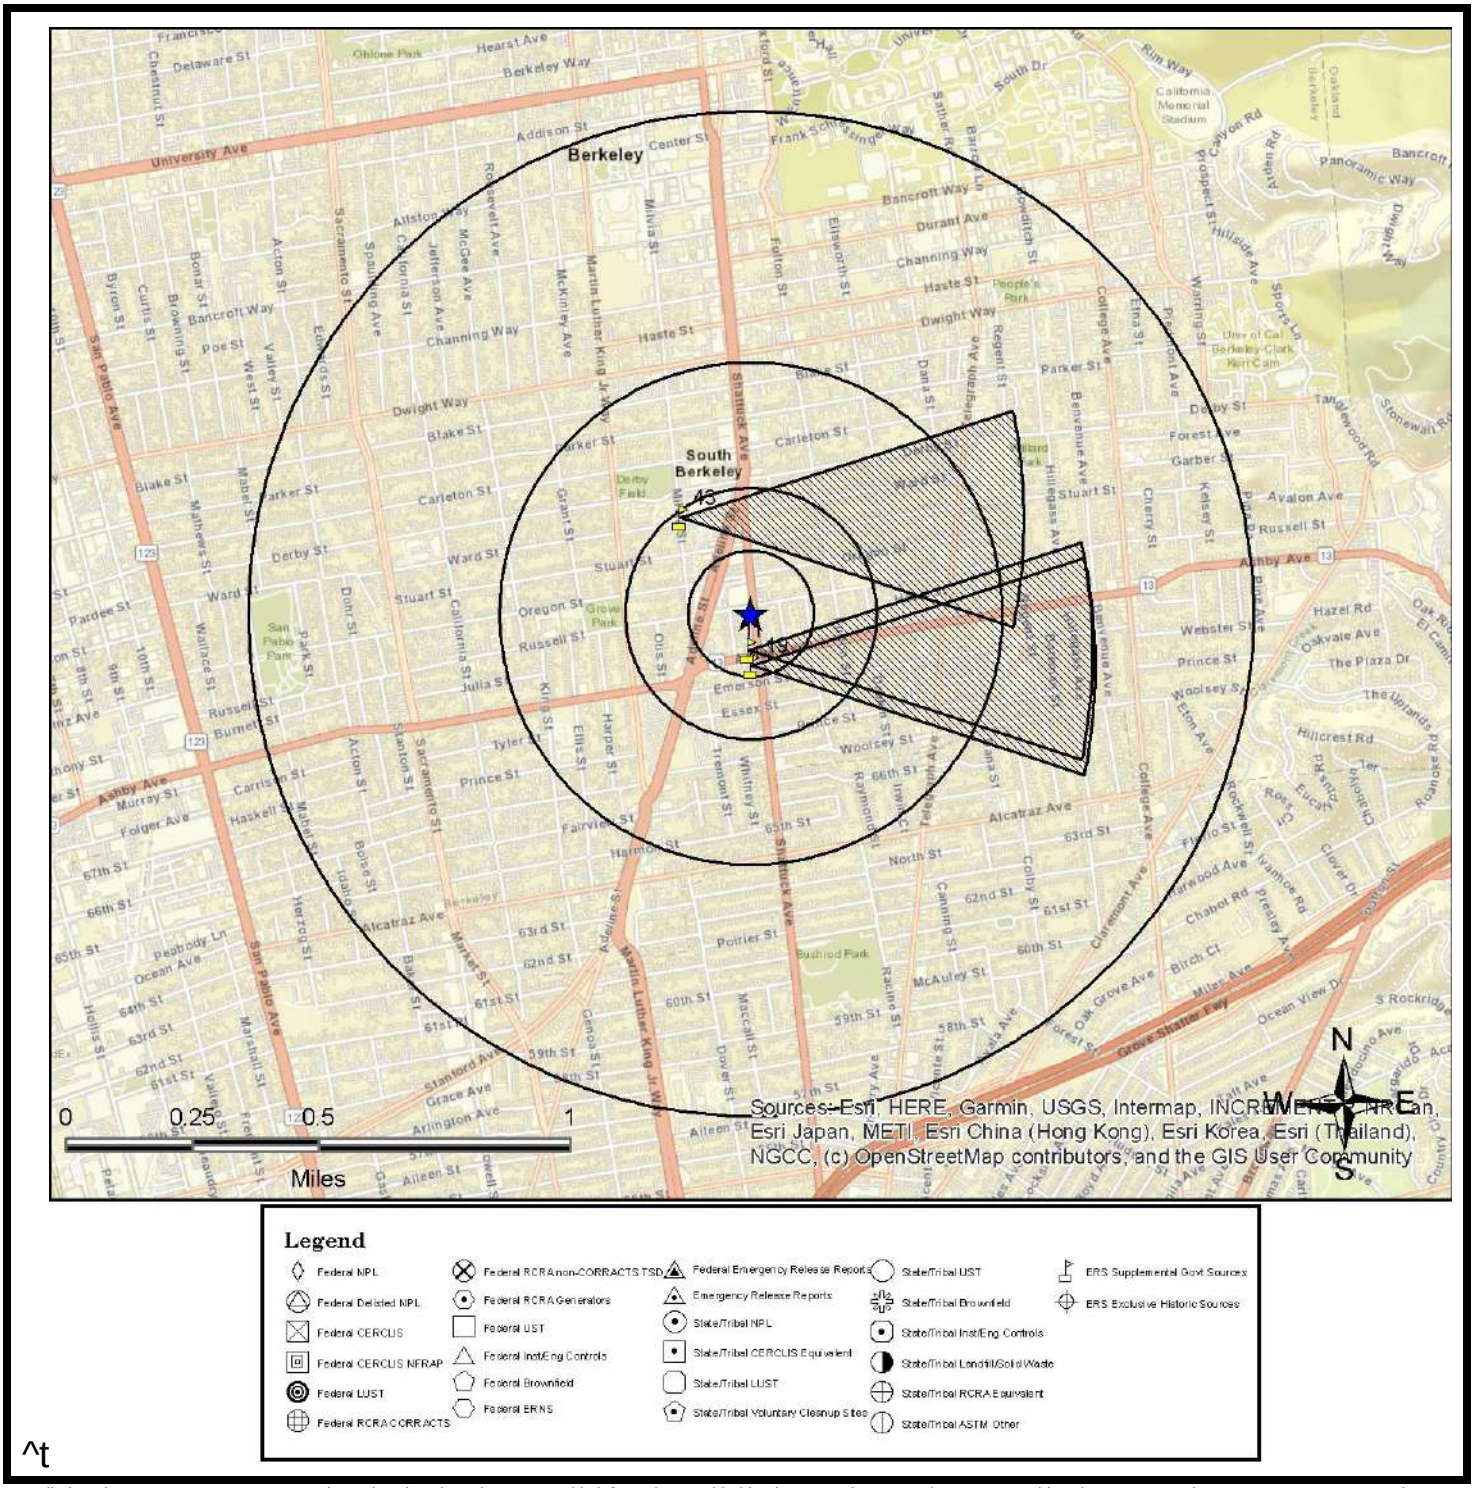
MAPPED AIR PERMITS WITH POTENTIAL DISPERSION (MAP6)

Note: Occurrences on this map are reported in Air Quality databases. Potential air plumes are drawn in the direction of the prevailing wind.



All plotted occurrences represent approximate locations based on geographic information provided by the respective agency/source. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. Potential air dispersion plumes are depicted to graphically show the direction contaminates may travel based on prevailing wind data and provide a visual screening tool only. Actual direction will vary especially by season. Depending on the actual contaminate, amount released, and other variables, the distance from the source the contaminate may travel can and will vary. Interpretation and review of all the actual relevant data by an environmental professional is recommended before making any decisions, conclusions or otherwise based on the map depictions, air data, and potential air dispersion plumes.

DETAILS

Global ID: T0600100963
County: Alameda
Site History: The subject property (Site) is currently a small restaurant (Simply Greek) located at 2929 Shattuck Avenue in Berkeley, California. The Site is developed entirely by a single-story structure that faces directly to Shattuck Avenue. In January 1988, a 1,500-gal underground storage tank (UST) was removed from the Site. The UST was used to house bunker oil. During removal, a 500-gal UST that was used for stoddard solvent (SS, or STOD) presumably used for dry cleaning. Bunker oil (fuel oil, bunker crude, bunker fuel) is typically any type of petroleum fuel used for marine vessels, or in some cases, aircraft. Contaminants reported on Site include Stoddard solvent and bunker fuel/heating oil. No significant observed release to the environment. The Site was Administratively closed in 1991. Closed, G. Fielder, in GeoTracker, October 14, 2008.
Case Type: LUST Cleanup Site
Status: Completed - Case Closed
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Case Worker: REL
Local Agency: BERKELEY, CITY OF
RB Case Number: 01-1044
Loc Case Number: TT01-1044
File Location: Local Agency
Potential Contaminants of Concern: Heating Oil / Fuel Oil, Stoddard solvent / Mineral Spriits / Distillates
Potential Media Affected: Soil
How Discovered: Tank Closure
How Discovered Description: Not Reported
Stop Method: Not Reported
Stop Method Description: Tanks removed in 1988
Action Date: 2015-09-18
Action Type: ENFORCEMENT
Action: Closure/No Further Action Letter

Action Date: 2015-06-25
Action Type: ENFORCEMENT
Action: Notification - Public Notice of Case Closure

DETAILS
Site Regulated Program Information Site ID: 114356 Site EI ID: 10196890 Agency Provided Latitude: 37.857422 Agency Provided Longitude: -122.266304 Program Description: Chemical Storage Facilities Evaluation Information Evaluation Date: 9/6/2018 Violations Found? (Y/N): No Evaluation General Type: Compliance Evaluation Inspection Evaluation Type: Routine done by local agency Evaluation Note(s): The California Environmental Protection Agency (CalEPA) adopted 24 new Federal Hazard Categories for use in the hazardous materials inventory reporting of the 2018 Hazardous Materials Business Plan (HMBP) submittal. The 4/10/2018 submittal did not identify these updated categories. In addition, the environmental contact recently changed. The 24 hour phone number for the emergency contacts is also the business phone number. In the event of an emergency after hours, or if the facility is evacuated, the City needs to have a 24 hour phone number for each of the emergency contacts. Facility shall review the updated hazard categories in the inventory, update the Business Owner Operator page and submit the updated information. Facility provides an orientation training and conduct evacuation drills monthly. TMD recommends secondary containment or a tray in the laundry hazardous materials storage area to allow for easy clean up of spills below the containers. TMD [Truncated] Evaluation Division: Berkeley City Toxics Management Division Evaluation Program: HMRRP Evaluation Source: CERS Evaluation Date: 3/15/2017 Violations Found? (Y/N): Yes Evaluation General Type: Other/Unknown Evaluation Type: Other, not routine, done by local agency Evaluation Note(s): Not Reported Evaluation Division: Berkeley City Toxics Management Division Evaluation Program: HMRRP Evaluation Source: CERS More Details Link

(Y/N): No Evaluation General Type: Compliance Evaluation Inspection Evaluation Type: Routine done by local agency Evaluation Note(s): Onsite for routine inspection at time of monitoring system certification and secondary containment testing. Met with Ivy Zhou, cashier, and Bill McCarthy and Tony Fontana, service technicians with UST Compliance Testing, Inc. Received system setup and alarm history. Confirmed training, alarm logs maintained, and DO reports are complete. Groundwater is leaking in to the 91 STP sump through an electrical penetration about 4 feet above the bottom of the sump. Service technician placed a 5 gallon bucket below the leak to collect the groundwater. The bucket does not appear to interfere with the monitoring of the piping. Please ensure to repair the leak. Service technicians tested and confirmed operation of the sump and UDC sensors, fail safe, positive shutdown, sensor out, and high and low level alarms on the annular sensors. Service technicians confirmed operation of the line leak detectors and fill buckets. Provide a copy of the certification and secondary [Truncated] Evaluation Division: Berkeley City Toxics Management Division Evaluation Program: UST Evaluation Source: CERS Evaluation Date: 5/4/2017 Violations Found? (Y/N): Yes Evaluation General Type: Compliance Evaluation Inspection Evaluation Type: Routine done by local agency Evaluation Note(s): Facility is a small quantity generator. The metal shavings in the rear of the shop are spilling over to the floor. The area shall be cleaned up and the shavings must be managed as scrap metal. Used fluorescent bulbs should be stored in a manner to prevent breakage and must be recycled. You may take them to Berkeley Recycling Center at 669 Gilman Street, Alameda County HHW Small Business Waste Program (800) 606-6606, or contact a recycler for prepaid recycle kits or pick up service. Observed absorbent on floor in parts storage area. The area shall be cleaned up and the absorbent must be managed appropriately. Evaluation Division: Berkeley City Toxics Management Division Evaluation Program: HW Evaluation Source: CERS Evaluation Date: 9/18/2018 Violations Found? (Y/N): Yes Evaluation General Type: Compliance Evaluation Inspection Evaluation Type: Routine done by local agency Evaluation Note(s): Joseph Parafina has taken ownership of the business as of last month. The California Environmental Protection Agency (CalEPA) adopted 24 New Federal Hazard Categories for use in the hazardous materials inventory reporting of the 2018 Hazardous Materials Business Plan (HMBP) submittal. The 2/28/2018 submittal did not identify these updated categories. Evaluation Division: Berkeley City Toxics Management Division More Details Link

Program Description: Chemical Storage Facilities

Program Description: Hazardous Waste Generator

Evaluation Information
Evaluation Date: 10/20/2017
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): See HMBP notes;
Evaluation Division: Berkeley City Toxics Management Division
Evaluation Program: HW
Evaluation Source: CERS

Evaluation Date: 10/20/2017
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): Routine HMBP, Hazardous Waste and Storm Water facility compliance inspection, unannounced. The 2017 CERs submittal was done on 2.2617 by Karina Romero. Hazardous Waste manifests were available for review. Disposal is being done approximately every month. EPA I.D. #000322919. The hazardous waste bins were label appropriately, w/ start accumulation dates filled out. Hazardous com training records available for review on-line, Approx <40 employees trained. There were no violations noted during the inspection.
Evaluation Division: Berkeley City Toxics Management Division

DETAILS

Global ID: T10000014891

County: Alameda

Site History: The Site is located in a mixed commercial and residential area of South Berkeley at the northeast corner of Adeline Street and Ashby Avenue. The property consists of one parcel, assessor parcel number (APN) 53-1591-18-3, totaling approximately 0.64 acres. According to the Phase I Environmental Site Assessment (Phase I ESA), dated December 4, 2019, the current parcel consisted of at least 6 historical parcels with associated addresses including 2031 & 2033 Ashby Avenue and 2925-2933 Adeline Street. APN for these address could not be located in County Assessor records. The Site is bound to the northwest by Adeline Street and further north by various mixed commercial and residential buildings; to the east by additional commercial properties; to the south by a church and residential land-use; and to the west by commercial properties. The Site is currently occupied by one building (6,297 square feet) used as a credit union/bank surrounded by an asphalt paved parking lot. Demolition of existing structures and redevelopment is proposed at this Site, however, at this time limited information is available for the proposed redevelopment that will include both commercial and residential land use. Various configurations and historical operations were conducted at the Site. These site configurations and operations included dwellings as early as 1903 in the northern portion of the Site as observed in the Sanborn maps provided in the Phase I ESA. By 1911, the Site also contained a store building in the southeast corner and a structure labeled as “waiting room” in the southwest corner. A building permit reviewed dated December 19, 1936 was a certificate of occupancy for a service station at the Site. The 1939 aerial photograph shows this gasoline service station. The city directory listings show that a gasoline service station was present at the Site (2001 Ashby Avenue) in 1945 through at least 1962. The city directory also showed that a store building with various commercial/retail businesses occupied the historical building (2031 & 2033 Ashby Avenue) from at least 1920 to 1970. A further look at building permits show an original building permit dated July 30, 1946 was issued for a gasoline service station. The City of Berkeley approved of a building permit for the construction of a bank on February 11, 1969 and signed off on the demolition of the former Site buildings on February 13, 1969. Fire Department records confirm that on February 12, 1969, the Site buildings and two underground storage tanks (USTs) (size and contents not provided) were removed. The present-day Site bank building and parking lot is assumed to have been constructed in 1969. The City of Berkeley Toxics Management Division records identified a letter dated November 2, 1998 review a Phase 1 ESA, dated July 17, 1998 in addition to a soil & groundwater report, dated October 13, 1998. Phase I ESA results indicated recognized environmental conditions (REC) related to the former gasoline service station at the Site and also identified REC-related activities upgradient from active Leaking Underground Storage Tank (LUST) cases. The findings and conclusions of the soil & groundwater report prepared by ATC Associates, Inc., indicated that petroleum hydrocarbons and halogenated volatile organic compounds in the groundwater were detected at levels below the maximum contaminant levels (MCL) or levels relatively low and not considered to pose significant threat to human health or to the environment. Based on these findings, no further action was required regarding soil and groundwater at the Site, however, the City of Berkeley recommended a limited site investigation for the Site prior to a change in use of the Site. Copies of the 1998 Phse I ESA or Subusrface Investigation Report have not been provided to ACDEH at this time. Additional subsurface investigation activities were conducted at the Site in April 2019 and described in the Limited Subsurface Investigation Report, dated May 9, 2019, prepared by Ninyo & Moore. These subsurface investigation activities included the advancement of five shallow borings (S-1 through S-5) to a depth of 2.0 feet below ground surface (bgs) or less. Two temporary soil vapor probes were advanced to a total depth of 5.5 feet bgs and included the collection of soil and soil vapor between 5.0 feet to 5.5 feet bgs. Soil samples were selectively analyzed for gasoline-, diesel-, and motor oil-range total petroleum hydrocarbons (TPH-g, TPH-d, TPH-mo) volatile organic compounds (VOCs) including benzene, toluene, ethylbenzene, and xylene (BTEX), Leaking Underground Fuel Tank (LUFT) 5 metals, and California Title 22 metals. Petroleum related chemicals of concern (COCs) were detected in the soil samples sample at 2 feet bgs, however ACDEH notes these soil samples were collected at a depth above the former USTs. Soil samples also detected metal COCs including arsenic, lead and nickel above applicable regulatory screening levels for residential land use. Soil vapor samples were only collected from one soil vapor probe (SV-1) and indicated VOCs were detected above laboratory detection levels. Petroleum and non-petroleum related COCs were detected in soil vapor including but not limited tert-Butyl alcohol (TBA), ethylbenzene, toluene, chloromethane, carbon disulfide, and methyl ethyl ketone (MEK). Groundwater was not collected during the April 2019 investigations.

Program Description: Chemical Storage Facilities

Evaluation Information
Evaluation Date: 9/26/2017
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): Routine, scheduled facility compliance inspection. There were no violations noted during the inspection.
Evaluation Division: Berkeley City Toxics Management Division
Evaluation Program: HMRRP
Evaluation Source: CERS

Evaluation Date: 6/10/2015
Violations Found? (Y/N): Yes
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): Cell site is located on south side of the building, inside. Verizon is adding a second site, Memorial Stadium DAS, that is co-located in an adjoining room. Paul indicates they have not taken ownership of the site. Submit updated plan to include Memorial Stadium DAS.

Program Description: Chemical Storage Facilities

Program Description: Hazardous Waste Generator

Evaluation Information
Evaluation Date: 9/20/2016
Violations Found? (Y/N): No
Evaluation General Type: Other/Unknown
Evaluation Type: Other, not routine, done by local agency
Evaluation Note(s): Conducted a follow-up inspection to confirm whether the facility corrected the violations given during the routine inspection performed on July 15, 2016 at 10:30 am with Meridith Lear (Hazardous Materials Specialist II) and Jewel Mauricio (Hazardous Materials Specialist I). A violation cited on page 2 of the routine inspection report (06/15/16), H284 22 CCR 15 66265.194 which state "Hazardous wastes must be stored in containers that are not overfilled. The waste oil tank had overflowed into the bermed area. Waste must be collected from this area and placed in a properly closed container within 24 hrs of signing this report" This violation has been corrected and no additional violations observed. See photos for reference. Violation cited on pg 3 of the routine inspection report, HW Title 22 4266262.40 (e) which stated " Manifests needs to be maintained for 3 years". This violation has been corrected, the facility provided 3 years worth of manifests. The manifests [Truncated]
Evaluation Division: Berkeley City Toxics Management Division
Evaluation Program: HW
Evaluation Source: CERS

Evaluation Date: 9/20/2016
Violations Found? (Y/N): No
Evaluation General Type: Other/Unknown
Evaluation Type: Other, not routine, done by local agency
Evaluation Note(s): Violation cited on page 3 of the routine inspection report HOO2 40 CFR 11 2.3 (e)(i) APSA, which stated "Facility appears to have petroleum storage capacity excess of 1320 gallons combined an no SPCC is on file..., Emergency contact info needs to be updated in the electronic sys." The violation is no longer valid since the facility proved to not have a combined aboveground petroleum storage in excess of 1320 gallons. Please see photos and documentation for reference.

Agency Provided Latitude: 37.85298
Agency Provided Longitude: -122.26591

Program Description: Chemical Storage Facilities

Evaluation Information
Evaluation Date: 5/23/2018
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): This was The Starry Plough's first inspection in the CUPA program. One cylinder could have ducked under the restraint if it fell in a certain direction - make sure that the restraints are effective. HMBP submitted and accepted. Fire extinguisher servicing due by the end of this month, training performed and records maintained, cylinders secured - satisfactory. DA

UN-MAPPABLE OCCURRENCES

The following occurrences were not mapped primarily due to incomplete or inaccurate address information. All of the following occurrences were determined to share the same zip code as the area searched. General status information is given with each occurrence along with any address information entered by the agency responsible for the list.

ID	Facility Name	Address	Database	Status
No "un-mapped" sites requested.

DISCLAIMER, LIMITS AND LIABILITIES

All of the data presented in this report was garnered from public information maintained by governmental agencies. ***Environmental Record Search (ERS)*** cannot ensure that the data, which has been entered and maintained by others, is complete and/or accurate. Any, and all omissions, errors, negligence, accidentally or otherwise within the data received by ***ERS*** is assumed to be caused by others and ***ERS*** cannot and does not assume, take, or acknowledge any liability whatsoever for their respective data. The extrapolation of the mapped locations is based solely on the accuracy of the data provided by others. Prior to relying completely on any mapped location within this report, its accuracy should be verified using other means such as further documentation or a field visit. ***ERS*** makes no representation, warranty or guaranty, express or implied regarding the accuracy of the data entered and maintained by others or the suitability of the data received from others in this report for a certain task or interpretation.

The data presented in this report should only be interpreted by an experienced environmental professional, as per EPA definition, that completely understands the potential inaccuracy of the data derived from others, the possible existence of contaminated occurrences that have not been listed, and the possibility that the governmental database misrepresents the actual status of an occurrence or listing. Prior to relying completely on any of the data within this report, an environmental professional should verify the accuracy of the information presented unless one of ERS's Environmental Professionals has interpreted the data and/or report.

It is important that the reader and/or end user of this information realize that the data gathered has not been verified for its accuracy or completeness in any way by ***ERS***. With billions of records, this is an impossible task for any Company. As much as possible, the data is presented unchanged and unaltered to represent the actual data produced by these agencies. This insures the integrity of the data for the end user.

ERS does however stand behind its representation of the data, any manually plotted occurrences, any risk determinations and all other items directly under its control. This report does comply (as far as the data is reasonably ascertainable as outlined in both the following standards) with section 8.2.1 of ASTM 1527-13 – Standard Environmental Record Sources and EPA's 40 CFR Part 312, All Appropriate Inquiries. ***ERS*** does ensure that the data is accurately reproduced from the original source. ***ERS*** backs the reporting of the data with $3,000,000 of General and Environmental Professional Liability (errors and omissions) Insurance!

The ***ERS*** logo, name, report design, presentation, maps, tables, etc., are the exclusive property of ***ERS*** and its parent company and affiliates. Except as provided below, information or images contained in this report may not be reproduced or distributed in whole or in part by any means without the prior written permission from ***ERS.*** United States and international copyright laws protect any and all reports produced by ***ERS*.**

The person or entity that purchased this report may make up to five (5) copies of the entire report or any part of it for archival purposes or to include as part of another report. All copyright information must remain intact and not be modified in any way.

Property Owner Mailing Country: United States

Inspection Information
Aboveground Petroleum Storage Act (APSA) Last Inspection Date: Not Reported
California Accidental Release Prevention (CalARP) Last Inspectio: Not Reported
Conditionally Authorized (CA) Last Inspection Date: Not Reported
Conditionally Exempt (CE) Last Inspection Date: Not Reported
Household Hazardous Waste Collection (HHW) Last Inspection Date: Not Reported
Hazardous Materials Release Response Plan (HMRRP) Last Inspectio: 11/30/2015
Hazardous Waste Generator (HW) Last Inspection Date: 11/30/2015
RCRA Large Quantity Generator (HWLQG) Last Inspection Date: Not Reported
Hazardous Waste Recycler (HWRecycler) Last Inspection Date: Not Reported
Permit By Rule (PBR) Last Inspection: Not Reported
Underground Storage Tank (UST) Last Inspection Date: Not Reported

Hazardous Material Inventory Information
Chemical Location: 1
Chemical Name: Not Reported
Common Chemical Name: Used Antifreeze
Extremely Hazardous Substance?: N
CERS Chemical Library ID: Not Reported
US EPA Substance Registry System ID: Not Reported
DOT Hazardous Classification ID: Not Reported
DOT Hazard Class: Not Reported
Chemical Abstract Service (CAS) Number: Not Reported
Primary Fire Code Hazardous Class: Not Reported
Secondary Fire Code Hazardous Class: Not Reported
Third Fire Code Hazardous Class: Not Reported
Fourth Fire Code Hazardous Class: Not Reported
Fifth Fire Code Hazardous Class: Not Reported
Sixth Fire Code Hazardous Class: Not Reported
Seventh Fire Code Hazardous Class: Not Reported
Eighth Fire Code Hazardous Class: Not Reported
Hazardous Material Type Code: c
Hazardous Material Type: Waste
Radio Active?: N
Activity in Curies: Not Reported
Physical State of Hazardous Material Stored: Liquid
Total Capacity of Largest Container: 40
Fire Haz Category - Fire?: N
Fire Haz Category - Reactive?: N
Fire Haz Category - Pressure Release?: N
Fire Haz Category - Acute Health?: Y
Fire Haz Category - Chronic Health?: N
Average Daily Amount Containing a Hazardous Material: 25
Maximum Daily Amount Containing a Hazardous Material: 40
Estimate of Annual Amount Handled: 465
California Hazardous Waste Code: 342
Unit of Measure: Gallons

Total Number of Days Material is on Site: 365
Storage Container - Aboveground Tank?: N
Storage Container - Underground Tank?: N
Storage Container - Tank Inside Bldg?: N
Storage Container - Steel Drum?: N
Storage Container - Plastic/Non-Metallic Drum?: Y
Storage Container - Can?: N
Storage Container - Carboy?: N
Storage Container - Silo?: N
Storage Container - Fiber Drum?: N
Storage Container - Bag?: N
Storage Container - Box?: N
Storage Container - Cyclinder?: N
Storage Container - Glass Bottle?: N
Storage Container - Plastic Bottle?: N
Storage Container - Tote Bin?: N
Storage Container - Tank Truck/Wagon?: N
Storage Container - Tank/Rail Car?: N
Storage Container - Other?: N
Other Storage Container: Not Reported
Storage Pressure Code: a
Storage Pressure of Hazardous Material: Ambient
Storage Temperature Code: a
Storage Temperature of Hazardous Material: Ambient
Haz Component 1 - Percent by Weight: Not Reported
Haz Component 1 - Component Name: Ethylene Glycol
Haz Component 1 - EHS?: N
Haz Component 1 - CAS Number: 107-21-7
Haz Component 2 - Percent by Weight: Not Reported
Haz Component 2 - Component Name: Burates
Haz Component 2 - EHS?: N
Haz Component 2 - CAS Number: 1330-43-4
Haz Component 3 - Percent by Weight: Not Reported
Haz Component 3 - Component Name: Nitrates
Haz Component 3 - EHS?: N
Haz Component 3 - CAS Number: 7632-00-00
Haz Component 4 - Percent by Weight: Not Reported
Haz Component 4 - Component Name: Silicon compounds
Haz Component 4 - EHS?: N
Haz Component 4 - CAS Number: 8834-92-0
Haz Component 5 - Percent by Weight: Not Reported
Haz Component 5 - Component Name: Not Reported
Haz Component 5 - EHS?: N
Haz Component 5 - CAS Number: Not Reported
Chemical Description Comment(s): Not Reported
Additional Mixture Components: Not Reported

Chemical Location: 10
Chemical Name: Not Reported
Common Chemical Name: Waste Oil

Program Description: Chemical Storage Facilities

Program Description: Hazardous Waste Generator

Evaluation Information
Evaluation Date: 3/16/2018
Violations Found? (Y/N): Yes
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): EPA ID Number, CAD 983 642 786, is active. Waste is kept outside under a shelter. Waste is consistent with the inventory provided on CERS. Observed Used Oil, used coolant, waste filters (paper and metal separated), waste aerosols. Hazardous waste manifests were reviewed for past 3 years, records were compliant. Fire extinguishers are up to date.
Evaluation Division: Berkeley City Toxics Management Division
Evaluation Program: HW
Evaluation Source: CERS

Evaluation Date: 3/16/2018
Violations Found? (Y/N): Yes
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): Hazardous materials onsite are consistent with the materials reported on CERS. Facility map accurately depicts locations of hazardous materials and waste. Annual training for hazard communication and hazardous material/waste handling has not been completed since 2015.
Evaluation Division: Berkeley City Toxics Management Division
Evaluation Program: HMRRP
Evaluation Source: CERS

Violation Information
Violation Date: 3/16/2018
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violation Note(s): Returned to compliance on 04/16/2018. Business failed to provide annual training to all employees. Corrective action: Complete hazardous materials/waste training for all employees and submit records to Toxics Management Division.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HMRRP
Violation Source: CERS

Violation Date: 3/16/2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Note(s): Returned to compliance on 04/16/2018. Business failed to properly label hazardous waste in that the accumulation start date was not indicated. Corrective action: Add accumulation start dates to all hazardous waste containers that have begun accumulating.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HW
Violation Source: CERS

County: Alameda
Site History: The subject property (Site) is currently a small restaurant (Simply Greek) located at 2929 Shattuck Avenue in Berkeley, California. The Site is developed entirely by a single-story structure that faces directly to Shattuck Avenue. In January 1988, a 1,500-gal underground storage tank (UST) was removed from the Site. The UST was used to house bunker oil. During removal, a 500-gal UST that was used for stoddard solvent (SS, or STOD) presumably used for dry cleaning. Bunker oil (fuel oil, bunker crude, bunker fuel) is typically any type of petroleum fuel used for marine vessels, or in some cases, aircraft. Contaminants reported on Site include Stoddard solvent and bunker fuel/heating oil. No significant observed release to the environment. The Site was Administratively closed in 1991. Closed, G. Fielder, in GeoTracker, October 14, 2008.

AST, HMRRP & UST Violation Information
EPA ID: Not Reported
RCRA LQG: No
Violation Date: 3/16/2016
Violation Type Number: 1010001
Class: Minor
Scheduled Return to Compliance Date: 4/15/2016
Actual Return to Compliance Date: 5/2/2016
Actual Return to Compliance Qualifier: Documented
Violation Comment: needs to submit HMBP via CERS for 2016
Violation Category: Administration/Documentation
Violation Name: Hazardous Materials Business Plan Implementation
Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Citation(s): HSC 6.95 25507

AST, HMRRP & UST Inspection Information
EPA ID: Not Reported
RCRA LQG: No
Inspection Date: 3/16/2016
Inspection Type: Routine
Number of Class I Violations: 0
Number of Class II Violations: 0
Number of Minor Violations: 1
Significant Operational Compliance: With both Release Detection and Release Prevention
Date Returned to Compliance: 5/2/2016
Days Out of Compliance: 47
Violation Details Available: Yes
Inspection Comments: Needs to submit 2016 HMBP via CERS. Diesel belly tank for back up generator. Diesel generator tested on a weekly basis. Fire Ext located inside the building. Spill cleanup absorbent available for use.

Program Description: Chemical Storage Facilities

Evaluation Information
Evaluation Date: 9/6/2018
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): The California Environmental Protection Agency (CalEPA) adopted 24 new Federal Hazard Categories for use in the hazardous materials inventory reporting of the 2018 Hazardous Materials Business Plan (HMBP) submittal. The 4/10/2018 submittal did not identify these updated categories. In addition, the environmental contact recently changed. The 24 hour phone number for the emergency contacts is also the business phone number. In the event of an emergency after hours, or if the facility is evacuated, the City needs to have a 24 hour phone number for each of the emergency contacts. Facility shall review the updated hazard categories in the inventory, update the Business Owner Operator page and submit the updated information. Facility provides an orientation training and conduct evacuation drills monthly. TMD recommends secondary containment or a tray in the laundry hazardous materials storage area to allow for easy clean up of spills below the containers. TMD [Truncated]

Fire Haz Category - Fire?: Y
Fire Haz Category - Reactive?: N
Fire Haz Category - Pressure Release?: N
Fire Haz Category - Acute Health?: Y
Fire Haz Category - Chronic Health?: Y
Average Daily Amount Containing a Hazardous Material: 10000
Maximum Daily Amount Containing a Hazardous Material: 14027
Estimate of Annual Amount Handled: Not Reported
California Hazardous Waste Code: Not Reported
Unit of Measure: Gallons
Total Number of Days Material is on Site: 365
Storage Container - Aboveground Tank?: N
Storage Container - Underground Tank?: Y
Storage Container - Tank Inside Bldg?: N
Storage Container - Steel Drum?: N
Storage Container - Plastic/Non-Metallic Drum?: N
Storage Container - Can?: N
Storage Container - Carboy?: N
Storage Container - Silo?: N
Storage Container - Fiber Drum?: N
Storage Container - Bag?: N
Storage Container - Box?: N
Storage Container - Cyclinder?: N
Storage Container - Glass Bottle?: N
Storage Container - Plastic Bottle?: N
Storage Container - Tote Bin?: N
Storage Container - Tank Truck/Wagon?: N
Storage Container - Tank/Rail Car?: N
Storage Container - Other?: N
Other Storage Container: Not Reported
Storage Pressure Code: a
Storage Pressure of Hazardous Material: Ambient
Storage Temperature Code: a
Storage Temperature of Hazardous Material: Ambient
Haz Component 1 - Percent by Weight: Not Reported
Haz Component 1 - Component Name: mixture
Haz Component 1 - EHS?: Not Reported
Haz Component 1 - CAS Number: Not Reported

AST, HMRRP & UST Violation Information
EPA ID: CAL000305472
RCRA LQG: No
Violation Date: 5/4/2017
Violation Type Number: 2010009
Class: Minor
Scheduled Return to Compliance Date: 6/3/2017
Actual Return to Compliance Date: 5/8/2017
Actual Return to Compliance Qualifier: Observed
Violation Comment: The facility did not submit a copy of the Secondary Containment Testing Report to TMD within 30 days of completion of the test.Corrected this date. TMD received a copy of the test report.
Violation Category: Administration/Documentation
Violation Name: Secondary Containment Testing
Violation Description: Failure to submit a copy of the secondary containment test results to the CUPA within 30 days after the test.
Violation Citation(s): 23 CCR 16 2637(e)

Violation Date: 5/4/2017
Violation Type Number: 2030074
Class: Minor
Scheduled Return to Compliance Date: 6/3/2017
Actual Return to Compliance Date: 5/8/2017
Actual Return to Compliance Qualifier: Observed
Violation Comment: The facility did not provide copies of the 2015 or 2016 monitoring system certification report to TMD within 30 days of completion of the test.Corrected this date. TMD received a copy of both certification reports.
Violation Category: Operations/Maintenance
Violation Name: Annual Monitoring System Certification Submittal
Violation Description: Failure to submit the Annual Monitoring System Certification Form to the CUPA within 30 days of completion of the test.
Violation Citation(s): 23 CCR 16 2638(d)

Violation Date: 5/7/2015

Violation Type Number: 1010008
Class: Minor
Scheduled Return to Compliance Date: 6/6/2015
Actual Return to Compliance Date: 5/20/2015
Actual Return to Compliance Qualifier: Documented
Violation Comment: Business has not completed the annual review and certification of the HMBP as required by HSC 25508. the last inventory submittal was made 2/28/14 and the last emergency response submittal was made 6/24/13. TMD emailed business on 2/28/15 indicating business had not met its annual business plan certification requirement.Corrective action: review and submit the hazardous materials inventory, site map and emergency response plan/training plan.
Violation Category: Administration/Documentation
Violation Name: Annual Review / Certification
Violation Description: Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.
Violation Citation(s): HSC 6.95 25508(c), 25508.2

Violation Date: 5/7/2015
Violation Type Number: 1010010
Class: Minor
Scheduled Return to Compliance Date: 6/6/2015
Actual Return to Compliance Date: 6/2/2015
Actual Return to Compliance Qualifier: Documented
Violation Comment: Reviewed binder provided by Ivy. The binder includes a telephone directory with incorrect phone numbers for Fire and Toxics Management Division. While not submitted as part of the emergency plan, electronically, it does appear the binder is utilized.Corrective action: Update the information in the binder to reflect current response and phone numbers.
Violation Category: Administration/Documentation
Violation Name: Emergency response plan and procedures
Violation Description: Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Citation(s): HSC 6.95 25505(a)(3), 25508(a)(1)

Violation Date: 5/7/2015
Violation Type Number: 2030046
Class: Minor
Scheduled Return to Compliance Date: 6/6/2015
Actual Return to Compliance Date: 6/2/2015
Actual Return to Compliance Qualifier: Documented
Violation Comment: The plans for all tanks indicate tank monitoring is performed using continuous electronic monitoring and automatic tank gauging. TMD confirmed the continuous electronic monitoring at the inspection. TMD could not confirm compliance with ATG requirements of 27 CCR 2643. corrective action: Provide hard copies of data reported for the ATG testing conducted at least once per month, including time and date, tank identification, fuel dept, water depth, temperature, liquid volume and duration of test. If you do not use ATG to monitor tank for release detection, update the monitoring plan.
Violation Category: Operations/Maintenance
Violation Name: Response Plan
Violation Description: Failure to submit, obtain approval, or maintain a complete/accurate response plan.
Violation Citation(s): 23 CCR 16 2632, 2634(e), 2641(h), 2712(i)

Violation Date: 5/14/2014
Violation Type Number: 2030040
Class: Minor
Scheduled Return to Compliance Date: 6/13/2014

Actual Return to Compliance Date: 5/14/2014
Actual Return to Compliance Qualifier: Documented
Violation Comment: Observed test boot still on piping with test port facing up and clamps loose. Secondary contained piping not maintained to allow liquid to drain into sump.The boot was rotated at time of inspection to ensure port facing down.
Violation Category: Operations/Maintenance
Violation Name: Piping Obstruction (RD)
Violation Description: Failure to maintain secondarily contained piping to allow liquid in the event of a leak to drain into sump (i.e. failure to remove test boot, pipe swelling).
Violation Citation(s): 23 CCR 16 2630(d), 2641(a)

AST, HMRRP & UST Inspection Information

Inspection Comments: HMBP annual review and certification submitted on 2/15/2017. Confirmed business, inventory, site plan and emergency response information.

Inspection Date: 5/4/2017
Inspection Type: Routine
Number of Class I Violations: 0
Number of Class II Violations: 0
Number of Minor Violations: 2
Significant Operational Compliance: With both Release Detection and Release Prevention
Date Returned to Compliance: 5/8/2017
Days Out of Compliance: 4
Violation Details Available: Yes
Inspection Comments: Met with Tony Fontana and Bill McCarthy with UST Compliance Testing Inc. for routine inspection at time of monitoring system certification. Received system setup and alarm history. Reviewed monthly DO reports, which are complete. Facility maintains a daily log which notes any alarms. In June 2016, the diesel annular sensor alarmed with high alarms, and documents indicate the level of the sensor was adjusted. No additional alarms are noted since that time. The 91 annular sensor alarmed with high alarms in January, February, April, and May. According to Bill, most of the alarms cleared themselves, and TMD was able to identify for a few of the dates, that the sensor was adjusted. The station had same alarms on 91 annular sensor in 2015.The UST information was last submitted with the permit renewal on 3/23/2016 in CERS. Confirmed Financial responsibility, Response planConfirmed the operation and setup of diesel, premium, and unleaded sump sensors and positive [Truncated]

Inspection Date: 5/5/2016
Inspection Type: Routine
Number of Class I Violations: 0
Number of Class II Violations: 0
Number of Minor Violations: 0

Significant Operational Compliance: With both Release Detection and Release Prevention
Date Returned to Compliance: Not Reported
Days Out of Compliance: 424
Violation Details Available: No
Inspection Comments: Onsite for UST inspection at time of monitoring system certification. Bill McCarthy and Tony Fontana, UST Compliance Testing Inc. completing the certification. Received system setup and alarm history.Confirmed operation of turbine sump sensors and annular sensors for Tanks 1, 2 and 3. Confirmed positive shutdown, failsafe and sensor out. Confirmation operation of UDC sensors in 1-2, 3-4, 5-6, 7-8. Confirmed operation of line leak detectors for Tanks 1, 2, and 3 and pass of spill buckets. Confirmed site has flapper valves. The Tank Information submitted 3/23/2016 also indicates overfill protection is accomplished using ball float and audible/visual alarms. TMD is unable to confirm the ball floats are under all open risers except the fill riser and automatic tank guaging port and that the ball float is installed at higher level than the fill tube valve so that the fill tube valve is activated prior to any flow restriction. If the monitoring plan indicates the use of a [Truncated]

Evaluation Information
Evaluation Date: 5/3/2018
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): Onsite for routine inspection at time of monitoring system certification and secondary containment testing. Met with Ivy Zhou, cashier, and Bill McCarthy and Tony Fontana, service technicians with UST Compliance Testing, Inc. Received system setup and alarm history. Confirmed training, alarm logs maintained, and DO reports are complete. Groundwater is leaking in to the 91 STP sump through an electrical penetration about 4 feet above the bottom of the sump. Service technician placed a 5 gallon bucket below the leak to collect the groundwater. The bucket does not appear to interfere with the monitoring of the piping. Please ensure to repair the leak. Service technicians tested and confirmed operation of the sump and UDC sensors, fail safe, positive shutdown, sensor out, and high and low level alarms on the annular sensors. Service technicians confirmed operation of the line leak detectors and fill buckets. Provide a copy of the certification and secondary [Truncated]

Violation Information
Violation Date: 5/1/2019
Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements:

Be performed by an ICC certified DO.
Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy.
Inspect for the presence of liquid/debris in spill containers.
Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly.
Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit.
Check that all testing and maintenance has been completed and documented.
Verify that all facility employees have been trained in accordance with 23 CCR 2715(c).
For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Violation Note(s): Returned to compliance on 06/05/2019. The 10/26/2018, 12/21/2018, 1/25/2019, 2/26/2019 and 3/27/2019 inspection reports all show a compliance issue of overfill not tested yet. The owner/operator does not provide a description in Section V of the action taken or to be taken to correct the issue. The11/28/2018, 3/27/2019, 4/23/2019 inspection reports do not identify it as a compliance issue. The DO inspection did not document inspection that UDC equipment is positioned correctly. The inspections are not being conducted every 30 days. Corrective action: The owner/operator must provide a description in Section V of any action taken or to be taken to correct issues discovered during the monthly DO inspection. The DO shall complete all required information on the report, including whether all sensors in the UDC are located to detect leak at earliest opportunity. The Inspection must also be completed within 30 days from the last inspection.

Violation Program: UST
Violation Source: CERS

Violation Date: 5/1/2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements:
Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or
Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or
Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or
Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,Â 2018.

For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter.

For USTs installed on and after OctoberÂ 1,Â 2018, perform an inspection at installation and every 36 months thereafter.

Inspected within 30 days after a repair to the overfill prevention equipment.

Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Inspected by a certified UST service technician.

Maintain records of overfill prevention equipment inspection for 36 months.

Violation Note(s): Returned to compliance on 06/05/2019. The overfill prevention equipment was not inspected by October 13, 2018. The overfill protection is listed in CERS for all tanks as audible/visual alarm, ball float and fill tube shut-off valve. Only the flapper valves were inspected this date. Corrective action: Either update CERS to reflect the minimal required overfill prevention method, or inspect all equipment. Provide the form and all required information within 30 days of the test. The next inspection must be completed no later than October 13, 2021 and every 36 months thereafter.

Violation Date: 5/4/2017
Citation: 23 CCR 16 2638(d) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2638(d)
Violation Description: Failure to submit the Annual Monitoring System Certification Form to the CUPA within 30 days of completion of the test.
Violation Note(s): Returned to compliance on 05/08/2017. The facility did not provide copies of the 2015 or 2016 monitoring system certification report to TMD within 30 days of completion of the test. Corrected this date. TMD received a copy of both certification reports.

Violation Date: 5/4/2017
Citation: 23 CCR 16 2637(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2637(e)
Violation Description: Failure to submit a copy of the secondary containment test results to the CUPA within 30 days after the test.

Violation Note(s): Not Reported
Violation Division: Berkeley City Toxics Management Division
Violation Program: UST
Violation Source: CERS

Violation Date: 5/7/2015
Citation: 23 CCR 16 2712(i) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(i)
Violation Description: Failure to submit, obtain approval, or maintain a complete/accurate response plan.
Violation Note(s): Returned to compliance on 06/02/2015. The plans for all tanks indicate tank monitoring is performed using continuous electronic monitoring and automatic tank gauging. TMD confirmed the continuous electronic monitoring at the inspection. TMD could not confirm compliance with ATG requirements of 27 CCR 2643. corrective action: Provide hard copies of data reported for the ATG testing conducted at least once per month, including time and date, tank identification, fuel dept, water depth, temperature, liquid volume and duration of test. If you do not use ATG to monitor tank for release detection, update the monitoring plan.

Days Out of Compliance: 566
Violation Details Available: No
Inspection Comments: Routine and unannounced inspection for HMBP and HW. RP mentioned that his quantities of haz mat have been reduced, upon inspecting they did appear to be less than was originally reported. The RP asked to have his cupa bill reviewed and based on the quantities noted during the inspection the bill could be reduced if the RP were to resubmit their inventory statement and submit a fee appeal form. This was mentioned to the RP and and separate email was sent detailing what was needed. No new employees for the a minimum of three years and all are family members. Hazardous waste containers were labeled appropriately with start accumulation dates completed. Observation that their fire extinguishers were due for service being one month overdue. The RP was going to call and schedule the fire extinguisher service. Failed to post emergency response information next to telephone, a posting was provided and the RP completed and posted the emergency phone numbers. Hazardous waste [Truncated]

Program Description: Chemical Storage Facilities

Program Description: Hazardous Waste Generator

Evaluation Information
Evaluation Date: 9/18/2018
Violations Found? (Y/N): Yes
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): Facility is a small quantity generator. The metal shavings in the rear of the shop are spilling over to the floor. The area shall be cleaned up and the shavings must be managed as scrap metal. Used fluorescent bulbs should be stored in a manner to prevent breakage and must be recycled. You may take them to Berkeley Recycling Center at 669 Gilman Street, Alameda County HHW Small Business Waste Program (800) 606-6606, or contact a recycler for prepaid recycle kits or pick up service. Observed absorbent on floor in parts storage area. The area shall be cleaned up and the absorbent must be managed appropriately.
Evaluation Division: Berkeley City Toxics Management Division
Evaluation Program: HW
Evaluation Source: CERS

Evaluation Date: 9/18/2018
Violations Found? (Y/N): Yes
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): Joseph Parafina has taken ownership of the business as of last month. The California Environmental Protection Agency (CalEPA) adopted 24 New Federal Hazard Categories for use in the hazardous materials inventory reporting of the 2018 Hazardous Materials Business Plan (HMBP) submittal. The 2/28/2018 submittal did not identify these updated categories.

Violation Information
Violation Date: 9/18/2018
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements:
(a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste.
(b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Note(s): Returned to compliance on 11/29/2018. Observed open hazardous waste containers in that the used oil and used antifreeze tanks have funnels in the opening, a portable used oil container with holes in the top, secondary containment pallets with standing liquid. Corrective action: Provide lids for the hazardous waste tanks, change out the lid on the portable used oil container with holes or discontinue use of the container, remove the liquid from the containment pallets and manage properly.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HW

Violation Source: CERS

Violation Date: 9/18/2018
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Note(s): Returned to compliance on 11/29/2018. New business owner requires a new EPA ID Number. Facility is still shipping offsite under the old owners inactive EPA ID number. Corrective action: Obtain an EPA ID number by submitting a completed application form 1358, https://www.dtsc.ca.gov/HazardousWaste/upload/GISS_FORM_1358.pdf, to the Department of Toxic Substances Control or U.S. Environmental Protection Agency, as applicable. Provide confirmation to the Toxics Management Division. In addition, ensure that you are completing the EPA ID number verification questionnaire (eVQ), which is an online system through DTSC, in July every year.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HW
Violation Source: CERS

Violation Date: 9/18/2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Note(s): Returned to compliance on 11/29/2018. The portable used oil containers are labeled as hazardous waste, but the label is illegible for the name and address of generator, and hazard and chemical properties of the hazardous wastes. The used antifreeze tank is labeled as motor oil. Corrective action: Relabel the portable used oil containers, and label the used antifreeze tank with all required information. TMD can provide labels with laminate on top.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HW
Violation Source: CERS

Violation Date: 9/18/2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Note(s): Returned to compliance on 12/06/2018. Observed a container of R134a at the site and it is not listed on the inventory. Corrective action: Update the inventory to include the R134a.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HMRRP
Violation Source: CERS

Violation Date: 9/18/2018
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Note(s): Returned to compliance on 11/29/2018. Used oil filters are stored in open, unlabeled drums and stacked on cart. The cart has a collection of used oil that is spilling on the floor. Corrective action: Transfer the used oil filters to a closed drum and label the drum with "used oil filters" and an accumulation start date. Clean up the spill and manage the waste appropriately.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HW
Violation Source: CERS

Violation Date: 3/1/2017
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Note(s): Returned to compliance on 03/28/2017. Non Inspection related Notice of Violation: Failure to report a current Hazardous Materials Business Plan
Violation Division: Berkeley City Toxics Management Division
Violation Program: HMRRP
Violation Source: CERS

Violation Date: 4/14/2016
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.

Violation Note(s): Returned to compliance on 05/25/2016.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HMRRP
Violation Source: CERS

Violation Date: 12/15/2015
Citation: 40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)
Violation Description: Failure to post, next to the telephone, Emergency Information (SQG) containing the location of emergency equipment, contact names and numbers.
Violation Note(s): Returned to compliance on 12/16/2015.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HW
Violation Source: CERS

Program Description: Hazardous Waste Generator

Evaluation Information
Evaluation Date: 10/20/2017
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): See HMBP notes;
Evaluation Division: Berkeley City Toxics Management Division
Evaluation Program: HW
Evaluation Source: CERS

Evaluation Date: 10/20/2017
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): Routine HMBP, Hazardous Waste and Storm Water facility compliance inspection, unannounced. The 2017 CERs submittal was done on 2.2617 by Karina Romero. Hazardous Waste manifests were available for review. Disposal is being done approximately every month. EPA I.D. #000322919. The hazardous waste bins were label appropriately, w/ start accumulation dates filled out. Hazardous com training records available for review on-line, Approx <40 employees trained. There were no violations noted during the inspection.

Evaluation Division: Berkeley City Toxics Management Division
Evaluation Program: HMRRP
Evaluation Source: CERS

Evaluation Date: 3/12/2015
Violations Found? (Y/N): Yes
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency

DETAILS

General Program & Facility Information
CERS ID: 10195858
Facility ID: Not Reported
Facility Regulator Key ID: FA0000012
Organization Code: 90608449
Business/Organization Name: Berkeley Gas & Smog
Multiple Jurisdictional Business? (Y/N): No
Business Origin: Business
Count of Business' CERS User Accounts: 1
Facility Count for Business: 1
Last Submittal Date (any element): 4/27/2017 10:33:20 AM
Count of Submitted Elements: 30
Remote Facility? (Y/N): No
Small Quantity Generator Facility? (Y/N): No
Local Facility Grouping: KARL BUSCHE

Facility Specific Information
Assessor Parcel Number (APN): Not Reported
Number of Employees: 2
Property Owner Name: Xin Jin
Property Owner Phone Number: 5106922994
Property Owner Mailing Address: 3000 Shattuck Avenue
Property Owner Mailing City: Berkeley
Property Owner Mailing State: CA
Property Owner Mailing Zip Code: Not Reported
Property Owner Mailing Country: United States

Inspection Information
Aboveground Petroleum Storage Act (APSA) Last Inspection Date: Not Reported
California Accidental Release Prevention (CalARP) Last Inspectio: Not Reported
Conditionally Authorized (CA) Last Inspection Date: Not Reported
Conditionally Exempt (CE) Last Inspection Date: Not Reported
Household Hazardous Waste Collection (HHW) Last Inspection Date: Not Reported
Hazardous Materials Release Response Plan (HMRRP) Last Inspectio: 1/13/2017
Hazardous Waste Generator (HW) Last Inspection Date: 11/5/2014
RCRA Large Quantity Generator (HWLQG) Last Inspection Date: Not Reported
Hazardous Waste Recycler (HWRecycler) Last Inspection Date: Not Reported
Permit By Rule (PBR) Last Inspection: Not Reported
Underground Storage Tank (UST) Last Inspection Date: 1/13/2017

Hazardous Material Inventory Information
Chemical Location: underground
Chemical Name: Gasoline
Common Chemical Name: Reg Unleaded Gasoline 87 Octane
Extremely Hazardous Substance?: N
CERS Chemical Library ID: Not Reported
US EPA Substance Registry System ID: 599746

DOT Hazardous Classification ID: 3
DOT Hazard Class: FIRE AND/OR MINOR BLAST/PROJECTION HAZARD
Chemical Abstract Service (CAS) Number: 86290-81-5
Primary Fire Code Hazardous Class: Flammable Liquid, Class I-B
Secondary Fire Code Hazardous Class: Not Reported
Third Fire Code Hazardous Class: Not Reported
Fourth Fire Code Hazardous Class: Not Reported
Fifth Fire Code Hazardous Class: Not Reported
Sixth Fire Code Hazardous Class: Not Reported
Seventh Fire Code Hazardous Class: Not Reported
Eighth Fire Code Hazardous Class: Not Reported
Hazardous Material Type Code: b
Hazardous Material Type: Mixture
Radio Active?: N
Activity in Curies: Not Reported
Physical State of Hazardous Material Stored: Liquid
Total Capacity of Largest Container: 19703
Fire Haz Category - Fire?: Y
Fire Haz Category - Reactive?: N
Fire Haz Category - Pressure Release?: N
Fire Haz Category - Acute Health?: N
Fire Haz Category - Chronic Health?: Y
Average Daily Amount Containing a Hazardous Material: 3200
Maximum Daily Amount Containing a Hazardous Material: 5000
Estimate of Annual Amount Handled: 0
California Hazardous Waste Code: Not Reported
Unit of Measure: Gallons
Total Number of Days Material is on Site: 365
Storage Container - Aboveground Tank?: N
Storage Container - Underground Tank?: Y
Storage Container - Tank Inside Bldg?: N
Storage Container - Steel Drum?: N
Storage Container - Plastic/Non-Metallic Drum?: N
Storage Container - Can?: N
Storage Container - Carboy?: N
Storage Container - Silo?: N
Storage Container - Fiber Drum?: N
Storage Container - Bag?: N
Storage Container - Box?: N
Storage Container - Cyclinder?: N
Storage Container - Glass Bottle?: N
Storage Container - Plastic Bottle?: N
Storage Container - Tote Bin?: N
Storage Container - Tank Truck/Wagon?: N
Storage Container - Tank/Rail Car?: N
Storage Container - Other?: N
Other Storage Container: Not Reported
Storage Pressure Code: a
Storage Pressure of Hazardous Material: Ambient
Storage Temperature Code: a

Storage Temperature of Hazardous Material: Ambient
Haz Component 1 - Percent by Weight: Not Reported
Haz Component 1 - Component Name: 1-5 Benzene
Haz Component 1 - EHS?: N
Haz Component 1 - CAS Number: 71-43-2
Haz Component 2 - Percent by Weight: Not Reported
Haz Component 2 - Component Name: 0-15 Etanol
Haz Component 2 - EHS?: Not Reported
Haz Component 2 - CAS Number: Not Reported
Haz Component 3 - Percent by Weight: Not Reported
Haz Component 3 - Component Name: 8-15 Aylene
Haz Component 3 - EHS?: Not Reported
Haz Component 3 - CAS Number: 1330-20-7
Haz Component 4 - Percent by Weight: Not Reported
Haz Component 4 - Component Name: 7-14 Toalene
Haz Component 4 - EHS?: Not Reported
Haz Component 4 - CAS Number: 108-88-3
Haz Component 5 - Percent by Weight: Not Reported
Haz Component 5 - Component Name: Not Reported
Haz Component 5 - EHS?: Not Reported
Haz Component 5 - CAS Number: Not Reported
Chemical Description Comment(s): Not Reported
Additional Mixture Components: Not Reported

AST, HMRRP & UST Violation Information
EPA ID: CAL000424917
RCRA LQG: No
Violation Date: 1/13/2017
Violation Type Number: 1010002
Class: Minor
Scheduled Return to Compliance Date: 3/1/2017
Actual Return to Compliance Date: 5/8/2017
Actual Return to Compliance Qualifier: Documented
Violation Comment: Not Reported
Violation Category: Administration/Documentation
Violation Name: Hazardous Materials Business Plan Submittal
Violation Description: Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Citation(s): HSC 6.95 25505, 25508(a)(1)

Violation Date: 4/14/2016
Violation Type Number: 1010008

Class: Minor
Scheduled Return to Compliance Date: 5/9/2016
Actual Return to Compliance Date: 5/23/2016
Actual Return to Compliance Qualifier: Documented
Violation Comment: Not Reported
Violation Category: Administration/Documentation
Violation Name: Annual Review / Certification
Violation Description: Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.
Violation Citation(s): HSC 6.95 25508(c), 25508.2

Violation Date: 1/28/2016
Violation Type Number: 1010002
Class: Minor
Scheduled Return to Compliance Date: 2/27/2016
Actual Return to Compliance Date: 5/2/2016
Actual Return to Compliance Qualifier: Documented
Violation Comment: LPG exchange cylinder rack needs to be accurately detailed for the quantity stored. Currently listed is 5 gallons and a filled rack is approximately 60 gallons.
Violation Category: Administration/Documentation
Violation Name: Hazardous Materials Business Plan Submittal
Violation Description: Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Citation(s): 19 CCR 6.95 25505; HSC 6.95 25508(a)(1), 25508(d)

Violation Date: 1/28/2016
Violation Type Number: 2030002
Class: Minor
Scheduled Return to Compliance Date: 4/29/2016
Actual Return to Compliance Date: 4/29/2016
Actual Return to Compliance Qualifier: Documented
Violation Comment: 16 days overdue from last yearly (365 days) inspection
Violation Category: Operations/Maintenance
Violation Name: Annual Leak Detection Equipment Maintenance
Violation Description: Failure to test leak detection equipment as required every 12 months (VPH, sensor, LLD, ATG, etc.) and/or submit monitoring system certification to the CUPA within 30 days of completion of the test
Violation Citation(s): 23 CCR 16 2638

Violation Date: 1/28/2016
Violation Type Number: 2030011
Class: Minor
Scheduled Return to Compliance Date: 2/27/2016
Actual Return to Compliance Date: 5/2/2016
Actual Return to Compliance Qualifier: Documented
Violation Comment: Not Reported
Violation Category: Operations/Maintenance
Violation Name: Designated Operator - Certificate of Compliance
Violation Description: Failure to submit statement of UST compliance and/or Designated Operator certification.
Violation Citation(s): 23 CCR 16 2715(a)

Violation Date: 1/28/2016
Violation Type Number: 2030024
Class: Minor
Scheduled Return to Compliance Date: 2/27/2016
Actual Return to Compliance Date: 5/2/2016
Actual Return to Compliance Qualifier: Documented
Violation Comment: UST contractor to provide copies/proof of current certifications, UST Compliance Testing.
Violation Category: Operations/Maintenance
Violation Name: Licensing
Violation Description: Failure of service technician, installer, and/ or employee to obtain and maintain proper license.
Violation Citation(s): 23 CCR 16 2715; HSC 6.7 28284.1(a)(5)(D)

Violation Date: 1/28/2016
Violation Type Number: 2030037
Class: Minor
Scheduled Return to Compliance Date: 2/27/2016
Actual Return to Compliance Date: 5/2/2016
Actual Return to Compliance Qualifier: Documented
Violation Comment: to be submitted via CERS.
Violation Category: Operations/Maintenance
Violation Name: Agreement Between UST Permit Holder and UST Operator (Owner/Operator Agreement)
Violation Description: Failure to submit, maintain, or implement an owner/operator written agreement.
Violation Citation(s): 23 CCR 16 2620(b); HSC 6.7 25284(a)(3)

Violation Date: 1/28/2016
Violation Type Number: 2030054
Class: Minor
Scheduled Return to Compliance Date: 2/27/2016
Actual Return to Compliance Date: 4/29/2016
Actual Return to Compliance Qualifier: Documented
Violation Comment: unleaded spill bucket test failure. Repair or replace, retest and submit testing results.
Violation Category: Operations/Maintenance
Violation Name: Spill Bucket (RP)
Violation Description: Failure to comply with one or more of the following: maintain the spill bucket in good condition, containment free of debris/liquid, and/or to remove the contents of the spill bucket when a release/leak/spill was observed.
Violation Citation(s): 23 CCR 16 2635(b), 2715(c)(2)

Violation Date: 10/17/2013
Violation Type Number: 2030026
Class: Minor
Scheduled Return to Compliance Date: 11/16/2013
Actual Return to Compliance Date: 10/28/2013
Actual Return to Compliance Qualifier: Documented
Violation Comment: 87 Tank LLD failed. The current LLD is no longer made or supported. Requires replacement.
Violation Category: Operations/Maintenance
Violation Name: Line Leak Detector - Double Wall and Single Wall Emergency Generator Piping (RD)
Violation Description: Failure of line leak detector to detect a leak and/or failure of audible and visual alarm.
Violation Citation(s): 23 CCR 16 2636(f)(2), 2666(c)

AST, HMRRP & UST Inspection Information
EPA ID: CAL000424917
RCRA LQG: No
Inspection Date: 1/13/2017
Inspection Type: Routine
Number of Class I Violations: 0
Number of Class II Violations: 0
Number of Minor Violations: 1
Significant Operational Compliance: With both Release Detection and Release Prevention
Date Returned to Compliance: 5/8/2017
Days Out of Compliance: 115
Violation Details Available: Yes
Inspection Comments: Routine Hazardous Materials Business Plan, Hazardous Waste, Underground Storage Tanks, and Stormwater Facility Compliance inspection. UST Compliance Testing was the certified UST contractor present for the annual monitoring system certification. It was noted that "snap tabs" were installed on the dispensers for LLD testing purposes and left on. The manufacture does not recommend leaving the in place and was told to remove, they complied and removed. The HMBP was not accurately reported as having HW, used motor oil tank, ust is on site. Several minor violations noted. All sensors, LLD's, ESO, power out, sensor out testing functioned as required.

Inspection Date: 1/13/2017
Inspection Type: Routine
Number of Class I Violations: 0
Number of Class II Violations: 0
Number of Minor Violations: 0
Significant Operational Compliance: With both Release Detection and Release Prevention
Date Returned to Compliance: Not Reported
Days Out of Compliance: 171
Violation Details Available: No

Violation Details Available: Yes
Inspection Comments: Non-Inspection related violation: Failed to submit annual Hazardous Materials Business Plan for FY17 (PM)

Inspection Date: 1/28/2016
Inspection Type: Routine
Number of Class I Violations: 0

Number of Class II Violations: 0
Number of Minor Violations: 1
Significant Operational Compliance: With both Release Detection and Release Prevention
Date Returned to Compliance: 5/2/2016
Days Out of Compliance: 95
Violation Details Available: Yes
Inspection Comments: Routine annual inspection (HMBP, UST, HW, SW), UST monitoring system certification, a previous ust cert was completed on 1/12/2015. See inspection report for violations noted.

Inspection Date: 1/28/2016
Inspection Type: Routine
Number of Class I Violations: 0
Number of Class II Violations: 0
Number of Minor Violations: 5
Significant Operational Compliance: With only Release Detection
Date Returned to Compliance: 5/2/2016
Days Out of Compliance: 95
Violation Details Available: Yes
Inspection Comments: Routine inspection, Contractor was new; UST Compliance Testing. Used motor oil tank currently not being used but is monitored electronically.

Inspection Date: 4/20/2015
Inspection Type: Routine
Number of Class I Violations: 0
Number of Class II Violations: 0
Number of Minor Violations: 0
Significant Operational Compliance: With both Release Detection and Release Prevention
Date Returned to Compliance: Not Reported
Days Out of Compliance: 805
Violation Details Available: No
Inspection Comments: HMBP only inspection, no violations noted. Due to portal issues RP has not been able to enter UST data- in process for correction- 4/20/2015

Inspection Date: 1/12/2015
Inspection Type: Routine
Number of Class I Violations: 0
Number of Class II Violations: 0
Number of Minor Violations: 0
Significant Operational Compliance: With both Release Detection and Release Prevention
Date Returned to Compliance: Not Reported
Days Out of Compliance: 903
Violation Details Available: No
Inspection Comments: Routine annual inspection (HMBP, UST, HW, SW), UST monitoring system certification, a previous ust cert was completed in November by the Receivership. New operator took over and an UST certification was required prior to start up of operations. The station was not operating for approximately 10+ months. UST contractor was Nik Zagorov Lic #958763. All UST monitoring sensors passed and station was allowed to open.

Inspection Date: 1/12/2015
Inspection Type: Other
Number of Class I Violations: 0

Number of Class II Violations: 0
Number of Minor Violations: 0
Significant Operational Compliance: With both Release Detection and Release Prevention
Date Returned to Compliance: Not Reported
Days Out of Compliance: 903
Violation Details Available: No
Inspection Comments: inspection was to witness monitoring system certification. With some difficulty contractor Nic, was able for certify the monitoring system a fully functional. There will be a new operator of the station and they contracted for the certification. They were also instructed, prior to opening of station to submit appropriate paperwork/documentation before the UST permit would be authorized.

Inspection Date: 1/12/2015
Inspection Type: Routine
Number of Class I Violations: 0
Number of Class II Violations: 0
Number of Minor Violations: 0
Significant Operational Compliance: With both Release Detection and Release Prevention

Number of Class I Violations: 0
Number of Class II Violations: 0
Number of Minor Violations: 0
Significant Operational Compliance: With both Release Detection and Release Prevention
Date Returned to Compliance: Not Reported
Days Out of Compliance: 971
Violation Details Available: No
Inspection Comments: station not in operation, Trustee in charge of station states the property will be sold within a short time frame. Monitoring certification completed with the exception of the LLD test & test for turbine shut down- was not able to power up pump. Operation testing must be performed prior to any fuel pumping operations. Power was shut down at breaker to prevent any fuel from being pumped.

Inspection Date: 5/20/2014
Inspection Type: Other
Number of Class I Violations: 0
Number of Class II Violations: 0
Number of Minor Violations: 0
Significant Operational Compliance: With both Release Detection and Release Prevention
Date Returned to Compliance: Not Reported
Days Out of Compliance: 1140
Violation Details Available: No
Inspection Comments: last week received notice that this site was under "receivership" by the court of Alameda County. I met the court appointed receiver Mr. Gerard Keena at the site, he is responsible for the site remaining under compliance. An

inspection report was completed detailing that updated HMBP, and various UST documents needed to be completed and submitted within 15 days (of 5/20/2014).

Inspection Date: 10/17/2013
Inspection Type: Routine
Number of Class I Violations: 0
Number of Class II Violations: 0
Number of Minor Violations: 0
Significant Operational Compliance: With both Release Detection and Release Prevention
Date Returned to Compliance: Not Reported
Days Out of Compliance: 1355
Violation Details Available: No
Inspection Comments: no violations noted, training records available at the time of inspection.

Inspection Date: 10/17/2013
Inspection Type: Routine
Number of Class I Violations: 0
Number of Class II Violations: 0
Number of Minor Violations: 1
Significant Operational Compliance: With only Release Prevention
Date Returned to Compliance: 10/28/2013
Days Out of Compliance: 11
Violation Details Available: Yes
Inspection Comments: Routine annual inspection. One of the LLD's failed, (87). The LLD a Red Jacket CPT system is no longer being made or supported for part replacement. There are two of these LLD's present at station. At a minimum the one non-functioning one must be replaced with a traditional LLD that is installed on the submersible. The owner mentioned that both of LLD's would be replaced/updated at the same time. The contractor on site and may do the replacement is Eco-Chek, Nik Zagorov. All other functional tests of monitoring system passed.

DETAILS

Global ID: T10000004483

County: Alameda
Site History: A new release of mineral oil was detected as part of the UST case at this property. The mineral oil is suspected to be a separate release related to the hydraulic lifts on the property. This release was granted no further action by the Regional Water Board on 09/03/2014.
Case Type: Cleanup Program Site
Status: Completed - Case Closed
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Case Worker: UUU
Local Agency: BERKELEY, CITY OF
RB Case Number: 01S0746
Loc Case Number: 13-3000SHA
File Location: Not Reported
Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating
Potential Media Affected: Other Groundwater (uses other than drinking water)
How Discovered: Subsurface Monitoring
How Discovered Description: During groundwater monitoring, oil film developed.
Stop Method: Other Means
Stop Method Description: Lift repaired

Violation Information
Violation Date: 1/6/2021
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements:

Install or maintain a liquid-tight spill container.

Have a minimum capacity of five gallons.

Have a functional drain valve or other method for the removal of liquid from the spill container.

Be resistant to galvanic corrosion.

Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container.

Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Tested by a certified UST service technician.

Maintain records of spill containment testing for 36 months.

"

Violation Date: 1/6/2020
Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements:
Be performed by an ICC certified DO.
Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy.
Inspect for the presence of liquid/debris in spill containers.
Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly.
Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit.
Check that all testing and maintenance has been completed and documented.
Verify that all facility employees have been trained in accordance with 23 CCR 2715(c).
For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description: Failure to electronically update business plan within 30 days of any one of the following events:
A 100 percent or more increase in the quantity of a previously disclosed material.
Any handling of a previously undisclosed hazardous materials at or above reportable quantities.
A change of business address, business ownership, or business name.
A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Note(s): Observed 16, 15-pound full (approximately 3.53 gallons) propane cylinders onsite, which equates to approximately 1,926 cubic feet. The inventory lists a maximum daily storage of 250 cubic feet stored onsite. The inventory lists the regular unleaded gasoline as having a maximum daily storage amount of 5,000 gallons and the super gasoline as having a maximum daily storage amount of 850 gallons. In addition, the inventory is incomplete in that it does not include storage

pressure, temperature or largest container for all of the inventory. In January 2018, the California Environmental Protection Agency (CalEPA) adopted 24 New Federal Hazard Categories for use in chemical inventory reporting as part of the annual hazardous materials inventory reporting of the Hazardous Materials Business Plan (HMBP) submittal in CERS. The 3/12/2018, 5/8/2018 and 5/2/2019 submittals did not identify these updated categories. Corrective action: Update and correct the inventory to include [Truncated]

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements:
Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or
Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or
Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or
Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,Â 2018.

For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter.

For USTs installed on and after OctoberÂ 1,Â 2018, perform an inspection at installation and every 36 months thereafter.

Inspected within 30 days after a repair to the overfill prevention equipment.

Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Inspected by a certified UST service technician.

Maintain records of overfill prevention equipment inspection for 36 months.

2001 Ashby Redevelopment			1,2,4	T10000014891
ADDRESS			**CITY**	**ZIP**
2001 Ashby Avenue			Berkeley	94703
DETAILS				

Global ID: T10000014891
County: Alameda
Site History: The Site is located in a mixed commercial and residential area of South Berkeley at the northeast corner of Adeline Street and Ashby Avenue. The property consists of one parcel, assessor parcel number (APN) 53-1591-18-3, totaling approximately 0.64 acres. According to the Phase I Environmental Site Assessment (Phase I ESA), dated December 4, 2019, the current parcel consisted of at least 6 historical parcels with associated addresses including 2031 & 2033 Ashby Avenue and 2925-2933 Adeline Street. APN for these address could not be located in County Assessor records. The Site is bound to the northwest by Adeline Street and further north by various mixed commercial and residential buildings; to the east by additional commercial properties; to the south by a church and residential land-use; and to the west by commercial properties. The Site is currently occupied by one building (6,297 square feet) used as a credit union/bank surrounded by an asphalt paved parking lot. Demolition of existing structures and redevelopment is proposed at this Site, however, at this time limited information is available for the proposed redevelopment that will include both commercial and residential land use. Various configurations and historical operations were conducted at the Site. These site configurations and operations included dwellings as early as 1903 in the northern portion of the Site as observed in the Sanborn maps provided in the Phase I ESA. By 1911, the Site also contained a store building in the southeast corner and a structure labeled as “waiting room” in the southwest corner. A building permit reviewed dated December 19, 1936 was a certificate of occupancy for a service station at the Site. The 1939 aerial photograph shows this gasoline service station. The city directory listings show that a gasoline service station was present at the Site (2001 Ashby Avenue) in 1945 through at least 1962. The city directory also showed that a store building with various commercial/retail businesses occupied the historical building (2031 & 2033 Ashby Avenue) from at least 1920 to 1970. A further look at building permits show an original building permit dated July 30, 1946 was issued for a gasoline service station. The City of Berkeley approved of a building permit for the construction of a bank on February 11, 1969 and signed off on the demolition of the former Site buildings on February 13, 1969. Fire Department records confirm that on February 12, 1969, the Site buildings and two underground storage tanks (USTs) (size and contents not provided) were removed. The present-day Site bank building and parking lot is assumed to have been constructed in 1969. The City of Berkeley Toxics Management Division records identified a letter dated November 2, 1998 review a Phase 1 ESA, dated July 17, 1998 in addition to a soil & groundwater report, dated October 13, 1998. Phase I ESA results indicated recognized environmental conditions (REC) related to the former gasoline service station at the Site and also identified REC-related activities upgradient from active Leaking Underground Storage Tank (LUST) cases. The findings and conclusions of the soil & groundwater report prepared by ATC Associates, Inc., indicated that petroleum hydrocarbons and halogenated volatile organic compounds in the groundwater were detected at levels below the maximum contaminant levels (MCL) or levels relatively low and not considered to pose significant threat to human health or to the environment. Based on these findings, no further action was required regarding soil and groundwater at the Site, however, the City of Berkeley recommended a limited site investigation for the Site prior to a change in use of the Site. Copies of the 1998 Phse I ESA or Subusrface Investigation Report have not been provided to ACDEH at this time. Additional subsurface investigation activities were conducted at the Site in April 2019 and described in the Limited Subsurface Investigation Report, dated May 9, 2019, prepared by Ninyo & Moore. These subsurface investigation activities included the advancement of five shallow borings (S-1 through S-5) to a depth of 2.0 feet below ground surface (bgs) or less. Two temporary soil vapor probes were advanced to a total depth of 5.5 feet bgs and included the collection of soil and soil vapor between 5.0 feet to 5.5 feet bgs. Soil samples were selectively analyzed for gasoline-, diesel-, and motor oil-range total petroleum hydrocarbons (TPH-g, TPH-d, TPH-mo) volatile organic compounds (VOCs) including benzene, toluene, ethylbenzene, and xylene (BTEX), Leaking Underground Fuel Tank (LUFT) 5 metals, and California Title 22 metals. Petroleum related chemicals of concern (COCs) were detected in the soil samples sample at 2 feet bgs, however ACDEH notes these soil samples were collected at a depth above the former USTs. Soil samples also detected metal COCs including arsenic, lead and nickel above applicable regulatory screening levels for residential land use. Soil vapor samples were only collected from one soil vapor probe (SV-1) and indicated VOCs were detected above laboratory detection levels. Petroleum and non-petroleum related COCs were detected in soil vapor including but not limited tert-Butyl alcohol (TBA), ethylbenzene, toluene, chloromethane, carbon disulfide, and methyl ethyl ketone (MEK). Groundwater was not collected during the April 2019 investigations.
Case Type: Cleanup Program Site
Status: Open - Site Assessment
Lead Agency: ALAMEDA COUNTY LOP

Case Worker: DY
Local Agency: ALAMEDA COUNTY LOP
RB Case Number: Not Reported
Loc Case Number: RO0003442
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Contaminants of Concern: Arsenic, Lead, Nickel, Other Metal, Total Petroleum Hydrocarbons (TPH)
Potential Media Affected: Soil, Soil Vapor, Under Investigation
How Discovered: Not Reported

AST, HMRRP & UST Violation Information
EPA ID: Not Reported
RCRA LQG: No
Violation Date: 7/30/2015
Violation Type Number: 1010010
Class: Minor
Scheduled Return to Compliance Date: 8/29/2015
Actual Return to Compliance Date: 8/3/2015
Actual Return to Compliance Qualifier: Documented
Violation Comment: In the EMergency Response Plan, the phone number listed for the local UPA is for Alameda County, 567-6700. The city of Berkeley Toxics Management Division is the UPA, but listed as other contact.Corrective action: Update plan

to list accurate phone number for notifying UPA.
Violation Category: Administration/Documentation
Violation Name: Emergency response plan and procedures
Violation Description: Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Citation(s): HSC 6.95 25505(a)(3), 25508(a)(1)

AST, HMRRP & UST Inspection Information
EPA ID: Not Reported
RCRA LQG: No
Inspection Date: 7/30/2015
Inspection Type: Routine
Number of Class I Violations: 0
Number of Class II Violations: 0
Number of Minor Violations: 1
Significant Operational Compliance: With both Release Detection and Release Prevention
Date Returned to Compliance: 8/3/2015
Days Out of Compliance: 4
Violation Details Available: Yes
Inspection Comments: Confirmed information in HMBP. Site has SPCC Plan and is conditionally exempt from APSA.

AST, HMRRP & UST Enforcement Information
Type of Enforcement Action: Notice of Violation (NOV) Only
Date of Enforcement Action: 7/30/2015
Type of Formal Enforcement Action: Not Reported

Program Description: Aboveground Petroleum Storage

Program Description: Chemical Storage Facilities

Program Description: Hazardous Waste Generator

Evaluation Information
Evaluation Date: 4/11/2018
Violations Found? (Y/N): Yes
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): Not Reported
Evaluation Division: Berkeley City Toxics Management Division
Evaluation Program: APSA
Evaluation Source: CERS

Evaluation Date: 4/11/2018
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): Facility generates used oil, used antifreeze, used batteries, used oil filters, waste fuel. Used rags are sent offsite for laundering. The EPA ID application has been submitted. Used oil and used antifreeze is collected in portable containers and then pumped from a central spot in the work bay back to the tanks. Portable hazardous waste containers are labeled properly. KPA completes periodic walk-throughs. Daily tank inspections are completed and the tank assessment is completed. Observed liquid in the bin containing the used batteries. Facility must determine if a battery core is leaking, and clean up the liquid and manage appropriately.

Evaluation Division: Berkeley City Toxics Management Division
Evaluation Program: HW
Evaluation Source: CERS

Evaluation Date: 4/11/2018
Violations Found? (Y/N): Yes
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): Met with Tim Beinke and Brian Eng to conduct inspection of new location. The piping system was designed by Aaron Lube System. Observed storage of used oil, used antifreeze, batteries, used batteries, oxygen, acetylene, oil, antifreeze.
Evaluation Division: Berkeley City Toxics Management Division
Evaluation Program: HMRRP
Evaluation Source: CERS

Violation Information
Violation Date: 4/11/2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.

Violation Note(s): Returned to compliance on 05/25/2018. The site map submitted on this date in CERS does not include the north direction, loading areas, internal roads, adjacent streets, storm & sewer drains, access and exit points, emergency shutoffs, evacuation staging area, hazardous material/waste handling and storage areas, and emergency response equipment. Corrective action: Update and submit a site map that includes all required information in CERS.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HMRRP
Violation Source: CERS

Violation Date: 4/11/2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to establish and electronically submit an adequate training program in safety procedures in the event of a release or threatened release of a hazardous material.

Violation Note(s): Returned to compliance on 06/01/2018. The facility has not provided a training plan in CERS. Corrective action: Prepare, comply with, and submit a training plan in CERS.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HMRRP
Violation Source: CERS

Violation Date: 4/11/2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Note(s): Returned to compliance on 06/01/2018. Facility began operating at this location, with storage of hazardous materials, on March 18, 2018, and did not submit a Hazardous Materials Business Plan at the time it began operations. A submittal was made this date, but it did not include all required elements. Corrective action: Submit a complete HMBP that includes all required elements. Original compy by date of 5/26/2018 5/25/18 - Submission made in CERS 5/31/18 - TMD determined submission was deficient and not accepted submission. Contacted Tim Beinke, of Berkeley Honda, and consultant for correction. Deadline of 6/15/18

Violation Division: Berkeley City Toxics Management Division
Violation Program: HMRRP
Violation Source: CERS

Violation Date: 4/11/2018
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to prepare a Spill Prevention, Control, and Countermeasures (SPCC) Plan.

Violation Note(s): Returned to compliance on 06/21/2018. Observed storage of petroleum products onsite that may exceed 1,320 gallons and facility has not prepared an SPCC plan prior to storage of use of that material. Corrective action: Confirm the storage quantity of petroleum products and prepare an SPCC if necessary.
Violation Division: Berkeley City Toxics Management Division
Violation Program: APSA
Violation Source: CERS

Hazardous Material Inventory Information
Chemical Location: Sealed Battery Case /96 C&D AT 15P - located in DAS Room
Chemical Name: Electrolyte/sulfuric Acid
Common Chemical Name: Lead Acid Battery
Extremely Hazardous Substance?: N
CERS Chemical Library ID: Not Reported
US EPA Substance Registry System ID: Not Reported
DOT Hazardous Classification ID: 8
DOT Hazard Class: NONFLAMMABLE GASES
Chemical Abstract Service (CAS) Number: 7664-93-9
Primary Fire Code Hazardous Class: Corrosive
Secondary Fire Code Hazardous Class: Water Reactive, Class 2
Third Fire Code Hazardous Class: Not Reported
Fourth Fire Code Hazardous Class: Not Reported
Fifth Fire Code Hazardous Class: Not Reported
Sixth Fire Code Hazardous Class: Not Reported
Seventh Fire Code Hazardous Class: Not Reported
Eighth Fire Code Hazardous Class: Not Reported
Hazardous Material Type Code: a
Hazardous Material Type: Pure
Radio Active?: N
Activity in Curies: Not Reported
Physical State of Hazardous Material Stored: Liquid
Total Capacity of Largest Container: 2.7
Fire Haz Category - Fire?: N
Fire Haz Category - Reactive?: Y
Fire Haz Category - Pressure Release?: N
Fire Haz Category - Acute Health?: Y
Fire Haz Category - Chronic Health?: Y
Average Daily Amount Containing a Hazardous Material: 259.2
Maximum Daily Amount Containing a Hazardous Material: 259.2
Estimate of Annual Amount Handled: Not Reported

California Hazardous Waste Code: Not Reported
Unit of Measure: Gallons
Total Number of Days Material is on Site: 365
Storage Container - Aboveground Tank?: N
Storage Container - Underground Tank?: N
Storage Container - Tank Inside Bldg?: N
Storage Container - Steel Drum?: N
Storage Container - Plastic/Non-Metallic Drum?: N
Storage Container - Can?: N
Storage Container - Carboy?: N
Storage Container - Silo?: N
Storage Container - Fiber Drum?: N
Storage Container - Bag?: N
Storage Container - Box?: N
Storage Container - Cyclinder?: N
Storage Container - Glass Bottle?: N
Storage Container - Plastic Bottle?: N
Storage Container - Tote Bin?: N

AST, HMRRP & UST Violation Information
EPA ID: Not Reported
RCRA LQG: No
Violation Date: 6/10/2015
Violation Type Number: 1010005
Class: Minor
Scheduled Return to Compliance Date: 7/10/2015
Actual Return to Compliance Date: 7/14/2015
Actual Return to Compliance Qualifier: Documented
Violation Comment: Site map does not reflect layout of cell site, does not include north orientation, adjacent streets, haz mat storage, emergency response equipment, or added room for Memorial Stadium DAS. The plan also include directions to Alameda County EH office. These are not applicable in Berkeley. Corrective action: Update and submit site map. Remove direction information.
Violation Category: Administration/Documentation
Violation Name: Site map
Violation Description: Failure to complete and electronically submit a site map with all required content.

Violation Citation(s): HSC 6.95 25505(a)(2), 25508(a)(1)

AST, HMRRP & UST Inspection Information
EPA ID: Not Reported
RCRA LQG: No
Inspection Date: 6/10/2015
Inspection Type: Routine
Number of Class I Violations: 0
Number of Class II Violations: 0
Number of Minor Violations: 1
Significant Operational Compliance: With both Release Detection and Release Prevention
Date Returned to Compliance: 7/14/2015
Days Out of Compliance: 34
Violation Details Available: Yes
Inspection Comments: Cell site is located on south side of the building, inside. Verizon is adding a second site, Memorial Stadium DAS, that is co-located in an adjoining room. Paul indicates they have not taken ownership of the site. Submit updated plan to include Memorial Stadium DAS.

AST, HMRRP & UST Violation Information
EPA ID: CAD981573025
RCRA LQG: No
Violation Date: 1/27/2017
Violation Type Number: 1010002
Class: Class 2
Scheduled Return to Compliance Date: 2/26/2017
Actual Return to Compliance Date: 2/28/2017
Actual Return to Compliance Qualifier: Documented
Violation Comment: 2016 submittal not completed.
Violation Category: Administration/Documentation
Violation Name: Hazardous Materials Business Plan Submittal
Violation Description: Failure to complete and electronically submit a business plan when storing/handling a hazardous material

at or above reportable quantities.
Violation Citation(s): HSC 6.95 25505, 25508(a)(1)

Violation Date: 4/14/2016
Violation Type Number: 1010008
Class: Minor
Scheduled Return to Compliance Date: 5/9/2016
Actual Return to Compliance Date: 5/10/2016
Actual Return to Compliance Qualifier: Documented
Violation Comment: Not Reported
Violation Category: Administration/Documentation
Violation Name: Annual Review / Certification
Violation Description: Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.
Violation Citation(s): HSC 6.95 25508(c), 25508.2

AST, HMRRP & UST Inspection Information
EPA ID: CAD981573025
RCRA LQG: No
Inspection Date: 1/27/2017
Inspection Type: Routine
Number of Class I Violations: 0
Number of Class II Violations: 1
Number of Minor Violations: 0
Significant Operational Compliance: With both Release Detection and Release Prevention
Date Returned to Compliance: 2/28/2017
Days Out of Compliance: 32
Violation Details Available: Yes
Inspection Comments: Routine HMBP, HW and Storm water unannounced inspection. 2016 CERS submittal not complete, violation noted. Used Motor oil label needs to be re labeled, the current label is not completely legible.

Inspection Date: 4/14/2016
Inspection Type: Other
Number of Class I Violations: 0
Number of Class II Violations: 0
Number of Minor Violations: 1
Significant Operational Compliance: Not Reported
Date Returned to Compliance: 5/10/2016
Days Out of Compliance: 26
Violation Details Available: Yes
Inspection Comments: Non-Inspection related violation: Failed to submit annual Hazardous Materials Business Plan for FY17 (XD)

Inspection Date: 3/12/2014
Inspection Type: Routine
Number of Class I Violations: 0
Number of Class II Violations: 0
Number of Minor Violations: 0
Significant Operational Compliance: With both Release Detection and Release Prevention

Date Returned to Compliance: Not Reported
Days Out of Compliance: 1209
Violation Details Available: No
Inspection Comments: Hazardous Waste disposal records were available for review. All haz waste containers were labeled properly start accumulation date. The owner is the only one who works there. HMBP needs to revise the dates.

Inspection Type: Routine
Number of Class I Violations: 0
Number of Class II Violations: 0
Number of Minor Violations: 2
Significant Operational Compliance: With both Release Detection and Release Prevention
Date Returned to Compliance: 9/7/2016
Days Out of Compliance: 15
Violation Details Available: Yes
Inspection Comments: Onsite to confirm information submitted in the Hazardous Materials Business Plan (HMBP). Emergency response section submitted 6/24/216 and hazardous materials section submitted 6/28/16 in CERS. Training includes fire drills which are conducted monthly and an internal disaster drill every 6 months. Records of drills/training were confirmed. Walkthrough review of inventory and full plan. Storage of cleaning supplies, propane for the generator and oxygen.

Inspection Date: 6/24/2016
Inspection Type: Other
Number of Class I Violations: 0
Number of Class II Violations: 1
Number of Minor Violations: 0
Significant Operational Compliance: Not Reported
Date Returned to Compliance: 6/28/2016
Days Out of Compliance: 4
Violation Details Available: Yes
Inspection Comments: Due to the Hazardous Materials located at your site, (Propane, cleaning chemicals, oxygen, laundry cleaning chemicals). Your facility must complete a Hazardous Materials Business Plan. Please log into CERS (California Environmental REporting System) and register and complete required documentation. If there are any questions please call me

at the number above.

Evaluation Information
Evaluation Date: 7/19/2018
Violations Found? (Y/N): Yes
Evaluation General Type: Other/Unknown
Evaluation Type: Other, not routine, done by local agency
Evaluation Note(s): Non-inspection related violation
Evaluation Division: Berkeley City Toxics Management Division
Evaluation Program: HMRRP
Evaluation Source: CERS

Evaluation Date: 8/23/2016
Violations Found? (Y/N): Yes
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): Onsite to confirm information submitted in the Hazardous Materials Business Plan (HMBP). Emergency response section submitted 6/24/216 and hazardous materials section submitted 6/28/16 in CERS. Training includes fire drills which are conducted monthly and an internal disaster drill every 6 months. Records of drills/training were confirmed. Walkthrough review of inventory and full plan. Storage of cleaning supplies, propane for the generator and oxygen.

Violation Information
Violation Date: 7/19/2018
Citation: HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple
Violation Description: Business Plan Program - Administration/Documentation - General
Violation Note(s): Returned to compliance on 08/03/2018. Non-inspection related violation: Failure to submit corrected HMBP within 30 days following notice of deficiencies. HSC 25508(a)(2)
Violation Division: Berkeley City Toxics Management Division
Violation Program: HMRRP
Violation Source: CERS

Violation Date: 8/23/2016
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Note(s): Returned to compliance on 09/07/2016. The inventory information is incomplete in that the storage amounts are not all listed, the storage pressure and temperatures are not listed, the chemical locations are not listed. Corrective action: Update the inventory to include all fields applicable for each inventory item and resubmit.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HMRRP
Violation Source: CERS

Violation Date: 8/23/2016
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.

Violation Note(s): Returned to compliance on 09/07/2016. the Site Map does not include north direction, adjacent streets, emergency shutoffs, evacuation staging area, hazardous materials storage areas or storm and sewer drains. Corrective action: Update the map to include all of the above items and upload to CERS. In addition, remove the map currently in the system.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HMRRP
Violation Source: CERS

Violation Date: 6/22/2016
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.

Violation Note(s): Returned to compliance on 06/28/2016.
Violation Division: Berkeley City Toxics Management Division

Violation Program: HMRRP

AST, HMRRP & UST Violation Information
EPA ID: CAD981690803
RCRA LQG: No
Violation Date: 6/15/2016
Violation Type Number: 1010004
Class: Class 2
Scheduled Return to Compliance Date: 8/2/2016
Actual Return to Compliance Date: 8/2/2016
Actual Return to Compliance Qualifier: Documented
Violation Comment: Hazardous materials inventory is incomplete. Aqueous parts washer, freon, new and used batteries were not on the inventory. Toxics management staff previously notified McKevitt's consultant, and a previous manager (Tom Clayton) of this violation in September 2014. Please add these materials to your hazardous materials inventory. Also, car washing materials need to be added to the inventory.
Violation Category: Administration/Documentation
Violation Name: Hazardous materials inventory

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Citation(s): HSC 6.95 25505(a)(1), 25506, 25508(a)(1)

Violation Date: 6/15/2016
Violation Type Number: 4010008
Class: Class 2
Scheduled Return to Compliance Date: 9/20/2016
Actual Return to Compliance Date: 9/30/2016
Actual Return to Compliance Qualifier: Documented
Violation Comment: Facility appears to have petroleum storage capacity in excess of 1320 gallons combined in excess of 1320 gallons combined a no SPCC is on file. Please determine the sites aggregate capacity for petroleum which must include all containers in excess of 55 gallons (or equal to). Notify toxics of this total and submit an SPCC (SPill prevention counter measure contingency plan) as appropriate.
Violation Category: Administration/Documentation
Violation Name: SPCC Plan not available onsite
Violation Description: Failure to maintain a complete copy of the SPCC Plan at the facility if the facility is normally attended at least four hours per day, or at the nearest field office if the facility is not so attended.
Violation Citation(s): 40 CFR 1 112.3(e)(1); HSC 6.67 25270.4.5(a)

Violation Date: 11/12/2013
Violation Type Number: 1010010
Class: Minor
Scheduled Return to Compliance Date: 12/15/2013
Actual Return to Compliance Date: 11/20/2013
Actual Return to Compliance Qualifier: Documented
Violation Comment: Fire extinguishers (part of the facility's contingency plan) have not been properly maintained. The serve tags indicate the last date of service was 10/2412. Have all extinguishers serviced by 12/15/13.
Violation Category: Administration/Documentation
Violation Name: Emergency Response Plan and procedures not included or not adequate
Violation Description: Failure to include adequate emergency response procedures in the business plan for a release or threatened release.
Violation Citation(s): 19 CCR 4 2731; HSC 6.95 25504(b)

Violation Date: 11/12/2013
Violation Type Number: 4010030
Class: Minor
Scheduled Return to Compliance Date: 12/15/2013
Actual Return to Compliance Date: 12/12/2013
Actual Return to Compliance Qualifier: Documented
Violation Comment: SPCC reports 980 gallons of oil. HMBP reports more than 1320 gallons. Please review these and correct whichever plan is incorrect.
Violation Category: Administration/Documentation
Violation Name: Facility transfer operations
Violation Description: Failure to adequately discuss the facility transfer operations, pumping, and facility process within the SPCC plan.
Violation Citation(s): 40 CFR 1 112.7(a)(3), 112.8(a), 112.8(d); HSC 6.67 25270.4.5(a)

Evaluation Information

Evaluation Date: 9/20/2016
Violations Found? (Y/N): No
Evaluation General Type: Other/Unknown
Evaluation Type: Other, not routine, done by local agency
Evaluation Note(s): Conducted a follow-up inspection to confirm whether the facility corrected the violations given during the routine inspection performed on July 15, 2016 at 10:30 am with Meridith Lear (Hazardous Materials Specialist II) and Jewel Mauricio (Hazardous Materials Specialist I). A violation cited on page 2 of the routine inspection report (06/15/16), H284 22 CCR 15 66265.194 which state "Hazardous wastes must be stored in containers that are not overfilled. The waste oil tank had overflowed into the bermed area. Waste must be collected from this area and placed in a properly closed container within 24 hrs of signing this report" This violation has been corrected and no additional violations observed. See photos for reference. Violation cited on pg 3 of the routine inspection report, HW Title 22 4266262.40 (e) which stated " Manifests needs to be maintained for 3 years". This violation has been corrected, the facility provided 3 years worth of manifests. The manifests [Truncated]

Violation Date: 6/15/2016
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to maintain a complete copy of the SPCC Plan at the facility if the facility is normally attended at least four hours per day, or at the nearest field office if the facility is not so attended.
Violation Note(s): Returned to compliance on 09/30/2016. Facility appears to have petroleum storage capacity in excess of 1320 gallons combined in excess of 1320 gallons combined a no SPCC is on file. Please determine the sites aggregate capacity for petroleum which must include all containers in excess of 55 gallons (or equal to). Notify toxics of this total and submit an SPCC (SPill prevention counter measure contingency plan) as appropriate.
Violation Division: Berkeley City Toxics Management Division
Violation Program: APSA
Violation Source: CERS

Violation Date: 11/12/2013
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to properly close hazardous waste containers when not in active use.
Violation Note(s): Returned to compliance on 11/25/2013. Used oil filter drum was open. All hazardous waste containers must be closed unless material is being placed in the drum.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HW
Violation Source: CERS

Violation Date: 11/12/2013
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to adequately discuss the facility transfer operations, pumping, and facility process within the SPCC plan.
Violation Note(s): Returned to compliance on 12/12/2013. SPCC reports 980 gallons of oil. HMBP reports more than 1320 gallons. Please review these and correct whichever plan is incorrect.
Violation Division: Berkeley City Toxics Management Division
Violation Program: APSA
Violation Source: CERS

Violation Date: 11/12/2013
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Note(s): Returned to compliance on 11/14/2013. Hazardous waste containers must have current accumulation start dates indicated on the hazardous waste labels: Used oil roll arounds in the shop either need date first drop of oil is placed in them, or they need to be emptied daily and label must say "emptied daily" (labels had April accumulation start dates); Antifreeze drums need labels and appropriate accumulation start dates; Full drum labeled "used oil and gas filters/solvent" had an accumulation start date of 3/8/11. Correct all labels to indicate what is actually in the container, and when the waste was first placed in the containers. Also, 1 waste coolant drum was labeled as "oily debris".
Violation Division: Berkeley City Toxics Management Division
Violation Program: HW
Violation Source: CERS

Violation Date: 11/12/2013
Citation: HSC 6.95 25504(b) - California Health and Safety Code, Chapter 6.95, Section(s) 25504(b)
Violation Description: Failure to include adequate emergency response procedures in the business plan for a release or threatened release.
Violation Note(s): Returned to compliance on 11/20/2013. Fire extinguishers (part of the facility's contingency plan) have not been properly maintained. The serve tags indicate the last date of service was 10/2412. Have all extinguishers serviced by 12/15/13.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HMRRP
Violation Source: CERS

Violation Date: 11/12/2013
Citation: 40 CFR 1 265.174 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.174
Violation Description: Failure to inspect hazardous waste storage areas at least weekly.
Violation Note(s): Returned to compliance on 11/25/2013. Please keep logs of weekly hazardous waste area inspections.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HW
Violation Source: CERS

Violation Date: 11/12/2013
Citation: 22 CCR 15 66265.172 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.172
Violation Description: Failure to accumulate or store hazardous waste in a lined/compatible container.
Violation Note(s): Returned to compliance on 11/25/2013. Waste brake fluid drum was overflowing. Material on-top of the drum must be placed in another container immediately.
Violation Division: Berkeley City Toxics Management Division

Violation Program: HW
Violation Source: CERS

Program Description: Chemical Storage Facilities

Evaluation Information
Evaluation Date: 5/23/2018
Violations Found? (Y/N): No
Evaluation General Type: Compliance Evaluation Inspection
Evaluation Type: Routine done by local agency
Evaluation Note(s): This was The Starry Plough's first inspection in the CUPA program. One cylinder could have ducked under the restraint if it fell in a certain direction - make sure that the restraints are effective. HMBP submitted and accepted. Fire extinguisher servicing due by the end of this month, training performed and records maintained, cylinders secured - satisfactory. DA
Evaluation Division: Berkeley City Toxics Management Division
Evaluation Program: HMRRP
Evaluation Source: CERS

Evaluation Date: 3/20/2018
Violations Found? (Y/N): Yes
Evaluation General Type: Other/Unknown
Evaluation Type: Other, not routine, done by local agency
Evaluation Note(s): Not Reported
Evaluation Division: Berkeley City Toxics Management Division
Evaluation Program: HMRRP
Evaluation Source: CERS

Case Type: LUST Cleanup Site
Status: Completed - Case Closed
Status Date: 12/31/2013
CUF Case: YES
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Case Worker: UUU
Local Agency: BERKELEY, CITY OF
RB Case Number: 01-1201
Loc Case Number: TT01-1201
File Location: Local Agency
Potential Contaminants of Concern: Gasoline
Potential Media Affected: Other Groundwater (uses other than drinking water)
Begin Date: 9/22/1994
How Discovered: Inventory Control
How Discovered Description: Dispenser upgrades and UST removal
Stop Method: Close and Remove Tank
Stop Method Description: Demolished all above and underground structures
Agency Provided Latitude: 37.855931227
Agency Provided Longitude: -122.25935713

Environmental Consulting ~ Project Management ~ Technical Management ~ Contract & Project Work

JEN MOSER, P.G.

Phone: (510) 376-5771 ~ **E-mail**: jenmoser@mygemgroup.com

PROFILE

- Resourceful and solution-driven environmental consultant
- 25+ years' experience in site characterization and remediation projects of up to $10+ million
- 8+ years' experience in exploration, development, open pit and underground mining
- History of implementing new technologies to solve problems before projects are impacted
- Skilled in managing field operations, including determination of approach and equipment
- Experienced in operations and maintenance of a landfill
- Co-authored report published in The Military Engineer (the Society of American Military Engineers), *Historical Range Assessment at Fort Ord*

PROFESSIONAL EXPERIENCE

GEM Group, Inc. dba Tom Edwards & Associates **2005-present**
Environmental and Geological Consultant

- Prepare plans, investigation, remediation, and completion reports
- Conduct Phase 1 Environmental Site Assessments (ESAs)
- Determine the need for further site investigation and/or remedial action and direct implementation
- Prepare proposals and budgets
- Interface extensively with Federal, State, County, and Local government agencies on project permits, investigations, evaluations, and recommendations
- Managed the evaluation and remediation of contaminated soil and ground water, from planning to delivery and reporting in compliance with 100% of regulatory requirements (former Fort Ord)
- Coordinated DGM and MEC removal from ranges requiring soil remediation
- Supervised operations and maintenance of landfill, including LFG extraction, treatment, and monitoring

AARON ENVIRONMENTAL / HARZA / ONSITE ENVIRONMENTAL / ITSI **1994-2005**
Geologist

- Supervised excavation of contaminated soil at Superfund site
- Conducted Phase 1 ESAs and Phase II investigations
- Prepare plans, investigation, remediation, and completion reports
- Prepared proposals and budgets
- Presented plans and project status to clients and regulatory agencies
- Managed the evaluation and remediation of contaminated soil, from planning to delivery and reporting in compliance with 100% of regulatory requirements (former Fort Ord)
- Supervised operations and maintenance of landfill, including LFG extraction, treatment, and monitoring

TETRA TECH INC. **1993-1994**
Project Geologist

- Remedial Investigation and Feasibility Studies at Superfund sites
- Supervised drilling of soil borings, installation of ground water monitoring wells, trenching on landfill areas, soil, sediment, ground water, and surface water sampling

ARMENONIC DEL ECUADOR **1989-1991**
Consultant Resident Geologist

- Responsible for startup and takeover of geology department of Armenonic del Ecuador's' underground complex silver mines
- Mapped, evaluated, and proposed tunnels to intercept high-grade complex silver veins
- Hired and trained personnel and developed SOPs for geology department
- Assessed effects of tunneling, milling and tailings dam on drinking water supply of nearby towns

BENGUET CORPORATION **1983-1989**

- Mapped, evaluated, delineated, and supervised underground and open pit mining
- Evaluated effects of drilling and underground mining on water supplies
- Supervised tunneling and diamond core drilling during exploration and development of underground and open pit mines
- Planned and supervised access road and site preparation
- Performed resource evaluation of project sites – field geology technique reviews
- Recommended improved mapping and sampling techniques

CERTIFICATIONS

- Professional Geologist, 2001
- OSHA (Occupational Safety & Health Administration)
  - 8-Hour OSHA Refresher Course (Annual)
  - 8-Hour OSHA Supervisory Training
  - 40-Hour OSHA Training

Environmental Consulting ~ Project Management ~ Technical Management ~ Contract & Project Work

MIKE ERVING, JUNIOR GEOLOGIST

PROFILE

- Eager to learn and excel in the environmental field
- Self-driven, results-oriented, and diligent professional

PROFESSIONAL EXPERIENCE

GEM Group, Inc. **2018-Present**
Junior Geologist

- Prepare Transaction Screen and Phase I Environmental Site Assessment reports, including:
  - Interpret information gathered from third-party computer-generated reports.
  - Request and review public agency records from various cities and counties.
  - Site reconnaissance and visual site inspections throughout Southern California.
  - Review of historical information including topographic maps, fire insurance maps, city directories, and aerial photographs.
- Assist Project Geologist in conducting soil, soil gas, groundwater, and indoor air investigations.
- Assist Project Geologist in completion of other reports including desktop reviews.

Geoscience Support Services Inc. **2015-2016**
Intern

- Participated in site investigations including sample collection, well transducer monitoring, and well drilling.
- Assisted in the physical completion of reports.
- Prepared clerical work for the overall efficiency of the office.
- Assisted in the design and completion of website.

EDUCATION

Gustavus Adolphus College, Saint Peter, MN **2017**

- Geology; Bachelor of Arts

Phase II Environmental Site Assessment

February 9, 2017

Xin Jin
1958A University Ave
Berkeley, 94704

Re: **Phase II Environmental Site Assessment Report**
2920 Shattuck Avenue
Berkeley, California

Dear Mr. Jin:

Pangea Environmental Services, Inc. (Pangea) has prepared this *Phase II Environmental Site Assessment Report* for the property located at 2920 Shattuck Avenue, Berkeley, California. The investigation was performed to evaluate site conditions for a pending property transaction and to address recognized environmental concerns (RECs) identified in the *Phase I Environmental Site Assessment* dated February 9, 2017. The Phase II site assessment work scope involved sampling of soil, groundwater, and subslab gas. Our conclusions and recommendations pertaining to the assessment results are presented herein.

If you have any questions or comments, please call me at (510) 435-8664 or email briddell@pangeaenv.com.

Sincerely,
Pangea Environmental Services, Inc.

Bob Clark-Riddell, P.E.
Principal Engineer

Attachment: *Phase II Environmental Site Assessment Report*

PHASE II ENVIRONMENTAL SITE ASSESSMENT REPORT

2920 Shattuck Avenue
Berkeley, California

February 9, 2017

Written by:

Jake Wilson
Project Geologist

Bob Clark-Riddell, P.E.
Principal Engineer

INTRODUCTION

Pangea Environmental Services, Inc. (Pangea) has prepared this *Phase II Environmental Site Assessment Report* (report) for the property located at 2920 Shattuck Avenue, Berkeley, California (site). The investigation was performed to evaluate site conditions for a pending property transaction and to address recognized environmental concerns (RECs) identified in the *Phase I Environmental Site Assessment* dated February 8, 2017. The Phase II site assessment work scope involved sampling soil, groundwater, and subslab gas.

SITE BACKGROUND

The site consists of one parcel which totals approximately 0.63 acre in size. The site is currently occupied by two commercial buildings, occupied by a hardware store (True Value Eastern Supplies) and an automotive repair facility (The Model Garage).

The site is accessed via Shattuck Avenue to the east and Russell Street to the north of the site. It is located in a mixed commercial and residential area of the City of Berkeley, California (Figure 1). The site is bound to the north by a supermarket (Berkeley Bowl) across Russell Street; to the east by residences and commercial retail across Shattuck Avenue; to the south by commercial businesses; and to the west by residences.

According to the 2012 USGS map of the Oakland West Quadrangle, the site was located at approximately 145 feet above mean sea level (amsl) in south Berkeley. The map contours indicated that the site slopes gently to the west.

The Phase I ESA identified the following RECs or environmental conditions for which the Phase II site assessment evaluated:

- The site has been occupied by automotive repair uses for over 40 years. Various hazardous substances and petroleum products are used and stored as part of the property use;
- An upgradient property (2929 Shattuck Ave) historically occupied by a drycleaner;
- The auto repair facility onsite formerly had hydraulic hoists with associated underground reservoirs of hydraulic oil;
- A small underground storage tank was formerly onsite along the western edge of the property line.

SITE ASSESSMENT ACTIVITIES

Site assessment involved sampling of site soil, groundwater, and subslab gas. Pre-field, drilling, sampling, boring destruction, waste handling procedures are described below. Sampling locations are shown on figure 2.

Subslab Gas Sampling Activities

On December 13, 2016, Pangea installed and sampled five subslab gas probes (SS-1 through SS-5). The rationale for the probe locations is presented in Table A.

Table A - Rationale for Subslab Probe Locations

Probe ID	Rationale for Probe Location
SS-1 and SS-2	Near automobile garage activities.
SS-3	Rear of hardware store adjacent outside storage area.
SS-4	Near exterior storage area.
SS-5	Adjacent former UST and storage area.

The subslab probes were installed using a rotohammer to drill a 5/8" hole through the Site's concrete slab and inserting a vapor pin™ snuggly into the hole. The probes were closed and allowed to equilibrate with subsurface gas for a minimum of two hours.

Subslab gas probes were purged with a syringe at an approximate rate of 150 milliliters per minute and sampled by connecting the probes to a 1-liter Tedlar bag in a vacuum chamber. Samples were transported to McCampbell Analytical Laboratories (McCampbell) in Pittsburg, California and analyzed for volatile organic compounds (VOCs) by EPA Method 8260B.

Probes were removed from the concrete slab upon completion of sampling and the hole was backfilled with anchoring cement. Subslab probe locations are shown on Figure 2. Subslab gas sampling field sheets are included as Appendix A.

Soil and Groundwater Sampling Activities

On January 27, 2017, five soil borings (B-1 through B-5) were advanced at the site (Figure 2). Pangea contracted a C-57 licensed driller, Cascade Drilling of Richmond, California, to advance borings to collect soil and groundwater samples. Prior to drilling, a boring permit was obtained from the City of Berkeley Toxic Management Division (BTMD) and is included as Appendix B. A comprehensive site safety plan was prepared to protect site workers and the plan was kept onsite during all field activities. The proposed drilling locations were marked and Underground Service Alert was notified at least 48 hours before the proposed field activities. The rationale for the boring locations is presented in Table B.

Table B - Rationale for Boring Locations

Boring ID	Rationale for Boring Location
B-1	Near exterior storage area.
B-2	Adjacent former UST and storage area.
B-3	Near automobile garage activities and hoists, western end of building.

B-4	Near automobile garage activities and hoists, eastern end of building.
B-5	Downgradient of offsite historic dry cleaner, and southeastern corner of property.

Select borings were completed deeper to sample groundwater, while other borings evaluated shallow soil conditions. Boring B-1 was advanced to a total depth of 25 feet below ground surface (ft bgs), and borings B-3 and B-5 were advanced to a depth of 20 ft bgs. These borings were installed using a Geoprobe 6600DT track-rig and dual-tube drill rods. Borings B-2 and B-4 were advanced to a total depth of 5 ft bgs using a hand auger. Borings B-1, B-3, B-5 were also cleared to 5 ft bgs for utilities using a hand auger before using the drill rig. Soil boring locations are shown on Figure 2.

Soil was logged in accordance with the Unified Soil Classification System by Pangea staff and overseen by a professional engineer. Sample depths were collected based on field observations including visual staining, and readings on a photo ionization detector (PID). In the absence of any indications of contamination, samples were taken at a depth of 5 ft bgs. No indications of contamination were noted for borings B-1 through B-5 and samples were taken at the default depth. Soil boring standard operating procedures are attached as Appendix C.

Groundwater samples were collected from borings B-1, B-3 and B-5. Water was not observed in any of the three borings during drilling. The borings were allowed to remain open until Pangea and Cascade could remobilize on January 30, 2017. At that time, groundwater was observed in all three borings and samples were collected.

Soil borings were destroyed by tremie grouting with portland cement under the observation of a BTMD grout inspector. Borings were finished with a concrete at a thickness equal to the existing concrete slab. Investigation derived waste was drummed in a 55-gallon drum and will be profiled and disposed of properly.

Soil and groundwater samples were stored on ice and transported under chain-of-custody to Curtis and Tompkins Laboratory in Berkeley, California (C&T). Soil sample analysis consisted of the following:

- Total petroleum hydrocarbons as gasoline (TPHg) in all five borings by EPA Method 8015B;
- Total petroleum hydrocarbons as diesel (TPHd), and motor oil (TPHmo) in borings B-1 and B-3 through B-5 by EPA Method 8015B;
- VOCs in borings B-1 and B-3 by EPA Method 8260B;
- Semi volatile organic compounds (SVOCs) in boring B-1 by EPA Method 8270C;
- Lead in borings B-1, B-3, and B-5 by EPA Method 6020;
- Polychlorinated biphenyls (PCBs) in borings B-3 and B-4 by EPA Method 8082.

Groundwater sample analyses consisted of the following:

- TPHg in all three samples by EPA Method 8015B;
- TPHd and TPHmo in borings B-1 and B-3 by EPA Method 8015B;
- VOCs in all three samples by EPA Method 8260B;
- SVOCs in borings B-1 and B-3 by EPA Method 8270C;
- PCBs in boring B-3 by EPA Method 8082.

Laboratory analytical results are described below.

SITE ASSESSMENT RESULTS

Field observations and analytical results are described below. Analytical results for soil, groundwater, and subslab gas are summarized on Tables 1, 2 and 3, respectively. The laboratory analytical reports are included in Appendix C.

Field Observations

Soil from borings B-1 through B-5 consisted primarily of clays and silts with minor components of sand and gravel. Groundwater was not observed during drilling but had equilibrated to a depth of 14 to 19 ft bgs after 72 hours. Evidence of contamination was not observed via visual staining, PID readings, or olfactory detections.

Soil Analytical Results

Soil analytical data is summarized on Table 1. No TPHg, SVOCs and PCBs were detected above the laboratory reporting limits in any samples. TPHd was detected in one of four samples at a concentration of 13 milligrams per kilogram (mg/kg). TPHmo was detected in three of four analyzed samples, at a maximum concentration of 63 mg/kg in B-4. Acetone was detected at a concentration of 0.020 mg/kg in B-1, but no other VOCs were detected in borings B-1 or B-3. Lead was detected in all three samples at a maximum concentration of 11 mg/kg. None of these detections exceed the San Francisco Regional Water Quality Control Board's (RWQCB) most conservative environmental screening levels (ESLs), the 2016 Tier 1 ESLs.

Groundwater Analytical Results

Groundwater analytical data is summarized in Table 2. None of the following compounds were detected above the laboratory reporting limits in analyzed samples: TPHg, TPHmo, SVOCs, PCBs, or VOCs (other than acetone). Acetone was detected in boring B-3 at a concentration of 23 micrograms per liter (µg/L), well below the 2016 Tier 1 ESL of 1,500 µg/L.

TPHd was detected in boring B-3 at a concentration of 460 µg/L. This concentration exceeds the 2016 Tier 1 ESL for TPHd of 100 µg/L, and exceeds the direct contact ESL of 150 µg/L, but is below the ESL for non-drinking water ESL for odor/nuisance of 5,000 µg/L. TPHd was not detected in boring B-1. This information

suggests the TPHd impact in groundwater is limited in extent. Furthermore, the chromatogram for this sample is not consistent with new diesel and may represent of aged and degraded diesel.

Subslab Gas Analytical Results

Subslab analytical data is summarized in Table 3. No VOCs were detected above laboratory reporting limits in analyzed samples.

CONCLUSIONS AND RECOMMENDATIONS

Based on the above information, Pangea offers the following conclusions regarding site conditions:

- No chemical impact was found in site subslab gas, soil or groundwater above conservative 2016 Tier I environmental screening levels (ESLs), other than limited TPHd impact in groundwater described below.

- Limited diesel-range hydrocarbon impact (TPHd) was detected in groundwater near the eastern center of the property. The TPHd impact could be associated with the former UST removed from the site or hydrocarbons historically used/stored at the site. The impact is not likely due to a hydrocarbon release from the hydraulic hoist(s) since no impact was found in the hydraulic oil range. The detected TPHd concentrations slightly exceeds the conservative 2016 Tier 1 ESLs protective of the potential beneficial use of groundwater as drinking water. The TPHd concentration exceeds the direct contact ESL, but this is not significant given the depth to groundwater and site use. The TPHd concentration is well below the ESL for non-drinking water odor/nuisance. Based on the limited TPHd impact, the Berkeley Toxics Management Division could require preparation for Site Management Plan to properly manage and impacted soil or groundwater encountered during any future redevelopment of the site. Pangea recommends management of TPHd impact during future site redevelopment.

APPENDIX C

Standard Operating Procedures

STANDARD FIELD PROCEDURES FOR SOIL BORINGS

This document describes Pangea Environmental Services' standard field methods for drilling and sampling soil borings. These procedures are designed to comply with Federal, State and local regulatory guidelines. Specific field procedures are summarized below.

Objectives

Soil samples are collected to characterize subsurface lithology, assess whether the soils exhibit obvious hydrocarbon or other compound vapor odor or staining, estimate ground water depth and quality, and to submit samples for chemical analysis.

Soil Classification/Logging

All soil samples are classified according to the Unified Soil Classification System by a trained geologist, scientist or engineer working under the supervision of a California Registered Engineer, California Registered Geologist (RG) or a Certified Engineering Geologist (CEG). The following soil properties are noted for each soil sample:

- Principal and secondary grain size category (i.e. sand, silt, clay or gravel)
- Approximate percentage of each grain size category,
- Color,
- Approximate water or product saturation percentage,
- Observed odor and/or discoloration,
- Other significant observations (i.e. cementation, presence of marker horizons, mineralogy), and
- Estimated permeability.

Soil Boring and Sampling

Soil borings are typically drilled using hollow-stem augers or hydraulic-push technologies. At least one and one half ft of the soil column is collected for every five ft of drilled depth. Additional soil samples are collected near the water table and at lithologic changes. With hollow-stem drilling, samples are collected using lined split-barrel or equivalent samplers driven into undisturbed sediments beyond the bottom of the borehole. With hydraulic-push drilling, samples are typically collected using acetate liners. The vertical location of each soil sample is determined by measuring the distance from the middle of the soil sample tube to the end of the drive rod used to advance the split barrel sampler or the acetate tube. All sample depths use the ground surface immediately adjacent to the boring as a datum. The horizontal location of each boring is measured in the field from an onsite permanent reference using a measuring wheel or tape measure.

Drilling and sampling equipment is steam-cleaned prior to drilling and between borings to prevent cross-contamination. Sampling equipment is washed between samples with trisodium phosphate or an equivalent EPA-approved detergent.

Sample Storage, Handling and Transport

Sampling tubes or cut acetate liners chosen for analysis are trimmed of excess soil and capped with Teflon tape and plastic end caps. Soil samples are labeled and stored at or below 4°C on either crushed or dry ice, depending upon local regulations. Samples are transported under chain-of-custody to a State-certified analytic laboratory.

Field Screening

Soil samples collected during drilling will be analyzed in the field for ionizable organic compounds using a photo-ionization detector (PID) with a 10.2 eV lamp. The screening procedure will involve placing an undisturbed soil sample in a sealed container (either a zip-lock bag, glass jar, or a capped soil tube). The container will be set aside, preferably in the sun or warm location. After approximately fifteen minutes, the head space within the container will be tested for total organic vapor, measured in parts per million on a volume to volume basis (ppmv) by the PID. The PID instrument will be calibrated prior to boring using hexane or isobutylene. PID measurements are used along with the field observations, odors, stratigraphy and ground water depth to select soil samples for analysis.

Water Sampling

Water samples collected from borings are either collected from the open borehole, from within screened PVC inserted into the borehole, or from a driven Hydropunch-type sampler. Groundwater is typically extracted using a bailer, check valve and/or a peristaltic pump. The ground water samples are decanted into the appropriate containers supplied by the analytic laboratory. Samples are labeled, placed in protective foam sleeves, stored on crushed ice at or below 4°C, and transported under chain-of-custody to the laboratory.

Pangea often performs electrical conductivity (EC) logging and/or continuous coring to identify potential water-bearing zones. Hydropunch-type sampling is then performed to provide discrete-depth grab groundwater sampling within potential water-bearing zones for vertical contaminant delineation. Hydropunch-type sampling typically involves driving a cylindrical sheath of hardened steel with an expendable drive point to the desired depth within undisturbed soil. The sheath is retracted to expose a stainless steel or PVC screen that is sealed inside the sheath with Neoprene O-rings to prevent infiltration of formation fluids until the desired depth is attained. The groundwater is extracted using tubing inserted down the center of the rods into the screened sampler.

Duplicates and Blanks

Blind duplicate water samples are collected usually collected only for monitoring well sampling programs, at a rate of one blind sample for every 10 wells sampled. Laboratory-supplied trip blanks accompany samples collected for all sampling programs to check for cross-contamination caused by sample handling and transport. These trip blanks are analyzed if the internal laboratory QA/QC blanks contain the suspected field contaminants. An equipment blank may also be analyzed if non-dedicated sampling equipment is used.

Grouting

If the borings are not completed as wells, the borings are filled to the ground surface with cement grout poured or pumped through a tremie pipe.

Waste Handling and Disposal

Soil cuttings from drilling activities are usually stockpiled onsite on top of and covered by plastic sheeting. At least four individual soil samples are collected from the stockpiles for later compositing at the analytic laboratory. The composite sample is analyzed for the same constituents analyzed in the borehole samples. Soil cuttings are transported by licensed waste haulers and disposed in secure, licensed facilities based on the composite analytic results.

Ground water removed during sampling and/or rinsate generated during decontamination procedures are stored onsite in sealed 55 gallon drums. Each drum is labeled with the drum number, date of generation, suspected contents, generator identification and consultant contact. Disposal of the water is based on the analytic results for the well samples. The water is either pumped out using a vacuum truck for transport to a licensed waste treatment/disposal facility or the individual drums are picked up and transported to the waste facility where the drum contents are removed and appropriately disposed.

STANDARD OPERATING PROCEDURE FOR SOIL VAPOR SAMPLING

1.0 PURPOSE

This standard operating procedure (SOP) describes the procedures for collecting soil vapor samples using temporary and semi-permanent soil gas probes/wells and evacuated stainless-steel Summa canisters. The SOP is modified from procedures and information presented in Cal/EPA 2012 (*Advisory-Active Soil Investigations)*; Cal/EPA 2011; Cal/EPA 2010; U.S. EPA, 2006; and DiGiulio, 2003. This SOP includes (a) real-time leak-check procedures to evaluate integrity of the soil gas probe and sampling assembly during probe purging and post sampling, and (b) real-time field screening of soil gas concentrations during probe purging and post sampling.

2.0 REQUIRED EQUIPMENT

- Hammer drill with fittings for installing and removing vapor probes (for direct push vapor probes)
- Vapor probes with retractable or dedicated drop-off tips (e.g. AMS SGVP) (for direct push vapor probes).
- Hand auger (for soil vapor wells)
- Tubing with Swagelok or similar threaded compression-fittings, vapor-tight caps, valves
- Screens (for soil vapor wells)
- Filter-pack sand (for dedicated tips and soil vapor wells)
- Granular bentonite (for vapor well construction)
- VOA vials
- Vacuum pump with rotameter for purging and leak testing
- 1-Liter Summa canister with vacuum gauge for each sample
- Tedlar bags (for helium measurement and vapor screening)
- Stainless-steel sampling manifold
- Leak-check compound (e.g., helium)
- Calibrated photoionization detector (PID) or other organic vapor analyzer
- Isobutylene for PID calibration
- Vacuum chamber (iron lung) for pre- and post-sampling leak-check
- Leak-check enclosure(s) (small bucket [or similar] with openings for sample tubing, helium introduction and sampling enclosure atmosphere)
- Weather stripping or bentonite (for leak check enclosure seal)
- Record-keeping materials
- Latex or nitrile gloves

3.0 PROCEDURES

3.1 Boring Clearance

Prior to installing soil vapor probes, ensure that a utility clearance has been conducted.

3.2 Probe Depths

This SOP describes procedures for installing soil gas probes/wells at sufficient depth to provide a minimum of 5 feet between the ground surface and the top of the dry bentonite overlying the sand pack that surrounds the soil gas screen interval. This is because soil gas samples collected shallower than 5 ft depth may be subject to barometric pressure effects and prone to breakthrough of ambient air through the soil column.

In some cases shallower probe installation may be required to provide soil gas characterization immediately above the contaminant impact zone, to avoid shallow groundwater/capillary fringe, or to provide additional vertical characterization. Variation of sample depths and the need for deeper sample locations should be evaluated based on site specific characteristics and data quality objectives. If vertical characterization to groundwater is needed, the deepest soil gas sample should be collected near the top of the capillary fringe. Soil gas probes/wells should not be installed within or below the capillary fringe.

Collecting soil gas sampling near contaminant sources is recommended when performing vapor intrusion modeling. Risk estimates may be biased low if quantified with shallow soil gas measurements (five feet below grade) using the Johnson & Ettinger 1991 model. Vertical soil gas sampling should be conducted to determine the source of subsurface contamination, ideally using numerous vertical profiles of soil gas to accurately locate subsurface sources. Once located, soil gas can be targeted at these depths site wide.

3.3 Semi-permanent Direct-Push Vapor Probe Installation

1. Use a rotary hammer drill or concrete-coring equipment to core any paved surfaces.
2. The drive rod is driven to a predetermined depth and then partially or fully removed (depending on soil type), leaving a disposable drop-off tip in the hole. The hole should be sufficiently deep that there is a minimum of 5 feet between the surface and the top of the dry bentonite overlying the sand pack (see below for details). If possible, remove the drive rod and place 3” of sand in the hole before placing the drop-off tip.
3. The inner soil gas pathway from probe tip to the surface should be continuously sealed (e.g., a sampling tube attached to the probe tip with a barbed fitting or a screw adapter with an o-ring) to prevent leakage. If a screw adapter with o-ring is used, inspect the o-ring to ensure that it is not flawed and use rigid tubing that can be tightened from the surface. Tightly cap the top end of the sampling tube. The volume of the sampling apparatus should be minimized. DTSC guidance requires that tubing should be no greater than ¼” nominal diameter.
4. Cover the probe tip with at least 3”of sand (resulting in a minimum 6” sand pack), followed by at least 6” of dry granular bentonite (see **Figure 1**). Fill the remainder of the boring with hydrated bentonite slurry. For multiple depth soil gas probes, separate vapor probe sand packs with hydrated bentonite as shown on **Figure 2**. VOA vials are useful for measuring and placing these materials because they have approximately the same inside diameter as the AMS SGVP drive rod outer diameter. Check the annular space for bridging and construction material depths using a narrow rod.
5. **Equilibration Time:** Record probe installation time/date, and wait at least **2 hours** before conducting purge volume tests, leak tests, or soil gas sampling -- if there is a minimum of 5

feet between the surface and the top of the dry bentonite overlying the sand pack. If there is less than 5 feet between the surface and the top of the dry bentonite overlying the sand pack or the borehole was hand augered, wait at least **48 hours** after probe installation and capping before conducting purge volume tests, leak tests, or soil gas sampling. If the probe was installed with a combination of hand augering and direct-push drilling methods and there is less than 5 feet between the bottom of the hand auger depth and the top of the dry bentonite overlying the sand pack, wait at least **48 hours** after probe installation and capping before conducting purge volume tests, leak tests, or soil gas sampling.

6. Decontamination: Decontaminate drive rods and other reusable components between sample locations by washing equipment with Alconox or Liquinox soap and rinsing with tap water and/or by steam-cleaning. Use new flexible tubing for each sample point (do not reuse).

3.4 Semi-permanent Augered Vapor Well Installation

1. Use a rotary hammer drill or concrete-coring equipment to core any paved surfaces.
2. Auger to a depth sufficient to allow a minimum of 5 feet between the surface and the top of the dry bentonite overlying the sand pack (see below for details). It is recommended to use the smallest diameter auger feasible to minimize future purging volumes and optimize representativeness of soil gas data.
3. Install small diameter tubing with a short (<6" long) screened section close to the bottom of the hole. The soil gas pathway from screen to the surface should be continuously sealed (e.g., a sampling tube attached to the probe tip with a barbed fitting or a screw adapter with an o-ring) to prevent leakage. If a screw adapter with o-ring is used, inspect the o-ring to ensure that it is now flawed and use rigid tubing that can be tightened from the surface. The volume of the sampling apparatus should be minimized. DTSC guidance specifies that tubing should be no greater than ¼" nominal diameter.
4. For deep wells (>10 feet), install a down-hole rod or other support to ensure that the screened section remains at the proper depth.
5. Cover the screened section with at least 6" of sand, followed by at least 6" of dry granular bentonite. Ensure that the screened section is near the center of the sand pack. Fill the remainder of the boring with hydrated bentonite. The bentonite should be hydrated at the surface and poured into the borehole.
6. **Equilibration Time:** After probe installation, tightly cap the tubing, record probe installation time/date, and wait at least **48 hours** before conducting purge volume tests, leak tests, or soil gas sampling:
7. Decontamination: Decontaminate drive rods and other reusable components between sample locations by washing equipment with Alconox or Liquinox soap and rinsing with tap water and/or by steam-cleaning. Use new flexible tubing for each sample point (do not reuse).

3.5 Temporary Vapor Probe Installation Using Tubing and Expendable Tip

1. This method should only be used for qualitative assessments due to the possibility of vapor leaks along the drive rods. This method should not be used when sampling in coarse granular materials due to potential leakage along the probe.
2. Use a rotary hammer drill or concrete-coring equipment to core any paved surfaces.
3. The drive rod is driven to a predetermined depth (generally 6 feet minimum) and then pulled back (approximately 1") to expose the short screened section of the probe (typically an expendable tip, **Figure 3**).

4. The probe tip should be attached to the sampling tube with either a barbed fitting or a screw adapter with an o-ring to prevent leakage. If a screw adapter with o-ring is used, replace o-rings daily and inspect them for flaws before installing each probe. Use rigid tubing that can be tightened from the surface to ensure that the o-ring is properly sealed. The volume of the sampling apparatus should be minimized. DTSC guidance requires that tubing should be no greater than ¼" nominal diameter.
5. Hydrated bentonite should be used to seal around the drive rod at the ground surface to prevent ambient air intrusion
6. **Equilibration Time:** After probe installation, tightly cap the tubing, record probe installation time/date, wait at least **2 hours** before conducting purge volume tests, leak tests, or soil gas sampling.

3.6 Vapor Sample Collection

During vapor sampling, record all valve open/close times and canister/manifold vacuum readings at each step. Do not conduct sampling within **5 days following a significant rain event** (0.5 inches of rainfall during any 24-hour period) or after significant nearby irrigation.

Setup

1. Calculate and record the volume of the sampling assembly, tubing, vapor probe, and any *permeable* air-, sand-, or dry bentonite-filled annular space around the vapor probe tip.

   One Purge Volume = $\pi * r^2 * L$ = 3.14 x (1/2*ID) x (1/2*ID) * L,

   where ID = tubing or manifold inside diameter and L = length of tubing/manifold/borehole segment.

   - 1/8" ID tubing volume = 2.4 ml/ft,
   - 1/4" ID tubing volume = 9.7 ml/ft,
   - 1/4" OD (0.17" ID) tubing volume = 4.5 ml/ft
   - 2-1/8" auger boring volume = 697 ml/ft * 0.4 = 278 ml/ft (sand) minus tubing volume
   - 2-1/8" auger boring volume = 697 ml/ft * 0.5 = 349 ml/ft (dry bentonite) minus tubing volume
   - 3-1/4" auger boring volume = 1631 ml/ft * 0.4 = 652 ml/ft (sand) minus tubing volume
   - 3-1/4" auger boring volume = 1631 ml/ft * 0.5 = 816 ml/ft (dry bentonite) minus tubing volume

Sample Purge Volumes

Item	One (1) Purge Volume (approx)	Three (3) Purge Volumes	Ten (10) Purge Volumes
¼" ID tubing (10 ft)	100 ml	300 ml	1,000 ml
¼" ID tubing (10 ft) with 6" dry bentonite and 6" sand, inside 3-1/4" diameter auger boring	830 ml	2,500 ml	8,300 ml
¼" ID tubing (10 ft) with 1 ft dry bentonite and 1 ft sand, inside 3-1/4" diameter auger boring	1,550 ml	4,650 ml	15,550 ml

2. Wear latex or nitrile gloves while handling sampling equipment. Change gloves whenever a new sample is collected and after handling leak-check compound.
3. Replace the vapor probe cap with a closed Swagelok valve. Connect the sampling manifold to the vapor probe, sample Summa canister and vacuum pump using Swagelok fittings and stainless-steel, nylon, or Teflon tubing. Check all fittings for tightness (do not over-tighten).
4. Close all valves. Record pre-test vacuum reading on the Summa canister.

Shut-In Check

1. Open valve on vapor sampling manifold and open 3-way valve #1 so the vacuum pump of the purging assembly can evacuate the vapor sampling manifold assembly (keep valves #2 and #3 closed to the Tedlar bag/vacuum chamber of the vapor screening assembly) (**Figure 4**). Start the vacuum pump. Do *not* open #1 valve to the probe assembly, or the valve on the sample Summa canister. Allow manifold/tubing vacuum to stabilize at approximately 10" Hg.
2. Stop the vacuum pump, close 3-way valves #2 and #3 (to allow shut-in testing of vapor sampling manifold), and conduct a shut-in test by waiting at least **5 minutes** (if using 150 inches of water gauge) or **10 minutes** (if using 30 inches of mercury gauge). Monitor manifold vacuum gauge to test for leaks. If the vacuum decreases, rectify the leak before proceeding.

Purge, Flow and Leak Check

1. **Calculate purge volume and duration.** Do *not* over-purge. Purge volumes should be determined in one of the following ways:

   a) For vapor sampling in support of sensitive human health risk assessments for regulatory review, a step-purge test should be conducted at a "worst case" sampling point, **using 1, 3 and 10 purge volumes** (including tubing, sampling assembly and annular space) to determine the appropriate volume that yields the highest target compound concentration.

   b) For collecting samples from depths of 5 feet or less, or if step purge tests yield no detectable target compounds, use a default purge of approximately **3 purge volumes** (including tubing, sampling assembly and annular space).

   c) For semi-permanent wells subject to frequent sampling, **purge 1 volume** only of the tubing and manifold volume (not including the dry bentonite or sand pack section) after waiting at least **2 weeks** following the previous sampling event.
2. Place leak-check enclosure over vapor probe and seal to ground using hydrated bentonite or weather stripping.
3. Introduce helium gas into the leak-check enclosure and monitor with the helium gas analyzer until it reads between 20% and 30% helium.
4. **Conduct purging.** Start vacuum pump and open 3-way valve #1 (and 3-way valves #2 and #3) so the vacuum pump can evacuate the probe. Do *not* over-purge. Closely monitor the flow on the rotameter and the vacuum on the vacuum gauge. For most samples flow should be limited to 150mL/min or 200 mL/min maximum. Flow rates greater than 200 mL/min may be used when purging times are excessive, such as for deep wells with larger-diameter tubing. However, a vacuum of 100" of water or less must be maintained during sampling whenever a higher flow rate is used. If the vacuum remains below approximately 7" Hg, then sufficient flow is present to collect a representative sample (Cal/EPA 2012) and continue purging for the planned purge duration.

5. If the probe-side vacuum exceeds approximately 7" Hg, then insufficient flow may be present to collect a representative sample and this condition should be noted. (Evaluate probe integrity or consider re-installation of probe, especially if probe installed in coarse-grain material). **To sample soil gas under low flow conditions, follow this alternate sampling method** derived from Appendix D, Cal/EPA 2012. Make a reasonable attempt to purge one purge volume (as defined above), but as a minimum purge one volume of the sampling assembly, tubing, and probe. After purging, open sample Summa canister until sampling manifold vacuum threshold is achieved, then close Summa sample valve until probe vacuum dissipates. Repeat this sampling procedure as necessary to sufficiently fill the sample Summa canister. Alternatively, consider installing a soil gas probe with a larger probe annulus space, or employing passive soil gas sampling methods.
6. **Pre-Sample Vapor Screening.** To pre-screen soil vapor, open valves #2 and #3 of the vapor screening assembly to route vapor into the Tedlar bag within a vacuum chamber (iron lung). Partially fill the Tedlar bag (and return valves #2 and #3 to purging position). Monitor the rotameter for changes in flow while filling the Tedlar bag. Check bag with the helium gas analyzer to screen probe vapors for leakage (indicated by presence of helium). If helium concentration in bag is below 1% then continue sampling. If helium concentration in bag is above 1%, then discontinue sampling and check for leaks around the probe. The probe may need to be repaired or re-installed. Additionally, check the Tedlar bag for contaminants using the PID for qualitative contaminant assessment (optional). For tight soil formations, consider skipping the pre-sample vapor screening or conducting screening as initial probe purging.
7. When purge duration complete and ready to discontinue purging, close 3-way valve #1 so that the probe is connected to the sampling manifold, and then stop the vacuum pump.
8. Record helium reading for leak-check enclosure about each minute during purging and sampling.

Sample Collection

1. **Opening Sample Canister.** Once a helium reading of at least 20% has been reached, open sample canister valve. **Sampling takes approximately 5 minutes for a 1-liter Summa canister** (at 150 ml/min sampling flow rate).
2. Close sampling canister valve when vacuum decreases to 5" mercury. Do *not* allow vacuum to fall below this range.
3. **Post-Sample Vapor Screening.** After sampling, open 3-way valve #1 so that the vapor screening assembly is connected to the probe, turn on the vacuum pump, and open 3-way valves #2 and #3 to partially fill the Tedlar bag within the vacuum chamber (iron lung). When Tedlar bag is sufficiently filled, return valves #2 and #3 to purging position. Check Tedlar bag for indication of sampling leakage using the helium gas analyzer. If helium concentration is below 1% then sample is sufficiently representative. If helium concentration is above 1%, then the sample may not be sufficiently representative; the probe may need to be repaired or re-installed and re-sampled. Additionally, check the Tedlar bag for contaminants using the PID for qualitative contaminant assessment (optional).
4. **Shroud Sample.** To confirm helium meter readings, collect one shroud sample per day to analyze for percent helium. Connect the shroud sample Summa canister and manifold to a port near the bottom of the shroud and open the canister valve at the beginning of sampling. Close sampling canister valve when vacuum decreases to 5" mercury. Do *not* allow vacuum to fall below this range. Disassemble sampling assembly, and cap (or remove and restore) vapor sampling point.

5. **Analyses.** Fill out chain-of-custody form for analysis for **chemicals of concern (i.e. TO-15)**, and for **leak-check compound** for at least 10% of samples. Analyze all samples for **percent oxygen** by ASTM D1946-90**.** Additionally, samples may be analyzed for **percent methane and carbon dioxide** by ASTM D1946-90 when in support of sensitive human health risk assessments for regulatory review. Include final vacuum reading and serial numbers of canister and flow restrictor on chain-of-custody form.
6. For vapor sampling in support of sensitive human health risk assessments for regulatory review, collect at least one *duplicate* sample per site per sampling event from the sampling point with the anticipated highest vapor concentrations. The duplicate sample should be collected by attaching a fresh sample canister following collection of the initial sample. If a new manifold is used, follow the same purging and sampling procedures used for the original sample. If the same manifold is used, collect a sample without further purging, using the same sampling procedures used for the original sample.

Decontamination and Decommissioning

1. Use a decontaminated sampling manifold and new tubing for each sample location. Return equipment to laboratory for decontamination.
2. Backfill any open soil vapor probe holes with bentonite slurry or Portland cement and cap with concrete or other surface material to match the area.
3. To retain the soil gas probe for future sampling, cap the Swagelock fitting and cover the probe with a small vault or other protective device.

"When Quality Counts"

Analytical Report

WorkOrder: 1612616

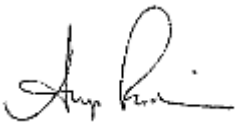
Report Created for: Pangea Environmental Svcs., Inc.

1710 Franklin Street, Ste. 200
Oakland, CA 94612

Project Contact: Jake Wilson
Project P.O.:
Project Name: 2920 Shattuck

Project Received: 12/13/2016

Analytical Report reviewed & approved for release on 12/19/2016 by:



Angela Rydelius,
Laboratory Manager

The report shall not be reproduced except in full, without the written approval of the laboratory. The analytical results relate only to the items tested. Results reported conform to the most current NELAP standards, where applicable, unless otherwise stated in the case narrative.

Glossary of Terms & Qualifier Definitions

Client: Pangea Environmental Svcs., Inc.
Project: 2920 Shattuck
WorkOrder: 1612616

Glossary Abbreviation

%D	Serial Dilution Percent Difference
95% Interval	95% Confident Interval
DF	Dilution Factor
DI WET	(DISTLC) Waste Extraction Test using DI water
DISS	Dissolved (direct analysis of 0.45 µm filtered and acidified water sample)
DLT	Dilution Test (Serial Dilution)
DUP	Duplicate
EDL	Estimated Detection Limit
ITEF	International Toxicity Equivalence Factor
LCS	Laboratory Control Sample
MB	Method Blank
MB % Rec	% Recovery of Surrogate in Method Blank, if applicable
MDL	Method Detection Limit
ML	Minimum Level of Quantitation
MS	Matrix Spike
MSD	Matrix Spike Duplicate
N/A	Not Applicable
ND	Not detected at or above the indicated MDL or RL
NR	Data Not Reported due to matrix interference or insufficient sample amount.
PDS	Post Digestion Spike
PDSD	Post Digestion Spike Duplicate
PF	Prep Factor
RD	Relative Difference
RL	Reporting Limit (The RL is the lowest calibration standard in a multipoint calibration.)
RPD	Relative Percent Deviation
RRT	Relative Retention Time
SPK Val	Spike Value
SPKRef Val	Spike Reference Value
SPLP	Synthetic Precipitation Leachate Procedure
ST	Sorbent Tube
TCLP	Toxicity Characteristic Leachate Procedure
TEQ	Toxicity Equivalents
WET (STLC)	Waste Extraction Test (Soluble Threshold Limit Concentration)

Analytical Qualifiers

H	samples were analyzed out of holding time

NOTES: - STLC and TCLP extractions require 2 days to complete; therefore, all TATs begin after the extraction is completed (i.e., One-day TAT yields results in 3 days from sample submission).

- MAI assumes that all material present in the provided sampling container is considered part of the sample - MAI does not exclude any material from the sample prior to sample preparation unless requested in writing by the client.

MAI clients MUST disclose any dangerous chemicals known to be present in their submitted samples in concentrations that may cause immediate harm or serious future health endangerment as a result of brief, gloved, open air, sample handling by MAI staff. Non-disclosure incurs an immediate $250 surcharge and the client is subject to full legal liability for harm suffered. Thank you for your understanding and for allowing us to work safely.

* If metals are requested for water samples and the water type (Matrix) is not specified on the chain of custody, MAI will default to metals by E200.8.

Please provide an adequate volume of sample. If the volume is not sufficient for a MS/MSD a LCS/LCSD will be prepared in its place and noted in the report.

CASE NARRATIVE

Laboratory number:	**285519**
Client:	**Pangea Environmental**
Location:	**2920 Shattuck Ave**
Request Date:	**01/27/17**
Samples Received:	**01/27/17**

This data package contains sample and QC results for five soil samples, requested for the above referenced project on 01/27/17. The samples were received cold and intact.

TPH-Purgeables and/or BTXE by GC (EPA 8015B):
No analytical problems were encountered.

TPH-Extractables by GC (EPA 8015B):
Matrix spikes QC870801,QC870802 (batch 243973) were not reported because the parent sample required a dilution that would have diluted out the spikes. No other analytical problems were encountered.

Volatile Organics by GC/MS (EPA 8260B):
No analytical problems were encountered.

Semivolatile Organics by GC/MS (EPA 8270C):
Matrix spikes QC870616,QC870617 (batch 243929) were not reported because the parent sample required a dilution that would have diluted out the spikes. No other analytical problems were encountered.

PCBs (EPA 8082):
All samples underwent sulfuric acid cleanup using EPA Method 3665A. All samples underwent sulfur cleanup using the copper option in EPA Method 3660B. No analytical problems were encountered.

Metals (EPA 6010B and EPA 6020):
No analytical problems were encountered.

COOLER RECEIPT CHECKLIST

Curtis & Tompkins, Ltd.

Login # 285519 Date Received 1/27/17 Number of coolers 1
Client Pangea Project 2920 Shattuck Ave

Date Opened 1/27/17 By (print) HF (sign) [signature]
Date Logged in ↓ By (print) DTN (sign) [signature]
Date Labeled ↓ By (print) ↓ (sign) [signature]

1. Did cooler come with a shipping slip (airbill, etc) ____ YES (NO)
   Shipping info ____
2A. Were custody seals present? .... ☐ YES (circle) on cooler on samples ☑ NO
   How many ____ Name ____ Date ____
2B. Were custody seals intact upon arrival? ____ YES NO (N/A)
3. Were custody papers dry and intact when received? ____ (YES) NO
4. Were custody papers filled out properly (ink, signed, etc)? ____ (YES) NO
5. Is the project identifiable from custody papers? (If so fill out top of form) ____ (YES) NO
6. Indicate the packing in cooler: (if other, describe) ____

☐ Bubble Wrap ☑ Foam blocks ☐ Bags ☐ None
☐ Cloth material ☐ Cardboard ☐ Styrofoam ☐ Paper towels

7. Temperature documentation: * Notify PM if temperature exceeds 6°C
   Type of ice used: ☑ Wet ☐ Blue/Gel ☐ None Temp(°C) 3.9
   ☑ Temperature blank(s) included? ☑ Thermometer# 4 ☐ IR Gun# ____
   ☑ Samples received on ice directly from the field. Cooling process had begun
8. Were Method 5035 sampling containers present? ____ (YES) NO HF
   If YES, what time were they transferred to freezer? @ 20:30
9. Did all bottles arrive unbroken/unopened? ____ (YES) NO
10. Are there any missing / extra samples? ____ YES (NO)
11. Are samples in the appropriate containers for indicated tests? 1/31/17 DTN ~~YES~~ NO
12. Are sample labels present, in good condition and complete? ____ (YES) NO
13. Do the sample labels agree with custody papers? ____ (YES) NO
14. Was sufficient amount of sample sent for tests requested? ____ (YES) NO
15. Are the samples appropriately preserved? ____ (YES) NO N/A
16. Did you check preservatives for all bottles for each sample? ____ YES NO ~~N/A~~
17. Did you document your preservative check? (pH strip lot# ____) YES NO ~~N/A~~
18. Did you change the hold time in LIMS for unpreserved VOAs? ____ YES NO ~~N/A~~
19. Did you change the hold time in LIMS for preserved terracores? ____ (YES) NO ~~N/A~~ HF
20. Are bubbles > 6mm absent in VOA samples? ____ YES NO (N/A)
21. Was the client contacted concerning this sample delivery? ____ YES (NO)
   If YES, Who was called? ____ By ____ Date: ____

COMMENTS
11, Did not receive a seal jar for sample -002, unable to proceed for TEHM

Curtis & Tompkins, Ltd.

Detections Summary for 285519

Results for any subcontracted analyses are not included in this summary.

Client : Pangea Environmental
Project : STANDARD
Location : 2920 Shattuck Ave

Client Sample ID : B-1-5 Laboratory Sample ID : 285519-001

Analyte	Result	Flags	RL	Units	Basis	IDF	Method	Prep Method
Acetone	20		17	ug/Kg	As Recd	0.8547	EPA 8260B	EPA 5035
Lead	11		0.23	mg/Kg	As Recd	25.00	EPA 6020	EPA 3050B

Client Sample ID : B-2-5 Laboratory Sample ID : 285519-002

CASE NARRATIVE

Laboratory number:	**285556**
Client:	**Pangea Environmental**
Location:	**2920 SHATTUCK AVE**
Request Date:	**01/30/17**
Samples Received:	**01/30/17**

This data package contains sample and QC results for three water samples, requested for the above referenced project on 01/30/17. The samples were received cold and intact.

TPH-Purgeables and/or BTXE by GC (EPA 8015B):
No analytical problems were encountered.

TPH-Extractables by GC (EPA 8015B):
No analytical problems were encountered.

Volatile Organics by GC/MS (EPA 8260B):
B-5-GW (lab # 285556-003) was diluted due to foaming. B-3-GW (lab # 285556-002) had pH greater than 2. No other analytical problems were encountered.

Semivolatile Organics by GC/MS (EPA 8270C):
No analytical problems were encountered.

PCBs (EPA 8082):
All samples underwent sulfuric acid cleanup using EPA Method 3665A. All samples underwent sulfur cleanup using the copper option in EPA Method 3660B. No analytical problems were encountered.

COOLER RECEIPT CHECKLIST

Curtis & Tompkins, Ltd.

Login # 285576 Date Received 1-30-17 Number of coolers 1
Client PANGEA Project 2920 SHATTUCK AVE

Date Opened 1-30-17 By (print) KFS (sign) KFS
Date Logged in 1 By (print) EM (sign) EM
Date Labeled 1 By (print) 1 (sign) 1

1. Did cooler come with a shipping slip (airbill, etc) YES (NO)
Shipping info

2A. Were custody seals present? .... ☐ YES (circle) on cooler on samples ☒ NO
How many Name Date
2B. Were custody seals intact upon arrival? YES NO N/A
3. Were custody papers dry and intact when received? (YES) NO
4. Were custody papers filled out properly (ink, signed, etc)? (YES) NO
5. Is the project identifiable from custody papers? (If so fill out top of form) (YES) NO
6. Indicate the packing in cooler: (if other, describe)

☐ Bubble Wrap ☒ Foam blocks ☐ Bags ☐ None
☐ Cloth material ☐ Cardboard ☐ Styrofoam ☐ Paper towels

7. Temperature documentation: * Notify PM if temperature exceeds 6°C

Type of ice used: ☒ Wet ☐ Blue/Gel ☐ None Temp(°C) 5.5°C

☒ Temperature blank(s) included? ☒ Thermometer# 4 ☐ IR Gun#

☒ Samples received on ice directly from the field. Cooling process had begun

8. Were Method 5035 sampling containers present? YES (NO)
If YES, what time were they transferred to freezer?
9. Did all bottles arrive unbroken/unopened? (YES) NO
10. Are there any missing / extra samples? YES (NO)
11. Are samples in the appropriate containers for indicated tests? (YES) NO
12. Are sample labels present, in good condition and complete? (YES) NO
13. Do the sample labels agree with custody papers? (YES) NO
14. Was sufficient amount of sample sent for tests requested? (YES) NO
15. Are the samples appropriately preserved? (YES) NO N/A
16. Did you check preservatives for all bottles for each sample? YES NO (N/A)
17. Did you document your preservative check? (pH strip lot#) YES NO (N/A)
18. Did you change the hold time in LIMS for unpreserved VOAs? YES NO (N/A)
19. Did you change the hold time in LIMS for preserved terracores? YES NO (N/A)
20. Are bubbles > 6mm absent in VOA samples? (YES) NO N/A
21. Was the client contacted concerning this sample delivery? YES (NO)
If YES, Who was called? By Date:

COMMENTS
11 Did not receive amber container for TPH-d/m.

Curtis & Tompkins, Ltd.

Detections Summary for 285556

Results for any subcontracted analyses are not included in this summary.

Client : Pangea Environmental
Project : STANDARD
Location : 2920 SHATTUCK AVE

Client Sample ID : B-1-GW Laboratory Sample ID : 285556-001

No Detections

Client Sample ID : B-3-GW Laboratory Sample ID : 285556-002

Analyte	Result	Flags	RL	Units	Basis	IDF	Method	Prep Method
Diesel C10-C24	460	Y	52	ug/L	As Recd	1.000	EPA 8015B	EPA 3520C
Acetone	23		10	ug/L	As Recd	1.000	EPA 8260B	EPA 5030B

Client Sample ID : B-5-GW Laboratory Sample ID : 285556-003

No Detections

Y = Sample exhibits chromatographic pattern which does not resemble standard

Dear Mike Erving,

Thank you for your request. We have searched our records and have no records that respond to your below request for:

2900-2920 Shattuck Avenue
Berkeley

If you have any questions or concerns, please call or e-mail me.

Sincerely,

Rochele Henderson

OWNER/BUILDER
I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code, or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).
☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvements is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale).
☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law).
☐ I am exempt under Sec. _____, B.& P.C. for this reason _____

BUILDING PERMIT APPLICATION

I hereby affirm (check one):

☒ LICENSED CONTRACTOR'S DECLARATION. I am licensed under provisions of Chapter 9 (commencing with Sec. 7000) of the Business and Professions Code, and my license is in full force and effect.
License No. 340885 Classification C10

☒ OWNER-BUILDER DECLARATION. I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code): Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500.00).

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code): The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvements is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code): The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contract(s) licensed pursuant to the Contract's License Law).

I am exempt under Sec. _____, Business and Professions Code, for this reason:

WORKER'S COMPENSATION DECLARATIONS (Sec. 3800 LAB.C.)
(check one):

☐ I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workers Compensation Insurance, or a certified copy thereof.

Policy No. _____ Company _____

☐ Certified copy is hereby furnished.

☐ Certified copy is filed with the City of Berkeley Building Division

☒ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

☐ The permit is for $100.00 (valuation) or less.

NOTE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Worker's Compensation provisions of the Labor Code, you must comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY (Sec. 3097, Civil Code)
I hereby affirm that there (check one)

☐ is ☐ is not a construction lending agency for the performance of the work for which this permit is issued.

Lender's Name _____

Lender's Address _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all City ordinances and State laws relating to building construction, and hereby authorize representatives of the City of Berkeley to enter upon the above-mentioned property for inspection purposes.

I also agree to waive, indemnify and hold harmless the City and it's agents against all liabilities, judgments, costs, and expenses which may in any way accrue against said agency in consequence of the granting of this permit.

OWNER/BUILDER
I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code, or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

[X] I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvements is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale).

[ ] I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law).

[ ] I am exempt under Sec. B & P.C. for this reason

Subject: FW: Inspection Report

Hello,

I have not received any return to compliance certification or documentation for the violations found during my inspection on 3/16/18.

Just a heads up the deadline is today and we usually give an extra 5 days prior to sending out a Notice of Violation.

Let me know if you need any help returning to compliance.

Best,
Viviana Garcia

Subject: Inspection Report

Hello,

Lovely meeting you all today. Attached are the hazardous materials/waste and storm water inspections. If you have any questions about corrective actions feel free to contact me. Have a great Friday.

Thank you,
Viviana Garcia

Attachment :
OilAndWaste.xls;Aerosol.JPG;BrakeFluid.JPG;Cartridge.JPG;EmptyOilFilter.JPG;Fuel.JPG;SolidOilFilters.JPG;

Attached please find pictures of labels with start dates. We wrote in the start dates based on our research of the last pickup date and added 3 days to a week as an estimate for when waste was next deposited in the barrels. Please note that the one empty barrel does not yet have a start date. Please let us know if you need anything further from us. Thanks, Don Worth, Model Garage, Inc.

Thank you Zena. For the hazardous waste labels, are all the drums empty? None of them have accumulation start dates.

Hi Viviana,

Apologies, I did not send these images to you earlier. Let me know if you need anything else

Thanks,
Zena

Subject: FW: Inspection Report

Hello,

I have not received any return to compliance certification or documentation for the violations found during my inspection on 3/16/18.

Just a heads up the deadline is today and we usually give an extra 5 days prior to sending out a Notice of Violation.

Let me know if you need any help returning to compliance.

Best,
Viviana Garcia

Hazardous Materials Business Plan (HMBP) Certification Statement

For Dept Use Only – Log In/Date Stamp

RECEIVED
MAR 0 2 2009
TOXICS MGMT. DIVISION

I. IDENTIFICATION

FACILITY ID # 158 CAD # 093459485

BUSINESS NAME (Same as Facility Name or DBA-Doing Business As) 3
THE MODEL GARAGE, INC.

BUSINESS SITE ADDRESS 103
2920 SHATTUCK AVE.

CITY 104 BERKELEY | CA | ZIP CODE 105 94705

II. CERTIFICATION STATEMENT

Check the appropriate boxes below and sign the certification statement.

ENTERED IN DMS
MAR 04 2009

☐ INITIAL SUBMITTAL: This new HMBP is being submitted for the following:
- ☐ New facility
- ☐ Change of ownership
- ☐ Change of business address

☐ ANNUAL CERTIFICATION: I have personally reviewed the HMBP currently on file with your agency, dated _____, and hereby certify, *under penalty of perjury*, that:
- The information contained in the most recent HMBP submission is complete, accurate and up to date.
- A copy of the facility's most current Business Owner/Operator Identification page is being submitted with this certification form.
- The facility has not begun handling any hazardous materials/hazardous wastes that are not currently listed on the most recently submitted Hazardous Materials Inventory forms.
- There have been no significant changes (100% increase or decrease) in the quantities of any previously reported hazardous materials/hazardous wastes as reported on the most recently submitted Hazardous Materials Inventory forms.
- The facility's annual waste amounts reported on the most recently submitted Hazardous Materials Inventory forms are accurate and expected to be the same in the next year.
- This certification is <u>not</u> being made to meet annual inventory submission requirements of EPCRA. (EPCRA requires complete annual submission of the inventory, United States Code Title 42, Section 11022).

☒ CERTIFICATION OF CHANGES/REVISIONS: This is to certify that the HMBP has been reviewed and revisions, amendments and/or additions are necessary and are being submitted with this document. The following areas of the HBMP are affected:
- ☐ Entire HMBP revision
- ☐ Business Activities page
- ☐ Business Owner/Operator Identification page
- ☒ Hazardous Materials Inventory
- ☐ Facility Site Plan/Storage Map(s)
- ☐ Emergency Response Plan/Contingency Plan
- ☐ Other (Specify): _____

I hereby certify, under penalty of perjury, that the information contained in this Hazardous Materials Business Plan is, to the best of my knowledge, true and correct. I understand that I will be required to show proof of compliance during any facility inspection conducted by City, County, State, or Federal authorities. I understand that whenever there are changes in address, ownership, business name, or operations (closure, addition of undisclosed hazardous materials or hazardous wastes, and/or contingency planning provisions), a notification of such must be made to Toxics Management Division within 30 days of the change.

UNIFIED PROGRAM CONSOLIDATED PERMIT AND REGISTRATION
City of Berkeley Toxics Management Division

CONDITIONS:

In order to maintain this Consolidated Permit and Registration, the permittee/registrant must comply with the following:

273. This permit is subject to all applicable local, state and federal ordinances, laws, statutes, codes, rules and regulations relating to the storage, handling, generation and disposal of hazardous materials and/or hazardous waste.

274. This permit is not transferable. Any permit or registration issued to a particular person or for a designated place, operation, purpose or object shall not be valid for use by or for any other person, place, operation, purpose or object.

275. The permittee/registrant shall retain this permit at its facility, immediately available upon request by an inspector or the hazardous materials manager.

276. The permittee/registrant shall notify the Toxics Management Division within 30 days of any changes in the operation of the facility that may affect the permit, or changes of the owner or operator.

277. The permittee/registrant shall pay an annual fee as designated each year, and all applicable state surcharge fees.

278. The permittee/registrant shall authorize representatives of the Toxics Management Division to enter the facility for inspection purposes to ascertain compliance and cause correction of any violation of the Unified Program Permit/Registration Conditions and of any applicable ordinances, codes, laws, statutes, rules, or regulations.

279. The permittee/registrant shall take all necessary steps to ensure the discovery, containment and clean up of any confirmed or unconfirmed unauthorized release of any hazardous material/hazardous waste and shall notify the Toxics Management Division of such unauthorized release if the release or threatened release presents or may present a significant threat to human life, property or the environment.

280. For hazardous materials sites, at least 45 days prior to the closure of a regulated unit or the facility, the permittee/registrant will submit a closure application to the Toxics Management Division addressing the appropriate removal of all hazardous materials and hazardous wastes from the facility.

Failure to comply with any of the foregoing conditions may result in revocation of this permit and/or a penalty assessment.

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page.

Does your facility…		If Yes, please complete these pages of the UPCF….
A. HAZARDOUS MATERIALS Have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES ☐ NO 4	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION
B. REGULATED SUBSTANCES Have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release Prevention Program (CalARP)?	☐ YES ☒ NO 4a	Coordinate with your local agency responsible for CalARP
C. UNDERGROUND STORAGE TANKS (USTs) Own or operate underground storage tanks?	☐ YES ☒ NO 5	UST FACILITY (Formerly SWRCB Form A) UST TANK (one page per tank) (Formerly Form B)
D. ABOVE GROUND PETROLEUM STORAGE Own or operate ASTs above these thresholds: Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	☐ YES ☒ NO 8	NO FORM REQUIRED TO CUPAs
E. HAZARDOUS WASTE		
1. Generate hazardous waste?	☒ YES ☐ NO 9	EPA ID NUMBER – provide at the top of this page
2. Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	☐ YES ☒ NO 10	RECYCLABLE MATERIALS REPORT (one per recycler)
3. Treat hazardous waste on site?	☐ YES ☒ NO 11	ONSITE HAZARDOUS WASTE TREATMENT – FACILITY ONSITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit)
4. Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES ☒ NO 12	CERTIFICATION OF FINANCIAL ASSURANCE
5. Consolidate hazardous waste generated at a remote site?	☐ YES ☒ NO 13	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION
6. Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned onsite?	☐ YES ☒ NO 14	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION
Generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (20 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	☐ YES ☒ NO 14a	Obtain federal EPA ID Number, file Biennial Report (EPA Form 8700-13A/B), and satisfy requirements for RCRA Large Quantity Generator.
Household Hazardous Waste (HHW) Collection site?	☐ YES ☒ NO 14b	See CUPA for required forms.
E. LOCAL REQUIREMENTS		
1. Use or store hazardous materials or hazardous wastes in combined (aggregate) quantities equal to or greater than 55 gallons for liquids, 500 pounds for solids or 200 cubic feet for compressed gases?	☒ YES ☐ NO 15	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION (OES 2731) OR SPREADSHEET
2. Use or store any quantity of etiological agents, radioactive materials or perchlorate materials?	☐ YES ☒ NO 15	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION (OES 2731) OR SPREADSHEET
3. Below E.1. thresholds above, but generate any quantity of hazardous waste?	☒ YES ☐ NO 15	HAZARDOUS WASTE GENERATOR REPORTING PACKET
4. Generate any quantity of Universal Waste (mercury containing devices, non-empty aerosols, electronic devices, fluorescent tubes, batteries, dental amalgam wastes, etc.)?	☐ YES ☒ NO 15	SEE THE UNIVERSAL WASTE REPORTING REQUIREMENTS PAGE FOR INSTRUCTIONS
5. Treat any quantity of photochemical waste on-site (x-ray and photo imaging processors)?	☐ YES ☒ NO 15

Emergency Response Plan/Contingency Plan

The following items are elements of a comprehensive emergency response plan/contingency plan that meets state requirements. If your facility has a written plan, or if you are to prepare one, make sure all the elements listed are covered by your plan. Small facilities with simple operations may complete the boxes below to be in compliance with the written emergency plan requirement. Please submit a copy of your written response plan or complete and submit this form.

I. Facility Information

Facility Name: THE MODEL GARAGE, INC.	Phone: 510 540-5899
Address: 2920 SHATTUCK AVENUE	
City: BERKELEY	Zip: 94705

II. Emergency Coordinators

Primary Coordinator	Secondary Coordinator
Name: DONALD WORTH.	Name:
Title: OWNER / VICE PRESIDENT.	Title:
Work Phone: 510 540 5899	Work Phone:
After hours Phone: 510 525-6912	After hours Phone:
Pager: 510 517 6313	Pager:

III. Emergency Telephone Numbers and Arrangements

The emergency coordinator shall immediately notify the following whenever a release, fire, or explosion threatens human health or the environment:

Agency	Phone
Fire Department	911
California Emergency Management Agency	(916) 845-8911
City of Berkeley Toxics Management Division	(510) 981-7460 or 911
Hospital/Medical Center (if injuries)	
EBMUD Waste Water Treatment Facility (if to sewer)	(510) 287-1651
Hazardous Waste Contractor (if clean up needed)	
Bay Area Air Quality Management District	(800) 334-6367
Other agencies:	

Arrangements: (Please check one box)

- ☒ We have no formalized written agreements with any emergency response agency or contractor.
- ☐ We have formalized written agreements with _____

  Telephone: _____ for emergency response.

IV. Earthquake Response

Identify the areas and/or mechanical equipment or other systems that could require immediate inspection or isolation because of their vulnerability to earthquake related ground motion.

Areas/equipment identified to be inspected immediately after an earthquake:	HAZARDOUS MATERIAL STORAGE TANKS (COOLANT, WASTE OIL, NEW MOTOR OIL), STORAGE SHED, AUTOMOBILE LIFTS, INDIVIDUAL MECHANIC WORKSTATIONS.

V. Emergency Equipment Inventory Table

EQUIPMENT CATEGORY	✓ if these are provided	Equipment	Location*	Description**
Personal Protective Equipment, Safety Equipment, First Aid Equipment		Chemical Protective Boots		
		Chemical Protective Gloves		
		Safety Glasses/Goggles/Face shields		
		Chemical Protective Clothing		
		Hard Hats		
		Chemical Monitoring Equipment (describe)		
	✓	First Aid Kits	SOUTH WALL	BEHIND SERVICE DESK (BASIC KIT)
	✓	Eye Wash Stations	SOUTH WALL	BEHIND SERVICE DESK (SINGLE-USE)
		Safety Showers		
		Cartridge Respirators and Cartridges (describe)		
		Self-Contained Breathing Apparatus (SCBA)		
		Other (describe)		
Fire Extinguishing Systems	✓	Fire Extinguishers	VARIOUS	10 TOTAL, INCLUDING 1 UPSTAIRS
		Automatic Fire Systems		
		Fire Alarm Boxes		
Spill Control Equipment, Decontamination Equipment	✓	Absorbents, Neutralizers (describe)	SHED	GREASE SWEEP (DIATOMACEOUS EARTH) SMALL QTY.
	✓	Shovels/Brooms/Squeegees	FRONT OF SHOP	
		Overpack drum/Spill drum		
		Berms/Dikes (describe)		
		Decontamination Equipment (describe)		
		Gas cylinder leak repair kits (describe)		
		Other (describe)		
Communications and Alarm Systems	✓	Telephones	5	4 DOWNSTAIRS, 1 UPSTAIRS.
		Intercoms/PA systems		
		Portable 2 way radios		
		UST leak detection monitors		
		Chemical alarms (describe)		
Additional Equipment (Use additional pages if needed)				

* If appropriate, use the location code(s) from your Hazardous Materials Business Plan.

** Describe the equipment, such as type and quantity, and its capabilities. If applicable, specify any testing/maintenance procedures/intervals.

VI. Evacuation Information:

Evacuation Announcement	☐ Bell ☐ PA System Other _____ ☐ Horn ☒ Shouting
Evacuation Route	☐ Map Other X
Assembly Area	Location: SOUTH OF SHOP, IN FRONT of COPY STORE
Re-entry Procedures	

VII. Emergency Procedures:

Emergency Coordinator Responsibilities:

1. Whenever there is an imminent or actual emergency situation such as a explosion, fire, or release, the emergency coordinator *(or his/her designee when the emergency coordinator is on call)* shall:
   a. Identify the character, exact source, amount, and aerial extent of any released hazardous materials.
   b. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects *(e.g. the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.)*.
   c. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
   d. Notify appropriate local authorities *(i.e., call 911)*.
   e. Notify the State Office of Emergency Services at 1-800-852-7550.
   f. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
   g. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.

2. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
   a. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from a explosion, fire, or release at the facility.
   b. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
   c. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
   d. Notify the Cal/EPA's Department of Toxic Substances Control and the City of Berkeley Toxics Management Division that the facility is in compliance with requirements 2-a and 2-b, above.

Special site specific procedures:

Emergency	Response Action
Hazardous Material & Hazardous Waste Spills/Releases:	OIL / COOLANT: ABSORB WITH RAGS FIRST, SWEEP RESIDUE AWAY WITH MINIMAL AMOUNTS of GREASE SWEEP.
Fire	VOICE WARNING, USE of EXTINGUISHERS WHEN POSSIBLE AND APPROPRIATE. CALL 911 if FIRE IS UNCONTROLLABLE
Explosion	EVACUATE, MEET AT PREDETERMINED MEETING PLACE. CALL 911 if APPROPRIATE.
Earthquake	EVACUATE BUILDING. MEET AT PREDETERMINED LOCATION.
Other	

Employee Training Plan

1. Scope

This plan is designed to provide employees with training on hazardous materials and hazardous waste that will satisfy the requirements of the California Health and Safety Code Chapter 6.95 and Chapter 6.5.

Facility Name:	THE MODEL GARAGE, INC.
Address:	2920 SHATTUCK AVENUE
Main Activity:	MAINTENANCE + REPAIR of AUTOMOBILES.
Building or Areas where hazardous materials/wastes are found:	SIDE SHED, AREA IMMEDIATELY OUTSIDE of SOUTH-WESTERN ROLL-DOWN DOOR. VARIOUS LOCATIONS THROUGHOUT THE SHOP.

2. Responsibilities

The following persons are responsible for ensuring that this Training Plan is implemented:

Name/Title	Training Responsibility
DONALD WORTH.	OUTLINING/IDENTIFYING TRAINING GOALS/OBJECTIVES
MORGAN WORTH.	HANDS-ON TRAINING/DEMONSTRATION

3. Employees/New Employees

New employees are trained during orientation, before starting on a job? ☒ YES ☐ NO

New employees who handle hazardous waste are trained in hazardous waste management within six months of hire date? ☒ YES ☐ NO

4. New Assignments or Changes in Operations

In the event of new assignments or of changes in operation, affected employees are trained before the new assignment or the change in operation takes place. ☒ YES ☐ NO

5. Refresher Training

Refresher training will be provided MONTHLY (how often). The method used will be: *(check all that apply)*

- ☐ Outside classes
- ☒ Safety meetings
- ☐ In-house classes provided by contractor
- ☐ In-house classes conducted by in-house trainers

6. Training Topics

The following table indicates the training topics covered for this facility, as indicated with a ☑. Other documentation on these training topics is maintained and are available to the inspector upon request.

All employees are trained to do the following procedures, as appropriate:	
☒	1. Initiate, activate, or recognize internal alarms and other emergency announcements.
☒	2. Notify internal or on-site emergency responders listed in the emergency response/contingency plan.
☒	3. Notify agencies listed in the emergency/contingency plan.
☒	4. Locate and review contents of written emergency response/contingency plan.
☒	5. Initiate, conduct, or follow evacuation procedures as described in the emergency response/contingency plan.
Hazardous materials/waste handlers are additionally trained in the following subjects:	
☒	1. Safe methods for handling and storage of hazardous materials and hazardous waste.
☒	2. Locations and proper use of personal protective equipment.
☒	3. Locations and proper use of fire and spill control equipment.
☒	4. Specific hazards of each chemical or waste to which they may be exposed, including the pathways of exposure (i.e. skin absorption, inhalation, ingestion).
☒	5. Follow emergency procedures for chemical/waste spills, earthquake, fire, and/or medical emergencies as described in the emergency response/contingency plan.
☒	6. Hazardous waste handlers/managers are also trained in all aspects of hazardous waste management specific to their job duties (e.g. accumulation time, storage period, labels, inspection of containers and storage areas, uniform hazardous waste manifests, etc.)

7. Emergency Response Team

This facility has a formally organized Emergency Response Team. ☐ YES ☒ NO

Emergency Response Team members are additionally trained for the following activities:	
☐	1. Personnel rescue procedures.
☐	2. Shutdown of operations.
☐	3. Liaison with emergency response agencies.
☐	4. Use, maintenance, and replacement of emergency response equipment.
☐	5. Emergency response drills are conducted, at least *(specify frequency)* [ ] times a year.
☐	6. Refresher training is provided, at least annually.

8. Recordkeeping

Employee training and other records are maintained at the facility. These include the following:

☑	1. Record of training for each employee (date and duration of training, subject matter covered, instructor, etc.).
☑	2. Training records of current and former employees. (For current employees, records are to be retained until closure of the facility. For former employees, training records are to be retained for at least 3 years after termination of employment.
☑	3. Description of introductory and continuing training programs for each employee classification.
☑	4. Current emergency response, contingency, and/or spill response plan (for underground or aboveground tanks).
☑	5. Description and documentation of emergency response drills.
☐	6. Record of reportable/recordable accidental releases of hazardous material/waste.
☑	7. Record of inspections of hazardous material/waste storage areas.
☐	8. Record of daily inspection of hazardous waste tanks.
☐	9. Inspection procedures for identified earthquake-sensitive areas and systems in the facility.

Note: The above list does not necessarily include every type of record required to be maintained by your facility.

Training records are maintained in the following location: OFFICE FILING CABINET LABELED "HAZARDOUS WASTE".

SUMMARY OF VIOLATIONS, CORRECTIVE ACTIONS, FINDINGS:

Class (M, II, I)	Violation Code/ Observation and PE	Citation, Description, Corrective Action Required, and/or Observation
M.	HW.2.2	CCR 66262.34(f)
		Facility failed to label mobile used oil roll-arounds. Label with the words "Used Oil", "hazardous waste", accumulation start date (empty weekly/biweekly), name + address of generator, hazardous properties of waste. Corrective action: Label hazardous waste containers
M	HW.2.7	CCR 66262.34(d)(2)
		Facility failed to keep hazardous waste containers closed except for adding + removing waste. Observed open keg of waste oil, open funnel/bung of waste antifreeze, ~~open aqueous parts washer~~ Corrective action: Keep containers closed unless adding or removing waste.

Note: The facility is subject to re-inspection at any time (re-inspection fees may apply).

☒ CUPA violations cited on page(s) 1-2 shall be corrected within 30 days.
☐ SW violations cited shall be corrected within____ days or before the next rain event.
☒ Submit Certification of Return to Compliance form within 30 days.

VIOLATIONS, CORRECTIVE ACTIONS, FINDINGS (CONTINUED):

Violation Code/ Observation and PE	Citation, Description, Corrective Action Required, Violation Classification or Observation
HW.5.5	HSC 25123.3(h)(2)
	Facility does not have the signed copy of the manifest from the designated facility within 35 days of the
Date 4/29/12	date the waste was shipped off site (Manifest # 009821208) facility must contact the transporter or TSDF to determine the status of the hazardous waste.
	If signed copy of the manifest has not been received within 60 days from the date the waste was shipped off site, generator must submit to DTSC a legible copy of the manifest, with some indications that the generator has not received confirmation of delivery of the signed manifest

BUSINESS SITE ADDRESS 103	2920 SHATTUCK AVE		
BUSINESS SITE CITY 104	BERKELEY	CA	ZIP CODE 94705 105

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page.

Does your facility…	If Yes, please complete these pages of the UPCF….	
A. HAZARDOUS MATERIALS Have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION
B. REGULATED SUBSTANCES Have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	☐ YES	Coordinate with your local agency responsible for CalARP.
C. UNDERGROUND STORAGE TANKS (USTs) Own or operate underground storage tanks?	☐ YES	UST FACILITY (Formerly SWRCB Form A) UST TANK (one page per tank) (Formerly Form B)
D. ABOVE GROUND PETROLEUM STORAGE Own or operate ASTs above these thresholds: Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	☐ YES	NO FORM REQUIRED TO CUPAs
E. HAZARDOUS WASTE Generate hazardous waste?	☒ YES	EPA ID NUMBER – provide at the top of this page
Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	☐ YES	RECYCLABLE MATERIALS REPORT (one per recycler)
Treat hazardous waste on-site?	☐ YES	ON-SITE HAZARDOUS WASTE TREATMENT – FACILITY ON-SITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit)
Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES	CERTIFICATION OF FINANCIAL ASSURANCE
Consolidate hazardous waste generated at a remote site?	☐ YES	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION
Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	☐ YES	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION
Generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	☐ YES	Obtain federal EPA ID Number, file Biennial Report (EPA Form 8700-13A/B), and satisfy requirements for RCRA Large Quantity Generator.
Household Hazardous Waste (HHW) Collection site?	☐ YES	See CUPA for required forms.

F. LOCAL REQUIREMENTS 15

CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS)

CONSOLIDATED EMERGENCY RESPONSE / CONTINGENCY PLAN

Prior to completing this Plan, please refer to the INSTRUCTIONS FOR COMPLETING A CONSOLIDATED CONTINGENCY PLAN

A. FACILITY IDENTIFICATION AND OPERATIONS OVERVIEW

FACILITY ID # 1.	CERS ID A1.	DATE OF PLAN PREPARATION/REVISION A2.
FA0000211		02/13/2013

BUSINESS NAME *(Same as Facility Name or DBA - Doing Business As)* 3.
THE MODEL GARAGE INC.

BUSINESS SITE ADDRESS 103.
2920 SHATTUCK AVE

BUSINESS SITE CITY 104.		ZIP CODE 105.
BERKELEY	CA	94705

TYPE OF BUSINESS (e.g., Painting Contractor) A3.	INCIDENTAL OPERATIONS (e.g., Fleet Maintenance) A4.
Automobile repair	

THIS PLAN COVERS CHEMICAL SPILLS, FIRES, AND EARTHQUAKES INVOLVING: (Check all that apply) A5.
☒ 1. HAZARDOUS MATERIALS; ☒ 2. HAZARDOUS WASTES

B. INTERNAL RESPONSE

INTERNAL FACILITY EMERGENCY RESPONSE WILL OCCUR VIA: (Check all that apply) B1.
☒ 1. CALLING PUBLIC EMERGENCY RESPONDERS (i.e., 9-1-1)
☒ 2. CALLING HAZARDOUS WASTE CONTRACTOR
☒ 3. ACTIVATING IN-HOUSE EMERGENCY RESPONSE TEAM

C. EMERGENCY COMMUNICATIONS, PHONE NUMBERS AND NOTIFICATIONS

Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the Emergency Coordinator (or his/her designee when the Emergency Coordinator is on call) shall:
1. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
2. Notify appropriate local authorities (i.e., call 9-1-1).
3. Notify the California Emergency Management Agency at (800) 852-7550.

Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall notify the California Department of Toxic Substances Control (DTSC), the local Unified Program Agency (UPA), and the local fire department's hazardous materials program that the facility is in compliance with requirements to:
1. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility; and
2. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.

INTERNAL FACILITY EMERGENCY COMMUNICATIONS OR ALARM NOTIFICATION WILL OCCUR VIA: (Check all that apply) C1.

☒ 1. VERBAL WARNINGS;	☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM;	☒ 3. TELEPHONE;
☐ 4. PAGERS;	☐ 5. ALARM SYSTEM;	☐ 6. PORTABLE RADIO

NOTIFICATIONS TO NEIGHBORING FACILITIES THAT MAY BE AFFECTED BY AN OFF-SITE RELEASE WILL OCCUR BY: (Check all that apply) C2.

☒ 1. VERBAL WARNINGS;	☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM;	☒ 3. TELEPHONE;
☐ 4. PAGERS;	☐ 5. ALARM SYSTEM;	☐ 6. PORTABLE RADIO

EMERGENCY RESPONSE PHONE NUMBERS:

AMBULANCE, FIRE, POLICE AND CHP	9-1-1
CALIFORNIA EMERGENCY MANAGEMENT AGENCY (CAL/EMA)	(800) 852-7550

OTHER (Specify): C11.	C12.

D. EMERGENCY CONTAINMENT AND CLEANUP PROCEDURES

SPILL PREVENTION, CONTAINMENT, AND CLEANUP PROCEDURES: (Check all boxes that apply to indicate your procedures for containing spills, releases, fires or explosions; and. preventing and mitigating associated harm to persons, property, and the environment.)

D1.

- ☒ 1. MONITOR FOR LEAKS, RUPTURES, PRESSURE BUILD-UP, ETC.;
- ☐ 2. PROVIDE STRUCTURAL PHYSICAL BARRIERS (e.g., Portable spill containment walls);
- ☐ 3. PROVIDE ABSORBENT PHYSICAL BARRIERS (e.g., Pads, pigs, pillows);
- ☐ 4. COVER OR BLOCK FLOOR AND/ OR STORM DRAINS;
- ☐ 5. BUILT-IN BERM IN WORK / STORAGE AREA;
- ☐ 6. AUTOMATIC FIRE SUPPRESSION SYSTEM;
- ☐ 7. ELIMINATE SOURCES OF IGNITION FOR FLAMMABLE HAZARDS (e.g. Flammable liquids, Propane);
- ☒ 8. STOP PROCESSES AND/OR OPERATIONS;
- ☐ 9. AUTOMATIC / ELECTRONIC EQUIPMENT SHUT-OFF SYSTEM;
- ☒ 10. SHUT-OFF WATER, GAS, ELECTRICAL UTILITIES AS APPROPRIATE;
- ☒ 11. CALL 9-1-1 FOR PUBLIC EMERGENCY RESPONDER ASSISTANCE / MEDICAL AID;
- ☒ 12. NOTIFY AND EVACUATE PERSONS IN ALL THREATENED AREAS;
- ☒ 13. ACCOUNT FOR EVACUATED PERSONS IMMEDIATELY AFTER EVACUATION CALL;
- ☐ 14. PROVIDE PROTECTIVE EQUIPMENT FOR ON-SITE RESPONSE TEAM;
- ☐ 15. REMOVE OR ISOLATE CONTAINERS / AREA AS APPROPRIATE;
- ☒ 16. HIRE LICENSED HAZARDOUS WASTE CONTRACTOR;
- ☒ 17. USE ABSORBENT MATERIAL FOR SPILLS WITH SUBSEQUENT PROPER LABELING, STORAGE, AND HAZARDOUS WASTE DISPOSAL AS APPROPRIATE;
- ☒ 18. SUCTION USING SHOP VACUUM WITH SUBSEQUENT PROPER LABELING, STORAGE, AND HAZARDOUS WASTE DISPOSAL AS APPROPRIATE;
- ☐ 19. WASH / DECONTAMINATE EQUIPMENT W/ CONTAINMENT and DISPOSAL OF EFFLUENT / RINSATE AS HAZARDOUS WASTE;
- ☐ 20. PROVIDE SAFE TEMPORARY STORAGE OF EMERGENCY-GENERATED WASTES;
- ☐ 21. OTHER (Specify):

D2.

E. FACILITY EVACUATION

THE FOLLOWING ALARM SIGNAL(S) WILL BE USED TO BEGIN EVACUATION OF THE FACILITY (CHECK ALL THAT APPLY): E1.

- ☐ 1. BELLS;
- ☐ 2. HORNS/SIRENS;
- ☒ 3. VERBAL (i.e., SHOUTING);
- ☐ 4. OTHER (Specify): E2.

THE FOLLOWING LOCATION(S) IS/ARE EVACUEE EMERGENCY ASSEMBLY AREA(S) (i.e., Front parking lot, specific street corner, etc.) E3.

Sidewalk by EasyCopy Center.

Note: The Emergency Coordinator must account for all on site employees and/or site visitors after evacuation.

☐ EVACUATION ROUTE MAP(S) POSTED AS REQUIRED E4.

Note: The map(s) must show primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas, and must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

F. ARRANGEMENTS FOR EMERGENCY SERVICES

Explanation of Requirement: Advance arrangements with local fire and police departments, hospitals, and/or emergency services contractors should be made as appropriate for your facility. You may determine that such arrangements are not necessary.

ADVANCE ARRANGEMENTS FOR LOCAL EMERGENCY SERVICES (Check one of the following) F1.

- ☒ 1. HAVE BEEN DETERMINED NOT NECESSARY; *or*
- ☐ 2. THE FOLLOWING ARRANGEMENTS HAVE BEEN MADE (Specify):

F2.

G. EMERGENCY EQUIPMENT

Check all boxes that apply to list emergency response equipment available at the facility and identify the location(s) where the equipment is kept and the equipment's capability, if applicable. [e.g., ☒ CHEMICAL PROTECTIVE GLOVES | Spill response kit | One time use, Oil & solvent resistant only.]

H. EARTHQUAKE VULNERABILITY

Identify areas of the facility that are vulnerable to hazardous materials releases / spills due to earthquake-related motion. These areas require immediate isolation and inspection.

VULNERABLE AREAS: (Check all that apply)	H1.	LOCATIONS (e.g., shop, outdoor shed, forensic lab)	
☒ 1. HAZARDOUS MATERIALS / WASTE STORAGE AREA		Shed and shop.	H2.
☒ 2. PROCESS LINES / PIPING		Shed and shop.	H3.
☐ 3. LABORATORY			H4.
☐ 4. WASTE TREATMENT AREA			H5.

Identify mechanical systems vulnerable to releases / spills due to earthquake-related motion. These systems require immediate isolation and inspection.

VULNERABLE SYSTEMS: (Check all that apply)	H6.	LOCATIONS	
☒ 1. SHELVES, CABINETS AND RACKS		Shed and shop.	H7.
☒ 2. TANKS (EMERGENCY SHUTOFF)		Shed	H8.
☒ 3. PORTABLE GAS CYLINDERS		Shop	H9.
☒ 4. EMERGENCY SHUTOFF AND/OR UTILITY VALVES		Shed.	H10.
☐ 5. SPRINKLER SYSTEMS			H11.
☐ 6. STATIONARY PRESSURIZED CONTAINERS (e.g., Propane dispensing tank)			H12.

I. EMPLOYEE TRAINING

Explanation of Requirement: Employee training is required for all employees handling hazardous materials and hazardous wastes in day-to-day or clean-up operations including volunteers and/or contractors. Training must be:

- Provided within 6 months for new hires;
- Amended as necessary prior to change in process or work assignment;
- Given upon modification to the Emergency Response / Contingency Plan, and updated/refreshed annually for all employees.

Required content includes all of the following:

- Material Safety Data Sheets;
- Hazard communication related to health and safety;
- Methods for safe handling of hazardous substances;
- Fire hazards of materials / processes;
- Conditions likely to worsen emergencies;
- Coordination of emergency response;
- Notification procedures;
- Applicable laws and regulations;
- Communication and alarm systems;
- Personal protective equipment;
- Use of emergency response equipment (e.g. Fire extinguishers, respirators, etc.);
- Decontamination procedures;
- Evacuation procedures;
- Control and containment procedures;
- UST monitoring system equipment and procedures (if applicable).

INDICATE HOW EMPLOYEE TRAINING PROGRAM IS ADMINISTERED (Check all that apply) I1.

☐ 1. FORMAL CLASSROOM; ☐ 2. VIDEOS; ☒ 3. SAFETY / TAILGATE MEETINGS;

☐ 4. STUDY GUIDES / MANUALS (Specify): _____ I2.

☐ 5. OTHER (Specify): _____ I3.

☐ 6. NOT APPLICABLE BECAUSE FACILITY HAS NO EMPLOYEES

Large Quantity Generator (LQG) Training Records: Large quantity hazardous waste generators (i.e., who generate more than 270 gallons/1,000 kilograms of hazardous waste per month) must retain written documentation of employee hazardous waste management training sessions which includes:

- A written outline/agenda of the type and amount of both introductory and continuing training that will be given to persons filling each job position having responsibility for the management of hazardous waste (e.g., labeling, manifesting, compliance with accumulation time limits, etc.).
- The name, job title, and date of training for each hazardous waste management training session given to an employee filling such a job position; and
- A written job description for each of the above job positions that describes job duties and the skills, education, or other qualifications required of personnel assigned to the position.
- Current employee training records must be retained until closure of the facility.
- Former employee training records must be retained at least three years after termination of employment.

J. LIST OF ATTACHMENTS
