Zoning Adjustments Board Staff Report

APP #ZP2022-0116

October 8, 2026

Use Permit for a Project at 2900-20 Shattuck Avenue

Project Facts	Project Description:
Applicant: Isaiah Stackhouse, SDT Architects **Property Owner:** 2900 Shattuck Avenue LLC **Project Address:** 2900-20 Shattuck Avenue **Site Size:** 0.45 acres (19,586 sf) **GP Land Use:** Neighborhood Commercial (NC) **Zoning:** South Area Commercial District (C-SA) **CEQA:** Initial Study/Mitigated Negative Declaration (IS/MND) and Mitigation, Monitoring, and Reporting Program (MMRP) prepared pursuant to Public Resources Code (PRC) Section 21080.1(b) **Vesting Date:** March 9, 2022 **Date Submitted:** September 4, 2022	The applicant is seeking approval to demolish a commercial building and construct an 11-story (125 feet, 2 inches), 131,583-square-foot, mixed-use building with 242 dwelling units (including 22 Very Low-Income and 8 Moderate Income Density Bonus qualifying units), 3,720 square feet of commercial space, 13 vehicle parking spaces, and 70 bicycle parking spaces. Since the project was reviewed by the Zoning Adjustment Board (ZAB) on April 27, 2023, when the hearing was continued to allow for the preparation of an Initial Study, the applicant revised the design as follows: • **Building Height**: Increased from 10 to 11 stories, and from 110 feet, 4 inches to 125 feet, 2 inches. • **Density and Units**: Unit count increased from 221 to 242 dwelling units; the affordable housing component expanded from 22 Very Low-Income units to 22 Very Low-Income and 8 Moderate-Income units, and the density bonus increased from 46.25% to 70%. • **Floor Area and FAR**: Gross floor area increased from 113,948 to 131,583 square feet, increasing the FAR from 5.82 to 6.72. • **Parking**: Vehicle parking increased from 9 to 13 spaces, now accommodated using parking stackers. • **Commercial Space**: Ground-floor commercial area decreased from 4,090 to 3,720 square feet. • **Setbacks**: The street side setback (Shattuck Avenue) increased from 6 inches to 1 foot, and the interior setback (West) decreased from 31 feet, 8 inches to 27 feet, 8 inches. • **Lot Coverage and Open Space**: Lot coverage increased from 51% to 52%, and usable open space increased from 7,056 to 7,408 square feet.

Zoning Adjustments Board Staff Report

Date Deemed Complete:
December 15, 2022

Project Planner: Singeh Saliki

Zoning Permits Requested:

1. **Demolition.** Use permit under Berkeley Municipal Code (BMC) Section 23.326.070(A) **"Main Non-Residential Building"** to demolish a non-residential building. (UPPH) *
2. **New Construction.** Use permit under BMC Section 23.204.020 (A) **"Allowed Land Uses"** to construct a new mixed-use development. (UPPH)
3. **New Construction.** Use permit under BMC Section 23.204.020(A) **"Allowed Land Uses"** to construct dwelling units. (UPPH)
4. **New Floor Area.** Use permit under BMC Section 23.204.030(A)(1) **"Floor Area Permit Requirements"** to create new floor area of 3,000 square feet or more. (UPPH)
5. **Modification for Mixed Use and Residential Projects.** Use permit under BMC Section 23.204.100(D)(3) to modify development standards for height, setback, and lot coverage requirements. (UPPH) *
6. **Height Projection** Administrative use permit under BMC Section 23.304.050 (A) **"Projections Above Height Limits"** to allow architectural elements in the form of a rooftop projection to exceed the district height limit. (AUP)

*Denotes required findings.

LAND USE PLANNING

Zoning Adjustments Board Staff Report

Density Bonus:

Waivers Requested:

1. **Height.** Waiver of BMC Section 23.204.100(D) to exceed building height limits – to be 125'-2", and 11 stories. (no maximum in Base with UP)
2. **Lot Line Setback.** Waiver of BMC Section 23.204.100(D) to reduce the front setback to 0', street side setback to 1'-0", and rear setback to 1'-5". (no minimum in Base with UP)
3. **Lot Coverage.** Waiver of BMC Section 23.204.100(D) to increase lot coverage to 52 percent. (no maximum in Base with UP)
4. **Floor Area Ratio.** Waiver of BMC Section 23.204.100(D) to increase floor area ratio (FAR) to 6.72, where 4.0 is the limit.

Concessions Requested:

1. **Usable Open Space.** Concession to reduce the open space requirement – to provide 7,408 square feet where 9,680 square feet is required – to eliminate the costs of constructing a larger roof deck.
2. **Bicycle Parking.** Concession to reduce the long-term bicycle parking requirement – to provide 60 spaces where 86 spaces are required – to eliminate the costs of enlarging the bike room and providing additional racks.

Staff Recommendation:

Staff recommends that ZAB adopt the Initial Study/Mitigated Negative Declaration (IS/MND) and Mitigation, Monitoring and Reporting Program (MMRP) and approve ZP2022-0116 pursuant to BMC Section 23.406.040 (E) (1-5) "**Findings for Approval**" and subject to the attached Findings and Conditions of Approval.

ZONING MAP

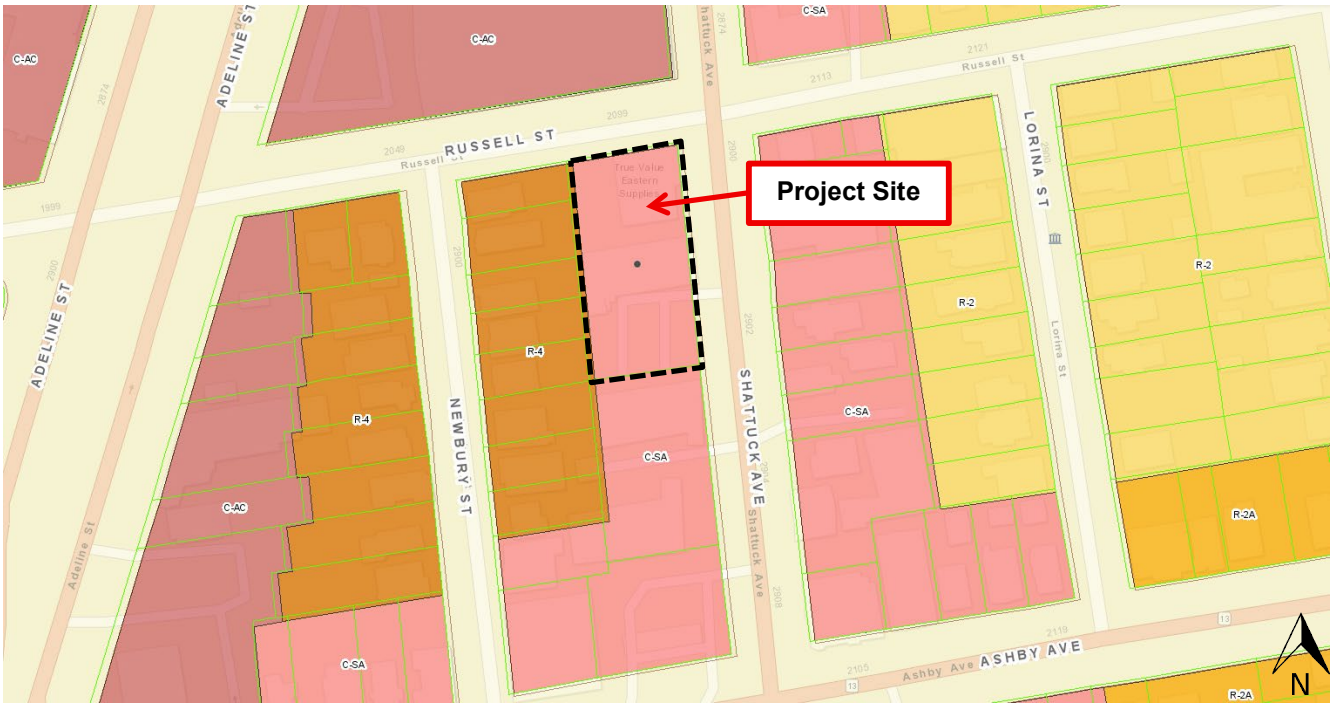

Figure 1: Vicinity and Zoning Districts Map

Comparison of Adjacent Properties			
Vicinity	**GP Land Use**	**Zoning**	**Current Use**
Subject Property	Neighborhood Commercial (NC)	South Area Commercial District (C-SA)	Retail/Auto Repair
North	Adeline Corridor Mixed Use (ACMU)	Adeline Corridor Commercial District (C-AC)	Retail (Berkeley Bowl)
South	Neighborhood Commercial (NC)	South Area Commercial District (C-SA)	Retail/Office
East			Office/Medical Office/Retail/Residential
West	High-Density Residential (HDR)	Multi-Family Residential District (R-4)	Single-Family/Duplex Residential

AERIAL

STREET ELEVATION

Figure 3: Street View of Site

Figure 4: Shattuck Avenue (East) and Russel Street (North) Elevations

Figure 5: West and South Elevations

BACKGROUND

Subject Site

The project site is associated with addresses 2900 and 2920 Shattuck Avenue, and Assessor's Parcel Number 53-1590-5-1. The 19,586- square-foot (0.45-acre) project site is a rectangular parcel that is occupied by a one-story, approximately 7,561-square-foot, commercial building that was constructed in three sections over 21 years. It is currently occupied by an auto repair shop (The Model Garage), hardware store (True Value Eastern Supplies), and the associated parking lot.

Neighborhood/Area Description

The project site is located northeast corner of the intersection of Shattuck Avenue and Russell Street. Adjacent parcels to the west are occupied by single- and two-family residential developments in the R-4, Restricted Multi-Family Residential District. To the site's north, south, and east are parcels that are occupied with one- and two-story commercial developments, with offices (general and medical) and retail to the south and east, and the Berkeley Bowl Marketplace to the north. Further east beyond the C-SA district is an R-2, Restricted Two-Family Residential District. (See Figure 1: Zoning Map and Figure 2: Aerial View)

The project site is served by several Alameda County (AC) Transit bus lines that operate along Shattuck Avenue and is 0.25 miles from the Ashby BART station.

Community Meeting

Prior to submitting the application to the City on September 4, 2022, the applicant installed yellow "Proposed Development Project" signs at the project site.

On August 30, 2022, a neighborhood outreach meeting was held by the applicant. Eight members of the public attended and expressed their concerns regarding the relationship of the project to the previous proposal for the site by the same developer in 2020; the height and scale of the building; the possibility of the return of the existing hardware business to the new building; the amount of affordable housing provided; insufficient parking for residents; pedestrian safety; loss of afternoon light; and the excessive amount of studio units.

On January 10, 2023, staff received an email from a neighbor stating their opposition to the project. The letter included concerns regarding unoccupied apartment and condominium buildings with unfilled ground-floor commercial spaces; and the potential closure of an essential and valued business (True Value Eastern Supplies) upon project approval.

On March 13, 2023, staff received an email from a neighbor expressing concerns over the excessive height and size of the building; the concurrent development of nearby residential projects by the same developer; the incompatibility of the building design with the area; vacancies in recent new residential developments; traffic, bike, and pedestrian safety; traffic congestion; the loss of sunlight, views, and trees; and the loss of privacy and security. They were also dissatisfied with the lack of outreach from the developers to neighbors to discuss the project.

On April 13, 2023, the City mailed public hearing notices to property owners and occupants, and to interested neighborhood organizations, and posted notices within the neighborhood in three locations.

On April 16, 2023, staff received an email from a neighbor expressing concern that comments from their previous email were not addressed, and that all of the DRC's recommendations from the March 16, 2023 meeting were ignored or overlooked. They were also dissatisfied with the minimal amount of affordable housing being provided in the project.

On April 17, 2023, staff received an email from a neighbor expressing concerns over the loss of existing small businesses (auto mechanic and hardware store) that could be replaced with "high-end" businesses that they feel are less useful to the neighborhood.

Before the April 27, 2023 ZAB public hearing, staff received a few letters from neighbors who identified the site as a hazardous waste site and disputed staff's recommendation of a categorical exemption from CEQA. The ZAB public hearing was continued to allow for the preparation of an Initial Study.

Staff received thirteen communications during the IS/MND 30-day public review period from June 9, 2026, through July 9, 2026. See Focused IS-MND, Attachment 6.

On September 24, 2026, the City mailed public hearing notices to property owners and occupants, and to interested neighborhood organizations, and posted notices within the neighborhood in three locations.

At the time of writing this report, staff received a letter from one neighbor (See Attachment 8) who expressed concerns about contamination and enforceable protections, floor area discrepancy, and project document consistency. Staff prepared a memo (Attachment 9) addressing the comments.

ANALYSIS

Project Scope

The project proposes to demolish the existing commercial building and construct a mixed-use building that utilizes the State density bonus with the following main components:

- 11 stories, 125 feet - 2 inches in height (see Figures 4 and 5: Elevations)
- 242 dwelling units – 219 studios, 9 one-bedroom, 13 two-bedroom, and 1 three-bedroom
- 257 bedrooms total
- 22 Very Low Income (VLI) and 8 Moderate Income units
- 3,720 square feet of ground-floor commercial space
- 7,408 square feet of usable open space – ground-level garden and two roof decks
- 13 vehicle parking spaces – 8 commercial and 5 residential in ground-level stackers
- 70-space bike room

Since the project was reviewed by the ZAB on April 27, 2023, when the hearing was continued

to allow for the preparation of an Initial Study, the applicant revised the design as follows:

- **Building Height:** Increased from 10 to 11 stories, and from 110 feet, 4 inches to 125 feet, 2 inches.
- **Density and Units:** Unit count increased from 221 to 242 dwelling units; the affordable housing component expanded from 22 Very Low-Income units to 22 Very Low-Income and 8 Moderate-Income units, and the density bonus increased from 46.25% to 70%.
- **Floor Area and FAR**: Gross floor area increased from 113,948 to 131,583 square feet, increasing the FAR from 5.82 to 6.72.
- **Parking:** Vehicle parking increased from 9 to 13 spaces, now accommodated using parking stackers.
- **Commercial Space:** Ground-floor commercial area decreased from 4,090 to 3,720 square feet.
- **Setbacks:** The street side setback (Shattuck Avenue) increased from 6 inches to 1 foot, and the interior setback (West) decreased from 31 feet, 8 inches to 27 feet, 8 inches.
- **Lot Coverage and Open Space:** Lot coverage increased from 51% to 52%, and usable open space increased from 7,056 to 7,408 square feet.

Findings

Draft findings for approval can be found in Attachment 2 to the staff report.

Base Project and Density Bonus

The applicant has requested a Density Bonus under the State Density Bonus Law (Govt. Code Section 65915). Under the City's Density Bonus procedures, the "base project[1]" is 142 units, as the maximum allowable density for the site. The base project and the resulting 11-story proposed project both have an average unit size of 528 square feet. By providing 22 Very Low Income (15 percent of the 142 Base Project units) and 8 Moderate Income (5 percent of the 142 Base Project units) on site, the project is eligible for a 70 percent density bonus, or 100 density bonus units (70 percent of the 142 Base Project units). Therefore, the applicant proposes 100 additional units above the base density for a total of 242 dwelling units.

Base Project Units [a]	Qualifying Units	Percent Density Bonus	Number of Density Bonus Units [a]	Proposed Project Units [a]
142	**22 VLI** (15% of Base) + **8 MI** (5% of Base)	70%	**100**	**242**

Notes:
a. Pursuant to Government Code 65915(q), all unit calculations are rounded up to the next whole number.
Abbreviations: % = percent

[1] Per the City's Density Bonus Procedures (DBP), the base project is the largest project allowed on the site that is fully compliant with district development standards (i.e. height, setbacks, usable open space, parking, etc.), or, the *maximum allowable density* for the site. The City uses the DBP to calculate the maximum allowable density for a site where there is no density standard in the zoning district, and to determine the number of units in the proposed project, which is the number of base project units plus the number of density bonus units that can be added according to the percentage of BMR units proposed, per Government Code, Section 65915(f).

Concession and Waivers Pursuant to State Density Bonus Law (CA Govt. Code Section 65915)

The project is entitled to 3 concessions (or incentives) under Government Code Section 65915(d), and an unlimited number of waivers under Section 65915(e).

1. A **concession** is a modification of a development standard that reduces the cost of providing affordable housing. The applicant is requesting two concessions: 1) to reduce the open space requirement, to eliminate the costs of constructing a larger roof deck, and 2) to reduce the long-term bicycle parking requirement, to eliminate the costs of enlarging the bike room and providing additional racks.

   The City may only deny the concession if it finds that the concession would have a specific adverse impact upon public health and safety, or the physical environment, or on any real property listed in the California Register of Historical Resources, and there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact[2] without rendering the development unaffordable to low-income, very-low income, and moderate-income households, or if the concession would be contrary to State or Federal law. Staff has identified no basis for making such a finding.

2. A **waiver** is a modification of a development standard that would otherwise physically preclude the construction of the project with the permitted density bonus and concessions. The applicant is requesting waivers from the following development standards: height (maximum height and rooftop projections), setbacks, lot coverage, and floor-to-area ratio are requested because they are necessary to physically accommodate the full density bonus project on the site.

   The City may only deny the waivers if it finds that the waivers would have a specific adverse impact[3] upon public health and safety, or the physical environment, or on any real property listed in the California Register of Historical Resources, and there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact without rendering the development unaffordable to low-income, very-low income, and moderate-income households, or if the waiver would be contrary to State or Federal law. Staff has not identified any evidence that would support such a finding.

Environmental Review

SB 131 Background

SB 131 was signed by Governor Gavin Newsom on June 30, 2025, and became effective on July 1, 2025. One of the bill's most significant CEQA reforms is the establishment of the "Near Miss" rule, codified in Public Resources Code (PRC) Section 21080.1(b). Under PRC Section 21080.1(b)(1), a housing development project may qualify for the Near Miss rule if it would otherwise be exempt under a statutory exemption or one of several specified categorical exemptions, but for a single condition contained in the applicable exemption or related CEQA

[2] A "specific, adverse impact" means "a significant, quantifiable, direct, and unavoidable impact, based on objective, identified written public health or safety standards, policies, or conditions as they existed on the date the application was deemed complete."

[3] See footnote 2.

Guidelines provisions. For eligible projects, CEQA review is limited to environmental effects caused solely by the single condition that prevents the project from qualifying for the exemption. Pursuant to PRC Section 21080.1(b)(2), any Initial Study or Environmental Impact Report prepared for a qualifying housing project is required to evaluate only those impacts attributable to the disqualifying condition.

SB 131 for the Proposed Project

The project was evaluated for consistency with the Class 32 Infill Development Categorical Exemption pursuant to CEQA Guidelines Section 15332. The project was also reviewed for the exceptions to categorical exemptions identified in CEQA Guidelines Section 15300.2, including cumulative impacts, unusual circumstances, impacts to scenic highways, hazardous waste sites, and historical resources.

Rincon Consultants evaluated the project's consistency with these requirements and the analysis concluded that the project would be eligible for a Class 32 CE with the exception of one criterion in Section 15300.2: the project would be "located on a site which is included on any list compiled pursuant to Section 65962.5 of the Government Code" (CEQA Guidelines Section 15300.2(e)). Therefore, a Focused IS-MND analyzing hazards and hazardous materials was prepared.

Focused IS-MND

As discussed in the Focused IS-MND (Attachment 6), the project site is located in an Environmental Management Area (EMA) as identified by the City's Toxics Management Division (TMD), and recent studies have identified two potential environmental conditions of concern: a leaking underground storage tank (LUST) which has been removed and is a "closed case" as determined by regulatory agencies, and the occurrence of automotive uses at the project site for several decades. A Phase I Environmental Site Assessment (ESA) prepared for the site noted that a limited diesel-range total petroleum hydrocarbon (TPH-d) impact had been identified in groundwater during a 2017 Phase II ESA; however, this condition was determined to be localized and below applicable thresholds. The Phase II ESA concluded that soil and sub-slab soil vapor at the site did not contain contaminants exceeding applicable residential or commercial/industrial environmental screening levels, indicating a low risk for vapor intrusion. As further discussed in the Focused IS-MND implementation of the City's Standard COA related to Toxics, as well as Mitigation Measure HAZ-1, would ensure that potential impacts associated with hazardous materials are reduced to less than significant levels. The Standard COA and Mitigation Measure HAZ-1 would reduce potential hazardous material impacts at the project site below thresholds of significance as determined by applicable oversight agencies by ensuring additional investigation and remedial measures, transportation of impacted materials, and/or site management practices that would protect construction worker safety and the health of future project site residents and users.

Public Comment Period

The Focused IS-MND was circulated for a 30-day public review period from June 9, 2026, through July 9, 2026. The City of Berkeley received 13 comment letters on the Focused IS-MND. Responses to all comments are provided in the Final Focused IS-MND (Attachment 7). As

discussed in the responses, none of the comments raised substantial new information or resulted in changes to the analysis or conclusions presented in the Focused IS-MND.

ADVISORY BODY REVIEW

Landmarks Preservation Commission (LPC) Review: Demolition Referral

The project would demolish a commercial building that is over 40 years in age. As detailed in a Historic Resource Evaluation forms dated October 7, 2022, the building does not meet the eligibility criteria for the California Register or City of Berkeley Landmark. Pursuant to BMC Section 23.326.070(C)(1), the proposed demolition was referred to the LPC for review prior to the consideration of the Use Permit. The LPC reviewed the demolition referral on February 2, 2023, and took no action.

Design Review Committee (DRC) Review: Preliminary Design Review

The DRC conducted Preliminary Design Review (PDR) on March 16, 2023, and forwarded an unfavorable recommendation to the ZAB with conditions and recommendations for Final Design Review (FDR) [MOTION: (Tam, Pink) VOTE (6-0-0-1) Kahn – absent].

Subsequently, the applicant requested a second PDR meeting for DRC to consider a revised design that the applicant prepared in response to the March 16 Conditions and Recommendations. On April 20, 2023, the DRC reviewed the revised design, gave a favorable recommendation on the design as presented, and provided the following direction for Final Design Review: ***Motion: (Kahn, Gaffney) VOTE (6-1-0-0) Finacom – no.***

Conditions

- Provide more detail and recess at the top floor to reduce the apparent height.
- Provide the maximum amount of landscape possible on west property line.
- Show sun shading on the west elevation at FDR.
- Provide more pedestrian interest and articulation at the ground floor levels.
- Present lighting in parking bays at FDR.
- Exterior lighting shall be downcast. Bring details at FDR that show the light impacts from the project will not affect neighbors.
- Provide more detail at FDR on plant palette, acoustics in open spaces, and how vines will work on the exterior wall material.

Recommendations

- Look at interrupting the grid on the façade design in places you want to call attention to.
- Consider bay recess accents.
- Consider railings on outside of the glazing on west elevation, or adding decorative screens.
- Consider a stronger base, or possibly a stronger color
- Consider reduced floor heights, and present this study at FDR.

- Recommend alternate mural location that is more integrated into the building design, such as the ground floor.
- Design should still be more unique, and less uniform.
- Consider a different color at the soffit as a way of celebrating the grid.
- Strongly recommend take out window.

ZAB Issues

- Recommend a common bathroom near the roof deck.
- Consider replacing neighbor's fences on the west property line.
- Provide minimal curb cut width required for both travel directions.
- Improve livability of the hallway and unit interiors.
- Resolve any circulation issues at the intersection, as well as on Newbury; confirm whether this site is included in new Complete Streets plan.

POLICY CONSISTENCY

Housing Accountability Act

Pursuant to the Housing Accountability Act (HAA), California Government Code Section 65589.5(j), when a proposed housing development complies with the applicable, objective general plan and zoning standards, but a local agency proposes to deny the project or approve it only if the density is reduced, the agency must base its decision on written findings supported by substantial evidence that:

1. The development would have a specific adverse impact on public health or safety[4] unless disapproved, or approved at a lower density; and
2. There is no feasible method to satisfactorily mitigate or avoid the specific adverse impact, other than the disapproval, or approval at a lower density.

The project is a "housing development project" consisting of a residential building. The Base Project includes Use Permits and/or Administrative Use Permits[5] to modify the height, setbacks and lot coverage, and complies with applicable, objective general plan and zoning standards. Government Code Section 65589.5(j)(3) provides that a request for a density bonus "shall not constitute a valid basis on which to find a proposed housing development project is inconsistent, not in compliance, or not in conformity, with an applicable plan, program, policy, ordinance, standard, requirement, or other similar provision specified in this subdivision." Therefore, the City may not deny the Base Project or density bonus request or reduce the density with respect to those units without basing its decision on the written findings under Section 65589.5(j), above.

While the project may include other Use Permits or Administrative Use Permits to modify standards not associated with the base project, there are no objective criteria in the findings

[4] See footnote 2.

[5] The City has determined that the "protections afforded by the HAA and the definition of a base project for density bonus calculations apply to a housing development project up to and including the maximum development allowed with use permits and/or administrative use permits."

therefore, the project still complies with the HAA. The ZAB has the discretion to approve, deny, or modify the request according to the zoning findings, provided the action does not reduce the project density or effectively deny the project by making it infeasible, unless the ZAB is also able to make the required findings for denial set forth under Section 65589.5(j), above.

Staff has not identified any adverse impacts that could occur with the construction of the project.

Housing Crisis Act of 2019 – Senate Bill (SB) 330

The Housing Crisis Act, also known as Senate Bill 330, seeks to boost homebuilding throughout the State with a focus on urbanized zones by expediting the approval process for and suspending or eliminating restrictions on housing development. A "housing development project" can include any of the following: residential units only; mixed use consisting of residential and nonresidential uses in which at least two-thirds of the square-footage is designated residential, and transitional or supportive housing. Sections of SB 330 that apply to the proposed project include the following:

1. **Government Code Section 65905.5(a)** states that if a proposed housing development project complies with the applicable, objective general plan and zoning standards in affect at the time an application is deemed complete, then the city shall not conduct more than five hearings in connection with the approval of that housing development project. This includes all public hearings in connection with the approval of the housing development project and any continuances of such public hearings. The city must consider and either approve or disapprove the project at any of the five hearings consistent with applicable timelines under the Permit Streamlining Act (Chapter 4.5 (commencing with Section 65920)).

   Evidence: The project applicant requested a voluntary second DRC meeting, which does not count toward the five hearing limit. Therefore, the October 8, 2026 ZAB hearing represents the fourth public hearing for the proposed project since the project was deemed complete. The City can hold one additional public hearing on this project, if needed, but it must be reserved for any possible appeal to the City Council.

2. **Government Code Section 65913.10(a)** requires that the City determine whether the proposed development project site is a historic site at the time the application for the housing development project is deemed complete. The determination as to whether the parcel is a historic site must remain valid during the pendency of the housing development project, unless any archaeological, paleontological, or tribal cultural resources are encountered during any grading, site disturbance, or building alteration activities.

   Evidence: A historic resource evaluation prepared for the project in October 2022 determined that the property does not appear to be historically significant and therefore is not eligible for listing on the California Register of Historical Resources or as a City of Berkeley Landmark or Structure of Merit. The proposed project would be required to comply with the City's standard conditions of approval, which instruct construction workers to halt work if any unanticipated discovery of archeological, paleontological, or tribal cultural resources are uncovered on the project site during ground disturbing activities.

3. Government Code Section §65950(a)(5) requires a public agency to approve or disapprove a project within 60 days from the date that the Initial Study/Mitigated Negative Declaration is adopted. Should ZAB adopt the IS/MND at the October 8, 2026 public hearing, the application must be approved or disapproved by December 7, 2026.

   Evidence: The project is before the ZAB on October 8, 2026, and a decision will be finalized by the end of the appeal period, 14 days after the ZAB Notice of Decision is issued.

4. Government Code Section 66300(d) prohibits the demolition of residential dwelling units unless the project will create at least as many residential units as will be demolished.

   Evidence: The project does not propose the demolition of housing units. Therefore, Section 66300(d) does not apply to the project.

General Plan Consistency

The 2002 General Plan contains several policies applicable to the project, including the following:

1. **Policy LU-3–Infill Development**: Encourage infill development that is architecturally and environmentally sensitive, embodies principles of sustainable planning and construction, and is compatible with neighboring land uses and architectural design and scale.
2. **Policy LU-7–Neighborhood Quality of Life, Action A**: Require that new development be consistent with zoning standards and compatible with the scale, historic character, and surrounding uses in the area.
3. **Policy LU-23–Transit-Oriented Development**: Encourage and maintain zoning that allows greater commercial and residential density and reduced residential parking requirements in areas with above-average transit service such as Downtown Berkeley.
4. **Policy UD-16–Context**: The design and scale of new or remodeled buildings should respect the built environment in the area, particularly where the character of the built environment is largely defined by an aggregation of historically and architecturally significant buildings.
5. **Policy UD-24–Area Character**: Regulate new construction and alterations to ensure that they are truly compatible with and, where feasible, reinforce the desirable design characteristics of the particular area they are in.
6. **Policy UD-32–Shadows**: New buildings should be designed to minimize impacts on solar access and minimize detrimental shadows.

   Evidence: The project would improve the utilization of the site with development that is of appropriate intensity, that is compatible with the existing surrounding development, and that would further improve the neighborhood character and quality of life by enhancing existing street-level activity, and bringing in new residents and new business patrons to a Neighborhood Commercial area of Shattuck Avenue. The project site is served by multiple bus lines that operate along Shattuck Avenue, and a nearby BART Station. Shadow impacts from the project would be reasonable given the zoning district designations for the site and adjacent properties.

7. **Policy UD-33–Sustainable Design**: Promote environmentally sensitive and sustainable design in new buildings.
8. **Policy H-19–Regional Housing Needs**: Encourage housing production adequate to meet the housing production goals established by ABAG's Regional Housing Needs Determination for Berkeley.
9. **Policy EM-5–"Green" Buildings**: Promote and encourage compliance with "green" building standards. (Also see Policies EM-8, EM-26, EM-35, EM-36, and UD-6.)

   Evidence: The project would help Berkeley meet its regional housing needs by adding 242 net new housing units, including 22 VLI and 8 MI units. The project would be subject to standard conditions of approval that promote sustainable building design, including conditions for solar PV systems, electric vehicle charging, water efficient landscaping, and natural gas prohibitions.

RECOMMENDATION

Because of the project's consistency with the Zoning Ordinance and General Plan, and minimal impact on surrounding properties, staff recommends that the Zoning Adjustments Board:

1. **ADOPT** the Initial Study/Mitigated Negative Declaration and associated Mitigation, Monitoring, and Reporting Program (see Attachment 6); and
2. **APPROVE** ZP2022-0116 pursuant to BMC Section 23.406.040(E) and subject to the attached Findings and Conditions (see Attachments 2 and 3).

March 9,2022 (vesting date)	SB 330 Preliminary Housing Development Project Application deemed complete
September 4, 2022	SB 330 Use Permit Application submitted
December 15, 2022	Application deemed complete
August 5, 2022	CEQA Recommendation by Staff - Exempt
October 2022 – April 2023	Application processing [a]
February 2, 2023	Landmarks Preservation Commission hearing (demo referral)
March 16, 2023	Design Review Committee meeting
April 20, 2023	Design Review Committee meeting
April 13, 2023	Public hearing notices mailed/posted
April 27, 2023	ZAB hearing - Continued
October 10, 2025	SB 131 CEQA exemption requested
June 9 – July 9, 2026	30-day Public Review Period for IS/MND
September 24, 2026	Public hearing notices mailed/posted
October 8, 2026	ZAB hearing
Notes: a. Application processing reflects the project compliance review after the application is deemed complete. Submittals are reviewed within 30 days of receipt, pursuant to the Permit Streamlining Act.	

Table 2: Special Characteristics

Characteristic	Applicability	Explanation
Affordable Child Care Fee for qualifying non-residential projects (Per Resolution 66,618-N.S.)	No	These fees apply to net newly constructed nonresidential gross floor area over 7,500 square feet. The project includes less than 7,500 square feet of net new commercial space. Therefore, the project is not subject to this fee.
Affordable Housing Fee for qualifying non-residential projects (Per Resolution 66,617-N.S.)		
Affordable / Inclusionary Housing Requirements (BMC Chapter 23.328)	Yes	The project is a housing development project, as defined in BMC 23.328.020, and would provide at least 20 percent Below Market Rate (BMR) residential units, pay an in-lieu fee based on the residential unit floor area of the project, or a combination. The project would provide 30 Below Market Rate (BMR) units, including 22 Very Low-Income (VLI) and 8 Moderate-Income (MI) units and would be required to pay an in-lieu fee to satisfy the remainder of the requirement.

Characteristic	Applicability	Explanation
Alcohol Sales/Service	No	The project is not proposing any alcohol sales or service with this permit.
Bird Safe Buildings (BMC Section 23.304.150)	No	The project was vested under the Housing Crisis Act of 2019 prior to the July 27, 2023 effective date of the ordinance, and therefore these provisions do not apply.
Coast Live Oak Trees (BMC Chapter 6.52)	No	There no Coast Live Oak (*Quercus agrifolia*) trees on the project site.
Creeks	No	No creek or culvert, as defined by BMC Chapter 17.08, exists on or within 30 feet of the project site.
Density Bonus	Yes	The project would provide 22 Very Low-Income units (15 percent of the 142 Base Project units) and 8 Moderate Income units (5 percent of the 142 Base Project units), and qualifies for a 70 percent density bonus, or 100 density bonus units (70 percent of the 142 Base Project units). See Analysis section for discussion.
Hard Hats (BMC Chapter 13.107)	No	The project was vested under the Housing Crisis Act of 2019 prior to the January 1, 2024 effective date of the ordinance, and therefore these provisions do not apply.
Historic Resources	No	The project would involve the demolition of a non-residential building that is over 40 years old. The Landmarks Preservation Commission reviewed the demolition referral for the building on February 2, 2023, and took no action to initiate a landmark designation. There are no other known cultural resources (i.e., archaeological or historic) on the site.
Housing Accountability Act (HAA) (Gov't Code Section 65589.5(j))	Yes	The project proposes a mixed-use residential building, and meets the definition of a "Housing Development Project" per Government Code Section 65589.5(h)(2)[b]. The base project complies with applicable, objective general plan and zoning standards, and requests no modifications to development standards beyond waivers and concessions requested under density bonus law. Therefore, section (j) of the Housing Accountability Act /applies, and the project cannot be denied at the density proposed unless the findings for denial can be made. See Policy Consistency Section for additional discussion on compliance with the Housing Accountability Act.
Housing Crisis Act of 2019 (SB 330)	Yes	The project meets the definition of a "Housing Development Project" per Government Code Section 65589.5(h)(2)[b]. See Policy Consistency Section of this report for additional discussion on the sections of SB 330 that apply to the project.
Opportunity Sites	No	The subject site is not identified as an opportunity site in the Housing Element Update.
Public Art	Yes	BMC Chapter 23.316 applies to new mixed-use projects of five or more dwelling units and would apply, especially if the existing mural is removed.
Rent Controlled Units	No	The project would involve the demolition of non-residential structures; no rent-controlled units would be demolished
Residential Preferred Parking (RPP)	No	The site is located in RPP zone "J". The project is not eligible for RPP permits per BMC Section 14.72.080(C)(1) as no permits shall be issued to residents in newly constructed residential units.

Characteristic	Applicability	Explanation
Seismic Hazards (SHMA)	No	The project site is not located within an area susceptible to landslide/liquefaction/fault rupture as shown on the State Seismic Hazard Zones map. [c]
Soil/Groundwater Contamination	Yes	The site is on a Cortese List[d], and a Phase I and Phase II Environmental Site Assessment reports were prepared and incorporated into the IS/MND. The Toxics Management Division will refer this project during building permit review for sign off from the Regional Water Quality Control Board, Department of Toxic Substances Control, or the Alameda County Department of Environmental Health. Also, standard Conditions of Approval related to hazardous materials would apply. See Section 4 of the IS/MND (Attachment 6) for a discussion of potential impacts related to hazards and hazardous materials.
Transit	Yes	The project site is served by multiple bus lines (local, rapid, and Transbay) that operate along Shattuck Avenue, and is 0.25-mile away from the Ashby Bay Area Rapid Transit (BART) Station.

Notes:

a. BMC 23.328.020(E) defines a "Housing Development Project" for purposes of inclusionary housing requirements as "a development project, including a Mixed-Use Residential project involving the new construction of at least one Residential Unit. Projects with one or more buildings or projects including multiple contiguous parcels under common ownership or control shall be considered as a sole Housing Development Project and not as individual projects.

b. Government Code Section 65589.5(h)(2) "Housing development project" means a use consisting of any of the following: (A) residential units only, (B) mixed-use developments consisting of residential and nonresidential uses in which at least two-thirds of the square footage is designated for residential use, and (C) transitional or supportive housing.

c. California Department of Conservation. DOC Maps: Geologic Hazards. Available: https://maps.conservation.ca.gov/geologichazards/

d. Cortese List is an annually updated list of hazardous materials sites complied pursuant Government Code Section 65962.5.

Table 3: South Area Commercial District (C-SA) Development Standards BMC Sections 23.204.100(D) and 23.322 Parking and Loading

Standard		Existing	Addition/ (Reduction)	Proposed Total	Permitted/ Required
Lot Area (sq. ft.)		19,586	n/a	n/a	n/a
Gross Floor Area (sq. ft.)		7,561	124,022	131,583	78,344
Floor Area Ratio		0.4	6.32	6.72	4.0 max.
Lot Coverage (%)		39	13	52	45 max.
Commercial Floor Area (sq. ft.)		7,561	(3,841)	3,720	n/a
Dwelling Units	Total	0	242	242	n/a
	Bedrooms	0	257	257	n/a
Building Height (ft. - in.)	Maximum	14'-0"	111'-2"	125'-2"	36' max.
	Stories	1	10	11	3 max.

Standard		Existing	Addition/ (Reduction)	Proposed Total	Permitted/ Required
Building Setbacks (ft. - in.)	Front (North) (Russell)	4'-2"	(4'-2" to 2'-2")	0' to 2'	15' min.
	Street Side (East) (Shattuck)	1'-10"	(0'-10")	1'-0"	6' to 15' min.
	Interior (West)	3'-3"	24'-5"	27'-8"	4' to 12' min.
	Rear (South)	70'-0"	(68'-7")	1'-5"	15' min.
Usable Open Space (sq. ft.)		n/a	7,408	7,408	9,680 min. (40 sf per du)
Automobile Parking	Commercial (3,720 sq. ft.)	17	(9)	8	8 min. (2 spaces /1,000 sf)
	Residential	0	5	5	0 min./121 max. (0.5 spaces/du max.)
Bicycle Parking	Commercial – Short Term (3,720 sq. ft.)	0	2	2	2 (1 space/2,000 sf)
	Residential [d] – Long Term	0	60	60	86 (1 space/3 bedrooms)
	Residential [d] – Short Term	0	6	8	6 (1 space/40 bedrooms)

_____ = Concession or Waiver requested to modify the district standard

Abbreviations: sq. ft. = square feet; max. = maximum; min. = minimum; n/a = not applicable; % = percent; avg. = average, ft = feet ('), in. = inches (")

Notes:

1. AB-2097, effective January 1, 2023, prohibits local jurisdictions from requiring minimum parking for most non-residential uses located within a 1/2 mile of public transit.

Zoning Adjustments Board Findings

App #ZP2022-0116
Use Permit for a Project at 2900-20 Shattuck Avenue

October 8, 2026

Project Facts	Project Description:
Applicant: Isaiah Stackhouse, SDT Architects **Property Owner**: 2900 Shattuck Avenue LLC **Project Address:** 2900-20 Shattuck Avenue **Site Size:** 0.45 acres (19,586 sf) **GP Land Use:** Neighborhood Commercial (NC) **Zoning:** South Area Commercial District (C-SA) **CEQA:** Initial Study/Mitigated Negative Declaration (IS/MND) and Mitigation, Monitoring, and Reporting Program (MMRP) prepared pursuant to Public Resources Code (PRC) Section 21080.1(b) **Vesting Date:** March 9, 2022 **Submittal Date:** September 4, 2022 **Date Deemed Complete:** December 15, 2022 **Project Planner:** Singeh Saliki	The applicant is seeking approval to demolish a commercial building and construct an 11-story (125 feet, 2 inches), 131,583-square-foot, mixed-use building with 242 dwelling units (including 22 Very Low-Income and 8 Moderate Income Density Bonus qualifying units), 3,720 square feet of commercial space, 13 vehicle parking spaces, and 70 bicycle parking spaces. Since the project was reviewed by the Zoning Adjustment Board (ZAB) on April 27, 2023, when the hearing was continued to allow for the preparation of an Initial Study, the applicant revised the design as follows: • **Building Height**: Increased from 10 to 11 stories, and from 110 feet, 4 inches to 125 feet, 2 inches. • **Density and Units**: Unit count increased from 221 to 242 dwelling units; the affordable housing component expanded from 22 Very Low-Income units to 22 Very Low-Income and 8 Moderate-Income units, and the density bonus increased from 46.25% to 70%. • **Floor Area and FAR**: Gross floor area increased from 113,948 to 131,583 square feet, increasing the FAR from 5.82 to 6.72. • **Parking**: Vehicle parking increased from 9 to 13 spaces, now accommodated using parking stackers. • **Commercial Space**: Ground-floor commercial area decreased from 4,090 to 3,720 square feet. • **Setbacks**: The street side setback (Shattuck Avenue) increased from 6 inches to 1 foot, and the interior setback (West) decreased from 31 feet, 8 inches to 27 feet, 8 inches. • **Lot Coverage and Open Space**: Lot coverage increased from 51% to 52%, and usable open space increased from 7,056 to 7,408 square feet.

	Zoning Permits Requested:
	1. **Demolition.** Use permit under Berkeley Municipal Code (BMC) Section 23.326.070(A) **"Main Non-Residential Building"** to demolish a non-residential building. (UPPH) * 2. **New Construction.** Use permit under BMC Section 23.204.020 (A) **"Allowed Land Uses"** to construct a new mixed-use development. (UPPH) 3. **New Construction.** Use permit under BMC Section 23.204.020(A) **"Allowed Land Uses"** to construct dwelling units. (UPPH) 4. **New Floor Area.** Use permit under BMC Section 23.204.030(A)(1) **"Floor Area Permit Requirements"** to create new floor area of 3,000 square feet or more. (UPPH) 5. **Modification for Mixed Use and Residential Projects.** Use permit under BMC Section 23.204.100(D)(3) to modify development standards for height, setback, and lot coverage requirements. (UPPH) * 6. **Height Projection** Administrative use permit under BMC Section 23.304.050 (A) **"Projections Above Height Limits"** to allow architectural elements in the form of a rooftop projection to exceed the district height limit. (AUP) *Denotes required findings.

Density Bonus

Waivers Requested:

1. **Height.** Waiver of BMC Section 23.204.100(D) to exceed building height limits – to be 125'-2", and 11 stories. (no maximum in Base with UP)
2. **Lot Line Setback.** Waiver of BMC Section 23.204.100(D) to reduce the front setback to 0', street side setback to 1'-0", and rear setback to 1'-5". (no minimum in Base with UP)
3. **Lot Coverage.** Waiver of BMC Section 23.204.100(D) to increase lot coverage to 52 percent. (no maximum in Base with UP)
4. **Floor Area Ratio.** Waiver of BMC Section 23.204.100(D) to increase floor area ratio (FAR) to 6.72, where 4.0 is the limit.

Concessions Requested:

1. **Usable Open Space.** Concession to reduce the open space requirement – to provide 7,408 square feet where 9,680 square feet is required – to eliminate the costs of constructing a larger roof deck.
2. **Bicycle Parking.** Concession to reduce the long-term bicycle parking requirement – to provide 60 spaces where 86 spaces are required – to eliminate the costs of enlarging the bike room and providing additional racks.

Staff Recommendation

Staff recommends that ZAB adopt the Initial Study/Mitigated Negative Declaration (IS/MND) and Mitigation, Monitoring and Reporting Program (MMRP)and approve ZP2022-0116 pursuant to BMC Section 23.406.040 (E) (1-5) "**Findings for Approval**" and subject to the attached Findings and Conditions of Approval.

Zoning Adjustments Board Findings

CEQA

In accordance with the CEQA (Section 21000 et seq.) and the State CEQA Guidelines (California Code of Regulations [CCR], Title 14, Section 15000 et seq.), an Initial Study (IS) was prepared to evaluate the potential environmental effects associated with the construction and operation of the project. The IS included a description of the proposed project, evaluated each of the environmental issue areas identified in the environmental checklist form and recommended a Mitigated Negative Declaration (MND) with standard conditions and mitigation measures to reduce or avoid the project's potential significant adverse impacts on the environment.

In accordance with CEQA Guidelines Section 15105(b), the project was posted for public review for a period of 30 days, from June 9, 2026 to July 9, 2026. The City filed a Notice of Completion and Notice of Implementation (NOI) for the Final IS/MND with the California State Clearinghouse (SCH#202606302). The City also posted the NOI with the County Clerk and mailed the notice to all property owners within a 300-foot radius. No substantive changes to the Draft IS/MND resulted.

A total of 13 comment letters/responses were received during the public review period. None of the comments presented substantial evidence of a fair argument that the project may have a significant impact on the environment. The Final IS/MND includes responses to all comments received. All public comments shall be considered by ZAB prior to deciding on the project.

As stated in the Focused IS-MND, implementation of the City's Standard COA related to Toxics, as well as Mitigation Measure HAZ-1, would ensure that potential impacts associated with hazardous materials are reduced to less than significant levels.

FINDINGS FOR APPROVAL

As required by BMC Section 23.406.040 (E) (1-4) "Findings for Approval," the following findings shall be made:

1. To approve a Use Permit, the ZAB shall find that the proposed project or use:
    (a) Will not be detrimental to the health, safety, peace, morals, comfort, or general welfare of persons residing or visiting in the area or neighborhood of the proposed use; and

    Evidence: The project will not be detrimental to the health, safety, peace, morals, comfort, or general welfare of persons residing or visiting in the area or neighborhood because the project is consistent with all applicable C-SA District standards and

qualifies for concessions and waivers for the listed district standards granted pursuant to State Density Bonus, Government Code, Section 65915. The proposed project use is consistent with the C-SA district purposes of encouragement of residential development and the encouragement of mixed-use development.

(b) Will not be detrimental or injurious to property and improvements of the adjacent properties, the surrounding area or neighborhood, or to the general welfare of the City.

Evidence: The project will not be detrimental or injurious to property and improvements of the adjacent properties, the surrounding area or neighborhood, or to the general welfare of the City because the proposed 11-story mixed-use building provides housing, including below market rate units, which would complement existing land uses in the surrounding area. In addition, the findings for required discretionary permits are satisfied per the Evidence in 2 and 3 below.

2. To approve the Use Permit, the ZAB must also make any other Use Permit findings specifically required by the Zoning Ordinance for the proposed project.

Demolition

Pursuant to BMC Section 23.326.070(D) "Demolitions of Non-Residential Buildings," a Use Permit for demolition of a main building used for non-residential purposes on any lot in a non-residential district may be approved only if the ZAB finds that:

1. The demolition will not be materially detrimental to the commercial needs and public interest of any affected neighborhood or the City of Berkeley; and
2. The demolition:
    a) Is required to allow a proposed new building or other proposed new use;
    b) Will remove a building which is unusable for activities which are compatible with the purposes of the district in which it is located or which is infeasible to modify for such uses;
    c) Will remove a structure which represents an uninhabitable attractive nuisance to the public; or
    d) Is required for the furtherance of specific plans or projects sponsored by the City of Berkeley or other local district or authority upon a demonstration by the applicant that it would be infeasible to obtain prior or concurrent approval for the new construction or new use.

Evidence: The current uses in the buildings on the site are auto repair and hardware store, totaling 7,561 square feet of commercial area. The demolition of these buildings is proposed to allow the development of a new mixed-use building that includes 3,720 square feet of retail area and 242 dwelling units. The proposed project furthers the

purposes of the C-SA district that encourage mixed-use development combining convenient, low-intensity, community-serving businesses with residential development that has the convenience of location and more open space than is available in the Downtown.

Density Bonus

Pursuant to Government Code Section 65915, the Zoning Adjustments Board finds that:

1. Under the City's methodology for implementing density bonuses, the base project consists of 142 units;
2. The project will provide at least 22 Very Low-Income and 8 Moderate Income qualifying units in the 142-unit base project, as more fully set forth in Condition "Below Market Rate Units";
3. The project is entitled to a density increase of 70 percent over the otherwise maximum allowable residential density under the Zoning Ordinance and General Plan Land Use Element, under the requirements of Government Code Section 65915(b) and (f), plus three concessions or incentives. This equates to a density bonus of up to 100 units above the base project, for a total of up to 242 units.

A. In accordance with Government Code Section 65915(d) and (k), the Zoning Adjustments Board hereby grants the following concessions in order to provide for affordable housing costs:

   1. **Usable Open Space**. Concession to reduce the open space requirement – to provide 7,408 square feet where 9,680 square feet is required – to eliminate the costs of constructing a larger roof deck; and

   2. **Bicycle Parking**. Concession to reduce the long-term bicycle parking requirement – to provide 60 spaces where 86 spaces are required – to eliminate the costs of enlarging the bike room and providing additional racks.

B. In accordance with Government Code Section 65915(d), in order to allow construction of the proposed project with the density permitted under State law, the Zoning Adjustments Board finds that the approval of the concessions is required to provide for affordable housing costs, as provided in Government Code Section 65915(d)(1)(A) because 1) approval of the concession would result in identifiable and actual cost reduction; 2) approval of the concession would not have a specific adverse impact upon public health and safety, or the physical environment, or on any real property listed in the California Register of Historical Resources; and 3) would not be contrary to State or Federal law.

C. In accordance with Government Code Section 65915(e) the Zoning Adjustments Board hereby grants the following waivers to modify development standards as necessary to accommodate these density bonus units.

a. Height. Waiver of BMC Section 23.204.100(D) to exceed building height limits – to be 125'-2", and 11 stories. (no maximum in Base with UP); and
b. Lot Line Setback. Waiver of BMC Section 23.204.100(D) to reduce the front setback to 0', street side setback to 1'-0", and rear setback to 1'-5"; and
c. Lot Coverage. Waiver of BMC Section 23.204.100(D) to increase lot coverage to 52 percent; and
d. Floor Area Ratio. Waiver of BMC Section 23.204.100(D) to increase floor area ratio (FAR) to 6.72, where 4.0 is the limit.

These waivers are required because state law requires the City to modify development standards as necessary to accommodate these density bonus units, and because the Zoning Adjustments Board hereby finds that the density bonus units can best be accommodated by granting these waivers.

D. In accordance with Government Code Section 65915(e), in order to allow construction of the proposed project with the density permitted under State law, the Zoning Adjustments Board finds that the approval of waivers is required 1) to construct the proposed project at the density permitted under State law; 2) approval of requested waivers will not have a specific adverse impact upon public health and safety, or the physical environment, or on any real property listed in the California Register of Historical Resources; and 3) approval of the requested waivers will not be contrary to State or Federal law.

Housing Accountability Act

The Housing Accountability Act, Government Code Section 65589.5(j) requires that when a proposed housing development complies with applicable, objective general plan and zoning standards, a local agency may not deny the project or approve it with reduced density unless the agency makes written findings supported by substantial evidence that: (1) the development would have a specific adverse impact on public health or safety unless disapproved or approved at a lower density; and (2) there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact, other than the disapproval or approval at a lower density.

Evidence: The project includes construction of 242 dwelling units. Because the base project would comply with applicable, objective general plan and zoning standards, Section 65589.5(j) does apply to this project. No significant, quantifiable, direct and unavoidable impacts, based on objective, identified written public health or safety standards, polices, or conditions, have been identified.

Use Permit in C-SA District

Pursuant to BMC 23.204.100(E), "Findings," to approve an AUP or Use Permit for a project in the C-SA district, the review authority must make the findings in Section 23.406.040 (Use Permits) and find that the proposed use or structure:

1. Is compatible with the purposes of the district;

Evidence: The proposed mixed-use building at this location would be an appropriate utilization of the currently underutilized site, bringing 242 new residential units (including 22 VLI and 8 MI units) and 3,720 square feet of retail area to the district and the neighborhood. By combining ground-floor retail with residential units above, the project encourages appropriate mixed-use development on a site well suited to that pattern. The residential component provides housing for persons seeking both the convenience of the location and more open space than is available in the Downtown, while the retail space offers a location for a community-serving business that adds to the variety of goods and services available in South Berkeley. By increasing the neighborhood population with new residents of mixed income who would patronize local businesses, the project would help engage the adjacent residential neighborhood (R-4) to the west and encourage pedestrian traffic on the streets consistent with the district's pedestrian-oriented objectives. These outcomes together support the project's compatibility with the purposes of the district and contribute to the livability and character of the neighborhood.

2. Is compatible in design and character with the district and the adjacent residential neighborhoods; and

Evidence: At 11 stories tall, the proposed project would be taller and larger than the existing one- and two-story residential and commercial buildings in the vicinity. The building design was revised to incorporate DRC-recommended design changes (from the March 16, 2023 meeting) to increase compatibility with the neighborhood, consistent with the district's emphasis on lower-intensity, transition-scale development. The building steps down toward the west at the top floor with a 3,698-square-foot deck, and provides a 27-foot, 8-inch setback from the west property line to buffer the transition to the residential neighborhood to the west. Privacy fencing and plantings would line the western edge of the project on the ground and the 2,266-square-foot garden at the southwest corner of the site. The building also steps down toward the corner of Shattuck Avenue and Russell Street at the top floor with a 1,045-square-foot deck to reduce the overall massing. The building’s west and east facades are articulated with alternating projected window bays on floors two through eleven, to reduce perceived building mass and scale.

3. Will not result in the domination of one type of commercial/retail use in any one area of the district.

Evidence: Nearby commercial uses include a grocery store, copy shop, medical and general offices, cafés and a gas station. The proposed retail space would add to this mix without resulting in the domination of one type of commercial/retail use in any one area of the C-SA district.

Modification for Mixed Use and Residential Projects

Pursuant to BMC Section 23.204.100(D)(3), the ZAB may modify C-SA development standards--excluding FAR--for a mixed-use or residential-only project with a Use Permit upon making **one of the following findings**:

a) The project encourages utilization of public transit and existing off-street parking facilities in the area of the proposed building;
Evidence: By providing the minimum requirement of eight commercial parking spaces and five residential parking spaces, where none are required and 121 spaces is the maximum allowed, the project encourages the use of public and alternative modes of transit and existing parking facilities. The project site is served by several Alameda County (AC) Transit bus lines that operate along Shattuck Avenue and is 0.25 miles from the Ashby BART station.

b) The modification allows consistency with the building setbacks existing in the immediate area where a residential building setback would not serve a useful purpose;
Evidence: The modification of setbacks allows the project to concentrate building massing toward the commercial frontage and away from the residential district to the west, to increase compatibility with the existing uses in the vicinity, while allowing the density bonus project with 30 affordable units (22 VLI and 8 MI units) to be developed.

c) The modification facilitates the construction of affordable housing as defined by the U.S. Department of Housing and Urban Development (HUD) Guidelines; or
Evidence: N/A

d) The modification provides consistency with the purposes of the district as listed in Section 23.204.100.A (District Purpose).
Evidence: By combining ground-floor retail with residential units above, the project encourages appropriate mixed-use development on a site well suited to that pattern. The residential component provides housing for persons seeking both the convenience of the location and more open space than is available in the Downtown, while the retail space offers a location for a community-serving business that adds to the variety of goods and services available in South Berkeley.

3. When taking action on a Use Permit, the ZAB shall consider in its findings:

(a) The proposed land use; and

Evidence: The proposed mixed-use residential development meets the findings for approval because it is an allowed land use in the C-SA district and will provide housing and commercial uses desired by the community. The project implements

the General Plan's Neighborhood Commercial land use designation by redeveloping an underutilized site with a mixed-use building that is compatible with the surrounding development pattern.

(b) The structure or addition that accommodates the use.

Evidence: The proposed 11-story mixed-use building meets the findings for approval because it meets the C-SA District development standards, with waivers to allow for a State Density Bonus. The building places ground-floor commercial space along Shattuck Avenue, supporting the district's goal of encouraging development and amenities that support pedestrian-oriented uses.

4. Required findings shall be made based on the circumstances existing at the time a decision is made on the application.

Evidence: The required findings are satisfied because the project has been determined to be fully compliant with all applicable regulations based on the project plans submitted on September 30, 2026 and evaluated based on the existing conditions of the subject site and surrounding neighborhood at the time of decision.

STANDARD CONDITIONS OF APPROVAL
APPLICABILITY

Development projects approved through the City of Berkeley are subject to Standard Conditions of Approval (Standard COAs). The City of Berkeley has established Standard COAs that identify requirements for the construction and operation of the approved project. This includes general administrative conditions, permitting requirements, project construction and the regulation of on-going, on-site uses. Compliance requirements with the Berkeley Municipal Code, building permit review and issuance process, construction, final inspection requirements, certificate of occupancy, and on-going operations of the approved use are included in this document.

The Standard COAs may vary based on site size, location, environmental settings, topography, historic alteration or approved uses. Variations in the application of the Standard COAs may occur based on the project scope and site-specific characteristics including but not limited to parcel size, location, topography, and use.

Conditions which have specified thresholds due to size, uses, and other characteristics are identified.

Part I. Administrative Conditions
- A. General Project Conditions
- B. Project Specific Conditions
- C. Final Approval Conditions
- D. On-Going Operational Conditions

Part II. Prior to Issuance of Demolition Permit

Part III. At the Time of Building Permit Submittal

Part IV. Prior to Issuance of Building Permit
- A. Building & Safety/Land Use Planning
- B. Public Works
- C. Toxics
- D. Health Housing Community Services
- E. Rent Stabilization Board – Not Applicable

Part V. During Demolition/Construction
- A. Building & Safety
- B. Land Use Planning
- C. Public Works
- D. Toxics
- E. Health Housing Community Services

Part X. HARD HATS – Not Applicable

Site Address: 2900-20 Shattuck Avenue
Application Number: ZP2022-0116
Project Description: The applicant is seeking approval to demolish a commercial building and construct an 11-story (125 feet, 2 inches), 131,583-square-foot, mixed-use building with 242 dwelling units (including 22 Very Low-Income and 8 Moderate Income Density Bonus qualifying units), 3,720 square feet of commercial space, 13 vehicle parking spaces, and 70 bicycle parking spaces.

The approved project at 2900-20 Shattuck Avenue includes the following distribution of Below Market Rate (BMR) units.

Required Minimum BMR Units Per Code					BMR Proposal per Affordability Level
Code Section	**BMC Chapter 23.328 (Inclusionary Housing)[a]**	**State Density Bonus Law (Gov. Code Section 65915)[b]**	**State Replacement SB330/DBL[b]**	**BMC Chapter 23.326 (Demolition Ordinance) Replacement[a]**	
Extremely-Low Income (=<30% AMI)					
Very-Low Income (31%-50% AMI)	22	22			**22**
Low-Income (51%-80% AMI)	In-lieu Fee[c]				
Moderate-Income (81%-100% AMI)		8			**8**
Total BMRs in Project					**30**

Notes:
[a] These units shall satisfy requirements for equivalency, even unit distribution and a term of affordability in perpetuity per the Inclusionary Ordinance (BMC Chapter 23.328) and Demolition Ordinance (BMC Chapter 23.326).
[b] These units shall satisfy requirements for equivalency and a term of affordability for at least 55 years per State Density Bonus law (Government Code Section 65915).
[c] The Inclusionary Housing Low-Income unit requirement will be paid with an in-lieu fee. See the project Affordable Housing Compliance Plan for details.

LAND USE PLANNING

CONDITIONS OF APPROVAL

Property Address: 2900-20 Shattuck Avenue
Application Number: #ZP2022-0116

I. Administrative Conditions A. General Project Conditions		Regulation Source	Timing/Implementation	Enforcement/ Monitoring
1.	**Project Approval.** This Project approval is for 2900-20 Shattuck Avenue, as substantially shown and described on the Project plans dated September 30, 2026, except as required to be modified by Conditions of Approval herein and plans as presented to the Zoning Adjustments Board on October 10, 2026 ("Approval Date."). This Project vested on March 9, 2022 through PLN2022-0016. For any Condition herein that requires preparation of a Final Plan where the project applicant has submitted a conceptual plan, the Project applicant shall submit final plan(s) in substantial conformance with the conceptual plan and incorporate any required modifications.	City of Berkeley	On-Going	Land Use Planning
2.	**Approval Limited to Proposed Project and Replacement of Existing Uses.** This Use Permit authorizes only the Proposed Project described in the application. This project approval does not authorize other uses, structures or activities not included in the Project Description. When the City approves a new use that replaces an existing use, any prior approval of the existing use becomes null and void when permits for the new use are exercised (e.g., building permit or business license issued). To reestablish the previously existing use, an applicant shall obtain all permits required by the Zoning Ordinance for the use. (BMC Sections 23.404.060.B.1 and 2)	City of Berkeley BMC Sections 23.404.060	On-Going	Land Use Planning
3.	**Compliance Required.** All land uses and structures in the City of Berkeley shall comply with the Zoning Ordinance and all applicable City ordinances and regulations.	City of Berkeley BMC Section 23.102.050(B)	On-Going	Land Use Planning
4.	**Other Regulations.** Compliance with the Zoning Ordinance does not relieve an applicant from requirements to comply with other federal, state, and City regulations that also apply to the property.	City of Berkeley BMC Section 23.102.050 (E)	On-Going	Land Use Planning
5.	**Conformance with Approved Plans.** All work performed under an approved Use Permit shall follow the approved plans as presented to ZAB on October 8, 2026 and pursuant to the Conditions of Approval.	City of Berkeley BMC Section 23.404.060 (B)(4)	On-Going	Land Use Planning

LAND USE PLANNING

CONDITIONS OF APPROVAL

Property Address: 2900-20 Shattuck Avenue
Application Number: #ZP2022-0116

I. Administrative Conditions A. General Project Conditions		Regulation Source	Timing/Implementation	Enforcement/ Monitoring
6.	**Permit Modifications.** No change in the use or structure for which this Permit is issued is permitted unless the Permit is modified by the Zoning Adjustments Board. The Zoning Officer may approve changes to plans approved by the Board which reduce the size of the Project, consistent with the Board's policy adopted on May 24, 1978.	City of Berkeley BMC Section 23.404.070	On-Going	Land Use Planning
7.	**Permit Revocation.** The City may revoke or modify a discretionary permit for completed projects due to: 1) Violations of permit requirements; 2) Changes to the approved project; and/or 3) Vacancy for one year or more. No lawful residential use can lapse, regardless of the length of time of the vacancy. Proceedings to revoke or modify a permit may be initiated by the Zoning Officer, Zoning Adjustments Board, or City Council referral.	City of Berkeley BMC Section 23.404.080	On-Going	Land Use Planning
8.	**Permit Remains Effective for Vacant Property.** Once a permit for a use is exercised and the use is established, the permit authorizing the use remains effective even if the property becomes vacant. The same use as allowed by the original permit may be re-established without obtaining a new permit, except as set forth in Standard COA #6 above.	City of Berkeley BMC Section 23.404.060	On-Going	Land Use Planning

Property Address: 2900-20 Shattuck Avenue
Application Number: #ZP2022-0116

I. Administrative Conditions A. General Project Conditions		Regulation Source	Timing/Implementation	Enforcement/ Monitoring
9.	**Exercise and Expiration of Permits** A permit authorizing a land use is exercised when both a valid City business license is issued (if required) and the land use is established on the property. A. A permit authorizing a land use is exercised when both a valid City business license is issued (if required) and the land use is established on the property. B. A permit authorizing construction is exercised when both a valid City building permit (if required) is issued and construction has lawfully begun. C. The Zoning Officer may declare a permit lapsed if it is not exercised within one year of its issuance, except if the applicant has applied for a building permit or has made a substantial good faith effort to obtain a building permit and begin construction. The Zoning Officer may declare a permit lapsed only after 14 days written notice to the applicant. A determination that a permit has lapsed may be appealed to the Zoning Adjustments Board in accordance with Chapter 23.410 (Appeals and Certification). D. A permit declared lapsed shall be void and of no further force and effect. To establish the use or structure authorized by the lapsed permit, an applicant shall apply for and receive City approval of a new permit.	City of Berkeley BMC Section 23.404.060 (C)	On-Going	Land Use Planning

Application Number: #ZP2022-0116

I. Administrative Conditions A. General Project Conditions		Regulation Source	Timing/Implementation	Enforcement/ Monitoring
10.	**Hold Harmless.** The permittee agrees as a Condition of Approval of this application to indemnify, protect, defend with counsel selected by the City, and hold harmless, the City, and any agency or instrumentality thereof, and its elected and appointed officials, officers, employees and agents, from and against any and all liabilities, claims, actions, causes of action, proceedings, suits, damages, judgments, liens, levies, costs and expenses of whatever nature, including reasonable attorney's fees and disbursements (collectively, "Claims") arising out of or in any way relating to the approval of this application, any actions taken by the City related to this entitlement, or any environmental review conducted under the California Environmental Quality Act, Public Resources Code Section 210000 et seq., for this entitlement and related actions. The indemnification shall include any Claims that may be asserted by any person or entity, including the permittee, arising out of or in connection with the approval of this application, whether or not there is concurrent, passive or active negligence on the part of the City, and any agency or instrumentality thereof, and its elected and appointed officials, officers, employees and agents. The permittee's duty to defend the City shall not apply in those instances when the permittee has asserted the Claims, although the permittee shall still have a duty to indemnify, protect and hold harmless the City.	City of Berkeley	On-Going	Land Use Planning
11.	**Compliance with Conditions of Approval and Environmental Mitigations**. The Building Permit application is subject to verification of compliance of these Conditions of Approval and any applicable Mitigation Measures. The applicant shall be responsible for demonstrating compliance with all Conditions of Approval per the timeline set forth by this Permit.	City of Berkeley	On-Going	Land Use Planning

II. Prior to Issuance of Demolition Permit		Regulation Source	Timing/Implementation	Enforcement/ Monitoring
3.	**Construction Noise Management - Public Notice Required**. At least two weeks prior to initiating any construction activities at the site, the applicant shall provide notice to businesses and residents within **500 feet** of the project site. This notice shall at a minimum provide the following: (1) Project Description, (2) description of construction activities during extended work hours and reason for extended hours, (3) daily construction schedule (i.e., time of day) and expected duration (number of months), (4) the name, e-mail, and phone number of the Project Liaison for the Project that is responsible for responding to any local complaints, and (5) that construction work is about to commence. The liaison would determine the cause of all construction-related complaints (e.g., starting too early, bad muffler, worker parking, etc.) and institute reasonable measures to correct the problem. A copy of such notice and methodology for distributing the notice shall be provided in advance to the City for review and approval.	City of Berkeley	Prior to Demolition Permit Issuance (At least Two Weeks Prior to Construction Commencement)	Building & Safety Division
4.	**Construction Phases**. The applicant shall provide the Zoning Officer with a schedule of major construction phases with start dates and expected duration, a description of the activities and anticipated noise levels of each phase, and the name(s) and phone number(s) of the individual(s) directly supervising each phase. The Zoning Officer or their designee shall have the authority to require an on-site meeting with these individuals as necessary to ensure compliance with these Conditions of Approval. The applicant shall notify the Zoning Officer of any changes to this schedule as soon as possible.	City of Berkeley	Prior to Demolition Permit Issuance	Building & Safety/Land Use Planning

II. Prior to Issuance of Demolition Permit		Regulation Source	Timing/Implementation	Enforcement/ Monitoring
5.	**HVAC Noise Reduction.** Prior to the issuance of building permits, the Project applicant shall submit plans that show the location, type, and design of proposed heating, ventilation, and cooling (HVAC) equipment. In addition, the applicant shall provide product specification sheets or a report from a qualified acoustical consultant showing that operation of the proposed HVAC equipment will meet the City's exterior noise requirements in BMC Section 13.40.050. The City's Planning and Development Department shall review the submitted plans, including the selected HVAC equipment, to verify compliance with exterior noise standards.	City of Berkeley BMC Section 13.40.050	Prior to Demolition Permit Issuance	Building & Safety/Land Use Planning
6.	**Condition and Compliance Monitoring.** The applicant shall pay a $22,000 deposit for the cost of monitoring compliance with the Conditions of Approval and other applicable conditions and regulations prior to issuance of building permit. City staff shall obtain a scope and cost from a pre-approved consultant to conduct required monitoring compliance. If compliance-monitoring expenses exceed the initial deposit, the applicant shall deposit additional funds to cover such additional expenses prior to the initiation of monitoring compliance. The City shall not issue a notice-to-proceed until all funds are deposited. Any unused deposit will be refunded to the applicant.	City of Berkeley	Prior to Demolition Permit Issuance	Land Use Planning
7.	**Erosion Prevention Plan.** Prior to any excavation, grading, clearing, or other activities involving soil disturbance during the rainy season, the applicant shall obtain approval of an erosion prevention plan from the Building and Safety Division and the Public Works Department. The applicant shall be responsible for following these and any other measures required by the Building and Safety Division and the Public Works Department.	City of Berkeley	Prior to Demolition Permit Issuance	Building & Safety/Public Works
8.	**Construction and Demolition Diversion.** The applicant shall submit a Construction Waste Management Plan that meets the requirements of BMC Chapter 19.37 "Berkeley Green Code" including 100 percent diversion of asphalt, concrete, excavated soil and land-clearing debris and a minimum of 65 percent diversion of other nonhazardous construction and demolition waste.	City of Berkeley BMC Chapter 19.37	Prior to Demolition Permit Issuance	Building & Safety/Public Works

10.	**Soil and Groundwater Management Plan.** A site-specific Soil and Groundwater Management Plan (SGMP) shall be submitted to TMD for all non-residential projects, and residential or mixed-use projects with more than four dwelling units, that: (1) are in the Environmental Management Area (EMA), as shown on the most recent City of Berkeley EMA map, and (2) propose any excavations deeper than 5 feet below grade or if significant soils removal is anticipated. The SGMP shall be submitted to the TMD with the project's building permit application and shall be approved by TMD prior to issuance of the building permit. The SGMP shall comply with the hazardous materials and waste management standards required by Berkeley Municipal Code Section (BMC) 15.12.100, the stormwater pollution prevention requirements of San Francisco Bay Regional Water Quality Control Board's Order No. R2-2009-0074, California hazardous waste generator regulations (Title 22 California Code of Regulations (CCR) 66260 et seq.), and the East Bay Municipal Utility District's Ordinance 311, and shall include the following: i. procedures for soil and groundwater management including identification of pollutants and disposal methods; ii. procedures to manage odors, dust and other potential nuisance conditions expected during development; iii. notification to TMD within 24 hours of the discovery of any previously undiscovered contamination; and iv. the name and phone number of the individual responsible for implementing the SGMP and who will respond to community questions or complaints. TMD may require additional information or impose additional conditions as deemed necessary to protect human health and the environment. All requirements of the approved SGMP shall be deemed conditions of approval.	City of Berkeley	Prior to Demolition Permit Issuance	Toxics Management Division

11.	**Construction Noise Reduction Program**. The applicant shall develop a site-specific noise reduction program prepared by a qualified acoustical consultant to reduce construction noise impacts to the maximum extent feasible, subject to review and approval of the Zoning Officer. The noise reduction program shall include the time limits compliance with BMC Section 13.40.070. The noise reduction program should include, but shall not be limited to, the following available controls to reduce construction noise levels as low as practical: A. Construction equipment should be well maintained and used judiciously to be as quiet as practical. B. Equip with all internal combustion engine-driven equipment with mufflers, which are in good condition and appropriate for the equipment. C. Utilize "quiet" models of air compressors and other stationary noise sources where technology exists. Select hydraulically or electrically powered equipment and avoid pneumatically powered equipment where feasible. D. Locate stationary noise-generating equipment as far as possible from sensitive receptors. Construct temporary noise barriers or partial enclosures to acoustically shield such equipment where feasible. E. Prohibit unnecessary idling of internal combustion engines. F. If impact pile driving is required, pre-drill foundation pile holes to minimize the number of impacts required to seat the pile. G. Construct solid plywood fences around construction sites adjacent to operational business, residences or other noise-sensitive land uses where the noise control plan analysis determines that a barrier would be effective at reducing noise. H. Erect temporary noise control blanket barriers, if necessary, along building facades facing construction sites. This mitigation would only be necessary if conflicts occurred which were irresolvable by proper scheduling. I. Route construction related traffic along major roadways and away from sensitive receptors where feasible.	City of Berkeley BMC Section 13.40.070	Prior to Demolition Permit Issuance	Zoning Officer

II. Prior to Issuance of Demolition Permit		Regulation Source	Timing/Implementation	Enforcement/ Monitoring
12.	**Damage Due to Construction Vibration.** The Project applicant shall submit screening level analysis prior to demolition permit issuance. The analysis shall account for project specific information including the composition of the structures, location of the various types of equipment used during each phase of the Project, as well as the soil characteristics in the Project area, in order to determine whether Project construction may cause damage to any of the structures identified as potentially impacted in the screening level analysis. • If a screening level analysis shows that the Project has the potential to result in damage to structures, a structural engineer or other appropriate professional shall be retained to prepare a vibration impact assessment (assessment). • If the assessment finds that the Project may cause damage to nearby structures, the structural engineer or other appropriate professional shall recommend design means and methods of construction to avoid the potential damage, if feasible. The assessment and its recommendations shall be reviewed and approved by the Building and Safety Division and the Zoning Officer. If there are no feasible design means or methods to eliminate the potential for damage, the structural engineer or other appropriate professional shall undertake an existing conditions study (study) of any structures (or, in case of large buildings, of the portions of the structures) that may experience damage. This study shall include: ○ Establish the baseline condition of these structures, including, but not limited to, the location and extent of any visible cracks or spalls; and ○ include written descriptions and photographs. III. At the Time of Building Permit Submittal		Regulation Source	Timing/Implementation	Enforcement/ Monitoring
1.	**Public Works ADA.** Plans submitted for building permit shall include replacement of sidewalk, curb, gutter, and other streetscape improvements, as necessary to comply with current City of Berkeley standards for accessibility.	City of Berkeley	At Building Permit Submittal	Public Works
2.	**National Pollution Discharge Elimination System (NPDES).** The applicant shall demonstrate compliance with the City's National Pollution Discharge Elimination System (NPDES) permit as described in BMC Section 17.20. The following conditions apply: **A.** The Project plans shall identify and show site-specific Best Management Practices (BMPs) appropriate to activities conducted on-site to limit to the maximum extent practicable the discharge of pollutants to the City's storm drainage system, regardless of season or weather conditions. **B.** Trash enclosures and/or recycling areas shall be covered, and no other areas shall drain onto these areas. Drains in any wash or process area shall not discharge to the storm drain system; these drains should connect to the sanitary sewer. Applicant shall contact the City of Berkeley and the East Bay Municipal Utility District (EBMUD) for specific connection and discharge requirements. Discharges to the sanitary sewer are subject to the review, approval and conditions of the City of Berkeley and EBMUD. **C.** Landscaping shall be designed with efficient irrigation to reduce runoff, promote surface infiltration and minimize the use of fertilizers and pesticides that contribute to stormwater pollution. Where feasible, landscaping should be designed and operated to treat runoff. When and where possible, xeriscape and drought tolerant plants shall be incorporated into new development plans. III. At the Time of Building Permit Submittal		Regulation Source	Timing/Implementation	Enforcement/ Monitoring
	D. Design, location and maintenance requirements and schedules for any stormwater quality treatment structural controls shall be submitted to the Department of Public Works for review with respect to reasonable adequacy of the controls. The review does not relieve the property owner of the responsibility for complying with BMC Chapter 17.20 and future revisions to the City's overall stormwater quality ordinances. This review shall be shall be conducted prior to the issuance of a building permit. **E.** All paved outdoor storage areas shall be designed to reduce/limit the potential for runoff to contact pollutants. **F.** All on-site storm drain inlets/catch basins shall be cleaned at least once a year immediately prior to the rainy season. The property owner shall be responsible for all costs associated with proper operation and maintenance of all storm drainage facilities (pipelines, inlets, catch basins, outlets, etc.) associated with the Project, unless the City accepts such facilities by Council action. Additional cleaning may be required by City of Berkeley Public Works Engineering Department. **G.** All private or public projects that create and/or replace 10,000 square feet or more of impervious surface shall comply with Provision C.3 of the NPDES permit and shall incorporate stormwater controls to enhance water quality. Permit submittals shall include a Stormwater Requirement Checklist and detailed information showing how the proposed Project will meet Provision C.3 stormwater requirements, including a) Site design measures to reduce impervious surfaces, promote infiltration, and reduce water quality impacts; b) Source Control Measures to keep pollutants out of stormwater runoff; c) Stormwater treatment measures that are hydraulically sized to remove pollutants from stormwater; d) An O & M (Operations and Maintenance) agreement for all stormwater treatment devices and installations; and e) Engineering calculations for all stormwater devices (both mechanical and biological). (Project required to meet applicable code at time of building permit application, if different from above.)

III. At the Time of Building Permit Submittal		Regulation Source	Timing/Implementation	Enforcement/ Monitoring
	H. All on-site storm drain inlets must be labeled "No Dumping – Drains to Bay" or equivalent using methods approved by the City. **I.** Washing and/or steam cleaning shall be done at an appropriately equipped facility that drains to the sanitary sewer. Any outdoor washing or pressure washing shall be managed in such a way that there is no discharge of soaps or other pollutants to the storm drain. Sanitary connections are subject to the review, approval and conditions of the East Bay Municipal Utility District. **J.** All loading areas shall be designated to minimize run-on or run-off from the area. Accumulated wastewater that may contribute to the pollution of stormwater must be drained to the sanitary sewer or intercepted and pretreated prior to discharge to the storm drain system. The property owner shall ensure that BMPs are implemented to prevent potential stormwater pollution. These BMPs shall include, but are not limited to, a regular program of sweeping, litter control and spill cleanup. **K.** Sidewalks and parking lots shall be swept regularly to prevent the accumulation of litter and debris. If pressure washed, debris must be trapped and collected to prevent entry to the storm drain system. If any cleaning agent or degreaser is used, wash water shall not discharge to the storm drains; wash waters should be collected and discharged to the sanitary sewer. Discharges to the sanitary sewer are subject to the review, approval and conditions of the sanitary district with jurisdiction for receiving the discharge. **L.** The applicant is responsible for ensuring that all contractors and sub-contractors are aware of and implement all stormwater quality control measures. Failure to comply with the approved construction BMPs shall result in the issuance of correction notices, citations, or a project stop work order.

IV. Prior to Issuance Building Permit: A. Building & Safety/Land Use Planning		Regulation Source	Timing/Implementation	Enforcement/ Monitoring
	A. The Project applicant shall prepare a health risk assessment that demonstrates the Project's on-site emissions of diesel particulate matter during construction will not exceed health risk screening criteria after a screening-level health risk assessment is conducted in accordance with current guidance from the Bay Area Air District and the California Office of Environmental Health Hazard Assessment. The health risk assessment shall be submitted to the Land Use Planning Division for review and approval prior to the issuance of building permits; or **B.** All construction equipment shall be equipped with Tier 2 or higher engines and the most effective Verified Diesel Emission Control Strategies (VDECS) available for the engine type (Tier 4 engines automatically meet this requirement) as certified by the California Air Resources Board (CARB). The equipment shall be properly maintained and tuned in accordance with manufacturer specifications. **C.** In addition, a Construction Emissions Minimization Plan (Emissions Plan) shall be prepared that includes the following: **i.** An equipment inventory summarizing the type of off-road equipment required for each phase of construction, including the equipment manufacturer, equipment identification number, engine model year, engine certification (tier rating), horsepower, and engine serial number. For all VDECS, the equipment inventory shall also include the technology type, serial number, make, model, manufacturer, CARB verification number level, and installation date. **ii.** A Certification Statement that the contractor agrees to comply fully with the Emissions Plan and acknowledges that a significant violation of the Emissions Plan shall constitute a material breach of contract. The Emissions Plan shall be submitted to the Public Works Department for review and approval prior to the issuance of building permits.

IV. Prior to Issuance Building Permit: A. Building & Safety/Land Use Planning		Regulation Source	Timing/Implementation	Enforcement/ Monitoring
5.	**Construction Emissions Reduction Measures.** Development projects shall comply with the current Bay Area Air District's basic control measures for reducing construction emissions of PM10 (Table 8-2, Basic Construction Mitigation Measures Recommended for All Proposed Projects, of the May 2017 Air District CEQA Guidelines), outlined below. 1. All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times a day. 2. All haul trucks transporting soil, sand, or other loose material offsite shall be covered. 3. All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited. 4. All vehicle speeds on unpaved roads shall be limited to 15 miles per hour. 5. All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used. 6. Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to five minutes (as required by the California Airborne Toxics Control Measure Title 13, Section 2485 of California Code of Regulations). Clear signage shall be provided for construction workers at all access points. 7. All construction equipment shall be maintained and properly tuned in accordance with manufacture's specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper conditions prior to operation. 8. Post a publicly visible sign with the telephone number and person to contact at the Lead Agency regarding dust complaints. This person shall respond and take corrective action within 48 hours. The Air District's number shall also be visible to ensure compliance with applicable regulations. IV. Prior to Issuance of Building Permit: B. Public Works		Regulation Source	Timing/Implementation	Enforcement/ Monitoring
1.	**Transportation Construction Plan.** The applicant and all persons associated with the Project are hereby notified that a Transportation Construction Plan (TCP) may be required, particularly for the following activities: **A.** Alterations, closures, or blockages to sidewalks, pedestrian paths or vehicle travel lanes (including bicycle lanes); **B.** Storage of building materials, equipment, dumpsters, debris anywhere in the public right of way; **C.** Provision of exclusive contractor parking on-street; or **D.** Significant truck activity. Please contact the Department of Public Works Transportation Division at (510) 981-7010, or 1947 Center Street, and ask to speak to a traffic engineer. In addition to other requirements of the Traffic Engineer, this plan shall include the locations of material and equipment storage, trailers, worker parking, a schedule of site operations that may block traffic, and provisions for traffic control. The TCP shall be stamped and signed by a registered engineer prior to submittal. The TCP shall be consistent with any other requirements of the construction phase. A current copy of the TCP shall be available at all times at the construction site for review by City Staff.	City of Berkeley	Prior to Building Permit Issuance	Public Works

IV. Prior to Issuance of Building Permit: C. Toxics		Regulation Source	Timing/Implementation	Enforcement/ Monitoring
1.	**Demolitions & Renovations – Building Materials Survey.** A hazardous materials survey shall be prepared by qualified professionals and submitted to the Toxics Management Division (TMD) prior to issuance of the building permit. The survey shall identify building materials, plans for hazardous materials, hazardous waste removal and disposal, the identification of all materials to be disturbed for lead-based paints, PCB containing equipment and caulking, hydraulic fluids, refrigerants, treated wood, and mercury containing devices (including fluorescent light bulbs and mercury switches), asbestos and other hazardous materials and chemicals. The report to the TMD shall include, in addition to the survey, plans on hazardous materials and hazardous waste removal and disposal that comply with State and Federal codes including California Code of Regulations (CCR) 66260 et seq.	City of Berkeley	Prior to Issuance of Building Permit	Toxics Management Division
2.	**Asbestos Identified.** Pursuant to Bay Area Air District Regulation 11-2-401.3, if asbestos is identified a notification must be made and the J number must be made available to the City of Berkeley Permit Service Center. Contractors shall follow state regulations where there is asbestos-related work involving 100 square feet or more of asbestos containing material (8 Cal. Code Regs. §1529, §341.6 et seq.)	Bay Area Air District	Prior to Issuance of Building Permit	Bay Area Air District
3.	**Environmental Site Clearance.** Prior to issuance of any building permits, the applicant shall submit to the Toxics Management Division (TMD) an environmental screening clearance to ensure that the property meets development investigation and cleanup standards for the specific use proposed on the property. Documentation in the form of a letter shall be provided from one of the following external agencies: • San Francisco Bay Regional Water Quality Control Board (RWQCB); • California Department of Toxic Substances Control (DTSC); or • The Alameda County Department of Environmental Health's Local Oversight Program (LOP). 1.	**Final Affordable Housing Compliance Plan.** The final Affordable Housing Compliance Plan ("AHCP") shall be submitted to the Zoning Officer and the Department of Health, Housing, and Community Services prior to the issuance of Building Permit. Projects that receive approval from the Building Official for multiple phase construction permits shall have the final AHCP certified prior to the issuance of the phase one building permit.	City of Berkeley BMC Section 23.328.050 (A)	Prior to Issuance of Building Permit	Land Use Planning/ Health, Housing and Community Services
2.	**Regulatory Agreement: Inclusionary Housing.** The Applicant shall execute a Regulatory Agreement and Declaration of Restrictive Covenants to regulate all Affordable Units provided in a Housing Development Project. No building permit shall be issued for the project until the Regulatory Agreement and Declaration of Restrictive Covenants are executed.	City of Berkeley BMC Section 23.328.050 (B)	Prior to Issuance of Building Permit	Health, Housing and Community Services
3.	**Below Market Rate Units.** The Project shall provide below market rate rental dwelling units (BMR Units), which are required to comply with the State Density Bonus Law (Government Code Section 65915) by BMC Chapter 23.328 "Inclusionary Housing" and BMC Chapter 23.326 "Demolition and Dwelling Unit Controls." The total number of BMR Units shall be designated in the Regulatory Agreement. All BMR units are required to comply with the stricter of State Density Bonus Law (Government Code Section 65915), BMC Section 23.328, or BMC Section 23.326. V. During Demolition/Construction A. Building & Safety		Regulation Source	Timing/Implementation	Enforcement/ Monitoring
1.	**Construction Hours.** Construction activity shall be limited to between the hours of 7:00 AM and 6:00 PM on Monday through Friday, and between 9:00 AM and 4:00 PM on Saturday. No construction-related activity shall occur on Sunday or any Federal holiday.	City of Berkeley BMC 13.40.070 (B) (7)	During Demolition/Construction	Building & Safety
2.	**Construction Hours Exceptions**. Prior to initiating any activity that might require a longer period, the applicant shall notify the Zoning Officer in writing and request an exception for a specific period of time. If an exception is approved, then the applicant shall notify businesses and residents within 500 feet of the Project site describing the expanded construction hours two weeks prior to the expanded schedule start. The Project shall only be allowed 15 extended working days.	City of Berkeley	During Demolition/Construction	Environmental Health/ Land Use Planning
3.	**Project Construction Website.** The applicant shall establish a project construction website with the following information clearly accessible and updated monthly or more frequently as changes warrant: • Contact information (i.e. "hotline" phone number, and email address) for the Project construction manager • Calendar and schedule of daily/weekly/monthly construction activities • The final Conditions of Approval, Mitigation Monitoring and Reporting Program, Transportation Construction Plan, Construction Noise Reduction Program, and any other reports or programs related to construction noise, air quality, and traffic.	City of Berkeley	During Demolition/Construction	Building & Safety
4.	**Construction / No Parking Permits**. If "Construction/No Parking Permits" are required, the applicant shall contact the Permit Service Center for details on obtaining Construction/No Parking Permits (and associated signs and accompanying dashboard permits). The Zoning Officer and/or Traffic Engineer may limit off-site parking of construction-related vehicles if necessary to protect the health or safety of the surrounding neighborhood. V. During Demolition/Construction: B. Land Use Planning		Regulation Source	Timing/Implementation	Enforcement/ Monitoring
1.	**Avoid Disturbance of Nesting Birds.** Initial site disturbance activities, including vegetation and concrete removal, shall be prohibited during the general avian nesting season (February 1 to August 30), if feasible. If nesting season avoidance is not feasible, the applicant shall retain a qualified biologist to conduct a preconstruction nesting bird survey to determine the presence/absence, location, and activity status of any active nests on or adjacent to the Project site. The extent of the survey buffer area surrounding the site shall be established by the qualified biologist to ensure that direct and indirect effects to nesting birds are avoided. To avoid the destruction of active nests and to protect the reproductive success of birds protected by the Migratory Bird Treaty Act and the California Fish & Game Code, nesting bird surveys shall be performed not more than 14 days prior to scheduled vegetation and concrete removal. In the event that active nests are discovered, a suitable buffer (typically a minimum buffer of 50 feet for passerines and a minimum buffer of 250 feet for raptors) shall be established around such active nests and no construction shall be allowed inside the buffer areas until a qualified biologist has determined that the nest is no longer active (e.g., the nestlings have fledged and are no longer reliant on the nest). No ground-disturbing activities shall occur within this buffer until the qualified biologist has confirmed that breeding/nesting is completed and the young have fledged the nest. Nesting bird surveys are not required for construction activities occurring between August 31 and January 31.	California Department of Fish & Wildlife (CDFW)/ City of Berkeley	During Demolition/Construction	Land Use Planning
2.	**Pre-Construction Meeting.** The applicant shall request a virtual meeting with Land Use Planning (the Project Planner and Construction Monitoring Consultant, if applicable) and key parties involved in the early phases of construction (e.g., applicant, general contractor, foundation subcontractors) to review the project's Conditions of Approval (and Mitigation Measures, if applicable) and the construction schedule. The general contractor or applicant shall ensure that all subcontractors involved in subsequent phases of construction are aware of the Conditions of Approval prior to ground disturbance on the site. V. During Demolition/Construction: B. Land Use Planning		Regulation Source	Timing/Implementation	Enforcement/ Monitoring
3.	**Unanticipated Discovery of Paleontological Resources.** In the event of an unanticipated discovery of a paleontological resource during construction, excavations within 50 feet of the find shall be temporarily halted or diverted until the discovery is examined by a qualified archeologist (per Secretary of Professional Qualification Standards National Park Service 1983). The qualified paleontologist shall document the discovery as needed, evaluate the potential resource, and assess the significance of the find. The archeologist shall notify the appropriate agencies to determine procedures that would be followed before construction is allowed to resume at the location of the find. If the City determines that avoidance is not feasible, the archeologist shall prepare an excavation plan for mitigating the effect of the Project on the qualities that make the resource important, and such plan shall be implemented. The plan shall be submitted to the City for review and approval.	City of Berkeley	During Demolition/Construction	Land Use Planning
4.	**Unanticipated Discovery of Tribal Cultural Resources.** In the event that Tribal Cultural Resources are identified during construction, all work within 50 feet of the discovery shall be redirected. The Project applicant and Project construction contractor shall notify the Land Use Planning Division within 24 hours. The City will contact any tribes who have requested consultation under AB 52 (if applicable), as well as contact a qualified archaeologist, to evaluate the resources and situation and provide recommendations. If it is determined that the resource is a Tribal Cultural Resource and thus significant under CEQA, a mitigation plan shall be prepared and implemented in accordance with State guidelines and in consultation with Native American groups. If the resource cannot be avoided, additional measures to avoid or reduce impacts to the resource and to address tribal concerns may be required.	City of Berkeley	During Demolition/Construction	Land Use Planning
5.	**Unanticipated Discovery of Archeological Resources.** Pursuant to CEQA Guidelines section 15064.5(f), “provisions for historical or unique paleontological resources accidentally discovered during construction” should be instituted. Therefore:	City of Berkeley	During Demolition/Construction	Land Use Planning

V. During Demolition/Construction: B. Land Use Planning		Regulation Source	Timing/Implementation	Enforcement/ Monitoring
	A. In the event that any prehistoric or historic subsurface cultural resources are discovered during ground disturbing activities, all work within a minimum of 50 feet of the resources shall be halted and the Project applicant and/or lead agency shall consult with a Registered Professional Archeologist or paleontologist, and the culturally-affiliated California Native American Tribe ("Tribe") to assess the significance of the find. **B.** If any find is determined to be significant, representatives of the Project proponent and/or the lead agency and the Tribe shall meet to determine the appropriate avoidance measures or other appropriate measures to mitigate impacts to the Tribal Cultural Resource., **C.** In considering any suggested measure proposed by the Registered Professional Archeologist, the Tribe and the lead agency shall confer and such consultation will be considered concluded when either of the following occurs: (1) the parties agree to mitigation measures to mitigate or avoid a significant effect, if a significant effect exists, on a Tribal Cultural Resource or (2) A party, acting in good faith after reasonable effort, concludes that mutual agreement cannot be reached. **D.** If avoidance is unnecessary or infeasible, other appropriate measures such as removal and reburial of the Tribal Cultural Resource in an alternate location with tribal cultural monitor such as removal and reburial of the Tribal Cultural Resource in an alternate location with tribal cultural monitors may be instituted. Work may proceed on other parts of the Project site while mitigation measures for cultural resources is carried out. **E.** If significant materials are recovered, the Registered Professional Archeologist shall prepare a report on the findings for submittal to the Northwest Information Center.

6.	**Discovery of Human Remains.** In the event that human skeletal remains are uncovered at the Project site during ground-disturbing activities, all work shall immediately halt and the Alameda County Coroner shall be contacted to evaluate the remains, and following the procedures and protocols pursuant to Section 15064.5 (e)(1) of the CEQA Guidelines Upon the discovery of the Native American remains, the landowner shall ensure that the immediate vicinity, according to generally accepted cultural or archaeological standards or practices, where the Native American human remains are located, is not damaged or disturbed by further development activity until the landowner has discussed and conferred, as prescribed in this section, with the most likely descendants regarding their recommendations, if applicable, taking into account the possibility of multiple human remains. The landowner shall discuss and confer with the descendants all reasonable options regarding the descendants' preferences for treatment. A. The descendants' preferences for treatment may include the following: i. The nondestructive removal and analysis of human remains and items associated with Native American human remains. ii. Preservation of Native American human remains and associated items in place. iii. Relinquishment of Native American human remains and associated items to the descendants for treatment. iv. Other culturally appropriate treatment. B. The parties may also mutually agree to extend discussions, taking into account the possibility that additional or multiple Native American human remains, as defined in this section, are located in the Project area providing a basis for additional treatment measures. C. For the purposes of this section, "conferral" or "discuss and confer" means the meaningful and timely discussion and careful consideration of the views of each party, in a manner that is cognizant of all parties' cultural values, and where feasible, seeking agreement. Each party shall recognize the other's needs and concerns for confidentiality of information provided to the other. i. Human remains of a Native American may be an inhumation or cremation, and in any state of decomposition or skeletal completeness.

V. During Demolition/Construction: B. Land Use Planning		Regulation Source	Timing/Implementation	Enforcement/ Monitoring
	ii. Any items associated with human remains that are placed or buried with Native American human remains are to be treated in the same manner as the remains, but do not by themselves constitute human remains. D. Whenever the commission is unable to identify a descendant, or the descendants identified fail to make a recommendation, or the landowner or his or her authorized representative rejects the recommendation of the descendants and the mediation provided for in subdivision (k) of Public Resources Code Section 5097.94. if invoked, fails to provide measures acceptable to the landowner, the landowner or his or her authorized representative shall inter the human remains and items associated with Native American human remains with appropriate dignity on the property in a location not subject to further and future subsurface disturbance. To protect these sites, that landowner shall do one or more of the following: i. Record the site with the commission or the appropriate Information Center. ii. Utilize an open-space or conservation zoning designation or easement. iii. Record a document with the county in which the property is located. F. Upon the discovery of multiple Native American human remains during a ground disturbing land development activity, the landowner may agree that additional conferral with descendants is necessary to consider culturally appropriate treatment of multiple Native American human remains. Culturally appropriate treatment of such a discovery may be ascertained from review of the site utilizing cultural and archaeological standards. Where the parties are unable to agree on the appropriate treatment measures the human remains and buried with Native American human remains shall be reinterred with appropriate dignity, pursuant to subdivision (e). G. Pursuant to State law, any action taken to implement an agreement developed pursuant to this Condition of Approval shall be exempt from the CEQA.

VII. Prior to Certificate of Occupancy		Regulation Source	Timing/Implementation	Enforcement/ Monitoring
1.	**Planning Inspection.** Planning staff shall conduct a site visit to review exterior building elevations for architectural consistency with the approved plans and landscape installation (if required). All exterior finishing details including window trim, paint, gutters, downspouts, decking, guardrails, and driveway installation shall be in place prior to scheduling the final inspection.	City of Berkeley	Prior to Certificate of Occupancy	Land Use Planning
2.	**Post Construction Review.** Upon completion of the Project, the structures (or, in case of large buildings, of the portions of the structures) previously inspected will be resurveyed, and any new cracks or other changes shall be compared to pre-construction conditions and a determination shall be made as to whether the proposed Project caused the damage. The findings shall be submitted to the Building and Safety Division and the Zoning Officer for review. If it is determined that Project construction has resulted in damage to the structure, the damage shall be repaired to the pre-existing condition by the Project sponsor, provided that the property owner approves of the repair.	City of Berkeley	Prior to Certificate of Occupancy	Building & Safety/Land Use Planning
3.	**Inclusionary Housing.** Dwellings that are approved as rental units, but in which a condo map is approved prior to issuance of an occupancy permit, shall be subject to the affordability requirements within BMC 23.328 in effect on March 31, 2023.	City of Berkeley BMC Section 23.328	Prior to Certificate of Occupancy	Land Use Planning
4.	**Transportation Demand Management.** Prior to issuance of a Certificate of Occupancy, the property owner shall schedule a site inspection with Land Use Planning staff to confirm that the physical improvements required in BMC Section 23.334.030 (C) "Real-Time Transportation Information" and BMC 23.322.090 (A)(2) "Residential Bike Parking" have been installed. A Parking and Transportation Demand Management compliance report documenting that the programmatic measures required in BMC Sections 23.334.030(C) and 23.322.090 are implemented shall be submitted to the Land Use Division prior to occupancy, and on an annual basis thereafter, which demonstrates that the Project is compliant with the applicable requirements in these sections.	City of Berkeley BMC Section 23.334.030 (C) BMC 23.322.090 (A)(2) BMC Section 23.334.030 (B)	Prior to Certificate of Occupancy	Land Use Planning

VII. Prior to Certificate of Occupancy		Regulation Source	Timing/Implementation	Enforcement/ Monitoring
	A. Unbundled Parking. Pursuant to BMC Section 23.334.030(A), all parking spaces provided for residents be leased or sold separate from the rental or purchase of dwelling units for the life of the dwelling units. The property owner shall notify all residents of this restriction in leases and/or contracts and shall provide sample leases and/or contracts including such notification to the Project planner prior to issuance of Certificate of Occupancy or final inspection. **B. Transit Benefit.** **1.** Pursuant to BMC Section 23.334.030 (B), at least one of the following transit benefits shall be offered, at no cost to the resident, for a period of ten (10) years after the issuance of a Certificate of Occupancy. A notice describing these transportation benefits shall be posted in a location or locations visible to all residents. (a) A monthly pass for unlimited local bus transit service; or (b) A functionally equivalent transit benefit in an amount at least equal to the price of a non-discounted unlimited monthly local bus pass. Any benefit proposed as a functionally equivalent transportation benefit shall be approved by the Zoning Officer in consultation with the Transportation Division Manager.			
5.	**Transportation Demand Management: Residential Projects that include 100 dwelling units or more**. One monthly pass for unlimited local bus transit service for every bedroom in each dwelling unit.	City of Berkeley BMC 23.334.030 (B) (2)	Prior to Certificate of Occupancy	Land Use Planning
6.	**Real Time Transportation Information.** Any project subject to this chapter shall provide publicly-available, real-time transportation information in a common area, such as a lobby or elevator bay, on televisions, computer monitors or other displays readily visible to residents and/or visitors. Provided information shall include, but is not limited to, transit arrivals and departures for nearby transit routes. CONDITIONS OF APPROVAL

Property Address: 2900-20 Shattuck Avenue
Application Number: #ZP2022-0116

VIII. Fees		Regulation Source	Timing/Implementation	Enforcement/ Monitoring
1.	**Percent for Public Art.** Pursuant to BMC 23.316, the applicant shall either pay the required in-lieu fee or provide the equivalent amount in a financial guarantee to be released after installation of the On-Site Publicly Accessible Art.	City of Berkeley BMC Section 23.316	Prior to Certificate of Occupancy	Office of Economic Development
2.	**Payment of Affordable Housing In-Lieu Fee.** The Affordable Housing In-Lieu Fee shall be paid as required by BMC Section 23.328.030(B) and Resolution 70,698 N.S. The fee for this project is $824,416, subject to proration to reflect any affordable units provided. Any adjustments to the fee and the final fee amount will be determined prior to building permit issuance as part of the Affordable Housing Compliance Plan approval. The In-Lieu Fee shall be paid prior to the issuance of the first Certificate of Occupancy, or if no Certificate of Occupancy is required, prior to the final inspection of the Project. Nothing in these conditions shall be interpreted to prohibit, or to require modification of the Use Permit or Regulatory Agreement to allow, the provision of additional BMR units, or additional affordability, then are required in the foregoing provisions.	City of Berkeley BMC Section 23.328.030 (B)	Prior to Final Inspection	Health, Housing & Community Services

LANDSCAPE PLAN AND IMAGERY AT ROOF DECK

L2.0

NOTES

1. CONTRACTOR SHALL VERIFY ALL GRADES, EXISTING CONDITIONS AND DIMENSIONS IN THE FIELD PRIOR TO COMMENCING WORK. ALL DISCREPANCIES OR QUESTIONS SHALL BE BROUGHT TO THE ATTENTION OF THE LANDSCAPE ARCHITECT FOR RESOLUTION. REDIRECT WORK TO AVOID DELAY.
2. ALL CURVES AND ALL TRANSITIONS BETWEEN CURVES AND STRAIGHT EDGES SHALL BE SMOOTH
3. TAKE ALL DIMENSIONS PERPENDICULAR TO ANY REFERENCE LINE, WORK LINE, FACE OF BUILDING, FACE OF WALL OR CENTERLINE.
4. S.A.D. FOR ALL INFORMATION ON WATERPROOFING, DRAINAGE & GRADING ON STRUCTURES.

GENERAL PLANTING NOTES:

6. SOIL PREPARATION: THE LANDSCAPE CONTRACTOR SHALL BE RESPONSIBLE FOR FINISH GRADING AND ALL PLANTING AREA DRAINAGE. POSITIVE DRAINAGE AWAY FROM THE BUILDING AS PER CITY CODES SHALL BE MAINTAINED. NO LOW SPOTS WHICH HOLD STANDING WATER WILL BE ACCEPTED.

THE LANDSCAPE CONTRACTOR SHALL INCORPORATE SOIL PREPARATION AMENDMENT INTO PLANTING AREAS AS NOTED BELOW. WHERE ROTO-TILLING IS NOT POSSIBLE, INCORPORATE SOIL AMENDMENTS INTO TOP 6 INCHES WITH HAND TOOLS. AFTER INSTALLATION OF IRRIGATION SYSTEM, ALL PLANTING AREAS ARE TO BE FINE GRADED TO WITHIN 2 INCHES AND SLIGHTLY MOUNDED AWAY FROM EDGES OF TOP OF PLANTER, CURB, WALK, HEADER, ETC. AND RAKED SMOOTH WITH ALL ROCKS AND DEBRIS OVER 1-INCH IN DIAMETER REMOVED.

7. SOIL PREPARATION AMENDMENTS AND BACKFILL MIX: THE LANDSCAPE CONTRACTOR SHALL AMEND EXISTING SOIL PER THE SOILS REPORT. NATIVE SOIL IS PREFERRED.

8. TREE PLANTING: TREES SHALL BE PLANTED PER DETAIL ON PLAN. TREES SHALL TYPICALLY BE LOCATED A MINIMUM OF 3 1/2 FEET FROM CURBS, WALKS, HEADERS, BUILDINGS, AND OVERHEAD STRUCTURES WITHIN THE PROJECT. BACKFILL PER SOILS REPORT. THOROUGHLY WATER TREES IMMEDIATELY AFTER PLANTING.

9. SHRUB PLANTING: THE SHRUBS SHALL BE SPOTTED AS PER PLAN, SPOTTED AT THE SHOWN LOCATIONS, AND APPROVED BY LANDSCAPE ARCHITECT PRIOR TO THE DIGGING OF THE HOLES. SHRUB BACKFILL SHALL BE PER SOILS REPORT. THOROUGHLY WATER SHRUBS IMMEDIATELY AFTER PLANTING. DO NOT PLANT ANY SHRUB WITHIN 2 FEET OF ANY BUILDING WALL.

10. MAINTENANCE: THE CONTRACTOR SHALL MAINTAIN THE PROJECT FOR 90 DAYS (OR AS REQUESTED BY OWNER) FOLLOWING THE APPROVAL TO BEGIN THE MAINTENANCE PERIOD. DURING THE ENTIRE MAINTENANCE PERIOD, WATERING, CULTIVATING, WEEDING, MOWING, REPAIR/TIGHTENING OF STAKES AND TIES, RESTORATION OF BASINS, PROVISION OF SUPPLEMENTAL WATER BY HAND IN ADDITION TO IRRIGATION SYSTEM IS REQUIRED AS NECESSARY. NO PRE-EMERGENCE HERBICIDES SHALL BE APPLIED - HAND REMOVE WEEDS. ONLY ORGANIC FERTILIZERS SHALL BE APPLIED SUCH AS THOSE SPECIFIED. INSTALL PER MANUFACTURER'S RECOMMENDATIONS. AT THE END OF THE 90 DAY MAINTENANCE PERIOD ALL AREAS ARE TO BE WEED FREE AND ALL PLANT MATERIAL SHALL BE IN A HEALTHY, THRIVING CONDITION. INTEGRATED PEST MANAGEMENT PRACTICES SHALL BE IMPLEMENTED.

11. SUBSTITUTIONS: REQUESTS FOR PLANT SUBSTITUTIONS SHALL BE MADE TO THE LANDSCAPE ARCHITECT WITHIN 15 DAYS AFTER SIGNING OF CONTRACT.

12. GUARANTEE: ALL CONSTRUCTION, TREES AND SHRUBS BY THE LANDSCAPE CONTRACTOR AND/OR SUBCONTRACTORS SHALL BE GUARANTEED FOR (1) ONE YEAR AFTER START OF MAINTENANCE PERIOD. THE CONTRACTOR SHALL REPLACE, AT NO EXPENSE TO THE OWNER, ANY AND ALL LANDSCAPE MATERIALS THAT ARE IN AN UNACCEPTABLE CONDITION FOR TIME OF USE, AND TREES OR SHRUBS THAT ARE DEAD OR NOT IN A VIGOROUS, HEALTHY GROWING CONDITION, WITHIN TWO WEEKS OF NOTIFICATION OF SUCH CONDITION. REPLACEMENT SHALL BE OF THE SAME KIND AND SIZE AS THE ORIGINALLY SPECIFIED ITEM AND SHALL BE REPLACED AS ORIGINALLY DESCRIBED ON THE DRAWINGS. THE CONTRACTOR SHALL NOT BE HELD LIABLE FOR LOSS OF PLANT MATERIALS DURING THE GUARANTEE PERIOD DUE TO VANDALISM, ACCIDENTAL CAUSES OR ACTS OF NEGLECT BY OTHERS THAN THE CONTRACTOR, HIS AGENTS AND EMPLOYEES.

13. CLEAN UP: AT THE END OF EACH WORK DAY, AT THE INSPECTION FOR SUBSTANTIAL COMPLETION, AND BEFORE ACCEPTANCE OF PROJECT - CLEAN

PAVED AREAS THAT ARE DIRTIED OR STAINED BY CONSTRUCTION OPERATIONS BY SWEEPING OR WASHING, AND REMOVE DEFACEMENTS AND STAINS.

REMOVE CONSTRUCTION EQUIPMENT, EXCESS MATERIALS AND TOOLS. HAUL FROM OWNERS PROPERTY ANY DEBRIS RESULTING FROM CONSTRUCTION, AND DISPOSE OF IT LEGALLY. REMOVE REMAINING TEMPORARY PROTECTION AT TIME OF ACCEPTANCE BY OWNER UNLESS OTHERWISE AGREED.

14. FERTILIZERS: AVAILABLE FROM CALIFORNIA ORGANIC FERTILIZERS, INC. 1-800-269-5690 WWW.ORGANICAG.COM.

STREET TREE PROTECTION NOTES:

1. ALL TREE PROTECTION REQUIREMENTS AND RESTRICTIONS SHALL BE INCLUDED IN THE CONSTRUCTION NOTES AND PRINTED ON ALL COPIES OF THE PLANS.

a) INCLUDE THE NAME AND PHONE NUMBER OF THE PARTY THAT WILL MONITOR THE SITE AND ENSURE THE TREE PROTECTION MEASURES ARE BEING FOLLOWED; AND WHAT THE MONITORING SCHEDULE WILL BE: **NAME / PHONE / SCHEDULE**

b) INSTALL 6 FOOT CHAIN-LINK FENCING TO PROTECT THE AREA WITHIN THE DRIP-LINE OF ANY PROTECTED TREE IN THE DEVELOPMENT AREA. FENCING SHALL BE MOUNTED TO POSTS THAT ARE DRIVEN INTO THE GROUND. WHERE THIS IS NOT POSSIBLE BECAUSE OF EXISTING STRUCTURES, TREE ROOTS, OR OTHER OBSTACLES, CHAIN-LINK PANELS MOUNTED TO STANCHIONS AND CONNECTED TO EACH OTHER MAY BE APPROVED. IN AREAS WHERE DIFFICULT TERRAIN MAKES THIS IMPRACTICAL, ORANGE CONSTRUCTION FENCING MAY BE APPROVED.

c) ALL FENCING SHALL HAVE SIGNAGE STATING THE REQUIREMENTS AND RESTRICTIONS, AND THE CONTACT INFORMATION FOR THE PROJECT ARBORIST.

d) WHEN ANY APPROVED CONSTRUCTION ACTIVITY WILL OCCUR WITHIN THE DRIP LINE OF A PROTECTED TREE THAT IS NOT SURROUNDED BY PROTECTIVE FENCING, THE TRUNK SHALL BE PROTECTED BY WRAPPING IT WITH STRAW TUBES (WATTLE) OR VERTICAL WOOD SLATS (EX. 2X4), UP TO A MINIMUM OF 8 FEET FROM GRADE (SEE FIGURE 1, PAGE 6). SLATS SHALL BE ANGLED TO PROTECT THE ROOT FLARE AT THE BASE OF THE TREE; AND CLOSED CELL FOAM OR EQUIVALENT MATERIAL SHALL BE USED TO PROTECT THE TRUNK OF THE TREE WHERE IT CONTACTS THE SLATS. LATERAL BRANCHES BELOW 8 FEET SHALL ALSO BE PROTECTED. IN ADDITION, THE AREA SHALL BE COVERED WITH A 6 INCH LAYER OF MULCH TOPPED WITH 3/4 INCH PLYWOOD THAT IS FASTENED TOGETHER. IF ANY LARGE OR MOTORIZED EQUIPMENT (MINI EXCAVATOR, BOBCAT®, POWERED WHEELBARROW) WILL TRAVEL OVER THIS AREA, THE PLYWOOD MUST BE A MINIMUM OF 1 INCH AND ADEQUATE FOR THE WEIGHT OF THE EQUIPMENT THAT WILL TRAVEL OVER IT. IF LARGER EQUIPMENT (BACKHOE, TRACTOR) WILL BE USED, CONSULT THE CITY ARBORIST. ***CONSTRUCTION ACTIVITY REFERS TO ANY MOVEMENT OF PEOPLE, TOOLS, OR EQUIPMENT; OR STORAGE OF ANY TOOLS, EQUIPMENT, OR SUPPLIES.***

f) LOCATE AND EXPOSE ANY ROOTS 2 INCHES IN DIAMETER OR GREATER THAT MAY NEED TO BE PRUNED TO FACILITATE THE PROJECT. THIS INCLUDES ANY TRENCHING THAT WILL BE DONE AS PART OF FOUNDATION OR UTILITY INSTALLATION. CONTACT THE CITY ARBORIST IN ADVANCE TO LESSEN THE AMOUNT OF TIME THAT THE ROOTS WILL BE EXPOSED. IF ROOTS MUST BE LEFT EXPOSED FOR MORE THAN THREE DAYS, CONSULT THE CITY ARBORIST. **NOTE:** THE 2 INCH DIAMETER THRESHOLD FOR ROOTS IS A GUIDELINE THAT MAY BE ADJUSTED BY THE CITY ARBORIST DEPENDING ON THE SIZE AND CONDITION OF THE TREE, AND THE LOCATION OF THE ROOTS. THE CITY ARBORIST MAY INCREASE THE TPZ, OR IMPOSE OTHER RESTRICTIONS, WHEN THE DRIPLINE OF A TREE HAS BEEN ALTERED BY PRUNING OR UNUSUAL GROWTH PATTERNS.

g) NO STORAGE OF BUILDING MATERIALS, REFUSE, EXCAVATED SPOILS, OR DUMPING OF POISONOUS MATERIALS, IS PERMITTED WITHIN THE DRIP LINE OF ANY PROTECTED TREE. POISONOUS MATERIALS INCLUDE, BUT ARE NOT LIMITED TO, PAINT, PETROLEUM PRODUCTS, CONCRETE OR STUCCO MIX, DIRTY WATER, OR ANY OTHER MATERIAL WHICH MAY BE DELETERIOUS TO TREE HEALTH.

STREET TREE PLANTING NOTES:

1. FOR NEW PLANTING:
   a. THE CITY ARBORIST SHALL BE NOTIFIED, BY CALLING (510) 981-6660, PRIOR TO THE DELIVERY OF THE TREES FOR INSPECTION OF THEIR SIZE AND STRUCTURE.
   b. EACH TREE SHALL BE PROPERLY PLANTED AT OR JUST BELOW GRADE (<1"). SOIL AMENDMENT IS NOT RECOMMENDED, AND NATIVE SOIL IS PREFERRED. NO CONSTRUCTION RUBBLE OR NON-ORGANIC MATERIAL SHALL BE WITHIN THE TREE WELL.
   c. THE SURROUNDING SOIL OUTSIDE THE CONTAINER (ROOT BALL) SHOULD BE LIGHTLY COMPACTED TO ABOUT 4 INCHES BELOW GRADE WITH THE ROOT BALL HIGHER THAN THAT.
   d. 2 TO 2.5 INCHES OF BASE ROCK SHOULD BE APPLIED AROUND THE ROOT BALL LEAVING 1.5 TO 2 INCHES LEFT FOR THE MATERIAL.
   e. 15G CONTAINERS ARE APPROXIMATELY 15-16 INCHES IN DIAMETER AND THE MATERIAL SHOULD BE APPLIED TO THE APPROXIMATE EDGE OF THE ROOT BALL WITH THE TOP GRADE OF THE ROOT BALL UP TO 1 INCH BELOW THE TOP OF THE MATERIAL THAT WILL BE APPLIED.
   f. EACH NEW TREE SHALL HAVE AUTOMATIC IRRIGATION INCLUDING TWO TREE BUBBLERS THAT CURVE OVER THE TOP OF THE TREES' ROOT BALL AND PROVIDE A MINIMUM OF 20 GALLONS PER WEEK BETWEEN MARCH 15 AND OCTOBER 15 FOR THE FIRST THREE YEARS. LARGER TREES MAY REQUIRE ADDITIONAL BUBBLERS. THE BUBBLERS SHOULD BE LOCATED ON TOP OF THE ROOT BALL WITHIN THIS 15-16 INCH CIRCLE AND NOT BE COVERED WITH MATERIAL.
   g. TREES THAT DIE WITHIN THE FIRST THREE YEARS MUST BE REPLACED AT THE PROPERTY OWNER'S EXPENSE.

ZONING ADJUSTMENTS BOARD

NOTICE OF PUBLIC HEARING

2900-20 Shattuck Avenue

Use Permit #ZP2022-0116 to demolish a commercial building and construct an 11-story (125 feet, 2 inches), 131,583-square-foot, mixed-use building with 242 dwelling units (including 22 Very Low-Income and 8 Moderate Income Density Bonus qualifying units), 3,720 square feet of commercial space, 13 vehicle parking spaces, and 68 bicycle parking spaces.

Since the project was reviewed by the Zoning Adjustment Board (ZAB) on April 27, 2023, when the hearing was continued to allow for the preparation of an Initial Study, the applicant revised the design as follows:

- **Building Height: Increased from 10 to 11 stories, and from 110 feet, 4 inches to 125 feet, 2 inches.**
- **Density and Units: Unit count increased from 221 to 242 dwelling units; the affordable housing component expanded from 22 Very Low-Income units to 22 Very Low-Income and 8 Moderate-Income units, and the density bonus increased from 46.25% to 70%.**
- **Floor Area and FAR: Gross floor area increased from 113,948 to 131,583 square feet, increasing the FAR from 5.82 to 6.72.**
- **Parking: Vehicle parking increased from 9 to 13 spaces, now accommodated using parking stackers.**
- **Commercial Space: Ground-floor commercial area decreased from 4,090 to 3,720 square feet.**
- **Setbacks: The street side setback (Shattuck Avenue) increased from 6 inches to 1 foot, and the interior setback (West) decreased from 31 feet, 8 inches to 27 feet, 8 inches.**
- **Lot Coverage and Open Space: Lot coverage increased from 51% to 52%, and usable open space decreased from 7,056 to 7,009 square feet.**

The Zoning Adjustments Board of the City of Berkeley will hold a public hearing on the above matter, pursuant to Zoning Ordinance, Section 23.404.050 (Public Hearings and Decisions)

When: Thursday, October 8, 2026, 7:00 pm
Where: Berkeley Unified School District meeting room, 1231 Addison Street, (wheelchair

accessible) with remote/hybrid option (via Zoom).

Please visit: https://berkeleyca.gov/your-government/boards-commissions/zoning-adjustments-board and click on the hearing date to access the most up-to-date meeting information, or call the Land Use Planning division (510) 981-7410.

PUBLIC ADVISORY*: *THIS MEETING WILL BE CONDUCTED IN A HYBRID MODEL WITH BOTH IN-PERSON ATTENDANCE AND VIRTUAL PARTICIPATION AVAILABLE FOR MEMBERS OF THE PUBLIC.

For in-person attendees, face coverings or masks that cover both the nose and mouth are encouraged. If you're feeling sick, please do not attend the meeting in-person as a public health precaution.

Currently, there are no physical distancing requirements in place by the State of California or the Local Health Officer for an indoor event similar to a Commission meeting. However, all attendees are requested to be respectful of the personal space of other attendees. An area of the public seating area will be designated as "distanced seating" to accommodate persons that need to distance for personal health reasons.

A. Land Use Designations:

- General Plan: NC – Neighborhood Commercial
- Zoning: C-SA – South Area Commercial District

B. Zoning Permits Required:

- Use Permit under Berkeley Municipal Code (BMC) Section 23.326.070(A) to demolish a non-residential building
- Use Permit under BMC Section 23.204.020(A) to construct a new mixed-use development
- Use Permit under BMC 23.204.020(A) to construct dwelling units
- Use Permit under BMC Section 23.204.030(A) to create new floor area of 3,000 square feet or more
- Use Permit under BMC 23.204.100(D)(2) to modify height, setback, and lot coverage requirements
- Administrative Use Permit under BMC 23.304.050(A) to allow architectural elements to exceed the district height limit

C. Concessions and Waivers Requested Pursuant to State Density Bonus Law (California Government Code Section 65915):

- Concession to reduce the open space requirement – to provide 7,009 square feet where 9,680 square feet is required – to eliminate the costs of constructing a larger roof deck
- Concession to reduce the long-term bicycle parking requirement – to provide 60 spaces where 85 spaces are required – to eliminate the costs of enlarging the bike room and providing additional racks
- Waiver of BMC Section 23.204.100(D) to exceed building height limits – to be 125'-2", and 11 stories (no maximum in Base with UP)
- Waiver of BMC Section 23.204.100(D) to reduce front setback to 0', street side setbacks to 1'-0', and rear setback to 1'-5" (no minimum in Base with UP)

- Waiver of BMC Section 23.204.100(D) to increase lot coverage to 52 percent (no maximum in Base with UP)
- Waiver of BMC Section 23.204.100(D) to increase floor area ratio (FAR) to 6.72, where 4.0 is the limit

D. CEQA Recommendation: Adopt the Initial Study/Mitigated Negative Declaration prepared pursuant to Public Resources Code (PRC) Section 21080.1(b).

E. Project Recommendation: Approve Use Permit #ZP2022-0116 pursuant to BMC Section 23.406.040(D)

F. Parties Involved:

- Applicant Isaiah Stackhouse, SDT Architects, 2421 Fourth Street, Berkeley CA 94701
- Property Owner 2900 Shattuck Avenue, LLC, 2343 Stuart Street, Berkeley, CA 94705

Further Information:
All application materials are available online at: https://aca-prod.accela.com/BERKELEY/Default.aspx.

The Zoning Adjustments Board final agenda and staff reports will be available online 6 days prior to this meeting at: https://berkeleyca.gov/your-government/boards-commissions/zoning-adjustments-board.

Questions about the project should be directed to the project planner, Singeh Saliki, at (510) 981-7412 or ssaliki@berkeleyca.gov.

Written comments or a request for a Notice of Decision should be directed to the Zoning Adjustments Board Secretary at zab@berkeleyca.gov.

Communication Disclaimer:
Communications to Berkeley boards, commissions or committees are public record and will become part of the City's electronic records, which are accessible through the City's website. **Please note: e-mail addresses, names, addresses, and other contact information are not required, but if included in any communication to a City board, commission or committee, will become part of the public record.** If you do not want your e-mail address or any other contact information to be made public, you may deliver communications via U.S. Postal Service or in person to the secretary of the relevant board, commission or committee. If you do not want your contact information included in the public record, please do not include that information in your communication. Please contact the secretary to the relevant board, commission or committee for further information.

Written Comments, Communications, and Reports:
Written comments must be directed to the ZAB Secretary at the Land Use Planning Division (Attn: ZAB Secretary), or via e-mail to: zab@berkeleyca.gov. All materials will be made available via the Zoning Adjustments Board Agenda page online at this address: https://berkeleyca.gov/your-government/boards-commissions/zoning-adjustments-board

All persons are welcome to attend the hearing and will be given an opportunity to address the Board. Comments may be made verbally at the public hearing and/or in writing before the hearing. The Board may limit the time granted to each speaker.

Correspondence received by 5:00 PM, eight days before this public hearing, will be provided with the agenda materials provided to the Board. Note that if you submit a hard copy document of more than 10 pages, or in color, or with photos, you must provide 15 copies. Correspondence received after this deadline will be conveyed to the Board in the following manner:

- **Correspondence received by 5:00 PM, two days before** this public hearing, will be conveyed to the Board in a Supplemental Communications and Reports #1, which is released around noon one day before the public hearing.
- **Correspondence received by 12:00 PM, the day of** this public hearing, will be conveyed to the Board in a Supplemental Communications and Reports #2, which is released around noon the day of the public hearing.
- **Correspondence received after 12:00 PM, the day of** this public hearing will be saved in the project administrative record.

Accessibility Information / ADA Disclaimer:
To request a disability-related accommodation(s) to participate in the meeting, including auxiliary aids or services, please contact the Disability Services specialist at 981-6342 (V) or 981-6345 (TDD) at least three business days before the meeting date.

SB 343 Disclaimer:
Any writings or documents provided to a majority of the Commission regarding any item on this agenda will be made available to the public. Please contact the Land Use Planning Division (zab@berkeleyca.gov) to request hard-copies or electronic copies.

Notice Concerning Your Legal Rights:
If you object to a decision by the Zoning Adjustments Board regarding a land use permit project, the following requirements and restrictions apply:

1. If you challenge the decision of the City in court, you may be limited to raising only those issues you or someone else raised at the public hearing described in this notice.
2. You must appeal to the City Council within 14 days after the Notice of Decision of the action of the Zoning Adjustments Board is mailed. It is your obligation to notify the Land Use Planning Division in writing of your desire to receive a Notice of Decision when it is completed.
3. Pursuant to Code of Civil Procedure Section 1094.6(b) and Government Code Section 65009(c)(1), no lawsuit challenging a City Council decision, as defined by Code of Civil Procedure Section 1094.6(e), regarding a use permit, variance or other permit may be filed more than 90 days after the date the decision becomes final, as defined in Code of Civil Procedure Section 1094.6(b). Any lawsuit not filed within that 90-day period will be barred.
4. Pursuant to Government Code Section 66020(d)(1), notice is hereby given to the applicant that the 90-day protest period for any fees, dedications, reservations, or other exactions included in any permit approval begins upon final action by the City, and that any challenge must be filed within this 90-day period.
5. If you believe that this decision or any condition attached to it denies you any reasonable economic use of the subject property, was not sufficiently related to a legitimate public purpose, was not sufficiently proportional to any impact of the project, or for any other reason constitutes a “taking” of property for public use without just compensation under the California or United States Constitutions, the following requirements apply:
    a. That this belief is a basis of your appeal.
    b. Why you believe that the decision or condition constitutes a "taking" of property as set forth above.
    c. All evidence and argument in support of your belief that the decision or condition constitutes a “taking” as set forth above. If you do not do so, you will waive any legal right to claim that your property has been taken, both before the City Council and in court.

1 Introduction

This report serves as the CEQA document for the proposed 2900-2920 Shattuck Avenue Mixed-Use Project ("project") in the City of Berkeley ("City"). The intent of the analysis in this report is to document whether the proposed project is eligible for California Environmental Quality Act (CEQA) streamlining under the "Near-Miss" rule under California Public Resources Code (PRC) Section 21080.1. Under these provisions, if a housing development project complies with all eligibility criteria for certain categorical exemptions (CEs) (including a Class 32 infill exemption) but for one condition detailed in the exemption or in the exceptions to the exemption in CEQA Guidelines Section 15300.2, and if none of the exceptions outlined in PRC Section 21080.1(b)(4) apply, CEQA review can be limited to effects upon the environment that are caused solely by that single condition.

The State of California's *CEQA Guidelines* Section 15332 states that a CE for an infill development project (Class 32 exemption) is appropriate when:

a. The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations.
b. The proposed development occurs within city limits on a project site of no more than five acres substantially surrounded by urban uses.
c. The project site has no value as habitat for endangered, rare, or threatened species.
d. Approval of the project would not result in any significant effects relating to traffic[1], noise, air quality, or water quality.
e. The site can be adequately served by all required utilities and public services.

Additionally, *CEQA Guidelines* Section 15300.2 outlines exceptions to the applicability of a Categorical Exemption. These exceptions include when cumulative impacts of successive projects of the same type and in the same place have a significant effect; activities where there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances; projects which may result in damages to scenic resources within a highway officially designated as a state scenic highway; projects located on a hazardous waste site included on any list compiled pursuant to Section 65962.5 of the Government Code; and projects which may cause a substantial adverse change in the significance of a historical resource.

Rincon Consultants, Inc., evaluated the project's consistency with the above requirements, including its potential impacts in the areas of biological resources, traffic, noise, air quality, and water quality, and the exceptions to exemptions, to confirm the project's eligibility for the Class 32 exemption (Section 3 of this report).The evaluation concluded that the project would be eligible for a Class 32 CE with the exception of one criterion in Section 15300.2: the project would be "located on a site which is included on any list compiled pursuant to Section 65962.5 of the Government Code" (*CEQA Guidelines* Section 15300.2(e)).

PRC Section 21080.1 states that a housing development project is subject to the "Near-Miss" rule if it "would otherwise be exempt [from CEQA] pursuant to a statutory exemption, or categorical exemption pursuant to Class 1 to 5, inclusive, 12, 15, 20, 27, 30, or 32 that is adopted before January 1, 2026, but for a single condition detailed in the statutory exemption or in Section 15300.2, 15301, 15302, 15303, 15304, 15305, 15312, 15315, 15320, 15322, 15327, 15330, or 15332 of Title 14 of the California Code of Regulations, as applicable." PRC Section 21080.1(b)(1). In this "Near-Miss" situation, "an initial study or environmental impact report prepared for a housing development project . . . is only required to examine those effects that the lead agency determines, based upon substantial evidence in the record, are caused solely by the single condition that makes the proposed housing development project ineligible for the statutory exemption or categorical exemption." *Id.* § 21080.1(b)(2). "An environmental impact report for a

[1] Impacts related to parking are not discussed in this report, as such impacts are generally not considered as a physical effect on the environment under CEQA.

housing development project subject to this subdivision is not required to include any discussion of alternatives to the housing development project or the growth-inducing impacts of the housing development project." PRC Section 21080.1(b)(3).

The "Near-Miss" rule does not apply to any of the following housing development project types and criteria outlined under PRC Section 20180.1(b)(4):

(A) A proposed housing development project that is not similar in kind to the projects listed in the statutory or categorical exemption.

(B) A proposed housing development project that is ineligible for the statutory exemption or categorical exemption due to two or more conditions.

(C) A proposed housing development project that includes a distribution center or oil and gas infrastructure.

(D)(i) A proposed housing development project located on natural and protected lands, as defined pursuant to Section 21067.5.

(D)(ii) The definition of "natural and protected lands" described in clause (i) does not include the lands described in subdivision (o) of Section 21067.5.

(E) The project site or the parcel size exceeds four acres, and either of the following occurred:

  (i) The project is a builder's remedy project, as defined in paragraph (11) of subdivision (h) of Section 65589.5 of the Government Code.

  (ii) The project applicant applied pursuant to paragraph (5) of subdivision (d) of Section 65589.5 of the Government Code as it read before January 1, 2025.

None of the abovementioned housing development project criteria outlined under PRC Section 20180.1(b)(4) apply to the proposed project.

Rincon Consultants, Inc. evaluated the project's consistency with the criteria set forth in PRC Section 21080.1(a) and 21080.1(b) to confirm the project's eligibility for streamlining under the "Near-Miss" rule. After conducting this evaluation, Rincon found that the project would otherwise be consistent with all of the eligibility criteria for a Class 32 "infill housing" CE, but for a sole condition in CEQA Guidelines Section 15300.2. The sole condition making this project ineligible for the Class 32 CE is that the project is located on a hazardous waste site that is included on a list compiled pursuant to Section 65962.5 of the Government Code (CEQA Guidelines Section 15300.2(e).), and therefore the proposed project does not satisfy the Class 32 CE's Exceptions to the Exemptions for the Hazardous Waste Sites Criterion, as discussed below under Section 3.2.4.

This document accordingly analyzes, pursuant to Public Resources Code section 21080.1, the environmental effects that may be caused by the project's location on a hazardous waste site, the sole condition that makes this project ineligible for the Class 32 CE.

2 Project Description

2.1 Project Title

2900-2920 Shattuck Avenue Mixed-Use Project

2.2 Lead Agency Name and Address

City of Berkeley
Planning & Development Department, Land Use Division
1947 Center Street, 2nd Floor
Berkeley, California 94704

2.3 Contact Person and Phone Number

Singeh Saliki, Senior Planner, (510) 981-7410

2.4 Project Sponsor's Name and Address

NX Ventures
1958A University Avenue
Berkeley, California 94704

2.5 Project Location

The project site encompasses 19,586 square feet (approximately 0.45 acres) and is located at 2900-2920 Shattuck Avenue (Assessor's Parcel Number [APN] 053-1590-005-01), on the southwest corner of Russell Street and Shattuck Avenue in Berkeley. The site has frontage on Russell Street and Shattuck Avenue. Local access to the project site is available from Shattuck Avenue, Russell Street, and Adeline Street. Interstate 580/80 (I-580/I-80), California State Route (SR) 13 (Ashby Avenue), SR 123 (San Pablo Avenue), and SR 24 provide regional vehicular access.

Figure 1 shows the regional location of the project site, and Figure 2 shows the project site's immediate location and selected nearby land uses.

Fig 2 Project Site

2.6 General Plan Designation

The project site is designated as Neighborhood Commercial. This land use designation allows for a mix of residential and commercial uses. (City of Berkeley 2002).

2.7 Zoning

The project is in the South Area Commercial District (C-SA). As stated in Berkeley Municipal Code (BMC) Section 23.204.100, the purpose of the C-SA District is to encourage mixed-use development and amenities that support pedestrian-oriented uses. The C-SA District designation allows for mixed-use buildings of up to 36 feet and three stories pursuant to BMC Table 23.204-28; however, this height can be modified without limit with a use permit (up to a FAR of 4.0) to encourage the utilization of public transit pursuant to BMC 23.204.100.D.3. Thus, the zoning allows the project unlimited height and stories with a use permit. Mixed-use development, such as the proposed project, is also allowed in the C-SA District with approval of a Use Permit.

2.8 Surrounding Land Uses and Setting

The project site is part of a fully urbanized block in Berkeley. The site is developed with three existing one-story commercial buildings and a surface parking lot. The existing building on the northeastern corner of the site (at the corner of Shattuck Avenue and Russell Street) was constructed in 1968; the building south of the building on the northeastern corner of the site was constructed in 1947; and the last building south of the middle building adjacent to the surface parking lot was constructed in 1952. All three buildings total approximately 8,289 square feet in size. The site is generally level and does not include landscaping or trees, although there are four existing street trees located in the right-of-way fronting Shattuck Avenue.

The project vicinity is characterized by commercial and residential uses. Specifically, the project site is immediately across Russell Street from Berkeley Bowl East to the north; Shattuck Avenue, commercial uses, office uses, and residential uses to the east; commercial and retail uses and a Chevron gas station to the south; and residential uses to the west. The Ashby Bay Area Rapid Transit (BART) Station is located approximately 0.3 miles southwest of the site. The site is also accessible from several bus lines operated by the Alameda-Contra Costa Transit District (AC Transit); these include bus routes 18, 27, 800, 7, and F. Russell Street is a City of Berkeley Bicycle Boulevard. The project site is located within a Transit Priority Area (TPA), which is defined in California Public Resource Code Section 21099 as “an area within one-half mile of a major transit stop that is existing or planned.” A “major transit stop” includes a rail or bus rapid transit station. The Ashby BART station is well within 0.5-mile of the site.

Figure 3 and Figure 4 show photographs of the existing site and its surroundings.

Figure 3 Project Site Existing Conditions

Photograph 2. Existing surface parking lot on the project site, viewed from Shattuck Avenue looking west.

Figure 4 Project Site Existing Conditions Continued

Photograph 3. Existing surface parking lot and the southern façade of existing building on the project site, viewed from the Shattuck Avenue sidewalk looking northwest.

Photograph 4. Russell Street frontage viewed from across Russell Street looking southwest.

2.9 Description of Project

The project would involve demolition of the three existing one-story commercial buildings, totaling 8,289 square feet, and surface parking lot, and construction of an 11-story, 131,583 square-foot mixed-use building with 242 dwelling units and 3,720 square feet of ground-floor retail space, using density bonus provisions. The project would include 26 units on the second to tenth floor and eight units on the eleventh floor, with an average unit size of 528 square feet.

Table 1 summarizes the project characteristics. Figure 5 shows the proposed site plan and Figure 6 shows the proposed east and north building elevations.

Table 1 Project Summary

Characteristics	Details
Address	2900-2920 Shattuck Avenue
APN	053-1590-005-01
Height/Stories	125 ft 2 in / 11 stories
Gross Square Feet	131,583 sf
FAR	4.0
Front Yard Setback (Russell Street)	Varies from 0 in to 2 ft
Street Side Yard Setback (Shattuck Avenue)	1 ft
Side Yard Setback	27 ft 8 in
Rear Yard Setback	1 ft 5 in
Parking Spaces	5 residential spaces 8 commercial spaces Total: 13 spaces
Bicycle Parking	60 long-term residential spaces 6 short-term residential spaces 2 commercial spaces Total: 68 spaces
Open Space	Ground level garden: 2,266 sf Roof deck: 4,743 sf Total: 7,009 sf
Residential	
Number of Residential Units	242
Number of Studio Units	219 (90% of total units)
Number of 1 Bedroom Units	9 (4% of total units)
Number of 2 Bedroom Units	13 (5% of total units)
Number of 3 Bedroom Units	1 (1% of total units)
Number of Affordable Units	30 (20% of the Base Units)
Commercial	
Retail Square Footage	3,720 sf

sf = square feet; ft = feet; in = inches

Proposed North Elevation

Affordable Housing and Density Bonus

The proposed project would include 22 very-low income units (15 percent of Base units) and eight moderate-income units (five percent of base units) for a total of 30 below-market-rate units. This project is subject to the City of Berkeley's Inclusionary Housing requirement (BMC Chapter 23.328) which requires all Housing Development Projects to provide at least 20 percent of the 142 base project residential units as affordable at very-low-income or low-income levels or to pay an in-lieu fee. The project applicant would provide 22 of the required 28.4 very-low-income and low-income units on-site. For the remaining requirement, the project applicant would be required to pay an in-lieu fee toward Berkeley's Affordable Housing Trust Fund.

The base density for the project site would allow for 142 units. The project would provide 15 percent of the base project units as very-low-income affordable units and 5 percent of the base project as moderate-income affordable units and is eligible for a density bonus under Government Code Section 65915. State Density Bonus Law allows for additional density ("bonus") and flexibility in development standards in exchange for providing affordable housing units on site. The project applicant is requesting a percent density bonus of 70 percent with the following waivers and concessions:

- Waiver to reduce the open space requirement: to provide 7,009 square feet where 9,680 square feet is required;
- Waiver to reduce the long-term bicycle parking requirement: to provide 68 spaces where 94 spaces is required;
- Waiver of BMC Section 23.204.100(D) to exceed building height limits in Table 23-204.28: to be 125'-2", and 11 stories (no maximum in Base with Use Permit);
- Waiver of BMC Section 23.204.100(D) to reduce the front setback to 0', street side setback to 1', and rear setback to 1'-5" (no minimum in Base with Use Permit);
- Waiver of BMC Section 23.204.100(D) to increase lot coverage to 52 percent (no maximum in Base with Use Permit); and
- Waiver of BMC Section 23.204.100(D) to increase floor area ratio (FAR) to 6.72, where 4.0 is the limit.

Site Access and Parking

Vehicular access to the project site would be provided via a 19-foot-wide driveway on the northwestern corner of the site along Russell Street. Pursuant to AB 2097, because the project site is within 0.5-mile of the Ashby BART Station, the proposed project would not be subject to automobile parking requirements. The proposed project would include five vehicle parking spaces for the residential units and eight parking spaces for the retail use, for a total of 13 vehicle parking spaces located on the western portion of the site on the ground floor. The proposed project would also include 60 long-term bicycle parking spaces and six short-term bicycle parking spaces for the residential portion as well as two bicycle parking spaces for the retail portion for a total of 68 bicycle parking spaces provided on the ground floor of the proposed building.

Landscaping

Implementation of the proposed project would reduce the amount of impervious surfaces on the project site by 4,162 square feet, from the existing 19,586 square feet of impervious surfaces to 15,424 square feet of impervious surfaces. The proposed project would include 1,355 square feet of landscaped areas on the ground level garden, and 2,361 square feet of landscaped areas on the roof deck, for a total of 3,716 square feet of landscaped areas. Approximately 40 percent of plants would be California native and wildlife-supporting. Landscaped areas would include flow-through planters with a variety of low-water use groundcover, trees, and shrubs.

There are four existing street trees adjacent to the project site along the project frontage along Shattuck Avenue. The proposed project would involve removing the existing street trees and planting 20 trees along the site boundaries. This includes 10 Canary Island Pines (*Pinus canariensis*) along the western boundary of the site; two Brisbane Box trees (*Lophostemon confertus*) along the northern boundary of the site fronting Russell Street; and eight European Hornbeams (*Carpinus betulus 'Fastigiata'*) along the eastern boundary of the site fronting Shattuck Avenue.

Open Space and Amenities

The project would include 7,009 square feet of open space, consisting of 2,266 square feet in the ground level garden and 4,743 square feet on the roof deck. The first floor would also include a leasing office, a lobby, and storage facilities for residential use. The roof deck would include a lounge for tenant use.

Sustainable Building Features

The project would meet the California Green Building Standards Code (CALGreen) requirements for new development. The project's sustainability features would include the following:

- Solar panels on the roof
- EV spaces in compliance with the City of Berkeley's Green Building Requirements for EVs
- Low-carbon concrete (cement use be reduced not less than 25 percent)
- Landscaping compliant with the State's Model Water Efficient Landscape Ordinance
- Construction and demolition debris diversion (100 percent of concrete, asphalt, and soil/land clearing debris; 65 percent of remaining debris)

Construction and Phasing

Construction of the project, including demolition of the existing buildings totaling 8,298 square feet, would last approximately 16 months. Construction of the proposed building would occur in four phases: demolition, grading, building construction, and module installation. Construction would occur between 7:00 a.m. and 6:00 p.m. on weekdays and between 9:00 a.m. and 4:00 p.m. on Saturdays. Construction is anticipated to primarily occur on weekdays, with construction occurring on Saturday only on emergency basis. Approximately 6,000 cubic yards of material would be excavated; 4,000 cubic yards of material would be used as fill; and 2,000 cubic yards of material would be exported during demolition, grading, and site preparation, respectively. Typical heavy construction equipment during project grading could include dozers, loaders, and graders. Pile driving is not proposed during construction of the project. The project would utilize United States Environmental Protection Agency (USEPA) Tier 4 construction equipment.

Stormwater and Utilities

The project would include utility connections for water, wastewater, stormwater drainage, power, and telecommunications services in accordance with requirements of applicable utility providers. These utilities would connect to existing infrastructure near the site. Ava Community Energy would provide electrical services; East Bay Municipal Utility District (EBMUD) would provide water service; and the City of Berkeley would provide stormwater, wastewater, and solid waste services. The project would rely on existing public services, including but not limited to, City of Berkeley police and fire protection, Berkeley Unified School District for schools, and parks and open spaces provided by the City of Berkeley, East Bay Regional Parks District, the County of Alameda, and the State of California.

Requested Entitlements

The project is subject to approval by the City of Berkeley's Zoning Adjustments Board, the decision of which would be appealable to the City Council. The project would require the following discretionary entitlements from the City of Berkeley:

- Use Permit under BMC Section 23.326.070(A) to demolish a non-residential building
- Use Permit under BMC Section 23.204.020(A) to construct a new mixed-use development
- Use Permit under BMC 23.204.020(A) to construct dwelling units
- Use Permit under BMC Section 23.204.030(A) to create new floor area of 3,000 square feet or more
- Use Permit under BMC 23.204.100(D)(2) to modify height, setback, and lot coverage requirements
- Administrative Use Permit under BMC 23.304.050(A) to allow architectural elements to exceed the district height limit

In addition, the project is eligible for a density bonus under Government Code Section 65915, through the inclusion of 22 very low-income units and 8 moderate-income units in the project. The project includes waivers as allowed by State Density Bonus Law.

2.10 Other Public Agencies Whose Approval is Required

The project could potentially require oversight or approvals from the San Francisco Bay RWQCB. No discretionary approvals from other public agencies would be required for this project.

2.11 Have California Native American Tribes Traditionally and Culturally Affiliated with the Project Area Requested Consultation Pursuant to Public Resources Code Section 21080.3.1?

Under AB 52, lead agencies are required to "begin consultation with a California Native American tribe that is traditionally and culturally affiliated with the geographic area of the proposed project." California Native American tribes to be included in the process are those that have requested notice of projects proposed within the jurisdiction of the lead agency. On November 24, 2025, Rincon Consultants, Inc. requested a search of the Sacred Lands File as well as a contact list of the Native Americans culturally affiliated with the project area. Results from the Sacred Lands File indicated a positive result. The City of Berkeley sent letters to 23 Native American contacts on December 30, 2025.

Kanyon CoyoteWoman Sayers-Roods, representing the Indian Canyon Mutsun Band of Costanoan Ohlone People, requested consultation with the City, which occurred on January 28, 2026. Ms. Sayers-Roods recommended tribal cultural awareness training for construction personnel. No other tribes have requested for consultation under AB 52.

The proposed project would be required to implement the following Standard Conditions of Approval (COAs) related to Worker Environmental Awareness Training for construction personnel and procedures for the unanticipated discovery of tribal cultural resources, which consist of the action requested by the Tribe through the consultation process.

> *Standard COA - Worker Environmental Awareness Program (WEAP)*
>
> Prior to ground disturbance, the applicant shall incorporate information on archeological resources into the Project's Worker Environmental Awareness Training (WEAP) materials, or a stand-alone Archeological Resources WEAP shall be submitted to the Department of Planning and Development at the City of Berkeley. The qualified paleontologist or his or her designee shall conduct training for construction personnel regarding the appearance of fossils and the procedures for notifying archeological staff should fossils be discovered by construction staff. The Archeological WEAP training shall be fulfilled simultaneously with the overall WEAP training,

or at the first preconstruction meeting at which a qualified archeologist attends prior to ground disturbance. Printed literature (handouts) shall accompany the initial training. Following the initial WEAP training, all new workers and contractors must be trained prior to conducting ground disturbance work.

Standard COA - Halt Work/Unanticipated Discovery of Tribal Cultural Resources

In the event that cultural resources of Native American origin are identified during construction, all work within 50 feet of the discovery shall be redirected. The project applicant and project construction contractor shall notify the City Planning Department within 24 hours. The City will contact any tribes who have requested consultation under AB 52, as well as contact a qualified archaeologist, to evaluate the resources and situation and provide recommendations. If it is determined that the resource is a tribal cultural resource and thus significant under CEQA, a mitigation plan shall be prepared and implemented in accordance with state guidelines and in consultation with Native American groups. If the resource cannot be avoided, additional measures to avoid or reduce impacts to the resource and to address tribal concerns may be required.

3 Class 32 Categorical Exemption Evaluation

3.1 Consistency Analysis

As discussed above, under PRC Section 21080.1, for CEQA "Near Miss" projects, CEQA applies only to the effects on the environment caused by the single condition that makes the project ineligible for the exemption at issue. The proposed project would be eligible for the Class 32 Categorical Exemption but for its location on a site that appears on the Cortese list. Thus, environmental review under CEQA is limited to the effects caused by the project's location on that site.

Although not required by Public Resources Code Section 21080.1, the following discussion is included for informational purposes only to explain how the project otherwise meets the criteria for a Class 32 Categorical Exemption. This discussion should not be construed to limit or negate the applicability of the "Near-Miss" provisions of Section 21080.1.

3.1.1 Criterion (a)

The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations.

The parcel at 2900-2920 Shattuck Avenue (APN 053-1590-005-01) is zoned South Area Commercial District (C-SA). The purpose of the C-SA District is to encourage mixed-use development and amenities that support pedestrian-oriented uses.

The City of Berkeley has determined that the proposed project is consistent with the applicable City of Berkeley General Plan designations and policies, as well as with applicable zoning designations and regulations, except where waivers and concessions are requested pursuant to State Density Bonus Law. As described above in the Project Description, the project site is designated Neighborhood Commercial under the Berkeley General Plan, which allows pedestrian-oriented, neighborhood-serving commercial development, and multi-family residential structures. The project would comply with applicable development standards of the BMC related to permitted uses, site access, parking, and accessory uses. Where the project exceeds base zoning standards for building height, setbacks, lot coverage, floor area ratio (FAR), open space, and bicycle parking, the applicant has requested waivers and concessions in accordance with State Density Bonus Law (Government Code Section 65915) and applicable provisions of the Berkeley Municipal Code.

Applicable General Plan policies include:

Policy LU-3 Infill Development: Encourage infill development that is architecturally and environmentally sensitive, embodies principles of sustainable planning and construction, and is compatible with neighboring land uses and architectural design and scale.

Policy LU-23 Transit-Oriented Development: Encourage and maintain zoning that allows greater commercial and residential density and reduced residential parking requirements in areas with above-average transit service such as Downtown Berkeley.

Policy LU-26 Neighborhood Commercial Areas: Maintain and improve Neighborhood Commercial areas, such as Elmwood, Solano, and North Shattuck, as pedestrian-friendly, visually attractive areas and ensure that Neighborhood Commercial areas fully serve neighborhood needs.

Goal A: Housing Affordability

Policy H-4 Economic Diversity Encourage: Encourage mixed housing development through regulatory requirements and incentives.

Goal E: Affirmatively Further Fair Housing

Policy H-31: Affordable Accessible Housing: Encourage new construction and rehabilitation of accessible housing.

Policy T-10: Trip Reduction: To reduce automobile traffic and congestion and increase transit use and alternative modes in Berkeley, support, and when appropriate require, programs to encourage Berkeley citizens and commuters to reduce automobile trips, such as:

1. Participation in a citywide Eco-Pass Program.
2. Participation in the Commuter Check Program.
3. Carpooling and provision of carpool parking and other necessary facilities.
4. Telecommuting programs.
5. "Free bicycle" programs and electric bicycle programs.
6. "Car-sharing" programs.
7. Use of pedal-cab, bicycle delivery services, and other delivery services.
8. Programs to encourage neighborhood-level initiatives to reduce traffic by encouraging residents to combine trips, carpool, telecommute, reduce the number of cars owned, shop locally, and use alternative modes.
9. Programs to reward Berkeley citizens and neighborhoods that can document reduced car use.
10. Limitations on the supply of long-term commuter parking and elimination of subsidies for commuter parking.
11. No-fare shopper shuttles connecting all shopping districts throughout the city.

Policy US-26 Pedestrian-Friendly Design: Architecture and site design should give special emphasis to enjoyment by, and convenience and safety for, pedestrians.

The proposed project would be consistent with applicable goals and policies of the City of Berkeley General Plan, including policies promoting infill development, mixed-use and transit-oriented housing, increased residential densities on major corridors, affordable housing production, reduced automobile dependence, and pedestrian-oriented urban design. The project's location within a TPA and a designated commercial corridor is aligned with the General Plan's land use, housing, and transportation objectives. Consistent with these policies, the project would involve a mixed-use development, including affordable units, in a neighborhood with mixed residential types and densities. The project would be within walking distance of key services including a grocery store (Berkeley Bowl Marketplace), a pharmacy (Walgreen's) and parks (Grove Park); and would have frontage on Shattuck Avenue, creating a relationship with the public street.

The project would be consistent with the site's General Plan land use designation, applicable General Plan goals and policies, C-SA zoning designation, and C-SA zoning regulations. Therefore, the project would meet the requirements of *criterion (a)*.

3.1.2 Criterion (b)

The proposed development occurs within city limits on a project site of no more than five acres substantially surrounded by urban uses.

The project is located on an approximately 0.45-acre site within a fully urbanized area of the City of Berkeley and is immediately surrounded by existing residential, commercial, and retail uses on all sides. Therefore, the project would be consistent with *criterion (b)*.

3.1.3 Criterion (c)

The project site has no value as habitat for endangered, rare, or threatened species.

The project site is located within a developed urban area that lacks suitable habitat for sensitive animal or plant species. The project site is currently developed with three existing one-story commercial buildings and a surface parking lot with limited, generally non-native landscaping and four existing street trees and does not contain suitable habitat for sensitive species. Nevertheless, the proposed project would be required to comply with the following City's Standard Condition of Approval (COA) which would avoid disturbance to nesting birds:

> *Standard COA – Avoid Disturbance of Nesting Birds*
>
> Initial site disturbance activities, including vegetation and concrete removal, shall be prohibited during the general avian nesting season (February 1 to August 30), if feasible. If nesting season avoidance is not feasible, the applicant shall retain a qualified biologist to conduct a preconstruction nesting bird survey to determine the presence/absence, location, and activity status of any active nests on or adjacent to the project site. The extent of the survey buffer area surrounding the site shall be established by the qualified biologist to ensure that direct and indirect effects to nesting birds are avoided. To avoid the destruction of active nests and to protect the reproductive success of birds protected by the Migratory Bird Treaty Act and California Fish and Game Code, nesting bird surveys shall be performed not more than 14 days prior to scheduled vegetation and concrete removal. In the event that active nests are discovered, a suitable buffer (typically a minimum buffer of 50 feet for passerines and a minimum buffer of 250 feet for raptors) shall be established around such active nests and no construction shall be allowed inside the buffer areas until a qualified biologist has determined that the nest is no longer active (e.g., the nestlings have fledged and are no longer reliant on the nest). No ground-disturbing activities shall occur within this buffer until the qualified biologist has confirmed that breeding/nesting is completed and the young have fledged the nest. Nesting bird surveys are not required for construction activities occurring between August 31 and January 31.

The proposed project would introduce an 11story building to a site with existing one-story buildings, which could incrementally increase the potential for bird strikes due to building height and reflective surfaces. However, because the site is not adjacent to high-value avian habitat and the project would comply with the City's Bird Safe Ordinance (BMC Section 23.304.150(B)), which requires birdsafe design and operational measures, impacts related to bird strikes would be reduced.

A search on the U.S. Fish and Wildlife Services (USFWS) National Wetlands Inventory for the project site and surrounding area for the occurrences of wetlands concluded that there are no wetlands on or near the project site (USFWS 2025a). Additionally, according to the USFWS Threatened & Endangered Species Active Critical Habitat Report, the project site does not contain and is not adjacent to critical habitat for special status species (USFWS 2025b). The project site has no value as habitat for endangered, rare, or threatened species, and the project would meet the requirements under criterion (c).

3.1.4 Criterion (d)

Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality.

The following discussion provides an analysis of the project's potential effects with respect to traffic, noise, air quality, and water quality.

Traffic

Vehicle Miles Traveled (VMT)

The City of Berkeley has adopted thresholds of significance related to VMT in 2020 pursuant to Senate Bill (SB) 743 and the Governor's Office of Land Use and Climate Innovation (LCI) guidelines. Under the City's adopted criteria, residential projects are evaluated using the Household VMT per Capita metric and are considered to have a less-than-significant VMT impact if the project's VMT rate is at least 15 percent below the regional average household VMT per capita.

The City's VMT guidelines also provide screening thresholds under which a project may be presumed to have a less-than-significant VMT impact. One such screening criterion applies to projects located within a TPA, defined as areas within a one-half-mile walkshed of a major transit stop, including BART stations, or within a one-quarter-mile walkshed of high-quality transit corridors with frequent service. The project site is located approximately 0.3 miles northeast of the Ashby BART Station and is served by multiple AC Transit bus routes along Shattuck Avenue and in the surrounding area. As such, the project site qualifies as being located within a TPA under CEQA and the City of Berkeley's adopted VMT screening criteria. Residential development located within a TPA and consistent with the City's General Plan is presumed to generate VMT that is less than significant and would not require further project-specific VMT analysis.

In addition, the project is a high-density, mixed-use development in a fully urbanized infill location with access to regional and local transit, pedestrian facilities, and bicycle infrastructure. The project would provide a limited number of vehicle parking spaces and a substantial amount of bicycle parking, further supporting reduced automobile reliance and lower VMT generation. Therefore, the project satisfies the City of Berkeley's adopted SB 743 screening criteria for residential projects located within a TPA, and would be expected to generate household VMT per capita that is at least 15 percent below the regional average. Impacts related to VMT would be less than significant.

Site Access

As mentioned above in the Project Description, *Site Access and Parking*, vehicular access to the project site would be provided via a 19-foot-wide driveway on the northwestern corner of the site along Russell Street, which would be consistent with the City's driveway width guidelines of equal to or less than 20 feet.

Sight Distance

Providing adequate sight distance reduces the likelihood of a collision at a driveway or intersection and provides drivers with the ability to see vehicles, pedestrians and bicyclists when exiting a driveway.

Sight distance requirements vary depending on the roadway speeds. The posted speed limit on Shattuck Avenue is 25 miles per hour, for which the California Department of Transportation's (Caltrans) stopping sight distance is 150 feet. Thus, a driver exiting the project site must be able to see at least 150 feet on Shattuck Avenue to stop and avoid a collision. Compliance with City of Berkeley sight distance and visibility requirements would be ensured through the discretionary permit as well as the City's Public Works Department and Traffic Engineering Department review processes. With adherence to city regulations, impacts to sight distance would be less than significant.

Emergency Vehicle Access

Emergency vehicle access to the project site would be provided by Russell Street and Shattuck Avenue, which are both public roadways serving the project frontage. Emergency vehicles would be able to access the project site from the street network and position fire apparatus on curbside areas as needed for emergency response. Building access for fire response activities, including ground ladder placement and hose lays, would be provided from the public right-of-way and consistent with City of Berkeley Fire Department requirements.

The proposed project would comply with applicable fire access, life safety, and emergency response requirements and would be reviewed by the City of Berkeley Fire Department as part of the building permit process. With implementation of the proposed site design and compliance with applicable codes and standards, the project would not adversely affect emergency vehicle access or circulation. Additionally, Russell Street and Shattuck Avenue provide roadway widths that meet the minimum fire apparatus access width required by the California Fire Code (CFC), Section 503.2.1, which states, "Fire apparatus access roads shall have an unobstructed width of not less than 20 feet, exclusive of shoulders." Impacts to emergency vehicle access and circulation for the site would be less than significant.

Heavy equipment transport to and from the site could affect traffic in the vicinity of the project site during construction. However, each overweight/oversized load would be required to obtain all necessary permits, which would include conditions. Prior to issuance of grading and building permits, the project applicant would be required to submit and prepare a Transportation Construction Plan (TCP) and obtain construction/no parking permits pursuant to the following City of Berkeley Standard COAs for new construction projects:

> *Standard COA – Transportation Construction Plan (TCP)*
>
> The applicant and all persons associated with the project are hereby notified that a TCP is required for all phases of construction, particularly for the following activities:
>
> A. Alterations, closures, or blockages to sidewalks, pedestrian paths or vehicle travel lanes (including bicycle lanes);
> B. Storage of building materials, dumpsters, debris anywhere in the public right-of-way;
> C. Provision of exclusive contractor parking on-street; or
> D. Significant truck activity.
>
> Please contact the Office of Transportation at (510) 981-7010, or 1947 Center Street, and ask to speak to a traffic engineer. In addition to other requirements of the Traffic Engineer, this plan shall include the locations of material and equipment storage, trailers, worker parking, a schedule of site operations that may block traffic, and provisions for traffic control. The TCP shall be stamped and signed by a registered engineer prior to submittal. The TCP shall be consistent with any other requirements of the construction phase. A current copy of this Plan shall be available at all times at the construction site for review by City Staff.
>
> *Standard COA – Construction/No Parking Permits*
>
> Contact the Permit Service Center (PSC) at 1947 Center Street or 981-7500 for details on obtaining Construction/No Parking Permits (and associated signs and accompanying dashboard permits). Please note that the Zoning Officer and/or Traffic Engineer may limit off-site parking of construction-related vehicles if necessary to protect the health, safety, or convenience of the surrounding neighborhood.

Traffic would be generated by construction workers arriving and leaving the site. Construction worker peak hours would occur slightly before citywide commute peaks. These trips would be temporary and may require parking for construction worker vehicles during the construction period. The TCP requires that if construction employee parking cannot be provided on the project site then other provisions would need to be made for off-site parking, subject to approval of the City Traffic Engineering Department.

Construction of the project would also require the importation of construction material, including raw materials for the building foundation, the building, the parking garage, and landscaping, which may require substantial amounts of truck traffic. Under the provisions of the TCP, if importation and exportation of material becomes a traffic nuisance, then the City Engineer may limit the hours the activities can take place.

The project's construction would likely require temporary closures of sidewalks and/or vehicle and bicycle lanes adjacent to the site for safety. In the event this is required, the TCP would include a detailed plan for detouring pedestrian and bicycle traffic. The City requires permission to close sidewalks and an acceptable traffic control plan for closures to be permitted. In general, the pedestrian and bicycle operations in the area would not be expected to change significantly during construction beyond the addition of some truck traffic to the area.

The City requires preparation of a TCP as a Standard COA for projects involving new construction, which would indicate how parking for construction workers would be provided during construction and ensure a safe flow of traffic in the project area during construction. TCPs are subject to oversight by the City Engineer. While there is some increase in traffic associated with all construction projects, the required TCP would ensure the effects of construction are acceptable to the City. Therefore, with implementation of the City of Berkeley Standard COA to prepare a TCP and obtain construction/no parking permits, demolition and construction activities associated with the proposed project would not create significant traffic hazards and would be less than significant.

Parking Supply

Pursuant to AB 2097, because the project site is within 0.5-mile of the Ashby BART Station, the proposed project would not be subject to automobile parking requirements. The proposed project would include five vehicle parking spaces for the residential units and eight parking spaces for the retail use, for a total of 13 vehicle parking spaces located in the western portion of the site on the ground floor. This impact would be less than significant.

Bicycle Parking

As required under BMC Section 23E.28.070(C), the residential component of mixed-use projects must provide one long-term bicycle parking space per three bedrooms and two short-term bicycle parking spaces, or one short-term space per 40 bedrooms, whichever requirement is greater. In addition, BMC Section 23E.52.080(D) requires the commercial component of mixed-use projects to provide one bicycle parking space per 2,000 square feet of commercial gross floor area. Based on these standards, the proposed project would be required to provide 94 bicycle parking spaces.

The project would include 60 long-term and six short-term bicycle parking spaces for the residential uses, along with two bicycle parking spaces for the retail use, for a total of 68 bicycle parking spaces located on the ground floor. Although this total does not meet the BMC bicycle parking requirement, the reduced bicycle parking supply would be permissible with approval of the requested waivers pursuant to the State Density Bonus Law. With approval of these waivers, the project's bicycle parking provisions would be compliant, and this impact would be less than significant.

Pedestrian, Bicycle, and Transit Analysis

The General Plan *Transportation Element* contains the following applicable goals to encourage public transportation, automobile use reduction and bicycle and pedestrian safety.

1. Maintain and improve public transportation services throughout the city.
2. Reduce automobile use and vehicle miles traveled in Berkeley, and the related impacts, by providing and advocating for transportation alternatives and subsidies that facilitate voluntary decisions to drive less.
3. Create a model bicycle- and pedestrian-friendly city where bicycling and walking are safe, attractive, easy, and convenient forms of transportation and recreation for people of all ages and abilities.

Pedestrian and Bicycle Facilities

Bicycle paths, lanes and routes are typical examples of bicycle transportation facilities, which are defined by Caltrans as being in one of the following four classes:

- Class I- Provides a completely separated facility designed for the exclusive use of bicyclists and pedestrians with crossing points minimized.
- Class II- Provides a restricted right-of-way designated lane for the exclusive or semi-exclusive use of bicycles with through travel by motor vehicles or pedestrians prohibited, but with vehicle parking and crossflows by pedestrians and motorists permitted.
- Class III- Provides a right-of-way designated by signs or permanent markings and shared with pedestrians and motorists.
- Class IV- Provides an adjacent bike lane or bikeway that is physically separated from motor vehicle traffic.

Shattuck Avenue functions as a major north–south corridor that provides access to transit, commercial uses, and connecting bicycle facilities. Future residents and workers could utilize bicycle facilities on nearby streets such as Class III bicycle boulevards along Russell Street and Milvia Street, which support bicycle circulation and provide alternative routes to local destinations, transit stations, and neighborhood commercial areas. These facilities collectively provide regional and local bicycle connectivity and support safe bicycle travel in the project vicinity. Pedestrian facilities in the project area consist of existing sidewalks, crosswalks, and transit stops that support a walkable urban environment. The anticipated increase in pedestrian and bicycle trips would not result in operational or safety deficiencies within nearby pedestrian or bicycle facilities, nor would it necessitate changes to their design or function. The project would be adequately served by the current and planned bicycle network and would not disrupt existing or future bicycle infrastructure. Therefore, this impact would be less than significant.

Transit Services

Rail transit service in the project area is provided by BART, with the Ashby BART Station located approximately 0.3 miles southwest of the project site. Bus transit service is provided by the AC Transit, with multiple local and rapid bus routes such as bus routes 18, 27, 800, 7, and F operating along Shattuck Avenue and adjacent streets within walking distance of the site.

The project site is located within a TPA and is well served by frequent transit service that provides connections to Downtown Berkeley, Oakland, San Francisco, and other regional destinations. Future residents and commercial patrons would have convenient access to these services, supporting the use of transit for daily trips. Accordingly, the proposed project would not adversely affect transit operations or capacity, and impacts related to transit service would be less than significant.

Conclusion

Compliance with City requirements and City's Standard COAs would ensure that impacts related to traffic remain less than significant. VMT per capita from the project would be below the Berkeley VMT significance criteria resulting in less than significant VMT impacts. Based on a review of the project site plan, site access along Shattuck Avenue is adequate for on-site circulation and safety. Furthermore, the proposed project would not have a substantially adverse effect on the existing transit, pedestrian, or bicycle facilities in the area. Therefore, the project would meet the requirements for Traffic under *criterion (d)*.

Noise

Noise Characteristics and Measurement

Noise is defined as unwanted sound that disturbs human activity. A noise level (or volume) is generally measured in decibels (dB) using the A-weighted sound pressure level (dBA). The A-weighting scale is an adjustment to actual sound power levels to be consistent with that of human hearing response, which is most sensitive to frequencies around 4,000 Hertz (about the highest note on a piano) and less sensitive to low frequencies (below 100 Hertz).

One of the most frequently used noise metrics that considers duration as well as sound power level is the equivalent noise level (L_{eq}). The L_{eq} is a steady A-weighted noise level that is equivalent to the amount of energy contained in the actual varying levels over a period of time (essentially, L_{eq} is the average sound level).

Noise Standards

Berkeley Municipal Code

BMC Section 13.40, Community Noise sets the City's standards for on-site operational noise and construction noise. As shown in Table 2, BMC Section 13.40.050, Exterior Noise Standards, provides the exterior noise limits not to be exceeded for more than 30 minutes in any hour in various zoning districts. If the measured ambient noise level exceeds these limits, the allowable noise exposure standard would be the ambient noise level.

Table 2 City of Berkeley Exterior Noise Limits

Zone	Time Period	L_{50}[1] Noise Level, dBA
R-1, R-2	7:00 a.m. – 10:00 p.m.	55
	10:00 p.m. – 7:00 a.m.	45
R-3 and above	7:00 a.m. – 10:00 p.m.	60
	10:00p.m. – 7:00 a.m.	55
Commercial	7:00 a.m. – 10:00 p.m.	65
	10:00 p.m. – 7:00 a.m.	60
Industry	Anytime	70

[1] L_{50} is the noise level that cannot be exceeded for more than 30 minutes in any hour.

Source: Berkeley, Municipal Code Section 13.40.050

Section 13.40.070 of the BMC sets standards for construction noise. This section prohibits construction activity between the hours of 7:00 p.m. and 7:00 a.m. on weekdays, 8:00 p.m. to 9:00 a.m. on weekends and holidays such that the resulting noise creates a noise disturbance across a residential or commercial property line.

Section 13.40.070 of the BMC also prohibits loading, unloading, opening, closing or other handling of boxes, crates, containers, building materials, or similar objects between the hours of 10:00 p.m. and 7:00 a.m., such that the noise across a residential property line exceeds the standards shown in Table 2.

For Use Permits in non-residential zones, the City's Standard COA for construction hours is limited to between the hours of 7:00 a.m. and 6:00 p.m. on Monday through Friday, and between 9:00 a.m. and 4:00 p.m. on Saturday. No construction-related activity may occur on Sunday or any Federal Holiday.

Standard COA – Construction Hours for Non R Districts

Construction activity shall be limited to between the hours of 7:00 AM and 6:00 PM on Monday through Friday, and between 9:00 AM and 4:00 PM on Saturday. No construction-related activity shall occur on Sunday or any Federal Holiday.

Existing Ambient Noise Levels

The primary source of noise in the vicinity of the project site is motor vehicle traffic, including automobiles, trucks, buses, and motorcycles. Among area roadways, Shattuck Avenue and Russell Road produce noise from vehicles adjacent to the project site. Secondary sources of noise include garbage trucks and other delivery trucks, pedestrian activity and conversations. While typical activities such as conversations may occur at nearby residences, traffic is the main contributor to existing ambient noise levels. According to the City of Berkeley General Plan, Environmental Management Element (Berkeley 2002), the project site is located between the 65-70 dBA L_{dn} noise contour.

Construction Noise

The FTA has developed guidance for determining if construction of a project would expose various land uses to significant noise levels or if a project would result in a substantial temporary increase in noise levels. Based on FTA guidance, a significant impact would occur if project-generated construction noise exceeds the 8-hour 80 dBA Leq(8-hour) noise limit at nearby residences (FTA 2018).

As discussed above, BMC Section 13.40.070 regulates temporary construction noise. Construction of the project would generate temporary noise that would be audible at the single-family residence adjacent to the west of the project site. Noise associated with construction is a function of the type of construction equipment, the location and sensitivity of nearby land uses, and the timing and duration of the construction activities. Based on construction details provided by the applicant, it is estimated that the construction period would involve approximately 4 months from January 2027 through May 2027. While all phases of construction would generate noise, the site preparation and grading phases would typically generate the highest noise levels. According to applicant-provided information, pile drivers would not be used in building construction.

Construction noise was estimated using the Federal Highway Administration's Roadway Construction Noise Model (RCNM). Noise was modeled based on the construction equipment list provided by the applicant and the distances to nearby sensitive receptors. For a conservative analysis, it was assumed that all construction equipment per phase would be operating simultaneously. Per recommendations provided in the Federal Transit Administration (FTA) *Transit Noise and Vibration Impact Assessment Manual*, all construction equipment was assumed to operate from the center of the project site to account for the mobile nature of equipment as it moves around the site over the course of a workday (FTA 2018). The anticipated usage factor (how many minutes per hour) associated with each piece of equipment was also included in modeling assumptions. The modeling effort did not account for attenuation from intervening structures between the project site and nearest sensitive receptors. Table 3 shows the noise levels generated during each phase of construction at the nearby sensitive receptors.

Table 3 Estimated Noise Levels during Project Construction

Construction Phase	$L_{eq(8\text{-hour})}$ dBA		
	RCNM Reference Noise Level[1] 50 feet	Single-Family Residences to the West 50 feet	Single-Family Residences to the East 120 feet
Demolition	81	81	73
Site Preparation	79	79	71
Grading	82	82	74
Building Construction	77	77	69
Paving	77	77	69
Architectural Coating	71	71	63

[1] RCNM reference noise levels are noise levels generated during each construction phase measured from a point 50 feet from the location of the construction phase.

Source: Roadway Construction Noise Model (RCNM). See Appendix A for modeling outputs.

As shown in Table 3, construction noise levels generated during demolition and grading phases would range between 81 and 82 dBA $L_{eq(8\text{-hour})}$ at affected sensitive receptors, exceeding the applicable FTA noise standard of 80 dBA $L_{eq(8\text{-hour})}$.

The City of Berkeley applies Standard COAs to development projects. The following Standard COAs, which are consistent with policies found in the Noise Element of the General Plan, would be applied to the project. According to FHWA (FHWA 2017), ensuring that construction equipment would be equipped with adequate muffler systems would result in a reduction of noise by 5-10 dBA, effectively reducing construction noise levels to 77 dBA $L_{eq\ (8\text{-hour})}$ or less, which is below the FTA noise standard of 80 dBA $L_{eq\ (8\text{-hour})}$, thereby reducing impacts related to project construction to a less than significant level.

Standard COA - Construction Noise Reduction Program

The applicant shall develop a site-specific noise reduction program prepared by a qualified acoustical consultant to reduce construction noise impacts to the maximum extent feasible, subject to review and approval of the Zoning Officer. The noise reduction program shall include the time limits for construction listed above, as measures needed to ensure that construction complies with BMC Section 13.40.070, Prohibited Acts. The noise reduction program should include, but shall not be limited to, the following available controls to reduce construction noise levels as low as practical:

1. Construction equipment should be well maintained and used judiciously to be as quiet as practical.
2. Equip all internal combustion engine-driven equipment with mufflers, which are in good condition and appropriate for the equipment.
3. Utilize “quiet” models of air compressors and other stationary noise sources where technology exists. Select hydraulically or electrically powered equipment and avoid pneumatically powered equipment where feasible.
4. Locate stationary noise-generating equipment as far as possible from sensitive receptors when adjoining construction sites. Construct temporary noise barriers or partial enclosures to acoustically shield such equipment where feasible.
5. Prohibit unnecessary idling of internal combustion engines.
6. If impact pile driving is required, pre-drill foundation pile holes to minimize the number of impacts required to seat the pile.

7. Construct solid plywood fences around construction sites adjacent to operational business, residences or other noise-sensitive land uses where the noise control plan analysis determines that a barrier would be effective at reducing noise.
8. Erect temporary noise control blanket barriers, if necessary, along building facades facing construction sites. This mitigation would only be necessary if conflicts occurred which were irresolvable by proper scheduling. Noise control blanket barriers can be rented and quickly erected.
9. Route construction related traffic along major roadways and away from sensitive receptors where feasible.

Construction Vibration

To determine potential impacts from construction vibration, this analysis is based on vibration limits contained in the 2018 Federal Transit Administration's (FTA) *Transit Noise and Vibration Impact Assessment Manual*, which are shown in Table 4.

Table 4 Groundborne Vibration Architectural Damage Criteria

Building Category	PPV (in/sec)
I. Reinforced concrete, steel, or timber (no plaster)	0.5
II. Engineered concrete and masonry (no plaster)	0.3
III. Non-engineered timber and masonry buildings	0.2
IV. Buildings extremely susceptible to vibration damage	0.12

in/sec = inches per second; PPV = peak particle velocity
Source: FTA 2018

Based on FTA recommendations, limiting vibration levels to below 0.2 inches per second peak particle velocity (in/sec PPV) at non-engineered timber and masonry buildings (residential buildings) and 0.3 in/sec PPV at engineered concrete and masonry (no plaster) (commercial structures) would prevent minor architectural damage.

The project does not include any substantial vibration sources associated with operation. Therefore, construction activities have the greatest potential to generate groundborne vibration affecting nearby receptors, especially during grading of the project site. The largest source of vibration from project construction would be from a vibratory roller that would be used when within approximately 15 feet from commercial buildings to the south and 45 feet to the residential buildings to the west. Table 5 identifies vibration velocity levels at the nearby sensitive receptors from a vibratory roller, large bulldozer and auger drill rig equipment, as well as smaller equipment such as a small bulldozer (under 100 horsepower).

Table 5 Construction Equipment Vibration Levels

	Approximate Vibration Level (in/sec PPV)			
Equipment	Reference Level 25 Feet from Source	Adjacent Commercial Building to the South	Adjacent Residential Building to the West	Multi-Family Residence to the East
Distance	**25**	**15**	**70**	**70**
Large Bulldozer	0.089	0.191	0.019	0.019
Loaded Truck	0.076	0.164	0.016	0.016
Static Roller	0.050	0.108	0.011	0.011
Small Bulldozer	0.003	0.006	0.001	0.001

Equipment	Approximate Vibration Level (in/sec PPV)			
	Reference Level 25 Feet from Source	Adjacent Commercial Building to the South	Adjacent Residential Building to the West	Multi-Family Residence to the East
Distance	**25**	**70**	**45**	**160**
Vibratory Roller	0.210	0.087	0.045	0.013

in/sec PPV = inches per second peak particle velocity

Note: Vibration analysis worksheets are included in Appendix A.

Source: FTA 2018.

The City has not adopted specific standards for vibration impacts during construction. Therefore, the FTA *Transit Noise and Vibration Impact Assessment Manual* (FTA 2018) was used to evaluate construction vibration impacts related to potential building damage. Based on the FTA criteria, construction vibration impacts would be significant if vibration levels exceed 0.2 in/sec PPV at residential structures and 0.3 in/sec PPV at commercial structures, which are the limits for potential building damage at these structures. Based on the information presented in Table 5, vibration levels could reach up to 0.191 in/sec PPV at the commercial buildings to the south from use of a large bulldozer and approximately 0.045 in/sec PPV at the residential building to the west from a vibratory roller. Therefore, construction vibration would not exceed the 0.2 in/sec PPV threshold for potential architectural damage to nearby residential structures or the 0.3 in/sec PPV threshold for structural damage to nearby commercial buildings.

The following City of Berkeley Standard COA would be applied to the project and impacts related to construction vibration would remain less than significant.

> *Standard COA - Damage Due to Construction Vibration*
>
> The project applicant shall submit screening level analysis prior to, or concurrent with demolition building permit. If a screening level analysis shows that the project has the potential to result in damage to structures, a structural engineer or other appropriate professional shall be retained to prepare a vibration impact assessment (assessment). The assessment shall consider project specific information such as the composition of the structures, location of the various types of equipment used during each phase of the project, as well as the soil characteristics in the project area, in order to determine whether project construction may cause damage to any of the structures identified as potentially impacted in the screening level analysis. If the assessment finds that the project may cause damage to nearby structures, the structural engineer or other appropriate professional shall recommend design means and methods of construction to avoid potential damage, if feasible. The assessment and its recommendations shall be reviewed and approved by the Building and Safety Division and the Zoning Officer. If there are no feasible design means or methods to eliminate the potential for damage, the structural engineer or other appropriate professional shall undertake study of existing conditions (study) of any structures (or, in case of large buildings, of the portions of the structures) that may experience damage.
>
> This study shall establish the baseline condition of these structures, including, but not limited to, the location and extent of any visible cracks or spalls; and include written descriptions and photographs.
>
> The study shall be reviewed and approved by the Building and Safety Division and the Zoning Officer prior to issuance of a grading permit. Upon completion of the project, the structures (or, in case of large buildings, of the portions of the structures) previously inspected will be re-surveyed, and any new cracks or other changes shall be compared to pre-construction conditions, and a determination shall be made as to whether the proposed project caused the damage. The findings shall be submitted to the Building and Safety Division and the Zoning Officer for review. If it is determined that project construction has resulted in damage to the structure, the damage shall be repaired to the pre-existing condition by the project sponsor, provided that the property owner approves of the repair.

Operational Noise

Stationary Sources

According to the site plans provided by Trachtenberg Architects (TA 2025), the primary on-site operational noise source from the project would be one window-mounted Packaged Terminal Air Conditioner (PTAC) Heating, Ventilation, and Air Conditioning (HVAC) unit, for the residential buildings within the project site. Specific mechanical specifications for the proposed PTAC units are not available at this stage of project design. Therefore, this analysis assumes the use of a typical PTAC air conditioner that has a sound pressure level (SPL) of 62.6 dBA at 3 feet (Specifications for the modeled PTAC equipment are included in Appendix B). One PTAC unit operating over a 24-hour period was modeled to the adjacent sensitive receptor in order to calculate noise levels at the residential property line to the east and west. The PTAC unit modeled at the building façade of the proposed multi-family building would be approximately 30 feet from the nearest off-site sensitive residential property lines to the west. This is a conservative analysis as this does not take into account that the PTAC units are primarily located within the unit.

Accounting for the 30-foot distance between the proposed PTAC unit to the residential property line to the east and west, noise generated by the project's PTAC HVAC equipment would attenuate to approximately 43 dBA at the adjacent residential property lines to the west. Therefore, as stated in the City's Municipal Code Section 13.40.050 (BMC 2025), noise generated by the project's HVAC equipment would not exceed the City's residential nighttime noise limit of 45 dBA at a receiving residential property line, and impacts would be less than significant. Additionally, residential uses to the east and the Church by the Side of the Road to the east would be located further away and noise levels would be lower.

Off-Site Traffic Noise

Because the City of Berkeley does not have adopted thresholds of significance for traffic noise increases, the following thresholds of significance, similar to those recommended by the Federal Aviation Administration (FAA)(FICON), are used to assess traffic noise impacts at sensitive receptor locations:

- Greater than 1.5 dBA L_{dn} increase for ambient noise environments of 65 dBA L_{dn} and higher.
- Greater than 3 dBA L_{dn} increase for ambient noise environments of 60 to 64 dBA L_{dn}.
- Greater than 5 dBA L_{dn} increase for ambient noise environments of less than 60 dBA L_{dn}.

Based on the trip generation estimate from the Air Quality modeling (Appendix C), the proposed project would generate up to 164 new daily vehicle trips that would incrementally increase noise levels on nearby roadways. Vehicle noise levels were determined by adding the project daily trips to the existing average daily traffic (ADT) volumes on the surrounding roadways (Replica 2024). The proposed project would not make substantial alterations to roadway alignments or substantially change the vehicle classifications mix on local roadways. Therefore, the primary factor affecting off-site noise levels would be increased traffic volumes.

Table 6 Predicted Increases in Traffic Noise Levels

Roadway Segment	Average Daily Trips (ADT)		Noise Level Increase (dBA L_{dn})	Significant Impact?
	Existing	Existing Plus Project		
Shattuck Avenue, North and South of Russell Road	18,455	18,619	<0.1	No

Source: Replica 2024

As shown in Table 6, the existing ADT on Shattuck Avenue adjacent to the project site is 18,455 (Replica 2024). The addition of 164 daily vehicle trips would result in a traffic noise increase of less than 0.1 dBA L_{dn}. For traffic-related noise increases, impacts would be considered significant if project-generated traffic would result in exposure of sensitive receptors to an unacceptable increase greater than the traffic noise increase thresholds described above. The project would not result in traffic noise increases greater than the most stringent traffic noise threshold of 1.5 dBA L_{dn}. Therefore, impacts would be less than significant.

Conclusion

Construction noise would generate noise levels of up to 82 dBA $L_{eq(8\text{-hour})}$ at the nearby residential and school property lines. Pursuant to General Plan EIR, implementation of the City's Standard COAs listed above would be required and would decrease construction noise by at least 5 dBA (FHWA 2017) to 77 dBA $L_{eq(8\text{-hour})}$, which is below the FTA's 80 dBA $L_{eq(8\text{-hour})}$ standard. In addition, construction would be limited to hours allowed by the City's Municipal Code Section 13.40.070. Impacts would be less than significant.

The project would introduce sources of operational noise to the site, including HVAC. The nearest residential building to the west of the project would be exposed to a noise level of 43 dBA from HVAC equipment which would not exceed the nighttime exterior noise standard of 45 dBA L_{eq} for residential uses. Therefore, impacts would be less than significant.

Project traffic would increase traffic noise by less than 0.1 dBA L_{dn} over existing conditions along Shattuck Avenue, north and south of Russell Street. Therefore, the project would not cause a traffic noise increase of the most stringent threshold of 1.5 dBA L_{dn} or more. As a result, off-site traffic noise impacts would be less than significant. The project would meet the requirements for Noise under *criterion (d)*.

Air Quality

A significant adverse air quality impact may occur when a project individually or cumulatively interferes with progress toward the attainment of the ozone standard by releasing emissions that equal or exceed the established long term quantitative thresholds for pollutants or causes an exceedance of a state or federal ambient air quality standard for any criteria pollutant. Primary criteria pollutants are emitted directly from a source (e.g., vehicle tailpipe, an exhaust stack of a factory, etc.) into the atmosphere. Primary criteria pollutants include reactive organic gases (ROG), nitric oxides (NO_X), carbon monoxide (CO), sulfur oxides (SO_X), and particulate matter (PM_{10} and $PM_{2.5}$). PM_{10} is particulate matter measuring no more than 10 microns in diameter, while $PM_{2.5}$ is fine particulate matter measuring no more than 2.5 microns in diameter. The project site is located within the San Francisco Bay Area Basin and falls under the jurisdiction of the Air District (Air District). The Air District has adopted guidelines for quantifying and determining the significance of air quality emissions in its *California Environmental Quality Act Air Quality Guidelines* (Air District 2023). The Air District recommends that lead agencies determine appropriate air quality emissions thresholds of significance based on substantial evidence in the record. The Air District's significance thresholds in the updated guidelines are the most appropriate thresholds for use in determining air quality impacts of the project.

This air quality analysis conforms to the methodologies recommended by *the Air District's California Environmental Quality Act Air Quality Guidelines* (Air District 2023). Table 7 shows the significance thresholds that have been recommended by the Air District for project operations and construction in the San Francisco Bay Area Air Basin.

Table 7 Air Quality Thresholds of Significance

Pollutant/ Precursor	Construction-Related Thresholds	Operation-Related Thresholds	
	Average Daily Emissions (pounds per day)	Maximum Annual Emissions (tpy)	Average Daily Emissions (lbs/day)
ROG	54	10	54
NO_X	54	10	54
PM_{10}	82 (exhaust)	15	82
$PM_{2.5}$	54 (exhaust)	10	54

Notes: tpy = tons per year; lbs/day = pounds per day; NO_X = oxides of nitrogen; $PM_{2.5}$ = fine particulate matter with an aerodynamic resistance diameter of 2.5 micrometers or less; PM_{10} = respirable particulate matter with an aerodynamic resistance diameter of 10 micrometers or less; ROG = reactive organic gases; tpy = tons per year.

Source: Air District 2023, Table 3-1

In addition, the Air District provides a preliminary screening methodology to conservatively determine whether a proposed project would exceed CO thresholds at the local level. If the following criteria are met, a project would result in a less than significant impact related to local CO concentrations:

1. Project is consistent with an applicable congestion management program established by the county congestion management agency for designated roads or highways, regional transportation plan, and local congestion management agency plans.
2. The project traffic would not increase traffic volumes at affected intersections to more than 44,000 vehicles per hour.
3. The project traffic would not increase traffic volumes at affected intersections to more than 24,000 vehicles per hour where vertical and/or horizontal mixing is substantially limited (e.g., tunnel, parking garage, bridge underpass, natural or urban street canyon, below-grade roadway).

Methodology

Since the proposed project would involve demolition of the existing structure on the project site, none of the screening criteria would apply to this project. Air pollutant emissions generated by project construction and operation were thus estimated using the California Emissions Estimator Model (CalEEMod), version 2022.1.1.14. CalEEMod uses project-specific information, including the project's land uses, square footages, and location to model a project's construction and operational emissions. The analysis reflects the construction and operation of the project as described under *Project Description*. Project assumptions and CalEEMod output is included as Appendix C. The site is currently developed with three commercial buildings and surface parking as discussed in Section 2.8. However, as a conservative estimate of emissions, existing uses were not modeled or included as part of the analysis.

Construction Emissions

Construction emissions modeled for this analysis include emissions generated by construction equipment and emissions generated by vehicle trips associated with construction, such as worker and vendor trips. CalEEMod estimates construction emissions by multiplying the amount of time equipment is in operation by emission factors. Construction of the proposed project was analyzed based on the applicant-provided construction schedule and construction equipment list. Construction would occur over approximately 16 months. It is assumed that all construction equipment used would be Tier 4 Final diesel-powered with the exception of aerial lifts which would be electric. This analysis assumes that the project would comply with all applicable regulatory standards. In particular, the project would be required to comply with Air District Regulation 8 Rule 3 for architectural coatings and Air District Regulation 6 Rule 3 for wood-burning devices. In addition, the project would also be required to comply with the Basic Best Management Practices for Construction-Related Fugitive Dust Emissions (Air District 2023):

- All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.
- All haul trucks transporting soil, sand, or other loose material off-site shall be covered.
- All visible mud or dirt trackout onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.
- All vehicle speeds on unpaved roads shall be limited to 15 mph.
- All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.
- All excavation, grading, and/or demolition activities shall be suspended when average wind speeds exceed 20 mph.
- All trucks and equipment, including their tires, shall be washed off prior to leaving the site.
- Unpaved roads providing access to sites located 100 feet or further from a paved road shall be treated with a 6- to 12-inch layer of compacted layer of wood chips, mulch, or gravel.
- Publicly visible signs shall be posted with the telephone number and name of the person to contact at the lead agency regarding dust complaints. This person shall respond and take corrective action within 48 hours. The Air District's General Air Pollution Complaints number shall also be visible to ensure compliance with applicable regulations.

Operational Emissions

Operational emissions modeled include mobile source emissions (i.e., vehicle emissions), energy emissions, and area source emissions. Mobile source emissions are generated by vehicle trips to and from the project site, trip generation for the 13 spaces was determined based on CalEEMod defaults as detailed in (Appendix C). Emissions attributed to energy use include natural gas consumption by appliances as well as for space and water heating. Area source emissions are generated by landscape maintenance equipment, consumer products and architectural coatings.

Construction Emissions

Project construction would involve demolition, grading, building construction, and module install (including architectural coating) activities that have the potential to generate air pollutant emissions. Table 8 summarizes the estimated average daily emissions of ROG, NO_X, CO, PM_{10} exhaust, $PM_{2.5}$ exhaust, and sulfur oxide (SO_x) during project construction. As shown in the table, project construction emissions for criteria pollutants would be below the Air District average daily thresholds of significance, and therefore impacts would be less than significant.

Table 8 Project Construction Average Daily Emissions

	Emissions (lbs/day)					
Year	ROG	NO_X	CO	PM_{10} (exhaust)	$PM_{2.5}$ (exhaust)	SO_X
Average Daily Emissions	6	5	13	<1	<1	<1
Thresholds (average daily emissions)	54	54	N/A	82	54	N/A
Threshold Exceeded?	No	No	N/A	No	No	N/A

See Appendix C for AQ CalEEMod worksheets; emission data presented is the average daily emissions outputs

N/A = not applicable; lbs/day = pounds per day; ROG = reactive organic gases; NO_X = oxides of nitrogen; CO = Carbon Monoxide; $PM_{2.5}$ = fine particulate matter with an aerodynamic resistance diameter of 2.5 micrometers or less; PM_{10} = respirable particulate matter with an aerodynamic resistance diameter of 10 micrometers or less; SO_x = oxides of sulfur.

No Air District threshold for CO or SO_X

Operational Emissions

Operational emissions are those associated with the general use of the project after construction. Table 9 summarizes the project's net operational daily and annual emissions and compares them to Air district thresholds. As shown in Table 9, project operational emissions for all criteria pollutants would be below the Air District thresholds of significance and therefore would be less than significant.

Table 9 Estimated Operational Daily Emissions

	Estimated Emissions					
Sources	**ROG**	**NO_X**	**CO**	**PM_{10}**	**$PM_{2.5}$**	**SO_X**
Daily Emissions (lbs/day)						
Mobile	<1	<1	4	1	<1	<1
Area	4	<1	7	<1	<1	<1
Energy	<1	1	<1	<1	<1	<1
Total Project Emissions	**5**	**1**	**11**	**1**	**<1**	**<1**
Average Daily Thresholds	54	54	N/A	82	54	N/A
Threshold Exceeded?	No	No	No	No	No	No
Annual Emissions (tons/year)						
Mobile	<1	<1	1	<1	<1	<1
Area	1	<1	1	<1	<1	<1
Energy	<1	<1	<1	<1	<1	<1
Total Project Emissions	**1**	**<1**	**2**	**<1**	**<1**	**<1**
Annual Thresholds	10	10	N/A	15	10	N/A
Threshold Exceeded?	No	No	No	No	No	No

See Appendix C for AQ CalEEMod worksheets; emission data presented is the highest of winter or summer outputs

N/A = not applicable; lbs/day = pounds per day; ROG = reactive organic gases; NO_X = oxides of nitrogen; CO = Carbon Monoxide; $PM_{2.5}$ = fine particulate matter with an aerodynamic resistance diameter of 2.5 micrometers or less; PM_{10} = respirable particulate matter with an aerodynamic resistance diameter of 10 micrometers or less; SO_x = oxides of sulfur.

No Air District threshold for CO or SO_X

Project Consistency with the 2017 Clean Air Plan

The California Clean Air Act requires that air districts create a Clean Air Plan that describes how the jurisdiction will meet air quality standards. The most recently adopted air quality plan is the 2017 Plan. The 2017 Plan focuses on two paramount goals, both consistent with the mission of Air District:

- Protect air quality and health at the regional and local scale by attaining all national and state air quality standards and eliminating disparities among Bay Area communities in cancer health risk from TACs
- Protect the climate by reducing Bay Area GHG emissions to 40 percent below 1990 levels by 2030, and 80 percent below 1990 levels by 2050

Under the Air District's methodology, a determination of consistency with the 2017 Plan should demonstrate that a project:

- Supports the primary goals of the air quality plan
- Includes applicable control measures from the air quality plan
- Does not disrupt or hinder implementation of any air quality plan control measures

A project that would not support the 2017 Plan's goals would not be considered consistent with the 2017 Plan. On an individual project basis, consistency with the Air District's quantitative thresholds is

interpreted as demonstrating support with the 2017 Plan's goals. The project would not result in exceedances of the Air District's thresholds for criteria air pollutants as shown above for construction and operational activities and thus would not conflict with the 2017 Plan's goal to attain air quality standards.

The 2017 Plan includes goals and measures to promote building decarbonization, conservation of water, use of on-site renewable energy, and energy efficiency. Electricity would be supplied by Ava Community Energy, which is anticipated to provide 100 percent carbon neutral power by 2028 (East Bay Community Energy Authority 2022). The project would comply with any applicable California Green Building Standards (CALGreen), including but not limited to, installation of energy-efficient equipment and lighting, and incorporation of onsite solar renewable energy and EV charging requirements for multi-family residences. Furthermore, the project would only include 13 parking spaces, five for residents and eight for patrons of the commercial spaces, thereby significantly reducing VMT from an average mixed-use development. Therefore, the project would not conflict with or obstruct the implementation of an applicable air quality plan, and impacts would be less than significant.

CO Emissions

According to the Air District, a project would have less than significant CO impacts if project-generated traffic would not increase traffic volumes at affected intersections to more than 44,000 vehicles per hour. There are no intersections in the project vicinity with volumes of more than 44,000 vehicles per hour. Further, there are no intersections where vertical or horizontal mixing would occur in the vicinity of the project so the 24,000 vehicle per hour limit is not applied. Additionally, the San Francisco Bay Area Air Basin has been designated attainment for both federal and State standards for CO since 1998 (Air District 2017). The project would include 13 total parking spaces for a maximum of 164 new trips per day. The project would not increase hourly traffic at any area intersection to more than 44,000 vehicles per hour and therefore would not result in a significant CO impact. Impacts related to CO emissions would be less than significant.

Toxic Air Contaminants

Certain population groups such as children, the elderly, and people with health issues are particularly sensitive to air pollution. The majority of sensitive receptor locations are schools, residences and hospitals. The closest sensitive receptors to the project site are the adjacent single-family residences to the west of the project site and directly across Shattuck Avenue to the east. The following subsections discuss the project's potential to result in impacts related to TAC emissions during construction and operation.

Construction

Construction-related activities would result in temporary project-generated emissions of diesel particulate matter (DPM) exhaust emissions from off-road, heavy-duty diesel equipment for site preparation, grading, building construction, and other construction activities. DPM was identified as a TAC by CARB in 1998 (CARB 2026).

Generation of DPM from construction projects typically occurs in a single area for a short period of time. Construction of the project would occur over approximately 16 months. The dose to which the receptors are exposed is the primary factor used to determine health risk. Dose is a function of the concentration of a substance or substances in the environment and the extent of exposure that person has with the substance. Dose is positively correlated with time, meaning that a longer exposure period would result in a higher exposure level for the Maximally Exposed Individual. The risks estimated for a Maximally Exposed Individual are higher if a fixed exposure occurs over a longer period of time. According to the California Office of Environmental Health Hazard Assessment, health risk assessments, which determine the exposure of sensitive receptors to toxic emissions, should be based on a 70-year exposure period; however, such assessments should be limited to the period/duration of activities associated with the project. Current models and methodologies for conducting health-risk assessments are associated with

longer-term exposure periods of 9, 30, and 70 years, which do not correlate well with the temporary and highly variable nature of construction activities, resulting in difficulties in producing accurate estimates of health risk (Air District 2023).

The maximum daily PM_{10} emissions would range from 0.009 to 0.197 lbs/day of exhaust (DPM), with the maximum emissions occurring during building construction activities. PM emissions would decrease for the remaining construction period because construction activities such as building construction and paving would require less intensive construction equipment.

The project would be required to comply with the CARB Air Toxics Control Measure that limits diesel powered equipment and vehicle idling to no more than five minutes at a location, and the CARB In-Use Off-Road Diesel Vehicle Regulation; compliance with these requirements would minimize emissions of TACs during construction. Further, the construction equipment would be at a minimum Tier 4 for the majority of the equipment with aerial lifts being electric in nature. In addition, the project would incorporate Air District *Basic Construction Mitigation Measures* during construction on the project site to reduce dust emissions. Therefore, project construction would not expose offsite sensitive receptors to substantial TAC concentrations, and impacts would be less than significant.

Operation

Sources of operational TACs include, but are not limited to, land uses such as freeways and high-volume roadways, truck distribution centers, ports, rail yards, refineries, chrome plating facilities, dry cleaners using perchloroethylene, and gasoline dispensing facilities. The project does not include construction of new gas stations, dry cleaners, highways, roadways, or other sources that could be considered new permitted or non-permitted sources of TAC or $PM_{2.5}$ in proximity to sensitive receptors. In addition, mobile emissions generated from the project would be minimal and spread over a broad geographical area. If an emergency back-up generator is included as part of the project, these emissions would be permitted through the Air District and a permit would not be granted if emissions exceed regulatory thresholds. Therefore, project operation would not expose sensitive receptors to substantial TAC concentrations, and impacts would be less than significant.

Asbestos

Demolition would be subject to Air District Regulation 11, Rule 2 (Asbestos Demolition, Renovation, and Manufacturing). Air District Regulation 11, Rule 2 is intended to limit asbestos emissions from demolition and the associated disturbance of asbestos-containing waste material generated or handled during these activities. This rule requires notification of the Air District of any regulated demolition activity, and contains specific requirements for surveying, notification, removal, and disposal of material containing asbestos. Impacts related to asbestos emissions from projects that comply with Regulation 11, Rule 2 are considered to be less than significant since the regulation would ensure the proper and safe disposal of asbestos containing material.

Lead

The proposed project would be required to comply with Air District Regulation 11, Rule 1 (Lead), which is intended to control the emission of lead into the atmosphere. In addition, the proposed project would also be required to comply with the California Code of Regulations, Section 1532.1, which requires testing, monitoring, containment, and disposal of lead-based materials, such that exposure levels do not exceed California Occupational Safety and Health Administration (CalOSHA) standards.

Odors

The Air District's 2022 CEQA Air Quality Guidelines identifies land uses that have the potential to generate substantial odor complaints. The uses in the table include wastewater treatment plants, landfills or transfer stations, refineries, composting facilities, confined animal facilities, food manufacturing, smelting plants, and chemical plants (Air District 2022). Odors are typically associated with industrial

projects involving the use of chemicals, solvents, petroleum products, and other strong-smelling elements used in manufacturing processes, as well as sewage treatment facilities and landfills.

The project does not involve, nor would locate, new sensitive receptors in proximity to odor-emitting uses as identified in the Air District's 2022 CEQA Air Quality Guidelines. The proposed uses would not generate objectionable odors that would affect a substantial number of people. Furthermore, the project would be subject to Air District Regulation 7, Odorous Substances, which requires abatement of any nuisance generating an odor complaint. Therefore, the project would not substantially cause new sources of odors and would not significantly expose sensitive receptors to existing or new odors, and impacts would be less than significant.

Conclusion

The proposed project would not generate significant air quality impacts or require analysis for CO hotspots or TACs based on Air District criteria. Therefore, the project would meet the requirements for Air Quality under *criterion (d)*.

Water Quality

The project site is currently developed with three one-story commercial buildings and a surface parking lot and does not include ponds, streams, or other surface water features. No creeks, rivers, or other watercourses are located on or adjacent to the project site. Construction of the proposed project would not directly affect water quality in existing drainage channels.

The project site is currently almost entirely covered by impervious surfaces associated with existing buildings and paved areas. Under the proposed project, redevelopment would reduce the total amount of impervious surface on the site by approximately 4,162 square feet, from approximately 19,586 square feet under existing conditions to approximately 15,424 square feet under project conditions.

Stormwater runoff from the site is currently conveyed through the City of Berkeley's existing stormwater drainage system. The proposed project would continue to discharge stormwater to the City's stormwater conveyance system and would be required to comply with all applicable City of Berkeley and regional stormwater management requirements, including Provision C.3 requirements in the San Francisco Bay Regional Water Quality Control Board's MS4 General Permit. The project would incorporate landscaped areas, flow-through planters, and other stormwater treatment features designed to reduce runoff rates and improve runoff water quality prior to discharge to the municipal storm drain system. The proposed project would not generate runoff volumes exceeding the capacity of the existing stormwater conveyance infrastructure, nor would it substantially increase the risk of on-site or off-site flooding. With implementation of these measures, the project would not substantially degrade surface water quality or contribute pollutants to downstream receiving waters.

Accordingly, because the proposed project would reduce impervious surface area, incorporate stormwater treatment features, and be required to comply with City and regional stormwater management requirements, impacts related to hydrology and water quality would be less than significant.

Conclusion

The proposed project would not introduce new surface water discharges, would not increase runoff volumes, result in substantial erosion or siltation, or result in an increase of pollutants leaving the site. The project would meet the requirements for Hydrology and Water Quality under *criterion (d)*.

3.1.5 Criterion (e)

The site can be adequately served by all required utilities and public services.

The project site is in an existing urban area served by existing public utilities and services. Electrical service to the project would be provided by Ava Community Energy, and water and wastewater services

would be provided by the East Bay Municipal Utility District (EBMUD). Stormwater, solid waste, and recycling services would be provided by the City of Berkeley. Telecommunications services would be provided by existing service providers serving the surrounding urban area. These utility providers currently serve the project site and adjacent properties and would continue to serve the proposed development. The project would also meet CALGreen requirements and include the installation of energy-efficient equipment and lighting and incorporation of onsite solar renewable energy and EV charging requirements for multi-family residences. These measures would reduce long-term energy demand and support the City's climate and sustainability goals.

Conclusion

The proposed project consists of infill redevelopment on a site located within a fully urbanized area of the City of Berkeley that is already served by existing public utilities and services. As discussed under criterion (a), the project is consistent with the City of Berkeley General Plan land use designation and applicable General Plan goals and policies, as well as the site's zoning designation, with approval of waivers and concessions pursuant to State Density Bonus Law. The project would not introduce a use that is incompatible with the existing urban setting or increase service demands beyond the capacity of available utilities and public services. No new or expanded off-site utility or public service facilities would be required to serve the project. Therefore, the project would meet the requirements for Utilities and Service Systems under *criterion (e).*

3.2 Exceptions to the Exemption

CEQA Guidelines Section 15300.2 outlines exceptions to the applicability of a Categorical Exemption, including cumulative impacts, significant effects due to unusual circumstances, scenic highways, hazardous waste sites, and historical resources. These exceptions are discussed below. As shown, none of the exceptions but for the hazardous waste site exception would apply.

3.2.1 Cumulative Impacts Criterion

CEQA Guidelines Section 15300.2 states that "all exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant." Table 10 includes a list of relevant major cumulative projects within a 1-mile radius of the project site.

Table 10 Cumulative Projects List

Project Name and Location	Land Use	Size	Status	Distance to Project Site
Maudelle Miller Shirek Community; 2925 Adeline Street	Affordable Housing	87 new rental apartments for low-income households, including 12 units reserved for formerly unhoused households.	Completed	500 feet
Ashby BART West Lot; 3100 Adeline Street	Affordable Housing	Around 800 new affordable housing units	Design	0.6 miles

Source: City of Berkeley 2025. Capital Projects available online at https://berkeleyca.gov/your-government/our-work/capital-projects and verified with City planning staff.

As discussed in Section 3.1.3, Criterion (c) above, the project would not affect sensitive biological resources and therefore would not result in a cumulative impact related to biological resources. As discussed in Section 3.1.4, Criterion (d), subsections A and C above, VMT and air quality analyses already take into account cumulative impacts and these impacts were found to be less than significant. As discussed in Section 3.1.4, Criterion (d), subsection D and Section 3.1.5, Criterion (e), the proposed

project would not contribute pollutants such that water quality would be impacted and would be served by available utilities and public services. Impacts related to these issue areas were found to be less than significant and the project would not result in a cumulatively considerable contribution to potential significant cumulative impacts.

The project would generate temporary noise and vibration during construction; however, these effects would be localized and would cease once construction activities are completed. Construction noise levels would remain below the City's established thresholds with implementation of the City's Standard COAs. Consequently, construction activities would not result in significant cumulative noise impacts. In addition, HVAC equipment associated with the project would comply with the City's residential nighttime noise limit of 45 dBA at the nearest property line, and the project would not result in a measurable increase in traffic operational noise, with an incremental change of less than 0.1 dBA, well below the 1.5 dBA L_{dn} threshold for significance. The project would not result in a cumulatively considerable contribution to operational noise impacts. This exception does not apply to the proposed project.

3.2.2 Significant Effects due to Unusual Circumstances Criterion

State CEQA Guidelines Section 15300.2 states that "a categorical exemption shall not be used for an activity where there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances." As discussed under *Project Location and Setting* above, the project site is currently developed with three existing one-story commercial buildings and a surface parking lot. The project site is generally flat and does not possess characteristics which would qualify as unusual circumstances under Section State CEQA Guidelines Section 15300.2. The project is a mixed-use residential development; neither the proposed use nor scale of the project is unusual. No known circumstances at the project site or related to project operations would result in a reasonable possibility of significant effects to the environment due to unusual circumstances. This exception would not apply to the project.

3.2.3 Scenic Highways Criterion

State CEQA Guidelines Section 15300.2 states that a categorical exemption "shall not be used for a project which may result in damage to scenic resources, including but not limited to, trees, historic buildings, rock outcroppings, or similar resources, within a highway officially designated as a state scenic highway." There are no designated State Scenic Highways in the vicinity of the project site. The closest designated scenic highway is I-580, which is located approximately 2.2 miles south of the project site (Caltrans 2025). Due to distance and intervening structures, the project site is not visible from I-580. Therefore, the project would not damage scenic resources within a highway officially designated as a state scenic highway. This exception would not apply to the project.

3.2.4 Hazardous Waste Sites Criterion

State CEQA Guidelines Section 15300.2(h) states that a categorical exemption "shall not be used for a project located on a site which is included on any list compiled pursuant to Section 65962.5 of the Government Code." A search of the California Environmental Protection Agency (CalEPA) Cortese List data resources, the California Department of Toxic Substances Control's (DTSC) EnviroStor database, and the State Water Resources Control Board's (SWRCB) GeoTracker database was conducted in January 2026. The records review indicated that project site is associated with a leaking underground storage tank (LUST) case that is included on databases compiled pursuant to Government Code Section 65962.5. Although the LUST case (City of Berkeley/San Francisco Bay Regional Water Quality Control Board [RWQCB] Case No. 01-1419) was fully remediated and formally closed on October 17, 1995, the completed case remains listed in the State's hazardous materials databases. Accordingly, this criterion represents a "near miss" condition that triggers the need for additional review and mitigation to ensure consistency with CEQA requirements under PRC Section 21080.1.

3.2.5 Historical Resources Criterion

State CEQA Guidelines Section 15300.2 states that a categorical exemption "shall not be used for a project which may cause a substantial adverse change in the significance of a historical resource." Page & Turnbull, Inc. prepared a Historical Resources Evaluation of the subject property in October 2022 (Appendix D). The property includes one building comprised of several portions, constructed over a period of several years, spanning from 1947 to 1968. The central portion of the building was constructed first, completed in 1947 as a mortuary. The building received a warehouse addition to its south end in 1952. The building's northernmost portion, located at the corner of Russell Street and Shattuck Avenue, was completed in 1968 as a car showroom. The evaluation recommended the property ineligible for listing in the California Register of Historical Resources (CRHR) due to a lack of architectural and/or historical significance. It was also recommended as ineligible as City of Berkeley Landmark or Structure of Merit for a lack of applicable significant associations.

Rincon Consultants, Inc. requested a search of the California Historical Resources Information System (CHRIS) from the Northwest Information Center (NWIC) in November 2025. The records search included a review of previous cultural studies and cultural resources within a 0.5-mile buffer of the project site. The CHRIS search identified 16 resources within a 0.5-mile radius of the project. Of those resources, none were located within or immediately adjacent to the project site. Because the project site is developed with a building and associated surface parking lot and no native exposed soils are present on the project site, no archaeological survey was conducted. However, there is no information in the records search to suggest that any unique archaeological resources, as defined by Public Resources Code Section 21083.2(g), are present within the project site.

As concluded in the HRE (Appendix D), the property at 2900-2920 Shattuck Avenue is recommended ineligible for listing in the CRHR or for local listing. As such, the property does not qualify as a historical resource and its demolition would not result in a significant adverse impact as defined by Section 15064.5 of the CEQA Guidelines. Further, the CHRIS records search failed to identify other cultural resources within immediate proximity to the project site. Based on these findings, there would be no impact on historic resources associated with the proposed project.

Although the project would not result in a substantial adverse change in the significance of a historical resource, the project would be subject to the following City of Berkeley's Standard COAs related to Archaeological and Cultural Resources, which includes procedures and best management practices in the unanticipated event that a buried archeological resource is uncovered during construction. Adherence to the Standard COAs would further reduce impacts related to cultural and archaeological resources.

> *Standard COA - Archaeological Resources (Ongoing throughout Demolition, Grading, and/or Construction)*
>
> Pursuant to *CEQA Guidelines* section 15064.5(f), "provisions for historical or unique archaeological resources accidentally discovered during construction" should be instituted. Therefore:
>
> a. In the event that any pre-contact or historic subsurface cultural resources are discovered during ground disturbing activities, all work within 50 feet of the resources shall be halted and the project applicant and/or lead agency shall consult with a qualified archaeologist, historian or paleontologist to assess the significance of the find.
> b. If any find is determined to be significant, representatives of the project proponent and/or lead agency and the qualified professional would meet to determine the appropriate avoidance measures or other appropriate measure, with the ultimate determination to be made by the City of Berkeley. All significant cultural materials recovered shall be subject to scientific analysis, professional museum curation, and/or a report prepared by the qualified professional according to current professional standards.

c. In considering any suggested measure proposed by the qualified professional, the project applicant shall determine whether avoidance is necessary or feasible in light of factors such as the uniqueness of the find, project design, costs, and other considerations.
d. If avoidance is unnecessary or infeasible, other appropriate measures (e.g., data recovery) shall be instituted. Work may proceed on other parts of the project site while mitigation measures for cultural resources is carried out.
e. If significant materials are recovered, the qualified professional shall prepare a report on the findings for submittal to the Northwest Information Center.

Standard COA - Human Remains (Ongoing throughout Demolition, Grading, and/or Construction)

In the event that human skeletal remains are uncovered at the project site during ground-disturbing activities, all work shall immediately halt and the Alameda County Coroner shall be contacted to evaluate the remains and following the procedures and protocols pursuant to Section 15064.5 (e)(1) of the *CEQA Guidelines*. If the County Coroner determines that the remains are Native American, the City shall contact the NAHC, pursuant to subdivision (c) of Section 7050.5 of the Health and Safety Code, and all excavation and site preparation activities shall cease within a 50-foot radius of the find until appropriate arrangements are made. If the agencies determine that avoidance is not feasible, then an alternative plan shall be prepared with specific steps and timeframe required to resume construction activities. Monitoring, data recovery, determination of significance and avoidance measures (if applicable) shall be completed expeditiously.

3.3 Summary

Based on the analysis in this report, the proposed 2900-2920 Shattuck Avenue Mixed-Use Project meets all criteria for a Class 32 Categorical Exemption pursuant to Section 15332 of the State CEQA Guidelines. However, one of the exceptions to Categorical Exemptions listed in CEQA Guidelines Section 15300.2, related to “Hazardous Waste Sites,” does apply to the proposed project.

4 Focused IS-MND

As discussed in Section 1, Introduction, and Section 3, Class 32 Categorical Exemption Evaluation, the proposed project is eligible for a Near-Miss Exemption under California PRC Section 21080.1 because it complies with all eligibility criteria for a Class 32 Infill CE with one exception, and none of the exceptions outlined in Public Resources Code Section 21080.1(b)(4) apply. As discussed above, the one exception is that pursuant to CEQA Guidelines section 15300.2(h), the project is located on a site that is on the Cortese List due to a leaking underground storage tank that was remediated in 1995. Therefore, this section analyzes the potential effects on the environment relating to hazards and hazardous materials, such as groundwater, soil, and subslab vapor, caused by the project's location on this site.

4.1 Determination

Based on this initial evaluation:

☐ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

■ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions to the project have been made by or agreed to by the project proponent. A FOCUSED MITIGATED NEGATIVE DECLARATION will be prepared.

☐ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

☐ I find that the proposed project MAY have a "potentially significant impact" or "less than significant with mitigation incorporated" impact on the environment, but at least one effect (1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and (2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

☐ I find that although the proposed project could have a significant effect on the environment, because all potential significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

4.2 Environmental Checklist

4.2.1 Hazards and Hazardous Materials

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than - Significant Impact	No Impact
Would the project:				
a. Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	☐	☐	■	☐
b. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	☐	☐	■	☐
c. Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within 0.25 mile of an existing or proposed school?	☐	☐	■	☐
d. Be located on a site that is included on a list of hazardous material sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	☐	■	☐	☐
e. For a project located in an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?	☐	☐	☐	■
f. Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	☐	☐	■	☐
g. Expose people or structures, either directly or indirectly, to a significant risk of loss, injury, or death involving wildland fires?	☐	☐	☐	■

Setting

The following analysis is based partially on information from a Phase I Environmental Site Assessment (ESA) prepared for the project site by GEM Group, Inc. on April 6, 2022, and a Phase II ESA prepared by Pangea Environmental Services, Inc. on February 9, 2017. The full Phase I ESA and Phase II ESA can be found in Appendix E-1 and E-2 of this document. However, as part of the standard approval process for the Project, a new Phase I ESA will be prepared, as regulatory agencies such as the San Francisco Bay RWQCB consider require a new Phase I ESA if a previous one is more than 180 days old. The results of

this Phase I ESA will determine whether there is a need for a new Phase II ESA, or whether any additional assessment, remediation or mitigation is required.

a. *Would the project create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?*

b. *Would the project create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?*

Construction

Construction activities may include the temporary transport, storage, and use of potentially hazardous materials including fuels, lubricating fluids, cleaners, or solvents. However, the project would be required to comply with the same federal, State, and local laws and regulations such as U.S. Department of Transportation (DOT) regulations (U.S. DOT Hazardous Materials Transport Act, 49 Code of Federal Regulations), California Hazardous Waste Control Law (California H&SC Division 20, Chapter 6.5), and Hazardous Waste Control Regulations (California Code of Regulations, Title 22, Divisions 4 and 4.5). Compliance with existing regulations would reduce the risk of potential release of hazardous materials during construction.

The project site is located in an Environmental Management Area (EMA) as identified by the City's Toxics Management Division (TMD). EMAs identify areas known or suspected to have groundwater contamination (City of Berkeley 2026). Potential health and environmental concerns related to contaminated groundwater and soil may occur during excavation and dewatering during construction. In addition, grading or excavation may also result in the transport and disposal of hazardous materials if they are unearthed and removed from the project site. However, the proposed project would be subject to regulatory programs such as those overseen by the San Francisco Bay RWQCB and the DTSC. These agencies require applicants for development of potentially contaminated properties to perform investigation and cleanup if the properties are contaminated with hazardous substances. In addition, development in the EMA requires project review by the TMD prior to issuance of permits. Upon project review, the TMD determines if any special requirements apply based on site conditions. Typically, projects in the EMA must include preparation of a Phase I ESA and implementation of a soil and groundwater management plan and/or a groundwater dewatering and monitoring plan to ensure the discharge of clean water. A Phase I ESA and a Phase II ESA were prepared by GEM Group, Inc. on April 6, 2022, and by Pangea Environmental Services, Inc. on February 9, 2017, respectively, included in Appendix E-1 and E-2. As discussed in the Phase I ESA, no recognized environmental conditions (RECs) or controlled RECs were identified at the project site. One historical REC was identified related to a previously removed, leaking underground storage tank (LUST) which has a closed case status; however, residual impacts may still be present at the project site. Additionally, one environmental concern was identified related to the current automotive uses at the project site. The Phase I ESA noted that a limited diesel-range total petroleum hydrocarbon (TPH-d) impact had been identified in groundwater during the 2017 Phase II ESA; however, GEM Group determined this condition to be localized and below applicable odor and nuisance thresholds. The Phase II ESA concluded that soil and sub-slab soil vapor at the site did not contain contaminants exceeding applicable residential or commercial/industrial environmental screening levels; indicating a low risk for vapor intrusion. As a result, the Phase II ESA recommended the preparation of a Site Management Plan to address proper handling of soil and groundwater that may be encountered during future redevelopment activities, including groundwater impacted by TPH-d.

Additionally, the proposed project would be subject to the following City of Berkeley Standard COA:

> *Standard COA - Toxics*
>
> The applicant shall contact the TMD at 1947 Center Street or (510) 981-7470 to determine which of the following documents are required and timing for their submittal:

A. **Phase I and Phase II Environmental Site Assessment (ESA) (pursuant to ASTM 1527).** A recent Phase I ESA (less than 2 years old) shall be submitted to the Toxics Management Division for developments for: all new commercial, industrial and mixed-use developments and all improvement projects that require work 5 or more feet below grade, and all new residential buildings with more than four dwelling units located in the Environmental Management Area (or EMA). The EMA can be viewed at: City of Berkeley Community GIS Portal (arcgis.com)

B. Depending on the findings in the Phase I, a Phase II or additional investigation may be necessary. Any available soils and groundwater analytical data available for projects listed in this section must also be submitted to TMD.

C. **Environmental Site Clearance**. The applicant shall provide environmental screening clearance from either the San Francisco Bay RWQCB, Department of Toxic Substances Control (DTSC), or the Alameda County Department of Environmental Health's Local Oversight Program (LOP). Clearance from one of these regulatory agencies will ensure that the property meets development investigation and cleanup standards for the specific use proposed on the property. Environmental screening clearance shall be submitted to the City of Berkeley's Toxics Management Division prior to issuance of any building permits.

D. **Soil and Groundwater Management Plan**. A site-specific Soil and Groundwater Management Plan (SGMP) shall be submitted to Toxics Management Division (TMD) for all non-residential projects, and residential or mixed-use projects with more than four dwelling units, that: (1) are in the Environmental Management Area (EMA), as shown on the most recent City of Berkeley EMA map, and (2) propose any excavations deeper than 5 feet below grade or if significant soils removal is anticipated. The SGMP shall be submitted to the TMD with the project's building permit application and shall be approved by TMD prior to issuance of the building permit.

   The SGMP shall comply with the hazardous materials and waste management standards required by BMC Section 15.12.100, the stormwater pollution prevention requirements of San Francisco Bay Regional Water Quality Control Board's Order No. R2-2009-0074, California hazardous waste generator regulations (Title 22 California Code of Regulations (CCR) 66260 et seq.), and the East Bay Municipal Utility District's Ordinance 311, and shall include the following:

   i. procedures for soil and groundwater management including identification of pollutants and disposal methods;
   ii. procedures to manage odors, dust and other potential nuisance conditions expected during development;
   iii. notification to TMD within 24 hours of the discovery of any previously undiscovered contamination; and
   iv. the name and phone number of the individual responsible for implementing the SGMP and who will respond to community questions or complaints.

   TMD may require additional information or impose additional conditions as deemed necessary to protect human health and the environment. All requirements of the approved SGMP shall be deemed conditions of approval.

E. **Demolitions & Renovations – Building Materials Survey**. A hazardous materials survey for building materials and plans on hazardous materials and hazardous waste removal and disposal is required and must be prepared by qualified professionals, and submitted to the Toxics Management Division (TMD) prior to issuance of the building permit.

i. The survey shall include the identification of all materials to be disturbed for lead-based paints, PCB containing equipment and caulking, hydraulic fluids, refrigerants, treated wood, and mercury containing devices (including fluorescent light bulbs and mercury switches), asbestos and other hazardous materials and chemicals.

ii. ii. If asbestos is identified, Bay Area Air Quality Management District Regulation 11-2-401.3 a notification must be made and the J number must be made available to the City of Berkeley Permit Service Center. Contractors must follow state regulations where there is asbestos-related work involving 100 square feet or more of asbestos containing material (8 Cal. Code Regs. §1529, §341.6 et seq.)

iii. iii. The report to the TMD shall include, in addition to the survey, plans on hazardous materials and hazardous waste removal and disposal that comply with State and Federal codes including California Code of Regulations (CCR) 66260 et seq.

iv. iv. Documentation evidencing disposal of hazardous waste in compliance with the survey shall be submitted to TMD within 30 days of the completion of the demolition.

Please note, the PCB Screening Form required by Public Works, Engineering, is a separate requirement and does not address the PCB identification requirement of the Toxics Management Division.

F. Hazardous Materials Business Plan. A Hazardous Materials Business Plan (HMBP) in compliance with BMC Section 15.12.040 and California Health & Safety Code, Chapter 6.95 Div. 20, shall be submitted to the Toxics Management Division through the California Environmental Reporting System: http://cers.calepa.ca.gov/ for chemicals used or stored on site during construction that exceed reporting thresholds. The reporting is required if your facility stores or handles hazardous materials in aggregate quantities equal to or greater than 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet of compressed gases, or generates any quantity of hazardous waste. This includes welding gases, emergency generator fuel, paints, etc.

Additionally, the business occupant must submit an HMBP within 30 days of starting operations.

Compliance with the City of Berkeley Standard COA above would ensure proper identification, handling, stockpiling, characterization, and disposal of hazardous materials and potentially contaminated soils or groundwater encountered within the project site during construction, and would require implementation of recommendations outlined in the Phase I and Phase II ESAs which would reduce the risk of exposure of hazardous materials to the public or the environment. In addition, the disposal of universal waste would be subject to the California Building Code Chapter 11 Section 5.408.2. The removal, transport, storage, use, or disposal of hazardous materials would be subject to federal, State, and local regulations pertaining to the transport, use, storage, and disposal of hazardous materials, including those outlined in the City of Berkeley Standard COA above. Compliance with these requirements would ensure that risks associated with hazardous materials during construction would be minimized to a less than significant level.

Operation

The proposed project involves residential and commercial uses which do not typically use hazardous materials other than small amounts for cleaning and landscaping. These materials would not be different from household chemicals and solvents already in wide use throughout Berkeley. Residents and workers are anticipated to use limited quantities of products routinely for periodic cleaning, repair, and maintenance or for landscape maintenance/pest control that could contain hazardous materials. Those using such products would be required to comply with all applicable regulations regarding the disposal of household waste. Additionally, the proposed project would be required to comply with the provisions of the California Fire Code and the CUPA requirements set forth in the California Health and Safety Code,

Division 20, Chapter 6.95, Articles 1 and 2. All businesses that handle more than a specified amount of hazardous materials are required to submit a Hazardous Materials Business Plan to a regulating agency, in this case, the TMD. Therefore, operation of new residential and commercial uses pose little risk of exposing the public to hazardous materials. Operation-related hazardous impacts would be less than significant.

LESS-THAN-SIGNIFICANT IMPACT

c. Would the project emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within 0.25 mile of an existing or proposed school?

Two school facilities are located near the project site: Sylvia Mendez Elementary School, approximately 0.2 mile to the northeast, and Berkeley Adult School, approximately 0.2 mile to the northwest. There are no other existing or proposed K-12 schools within 0.25-mile of the project site. As a mixed-use residential project, the proposed project would not emit substantial quantities of hazardous materials or hazardous waste. As discussed above, the use, storage, transportation, and disposal of hazardous materials associated with construction activities would be required to adhere to numerous regulatory requirements which would reduce the risk of emissions of hazardous substances to a less-than-significant level. Additionally, as discussed above under Impact b, compliance with the City of Berkeley Standard COA would ensure proper identification, handling, stockpiling, characterization, and disposal of hazardous materials and potentially contaminated soils or groundwater encountered within the project site during construction, and would require implementation of recommendations outlined in the Phase I and Phase II ESAs which would reduce the risk of exposure of hazardous materials to the public or the environment. Therefore, the impact to existing and proposed schools within 0.25 miles of the site would be less than significant.

LESS-THAN-SIGNIFICANT IMPACT

d. Would the project be located on a site that is included on a list of hazardous material sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

According to the 2022 Phase I ESA, the project site has historically been developed with commercial uses, including a mortuary and an automotive repair facility (Appendix E-1). Automotive-related uses have occurred on the project site for several decades, and a small leaking UST associated with historical operations was previously removed from the project site. Impacted soil was excavated and removed from the project site at the time of the UST removal, and the associated LUST Cleanup case was closed by the City of Berkeley and San Francisco Bay RWQCB in 1995. Potential environmental concerns also discussed in the Phase I ESA were related to an adjacent historical printing and manufacturing facility, an adjacent closed LUST case, and a nearby former dry cleaner.

As discussed above, a Phase II ESA was conducted at the project site in 2017 to evaluate soil, groundwater, and sub-slab soil vapor conditions associated with historical onsite uses. The Phase II ESA determined that soil and sub-slab soil vapor at the site did not contain contaminants exceeding applicable residential or commercial/industrial environmental screening levels, indicating a low risk for vapor intrusion (Appendix E-2). Based on the results of the Phase II ESA, the Phase I ESA concluded that no RECs or controlled RECs were identified for the project site; however, the closed LUST Cleanup case was determined to be a historical REC. As described in Section 3.3.4, *Hazardous Waste Sites Criterion*, the project site is associated with a closed LUST Cleanup case and is therefore included on a list compiled pursuant to Section 65962.5 of the Government Code. Additionally, the project site is located within the City's EMA.

In addition to implementation of standard construction practices and compliance with applicable City of Berkeley requirements, including the City's Standard COA related to toxics, the following mitigation measure would be required to reduce potential hazardous materials impacts to a less-than-significant level.

Mitigation Measure

HAZ-1 Regulatory Agency Notification

Because the project site is listed as a closed City of Berkeley/San Francisco Bay RWQCB LUST Cleanup Site (City of Berkeley Case No. 01-1419 and San Francisco Bay RWQCB Case No. 01-1419), the City of Berkeley/San Francisco Bay RWQCB Case No. 01-1419 shall continue to be utilized for regulatory agency oversight of assessment and remediation of the project site. Prior to issuance of a construction/grading permit, the City shall submit the following documents to the City TMD project manager and the San Francisco Bay RWQCB project manager of the closed LUST Cleanup Site:

Prior to commencement of construction and grading activities at the project site, the project applicant shall submit the following documents to the selected oversight agency:

- Current development plan (e.g., architectural drawings and project description) and any modifications to the development plan
- All environmental assessment documents completed for the project site, including the Phase I and II ESAs listed above, and this Focused IS-MND
- All future environmental documents completed for the project site. This will include a new Phase I ESA that will be prepared for the site as well as new Phase II ESA if one is required based on the results of the Phase I.

Upon submittal of the listed information, and in accordance with the regulatory agency's voluntary oversight agreement, the TMD or San Francisco Bay RWQCB may require additional assessment, remediation, and/or mitigation activities. These agencies' determination as to whether the City must take additional measures will depend on information the City does not have at this time, such as the result of an updated Phase I ESA. However, if these agencies require any additional assessment, remediation, and/or mitigation measures, the City's implementation of such measures will reduce any environmental impacts to a less-than significant level.

The City shall retain a qualified environmental consultant (Professional Geologist or Professional Engineer) to conduct any required subsurface soil, soil vapor, groundwater investigations, or human health risk assessments in accordance with a sampling plan that shall be reviewed and approved by the regulatory agency. In the event the TMD or San Francisco Bay RWQCB identifies the need for installation of soil vapor or groundwater monitoring wells to reduce potential hazards to the public or the environment, the project applicant shall identify soil vapor or groundwater monitoring wells on the final project plans for review and approval by the TMD or San Francisco Bay RWQCB. In the event the TMD or San Francisco Bay RWQCB identifies the need for soil excavation and off-site disposal to reduce potential hazards to the public or the environment, the City shall designate soil excavation and off-site disposal on final grading plans prior to issuing grading permits. If required workplans, investigations, or other remediation or mitigation actions require TMD or San Francisco Bay RWQCB approval, such documents shall be submitted to and reviewed by the TMD or San Francisco Bay RWQCB prior to issuing construction/grading permits.

Significance After Mitigation

Implementation of standard construction practices, compliance with applicable City of Berkeley requirements, and implementation of Mitigation Measure HAZ-1 during demolition, construction, and operation of the project would reduce potential hazardous material impacts at the project site below thresholds of significance as determined by applicable oversight agencies by ensuring additional investigation and remedial measures, transportation of impacted materials, and/or site management practices that would protect construction worker safety and the health of future project site residents and users. Therefore, with implementation of Mitigation Measure HAZ-1 and compliance with applicable City of Berkeley requirements, the project's potential impacts related to hazardous materials would be reduced to a less-than-significant level.

LESS THAN SIGNIFICANT WITH MITIGATION INCORPORATED

e. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?

The project site is not located within two miles of a public airport or airstrip. The closest airport is Oakland International Airport, located approximately 8 miles to the southeast of the project site. There would be no impact.

NO IMPACT

f. Would the project impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

The City of Berkeley has designated Derby Street, Adeline Street and Shattuck Avenue as official emergency access and evacuation routes (City of Berkeley 2011). The project may result in partial street closures during construction activities that could temporarily impede emergency access or evacuation. However, as discussed in Section 3.1.4, *Traffic*, prior to issuance of grading and building permits, the project applicant would be required to submit and have approved a TCP and construction/no parking permits pursuant to the City of Berkeley Standard COAs for new construction projects, which would ensure that emergency vehicle, bicycle, and pedestrian access is maintained throughout construction. It is standard City practice for the Berkeley Fire Department and Berkeley Police Department to review proposed changes to the current emergency access and evacuation routes prior to modification; these departments would confirm that the proposed improvements would not impede emergency access. Impacts would be less than significant.

LESS-THAN-SIGNIFICANT IMPACT

g. Would the project expose people or structures, either directly or indirectly, to a significant risk of loss, injury, or death involving wildland fires?

The project site is in an urban area of the City of Berkeley. Undeveloped wildland areas are not located in proximity to the project site. According to the California Department of Forestry and Fire Protection (CalFIRE) the project site is not located in or near a Very High Fire Hazard Severity Zone (VHFHSZ) for wildland fires (CalFIRE 2026). The nearest VHFHSZ is located approximately 1.1 miles northeast of the project site and is separated from the project site by intervening urban development and roadways. Therefore, the project would not expose people or structures to a significant risk of loss injury or death involving wildland fires. No impact would occur.

NO IMPACT

5 Conclusion

Based on this analysis, the proposed 2900-2920 Shattuck Avenue Mixed-Use Project meets the criteria for streamlining under the “Near-Miss” rule under California PRC Section 21080.1. As discussed under Section 4, *Focused IS-MND*, the proposed project would result in less than significant impacts related to hazards and hazardous materials with implementation of Mitigation Measure HAZ-1.

6.2 List of Preparers

This Focused IS-MND was prepared by the City of Berkeley, with the assistance of Rincon Consultants, Inc. Consultant staff involved in the preparation of the Focused IS-MND are listed below.

Rincon Consultants, Inc.

Abe Leider, Principal- Environmental Planning
Nichole Yee, Project Manager
Maya Ziff, Environmental Planner
Heather Dubois, Supervising Air Quality Specialist
Jesse McCandless, Noise Specialist
James Schwartz, Supervising Environmental Scientist
Savanna Vrevich, Senior Environmental Scientist

LASTS AND LASTS AND LASTS.™

Amana® Brand PTAC Sound Report

As a manufacturer of PTAC equipment we realize the importance of product acoustics and sound levels to overall customer satisfaction. As a long standing member of the American Heating and Refrigeration Institute (AHRI) it is our practice to utilize U.S. based, accredited third party acoustical laboratories to test our equipment and to validate our test results from our U.S. based engineering, test, and production facilities. We also believe that back-to-back testing with our and competitive products by these third party testing facilities provide the best, most unbiased product performance comparisons. This report will discuss the various definitions regarding sound, how it is measured and the methods by which we design and test our PTAC equipment to meet industry standards. We will also show comparative results from third party testing facilities of our Amana® brand and our competitor's PTAC products.

Acoustics is the branch of science dealing with the production, control, transmission, reception and effects of longitudinal pressure waves in a material medium (gas or liquid). Sound is the sensation perceived by the sense of hearing. What can be measured and how is it measured? The sensors available measure the amplitude of the longitude pressure waves, similar to the human ear. The amplitude of these pressure waves is the **Sound Pressure** in units of Pascals (Pa). What is a longitudinal wave? It is a compression and expansion wave. The air pressure on your ear (or a microphone) increases and decreases by a small amount which is then perceived as sound. **What is a decibel or dB?** Since Sound Pressure is non-linear with respect to the human ear, the standard unit of sound measurement is the decibel. The decibel is a logarithm unit based on the threshold of human hearing. Another unit of sound measurement is the Bel (typically used for sound power levels), named after Alexander Graham Bell. Decibels are 1/10th of a Bel. **What is dBA?** dBA is an A-weighted decibel. It is a frequency weighting of the sound signal and is another attempt to calculate sound magnitude in a way that follows the human ear. Since some frequencies are perceived to be louder than others, this weighting provides a way to account for that perception. To better understand sound pressure and sound power measurements is to think in terms of an electric light bulb. **Sound Pressure Level** = Brightness, which varies at different locations around the bulb. Sound Pressure level depends on a variety of factors including distance from the sound source (PTAC in motel room), the surroundings including floor coverings, hard or soft, walls, curtains, and articles in the room or space. On the other hand **Sound Power Level** = Bulb Wattage, which has only 1 value, i.e. 75 watts.

We design and manufacture our Amana brand PTAC products to meet the Sound Rating System and Industry Standard calling out the applicable test and rating for PTAC equipment. The independent, nationally accredited and certified acoustical laboratory tested both the Amana brand and competitive equipment in accordance to ASTM Standard E90 and calculated with E413 for the Sound Transmission Classification and E1332 for the Outdoor-Indoor Transmission Classification. The Outdoor/Indoor tests were conducted in accordance with ARI Standards 350 and 270 respectively. Breul & Kjaer instrumentation were used for acoustical data acquisition during all tests.

Each of these methods was developed for specific applications; not all methods are equally suitable for the rating of HVAC related sound in the variety of applications encountered. Several background sound rating methods are used to rate indoor sound:

Sound Transmission Class
Outdoor-Indoor Transmission Class
A-weighted sound power level (dBA or Bels)
A-weighted sound pressure level (dBA)
Noise Criteria (NC)

The A-weighted sound level is widely used to state acoustical design goals as a single number and is expressed as a number followed by dBA, for example 55 dBA. But usefulness is limited because it gives no information on the spectral content. Many different-sounding spectra can have the same numeric rating, but due to each individual's hearing capabilities, have quite different subjective qualities. Thus, **A-weighted levels** should be used with sounds that sound alike but are different in level. A-weighted sound levels correlate well with human judgments of relative loudness, but give no information on spectral balance. Thus, they do not necessarily correlate well with the potential annoyances caused by sound.

Both Sound Pressure and Sound Power are recorded and stated as dB, but when stating Sound Pressure you must also state the distance from the unit and volume of space in order to qualify the measurement.

A-weighted **sound pressure levels** are used extensively in outdoor environmental sound standards in situations with known measurement environmental factors.

A-weighted **sound power levels** are used extensively in outdoor environmental sound standards where measurement environment is a non-factor.

The laboratory also tested for **NC (Noise Criteria),** to provide spectral distribution of the sound using a single number. This rating has been popular in the HVAC industry for some time**.** NC ratings are used to calculate ratings for some HVAC components such as terminal units and diffusers.

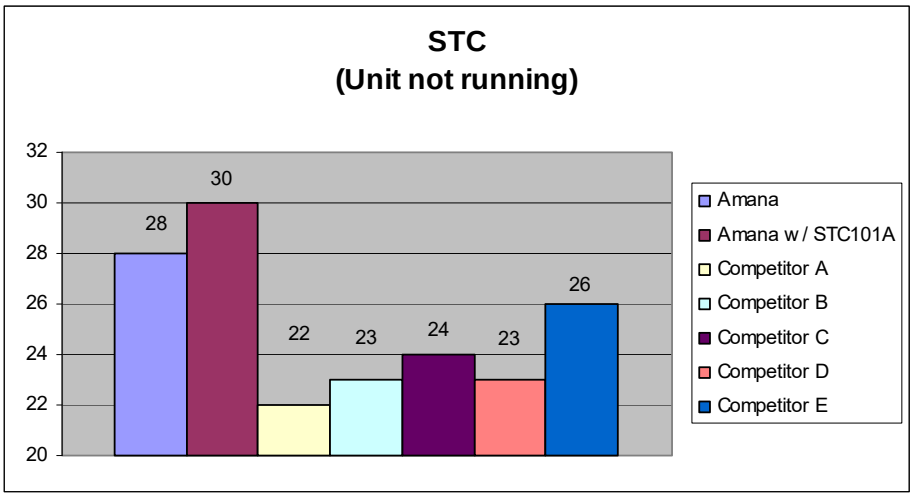
For a given sound spectrum, the NC rating can be obtained by plotting its octave band levels on the set of NC curves. The sound spectrum is specified as having a NC rating same as the lowest NC curve which is not exceeded by the spectrum. NC puts more emphasis on the speech communication mid range frequencies.

Tests were conducted to determine sound transmission loss as reported as **STC** (Sound Transmission Class) and **OITC** (Outdoor/Indoor Transmission Class). The purpose of the **STC** is to provide a single value rating that can be used to compare the sound insulating properties of partition elements for general building design purposes. The higher the **STC** rating is the greater (or better) the sound insulating properties of the tested partition. The units are not operating during the **STC** tests.

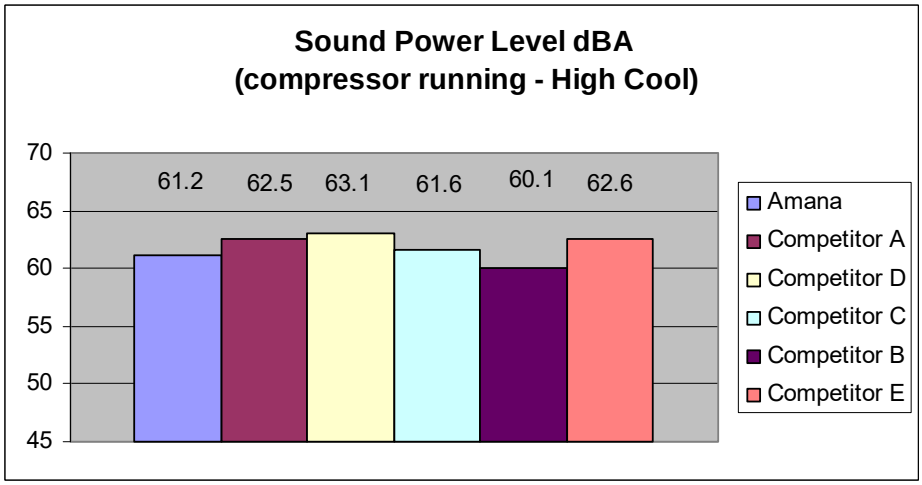
Amana® is a trademark of Maytag Corporation and is used under license to Goodman Company, L.P. All rights reserved

The **OITC** purpose is also to provide a single number rating that can be used for comparing building façade designs including exterior walls, doors, windows, air conditioning units and a combination thereof. This rating is designed to correlate with subjective impressions of the ability of building elements to reduce the overall loudness of ground and transportation sounds. It is intended to be used as a rank-ordering device. The higher the **OITC** rating is, the greater the sound insulating properties of the partition. The units also, are not operating during the **OITC** tests.

Below are the results of testing completed by our 3rd party, U.S. based accredited acoustical laboratory. The results are from testing our major competitors 12K PTAC units and our Amana 12K PTAC.



The higher the STC number the better the sound insulation of the PTAC partition.



The lower the Sound Power number the less sound is generated during operation.

Test Methods:
The laboratory method used in conducting these tests is in accordance with ARI 300-2000 "Sound Rating and Sound Transmission Loss of Packaged Terminal Equipment". The air conditioner was mounted in the wall of a 16,640 cu. Ft. reverberation room. The wall was constructed to minimize any wall vibration effects. Indoor/outdoor tests were conducted in accordance with ARI Standard 350 and 270 respectively. During cooling and heating tests temperature and humidity conditions in the outdoor and indoor rooms were in accordance with the standards and were held steady for one-half hour prior to and during the test.

The Bruel & Kjaer Type 4204 reference sound source (RSS) was used to obtain the sound power level data. The sound pressure levels were obtained on a Bruel & Kjaer Digital Frequency Analyzer Model 2131, analyzed on a Compaq Prolinea 4/33 Computer and printed using an Epson LQ-850 printer.

We believe that as a domestic manufacturer of PTAC equipment, we must strive to meet or exceed the demands of our customers. We strive to produce products that provide long-life and economical operation at a competitive price. The accredited, third party test data provided above validates that our Amana® brand PTAC products rank among the best in sound testing in the industry. As a long standing member of AHRI, we will continue to develop new products and drive continuous improvements to meet the needs of our customers in all areas of performance including sound and efficiency and impartially 3rd party test to standards as prescribed by AHRI and the American Society of Heating, Refrigeration and Air-conditioning Engineers.

California Emissions Estimator Model Results

2900 Shattuck Avenue
Trip Generation Determination

CalEEMod default values were not used as there are only 13 parking spaces total for the project. Further, no traffic study was prepared for the project. Therefore the following methodology was used to determine trips and VMT for the project.

Based on the project description, there are 13 spaces for the project. 5 spaces assigned to residents and 8 spaes for the retail portion. The CalEEMod default of trips per unit were used to determine total number of trips for the residential portion assuming 1 vehicle per unit. The CalEEMod deault trip lenght was used to determine daily VMT fo the residential portion.

To determine trip rates for the retail portion the CalEEMod default trip rates per 1,000 square feet of strip mall space was diveded by 2.5 assuming an average of 2.5 spaces per 1,000 square feet. This determined the trip generation rate per space. To determine the daily trip rate the trip generation rate was multiplied by the 8 spaces for the project. The CalEEMod default trip length was used to determine VMT for the retail portion.

Total daily trips was determined by adding the daily residential and daily retail trips. Total daily VMT was determined by adding the daily residential VMT and the daily retail VMT. Annual Trips and VMT was calculated by CalEEMod based on the daily values provided.

Week	**Sat**	**Sun**

4. Operations Emissions Details

4.1. Mobile Emissions by Land Use

4.1.1. Unmitigated

Mobile source emissions results are presented in Sections 2.6. No further detailed breakdown of emissions is available.

4.2. Energy

4.2.1. Electricity Emissions By Land Use - Unmitigated

Criteria Pollutants (lb/day for daily, ton/yr for annual) and GHGs (lb/day for daily, MT/yr for annual)

Land Use	TOG	ROG	NOx	CO	SO2	PM10E	PM10D	PM10T	PM2.5E	PM2.5D	PM2.5T	BCO2	NBCO2	CO2T	CH4	N2O	R	CO2e

***P2. Location:** ☐Not for Publication ☒Unrestricted ***a. County** Alameda
***b. USGS 7.5' Quad** Oakland West **Date** 2018
***c. Address** 2900-2920 Shattuck Avenue **City** Berkeley **Zip** 94703
***e. Other Locational Data:** Assessor's Parcel Number 53-1590-5-1

***P3a. Description:** (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

The parcel at 2900-2920 Shattuck Avenue (APN 53-1590-5-1) is rectangular in shape and is located at the southwest corner of Shattuck Avenue and Russell Street. The parcel contains three connected one-story buildings at the north end of the parcel and a large surface parking lot at its south end. The three buildings were constructed at various times, with the first building (referred to as "Section 1") constructed as a mortuary in 1947, the second (referred to as "Section 2") constructed as a warehouse in 1952, and the third (referred to as Section 3) constructed as an automobile sales showroom in 1968 at the time that all three buildings were internally connected **(Figure 1)**. The building complex was used as a car repair and car showroom from 1968 to 1988. Since 1988 Sections 1 and 2 have been used as a car repair facility, while Section 3 has been a commercial unit containing a hardware store.

For simplicity, the three building sections will be described separately from south to north. (Refer to Continuation Sheet, page 2)

***P3a. Description (continued):**

Figure 1: Bird's-eye view of 2900-2920 Shattuck Avenue, showing the approximate property line with a dashed red line. The building complex was constructed in three stages with Section 1 constructed 1947 as a mortuary; Section 2 constructed 1952 as a warehouse; and Section 3 constructed 1968 as a car dealership.

Section 2 of building complex at 2900-2920 Shattuck Avenue

The building described as Section 2 is rectilinear in footprint, with a small attached lean-to structure at the southwest corner of its south façade. The building has a flat roof with ten regularly spaced skylights and four roof vents. Its walls are a mixture of concrete block construction and wood framing with stucco. The primary (east) façade of Section 2 features a stucco-clad wall built out to the sidewalk along its southern end, while the remainder of the façade is set back with an overhanging canopy with a painted wood soffit and fascia **(Figure 2)**. A large metal roll-up door is located to the south of the centerline of the facade and there are no other openings at the primary façade. A low planter with concrete block sidewalls is located at the north end of the primary façade and continues north to the primary façade of Section 1.

Figure 2: Oblique view of south and primary (east) façades of Section 2, at left and right, respectively. Looking slightly north west.

Figure 3: Detail of lean-to structure at southwest end of south façade of Section 2.

The south façade of Section 2 consists of a painted concrete block wall with two metal roll-up doors. A small wood-frame lean-to storage structure with a shed roof and painted vertical wood siding is located at the west end of the south façade **(Figure 3)**. It contains louvered metal vents along its visible east and south walls, and a single-leaf wood door is located at the center of its south wall. The surface parking lot that is located to the south of Section 2 is bounded by a concrete block wall with buttresses on its west and south sides, and a chain-link fence topped with razor wire at its east side.

Section 1 of building complex at 2900-2920 Shattuck Avenue

The building referred to as Section 1 is built up against the adjacent building sections to the south and north; the rear of the building is enclosed by a high impermeable fence and is not visible from the public right-of-way. The primary (east) elevation of Section 1 is the only façade that is visible **(Figure 4)**. It is clad in lightly textured stucco. Section 1 is rectangular in footprint and features a gable roof with a low pitch. Openings along the east façade consist of a grouping of three metal frame slider windows behind a metal grille along the south portion of the east façade, with a fully glazed single-leaf wood frame door with a metal grille, and a steel sash window arrangement of eight lites with four square panes of glass over four vertically oriented panes of glass at the north portion of the east façade **(Figure 5)**. The two outermost upper panes of glass are operable hopper sash. A metal grille covers the lower four vertically oriented panes of glass.

Figure 4: Primary (east) façade of Section 1. Looking west.

Figure 5: Detail of north portion of primary (east) façade of Section 1. Looking northwest.

The roofline of Section 1 extends out over the north portion of the primary façade and includes a small portion of the south slope of the roofline past the gable peak. This projecting canopy is supported on two metal poles at its southeast edge. It has a wood paneled soffit with painted exposed support beams, and painted wood fascia. This overhang covers a wide concrete landing reached by two concrete steps. The concrete block planter located at the north end of Section 2 continues to the south end of the entrance landing and stairs of Section 1.

Section 3 of building complex at 2900-2920 Shattuck Avenue

Section 3 consists of a rectilinear footprint with reinforced concrete walls at its west and south walls and the western portion of its north wall. The building has a flat roof. Due to its corner location, both the primary (east) and secondary (north) facades are fully visible. The easternmost bay of the south façade is visible due to the setback of Section 1 to the west. The rear (west) façade is not visible from the public right of way due to the presence of a tall metal fence with a metal roll-up door that is located at the west end of the northern property line and does not allow for any view of the rear of the building **(Figure 9)**.

The primary (east) façade of Section 3 features a wide stucco section at the top of the façade over large storefront glazing systems with aluminum mullions and piers **(Figure 6 and Figure 7)**. The stucco section features painted signage and an applied rectangular sign on a plywood panel that appears to have been mounted over an existing single-face illuminated sign with a metal frame. A fluorescent lamp extends from the roofline to illuminate the sign. The glazing system spans the full façade and is separated into four bays. The southernmost bay features a low concrete bulkhead beneath paired glass panels. The second bay features wide, asymmetrically divided, fully glazed double-leaf doors with aluminum frames beneath a with transom with painted address numbers. The third and fourth bays have a low concrete sill over which a narrow panel of glass spans the width of the bay beneath a horizontal aluminum mullion.

Figure 6: Primary (east) façade of Section 3. Looking west.

Figure 7: Oblique view of primary (east) façade of Section 3. Looking southwest.

Figure 8: Detail of east end of south façade of Section 3. Looking northwest.

The single visible bay of the south façade consists of a low concrete wall at its base and a large window with aluminum sash. The wide stucco section at the top of the primary façade continues to the south façade **(Figure 8)**.

The majority of the length of the north façade of Section 3 (facing Russell Street) continues the stucco clad top portion of the primary façade and contains four bays of storefront glazing systems with aluminum piers and mullions over a low concrete wall **(Figure 9)**. All four bays of glazing feature a narrow panel of glass that spans the width of each bay beneath a horizontal aluminum mullion with either one or two panes of glass above. The westernmost portion of the façade consists of a reinforced concrete block wall.

A square double-face illuminated plastic sign is mounted atop a pole at the northeast corner of the building **(refer to Figure 9)**.

Figure 9: Detail of north portion of primary (east) façade of Section 1. Looking northwest.

Surrounding Neighborhood

The surrounding area contains a mixture of multi- and single-family residential buildings and commercial buildings including retail, grocery stores, dry cleaners, and restaurants, as well as two gas station. Buildings within the surrounding blocks were constructed at a variety of dates from the late-nineteenth century to the early twenty-first century **(Figure 10 to Figure 13)**.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity)

Historic Context – City of Berkeley
Incorporation of Berkeley
The development of Berkeley proceeded very slowly prior to the establishment of regular rail service between the town and Oakland and San Francisco. In 1873, several local investors formed the Berkeley Land & Town Improvement Association to spur development. This group organized land sales, built stores and wharves, and lobbied for a direct ferry connection to San Francisco. In 1874, the Berkeley Ferry & Railroad Company initiated regular service between San Francisco and Ocean View (now West Berkeley). During that same year, a horse-drawn transit line began operating along Telegraph Avenue between the areas that are now downtown Berkeley and Oakland.[1] In 1878, the Town of Berkeley incorporated, encompassing both the bayside manufacturing settlement of Ocean View and the small academic village of Berkeley.[2]

Following Berkeley's incorporation, Shattuck Avenue was already well on its way to becoming the town's main street. This was mostly the result of Francis Kittredge Shattuck's successful efforts to convince the Central Pacific Railroad to run a spur line from Oakland through the middle of his mile-long land holdings located just west of the University of California campus. The spur line ran along Adeline Street and terminated in a station at Stanford Square (later renamed Shattuck Square). The blocks east of Shattuck Avenue contained an eclectic mix of uses and remained in a quasi-rural state for much longer than the land south and west of Shattuck. While Shattuck Avenue served as the main north-south transportation corridor in downtown Berkeley, University Avenue served as the east-west horsecar route, connecting the shoreline community of Ocean View with downtown and the campus. (Refer to Continuation Sheet, page 12)

Known alterations to the buildings on the subject property that are supported by permits on file at the City of Berkeley Department of Building and Safety are listed in **Table 1** (below).

Table 1: Alterations to 2900-2920 Shattuck Avenue

Permit #	Date	Owner	Builder/Contractor	Description
61244	5/27/1947	Albert L. Burton	Albert L. Burton	Construct a new 1-story mortuary building (Section 1) made of reinforced concrete foundations, tile walls and a tile roof.
71195	4/18/1952	Henningsen & Folsom	Great Lakes Steel Company	Construct a new 1-story warehouse costing $4,800 (Section 2) with corrugated sheet metal walls and roof
77396	5/4/1955	Henningsen & Folsom	[Yuasa] & Price	Alterations to existing shop addressed in 1955 as 2912-2914 Shattuck Avenue (currently Section 2). Front (east) face of existing building to be replaced with wood frame and stucco construction. South and west wall which was wood frame to be replaced with concrete block construction. Necessary ties to roof, floor and other remaining portions of the building as required.
110868	1/27/1968	Dr. Margen	Bay Cities	Demolish existing warehouse building [site of current surface parking lot], leaving site clean.
111000	2/15/1968	Dr. Margen	H.G. Speagle Construction Company (contractor)	1. Demolish 8000 SF building; fill and pave with asphalt (refer to permit 110868); 2. add toilet room in existing 4000 SF building and add required doors and fire extinguishers for fire and building codes (Section 2); 3. Construct new 2200 SF building (Section 3); 4. Remove existing Quonset hut and pave area (located

Permit #	Date	Owner	Builder/Contractor	Description
				west of/behind Section 1); 5. Complete sidewalk repair, fences, and landscaping.
111431	4/16/1968	English Motors of Berkeley	[not listed]	Dark blue lettered sign for new car sales room reading "English Motors of Berkeley" on Shattuck façade.
111432	4/16/1968	English Motors of Berkeley	[not listed]	Dark blue lettered sign for new car sales building reading "English Motors of Berkeley" on Russell façade.
070275105	7/2/1975	English Motors of Berkeley	Enterprise Roofing	Reroof building
091576103	9/15/1976	English Motors of Berkeley	Arrow Sign Co.	Install illuminated wall signs on each façade.
0527809386	5/23/1980	Timothy K. Southwick	Not listed	Installation of an aluminum sliding window.
0529809450	5/28/1980	Imported Cars of Berkeley	Arrow Sign Co.	Install a single-face sign "Fiat-Lancia"
1211804000	12/11/1980	Carolyn Lewis	Caldwell-Roland Roofing Co.	Reroof building – remove loose gravel, repair damaged sheathing, lift skylight; apply tar and gravel roofing.
0330816111	3/31/1981	Imported Cars of Berkeley	Arrow Sign Co.	Remove existing sign cabinets and replace with new. "Peugot" "Lancia" "Fiat"
0317821272	3/17/1982	Isuzu Parts & Service	[not listed]	Install one new wall sign.
330821534	3/30/1982	Imported Cars of Berkeley	Arrow Sign Co.	Install new double-face sign.
0228824191	7/28/1982	Dodge of Berkeley	Barber Sign Co.	Remove Fiat and Lancia signs on Russell Street façade and install a new sign "Dodge of Berkeley"; on the Shattuck façade, replace the "Import Cars of Berkeley" sign with "Import Cars of Berkeley – Fiat" and remove the "Izusu Service" sign
03098811887	3/9/1988	Berkeley Chrysler-Plymouth	Balch Petroleum	Remove 250-gallon underground fuel tank.
[illegible]	5/5/1988	Peter & Susan Edinoff; Donald & Dorothy Worth [Model Garage]	[not listed]	Install new wood signs for Model Garage.
99-03755	8/18/1999	Peter and Susan Edinoff; Donald and Dorothy Worth	Nicholas Roofing	Re-roof building at 2920 Shattuck Avenue.

The first building to be erected that remains extant as a portion of the building complex on the subject property is the building referred to as Section 1, which was constructed in 1947 as a mortuary for owner and mortician Albert L Burton. Burton was also listed as the architect, engineer, and contractor on the original building permit.[3] The mortuary building was constructed as a one-story wood-frame building with a concrete foundation, tile walls, and a tile roof **(Figure 15)**.

The building referred to as Section 2, was constructed as a warehouse in 1952 and was addressed as 2912-2914 Shattuck Avenue at the time of its construction. It was constructed with a concrete foundation, wood-frame walls clad in corrugated sheet metal siding, and a corrugated sheet metal roof. The owner of the property was Henningsen & Folsom (a plastic fabricator), and the architect/engineer is listed as the Great Lakes Steel Company. Three years later, the façade of Section 2 was altered and sections of the corrugated metal siding was replaced with stucco at the primary façade and concrete block at the south and west (rear) facades. The architecture firm listed on the building permit appears to be Yuasa & Price, although in available archival records, including city directories and AIA registration records, the local Oakland architect Hachiro Yuasa is not known to have formed a partnership with another architect by the name of Price. The building called Section 2 is visible in a 1965 aerial photograph with a larger warehouse to the south, and Section 1 to the north **(Figure 16)**.

[3] Refer to Permit 61244, filed May 27, 1947. On file with the City of Berkeley Department of Building and Safety.

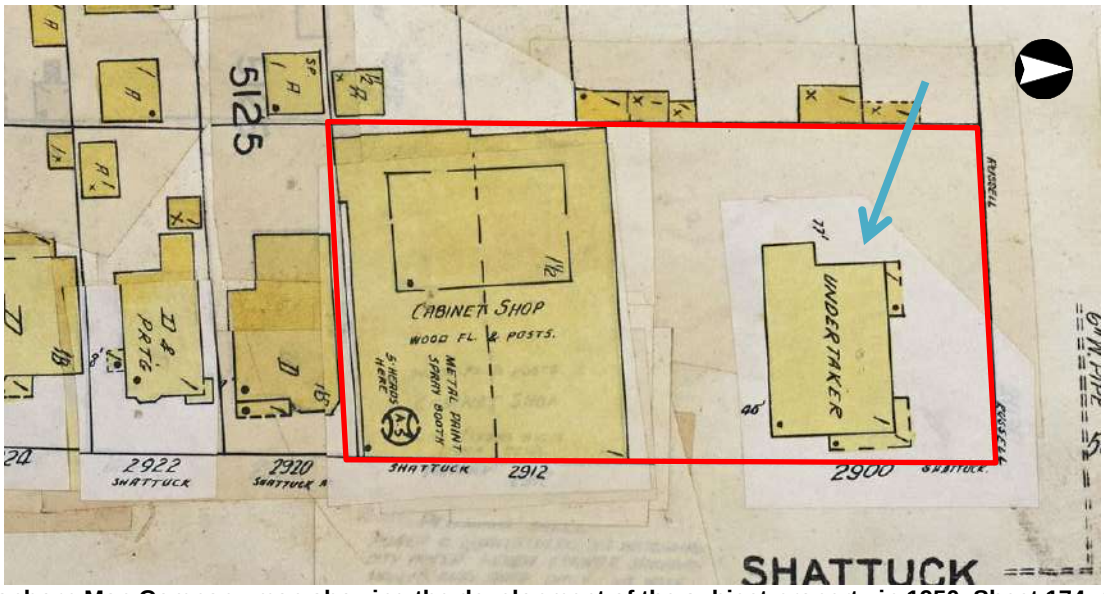

Figure 15: Sanborn Map Company map showing the development of the subject property in 1950. Sheet 174. Approximate subject boundary shown with red line, Section 1 (original mortuary building) indicated with blue arrow. Source: San Francisco Public Library. Edited by Page & Turnbull, 2022.

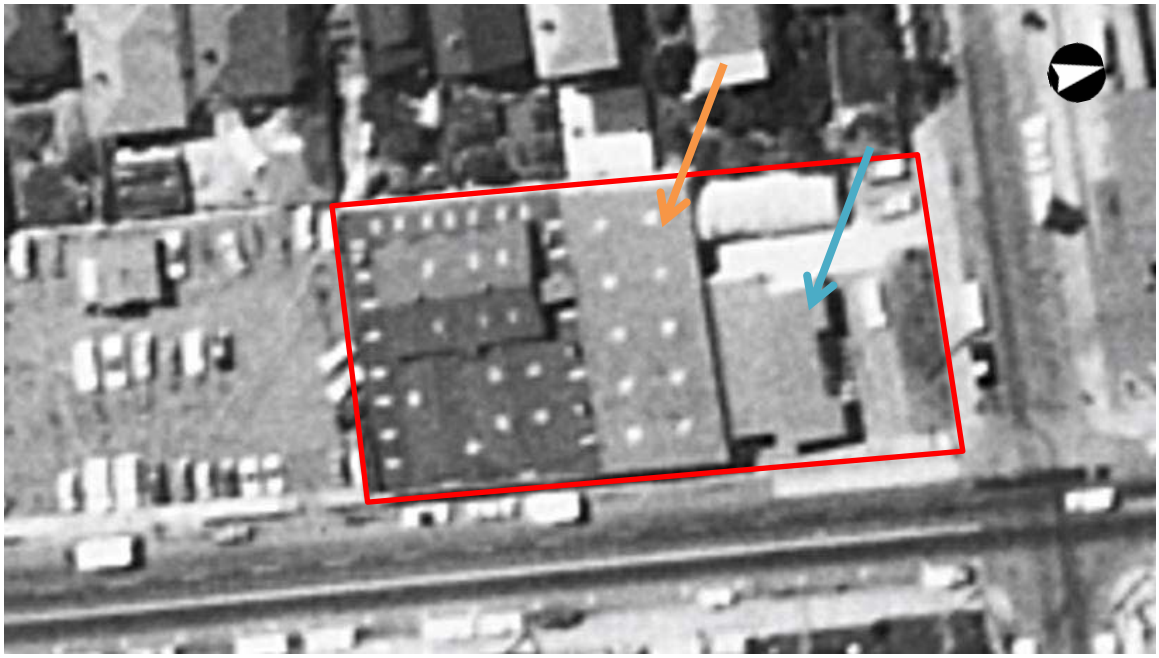

Figure 16: Aerial photograph of the subject property in 1965. Photographed by Cartwright Aerial Surveys, Flight CAS-65-130, Frame 15-139. Approximate subject boundary shown with red line, Section 1 (original mortuary building) indicated with blue arrow and Section 2 (original warehouse building) indicated with orange arrow. Source: UC Santa Barbara, FrameFinder. Edited by Page & Turnbull, 2022.

At some time in the 1960s, the various lots and buildings that now are encompassed by the subject property were united under the ownership of a Dr. Sheldon Margen, Leon Lewis, and S.G. Setlow. Margen et al appear to have first pursued the idea of establishing a medical research facility called Solano Laboratories at this location. While they submitted initial plans that would have adapted the three existing buildings into a laboratory complex and submitted a change in use permit for the property, the project was not undertaken.[4]

In 1968, the former warehouse at the south end of the parcel was demolished and the building referred to as Section 3 was constructed. At this time all three buildings were integrated into a building complex that was used as a car showroom (Section 3), offices (Section 1), and a car repair and maintenance facility (Section 2) for British Motors of Berkeley, which was previously located on an adjacent lot to the south of the subject property. Alterations to Section 1 appear to have been the most involved, with the removal of the original projecting rooflines along its north façade (refer to **Figure 9)** in order for Section 3 to be constructed. Any original windows or entrances along this north façade of Section 1 would have also been removed. The non-original aluminum slider windows at the south portion of the primary façade of Section 1 may have been installed at this time.

From 1968 to approximately 1980, the business operated under the name "English Motors of Berkeley." From ca. 1980 to 1988, it appears that the building complex was operated under the names of "Import Cars of Berkeley," "Isuzu Parts and Service," "Dodge of Berkeley," and "Berkeley Chrysler-Plymouth." A photograph of Section 3 in 1983 shows the "Import Cars of Berkeley" signage and shows the fenestration and entrance pattern on the primary façade of Section 3 that remains today **(Figure 17)**.

Figure 17: Photograph of Section 3 of subject building taken in 1983. Looking northwest. Source: Berkeley Historical Society.

Alterations that were undertaken at the subject property since 1968 and are supported by the permit record include a significant number of signage changes (various years), the reroofing of the building complex in 1975, the repair of skylights and reroofing of Section 2 in 1980 and 1999, and the removal of an underground gasoline storage tank in 1988. The installation of a sliding metal frame window in 1980 occurred at an unknown location that does not appear to be extant.

As no other historic photographs have been identified at this time, it is impossible to know the original design of the mortuary building at Section 1, or to know what the building complex looked like in 1968 when it first became English Motors of Berkeley.

[4] Change of Use Permit in 1965 on file with City of Berkeley Department of Building and Safety. Drawing of proposed project was submitted and is on file with City of Berkeley Department of Building and Safety.

*B10. Significance (continued):

Historic Context – City of Berkeley

Early Development of South Berkeley[5]

The subject area, South Berkeley, grew slowly due to the confusion over whether the area would be absorbed by Oakland or Berkeley. The incorporation of the Town of Berkeley in the 1870s originally proposed to extend the southern boundary of the town to Russell Street (just north of the subject property), but due to opposition from the City of Oakland, the boundary line instead was drawn at Dwight Way.

In the mid nineteenth century, within the area that would become South Berkeley, the land consisted of large farming tracts owned by a few land owners. The installation of a railroad station at Alcatraz and Adeline Streets in 1876 spurred the development of the surrounding blocks with industrial uses located near the railroad line and residential housing beyond. The Newberry Station, now the location of the Ashby Bart Station, was established several years after the Alcatraz Station and proved a catalyst for development right around the area of the subject property. South Berkeley was annexed by the Town of Berkeley in the early 1890s.

Early Twentieth Century History of Berkeley

During the early twentieth century, particularly in the years between the 1906 earthquake and the Great Depression, both the University of California and the town of Berkeley grew rapidly. After 1906, Berkeley became one of the largest cities in California, mostly due to an influx of as many as 20,000 San Francisco earthquake refugees. The construction of the Key System of ferryboats and streetcars made transportation between Oakland, Berkeley, and San Francisco quick and affordable and spurred the development of numerous residential tracts in Berkeley and Oakland. This growth brought in more customers which encouraged intensive commercial development in downtown Berkeley.[6]

During the first decade of the twentieth century, downtown Berkeley evolved from a district of low-rise, wood-frame buildings into a substantial urban district, with numerous large masonry buildings and stately public facilities. The City Beautiful movement inspired local architects, and many buildings constructed during this era exhibited neoclassical design.

Meanwhile, the growth of the University of California under the patronage of influential people like University President Benjamin Ide Wheeler and donor Phoebe Apperson Hearst also encouraged the physical development of the city, as well as the growth of its identity and local culture. Within this period Berkeley began to develop its reputation for progressiveness, unconventionality, and bohemianism. These traits were reflected in its architecture, especially the new First Bay Region style houses that were designed by the likes of Bernard Maybeck, Julia Morgan, and John Galen Howard.[7] Commercial and civic development continued through the 1920s in downtown Berkeley, with construction of several new downtown buildings including the city's first "skyscraper" – the twelve-story Chamber of Commerce (now Wells Fargo) building at the northwest corner of Shattuck Avenue and Center Street, designed by Walter H. Ratcliff, Jr. in 1925.

The Great Depression and World War II

During the Great Depression, Berkeley's suffering was somewhat minimized by the presence of the University, which continued to provide employment for many citizens, although working-class neighborhoods in West Berkeley experienced more economic strain.

World War II brought a tremendous population boom to the entire Bay Area, and Berkeley was no exception. Wartime housing projects to accommodate military personnel were constructed in Berkeley, and facilities at the University itself were commandeered for military use. Civilian numbers also grew as people relocated to Berkeley for employment at local shipyards like the Moore Drydock on the Oakland Estuary and the Kaiser shipyards in Richmond. Transportation lines and other infrastructure in Berkeley expanded to make these workers' commutes easier.

Post-World War II

After the war, Berkeley experienced the same out-migration as many other large cities in the country, as families moved to the suburbs to take advantage of G.I. home loans and the increased ease of commuting by automobile. This led to a shift in the demographics of Berkeley, where larger working-class populations developed. G.I. benefits also resulted in soaring enrollment at the University of California, which meant that students flooded available housing around the campus. The large houses that had previously been subdivided to accommodate war workers were well-suited to housing students.

---

[5] This section summarized from "Chapter 9: More on East Berkeley" and "Chapter 11: Incorporation" in Alan Cohen, *A History of Berkeley, From the Ground Up,* Archived on Archive.org, Accessed September 2022, https://web.archive.org/web/20171014035000/http://historyofberkeley.org/chapters.html

[6] Susan Dinkelspiel Cerny, *Berkeley Landmarks*: *An Illustrated Guide to Berkeley California's Architectural Heritage* (Berkeley: Berkeley Architectural Heritage Association, 1994), 64.

[7] Charles Wollenberg, *Berkeley, A City in History*, (Berkeley, University of California Press, 2002), 78.

In the decades following World War II, Berkeley's reputation as a liberal stronghold grew, particularly expressed by its Democratic-leaning academic community and African American and working-class populations. Civil Rights became an important topic, leading to struggles over fair-housing and segregation of schools. The Vietnam War affected the city tremendously, as it was heavily populated by young, working-class people and students who were eligible for the draft, spurring protests and demonstrations. Berkeley has remained a politically and culturally outspoken community that largely accepts and promotes progressive thinking. The University of California remains the centerpiece of the city, which is otherwise inhabited by a wide range of social, economic, and ethnic demographics.[8]

Design of 2900-2920 Shattuck Avenue

Section 1, the original mortuary building, may have had a more clearly expressed style when it was first completed in 1947. However, the building was significantly altered through the construction of Section 3 in 1968, which removed the original projecting rooflines at Section 1's north façade and likely altered the openings of the east façade with the installation of the extant aluminum slider windows. As no original photographs or drawings have been located that provide information on the original 1947-design of Section 1, it also remains unclear whether the building was oriented towards Shattuck Avenue or Russell Street, as its projecting rooflines at its north façade (facing Russell Street) signal that various openings or points of entry would have been located along this façade. As noted previously, the architect of the 1947 design was listed as Albert L. Burton, who was also the owner and contractor. Burton, who previously worked in an automobile garage and as a contractor, was also the mortician of the funeral home that he established at this location. No other properties constructed or designed by Burton are known.

Section 2 was constructed as a utilitarian warehouse building in 1952, and then altered with a more Modern façade in 1955. The alterations made to the building were minimally described in the permit application and it is likely that they included the articulation of the primary facade with its partial setback and overhanging canopy. The architect of the alteration was Yuasa & Price, who appear to have been two independent architects, who are not known to have formed a formal partnership.[9] Neither architect has been identified as an architect of merit, and the design of Section 2 is largely utilitarian in style with a nod to the prevailing Modern aesthetics of the era.

The building complex at 2900-2920 Shattuck Avenue was assembled from two existing buildings (Sections 1 and 2) and a new building (Section 3) in 1968. The treatment of both existing buildings appears to have only minimally altered the structures to accommodate any necessary internal connections and to support the construction of the new Section 3. No alterations were known to have been made that would stylistically unify the three sections and any visual unity appears to have been managed through signage and paint. As such, the building complex does not appear to express any particular style and only minimally includes some design features of the Modern Movement, including flat roofs, projecting canopies, and rectilinear volumes. No architect was specified in the 1968 building permit, and no designer or architect has been identified as responsible for the overall design of the building complex.

Owner History of 1598 University

The following owner history was assembled from a combination of the permit record on file with the City of Berkeley Department of Building and Safety, available Alameda County Directories, and recent deed records available at the Alameda County Clerk-Recorder's Office.

Prior to the creation of the building complex at 2900-2920 Shattuck Avenue in 1968, the various buildings appear to have been owned by separate individuals. Albert Burton was listed as the owner at the time that the mortuary and funeral home (Section 1) was established in 1947. Henningsen & Folsom was listed as the owner of the adjacent warehouse building (Section 2) when it was constructed through approximately 1965. The various parcels appear to have been assembled in the mid-1960s under an ownership partnership consisting of Dr. Seldon Margen, Leon Lewis, and S.G. Setlow. This partnership group appears to have retained ownership of the property until 1985, when it was transferred to Timothy and Susan Southwick, who appear to have run the automobile business on site since at least 1980. In 1988, the Southwicks sold the property to Donald and Dorothy Worth and Peter and Susan Edinoff. The parcel was transferred to 2035 Blake Street in 2017 and from 2035 Blake Street LLC to 2900 Shattuck Avenue LLC, the current owner, in August 2018.

[8] City of Berkeley, *City of Berkeley Landmark Application for the Preservation of All Souls Church, Parish Hall and Courtyard, 2220 Cedar Street, Berkeley, CA*, on file at Berkeley Architectural Heritage.

[9] Hachiro Yuasa and Oscar Moses Price were registered architects who worked and lived in Oakland. Both men were listed separately in the 1956 American Architects Directory. American Institute of Architects, *American Architects Directory, 1956.* (Wakefield, Massachusetts: R.R. Bowker Company, 1955). Accessed September 2022. Occupancy History

Table 2, below, lists known commercial businesses at 2900-2920 Shattuck Avenue since 1947, the year that the mortuary building, which became Section 1, was constructed. The following records were assembled through research in Alameda County Directories, building permit records, and historic newspaper archives. Entries that are left blank are years where directories or other archival information was not available.

Table 2. Occupancy History of Commercial Businesses at 2900-2920 Shattuck Avenue

Evaluation:

California Register Evaluation

The property at 2900-2920 Shattuck Avenue is not currently listed in the National Register of Historic Places (National Register) or the California Register of Historical Resources (California Register). The building does not appear in the most recent version available of the State of California Office of Historic Preservation (OHP) Built Environment Resources Directory (BERD), issued March 2020, indicating that no record of a previous survey or evaluation is on file at an information center of the California Historical Resources Information System (CHRIS).[10] The subject building is not listed as a City of Berkeley Landmark or Structure of Merit.

Criterion 1 (Events)

2900-2920 Shattuck Avenue does not appear to be individually eligible for listing in the California Register under Criterion 1 (Events) for its association with events that have made a significant contribution to the broad patterns of local or regional history, or the cultural heritage of California or the United States. The building complex that exists today was built in three phases with the construction of Section 1 as a mortuary in 1947, the construction of Section 2 as a warehouse in 1952, and the construction of Section 3 and the linking of all three structures into a single building complex in 1968. The building complex and the individual building sections are not notable developments in the context of South Berkeley, which was already established with a mixed-use character by the early twentieth century. The establishment of British Motors of Berkeley at this location in 1968 does not appear to be notable, as the company was already operating in the area prior to the completion of the building complex, and the automotive industry does not appear to be a significant industry in South Berkeley. No significant events are known to have taken place at the subject property that would allow the building complex or its individual building sections to rise to the level of significance necessary to be individually eligible for the California Register.

Criterion 2 (Persons)

2900-2920 Shattuck Avenue does not appear to be individually eligible for listing in the California Register under Criterion 2 (Persons). The building complex, including its individual sections have been associated with several individuals, none of whom appear to have made significant achievements that would be associated with the subject property. Little is known about the original owner and contractor of Section 1, Albert Burton who was an African American contractor and mortician. Available archival materials have not identified his contributions to funerary sciences or as a contractor. The other persons most closely associated with the property are Dr. Sheldon Margen, Leon Lewis, and S.G. Setlow who were active in the medical and science fields, and owned the subject property when it was developed as an automobile services and showroom complex in 1968. These men retained ownership of the building as a speculative property and do not appear to have been involved in the day-to-day operations of the property. The subsequent owners of the building complex have owned the property since 1985, and do not appear to have made significant achievements in their professional fields that would be associated with the subject property and would allow the building complex to be individually eligible for the California Register under Criterion 2.

Criterion 3 (Architecture)

2900-2920 Shattuck Avenue does not appear to be individually eligible for listing in the California Register under Criterion 3 (Architecture) as a building or building complex that embodies the distinctive characteristics of a type, period, or method of construction. As all three sections of the building were constructed at different times and for different uses, the overall building complex can be characterized as utilitarian, incorporating some minimal design elements of the Modern Movement including rectilinear massing, flat roofs, and projecting canopies.

No photographs or drawings have been identified that illustrate the original design of Section 1 as designed and built in 1947, and therefore its original style and features remain unknown. The owner, Albert Burton, was listed as the architect and contractor of the building. Burton has not been identified as an architect/builder of merit at this time, and the original 1947 design, if intact, would not be found significant for an association with Burton.

Section 2, as constructed in 1952, was erected as a utilitarian warehouse with corrugated metal walls that was altered in 1955 with a more Modern designed façade treatment with a projecting canopy, painted fascia panels, and a stucco façade. This design minimally expresses Modern style elements and does not incorporate any significant design features that characterize the style. The builders, contractors, and architects associated with the construction and alteration of Section 2 are not currently known to be architects of merit, such that Section 2 would be individually eligible for the California Register.

When the extant buildings were assembled into a building complex and Section 3 was erected in 1968, the existing buildings were only minimally adapted to meet the needs and use of the building complex. The 1968 alterations and the construction of Section 3 were completed by a contractor, H.G. Speagle Construction Company, and no architect is known to have designed the complex. The building complex was not altered to create a cohesive design and instead was a utilitarian adaptation of the existing structures to accommodate a car repair service, offices, and showroom. The building complex lacks formal design elements that would characterize it as a good example of a style or type, and does not appear to be eligible for the California Register under Criterion 3.

[10] California State Office of Historic Preservation, Built Environment Resource Directory (BERD), Alameda County, updated March 2020.

The property also does not appear to be eligible as a contributor to a historic district, but the evaluation of a potential district is outside the scope of this report.

Criterion 4 (Information Potential)
2900-2920 Shattuck Avenue does not appear to be individually eligible for listing in the California Register under Criterion 4 (Information Potential). The "potential to yield information important to the prehistory or history of California" typically relates to archeological resources, rather than built resources. When California Register Criterion 4 (Information Potential) does relate to built resources, it is relevant for cases when the buildings themselves are the principal source of important construction-related information. The subject property does not appear to be individually significant under Criterion 4 as a building complex or individual building sections that have the potential to provide information important to the prehistory or history of the City of Berkeley, the state, or the nation. The building complex does not appear to feature construction or material types, or embody engineering practices that would, with additional study, provide important information. Identification or evaluation of archaeological resources is beyond the scope of this study.

City of Berkeley Landmark and Structure of Merit Evaluation
The City of Berkeley maintains a list of properties designated as local Landmarks and Structures of Merit under Chapter 3.24 of the Berkeley Municipal Code. Much like the National and California Registers, the Municipal Code provides a number of criteria that must be met in order for a property to gain Landmark or Structure of Merit designation. Properties may be landmarked if they meet standards of architectural, cultural, educational, or historical significance, or if they are already listed in the National Register. A property may be designated as a Structure of Merit if it does not rise to the level of Landmark status, but has contextual importance and is worthy of preservation as part of a neighborhood, block or street frontage, or group of buildings that includes Landmark properties.

The subject property at 2900-2920 Shattuck Avenue does not appear to be eligible as a City of Berkeley Landmark. The subject property contains a building complex constructed from 1947 to 1968 that adapted existing buildings and constructed a new building section to create a car showroom, sales office, and car repair facility that was used by British Motors of Berkeley from 1968 until 1988. The building complex is generally utilitarian in its design and construction, with some minor characteristics that indicate the influence of the Modern Movement. The building is not of an early or exceptional example of mid-twentieth century commercial architecture as represented within the City of Berkeley and does not demonstrate architectural merit such that it would qualify as a landmark. It does not provide architectural value to the surrounding neighborhood, which is characterized by a mixture of commercial and single- and multi-family residential buildings of varied construction dates and architectural styles. 2900-2920 Shattuck Avenue operated as a car sales and repair facility until 1988, when it became two separate businesses with a car repair garage at the south portion of the building complex and a hardware store at the north portion. The businesses associated with the subject property have not made a significant contribution to the history of the city or the neighborhood and the building complex would not be eligible as a landmark for its cultural value. 2900-2920 Shattuck Avenue does not appear to be eligible as a landmark for its educational value. The building complex and property does not bear significant historic associations for it to contribute meaningfully to educational curricula. The building also does not appear to be eligible for its historic value as its type and style do not embody the history of Berkeley or the state. Additionally, the subject property is not listed on the National Register.

The subject property does not appear to have contextual importance as part of a neighborhood, block, or street frontage, as the character of Shattuck Avenue between Russell Street and Ashby Avenue lacks visual, architectural, or historic distinctiveness or significance in its mixture of commercial and multi-family residential buildings. Therefore, 2900-2920 Shattuck Avenue is not eligible as a City of Berkeley Structure of Merit.

Conclusion
The commercial building complex at 2900-2920 Shattuck Avenue, Berkeley, California was built in stages from 1947 to 1968. The building complex, which was created as an automobile showroom and repair facility for British Motors of Berkeley, has served as the home of several car dealerships from 1968 to 1988, before becoming an automobile repair business and a hardware store. This evaluation is based on a site visit and analysis of available documentation pertaining to the subject building's ownership and occupant history, chronology of construction and alterations, and architectural characteristics. The subject property is not eligible for individual listing in the California Register under any criterion, nor is the subject property eligible for designation as a City of Berkeley Landmark or Structure of Merit. The property does not therefore appear to qualify as a historic resource for the purposes of review under the California Environmental Quality Act (CEQA). As such, the California Historical Resource Status Code (CHRSC) of "6Z" has been assigned to the building, meaning that it was "Found ineligible for NR, CR or Local designation through survey evaluation."[11]

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

2900-2920 Shattuck Avenue
Berkeley, CA 94705

Report Date: April 6, 2022

Prepared for

2900 Shattuck Ave, LLC

Prepared by

GEM Group, Inc.

An Environmental Consulting Firm

April 6, 2022

Mr. Nathan George
2900 Shattuck Ave, LLC
2343 Stuart Street,
Berkeley, CA 94705

Subject: Phase I Environmental Site Assessment for 2900-2920 Shattuck Avenue, Berkeley, CA 94705
Proj. No. 22-14820

Dear Mr. George,

Attached is an electronic copy of the Phase I Environmental Site Assessment (ESA) report completed by **GEM Group, Inc.** for the subject property referenced above. As you will note in the report, our conclusions regarding the environmental condition of the site are summarized both in the ***Executive Summary***, and ***Section 4.0, Findings and Recommendations***.

Please don't hesitate to contact us should you have any questions regarding the results presented in the Phase I ESA report, or if we can be of additional assistance. We look forward to working with you again in the future.

Respectfully yours,

Michael Erving
Junior Geologist

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 CFR Part 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property.

Jen Moser, P.G.
Environmental Professional

EXECUTIVE SUMMARY

This report presents results of the Phase I Environmental Site Assessment (ESA) conducted by GEM Group, Inc at 2900-2920 Shattuck Avenue, Berkeley, CA 94705 (see **Figures 1 and 2**). The Phase I ESA, Project No. 22-14820, was conducted in accordance with GEM's Standard Terms and Conditions. The findings and conclusions of this Phase I ESA are based on the information collected and available during the timeframe of this project.

GEM has performed this Phase I ESA of the subject property in conformance with the scope and limitations of the *Environmental Protection Agency, Standards and Practices for All Appropriate Inquiries, 40 CFR Part 312* and the standard practice set forth in the *American Society for Testing and Materials (ASTM) Designation: E1527-13, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*." Any exceptions to, or deletions from, these practices are described in Section 1.2 of this report.

The subject property is developed with two attached 1-story commercial buildings on a 0.45-acre lot. The remaining portion of the subject property is landscaping, asphalt-paved parking, and concrete walkways. The general area is occupied by residential and commercial properties.

During the site reconnaissance, the buildings were occupied by Eastern Supplies, a True Value Hardware store (2900 Shattuck Avenue) and The Model Garage, an automotive repair/maintenance building (2920 Shattuck Avenue).

Eastern Supplies hardware had sealed retail sized automotive fluids, cleaners, glues, paints (aerosol spray cans and liquid), and degreasers on shelving for sale. There was no indication of any leaks or spills in the vicinity of hazardous materials for sale. The outdoor product storage area also contained various hardware items and two pipe cutting machines with visible staining on the asphalt underneath. Safety Data Sheets (SDS) indicated that the cutting oil used contains primarily mineral and paraffin oil and is classified as non-hazardous. GEM recommends these be placed on secondary containment to prevent worker slips/falls. Otherwise, housekeeping was observed to be cluttered but acceptable. A propane powered forklift was noted.

The Model Garage was an auto repair shop. There were six bays with above-ground hydraulic lifts and collection containers for used vehicle fluids. Hydraulic lifts appeared to be in good condition. Hazardous material/waste including new and used oil, used anti-freeze (55-gallon plastic container), waste motor oil (within 110-gallon aboveground storage tank [AST] & 20-55-gallon drums), and used filters (55-gallon-drum) were stored south of the subject property building. All drums/containers were observed on concrete surfaces without secondary containment, with exception to the waste motor oil AST which was on a wooden pallet. GEM recommends these be placed on secondary containment. Some minor surficial staining was noted in the vicinity of the hazardous waste storage area (no drains etc.). A 30-gallon Safety-Kleen-ArmaKleen 4 in 1 vehicle used parts washer was observed with a collection drum below the washer. The SDS and labels indicated low volatile organic compound (VOC) solution. All hazardous wastes were reportedly serviced on a regular basis by a licensed disposal company. There was no indication of significant leaks or spills in any of the maintenance bays and storage areas.

Historical sources show the subject property as undeveloped in 1903 and developed with multiple structures since at least 1910. The subject property was developed with a planing mill (1910-1938), cabinet/furniture shop (1938-1953), a residence (1911-1959), and a mortuary (1947-1950). The existing buildings appear to have been constructed in the mid-1950s. A unit at the subject property appears to have been an auto dealer/repair shop since at least 1950. Other historical tenants include formica manufacturing, laboratory, and theater. Current tenants, The Model Garage and Eastern Supplies, have been onsite since at least 1988 and 1997, respectively.

In 1988, a 250-gallon (or 500-gallon) waste oil underground storage tank (UST) was removed under permit from the fire department. Holes were noted at both ends. Odor was reportedly also noted. A soil sample collected beneath the UST center at 8 feet below ground surface did not indicate elevated concentrations of fuel constituents. The San Francisco Regional Water Quality Control Board issued a letter on October 17, 1995 indicating that the City of Berkely Toxics Management Division (TMD) closed the case on the basis that this investigation was noted with soil contamination only. The letter noted that the residual contamination was not a risk to human health or a threat to groundwater.

A Phase I ESA (Pangea, 2017) identified the onsite auto repair facility and four former hydraulic hoists a *recognized environmental condition* (*REC).* The Phase I ESA also identified an upgradient property, 2929 Shattuck Avenue, historically occupied by a dry cleaner as a REC. Pangea conducted soil vapor, groundwater, and soil sampling. All sub-slab samples were below detection limits for VOCs. Detections in soil samples were below ESLs. Groundwater samples were collected from three of the five soil borings. The only location with groundwater detection was B-3, located ~30 feet south of the former UST removed in 1988, at the northwestern exterior of the Model Garage structure. Although total petroleum hydrocarbon (TPH) diesel was detected at 460 micrograms per liter (ug/L), this constituent is not likely to volatize. All other constituents were either non-detect or well below ESLs. Pangea concluded that based on the limited TPH diesel impact, the City of Berkeley TMD could require preparation of a Site Management Plan to properly manage impacted soil or groundwater that may be encountered during future redevelopment of the subject property.

Former and current tenants at the subject property are identified as chemical storage and/or hazardous waste generator facilities under regulatory agency oversight. There are no records/listings from various regulatory agencies that identify the potential for adverse environmental impact from former and/or current tenants at the subject property. There were no records/listings from various regulatory agencies that identify the potential for adverse environmental impact from adjoining properties. There are no listed offsite listings with the potential for adverse environmental impact on the subject property.

There are no *RECs* identified at the subject property. A *REC* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

The former onsite LUST case given closure in 1995 is a *historical REC. Historical REC* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for

example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

Given the findings and conclusions of this Phase I ESA, GEM recommends no further investigation at this time. However, the City of Berkeley TMD will likely require a Site Management Plan to properly manage potentially impacted soil or groundwater encountered during redevelopment of the subject property.

1.0 INTRODUCTION

The purpose of this Phase I Environmental Site Assessment (ESA) is to assess (1) the likelihood of contamination at the subject property as a result of either past or present land-use practices; and (2) the potential for future environmental contamination which may occur as a result of current conditions or operations and maintenance activities at either the subject property or properties adjoining the subject property, thereby identifying real or potential environmental or economic impact to the subject property. In this way, the client may satisfy a requirement to qualify for the innocent landowner defense to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability by completing "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial and customary practice."

1.1 SCOPE OF WORK

To meet the objectives stated above, GEM has performed this Phase I ESA of the subject property in conformance with the scope and limitations of the *Environmental Protection Agency, Standards and Practices for All Appropriate Inquiries, 40 CFR Part 312* and the standard practice set forth in the *American Society for Testing and Materials (ASTM) Designation: E1527-13, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*." Any exceptions to or deletions from these practices are described in Section 1.2.

The scope of work for the Phase 1 ESA includes the following tasks:

1. Perform a reconnaissance of the subject property for significant surficial signs of chemical release, improper storage of hazardous materials, and surface indications of the presence of underground storage tanks (USTs) or water wells.

2. Provide off site research into the past land use of the subject property.

3. Review locally available aerial photographs for obvious surficial features indicative of past land use. Review available USGS topographic maps, fire insurance maps, and local telephone directories.

4. Review Federal, State and Local Agency files (available during the time frame of this project) for fuel leak and chemical release lists indicating soil and groundwater contamination cases within a ¼ mile radius to the site, as made available through the above-mentioned agency files.

Based on ASTM E1527, Federal, State, and other regulatory agency guidelines, the following presumptions were in force during site reconnaissance and/or evaluation of the subject property for specific hazardous substances:

- Use of asbestos in many products was banned in 1993; however, several categories of building products were not subject to the ban. Thus, existing and even new buildings may lawfully contain asbestos containing building material (ACBM).

- Use of lead-based paint (LBP) for residential use was prohibited in 1978 in concentrations greater than 0.06 percent lead by weight. It should be noted that the use of LBP in commercial and industrial buildings has not been prohibited.
- Fluorescent light ballasts will be considered PCB-free and will not be noted in the report regardless of their date of manufacture, unless GEM is instructed to do otherwise in writing by the client.
- Electrical transformers installed after 1979 must contain less than 50 parts per million of PCB (this is the requirement for the classification, “PCB non-contaminated”).

GEM also conducted a "drive-by" survey of the adjoining properties to note the operations which may pose an imminent or potential environmental threat to the subject property.

1.2 EXCEPTIONS AND/OR DELETIONS

There are no known exceptions or deletions.

1.3 NON-SCOPE ITEMS

Evaluation of non-scope items is not required or relevant for compliance with the all appropriate inquiries (AAI) Rule or E1527. Inclusion of any non-scope item in a Phase I report is entirely within the discretion of the user based on its own risk tolerance.

Non-scope items include, but not limited to, ACBM, biological agents, indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment, mold, radon, LBP, and lead in drinking water.

1.4 USER RELIANCE

This report was prepared for the sole use and benefit of **2900 Shattuck Ave, LLC** (client), and is based, in part, upon documents, writings, and information owned and possessed by our client. Neither this report, nor any of the information contained herein, shall be used or relied upon for any purpose by any person or entity other than our client.

2.0 SITE DESCRIPTION AND RECONNAISSANCE

The subject property is developed with two attached 1-story commercial buildings on a 0.45-acre lot. The remaining portion of the subject property is landscaping, asphalt-paved parking, and concrete walkways. The buildings are occupied by Eastern Supplies, a True Value Hardware store (2900 Shattuck Avenue) and The Model Garage, an automotive repair/maintenance building (2920 Shattuck Avenue).

2.1 SITE FACTS

Address Provided by Client:	**2900-2920 Shattuck Avenue, Berkeley, CA 94705**
Historical Addresses:	2030 Russell (1911 FIM)
Assessor's Parcel Number:	53-1590-5-1
Total Sq. Ft of Parcel (approximate):	19,641 (0.45-acres)
Total Number of Existing Structures:	2
Total Sq. Ft. of Buildings (approximate):	8,289
Date Oldest Building was Built:	1955
Total Number of Floors:	1
Basement:	None
Floor Type:	Concrete Slab
Improvements:	Parking lot and landscape
Current Occupants/Use:	
2900 Shattuck Avenue	Eastern Supplies (hardware store)
2920 Shattuck Avenue	The Model Garage (automotive repair)
Total Number of Units Visually Inspected:	All
Areas/Units that were inaccessible:	None
Were enough (units/offices/buildings/acres) visually inspected to ensure that the site reconnaissance was homogenous?	Yes
Potable Water:	Public System
Sewage:	Public System
Power:	Electric

Figure 1, Site Location Map, and **Figure 2**, Site Plan, are attached for reference.

2.2 SITE PHOTOGRAPHS

A number of photographs were taken to document the current condition and use of the subject property. The photographs with descriptions can be found in **Appendix A.**

2.3 GEOLOGIC AND HYDROGEOLOGIC CONDITIONS

GEM reviewed pertinent, reasonably ascertainable information on the soil types and groundwater conditions in the vicinity of the subject property. The research does not include the investigation of seismological concerns (i.e., fault lines) that may affect the area of the subject property. Although the existence of faults in an area may be of concern to property owners and residents in that area, it is not

considered to be an environmental concern, and so is not usually a component of a Phase I ESA.

The elevation of the subject property is approximately 148 feet above mean sea level. The general area is underlain by Pleistocene to Holocene age sediments of gravel, sand, silt, and clay. The subject property is in the Santa Clara Valley Groundwater Basin, East Bay Plain Subbasin. Groundwater is primarily used for municipal, domestic, and irrigational purposes.

Closure letters for offsite properties from 2015 indicated that depth to groundwater was encountered at approximately 5 to 11 feet below ground surface (bgs) with a flow direction towards the northwest-southwest. These sites are located within 0.09 miles from the subject property.

A 2017 Phase II investigation at the subject property encountered groundwater from 14-19 feet bgs (see Section 3.9).

It should be noted that these information is taken from reports for investigations conducted at other properties in the general vicinity and may not be representative of conditions at the subject property. It should be noted that the flow direction and depth of groundwater may be influenced by rainfall, tidal activity (shore properties), and local groundwater pumping operations. It should also be noted that shallower, unreported, perched groundwater zones may occur in the immediate site vicinity.

2.4 SITE RECONNAISSANCE

A visual site reconnaissance of the subject property was conducted on March 15, 2022, to identify observable signs of environmental impairments, including on-site operations and maintenance activities which may lead to possible environmental impairment.

As a part of the site reconnaissance the subject property was visually inspected for obvious indications of the following:

DESCRIPTION	COMMENT
Aboveground Storage Tanks (AST)	Yes, see Section 2.4.1 below
Back-up Power Generators (diesel, battery, natural gas)	None
Chemical/Hazardous Materials Storage Area	Yes, see Section 2.4.1 below
Creeks/ Canals	None
Debris or Debris Stockpile	None
Dispenser Islands, Concrete Pads, and/or Cradles (Fuel)	None
Dry Cleaner (drop-off, onsite)	None
Electrical Transformers (pole or ground)	Yes, pole transformer noted north of 2920 Shattuck Avenue, no environmental concerns
Evidence of Soil Borings	None
Evidence of Soil Excavation	None
Fill Materials	None
Drains (trench drains, proximity to HazMat/ waste)	None
Floor Staining or Corrosion (inside)	Yes, see Section 2.4.1 below
Forklift (type)	Yes, see Section 2.4.1 below
Grease Drum	None

DESCRIPTION	COMMENT
Grease Trap	None
Health and Safety Issues (e.g. molds, standing water)	None
Heating/Cooling Systems	Yes, standard systems only, no environmental concerns
Hydraulic Hoists/Elevator (No./Type)	Yes, see Section 2.4.1 below
Industrial Wastewater	None
Loading Dock (drain)	None
Odors	None
Oil Burners/Furnace	None
Oil-Water Separator/Clarifier	None
Patches (concrete, asphalt)	Yes, see Section 2.4.2 below
Petroleum Containers (No./size/type)	Yes, see Section 2.4.1 below
Pipes of Unknown Uses	None
Pits, Ponds, or Lagoons	None
Pools of Liquid	None
Railroad, spurs	None
Septic Systems	None
Stained Soil or Pavement	Yes, see Section 2.4.1 below
Stockpiled Soil	None
Storm Drains/ Catch Basins	None
Stressed Vegetation	None
Sump	None
Underground Storage Tanks	None
Unidentified/Abandoned Containers	None
Well, Type?	None

The compliance review is not intended as a comprehensive compliance audit. Rather, the compliance review is only intended to aid GEM in determining the likelihood that the subject property may have been impacted by releases of hazardous substances.

2.4.1 ONSITE CONDITIONS

The subject property consisted of two attached structures with addresses 2900 Shattuck Avenue (northern structure) and 2920 Shattuck Avenue (southern structure). 2900 Shattuck Avenue housed Eastern Supplies, a True Value Hardware Store. 2920 Shattuck Avenue housed the Model Garage, an automotive repair and maintenance business. Housekeeping within both establishments is detailed below.

2900 Shattuck Avenue

This address housed a one-floor commercial hardware store, a small loft area that was being used primarily for storage and an outdoor product storage yard. Standard hardware supplies for sale were observed throughout the interior of the store.

The interior of the store was observed to be cluttered but good with regards to housekeeping. Various retail sized automotive fluids, cleaners, glues, paints (aerosol spray cans and liquid containers), and degreasers were observed on shelving in sealed packaging for sale purposes. There was no indication of any leaks or spills in the vicinity of hazardous materials for sale.

The outdoor product storage area contained various standard hardware items. A propane powered forklift was noted. Two pipe cutting machines in this area had visible staining on the asphalt underneath. At the base of one of the machines were four one-gallon containers of thread cutting oil containers. Reviewed Safety Data Sheets (SDS) indicated that the product contains primarily mineral and paraffin oil and is classified as not hazardous per US OSHA 29CFR 1910.1200. GEM recommends these be placed on secondary containment to prevent worker slips/falls. Otherwise, housekeeping was observed to be cluttered but acceptable.

2920 Shattuck Avenue

This address housed a one-floor commercial auto repair and maintenance business and two small loft areas used for parts storage and office space. A vehicle storage yard/parking area was located to the south of the subject property. Housekeeping within the interior and exterior of the business were observed to be good. Cracks within the concrete in the interior of the building were noted.

Hazardous waste including used anti-freeze (55-gallon plastic container), waste motor oil (within 110-gallon AST & 20-55-gallon drums), 1-gallon gas can, and motor oil filters (55-gallon-drum) were stored south of the subject property building. All drums/containers were observed on concrete surfaces without secondary containment, with exception to the waste motor oil AST which was on a wooden pallet. Some minor surficial staining was noted in the vicinity of the hazardous waste storage area (no drains etc.). GEM recommends these be placed on secondary containment. Additional 30-gallon containers of portable used oil drums were observed at the unit interior. All hazardous wastes were reportedly serviced on a regular basis by a licensed disposal company.

A 30-gallon Safety-Kleen-ArmaKleen 4 in 1 vehicle used parts washer was observed in close proximity to the hazardous waste storage area. The SDS and labels indicated low VOC solution. A collection drum was noted below the washer, no indication of spills or leaks was observed. According to the site contact, the collection drum below the parts washer was emptied on a regular basis and the contents were disposed of through the same disposal company.

Six bays for vehicle repair and maintenance were present within the main building. Each bay contained an above-ground hydraulic lift and collection tanks for used vehicle fluids. Hydraulic lifts appeared to be in good condition. There was no indication of significant leaks or spills in any of the maintenance bays.

There were four 55-gallon drums of motor oil, one 110-gallon AST container of new motor oil, and five 20-gallon drums of other automotive oils/fluids (axle, brake, transmission, etc.) at a centrally located hazardous materials storage area. Smaller (~5-gallon) containers for motor oil were mounted on moveable carts. Housekeeping was observed to be excellent in this area and there was no indication of leaks or spills.

2.4.2 GROUND SURFACE CONDITIONS

There was no significant staining other than the usual vehicle motor oil leaks/drops on outdoor surfaces. There was no visible staining at areas where hazardous materials are utilized or stored beyond that described above. However, not all the surfaces or grounds were inspected. Limited patching of asphalt was noted in the parking lot south of 2920 Shattuck Avenue.

2.4.3 OTHER ENVIRONMENTAL CONDITIONS

There is a potential presence of ACBM and LBP in the building material. However, this Phase I ESA is not intended to constitute or substitute for a comprehensive, quantitative ACBM and LBP survey and sampling.

If demolition, renovation, or re-roofing of the building is planned, as asbestos survey is required by local authorities and/or National Emissions Standards for Hazardous Air Pollutants (NESHAP) guidelines. NESHAP requires the removal of potentially friable ACBMs prior to building demolition or renovation that may disturb ACBM.

If demolition is planned, the removal of LBP isn't required if it is bonded to the building materials. However, if the LBP is flaking, peeling, or blistering, it should be removed prior to demolition. In either case, applicable Occupational Safety and Health Administration requirements must be followed. Any debris or soil containing LBP (lead) must be disposed of appropriately.

There are no other environmental conditions other than those previously discussed.

2.5 VISUAL OBSERVATIONS, ADJOINING SITES

During the site reconnaissance, the GEM field assessor performed a "drive-by" survey of the adjoining properties to note operations that may pose an imminent or potential environmental threat to the subject property.

The general area is occupied by residential and commercial properties.

The immediate vicinity is occupied by commercial properties.

Adjoining and adjacent properties are:

North	Russell Street, 2020 Oregon Street (Berkeley Bowl Marketplace)
South	2930 Shattuck Ave (Easy Copy & Print Center)
West	2903-2913 Newbury St (residences)
East	Shattuck Avenue, residence, art gallery, homeopathic clinic

3.0 REVIEW OF HISTORICAL INFORMATION AND REGULATORY AGENCY RECORDS

3.1 ARCHIVED AGENCY RECORDS SEARCH

GEM submitted requests to review or obtain records from Agencies who have jurisdiction over the subject property. Records, if available, may either provide information about the environmental conditions on the subject property, or establish that no environmentally relevant records are on file for the subject property. A list of regulatory references/sources is provided in **Section 5.0**. Copies of records are included in **Appendix B.**

3.1.1 STATE WATER QUALITY CONTROL BOARD

The State Water Quality Control Board (SWQCB) website identifies the subject property Southwick Chrysler Plymouth (T0600101310) with LUST-Closed investigation. See Section 3.1.16.

3.1.2 DEPARTMENT OF TOXIC SUBSTANCES CONTROL

The Department of Toxic Substances Control (DTSC) website does not list the subject property with ongoing site assessment or remediation.

The DTSC Hazardous Waste Tracking System (HWTS) identified the subject property:

2900 Shattuck Avenue

- Imported Car of Berkeley from 1987 through 2000, no waste disposals listed.
- Balch Petroleum from 1988 through 2000, no waste disposals listed.

2920 Shattuck Avenue

- The Model Garage Inc active since 1992, disposed of:
    - 1995: 0.16-tons of unspecified solvent mixture.
    - 1996: 0.41-tons of unspecified organic liquid mixture and 0.2-tons of unspecified solvent mixture.
    - 1997: 0.97-tons of unspecified organic liquid mixture.
    - 1998: 0.77-tons of unspecified organic liquid mixture.
    - 1999: 0.26-ton of unspecified organic liquid mixture.
    - 2002: 0.084-tons of aqueous solution with organic residues.
    - 2003: 1.07-tons of aqueous solution with organic residues.
    - 2004: 0.5-tons of aqueous solution with organic residues.
    - 2012: 0.04-tons of metal dust and machining waste, and 0.02-tons of off specification aged or surplus organics.
    - 2015:1.105-tons of aqueous solution with organic residues, 0.015-tons of other inorganic solid waste, and 0.025-tons of unspecified organic liquid mixture.
    - 2016: 1.31-tons of aqueous solution with organic residues, 0.04-tpns of unspecified oil containing waste, and 0.105-tons of unspecified organic liquid mixture.

- 2017: 1.08-tons of aqueous solution with organic residues, 0.04-tons of hydrocarbon solvents, 0.03-tons of off specification aged or surplus organics, 0.13-tons of unspecified oil containing waste, and 0.05-tons of unspecified organic liquid mixture.
- 2018: 0.23-tons of aqueous solution with organic residues and 0.05-tons of unspecified organic liquid mixture.

3.1.3 CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY

The CalEPA Regulated Site Portal identified:

2900 Shattuck Avenue

- Southwick Chrysler Plymouth from 1988 through 1995 as a former LUST site, see Section 3.1.16.

2920 Shattuck Avenue

- The Model Garage Inc as a hazardous waste generator and chemical storage facility from 2013. Training violations noted in 2018. Noted storage of waste oil, used lead acid batteries, used antifreeze, tetrafluoroethene, and oxygen.

3.1.4 DEPARTMENT OF CONSERVATION, DIVISION OF OIL, GAS, & GEOTHERMAL RESOURCES

The Department of Conservation, Division of Oil, Gas & Geothermal Resources website does not identify the presence of oil or gas wells within the vicinity of the subject property.

3.1.5 DEPARTMENT OF TRANSPORTATION, NATIONAL PIPELINE MAPPING SYSTEM

The Department of Transportation, National Pipeline Mapping System website does not identify the presence of hazardous materials pipelines on the subject and adjacent properties.

3.1.6 BAY AREA AIR QUALITY MANAGEMENT DISTRICT

The Bay Area Air Quality Management District (BAAQMD) does not have permits on file for the subject property.

3.1.7 SAN FRANCISCO REGIONAL WATER QUALITY CONTROL BOARD

The San Francisco Regional Water Quality Control Board (SFRWQCB) does not have additional records. Records have been uploaded to the SWQCB Geotracker website, see Section 3.1.16.

3.1.8 ALAMEDA COUNTY ASSESSOR'S OFFICE

The Assessor's Parcel Number (APN) for the subject property is 53-1590-5-1.

3.1.9 ALAMEDA COUNTY WATER DISTRICT

The Alameda County Water District does not have records on file for the subject property.

3.1.10 ALAMEDA COUNTY PUBLIC WORKS AGENCY

The Alameda County Public Works Agency does not have records on file for the subject property.

3.1.11 ALAMEDA COUNTY DEPARTMENT OF ENVIRONMENTAL HEALTH

The Alameda County Department of Environmental Health does not have records on file for the subject property.

3.1.12 ALAMEDA COUNTY FIRE DEPARTMENT

The Alameda County Fire Department does not have records on file for the subject property.

3.1.13 CITY OF BERKELEY PLANNING AND COMMUNITY DEVELOPMENT DEPARTMENT

The City of Berkeley Planning and Community Development Department provided records for the subject property from 1910 through 2022. Other records were for Balch Petroleum for removal of one 250-gallon UST, see Section 3.1.16.

Permits for 2912 Shattuck Avenue were issued in 1910, 1922, 1923, 1938, and 1947 for workshop and warehouse. Permits for 2914 Shattuck Avenue referenced work for car shop and fire damage repair in 1948. Permits for 2912-2914 Shattuck Avenue included new masonry building (retail and office) in 1950 and building work in 1955. Permits for 2908 Shattuck Avenue showed permit for storage building in 1956. Permits for 2910 Shattuck Avenue showed electrical work in 1934. Permits for 2916 Shattuck Avenue showed factory use in 1942.

2900 Shattuck Avenue

Records were associated with standard tenant improvement (TI), building, electrical, sewer, signs, roofing, work noted from 1948 through 1978, mortuary noted in 1947, zoning for mechanical warehouse in 1952, and change of occupancy from cabinet shop to car agency and repair shop in 1967. Warehouse demolition permitted in 1968.

In 1951 Albert Burton was permitted to establish an auto laundry.

In 1965 an inventory list for Solano Laboratories listed that benzene (2-gallons), toluene (5-gallons), xylene (2-gallons), methanol (5-gallons), ethanol (1-gallon), acetone (5-gallons), ethyl ether (6-pints), pet. Ether (5-galllons), heptane (2-gallons), ethyl acetate (1-gallon), butyl alcohol (2-gallons), and isopropyl alcohol (20-gallons) were stored onsite. Notes indicated operations included medical analysis only with no manufacturing.

British Motors listed 1970-1971. English Motors listed 1968-1976. Peugeot Fiat Lancia listed in 1981. Car sales listed 1980-1981. Permits from 1982 identified Isuzu. Permits from 1982 identified Dodge. Permits

from 1986 identified Chrysler/Plymouth of Berkeley. Other demolition was noted in 1988. Seismic upgrade documentation was noted from 1990 through 1993 for Xtra Oil Company (1993).

2920 Shattuck Avenue

Building permits noted in 1928, 1930, and 1945. House demolition and sewer permit noted in 1959.

English Motors of Berkeley was noted in 1950. Model Garage was noted from 1988 through 1999 noted sign work, electrical work, and reroofing.

Eastern Supply retail hardware store was noted onsite 1988.

In February 2022, a preliminary development project application showed plans to convert 2920 Shattuck Avenue LLC into a new 10-story mixed-use residential development with 221 dwelling units, ground level lobbies, commercial, and parking.

3.1.14 CITY OF BERKELEY TOXICS MANAGEMENT DIVISION

The City of Berkeley Toxics Management Division (TMD) provided records on file for the subject property from 2010 through 2017. All records were associated with 2920 Shattuck Avenue.

Records were Unified Program Consolidated Permit and Registration and other permits for The Model Garage Inc. noted under the hazardous waste generator program, stormwater, and business plan facility with no onsite USTs. Noted storage of hazardous materials and wastes in liquids and gases including oxygen, aqueous parts cleaner, anti-freeze, lead acid batteries, refrigerant, motor oil, transmission oil, gear oil, acetylene, aerosol lubricants, nitrogen, waste oil, batteries, aqueous cleaning solution, and drained oil filters, inventory in 2018 was noted to match the California Environmental Reporting System (CERS). Violations noted in 2012 for labelling, open hazardous waste containers, and documentation. Violations noted in 2018 for labelling and employee training. Noted potential pollutant discharges from waste oil storage.

In 2017, a soil boring permit was issued to The Model Garage for five soil borings. Details are provided in Section 3.9.

3.1.15 CITY OF BERKELEY FIRE DEPARTMENT

The City of Berkeley Fire Department provided records on file for the subject property from 1961 through 2019. Other records associated with USTs are referenced in Section 3.1.16.

2900 Shattuck Avenue records included inspections for Formica top Manufacturing from 1961 through 1963, change of occupancy in 1964 for Solano Laboratories, change of occupancy in 1965 for telephone operations with flammable liquids storage room, change of occupancy in 1966 for theatre and snack bar, change of occupancy in 1967 for store, warehouse and office. Inspections were noted for Eastern Supplies from 2010 through 2018, minor violations noted to provide and maintain fire extinguisher, servicing equipment, post signs, and remove storage for clearance. Inspection in 2019 for Tru Value Hardware found no violations.

2920 Shattuck Avenue

Inspections from 2015 through 2019 for the Model Garage reported no violations.

3.1.16 UST-RELATED DOCUMENTATION

Records associated with USTs were from 1988 through 1995. Records were from the SWQCB Geotracker website (Section 3.1.1), California Environmental Protection Agency (Section 3.1.3.), the City of Berkeley Planning and Community Development Department (Section 3.1.13.), and the City of Berkeley Fire Department (Section 3.1.15). All records were associated with 2900 Shattuck Avenue.

In 1988, a 250-gallon (notes also show 500-gallon) waste oil UST was removed from Fiat/Dodge dealer under permit from the fire department. The 250-gallon UST was removed by Balch Petroleum on March 8, 1988. Holes were noted at both ends. Odor was reportedly also noted (no other details of type of odor). A soil sample was collected beneath the UST center at 8 feet bgs. Soil samples did not indicate elevated concentrations of fuel constituents.

Southwick Chrysler Plymouth was associated with LUST investigation (T0600101310) originating April 1988. According to a letter from October 17, 1995 that was issued by the SFRWQCB, the City of Berkely TMD closed the case on basis that this investigation was noted with soil contamination only (GEM Note: City of Berkely TMD did not provide relevant documentation regarding this investigation from sent records request). This letter issued by the SFRWQCB indicated the case with closure status. It was noted that the residual contamination was declared not to be a risk to human health and not to be a threat to groundwater.

GEM Note: see Section 3.9. regarding recent investigations and onsite residual contamination.

3.2 REVIEW OF REGULATORY AGENCY DATABASES

GEM has also reviewed a vendor-supplied, computer-generated federal, state, and regional one-mile regulatory database search in an effort to determine whether the subject property is listed on an agency environmental database and to identify possible regulatory-listed sites of concern within a one-mile radius of the subject property. In general, these documents list known or suspected hazardous-waste generators, release sites, landfills, unauthorized disposal sites, sites with registered underground storage tanks, and sites currently under investigation for known or suspected environmental violations or releases.

GEM assesses the potential environmental impact of petroleum hydrocarbon sites within 0.125 miles (660 feet) of the subject property and dry cleaners (PCE sites) with active investigation and remediation within 0.25 miles (1,320 feet) of the subject property.

The Federal and State listings are summarized in the table below:

Government Records	Description	ASTM Search Distance (miles)	Total Listing
Federal			
National Priority List (NPL)	U.S. Environmental Protection Agency's (EPA) list of national priorities among known or threatened releases of hazardous substances, pollutants, or contaminants throughout the U.S. and its territories. The NPL is intended primarily to guide the EPA in determining which sites warrant further investigation under the Superfund Program.	1.0	0
Delisted NPL	Facilities that have been removed from the NPL.	0.5	0
Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)	EPA's list containing information on the assessment and remediation of current hazardous waste sites pursuant to the CERCLA of 1980.	0.5	0
CERCLIS No Further Action Remedial Action Planned (NFRAP)	Facilities that have been removed and archived from EPA's inventory of CERCLA sites.	0.5	0
Resource Conservation and Recovery Act (RCRA) Corrective Action (CORRACTS)	EPA's database of RCRA facilities associated with treatment, storage, and disposal (TSD) of hazardous waste that are undergoing "corrective action." A "corrective action" order is issued when there has been a release of hazardous waste or constituents into the environment from a RCRA facility.	1.0	0
RCRA non-CORRACTS TSD	EPA's database of facilities which report storage, transportation, treatment, or disposal of hazardous waste. Unlike the RCRA CORRACTS/TSD database, the RCRA Non-CORRACTS/TSD database does not include RCRA facilities where corrective action is required.	0.5	0
RCRA Generators	EPA's database of facilities that generate hazardous waste as part of their normal business practices. Generators are listed as either large (LQG), small (SQG), or conditionally exempt (CESQG).	property and adjoining properties	1 (subject property)

Government Records	Description	ASTM Search Distance (miles)	Total Listing
Institutional control (IC)/engineering control (EC)	IC includes administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. EC includes caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.	property only	0
Emergency Response Notification System (ERNS)	EPA's database of facilities with reported releases of petroleum and hazardous substances to the air, soil and/or water.	property only	0
State and Tribal			
Equivalent NPL	Confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity.	1.0	0
Equivalent CERCLIS	Federal Superfund Sites identified by the EPA where the DTSC is actively involved, either in a lead or support capacity, in the investigation and/or remediation currently in progress.	0.5	0
Landfill and/or solid waste disposal sites	Database of solid waste facilities; may include the facility name, class, operation type, area, estimated operational life, and owner.	0.5	0
Leaking underground storage tank (LUST)	List of USTs which have been reported as having had a release.	0.5	26 (2 open)
Registered storage tanks	Database of registered storage tanks	property and adjoining properties	1 (subject property: closed)
IC/EC	Equivalent to the Federal IC / EC database list	property only	0
Voluntary cleanup sites	Facilities included as Voluntary Cleanup Program (VCP)	0.5	0
Brownfield sites	Properties addressed by Cooperative Agreement Recipients or Targeted Brownfields Assessments.	0.5	0
Spills, Leaks, Investigation & Cleanup (SLIC)	Sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. SLIC Program deals with site investigation and corrective action involving sites not overseen by the UST Program and the Well Investigation Program.	0.5	3 (2 open)

Supplemental and proprietary historic databases were also reviewed. These databases identified the following listings within 0.25 miles of the subject property:

Source List	Description	Search Distance (miles)	Total Listing
Air Permits with Emissions (Air, Air-Dist)	facilities with permits for air emission; air permitted facilities as reported by various Air Quality and Air Pollution Control Districts in California	0.25	3
DCF2, DryCleaners, Cleaners	drycleaners reported by the DTSC	0.25	1
Facility Registry System (FRS)	facilities subject to environmental regulation/ interest	0.0625	6 (3 subject property)
Historical listings	listings from historical databases that are no longer updated/used. Listings may have been closed or transferred to active databases	0.0625-0.25	74 (16 subject property)
Historical Auto Repair	records dating back to the 1800's that have shown up in historic resources and based on their classification, may have used hazardous materials or petroleum products.	0.25	5 (1 subject property)
Historical Manufacturing		0.0625	1
Historical Cleaners		0.25	1
Historical Service Station		0.25	2
Historical Printer	may have used/stored hazardous materials or fuel	0.0625	3
Spill-SSO	database contains private lateral sewage discharges from RWQCB	0.25	3

The following former and/or current tenants are listed in the regulatory databases reviewed:

- 2900 Shattuck Avenue
    - Southwick Chrysler Plymouth, former LUST-Closed site, see Section 3.1.16.
    - Imported Car of Berkeley
        - Small quantity hazardous waste generator facility under the US EPA from at least 1991 through 1996.
        - Facility inventory database site under the US EPA in 1998.
    - Balch Petroleum, facility inventory database site under the US EPA in 1998.
- 2920 Shattuck Avenue
    - The Model Garage
        - Historical automobile repairing and service facility in 1997.
        - Facility inventory database site under the US EPA in 1998.
        - Disposed of:
            - 0.42-tons of unspecified solvent mixture from 1995 through 1996.
            - 0.04-tons of metal dust and machining waste in 2012.
            - 0.015-tons of other inorganic solid waste in 2015.
            - 0.17-tons of unspecified oil containing waste from 2016 through 2017.
            - 0.035-tons of hydrocarbon solvents in 2017.

        - 5.16-tons of aqueous solution with organic residues from 2002 through 2017.
        - 3.12-tons of unspecified organic liquid mixture from 1996 through 2017.
        - 0.045-tons of off specification aged or surplus organics from 2012 through 2017.
      - CERS facility with inventory of hazardous materials, see Section 3.1.14.
      - Chemical storage and hazardous waste generator facility under the City of Berkeley TMD. All violations are in compliance, see Section 3.1.14.
      - Small quantity hazardous waste generator facility under the US EPA from at least 1992 through 2015.
    - Donald B Worth listed CUPA facility under the City of Berkeley, listed records showed listing as the "owner" of The Model Garage, see Section 3.1.14.
- There are no listings which identify immediate major environmental concerns towards the subject property at this time.

The following adjoining and immediately adjacent properties are listed in the regulatory databases reviewed:

- The adjoining west property, 2905 Newbury Street, Akxer Construction, disposed of 0.35-tons of other organic solids in 1997. There are no ongoing investigations or violations listed at this time.
- The south adjoining property, 2930 Shattuck Avenue (Aceloni and Easy Copy Center), is listed as a historical printer, publisher, commercial, and retail facility in 2010, then historical manufacturing in 2013. There are no ongoing investigations or violations listed at this time.
- The southwest adjacent property, 2929 Shattuck Avenue, Newbury Station Office Park, is located ~130 feet across Shattuck Avenue from the subject property. Associated with bunker oil UST removal in 1988. A 500-gallon UST of Stoddard solvent was discovered (presumed for dry-cleaning) and removed. Groundwater sampling from 1990 and 1991 indicated no detections of Stoddard solvent. This site had no other work besides well abandonment, then the case was officially closed in 2015. The site was redeveloped with a commercial restaurant. Based on the distance, closed case status, and available information at this time, the potential for presence of environmental contamination appears low.

The LUST-Open cases are located 0.36 and 0.5 miles from the subject property. These sites are greater than the distance used for assessing sites that may have a potential environmental impact on the subject property.

The California SLIC-Open cases are located 0.11 and 0.43 miles from the subject property. These sites are either located cross/down-gradient from the subject property or reviewed to have contamination plumes not extending to within the subject property boundary. Based on the available information, the potential for adverse environmental impact appears low.

The remaining LUST-Closed and SLIC-Closed sites are located between 0.07 and 0.5 miles from the subject property. Based on the closed case status, the potential for presence of environmental impact from the subject property appears low at this time.

The Cleaners and Hist-Cleaner listings is located 0.06 miles from the subject property. There are no violations or ongoing investigations at this time.

There are no listings within the distance used for assessing sites that appear to have an adverse environmental impact on the subject property at this time.

A copy of the complete database search document and a detailed description of the databases that were searched are included in **Appendix C**.

3.3 REVIEW OF HISTORICAL AERIAL PHOTOGRAPHS

GEM reviewed readily available and reasonably ascertainable aerial photographs of the area of the subject property (https://www.historicaerials.com/ and Google Earth).

Aerial photographs for 1946, 1958, 1968, 1980, 1982, 1985, 1988, 1993, 2000, 2002, 2003, 2004, 2005, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, and 2021 the years of were reviewed.

The 1946 aerial photograph showed the subject property developed with what appear to be at least three structures (GEM Note: all former structures not part of existing site configuration). The general area was shown with residential and commercial structures.

The 1958 aerial photograph showed the subject property developed with multiple structures, including a portion of the existing structure at the northern portion of the subject property.

The 1968 through 2021 aerial photographs showed the subject property with the existing two commercial structures and paved parking. The general area remained commercial and residential structures.

3.4 REVIEW OF HISTORICAL USGS TOPOGRAPHIC MAPS

GEM reviewed readily available and reasonably ascertainable USGS topographic maps of the area of the subject property (https://www.historicaerials.com/).

USGS topographic maps for the years of 1895, 1899, 1900, 1904, 1906, 1908, 1914, 1915, 1929, 1947, 1949, 1960, 1967, 1969, 1975, 1981, 1997, 2012, 2015, and 2018 were reviewed.

The 1895 through 1975 USGS topographic maps showed the general area with road and building development. Railroad tracks were shown in the offsite outer western vicinity.

The 1981 through 2018 USGS topographic maps showed the general area with full development, with the previous railroad tracks no longer present.

3.5 REVIEW OF HISTORICAL FIRE INSURANCE MAPS

Fire insurance maps are the most detailed historical records of the urban landscape. From 1790 to 1961, nearly every U.S. town and city with populations of 2,000 or more had been surveyed. Shown on these

maps, sometimes in great detail, is virtually every building, man-made structure, and business standing at the time the survey was made.

Fire insurance maps for the years 1911 and 1950 were also reviewed.

The 1911 fire insurance map showed the subject property with multiple features. The northern portion showed wood piles with address 2030 Russell. The central portion of the site, addressed 2912 Shattuck Avenue, showed the Dobson & Creagmile Planing Mill "1-chemical extinguisher, shavings hauled away once daily". This showed one Planing Mill structure, three attached units including lumber storage at 2912 1/3 Shattuck Avenue, carpenter shop at 2912 ½ Shattuck Avenue, and an additional attached unlabeled structure. The southern portion of the subject property showed a dwelling and a separate unlabeled structure at 2920 Shattuck Avenue. Railroad tracks were shown in the offsite outer northwestern vicinity. The general area were mostly flats, dwellings, stores, and cement/lime storage.

The 1950 fire insurance map showed the subject property with multiple features. The northern portion showed an Undertaker structure at 2900 Shattuck Avenue. The central portion showed a 1 ½-story cabinet shop labeled with metal paint spray booth at 2912 Shattuck Avenue. The previous southern dwelling at 2920 Shattuck Avenue remained. A pressing facility was shown at 2929 Shattuck Avenue adjacent southwest. Metal Toy Assembling was shown offsite adjacent east. Fuel and feed storage was shown offsite adjacent north. A gas & oil structure with two USTs were shown in the offsite outer southern vicinity. Lumber storage and a fuel yard were shown in the offsite outer northeastern vicinity. The offsite northwestern railroad tracks remained. The remainder of the general area mostly consisted of dwellings, flats, and stores.

A copy of the report is included in **Appendix C**.

3.6 REVIEW OF HISTORICAL CITY DIRECTORIES

One of the least known, yet most complete and comprehensive historical sources are historical city or street directories. GEM reviews historical city or street directories (also known as criss-cross or reverse indexed directories) for information on the past occupants of and activities on the subject property and adjoining properties. If they were reasonably ascertainable, they were reviewed to determine current or past occupants of the subject property.

Historical city or street directories were available for 1938, 1943, 1953, 1960, 1964, 1977, 1987, 1997, and 2011. The listings are provided below:

2900 Shattuck Ave (Subject Property)

- 1938-1943 – Not Listed
- 1953 – Henningsen & Folsom
- 1960-1964 – Henningsen & Assoc
- 1977 – English Motors Brk
- 1987 – Berkly Chrysler Srv, Berkly Leasing, Chrysler Plymouth, Dodge Berkeley, Imported Crs Brkly, Isuzu Berkeley
- 1997 – Eastern Supplies
- 2011 – Eastern Supplies, Kwong Tat

2902 – 2910 Shattuck Ave (Subject Property)

- 1938-2011 – Not Listed

2912 Shattuck Ave (Subject Property)

- 1938-1943 – MDM Furniture Mfg Co, Miesner MDM Furn Mfg Co
- 1953 – Henningsen & Folsom Cabinet Makers
- 1960-2011 – Not Listed

2914-2918 Shattuck Ave (Subject Property)

- 1938-2011 – Not Listed

2920 Shattuck Ave (Subject Property)

- 1938 – Creagmile R
- 1943 – Not Listed
- 1953 – Trechter John E
- 1960-1987 – Not Listed
- 1997-2011 – The Model Garage

A copy of the report is included in **Appendix C**.

3.7 PRIOR OR CURRENT AGRICULTURAL LAND USE

It does not appear that the subject and adjoining properties were used for agriculture since at least 1911.

3.8 QUESTIONNAIRE AND/OR INTERVIEW

The site contact was interviewed during the site reconnaissance. Information provided are discussed Section 2.0.

3.9 ADDITIONAL ENVIRONMENTAL DOCUMENTS

Copies of the following were provided for review:

- *Phase I Environmental Site Assessment Report, 2920 Shattuck Avenue, Berkeley, California 94705* (Pangea, 2017) and

- *Phase II Environmental Site Assessment Report, 2920 Shattuck Avenue, Berkeley, California 94705* (Pangea, 2017).

The subject property consists of two commercial buildings on a 0.63-acre lot. The remainder of the site consists of an asphalt-paved parking lot. The southern building was occupied by The Model Garage. The northern building was occupied by True Value Eastern Supplies. The general area consists of commercial and residential properties.

Site history includes vacant site in 1903, planing mill in 1911, woodworking and cabinet making in 1925, funeral home in 1950, converted to automotive sales and service dealership facility in the 1970s. The northern building was converted into a hardware/plumbing supplies store in the early 1990s.

Notable features during the onsite inspection included 55-gallon drums of waste and new motor oil, 25-gallon drums of various weight oils, 5-gallon containers of new motor oils, and retailed sixed automotive fluids, cleansers, and paints.

- The site, identified as The Model Garage, Inc. at 2920 Shattuck Avenue, generated hazardous waste on-site in the form of aqueous solution with total organic residues less than 10 percent, unspecified organic liquid mixture, other inorganic solid waste, aqueous solution with total organic residues 10 percent or more, and unspecified solvent mixture. The generation of hazardous waste on-site is associated with the operation of an automotive repair shop. No violations or release incidents were reported in association with these listings. Based on the lack of a reported release, and the current regulatory status, these listings are not expected to represent a significant environmental concern.
- The site, identified as Imported Cars of Berkeley/Southwick Chrysler Plymouth at 2900 Shattuck Avenue, is listed as a LUST (and various other UST related databases) due to a release of waste/motor/hydraulic/lubricating oil that impacted soil only at the site, discovered in 1988. Impacted soil was excavated and removed from the site. The site received a Case Closed status from the City of Berkeley on October 17, 1995. Based on this information, this former release incident is an environmental concern.

None of the adjacent properties were identified in the regulatory database.

Pangea's assessment has revealed the following RECs associated with the site or nearby properties:

- The historical (and current) property used as an auto repair facility since the 1970s represents a REC.
- An upgradient property 2929 Shattuck has historically been a dry cleaner. Since this site is upgradient from the Site, a potential release from the site could impact the subsurface of the site. Therefore, the historical presence of this adjacent dry-cleaning facility represents a REC.
- The site formerly had four hydraulic hoists with hydraulic oil reservoirs (GEM Note: presumed underground, report does not specify). These hoists and tanks were removed and replaced with electric hoists in 1988. The historical presence of these hoist reservoir tanks represents a REC.

Based on the RECs, Pangea conducted Phase II investigation.

On December 13, 2016, Pangea installed and sampled five sub slab gas probes for VOC analysis. All sub-slab samples were below detection limits for VOC analysis.

On January 27, 2017, five soil borings were drilled. Borings ranged from 5-25 feet bgs.

- Groundwater was encountered at 14-19 feet bgs.
- Soil samples showed detections of acetone, TPH diesel, TPH motor oil, and lead. All detections were below residential direct soil environmental screening levels (ESLs).
- Groundwater samples were collected from three of the five soil borings. Groundwater sample from B-3, located ~30 feet south of the former UST removed in 1988, showed TPH diesel at 460 micrograms per liter (ug/L), this constituent is not likely to volatize. B-3 was located at the northwestern exterior of the Model Garage 2920 Shattuck Avenue structure. All other constituents

were either non-detect or well below ESLs.

Pangea noted that the TPH diesel impact could be associated with the former UST removed from the site or hydrocarbons historically used/stored at the site. Based on the limited TPH diesel impact, the City of Berkeley TMD could require preparation of a Site Management Plan to properly manage impacted soil or groundwater that may be encountered during future redevelopment of the site. Pangea recommended management of TPH diesel impact during future site redevelopment.

Copies of the reports are included in **Appendix B**.

3.10 HISTORICAL SITE USE

The chronological historical site use summary below is based on reviewed aerial photographs, maps, regulatory agency files, interviews, and additional environmental documents:

2912 Shattuck Ave (Historical Subject Property)

- 1910 – 1947 – workshop and warehouse (permits)
- 1911 – 1938 - Dobson & Creagmile Planing Mill, lumber storage, carpenter shop (FIM)
- 1938-1953 – cabinet/furniture shop

2900 Shattuck Ave (Subject Property)

- 1947 – 1950 – mortuary/undertaker (permit and FIM)
- 1952 – mechanical warehouse (permit)
- 1953 – 1964 – Henningsen & Folsom (CD)
- 1961 – 1963 – Formica Top Manufacturing (permits)
- 1964 – 1965 – Solano Laboratories (permits)
- 1967 – 1966 – theatre and snack bar (permit)
- 1967 – 1968 – warehouse (permits)
- 1968 – 1976 – English Motors (permits)
- 1970 – 1971 – British Motors (permits)
- 1981 – 1988 – Fiat/Dodge
- 1982 – 1987 – Isuzu
- 1987 – 2000 – Imported Car of Berkeley
- 1987 – 1995 – Southwick Chrysler Plymouth
- 1997 – current – Eastern Supplies, a True Value Hardware Store

2920 Shattuck Ave (Subject Property)

- 1911 – 1959 – residential (FIMs and permits)
- 1938 – Creagmile R
- 1950 – English Motors
- 1953 – Trechter John E
- 1988-current – The Model Garage

2908 Shattuck Ave (Historical Subject Property)

- 1956 – storage (permits)

2910 Shattuck Ave (Historical Subject Property)

- 1934 – electrical work (permits)

2914 Shattuck Ave (Historical Subject Property)
- 1948 – car shop (permits)
- 1950 – 1955 – masonry building (permits)

2916 Shattuck Ave (Historical Subject Property)
- 1942 – factory use (permits)

3.11 VAPOR INTRUSION GUIDELINES

The U.S. Environmental Protection Agency's *Technical Guide for Assessing and Mitigating the Vapor Intrusion Pathway from Subsurface Vapor Sources to Indoor Air* (OSWER Publication 9200.2-154, June 2015) recommends that 100 feet laterally and vertically is a reasonable initial criterion when considering vapor migration fundamentals. The buffer zone of approximately 100 feet has generally been used in determining which buildings to include in vapor intrusion investigations when significant surface covers are not present, under the assumption that preferential vapor migration routes are absent.

Vapor encroachment condition (VEC) is the presence or likely presence of volatile and toxic vapors in the vadose zone of the subject property caused by the release of vapors from contaminated soil and/or groundwater either on or near the subject property.

Vapor intrusion is the general term given to migration of hazardous vapors from any subsurface vapor source, such as contaminated soil or groundwater, through the soil and into an overlying building or structure. These vapors can enter buildings through cracks in basements and foundations, as well as through conduits and other openings in the building envelope. Vapors can also enter structures that are not intended for human occupancy (e.g., sewers, drain lines, access vaults, storage sheds, pump houses) through cracks and other openings.

All types of buildings, regardless of foundation type (e.g., basement, crawl space, slab-on-grade), have openings that render them potentially vulnerable to vapor intrusion. Buildings subject to vapor intrusion include, but are not limited to, residential buildings (e.g., detached single-family homes, trailer or 'mobile' homes, multi-unit apartments and condominiums), commercial workplaces (e.g., office buildings, retail establishments), educational and recreational buildings (e.g., schools and gyms), and industrial facilities (e.g., manufacturing plants).

Based on available information, a VEC does not exist at the subject property.

3.12 REVIEW OF PRELIMINARY TITLE REPORT

A preliminary title report was available for review but is not included as an attachment in this report. There are no easements on public record. Pertinent information is included in this Phase I ESA.

3.13 IDENTIFICATION OF HISTORICAL DATA GAPS

Data gaps may result from the lack of or inability to obtain information required by ASTM E1527 despite good faith efforts by the environmental professional to gather such information. Data gaps are only significant if "other information and/or professional experience raise reasonable concerns involving the data gap."

Data gaps may include, but are not limited to, site reconnaissance, interviews, review of standard historical sources, etc. ASTM E1527 requires that all obvious uses of the property shall be identified from the present, back to the property's first developed use, or back to 1940, whichever is earlier.

During the course of this Phase I ESA, GEM did not identify significant data gaps within the reviewed historic documents for the subject property that could affect the conclusions of this report.

4.0 FINDINGS AND RECOMMENDATIONS

4.1 FINDINGS

The subject property is developed with two attached 1-story commercial buildings on a 0.45-acre lot. The remaining portion of the subject property is landscaping, asphalt-paved parking, and concrete walkways. The general area is occupied by residential and commercial properties.

During the site reconnaissance, the buildings were occupied by Eastern Supplies, a True Value Hardware store (2900 Shattuck Avenue) and The Model Garage, an automotive repair/maintenance building (2920 Shattuck Avenue).

Eastern Supplies hardware had sealed retail sized automotive fluids, cleaners, glues, paints (aerosol spray cans and liquid), and degreasers on shelving for sale. There was no indication of any leaks or spills in the vicinity of hazardous materials for sale. The outdoor product storage area also contained various hardware items and two pipe cutting machines with visible staining on the asphalt underneath. SDS indicated that the cutting oil used contains primarily mineral and paraffin oil and is classified as non-hazardous. GEM recommends these be placed on secondary containment to prevent worker slips/falls. Otherwise, housekeeping was observed to be cluttered but acceptable. A propane powered forklift was noted.

The Model Garage was an auto repair shop. There were six bays with above-ground hydraulic lifts and collection containers for used vehicle fluids. Hydraulic lifts appeared to be in good condition. Hazardous material/waste including new and used oil, used anti-freeze (55-gallon plastic container), waste motor oil (within 110-gallon AST & 20-55-gallon drums), and used filters (55-gallon-drum) were stored south of the subject property building. All drums/containers were observed on concrete surfaces without secondary containment, with exception to the waste motor oil AST which was on a wooden pallet. GEM recommends these be placed on secondary containment. Some minor surficial staining was noted in the vicinity of the hazardous waste storage area (no drains etc.). A 30-gallon Safety-Kleen-ArmaKleen 4 in 1 vehicle used parts washer was observed with a collection drum below the washer. The SDS and labels indicated low VOC solution. All hazardous wastes were reportedly serviced on a regular basis by a licensed disposal company. There was no indication of significant leaks or spills in any of the maintenance bays and storage areas.

Historical sources show the subject property as undeveloped in 1903 and developed with multiple structures since at least 1910. The subject property was developed with a planing mill (1910-1938), cabinet/furniture shop (1938-1953), a residence (1911-1959), and a mortuary (1947-1950). The existing buildings appear to have been constructed in the mid-1950s. A unit at the subject property appears to have been an auto dealer/repair shop since at least 1950. Other historical tenants include formica manufacturing, laboratory, and theater. Current tenants, The Model Garage and Eastern Supplies, have been onsite since at least 1988 and 1997, respectively.

In 1988, a 250-gallon (or 500-gallon) waste oil UST was removed under permit from the fire department. Holes were noted at both ends. Odor was reportedly also noted. A soil sample collected beneath the UST center at 8 feet bgs did not indicate elevated concentrations of fuel constituents. The SFRWQCB issued a letter on October 17, 1995 indicating that the City of Berkely TMD closed the case on the basis that this

investigation was noted with soil contamination only. The letter noted that the residual contamination was not a risk to human health or a threat to groundwater.

A Phase I ESA (Pangea, 2017) identified the onsite auto repair facility and four former hydraulic hoists a REC. The Phase I ESA also identified an upgradient property, 2929 Shattuck Avenue, historically occupied by a dry cleaner as a REC. Pangea conducted soil vapor, groundwater, and soil sampling. All sub-slab samples were below detection limits for VOCs. Detections in soil samples were below ESLs. Groundwater samples were collected from three of the five soil borings. The only location with groundwater detection was B-3, located ~30 feet south of the former UST removed in 1988, at the northwestern exterior of the Model Garage structure. Although TPH diesel was detected at 460 ug/L, this constituent is not likely to volatize. All other constituents were either non-detect or well below ESLs. Pangea concluded that based on the limited TPH diesel impact, the City of Berkeley TMD could require preparation of a Site Management Plan to properly manage impacted soil or groundwater that may be encountered during future redevelopment of the subject property.

Former and current tenants at the subject property are identified as chemical storage and/or hazardous waste generator facilities under regulatory agency oversight. There are no records/listings from various regulatory agencies that identify the potential for adverse environmental impact from former and/or current tenants at the subject property. There were no records/listings from various regulatory agencies that identify the potential for adverse environmental impact from adjoining properties. There are no listed offsite listings with the potential for adverse environmental impact on the subject property.

4.1.1 RECOGNIZED ENVIRONMENTAL CONDITION

A *REC* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

There are no *RECs* identified at the subject property at this time.

4.1.2 HISTORICAL REC

Historical REC refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

The former onsite LUST case given closure in 1995 is a *historical REC*.

4.1.3 CONTROLLED REC

Controlled REC is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject

to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

There are no *controlled RECs* identified at the subject property at this time.

4.1.4 DE MINIMIS CONDITIONS

A *de minimis condition* generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis conditions* are not *RECs* nor *controlled RECs*.

The current use of the subject and general area for automobile servicing is a *de minimis condition*.

4.1.5 BUSINESS ENVIRONMENTAL RISK

BER is a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, and is not an issue required to be investigated under this practice. A *BER* may include one or more of the non-scope issues contained in subsection 1.3.

There is the potential presence of ACBM and LBP in the original building material. However, this Phase I ESA is not intended to constitute or substitute for a comprehensive, quantitative ACBM and LBP survey and sampling.

4.2 RECOMMENDATIONS

Given the findings and conclusions of this Phase I ESA, GEM recommends no further investigation at this time. However, the City of Berkeley TMD will likely require a Site Management Plan to properly manage potentially impacted soil or groundwater encountered during redevelopment of the subject property.

6.0 LIMITATIONS

To achieve the study objectives stated in this report, we were required to base GEM conclusions and recommendations on the best information available during the period the Phase I ESA was conducted and within the limits prescribed by GEM client in the contract/authorization agreement and standard terms and conditions.

GEM's professional services were performed using that degree of care and skill ordinarily exercised by environmental consultants practicing in this or similar fields. Resumes are included in **Appendix D**. The findings were mainly based upon examination of historic records, maps, aerial photographs, and governmental agencies lists. The hazardous waste site lists represented in this report represent only a search of the specific government records as listed above. It should be noted that governmental agencies often do not list all sites with environmental contamination; the lists could be inaccurate and/or incomplete. Recommendations are based on the historic land use of the subject property, as well as features noted during the site reconnaissance and examined records. The absence of potential gross contamination sources, historic or present, does not necessarily imply that the subject property is free of any contamination. This report only represents a "due diligence" effort as to the integrity of the subject property. No warranty or guarantee, expressed or implied, is made as to the professional conclusions or recommendations contained in this report. The limitations contained within this report supersede all other contracts or scopes of work, implied or otherwise, except those stated or acknowledged herewith.

This report is not a legal opinion. It does not necessarily comply with requirements defined in any environmental law such as the "innocent landowner defense" or "due diligence inquiry." Only legal counsel retained by the client is competent to determine the legal implications of any information, conclusions, or recommendations in this report. The compliance status, is not intended for use as a guide to compliance for the present owner. Its intended use is to identify environmental impairments to the subject property and is not to be used as a guide to the legal compliance to any regulations of any kind.

The findings, conclusions, recommendations, and professional opinions contained in this report have been prepared by the staff of GEM, in accordance with generally accepted professional practices. All cost estimates if provided, are purely estimates, and may not represent the actual costs. The costs provided are for budgetary purposes only.

This report does not address, in any way, septic systems, leach fields, septic tanks, or related health hazards.

Analytical results for samples, if collected, should not be construed as conclusive and binding in any way. All sampling conducted is only for the purposes of general screening and does not imply that all materials, locations, or hazardous materials have been identified nor was the sampling intended to identify every instance of the materials sampled. No interpretation of the sample results is made or implied. GEM relays only the information supplied by the laboratory conducting the analysis.

Want an off Market Deal in Berkeley CA ?

Comment

A seller has agreed to an attractive price for a home in Berkeley CA. My partners backed out of the deal after discovering the foundation needs some work. I think this deal is still good, so I thought I'd share it here. House is 1,050 sqft, 2 bed/1 bath, in 94702 area code. Seller is asking for $900,000. I have all the inspection reports I can ...

Xin Jin
1958A University Ave
Berkeley, California. 94704

Re: **Phase I Environmental Site Assessment Report**
2920 Shattuck Avenue
Berkeley, California 94705

Dear Mr. Jin:

Pangea Environmental Services, Inc. (Pangea) has prepared this Phase I Environmental Site Assessment (ESA) Report for the subject property (Site). The Site is located at 2900-2920 Shattuck Avenue, Berkeley, Alameda County, California. The Site is known by the Alameda County Assessor as parcel number 53-1590-5-1. The objective of this assessment is to provide an independent, professional opinion regarding *recognized environmental conditions* (RECs), as defined by the American Society for Testing and Materials (ASTM), associated with the Site.

SUMMARY

This assessment was performed in accordance with the *ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process; All Appropriate Inquiries* (AAI) which includes 40 CFR Part 312, §312.21 and §312.31; and ASTM E 2600-10 *Standard Guide for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions*. Any exceptions, additions to, or deletions from the ASTM or AAI practice, details of the work performed, sources of information, and findings are presented in the report.

The site consists of one parcel which totals approximately 0.63 acre in size. The site is currently occupied by two commercial buildings and occupied by a hardware store (True Value Eastern Supplies) and an automotive repair facility (The Model Garage).

The site is accessed via Shattuck Avenue to the east and Russell Street to the north of the site. It is located in a mixed commercial and residential area of the City of Berkeley, California. The site is bound to the north by a supermarket (Berkeley Bowl) across Russell Street; to the east by residences and commercial retail across Shattuck Avenue; to the south by commercial businesses; and to the west by residences.

Historical research has identified the use of the Site since 1903, when a Sanborn map depicts the Site to consist of vacant land. According to a Sanborn map from 1911, the Site was developed with a Planing Mill. According to city directories as early as 1925, the Site was used for various woodworking uses, including furniture manufacturing and cabinetmaking. By 1950, a funeral home had been constructed on the north portion of the Site. These site uses remained through the 1960's. In the 1970's, the Site was converted to an automotive sales and service/dealership facility. In the early 1990's, the northern building was converted to a hardware/plumbing supplies store, while the south building remained as an automotive repair shop. These are the current uses of the Site.

According to the 2012 USGS map of the Oakland West Quadrangle, the site was located at approximately 145 feet above mean sea level (amsl) in south Berkeley. The map contours indicated that the site slopes gently to the west.

Pangea contracted with Environmental Data Resources, Inc, (EDR) of Milford, Connecticut, to prepare a regulatory database for the Site and surrounding properties using ASTM standard search radii. The Site address was listed in the databases searched by EDR as a LUST, HIST UST, SWEEPS UST, CA FID UST, HIST CORTESE, RCRA-SQG, HAZNET, FINDS, and ECHO site.

FINDINGS

Recognized Environmental Conditions (RECs) are defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. Pangea's assessment has revealed the following RECs associated with the Site or nearby properties:

- The Site has been occupied by automotive repair uses for over 40 years. Various hazardous substances and petroleum products are used and stored as part of the property use. Based on the long duration of this use, it is possible that a release has occurred that may have impacted the subsurface of the Site. As such, this historical (and current) property use represents a REC for the purposes of this report.
- An upgradient property was historically occupied with a dry-cleaning facility. According to EDR's historical dry cleaner database, 2929 Shattuck has historically been a dry cleaner. Since this site is upgradient from the Site, a potential release from the site could impact the subsurface of the Site. Therefore, the historical presence of this adjacent dry-cleaning facility represents a REC for the purposes of this report.
- The Site formerly had four hydraulic hoists with associated underground storage tanks used as hydraulic oil reservoirs. These hoists and tanks were removed and replaced with electric hoists in

1988. The historical presence of these hoist reservoir tanks represents a REC for the purpose of this report.

Controlled Recognized Environmental Conditions (CRECs) are defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. Pangea's assessment has revealed the following CRECs associated with the Site or nearby properties:

- No onsite/offsite CRECs were identified during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. Pangea's assessment has revealed the following HRECs associated with the Site or nearby properties:

- The Site, identified as Imported Cars of Berkeley/Southwick Chrysler Plymouth at 2900 Shattuck Avenue, is listed as a LUST (and various other UST related databases) due to a release of waste/motor/hydraulic/lubricating oil that impacted soil only at the site, discovered in 1988. Impacted soil was excavated and removed from the site. The site received a Case Closed status from the City of Berkeley on October 17, 1995. Based on this information, this former release incident is considered a HREC.

Environmental Issues include environmental concerns identified by AEI that warrant discussion, but do not qualify as recognized environmental conditions, as defined by the ASTM Standard Practice E1527-13. These can include, but are not limited to risks which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of the Site. Pangea's investigation has revealed the following environmental issues associated with the Site or nearby properties:

- No onsite/offsite Environmental Issues were identified during the course of this assessment.

Non-ASTM considerations may include the presence of environmental conditions such as asbestos containing materials, lead-based paint, radon, mold, lead in drinking water, etc. which can affect the liabilities and financial obligations of the client, the health & safety of site occupants, and the value and

marketability of the Site. Pangea's assessment has revealed the following Non-ASTM considerations associated with the Site or nearby properties:

- Due to buildings' ages, there is a significant likelihood of asbestos containing materials (ACM) and lead-based paint (LBP) being present in/on the Site building. Suspect asbestos containing materials should be sampled and analyzed for possible asbestos/lead content prior to activities (e.g., renovation, demolition,) that may damage or disturb the material. If the materials are asbestos containing, the building owner must comply with applicable USEPA National Emissions Standards for Hazardous Air Pollutants (NESHAPS), OSHA, state and local regulations.

RECOMMENDATIONS

Based on the findings and conclusions, Pangea recommends that a subsurface investigation be performed to assess whether historical on-site and off-site property uses have impacted the subsurface of the Site.

CLOSING

We hope this provides the information necessary at this time. If you have any questions or comments, please contact me at (510) 435-8664 or briddell@pangeaenv.com.

Sincerely,
Pangea Environmental Services, Inc.

Bob Clark-Riddell, P.E.
Principal Engineer

1.0 EXECUTIVE SUMMARY

The site is located at 2920 Shattuck Avenue, Berkeley, Alameda County, California. The site is known by the Alameda County Assessor as parcel number 53-1590-5-1. The objective of this assessment was to provide an independent, professional opinion regarding *recognized environmental conditions* (RECs), as defined by the American Society for Testing and Materials (ASTM), associated with the project site.

SUMMARY

This assessment was performed in accordance with the *ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process; All Appropriate Inquiries* (AAI) which includes 40 CFR Part 312, §312.21 and §312.31; and ASTM E 2600-10 *Standard Guide for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions*. Any exceptions, additions to, or deletions from the ASTM or AAI practice, details of the work performed, sources of information, and findings are presented in the report.

The site consists of one parcel which totals approximately 0.63 acre in size. The site is currently occupied by two commercial buildings and occupied by a hardware store (True Value Eastern Supplies) and an automotive repair facility (The Model Garage).

The site is accessed via Shattuck Avenue to the east and Russell Street to the north of the site. It is located in a mixed commercial and residential area of the City of Berkeley, California. The site is bound to the north by a supermarket (Berkeley Bowl) across Russell Street; to the east by residences and commercial retail across Shattuck Avenue; to the south by commercial businesses; and to the west by residences.

Historical research has identified the use of the Site since 1903, when a Sanborn map depicts the Site to consist of vacant land. According to a Sanborn map from 1911, the Site was developed with a Planing Mill. According to city directories as early as 1925, the Site was used for various woodworking uses, including furniture manufacturing and cabinetmaking. By 1950, a funeral home had been constructed on the north portion of the Site. These site uses remained through the 1960's. In the 1970's, the Site was converted to an automotive sales and service/dealership facility. In the early 1990's, the northern building was converted to a hardware/plumbing supplies store, while the south building remained as an automotive repair shop. These are the current uses of the Site.

According to the 2012 USGS map of the Oakland West Quadrangle, the site was located at approximately 145 feet above mean sea level (amsl) in south Berkeley. The map contours indicated that the site slopes gently to the west.

Pangea contracted with Environmental Data Resources, Inc, (EDR) of Milford, Connecticut, to prepare a regulatory database for the Site and surrounding properties using ASTM standard search radii. The Site address was listed in the databases searched by EDR as a LUST, HIST UST, SWEEPS UST, CA FID UST, HIST CORTESE, RCRA-SQG, HAZNET, FINDS, and ECHO site.

FINDINGS

Recognized Environmental Conditions (RECs) are defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. Pangea's assessment has revealed the following RECs associated with the Site or nearby properties:

- The Site has been occupied by automotive repair uses for over 40 years. Various hazardous substances and petroleum products are used and stored as part of the property use. Based on the long duration of this use, it is possible that a release has occurred that may have impacted the subsurface of the Site. As such, this historical (and current) property use represents a REC for the purposes of this report.
- An upgradient property was historically occupied with a dry-cleaning facility. According to EDR's historical dry cleaner database, 2929 Shattuck has historically been a dry cleaner. Since this site is upgradient from the Site, a potential release from the site could impact the subsurface of the Site. Therefore, the historical presence of this adjacent dry-cleaning facility represents a REC for the purposes of this report.
- The Site formerly had four hydraulic hoists with associated underground storage tanks used as hydraulic oil reservoirs. These hoists and tanks were removed and replaced with electric hoists in 1988. The historical presence of these hoist reservoir tanks represents a REC for the purpose of this report.

Controlled Recognized Environmental Conditions (CRECs) are defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. Pangea's assessment has revealed the following CRECs associated with the Site or nearby properties:

- No onsite/offsite CRECs were identified during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory

authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. Pangea's assessment has revealed the following HRECs associated with the Site or nearby properties:

- The Site, identified as Imported Cars of Berkeley/Southwick Chrysler Plymouth at 2900 Shattuck Avenue, is listed as a LUST (and various other UST related databases) due to a release of waste/motor/hydraulic/lubricating oil that impacted soil only at the site, discovered in 1988. Impacted soil was excavated and removed from the site. The site received a Case Closed status from the City of Berkeley on October 17, 1995. Based on this information, this former release incident is considered a HREC.

Environmental Issues include environmental concerns identified by AEI that warrant discussion, but do not qualify as recognized environmental conditions, as defined by the ASTM Standard Practice E1527-13. These can include, but are not limited to risks which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of the Site. Pangea's investigation has revealed the following environmental issues associated with the Site or nearby properties:

- No onsite/offsite Environmental Issues were identified during the course of this assessment.

Non-ASTM considerations may include the presence of environmental conditions such as asbestos containing materials, lead-based paint, radon, mold, lead in drinking water, etc. which can affect the liabilities and financial obligations of the client, the health & safety of site occupants, and the value and marketability of the Site. Pangea's assessment has revealed the following Non-ASTM considerations associated with the Site or nearby properties:

- Due to buildings' ages, there is a significant likelihood of asbestos containing materials (ACM) and lead-based paint (LBP) being present in/on the Site building. Suspect asbestos containing materials should be sampled and analyzed for possible asbestos/lead content prior to activities (e.g., renovation, demolition,) that may damage or disturb the material. If the materials are asbestos containing, the building owner must comply with applicable USEPA National Emissions Standards for Hazardous Air Pollutants (NESHAPS), OSHA, state and local regulations.

RECOMMENDATIONS

Based on the findings and conclusions, Pangea recommends that a subsurface investigation be performed to assess whether historical on-site and off-site property uses have impacted the subsurface of the Site.

2.0 INTRODUCTION

2.1 Purpose

The objective of this Phase I Environmental Site Assessment (ESA) is to identify *recognized environmental conditions* (RECs), which include the presence or likely presence of any hazardous substance or petroleum products on the site under conditions that indicate and existing release, a past release, or material threat of a release of any hazardous substances or petroleum products into a structure on the site or into the ground, groundwater, or surface water at the site. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be de minimis is not a *recognized environmental condition*. Pangea Environmental Services, Inc. (Pangea) has conducted this ESA in accordance with the *ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process; All Appropriate Inquiries* (AAI) which includes 40 CFR Part 312, §312.21 and §312.31; and ASTM E 2600-10 *Standard Guide for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions*. Any exceptions, additions to, or deletions from the ASTM or AAI practice, details of the work performed, sources of information, and findings are presented in the report.

2.2 Involved Parties

Bob Clark-Riddell, principal engineer for Pangea visited the site on December 12, 2016. Pangea was accompanied during the site reconnaissance by Mr. Donald Worth, site owner and representative. Additionally, the following agencies were contacted regarding the property:

- Alameda County Environmental Health Department (access to regulatory files for the Site and adjacent properties),
- City of Berkeley Environmental Management (access to regulatory files for the Site and adjacent properties and site visit oversight),
- City of Berkeley Building Department (access to historic permit information); and
- California Regional Water Quality Control Board via Geotracker files (access to regulatory files for the Site and adjacent properties).

2.3 Scope of Work

Pangea Environmental Services, Inc. adhered to the following scope of work:

- Interviews with people familiar with the history and environmental status of the site and adjacent properties,
- Site reconnaissance, photographic documentation, site map (including adjacent property usage),
- Review of previous reports, if any, describing environmental conditions at the site and adjacent properties,
- Review of preliminary title report provided by the user for review of environmental lien record,
- Review of historic aerial photographs, historic Sanborn fire insurance maps, and historic topographic maps,
- Review of a historic city directory abstract for the site and adjoining properties,
- Review of building permit records,
- Use of Environmental Data Resources, Inc. Vapor Encroachment Screen tool to evaluate potential Vapor Encroachment Conditions (VECs), and
- Review of Environmental Data Resources, Inc. Radius Map report for the Site.

2.4 Significant Assumptions

Please note that even with adherence to the 1527-13 ASTM Standard scope of work, there may be existing site conditions not reasonably identifiable from current site conditions observed or from available sources reviewed. Pangea judges the information obtained from interviews and record review concerning the site and adjoining properties as reliable. Pangea does not warrant or guarantee that the information provided by these sources is true. The scope of work of this assessment was intended to provide the site owner with as much information available within a reasonable time frame and with a reasonable research effort relating to potential *recognized environmental conditions* at the site.

2.5 Limitations and Exceptions

Pangea relies largely on readily available sources of information such as the Client, public records, interviews, and contracted research firms for recognizing potential environmental liabilities at a project site/facility. Requests for information resources are made to collect relevant data on current and past practices conducted at the project site/facility. Pangea may not receive all information requested or be able to confirm received information during the course of the environmental site assessment. Therefore, Pangea shall not be held responsible for errors, omissions, or misrepresentations resulting from missing documentation or from inaccurate information provided by such sources.

This Phase I Environmental Site Assessment is limited to issues addressed by ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, and All Appropriate Inquiries (AAI) which includes 40 CFR Part 312, §312.21 and §312.31. Additionally, the following limitations are from the ASTM standard and apply to this assessment:

> *4.5.1 Uncertainty Not Eliminated — No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property. Performance of this practice or E 1528 is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a property, and both practices recognize reasonable limits of time and cost.*
>
> *4.5.2 Not Exhaustive — Appropriate inquiry does not mean an exhaustive assessment of a clean property. There is a point at which the cost of information obtained or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions. One of the purposes of this practice is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing an environmental site assessment and the reduction of uncertainty about unknown conditions resulting from additional information.*
>
> *4.5.3 Level of Inquiry Is Variable — Not every property will warrant the same level of assessment. Consistent with good commercial or customary practice, the appropriate level of environmental site assessment will be guided by the type of property subject to assessment, the expertise and risk tolerance of the user, and the information developed in the course of the inquiry.*
>
> *4.5.4 Comparison With Subsequent Inquiry — It should not be concluded or assumed that an inquiry was not appropriate merely because the inquiry did not identify recognized environmental conditions in connection with a property. Environmental site assessments must be evaluated based on the reasonableness of judgments made at the time and under the circumstances in which they were made. Subsequent environmental site assessments should not be considered valid standards to judge the appropriateness of any prior assessment based on hindsight, new information, use of developing technology or analytical techniques, or other factors.*
>
> *13.1.5 List of Additional Issues — Following are several non-scope considerations that persons may want to assess in connection with commercial real estate. No implication is intended as to the relative importance of inquiry into such non-scope considerations, and this list of non-scope considerations is not intended to be all-inclusive:*
>
> *13.1.5.1 Asbestos-Containing Materials,*
> *13.1.5.2 Radon,*

13.1.5.3 Lead-Based Paint,
13.1.5.4 Lead in Drinking Water,
13.1.5.5 Wetlands,
13.1.5.6 Regulatory Compliance,
13.1.5.7 Cultural and Historical Resources,
13.1.5.8 Industrial Hygiene,
13.1.5.9 Health and Safety,
13.1.5.10 Ecological Resources,
13.1.5.11 Endangered Species,
13.1.5.12 Indoor Air Quality,
13.1.5.13 Biological agents, and
13.1.5.14 Mold

Additionally, the following limitation regarding the AAI standard applies to this assessment:

ASTM allows the prospective owner or grantee to provide information regarding recorded environmental liens on the property. Pangea's Phase I Environmental Site Assessment service does *not* include a search for environmental liens that may have been placed on the title of the Site.

No opinion regarding environmental conditions in areas that were not inspected can be formed.

2.6 Special Terms and Conditions

The conclusions and recommendations outlined in this report are limited to the scope as outlined in the ASTM Standard 1527-13 and are considered stale dated if more than six months has passed since the date of this investigation.

2.7 User Reliance

This Phase I Environmental Site Assessment report for the property located at 2900-2920 Shattuck Avenue in the City of Berkeley, California, is for the benefit of Mr. Xin Jin. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of Pangea and the prospective purchaser or authorized representative.

3.0 SITE DESCRIPTION

3.1 Location and Legal Description

The site, addressed as 2900-2920 Shattuck Avenue, is located in a mixed commercial and residential area of south Berkeley, California and is identified by the Alameda County Assessor as parcel number 53-1590-5-1 and is described as a commercial development.

3.2 Site and Vicinity General Characteristics

The site consists of one parcel which totals approximately 0.63 acre in size. The site is currently occupied by two commercial buildings and occupied by a hardware store (True Value Eastern Supplies) and an automotive repair facility (The Model Garage).

The site is accessed via Shattuck Avenue to the east and Russell Street to the north of the site. It is located in a mixed commercial and residential area of the City of Berkeley, California. The site is bound to the north by a supermarket (Berkeley Bowl) across Russell Street; to the east by residences and commercial retail across Shattuck Avenue; to the south by commercial businesses; and to the west by residences.

3.3 Current Use of the Property

The site is currently occupied by two commercial buildings and occupied by True Value Eastern Supplies and The Model Garage. On-site operations include hardware/plumbing supplies retail sales and automotive repair activities.

3.4 Descriptions of Structures, Roads & Other Improvements

The site is currently developed with two single-story commercial buildings on the north portion of the Site, with a parking lot used by the automotive repair shop on the south portion of the Site. The on-site structures occupy approximately 70 percent of the project site; the remainder of the site consists of an asphalt-paved parking lot. The site is accessed from Shattuck Avenue to the east and Russell Street to the north of the site.

3.5 Current Uses of Adjacent and Nearby Properties

The area surrounding the project site consisted of primarily commercial and residential properties. Adjoining properties were observed from the project site and from public access lands for signs of *recognized environmental conditions* and their potential to pose an environmental concern to the project site. These properties are listed in the following table:

Table 1
Summary of Adjacent and Nearby Property Use

Direction	Name	Use
North	Berkeley Bowl Supermarket (2020 Oregon Street) across Russell Street	Commercial
East	Residences and commercial retail (2901-2919 Shattuck Avenue) across Shattuck Avenue	Commercial and residential
South	Offices (2930 Shattuck Avenue)	Commercial
West	Residences (2903-2913 Newbury Street)	Residential

No evidence of *recognized environmental conditions* was noted regarding the above listed adjacent properties at the time of Pangea's site visit.

4.0 USER PROVIDED INFORMATION AND INTERVIEWS

4.1 Title Records

Pangea requested a preliminary title report from the User. As of the date of this report, a preliminary title report had not been received.

4.2 Environmental Liens or Activity Use Limitations

A questionnaire was completed by Mr. Donald Worth, property owner. Based on the Owner/User-provided questionnaire, no environmental liens or activity use limitations have been placed on the title of the Site. The completed questionnaire is included in Appendix C.

4.3 Specialized Knowledge

Mr. Worth, the property owner, reported that four hydraulic hoists were removed and replaced with the current electric hoists. Hydraulic hoists were constructed with an underground storage tank used as a hydraulic oil reservoir and sometimes contained PCBs. Because these hoists were previously onsite, it is considered an environmental concern.

4.4 Commonly Known or Reasonably Ascertainable Information

Mr. Worth did not report knowledge of any commonly known areas of environmental concern in the vicinity of the project site.

4.5 Valuation Reduction for Environmental Impairment

Mr. Worth did not provide information on any reduction of valuation due to environmental impairment.

4.6 Actual Knowledge of the User

Mr. Worth, the property Owner/User representative who completed the User questionnaire, did not report any specialized knowledge of known environmental impairments.

4.7 Reason for Performing Phase I Environmental Site Assessment

The purpose of this Phase I Environmental Site Assessment was to identify existing or potential *recognized environmental conditions* (as defined by ASTM Standard E-1527-13) in connection with the site for the purposes of refinance. Pangea understands that the results of this investigation will be used by the prospective owner, Mr. Xin Jin.

4.8 Interview with Owner

Pangea conducted an interview with Mr. Worth, property owner representative. Mr. Worth indicated that he had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Site; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Site; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Mr. Worth, the site has been used as an automobile repair facility since May, 1988.

4.9 Interview with Key Site Manager

The key site manager, Mr. Worth, is also the property owner. Information obtained during the interview with Mr. Worth is included in Section 4.8 above.

4.10 Interview with Past Owners, Operators, and Occupants

No past owners, operators, or occupants were available for interview.

4.11 Interview with Others

As the site was not an abandoned property as defined in ASTM 1527-13, interviews with others were not performed.

5.0 PHYSICAL SETTING

5.1 Site and Regional Conditions

According to the 2012 USGS map of the target Oakland West Quadrangle, the site was located at approximately 145 feet above mean sea level (amsl) in south Berkeley. The site vicinity was shaded, indicating a high-density urban classification or built-up area.

The project site region was depicted as gently sloping to the west. The nearest body of water is the San Francisco Bay (located approximately 1.9 miles west of the site). No additional significant bodies of water were visible on the map. No water wells or wetlands were depicted within or adjacent to the site boundaries.

5.2 Geologic Conditions

Based on a review of the information provided from the United States Department of Agriculture (USDA) Soil Conservation Service Web Soil Survey (WSS), the entire site is situated on soil classified as Tierra.

The Tierra series consists of loam and has very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer. Tierra series soil is drains moderately well and has a high corrosion potential.

Based on groundwater monitoring data for nearby properties, groundwater is encountered at a depth of 13-17 feet below ground surface (bgs) and equilibrates to depth of 5-7 feet bgs. The direction of groundwater flow was estimated to be to the west toward the San Francisco Bay.

5.3 Flood Zone

A search of the online Flood Insurance Rate Maps (FIRM), published by the Federal Emergency Management Agency (FEMA), was performed. According to Map Number 06001C0257G, panel 57 of 725, dated August 3, 2009, the site is located in Flood Zone X – Other Areas. Flood Zone X regions consist of areas of considered to be outside the 0.2% annual chance floodplain.

5.4 Oil Gas Exploration

No evidence of oil gas exploration was identified by the EDR Radius Map Report.

5.5 Hydrologic Conditions

According to the United States Geologic Survey (USGS) Topographic Quadrangle map of Oakland West, the site is located 1.9 miles east of the San Francisco Bay. Elevation contours show surface drainage at the property to flow to the west. Shallow groundwater generally mimics the surface topography and is therefore inferred to be in a westerly direction. Groundwater monitoring data for nearby subject properties indicates a westerly flow of groundwater for the site vicinity. The site is completely developed with the site structures and concrete/asphalt pavement. No evidence of obvious wetland vegetation or standing water was observed during the site inspection.

6.0 RECORDS REVIEW

6.1 Standard Environmental Record Resources: Federal, State and Local Database Search

The regulatory database search report prepared by Environmental Data Resources, Inc. (EDR) was reviewed to evaluate the project site and listed properties within ASTM-recommended search distances. Regulatory information from the following database sources listing possible *recognized environmental conditions* (RECs) was reviewed. A copy of EDR's Radius Map Report is provided in the appendices.

Regulatory Database Summary

Radius Report Data				
Database	**Search Radius (mile)**	**Subject Property**	**Adjacent Properties**	**Sites of Concern**
Federal NPL or Delisted NPL Site	1.00	N	N	N
Federal CERCLIS Site	0.50	N	N	N
Federal CERCLIS-NFRAP Site	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSDF Facility	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, CESQG, NonGen/NLR)	0.25	**Y**	N	N
Federal IC/EC Registries	0.50	N	N	N
Federal ERNS Site	Site	N	N	N
State/Tribal Equivalent NPL (Response)	1.00	N	N	N
State/Tribal Equivalent CERCLIS (Envirostor)	1.00	N	N	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site (LUST)	0.50	**Y**	N	N
State/Tribal Registered Storage Tank Sites (UST/AST/CA FID UST/SWEEPS UST)	0.25	**Y**	N	N
HIST CORTESE	Varies	**Y**	N	N
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	N	N	N
State/Tribal Spills (SLIC)	0.50	N	N	N
Federal Brownfield Sites	0.50	N	N	N
State Brownfield Sites	0.50	N	N	N
EDR MGP	Varies	N	N	N
HAZNET	Varies	**Y**	N	N
Alameda County CS	Varies	N	N	N
FINDS	Varies	**Y**	N	N
NPDES	Varies	N	N	N
ECHO	Varies	**Y**	N	N
EMI/US AIRS	Varies	N	N	N
EDR US Hist Auto Station	Varies	N	N	N
EDR US Hist Cleaners	Varies	N	N	N

Site Listings

The Site is identified as a LUST, HIST UST, SWEEPS UST, CA FID UST, HIST CORTESE, RCRA-SQG, FINDS, HAZNET, and ECHO site in the regulatory database report, as discussed below:

- The site, identified as The Model Garage, Inc. at 2920 Shattuck Avenue, is listed as a RCRA-SQG, FINDS, HAZNET, and ECHO site due to the generation of hazardous waste on-site in the form of aqueous solution with total organic residues less than 10 percent, unspecified organic liquid mixture, other inorganic solid waste, aqueous solution with total organic residues 10 percent or more, and unspecified solvent mixture. The generation of hazardous waste on-site is associated with the operation of an automotive repair shop. No violations or release incidents were reported in association with these listings. Based on the lack of a reported release, and the current regulatory status, these listings are not expected to represent a significant environmental concern.
- The site, identified as Imported Cars of Berkeley/Southwick Chrysler Plymouth at 2900 Shattuck Avenue, is listed as a LUST (and various other UST related databases) due to a release of waste/motor/hydraulic/lubricating oil that impacted soil only at the site, discovered in 1988. Impacted soil was excavated and removed from the site. The site received a Case Closed status from the City of Berkeley on October 17, 1995. Based on this information, this former release incident is an environmental concern.

Adjacent Property Listings

None of the adjacent properties were identified in the regulatory database.

Nearby Sites of Potential Concern Listings

Federal NPL

The National Priorities (Superfund) List (NPL) is the USEPA database of hazardous waste sites identified under the Superfund Program.

According to the EDR Radius Map, no NPL facilities are located within one mile of the Site.

Federal CERCLIS List

The Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) list is a compilation of sites that the USEPA has investigated.

According to the EDR Radius Map, no CERCLIS facilities are located within one mile of the Site.

Federal CERCLIS NFRAP List

The Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) No Further Remedial Action Planned (NFRAP) list is a compilation of sites that the USEPA has investigated.

According to the EDR Radius Map, no CERCLIS NFRAP facilities are located within one-half mile of the Site.

Federal Resource Conservation and Recovery Act (RCRA) CORRACTS TSD Facilities List

The EPA Resource Conservation and Recovery Act (RCRA) Program records hazardous waste transport and the CORRACTS database includes listed treatment and disposal facilities.

According to the EDR Radius Map, no RCRA CORRACTS TSD facilities are located within one-half mile of the Site.

Federal RCRA Generator List

The RCRA program identifies and tracks facilities that produce or store hazardous waste.

The Site was previously discussed above. Six additional RCRA-SQG facilities and one RCRA-CESQG facility were listed within one-quarter mile of the Site. The nearby RCRA-SQG and RCRA-CESQG facilities are not expected to have an adverse effect based on the lack of a reported release and based solely on the production or storage of small quantities of hazardous waste.

Federal Emergency Response Notification System (ERNS)

The Emergency Response Notification System (ERNS) is a database which compiles reported releases of hazardous substances. The Site is *not* listed as an ERNS site.

The following supplemental Federal Databases were reviewed within their respective study radii: HMIRS, US Eng Controls, US Inst Controls, DOD, FUDS, US Brownfields, CONSENT, UMTRA, ODI, TRIS, TSCA, FTTS, SSTS, RADINFO, CDL, HIST FTTS, ICIS, LUCIS, DOT OPS, PADS, MLTS, MINES and RAATS.

According to the EDR Radius Map, no sites identified in the above-listed databases were located within one mile of the Site.

Hist Cal-Sites List

The California Department of Toxic Substances Control (DTSC) list of facilities investigated as possible threats to human health and the environment.

According to the EDR Radius Map, no Hist-Cal facilities are located within one mile of the Site.

Toxic Pits

The California State Water Resources Control Board retains records for Toxic Pits.

No Toxic Pits sites were listed within one mile of the Site.

State & Local Landfill

The Integrated Waste Management Board retains a list of state landfills that are closed and inactive.

No State or Local Landfills were listed within one mile of the Site.

State Leaking Underground Storage Tank List (LUST)

The California State Water Resources Control Board (SWRCB) lists all leaks of hazardous substances from underground storage tanks.

The Site (two listings for 2900 Shattuck Avenue) was previously discussed above.

A listing for an adjacent, upgradient, site with the address 2929 Shattuck Avenue is listed as a closed LUST. In January 1988, a 1,500-gallon UST used to house bunker oil and a 500-gallon UST used to house Stoddard solvent were removed. No significant release to the environment was observed and the case was administratively closed in 1991. Because no impact was observed while removing these UST's, it is not considered an environmental concern

Twenty-seven (26) additional LUST sites are listed within one-half mile of the Site. All of the 26 listed LUST sites are either over one-quarter mile from the Site, or are cross- or downgradient. Therefore, these nearby LUST sites do not represent a significant environmental concern with regard to the Site.

California Bond Expenditure Plan

The Department of Health Services retains a Bond Expenditure Plan for appropriation of hazardous substance clean-up funds.

No California Bond Expenditure Plan sites were listed within one mile of the Site.

State Underground/Aboveground Storage Tank List (UST/AST)

The Cal/EPA State Water Resources Control Board Office of Underground Storage Tanks (USTs) and aboveground storage tanks (ASTs) locations.

Two (2) UST sites and one (1) AST site were listed within one quarter mile of the Site. Neither of these sites are located adjacent to the Site; and therefore, are not expected to represent a significant environmental concern.

ENVIROSTOR

The California Department of Toxic Substances Control (DTSC) retains the ENVIROSTOR database of Hazardous Substances Cleanup facilities.

Four (4) ENVIROSTOR sites are listed within one mile of the Site. All four (4) sites are located over a 1/2-mile from the Site or are downgradient; and therefore, are not expected to represent a significant environmental concern with regard to the Site.

Response

The California DTSC lists all confirmed release sites where the DTSC was involved in remediation.

No Response sites are listed within one mile of the Site.

Spills, Leaks, Investigations, and Cleanup (SLIC)

The California State Water Resources Control Board (SWRCB) lists all leaks of hazardous substances.

The adjacent and upgradient site, 2929 Shattuck Avenue, is listed twice as Newberry Station and Newberry Station Office Park and discussed in the LUST section above. It is co-listed as a SLIC due to the 500-gallon Stoddard solvent tank removed in 1988 and is a closed case. As stated above, because no contamination to the environment was observed during removal, this is not considered an environmental concern.

Two (2) SLIC sites are listed within one-half mile of the Site but are either crossgradient or over ¼-mile from the site and have been issued a Case Closed status; and therefore, do not represent a significant environmental concern with regard to the Site.

Voluntary Cleanup Program (VCP)

The California State Water Resources Control Board (SWRCB) lists all voluntary cleanup program sites.

No VCP sites are listed within one-half mile of the Site.

EDR US Hist Auto

Three (3) nearby sites were identified as EDR Hist Auto facilities. None of these three sites were located adjacent to the Site; and therefore, do not represent a significant environmental concern with regard to the Site.

EDR US Historical Cleaners

An adjacent and upgradient property, 2929 Shattuck Avenue, listed as "Coady W F", operated as a clothes pressers and cleaners in 1933. Because of the common chemicals used in dry cleaning operations and this property's location to the site, it is considered to be an environmental concern.

Three (3) nearby sites were identified as EDR Hist Cleaners facilities. All three sites were located either down- or cross-gradient from the Site; and therefore, do not represent a significant environmental concern with regard to the Site.

The following supplemental State or Local Databases were reviewed within the study radii: Alameda County CS facilities (3), RCRA NonGen/NLR facilities (0), SCH facilities (0), WMUDS/SWAT facilities (0), SWEEPS UST facilities (6), HIST UST facilities (4), CA FID UST facilities (6), Cortese facilities (0), HIST Cortese facilities (20), SWRCY facilities (0), FINDS facilities (1), CUPA Listings facilities (0), Deed Restriction facilities (0), Notify 65 facilities (4), DRYCLEANER facilities (0), WIP facilities (0), ECHO facilities (1), CDL facilities (0), EDR MGP facilities (0), EDR US Hist Auto Stat (3), EDR US Hist Cleaners (4), HAZNET facilities (1), EMI facilities (0), RGA LUST facilities (0), Indian Reserve facilities (0), Indian LUST facilities (0), and Indian UST facilities (0).

All of the above listed facilities were not identified as potential sources of impact to the Site, or are discussed within the sections above or below.

The EDR regulatory database search report identified three (3) "orphan" sites within the ASTM minimum search distances from the Site. Based on our review of the orphan sites listed, it is Pangea's opinion that none are expected to present a *recognized environmental condition* or negatively impact the Site.

6.2 Vapor Encroachment

A Vapor Encroachment Screen pursuant to ASTM E2600-10 was performed as part of this assessment to identify a *vapor encroachment condition (VEC)*, which is defined as the presence or likely presence of contaminants of concern (COC) vapors in the subsurface of the *target property (TP)* caused by the release of vapors from contaminated soil or groundwater either on or near the *TP*. In addition to considering the physical characteristics of the Site and/or surrounding area, Pangea utilized the Environmental Data Resources' Vapor Encroachment Screen Worksheet to determine which sites, if any, are located within the areas of concern, and if those sites represent a vapor encroachment condition (VEC).

A total of twelve sites are located within the area of concern. Two of the sites, 2900 Shattuck Ave and 2920 Shattuck Ave, are located on the target property and discussed above in section 6.1. Six of the sites are listed as historical dry cleaners. It is unknown what chemicals were stored and used at these locations. The remaining four sites listed consist of 3 closed LUST sites and a closed LUST/SLIC site.

Because the target property's historical and current uses involve contaminants of concern and because properties upgradient and near the site were historical dry cleaners, a potential VEC does exist for this site.

6.3 Regional Water Quality Control Board

Pangea contacted the San Francisco Bay Regional Water Quality Control Board (RWQCB) on January 15, 2017. Although no response was received from the RWQCB, RWQCB files are made available to the public on the State's Geotracker website. Pangea accessed the Geotracker website on January 20, 2017. According to the RWQCB GeoTracker Database, the Site, identified as Southwick Chrysler Plymouth, is identified as a LUST site due to an impact of waste/motor/hydraulic/lubricating oil to soil only, discovered in 1988. This release case was subsequently issued a Case Closed status by the City of Berkeley on October 17, 1995. This release case is also discussed in Section 6.2.

6.4 Alameda County Environmental Health Department

Pangea contacted the Alameda County Environmental Health Department (ACEHD) on January 15, 2017 for information on the Site to identify any evidence of previous or current hazardous material usage. As of the date of this report, a response has not been received from the ACEHD.

6.5 Berkeley Environmental Management District (BEMD)

Pangea requested files for the Site from the Berkeley Environmental Management Department (BEMD) on January 15, 2017. As of the date of this report, a response has not been received from the BEMD.

6.6 Berkeley Building Department

According to the Berkeley Building Department, a permit to remove a 250-gallon UST was issued in 1988. This is related to the LUST case discussed in Section 6.1.

6.7 Previous Environmental Investigations/Reports

No previous environmental assessment reports were provided to or obtained by Pangea during the course of this assessment.

7.0 RESULTS OF INVESTIGATION

7.1 Site Reconnaissance Observations

Bob Clark-Riddell visited the site on December 12, 2016. Pangea was accompanied by Mr. Donald Worth, property owner representative, during the site reconnaissance. The site is currently occupied by two commercial buildings and occupied by True Value Eastern Supplies and The Model Garage. On-site operations include hardware/plumbing retail sales and automotive repair activities. Pangea was granted access to all interior and exterior areas of the Site.

7.2 Utilities

The following project site utilities and services were observed during site reconnaissance:

- Water and Water Quality: East Bay Municipal Utility District (EBMUD)
- Sewer: EBMUD
- Natural Gas/Electric: Pacific Gas and Electric (PG&E)
- Solid Waste Disposal: Waste Management

7.3 Polychlorinated Biphenyls (PCBs)

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered “Non-PCB”; between 50 and 500 ppm is considered “PCB-Contaminated”; and >500 ppm is considered “PCB-Containing”. Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

No equipment that would contain fluids containing PCBs was observed onsite.

7.4 Site Inspection Findings

The following table summarizes the site inspection and findings. All features that were observed during the site reconnaissance, or that were discovered to have been historically present at the project site, are noted in the table. Also indicated in the table are items that may present concerns to the project site.

Table 2
Site Inspection Findings

Onsite Environmental Features	Currently / Historically Present	Possible Environmental Concern
Hazardous Substances or Petroleum Products	Y	Y - *see Section 7.5*
Underground Storage Tank, UST	Y	Y – *see Section 7.6*
Aboveground Storage Tank, AST	N	N
Odors	N	N
Air Emissions *(stacks, hoods, other point sources)*	N	N
Pools of Liquid	N	N
Drums	Y	N – *see Section 7.8*
Unidentified Substance Containers	N	N
Electrical Equipment/Possible PCBs	N	N
Hydraulic Equipment/Possible PCBs	N	N – *see Section 7.10*
Stains or Corrosion	N	N
Drains	Y	N – *see Section 7.11*
Sumps	N	N
Pits, Ponds, or Lagoons	N	N
Stained Soil or Pavement	N	N
Stressed Vegetation	N	N
Evidence of Spills or Releases	N	N
Artificially Filled Areas *(Solid Waste Disposal)*	N	N
Waste Water	N	N
Wells	N	N
Septic Systems *(cisterns, cess pools, dry wells)*	N	N
Dry Cleaning Operations	N	N
Agricultural Use *(pesticides/herbicides/fungicides)*	N	N
Oil/Gas Production or Exploration	N	N
Remedial Activities	N	N
Other	N	N

7.5 Hazardous Materials, Petroleum Products and Unknown Substance Containers

Visual observation for the use and/or storage of hazardous substances and petroleum products was performed. The following hazardous substances and/or petroleum products were observed stored or accumulated on site:

- One 55-gallon drum containing waste oil
- Two 55-gallon drums containing new motor oil
- Six 25-gallon drums containing various weight oils.
- Various five-gallon buckets containing new motor oils
- Various retail-sized containers of automotive fluids
- Various cleansers and paints (routine property upkeep supplies) in retail-sized containers

None of the hazardous substances and/or petroleum products observed on the Site during the site reconnaissance appeared to be causing or contributing to any site contamination.

7.6 Additional Environmental Issues of Concern, Non-ASTM

The following environmental conditions were evaluated for the potential to impact the Site though they are not considered *recognized environmental conditions* as defined by ASTM.

Asbestos-Containing Materials

In July 1989, under the Toxic Substances Control Act (TSCA), the United States Environmental Protection Agency (USEPA) promulgated an Asbestos Ban Phaseout Rule. Beginning in 1990 and taking effect in three stages, the rule prohibits the importation, manufacture, and processing of ninety-four percent of all remaining asbestos products in the United States over a period of seven years. Presently, asbestos has not been prohibited from all construction building materials.

No sampling for asbestos containing materials was conducted as part of this investigation.

Based on the dates of construction, there is potential that asbestos containing materials are present at the site. Suspect asbestos containing materials should be sampled and analyzed for possible asbestos content prior to activities (e.g., renovation, demolition,) that may damage or disturb the material. If the materials are asbestos-containing, the building owner must comply with applicable USEPA National Emissions Standards for Hazardous Air Pollutants (NESHAPS), OSHA, state and local regulations.

Radon

Radon is a naturally occurring radioactive gas formed by the decay of uranium in bedrock and soil. The potential adverse health effects associated with radon gas depend on several factors including

concentration of the gas and duration of exposure. The concentration of radon gas in a building depends on subsurface soil conditions, the integrity of the building's foundation, and the building's ventilation system.

Due to the commercial nature of the ground floors of the Site, no sampling for radon was conducted as part of this investigation.

Lead-Based Paint

There is no commercial property definition of what is a lead-based paint. Regulations specifically addressing lead-based paint include Housing and Urban Development (HUD) (1995) guidelines and the Consumer Product Safety Act (1977). These regulations are for housing and consumer products.

OSHA regulations apply to worker protection during renovation and demolition activities.

Sensitive Ecological Areas

No sensitive ecological areas or federal wetlands on the Site were depicted on the EDR Radius Map.

8.0 RESULTS OF SITE HISTORY

8.1 Aerial Photographs

A review of available historical aerial photographs was performed for the Site and adjacent properties. Aerial photos were available for the years 1939, 1946, 1950, 1958, 1963, 1968, 1974, 1982, 1993, 1998, 2005, 2009, 2010, and 2012. The findings for the site and adjoining properties are below.

1939: The site appears to be developed with a commercial building in the southwest corner, and unimproved land to the north and east. Adjacent sites consist of mixed residential and commercial properties across Russell Street to the north; residences across Shattuck Avenue to the east; and residences to the south and west.

1946: The southeast corner of the site has been improved with a building. The rest of the site and adjacent properties are unchanged.

1950: The northern portion of the site appears to be developed with a separate commercial building. The rest of the site and adjacent properties are unchanged.

1958: The central portion of the site appears to be developed with a building. The site now appears to have three separate commercial buildings. Adjacent property use is unchanged.

1963: The site is unchanged since the 1958 aerial photograph. The adjacent property to the north across Russell Street has been redeveloped into a single, large commercial building with parking. The adjacent property to the south has also changed from residential to a parking lot. The adjacent properties to the east and west are unchanged.

1968: The site's southernmost building has been demolished and replaced with a parking lot. The rest of the site and adjacent properties are unchanged.

1974, 1982, 1993: The site and adjacent properties are unchanged since the 1963 aerial photograph.

1998: The adjacent property to the south has been developed into two commercial buildings and a parking lot. The site and remaining adjacent properties are unchanged.

2005, 2009, 2010, 2012: The site and adjacent properties are unchanged since the 1998 aerial photograph.

8.2 Sanborn Fire Insurance Maps

A review of available Sanborn Fire Insurance Maps was performed for the site and adjacent properties. Sanborn Fire Insurance Maps were available for the years 1903, 1911, 1950, and 1980. The findings for the site and adjacent properties are below.

1903: The site is depicted as five vacant lots. Adjacent properties consist of a planing mill to the north across Russell Street; four dwellings and vacant lot to the east across Shattuck Avenue; a vacant lot to the south; and three dwellings and two vacant lots to the west.

1911: The site is depicted to be developed with a planing mill, carpenter shop, and lumber storage on the southern half and wood piles on the northern half of the Site. The adjacent property to the north is no longer listed as a planing mill but its current use is not marked. A wrought iron works has been built to the east across Shattuck Avenue. A dwelling has been constructed on the formerly vacant adjacent lot to the south. The formerly vacant adjacent lots to the west now have dwellings constructed on them

1950: The site is depicted to be developed with an undertaker facility on the north side and a cabinet shop on the south side. The adjacent site to the north is now used for coal and peat storage. One lot to the east has been redeveloped from a dwelling to a metal toy assembly plant. The adjacent properties to the south and west are unchanged.

1980: The site is depicted to be developed as an auto sales and service facility on the north side and a parking lot on the south side. The adjacent site to the north across Russell Street is now a single, large commercial building. The former metal toy assembly plant has changed uses and is now an auto painting facility. The former dwellings south of the site have been demolished and replaced with a used car sales lot. The adjacent properties to the west are unchanged. The property located on the northeast corner of Shattuck Avenue and Russell Street is now a dry cleaner.

8.3 City Directories

Pangea retained EDR to provide a city directory abstract for the target site addresses of 2900-2920 Shattuck Avenue. The Site address listings are summarized below:

1925: Seavey Edward O R (2920)

1928: Disappoearin & Shade Co. HW, Valentine v pros gonl mg R, States Screen & Door Co. John M Glon (2912)**;** H Racechel wid Thos H, Leeper John C clk R (2920)

1933: Creagmile Rachel Mrs H Berkeley, Leeper John C CLK R Berkeley (2920)

1938: Seavey W L MFG CO. (2912)**;** Creagmile R Mrs R (2920)

1943: MDM Furniture MFG CO., Miesner Special Furniture and Cabinets (2912)

1945: Henningsen HPMDM Furniture MFG CO. Berkeley (2912)**;** Keylon GER Berkeley (2920)

1950: Henningsen & Folsom Cabinet Makers (2912)**;** Bur Toni Funeral Chapel (2900)

1955: Henningsen & Folsom Plastic Fabricators Berkeley (2900); Oliveto Louise Berkeley (2920)

1962: Henninsen & Associates (2900)

1970, 1975, 1980: English Motors of Berkeley (2900)

1986: Various car dealerships (2900)

1991: Eastern Supplies (2900)**;** I Model Mugging, Model Garage, The Model Garage (2920)

1992, 1996, 2000, 2006, 2008, 2013: Eastern Supplies (2900)

1992, 1996, 2000, 2006, 2008, 2013: The Model Garage (2920)

Adjacent addresses were found in the city directories, and consisted of various commercial and residential tenants.

8.4 Topographic Maps

United States Geological Survey (USGS) maps were reviewed during the preparation of this report. USGS maps covering the target Oakland West Quadrangle (7.5 minute series) from the years 1895/1897, 1899, 1915, 1949, 1959, 1968, 1973, 1980, and 2012 were reviewed.

1895/1897, 1899: The site is depicted to be without structures. A railroad runs north-south just to the west.

1915: A building is depicted on the site and multiple short rail lines are depicted adjacent to the west.

1949, 1959, 1968, 1973, 1980, 2012: Buildings are no longer depicted on the topographic map. The multiple short rail lines formerly seen are no longer shown.

9.0 CONCLUSIONS AND RECOMMENDATIONS

CONCLUSIONS

Recognized Environmental Conditions (RECs) are defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. Pangea's assessment has revealed the following RECs associated with the Site or nearby properties:

- The Site has been occupied by automotive repair uses for over 40 years. Various hazardous substances and petroleum products are used and stored as part of the Site use. Based on the long duration of this use, it is possible that a release has occurred that may have impacted the subsurface of the Site. As such, this historical (and current) property use represents a REC for the purposes of this report.
- An upgradient property was historically occupied with a dry-cleaning facility. According to EDR's historical dry cleaner database, 2929 Shattuck has historically been a dry cleaner. Since this site is upgradient from the Site, a potential release from the site could impact the subsurface of the Site. Therefore, the historical presence of this adjacent dry-cleaning facility represents a REC for the purposes of this report.
- The Site formerly had four hydraulic hoists with associated underground storage tanks used as hydraulic oil reservoirs. These hoists and tanks were removed and replaced with electric hoists in 1988. The historical presence of these hoist reservoir tanks represents a REC for the purpose of this report.

Controlled Recognized Environmental Conditions (CRECs) are defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. Pangea's assessment has revealed the following CRECs associated with the Site or nearby properties:

- No onsite/offsite CRECs were identified during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the

property to any required controls. Pangea's assessment has revealed the following HRECs associated with the Site or nearby properties:

- The Site, identified as Imported Cars of Berkeley/Southwick Chrysler Plymouth at 2900 Shattuck Avenue, is listed as a LUST (and various other UST related databases) due to a release of waste/motor/hydraulic/lubricating oil that impacted soil only at the site, discovered in 1988. Impacted soil was excavated and removed from the site. The site received a Case Closed status from the City of Berkeley on October 17, 1995. Based on this information, this former release incident is considered a HREC.

Environmental Issues include environmental concerns identified by AEI that warrant discussion, but do not qualify as recognized environmental conditions, as defined by the ASTM Standard Practice E1527-13. These can include, but are not limited to risks which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of the Site. Pangea's investigation has revealed the following environmental issues associated with the Site or nearby properties:

- No onsite/offsite Environmental Issues were identified during the course of this assessment.

Non-ASTM considerations may include the presence of environmental conditions such as asbestos containing materials, lead-based paint, radon, mold, lead in drinking water, etc. which can affect the liabilities and financial obligations of the client, the health & safety of site occupants, and the value and marketability of the Site. Pangea's assessment has revealed the following Non-ASTM considerations associated with the Site or nearby properties:

- Due to buildings' ages, there is a significant likelihood of asbestos containing materials (ACM) and lead-based paint (LBP) being present in/on the Site building. Suspect asbestos containing materials should be sampled and analyzed for possible asbestos/lead content prior to activities (e.g., renovation, demolition,) that may damage or disturb the material. If the materials are asbestos containing, the building owner must comply with applicable USEPA National Emissions Standards for Hazardous Air Pollutants (NESHAPS), OSHA, state and local regulations.

RECOMMENDATIONS

Based on the findings and conclusions, Pangea recommends that a subsurface investigation be performed to assess whether historical on-site and off-site property uses have impacted the subsurface of the Site.

Data Gaps

A data gap by itself is not inherently significant. The significance is determined by other information and professional experience as to whether the data gap raises reasonable concerns about activities that may present a *recognized environmental condition*. According to *ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, and *All Appropriate Inquiries* (AAI) which includes 40 CFR Part 312, §312.21 and §312.31, the Phase I Environmental Site Assessment report shall identify and comment on significant data gaps that affect the ability of the environmental professional to identify *recognized environmental conditions* and identify the sources of information that were consulted to address the data gap.

Pangea did not encounter any significant data gaps during the performance of this Phase 1 Environmental Site Assessment**.**

10.0 LIMITATIONS

Pangea Environmental Services, Inc. warrants that the findings and conclusions contained herein were accomplished in accordance with ASTM Standards. These methodologies are representative of customary standard of practice for conducting a Phase I Environmental Site Assessment of a property for the purpose of identifying *recognized environmental conditions* (RECs).

There is a possibility that even with the comprehensive scope of work, there may exist RECs on the site not identified during our investigation or which were not reasonably identifiable for the available information. Pangea Environmental Services, Inc. believes that the information obtained from our historic review and interviews concerning the site are reliable. Pangea does not warrant or guarantee that the information provided by these or other sources is accurate. The scope of work of this is regarding existing and potential RECs at the site.

This Phase I Environmental Site Assessment has been prepared for the purpose of acquiring environmental information that may assist in evaluating the site for the presence of *recognized environmental conditions* requiring remedial action. This report has no other purpose and should not be relied upon by any other person or entity.

DECLARATION OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. We have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. Resumes of environmental professionals are included in Appendix G.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Pangea Environmental Services INc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Regulatory Correspondence, Completed Property Questionnaires, Supporting Documentation from Vicinity Sites

INFORMATION IN BUILDING DEPARTMENT FILES
2900-20 Shattuck Avenue

1947 - permit for mortuary at 2900 Shattuck, 3490 square feet, 86'x35' plus 30'x16'

1952 - permit for warehouse
1968 - permit to demolish

1910,1922,1923,1938,1947- permits for work at shop & warehouse at 2912 Shattuck

1948 - permit for work at cabinet shop at 2914 Shattuck

1955 - permit for work at shop at 2912-14 Shattuck

1959 - house demolition permit (2920 Shattuck?)

1966 - some work under construction, per building department notes

1968 - structural drawings for corner building prepared by W.B.Claussen, structural engineer. (City has copies of 3 sheets on microfiche)

1968 - permit to demolish warehouse building

1968 - demolish existing 8,000 sq.ft. building, fill & pave with asphalt. add 1 toilet room in 4,000 sq.ft. building; add exit doors. add new 2,200 sq.ft. building per plans. remove existing Quonset hut.

1968 - special inspection for welding

1968 - Certificate of Occupancy issued for car agency

1976, 1980 - permits for roofing - tar & gravel

1988 - permit to remove 250 gallon underground fuel tank

User Questionnaire Supplement

All Appropriates Inquiry for Phase I Environmental Site Assessment

Purpose

As summarized in ASTM International Standard E1527-13, in order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownsfields Revitalization Act of 2001 (the Brownsfields Amendments), the Client (User) must provide the following information (if available) to the Environmental Professional prior to completing the Phase I Environmental Site Assessment to help identify the possibility of recognized environmental conditions in connection with the property.

Instructions

Pangea recommends that the User obtain a full Title Report with recorded land title records and lien records to help answer questions 1 through 6. A real estate appraisal is not required to answer question 4. While questions may be answered "No" or "I do not know", please provide answer to the full extent possible. **Failure to provide available information could result in a determination that *"all appropriate inquiry"* is not complete. Please review and complete all pages and sign and date Page 4.**

Subject Property: 2900-2922 Shattuck / Berkeley / CA
Business Name / Address **City** **State**

The User may request that other involved parties or representatives assist with information gathering by responding the questions below. At the end of this questionnaire please provide your relationship to the User and the property.

1) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25)

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? If yes, please explain.

No

2) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26)

Are you aware of any activity and use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded under federal, tribal, state or local law? If yes, please explain.

None Known, see city regulations.

3) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28)

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupant(s) of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Owner/operator of auto repair shop since May, 1988 in 2920 Shattuck Avenue.

4) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29)

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower price is because contamination is known or believed to be present at the property?

Unknown.

5) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30)

Are you aware of commonly known or reasonably ascertainable information about the property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases?

(a) Do you know the past uses of the property?
(b) Do you know of specific chemicals that are present or once were present at the property?
(c) Do you know of spills or other chemical releases that have taken place at the property?
(d) Do you know of any environmental cleanups that have taken place at the property?

Unknown.

6) The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)

Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

No

7) Please provide any additional information regarding the property:

Completed By: Donald B. Worth (Name) Partial Owner (Title) 12/12/2016 (Date)

Resident of Model Garage, Inc.

Are you the User: yes at 2920 **(yes/no)**

If not, what is your relationship to User: ____

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/21/2016 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/21/2016 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 08/01/2016 has revealed that there are

4 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 4 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RB Case Number:	01-1044
LOC Case Number:	TT01-1044
File Location:	Local Agency
Potential Media Affect:	Soil
Potential Contaminants of Concern:	Heating Oil / Fuel Oil, Stoddard solvent / Mineral Spriits / Distillates
Site History:	The subject property (Site) is currently a small restaurant (Simply Greek) located at 2929 Shattuck Avenue in Berkeley, California. The Site is developed entirely by a single-story structure that faces directly to Shattuck Avenue. In January 1988, a 1,500-gal underground storage tank (UST) was removed from the Site. The UST was used to house bunker oil. During removal, a 500-gal UST that was used for stoddard solvent (SS, or STOD) presumably used for dry cleaning. Bunker oil (fuel oil, bunker crude, bunker fuel) is typically any type of petroleum fuel used for marine vessels, or in some cases, aircraft. Contaminants reported on Site include Stoddard solvent and bunker fuel/heating oil. No significant observed release to the environment. The Site was Administratively closed in 1991. Closed, G. Fielder, in GeoTracker, October 14, 2008.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

EPA Region:	09
Classification:	Small Small Quantity Generator
Description:	Handler: generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

Owner/Operator Summary:

Owner/operator name:	RITE AID
Owner/operator address:	30 HUNTER LN CAMP HILL, PA 17011
Owner/operator country:	Not reported
Owner/operator telephone:	(717) 761-2633
Legal status:	Private
Owner/Operator Type:	Owner
Owner/Op start date:	Not reported
Owner/Op end date:	Not reported

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No

RITE AID NO 5954 (Continued) **1000905173**

On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Violation Status: No violations found

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect:	Soil
Potential Contaminants of Concern:	Gasoline
Site History:	Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp. UST removed from the site. Tank Removal Report indicates minor TPH impact to soil. A total of three soil samples were taken during the May 1985 UST removal: one beneath each of the two USTs and one below the product piping. Each soil sample was analyzed only for the volatile organic compounds (VOCs): benzene, toluene, and xylenes (BTX). Benzene was detected in all three soil samples, up to a maximum of 0.47 mg/kg, exceeding the benzene residential and commercial Environmental Screening Levels (ESLs) of 0.044 milligrams per kilogram (mg/kg) (San Francisco Bay Regional Water Quality Control Board, Table A ESLs for Shallow Soil, Groundwater is Current or Potential Source of Drinking Water, December 2013). Toluene and total xylenes detections for the UST samples were less than the ESLs. Xylenes were detected in the product piping soil sample up to 26 mg/kg exceeding the ESL of 2.3 mg/kg. Depth to groundwater ranged from approximately 2.9 to 8.6 feet below ground surface (bgs) in groundwater monitoring wells at neighboring Fuel Leak Case RO0003066. During the UST removal, groundwater was observed at 95 inches (7.9 feet) bgs and rising in the UST pit. Similarly, during the UST removal at neighboring Fuel Leak Case RO0003066, groundwater was observed in the UST pit at 11 feet bgs. Holes were observed in the product piping, but the USTs appeared to be intact and no odors or sheen were observed in the UST pit water. The primary source (two USTs and product piping) was removed and impacted soils aerated onsite for two weeks to reduce potential concentrations. MTBE was not an analyte during the UST removal. However, analytical results from three groundwater monitoring wells at neighboring downgradient Fuel Leak Case RO0003066, 330 feet southwest of the site, were historically non-detect for TPHg, BTEX, and MTBE, suggesting a lack of impact from a potential contaminant plume emanating from RO0003045. The UST and product piping removal (source removal), the lack of VOCs detected during the source removal, the onsite aeration of backfill, and the lack of downgradient off-site impact to neighboring Fuel Leak Case RO0003066

SHATTUCK IMPORT SERVICE (Continued) **S101624463**

are lines of evidence that support probable low residual source mass and low potential impact to groundwater and vapor intrusion to indoor air. The primary source (two USTs and product piping) was removed and excavated backfill was aerated onsite for two weeks to reduce potential concentrations prior to use as UST backfill in addition with clean fill material. Volatiles (benzene, toluene, and xylenes) in the three soil samples do not support the presence of a source mass with adequate magnitude or lateral extent to suspect a vapor intrusion risk. Ethylbenzene was not analyzed in soil for the tank removal. Ethylbenzene concentrations theoretically would be less than benzene concentrations based on average weight percent composition of gasoline. The State Water Resource Control Boards Leaking Underground Fuel Tank Guidance Manual CA LUFT (September 2012) indicates that fresh gasoline contains an average of 1.7% by weight of ethylbenzene and an average of 2.0% by weight of benzene. Because benzene concentrations did not exceed the LTCP Table 1 Criteria, it is expected that ethylbenzene concentrations, if present, would similarly not exceed the LTCP Table 1 Criteria. Naphthalene was not included in the analysis of soil samples collected at the site. This apparent data gap can be addressed using the published relative concentrations of naphthalene and benzene in gasoline. This approach has been used by SWRCB staff in recent Closure Orders pursuant to the Policy (e.g., SWRCB WQ Order 2013-0003): Gasoline mixtures contain an average of approximately 2% benzene and 0.25% naphthalene (Potter and Simmons 1998); therefore, benzene concentrations can be directly substituted for naphthalene concentrations with a safety factor of about 10. The maximum benzene concentrations from the Site are less than the naphthalene criteria in Table 1 of the Policy. Therefore, the estimated naphthalene concentrations at the Site meet the Policy criteria for direct contact by a factor of about 10. It is highly unlikely that naphthalene concentrations in the soil, if any, exceed the Policy criteria. Soil samples were not analyzed for PAHs as there was no waste oil UST.

Site History: The site is currently an active Chevron Service Station located at the northwest corner of the intersection of Telegraph Avenue and Ashby Avenue in a mixed residential and commercial area of Berkeley, California. Current station facilities include three gasoline USTs, five dispenser islands, a kiosk, and an auto-repair facility. In February 1987, the used-oil underground storage tank (UST), product piping, and dispensers were replaced. The fuel USTs were not replaced. In 1997, the station was remodeled to its current configuration, including replacing the USTs, product piping and dispensers. Environmental investigations began in 1989, and since then, 12 monitoring wells have been installed both onsite and offsite. In 1994, extraction wells EW-1 through EW-3 were installed along the downgradient property boundary, and along with MW-8, were part of a groundwater extraction system designed to control offsite petroleum hydrocarbon migration.

File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Lead, Diesel, Gasoline, Waste Oil / Motor / Hydraulic / Lubricating
Site History: On October 1, 2009, three 2,000-gallon gasoline, two 1,000-gallon gasoline, and one 55-gallon waste oil underground storage tanks were removed from the site. Following UST removal activities, compliance soil samples were collected from the excavations at the site. Total

GAS STATION / EAST BAY SMOG CENTER & AUTO REPAIR (Continued) **S110371819**

petroleum hydrocarbons as gasoline and diesel were detected from previous release of gasoline and diesel fuel. A work plan to define the extent of contamination on and off-site has been requested. Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: http://ehgis.acgov.org/dehpublic/dehpublic.jsp ACEH has received comments from the public prior to the start of potential case closure notification process that appear to identify possible data gaps. ACEH will review the data prior to proceeding.

Lead Agency:	SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number:	TEL3075
Latitude:	37.854215
Longitude:	-122.259704
Case Type:	Cleanup Program Site
Case Worker:	JGU
Local Agency:	BERKELEY, CITY OF
RB Case Number:	01S0741
File Location:	Local Agency
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	* Chlorinated Solvents - PCE
Site History:	The site is the former location of a multi-tenant retail facility that included two dry cleaning operations. The facility was demolished in 2003. The property was redeveloped with the Southside Lofts & Retail, a 22,000-square foot mixed-use development. The building consists of approximately 5,700 square feet of ground-floor retail space and ten second-floor residential lofts. A Phase I investigation in mid-2004 identified PCE contamination in soil and groundwater. Site characterization, corrective action implementation, and installation of 3 monitoring wells were conducted in 2004 to 2005. The corrective action included removal of contaminated soil from the Site. The Quarterly monitoring was conducted until the monitoring frequency was reduced to semiannual in 2009. Additional corrective action was proposed in 2011. Injection of amendments to stimulate in situ bioremediation was conducted in November 2011 and February 2012. The post-corrective action GW monitoring is conducted on the semi-annual basis. Another round of injections to promote microbial biodegradation in August 2016."Revision of the site conceptual model in the light of the new data, if warranted".

LOC Case Number:	TT01-1201
File Location:	Local Agency
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	Station closed and all structures, tanks, hydraulic lifts, etc, removed. Final stages of contamination assessment and site specific cleanup goals are to be completed in 2008. Case closure draft submittal under preparation 8-5-10. Site developed as commercial/residential development with substantial post-remediation soil and groundwater removal. Despite significant residual impacts to soil or groundwater, development included mitigations for indoor air vapor intrusion from subsurface. Public notice of pending approval of no further action request posted 3-27-2013.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal

MONSEN PLATING & SILVERSMITHS (Continued) **1000379853**

facilities.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/07/2016

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/07/2016

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board?s review found that more than one-third of the region?s active disposal pits are operating without permission.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Southeast Map:	5641110 OAKLAND EAST, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

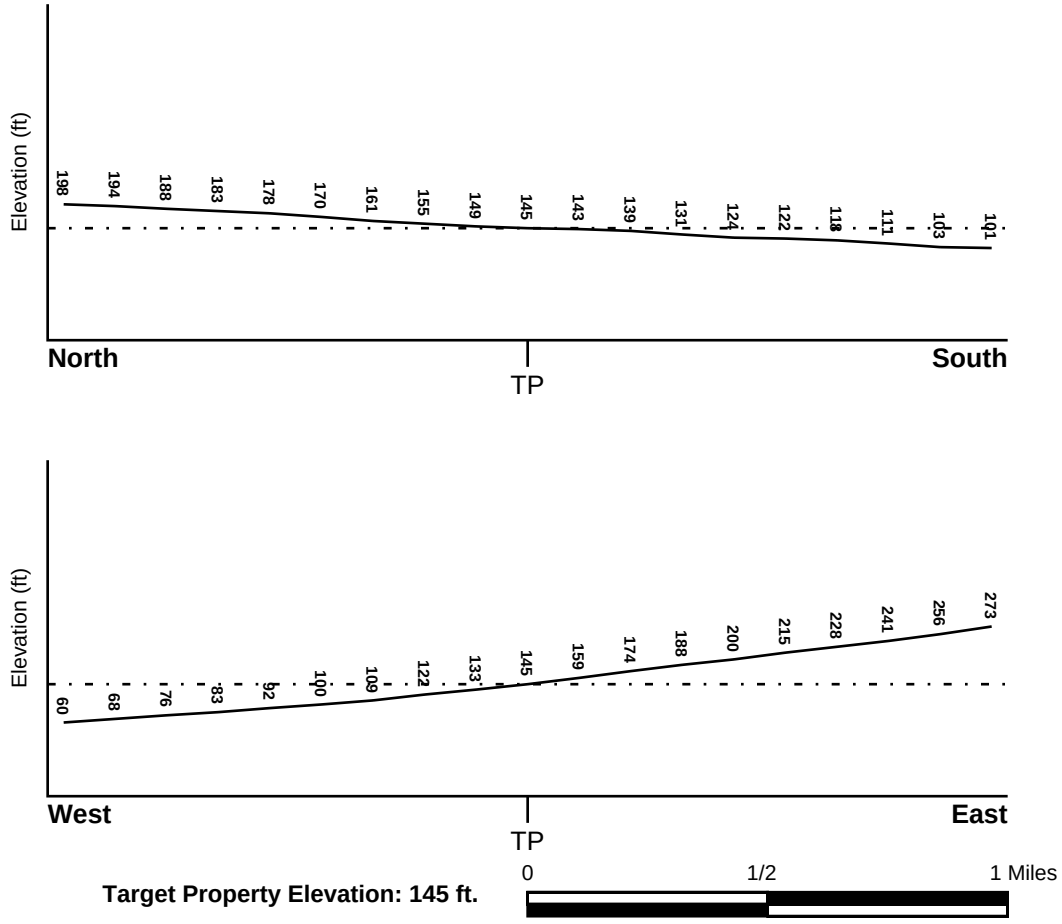
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06001C0057G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06013C0405F	FEMA FIRM Flood data

06001C0059G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
OAKLAND WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

9	1/2 - 1 Mile SW	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Tierra

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 5.1
2	11 inches	31 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 7.3 Min: 5.6
3	31 inches	59 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 5.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 153 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of the ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E 2600).

Search Radius: 0.333 Mile.

No Aquiflow sites reported.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name:	Tierra
Soil Surface Texture:	loam
Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class:	Moderately well drained
Hydric Status:	Not hydric
Corrosion Potential - Uncoated Steel:	High
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 5.1

EXECUTIVE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
2	11 inches	31 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 0.42 Min: 0.01	Max: 7.3 Min: 5.6
3	31 inches	59 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 5.6

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 153 inches

No Layer Information available.

EXECUTIVE SUMMARY

SEARCH RESULTS

Unmappable (orphan) sites are not considered in the foregoing analysis.

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

DEED: Deed Restriction Listing

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

ENVIROSTOR: EnviroStor Database

Standard Environmental Record Source: State and tribal - equivalent CERCLIS
Search Distance: 0.333 Mile

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

HAZNET: Facility and Manifest Data

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

2020 COR ACTION: 2020 Corrective Action Program List

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.25 Mile

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

SEMS: Superfund Enterprise Management System

Standard Environmental Record Source: Federal CERCLIS

Search Distance: 0.333 Mile

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

US BROWNFIELDS: A Listing of Brownfields Sites

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

Standard Environmental Record Source: Historical Gas Stations

Search Distance: 0.125 Mile

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: 02/20/2007
Number of Days to Update: 42

EDR MGP: EDR Proprietary Manufactured Gas Plants

Standard Environmental Record Source: Former manufactured Gas Plants

Search Distance: 0.333 Mile

RECORD SOURCES AND CURRENCY

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: 08/28/2009

RECORD SOURCES AND CURRENCY

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5' minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW® Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW® Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services. The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

APPENDIX G

Resumes of Environmental Professionals

Robert G. Clark-Riddell, P.E. #C49629

Mr. Robert (Bob) Clark-Riddell is a Registered Civil Engineer (#C49629) with the State of California with over 25 years of experience in the environmental and civil engineering field. He has managed the completion of numerous Phase I Environmental Site Assessments (ESAs) of commercial properties per American Standard for Testing Materials (ASTM) Standard of Practice protocol. The study properties have been located primarily in California. Phase I ESAs have been performed for various clients including banking institutions, property owners, developers, attorneys, insurance companies, and public agencies, with many Phase I ESAs performed under attorney-client work product privilege.

As the president of Pangea Environmental Services, Inc., of Oakland, California, Mr. Clark-Riddell specializes in the assessment and cleanup of underground contamination, including evaluation of human health and the environment due to known or potential toxic compounds. Mr. Clark-Riddell has performed subsurface environmental site assessment and remediation of hundreds of locations in California, and additional locations within the Western United States. The site assessment and remediation has been conducted primarily for underground petroleum product storage tank sites and dry cleaning site, but also for commercial/industrial sites with a multiple contaminants (chlorinated solvents, PCBs, pesticides, explosives, and metals). Assessment activities include research, soil gas sampling, soil sampling, and groundwater sampling. Remediation includes use of innovative and traditional techniques, included monitored natural attenuation.

For property transactions, Bob helps sellers and/or prospective purchasers assess potential or known Recognized Environmental Conditions (RECs), evaluate potential site cleanup/compliance costs, and identify funding opportunities from the California EPA Underground Storage Tank (UST) Cleanup Fund and other sources. Bob also works with environmental and transaction attorneys regarding environmental indemnification issues and assignment of reimbursement rights for the UST Cleanup Fund. As a director and VP Legislation and Policy for a non-profit organization, Mr. Clark-Riddell meets with key environmental regulatory administrators, legislators, and other organizations.

For site redevelopment on contaminated sites (e.g., Brownfields sites), Bob interfaces with regulatory personnel to help implement institutional and engineering controls for mitigation of potential exposure to residual compounds, and implementation of Site Management Plans. Bob also assists with environmental regulatory compliance for hazardous materials and stormwater runoff.

Bob has also provided litigation support and expert testimony on environmental issues pertaining to Phase I ESA and corrective action activities. One memorable case involved a Phase I ESA that did not recommend subsurface testing, with toxic material unearthed soon thereafter during utility trench installation. Careful evaluation of available information by a qualified Environmental Professional is vital to a well-prepared and reliable Phase I ESA.

Michael Audibert, REA – Associate Consultant

- MPA, Public Administration, San Francisco State University, 2000
- BS, Business Administration, University of Vermont, 1992

- EDR Vapor Intrusion Assessment (VI) Training, 2008
- Certified Mold Inspector (CMI) (Environmental Solutions Association), 2005

Mr. Audibert has been conducting Phase I and II Environmental Site Assessments (ESAs) of commercial, industrial, and multi-family residential properties throughout the United States since 2001. He has also managed regulatory compliance evaluation programs on a nationwide basis. With a background in business management and public administration, Mr. Audibert brought these skills into the environmental due diligence and health & safety arenas with strengths in project management, real estate transaction due diligence, and public sector agency correspondence. Mr. Audibert also has extensive experience managing various industrial hygiene projects, including asbestos surveys, mold assessments, radon testing, lead-based paint testing, lead-in-drinking-water testing, and other indoor air quality assessments.

Project experience for Mr. Audibert includes:

- ***Former Steel Foundry, Oakland, CA*** – Mr. Michael Audibert performed a Phase I Environmental Site Assessment (ESA) for a former steel and brass foundry to be converted into live/work loft apartments. The City of Oakland required that a comprehensive Phase I ESA be conducted for this property for foundry closure purposes. This project involved extensive agency and historical research, as well as determining what areas of the former foundry would be considered "at risk zones" for subsurface contamination.
- ***Gasoline Service Station Portfolios, CA –*** Mr. Michael Audibert has performed Phase I Environmental Site Assessments (ESAs) for existing gas stations developed on the site of former gas stations, as well as several historical and current leaking underground storage tank (LUST) sites, which involve an extensive historical use investigation and agency records review to determine the status of current and past underground storage tanks (USTs).
- ***Hotel/Hospitality Portfolios, Western U.S. –*** Mr. Audibert has performed Phase I ESAs on several hotel/hospitality properties, ranging from three-story buildings in rural areas to multi-floor high rise hotels in major domestic and international metropolitan cities.
- ***Former Union Hall, San Francisco, CA –*** Mr. Audibert performed a Phase I ESA for a former union hall to be developed into a high rise cosmopolitan apartment building. Because of the age of the buildings to be demolished, a comprehensive asbestos survey and ensuing operations and maintenance program for removal and disposal of asbestos was recommended and implemented.
- ***Former Printers, San Francisco, CA –*** Mr. Audibert performed a Phase I ESA for a former printing operation. The property had a long history of high-risk uses, including various manufacturing, automobile repair, and printing operations. A comprehensive agency records investigation and review was conducted.

Re: **Phase II Environmental Site Assessment Report**
2920 Shattuck Avenue
Berkeley, California

Dear Mr. Jin:

Pangea Environmental Services, Inc. (Pangea) has prepared this *Phase II Environmental Site Assessment Report* for the property located at 2920 Shattuck Avenue, Berkeley, California. The investigation was performed to evaluate site conditions for a pending property transaction and to address recognized environmental concerns (RECs) identified in the *Phase I Environmental Site Assessment* dated February 9, 2017. The Phase II site assessment work scope involved sampling of soil, groundwater, and subslab gas. Our conclusions and recommendations pertaining to the assessment results are presented herein.

If you have any questions or comments, please call me at (510) 435-8664 or email briddell@pangeaenv.com.

Sincerely,
Pangea Environmental Services, Inc.

Bob Clark-Riddell, P.E.
Principal Engineer

Attachment: *Phase II Environmental Site Assessment Report*

PHASE II ENVIRONMENTAL SITE ASSESSMENT REPORT

2920 Shattuck Avenue
Berkeley, California

February 9, 2017

Principal Engineer

INTRODUCTION

Pangea Environmental Services, Inc. (Pangea) has prepared this *Phase II Environmental Site Assessment Report* (report) for the property located at 2920 Shattuck Avenue, Berkeley, California (site). The investigation was performed to evaluate site conditions for a pending property transaction and to address recognized environmental concerns (RECs) identified in the *Phase I Environmental Site Assessment* dated February 8, 2017. The Phase II site assessment work scope involved sampling soil, groundwater, and subslab gas.

SITE BACKGROUND

The site consists of one parcel which totals approximately 0.63 acre in size. The site is currently occupied by two commercial buildings, occupied by a hardware store (True Value Eastern Supplies) and an automotive repair facility (The Model Garage).

The site is accessed via Shattuck Avenue to the east and Russell Street to the north of the site. It is located in a mixed commercial and residential area of the City of Berkeley, California (Figure 1). The site is bound to the north by a supermarket (Berkeley Bowl) across Russell Street; to the east by residences and commercial retail across Shattuck Avenue; to the south by commercial businesses; and to the west by residences.

According to the 2012 USGS map of the Oakland West Quadrangle, the site was located at approximately 145 feet above mean sea level (amsl) in south Berkeley. The map contours indicated that the site slopes gently to the west.

The Phase I ESA identified the following RECs or environmental conditions for which the Phase II site assessment evaluated:

- The site has been occupied by automotive repair uses for over 40 years. Various hazardous substances and petroleum products are used and stored as part of the property use;
- An upgradient property (2929 Shattuck Ave) historically occupied by a drycleaner;
- The auto repair facility onsite formerly had hydraulic hoists with associated underground reservoirs of hydraulic oil;
- A small underground storage tank was formerly onsite along the western edge of the property line.

SITE ASSESSMENT ACTIVITIES

Site assessment involved sampling of site soil, groundwater, and subslab gas. Pre-field, drilling, sampling, boring destruction, waste handling procedures are described below. Sampling locations are shown on figure 2.

Subslab Gas Sampling Activities

On December 13, 2016, Pangea installed and sampled five subslab gas probes (SS-1 through SS-5). The rationale for the probe locations is presented in Table A.

Table A - Rationale for Subslab Probe Locations

Probe ID	Rationale for Probe Location
SS-1 and SS-2	Near automobile garage activities.
SS-3	Rear of hardware store adjacent outside storage area.
SS-4	Near exterior storage area.
SS-5	Adjacent former UST and storage area.

The subslab probes were installed using a rotohammer to drill a 5/8" hole through the Site's concrete slab and inserting a vapor pin™ snuggly into the hole. The probes were closed and allowed to equilibrate with subsurface gas for a minimum of two hours.

Subslab gas probes were purged with a syringe at an approximate rate of 150 milliliters per minute and sampled by connecting the probes to a 1-liter Tedlar bag in a vacuum chamber. Samples were transported to McCampbell Analytical Laboratories (McCampbell) in Pittsburg, California and analyzed for volatile organic compounds (VOCs) by EPA Method 8260B.

Probes were removed from the concrete slab upon completion of sampling and the hole was backfilled with anchoring cement. Subslab probe locations are shown on Figure 2. Subslab gas sampling field sheets are included as Appendix A.

Soil and Groundwater Sampling Activities

On January 27, 2017, five soil borings (B-1 through B-5) were advanced at the site (Figure 2). Pangea contracted a C-57 licensed driller, Cascade Drilling of Richmond, California, to advance borings to collect soil and groundwater samples. Prior to drilling, a boring permit was obtained from the City of Berkeley Toxic Management Division (BTMD) and is included as Appendix B. A comprehensive site safety plan was prepared to protect site workers and the plan was kept onsite during all field activities. The proposed drilling locations were marked and Underground Service Alert was notified at least 48 hours before the proposed field activities. The rationale for the boring locations is presented in Table B.

Table B - Rationale for Boring Locations

Boring ID	Rationale for Boring Location
B-1	Near exterior storage area.
B-2	Adjacent former UST and storage area.
B-3	Near automobile garage activities and hoists, western end of building.

B-4	Near automobile garage activities and hoists, eastern end of building.
B-5	Downgradient of offsite historic dry cleaner, and southeastern corner of property.

Select borings were completed deeper to sample groundwater, while other borings evaluated shallow soil conditions. Boring B-1 was advanced to a total depth of 25 feet below ground surface (ft bgs), and borings B-3 and B-5 were advanced to a depth of 20 ft bgs. These borings were installed using a Geoprobe 6600DT track-rig and dual-tube drill rods. Borings B-2 and B-4 were advanced to a total depth of 5 ft bgs using a hand auger. Borings B-1, B-3, B-5 were also cleared to 5 ft bgs for utilities using a hand auger before using the drill rig. Soil boring locations are shown on Figure 2.

Soil was logged in accordance with the Unified Soil Classification System by Pangea staff and overseen by a professional engineer. Sample depths were collected based on field observations including visual staining, and readings on a photo ionization detector (PID). In the absence of any indications of contamination, samples were taken at a depth of 5 ft bgs. No indications of contamination were noted for borings B-1 through B-5 and samples were taken at the default depth. Soil boring standard operating procedures are attached as Appendix C.

Groundwater samples were collected from borings B-1, B-3 and B-5. Water was not observed in any of the three borings during drilling. The borings were allowed to remain open until Pangea and Cascade could remobilize on January 30, 2017. At that time, groundwater was observed in all three borings and samples were collected.

Soil borings were destroyed by tremie grouting with portland cement under the observation of a BTMD grout inspector. Borings were finished with a concrete at a thickness equal to the existing concrete slab. Investigation derived waste was drummed in a 55-gallon drum and will be profiled and disposed of properly.

Soil and groundwater samples were stored on ice and transported under chain-of-custody to Curtis and Tompkins Laboratory in Berkeley, California (C&T). Soil sample analysis consisted of the following:

- Total petroleum hydrocarbons as gasoline (TPHg) in all five borings by EPA Method 8015B;
- Total petroleum hydrocarbons as diesel (TPHd), and motor oil (TPHmo) in borings B-1 and B-3 through B-5 by EPA Method 8015B;
- VOCs in borings B-1 and B-3 by EPA Method 8260B;
- Semi volatile organic compounds (SVOCs) in boring B-1 by EPA Method 8270C;
- Lead in borings B-1, B-3, and B-5 by EPA Method 6020;
- Polychlorinated biphenyls (PCBs) in borings B-3 and B-4 by EPA Method 8082.

Groundwater sample analyses consisted of the following:

- TPHg in all three samples by EPA Method 8015B;
- TPHd and TPHmo in borings B-1 and B-3 by EPA Method 8015B;
- VOCs in all three samples by EPA Method 8260B;
- SVOCs in borings B-1 and B-3 by EPA Method 8270C;
- PCBs in boring B-3 by EPA Method 8082.

Laboratory analytical results are described below.

SITE ASSESSMENT RESULTS

Field observations and analytical results are described below. Analytical results for soil, groundwater, and subslab gas are summarized on Tables 1, 2 and 3, respectively. The laboratory analytical reports are included in Appendix C.

Field Observations

Soil from borings B-1 through B-5 consisted primarily of clays and silts with minor components of sand and gravel. Groundwater was not observed during drilling but had equilibrated to a depth of 14 to 19 ft bgs after 72 hours. Evidence of contamination was not observed via visual staining, PID readings, or olfactory detections.

Soil Analytical Results

Soil analytical data is summarized on Table 1. No TPHg, SVOCs and PCBs were detected above the laboratory reporting limits in any samples. TPHd was detected in one of four samples at a concentration of 13 milligrams per kilogram (mg/kg). TPHmo was detected in three of four analyzed samples, at a maximum concentration of 63 mg/kg in B-4. Acetone was detected at a concentration of 0.020 mg/kg in B-1, but no other VOCs were detected in borings B-1 or B-3. Lead was detected in all three samples at a maximum concentration of 11 mg/kg. None of these detections exceed the San Francisco Regional Water Quality Control Board's (RWQCB) most conservative environmental screening levels (ESLs), the 2016 Tier 1 ESLs.

Groundwater Analytical Results

Groundwater analytical data is summarized in Table 2. None of the following compounds were detected above the laboratory reporting limits in analyzed samples: TPHg, TPHmo, SVOCs, PCBs, or VOCs (other than acetone). Acetone was detected in boring B-3 at a concentration of 23 micrograms per liter (µg/L), well below the 2016 Tier 1 ESL of 1,500 µg/L.

TPHd was detected in boring B-3 at a concentration of 460 µg/L. This concentration exceeds the 2016 Tier 1 ESL for TPHd of 100 µg/L, and exceeds the direct contact ESL of 150 µg/L, but is below the ESL for non-drinking water ESL for odor/nuisance of 5,000 µg/L. TPHd was not detected in boring B-1. This information

suggests the TPHd impact in groundwater is limited in extent. Furthermore, the chromatogram for this sample is not consistent with new diesel and may represent of aged and degraded diesel.

Subslab Gas Analytical Results

Subslab analytical data is summarized in Table 3. No VOCs were detected above laboratory reporting limits in analyzed samples.

CONCLUSIONS AND RECOMMENDATIONS

Based on the above information, Pangea offers the following conclusions regarding site conditions:

- No chemical impact was found in site subslab gas, soil or groundwater above conservative 2016 Tier I environmental screening levels (ESLs), other than limited TPHd impact in groundwater described below.

- Limited diesel-range hydrocarbon impact (TPHd) was detected in groundwater near the eastern center of the property. The TPHd impact could be associated with the former UST removed from the site or hydrocarbons historically used/stored at the site. The impact is not likely due to a hydrocarbon release from the hydraulic hoist(s) since no impact was found in the hydraulic oil range. The detected TPHd concentrations slightly exceeds the conservative 2016 Tier 1 ESLs protective of the potential beneficial use of groundwater as drinking water. The TPHd concentration exceeds the direct contact ESL, but this is not significant given the depth to groundwater and site use. The TPHd concentration is well below the ESL for non-drinking water odor/nuisance. Based on the limited TPHd impact, the Berkeley Toxics Management Division could require preparation for Site Management Plan to properly manage and impacted soil or groundwater encountered during any future redevelopment of the site. Pangea recommends management of TPHd impact during future site redevelopment.

APPENDIX C

Standard Operating Procedures

STANDARD FIELD PROCEDURES FOR SOIL BORINGS

This document describes Pangea Environmental Services' standard field methods for drilling and sampling soil borings. These procedures are designed to comply with Federal, State and local regulatory guidelines. Specific field procedures are summarized below.

Objectives

Soil samples are collected to characterize subsurface lithology, assess whether the soils exhibit obvious hydrocarbon or other compound vapor odor or staining, estimate ground water depth and quality, and to submit samples for chemical analysis.

Soil Classification/Logging

All soil samples are classified according to the Unified Soil Classification System by a trained geologist, scientist or engineer working under the supervision of a California Registered Engineer, California Registered Geologist (RG) or a Certified Engineering Geologist (CEG). The following soil properties are noted for each soil sample:

- Principal and secondary grain size category (i.e. sand, silt, clay or gravel)
- Approximate percentage of each grain size category,
- Color,
- Approximate water or product saturation percentage,
- Observed odor and/or discoloration,
- Other significant observations (i.e. cementation, presence of marker horizons, mineralogy), and
- Estimated permeability.

Soil Boring and Sampling

Soil borings are typically drilled using hollow-stem augers or hydraulic-push technologies. At least one and one half ft of the soil column is collected for every five ft of drilled depth. Additional soil samples are collected near the water table and at lithologic changes. With hollow-stem drilling, samples are collected using lined split-barrel or equivalent samplers driven into undisturbed sediments beyond the bottom of the borehole. With hydraulic-push drilling, samples are typically collected using acetate liners. The vertical location of each soil sample is determined by measuring the distance from the middle of the soil sample tube to the end of the drive rod used to advance the split barrel sampler or the acetate tube. All sample depths use the ground surface immediately adjacent to the boring as a datum. The horizontal location of each boring is measured in the field from an onsite permanent reference using a measuring wheel or tape measure.

Drilling and sampling equipment is steam-cleaned prior to drilling and between borings to prevent cross-contamination. Sampling equipment is washed between samples with trisodium phosphate or an equivalent EPA-approved detergent.

Sample Storage, Handling and Transport

Sampling tubes or cut acetate liners chosen for analysis are trimmed of excess soil and capped with Teflon tape and plastic end caps. Soil samples are labeled and stored at or below 4°C on either crushed or dry ice, depending upon local regulations. Samples are transported under chain-of-custody to a State-certified analytic laboratory.

Field Screening

Soil samples collected during drilling will be analyzed in the field for ionizable organic compounds using a photo-ionization detector (PID) with a 10.2 eV lamp. The screening procedure will involve placing an undisturbed soil sample in a sealed container (either a zip-lock bag, glass jar, or a capped soil tube). The container will be set aside, preferably in the sun or warm location. After approximately fifteen minutes, the head space within the container will be tested for total organic vapor, measured in parts per million on a volume to volume basis (ppmv) by the PID. The PID instrument will be calibrated prior to boring using hexane or isobutylene. PID measurements are used along with the field observations, odors, stratigraphy and ground water depth to select soil samples for analysis.

Water Sampling

Water samples collected from borings are either collected from the open borehole, from within screened PVC inserted into the borehole, or from a driven Hydropunch-type sampler. Groundwater is typically extracted using a bailer, check valve and/or a peristaltic pump. The ground water samples are decanted into the appropriate containers supplied by the analytic laboratory. Samples are labeled, placed in protective foam sleeves, stored on crushed ice at or below 4°C, and transported under chain-of-custody to the laboratory.

Pangea often performs electrical conductivity (EC) logging and/or continuous coring to identify potential water-bearing zones. Hydropunch-type sampling is then performed to provide discrete-depth grab groundwater sampling within potential water-bearing zones for vertical contaminant delineation. Hydropunch-type sampling typically involves driving a cylindrical sheath of hardened steel with an expendable drive point to the desired depth within undisturbed soil. The sheath is retracted to expose a stainless steel or PVC screen that is sealed inside the sheath with Neoprene O-rings to prevent infiltration of formation fluids until the desired depth is attained. The groundwater is extracted using tubing inserted down the center of the rods into the screened sampler.

Duplicates and Blanks

Blind duplicate water samples are collected usually collected only for monitoring well sampling programs, at a rate of one blind sample for every 10 wells sampled. Laboratory-supplied trip blanks accompany samples collected for all sampling programs to check for cross-contamination caused by sample handling and transport. These trip blanks are analyzed if the internal laboratory QA/QC blanks contain the suspected field contaminants. An equipment blank may also be analyzed if non-dedicated sampling equipment is used.

Grouting

If the borings are not completed as wells, the borings are filled to the ground surface with cement grout poured or pumped through a tremie pipe.

Waste Handling and Disposal

Soil cuttings from drilling activities are usually stockpiled onsite on top of and covered by plastic sheeting. At least four individual soil samples are collected from the stockpiles for later compositing at the analytic laboratory. The composite sample is analyzed for the same constituents analyzed in the borehole samples. Soil cuttings are transported by licensed waste haulers and disposed in secure, licensed facilities based on the composite analytic results.

Ground water removed during sampling and/or rinsate generated during decontamination procedures are stored onsite in sealed 55 gallon drums. Each drum is labeled with the drum number, date of generation, suspected contents, generator identification and consultant contact. Disposal of the water is based on the analytic results for the well samples. The water is either pumped out using a vacuum truck for transport to a licensed waste treatment/disposal facility or the individual drums are picked up and transported to the waste facility where the drum contents are removed and appropriately disposed.

STANDARD OPERATING PROCEDURE FOR SOIL VAPOR SAMPLING

1.0 PURPOSE

This standard operating procedure (SOP) describes the procedures for collecting soil vapor samples using temporary and semi-permanent soil gas probes/wells and evacuated stainless-steel Summa canisters. The SOP is modified from procedures and information presented in Cal/EPA 2012 (*Advisory-Active Soil Investigations)*; Cal/EPA 2011; Cal/EPA 2010; U.S. EPA, 2006; and DiGiulio, 2003. This SOP includes (a) real-time leak-check procedures to evaluate integrity of the soil gas probe and sampling assembly during probe purging and post sampling, and (b) real-time field screening of soil gas concentrations during probe purging and post sampling.

2.0 REQUIRED EQUIPMENT

- Hammer drill with fittings for installing and removing vapor probes (for direct push vapor probes)
- Vapor probes with retractable or dedicated drop-off tips (e.g. AMS SGVP) (for direct push vapor probes).
- Hand auger (for soil vapor wells)
- Tubing with Swagelok or similar threaded compression-fittings, vapor-tight caps, valves
- Screens (for soil vapor wells)
- Filter-pack sand (for dedicated tips and soil vapor wells)
- Granular bentonite (for vapor well construction)
- VOA vials
- Vacuum pump with rotameter for purging and leak testing
- 1-Liter Summa canister with vacuum gauge for each sample
- Tedlar bags (for helium measurement and vapor screening)
- Stainless-steel sampling manifold
- Leak-check compound (e.g., helium)
- Calibrated photoionization detector (PID) or other organic vapor analyzer
- Isobutylene for PID calibration
- Vacuum chamber (iron lung) for pre- and post-sampling leak-check
- Leak-check enclosure(s) (small bucket [or similar] with openings for sample tubing, helium introduction and sampling enclosure atmosphere)
- Weather stripping or bentonite (for leak check enclosure seal)
- Record-keeping materials
- Latex or nitrile gloves

3.0 PROCEDURES

3.1 Boring Clearance

Prior to installing soil vapor probes, ensure that a utility clearance has been conducted.

3.2 Probe Depths

This SOP describes procedures for installing soil gas probes/wells at sufficient depth to provide a minimum of 5 feet between the ground surface and the top of the dry bentonite overlying the sand pack that surrounds the soil gas screen interval. This is because soil gas samples collected shallower than 5 ft depth may be subject to barometric pressure effects and prone to breakthrough of ambient air through the soil column.

In some cases shallower probe installation may be required to provide soil gas characterization immediately above the contaminant impact zone, to avoid shallow groundwater/capillary fringe, or to provide additional vertical characterization. Variation of sample depths and the need for deeper sample locations should be evaluated based on site specific characteristics and data quality objectives. If vertical characterization to groundwater is needed, the deepest soil gas sample should be collected near the top of the capillary fringe. Soil gas probes/wells should not be installed within or below the capillary fringe.

Collecting soil gas sampling near contaminant sources is recommended when performing vapor intrusion modeling. Risk estimates may be biased low if quantified with shallow soil gas measurements (five feet below grade) using the Johnson & Ettinger 1991 model. Vertical soil gas sampling should be conducted to determine the source of subsurface contamination, ideally using numerous vertical profiles of soil gas to accurately locate subsurface sources. Once located, soil gas can be targeted at these depths site wide.

3.3 Semi-permanent Direct-Push Vapor Probe Installation

1. Use a rotary hammer drill or concrete-coring equipment to core any paved surfaces.
2. The drive rod is driven to a predetermined depth and then partially or fully removed (depending on soil type), leaving a disposable drop-off tip in the hole. The hole should be sufficiently deep that there is a minimum of 5 feet between the surface and the top of the dry bentonite overlying the sand pack (see below for details). If possible, remove the drive rod and place 3” of sand in the hole before placing the drop-off tip.
3. The inner soil gas pathway from probe tip to the surface should be continuously sealed (e.g., a sampling tube attached to the probe tip with a barbed fitting or a screw adapter with an o-ring) to prevent leakage. If a screw adapter with o-ring is used, inspect the o-ring to ensure that it is not flawed and use rigid tubing that can be tightened from the surface. Tightly cap the top end of the sampling tube. The volume of the sampling apparatus should be minimized. DTSC guidance requires that tubing should be no greater than ¼” nominal diameter.
4. Cover the probe tip with at least 3”of sand (resulting in a minimum 6” sand pack), followed by at least 6” of dry granular bentonite (see **Figure 1**). Fill the remainder of the boring with hydrated bentonite slurry. For multiple depth soil gas probes, separate vapor probe sand packs with hydrated bentonite as shown on **Figure 2**. VOA vials are useful for measuring and placing these materials because they have approximately the same inside diameter as the AMS SGVP drive rod outer diameter. Check the annular space for bridging and construction material depths using a narrow rod.
5. **Equilibration Time:** Record probe installation time/date, and wait at least **2 hours** before conducting purge volume tests, leak tests, or soil gas sampling -- if there is a minimum of 5

feet between the surface and the top of the dry bentonite overlying the sand pack. If there is less than 5 feet between the surface and the top of the dry bentonite overlying the sand pack or the borehole was hand augered, wait at least **48 hours** after probe installation and capping before conducting purge volume tests, leak tests, or soil gas sampling. If the probe was installed with a combination of hand augering and direct-push drilling methods and there is less than 5 feet between the bottom of the hand auger depth and the top of the dry bentonite overlying the sand pack, wait at least **48 hours** after probe installation and capping before conducting purge volume tests, leak tests, or soil gas sampling.

6. Decontamination: Decontaminate drive rods and other reusable components between sample locations by washing equipment with Alconox or Liquinox soap and rinsing with tap water and/or by steam-cleaning. Use new flexible tubing for each sample point (do not reuse).

3.4 Semi-permanent Augered Vapor Well Installation

1. Use a rotary hammer drill or concrete-coring equipment to core any paved surfaces.
2. Auger to a depth sufficient to allow a minimum of 5 feet between the surface and the top of the dry bentonite overlying the sand pack (see below for details). It is recommended to use the smallest diameter auger feasible to minimize future purging volumes and optimize representativeness of soil gas data.
3. Install small diameter tubing with a short (<6" long) screened section close to the bottom of the hole. The soil gas pathway from screen to the surface should be continuously sealed (e.g., a sampling tube attached to the probe tip with a barbed fitting or a screw adapter with an o-ring) to prevent leakage. If a screw adapter with o-ring is used, inspect the o-ring to ensure that it is now flawed and use rigid tubing that can be tightened from the surface. The volume of the sampling apparatus should be minimized. DTSC guidance specifies that tubing should be no greater than ¼" nominal diameter.
4. For deep wells (>10 feet), install a down-hole rod or other support to ensure that the screened section remains at the proper depth.
5. Cover the screened section with at least 6" of sand, followed by at least 6" of dry granular bentonite. Ensure that the screened section is near the center of the sand pack. Fill the remainder of the boring with hydrated bentonite. The bentonite should be hydrated at the surface and poured into the borehole.
6. **Equilibration Time:** After probe installation, tightly cap the tubing, record probe installation time/date, and wait at least **48 hours** before conducting purge volume tests, leak tests, or soil gas sampling:
7. Decontamination: Decontaminate drive rods and other reusable components between sample locations by washing equipment with Alconox or Liquinox soap and rinsing with tap water and/or by steam-cleaning. Use new flexible tubing for each sample point (do not reuse).

3.5 Temporary Vapor Probe Installation Using Tubing and Expendable Tip

1. This method should only be used for qualitative assessments due to the possibility of vapor leaks along the drive rods. This method should not be used when sampling in coarse granular materials due to potential leakage along the probe.
2. Use a rotary hammer drill or concrete-coring equipment to core any paved surfaces.
3. The drive rod is driven to a predetermined depth (generally 6 feet minimum) and then pulled back (approximately 1") to expose the short screened section of the probe (typically an expendable tip, **Figure 3**).

4. The probe tip should be attached to the sampling tube with either a barbed fitting or a screw adapter with an o-ring to prevent leakage. If a screw adapter with o-ring is used, replace o-rings daily and inspect them for flaws before installing each probe. Use rigid tubing that can be tightened from the surface to ensure that the o-ring is properly sealed. The volume of the sampling apparatus should be minimized. DTSC guidance requires that tubing should be no greater than ¼" nominal diameter.
5. Hydrated bentonite should be used to seal around the drive rod at the ground surface to prevent ambient air intrusion
6. **Equilibration Time:** After probe installation, tightly cap the tubing, record probe installation time/date, wait at least **2 hours** before conducting purge volume tests, leak tests, or soil gas sampling.

3.6 Vapor Sample Collection

During vapor sampling, record all valve open/close times and canister/manifold vacuum readings at each step. Do not conduct sampling within **5 days following a significant rain event** (0.5 inches of rainfall during any 24-hour period) or after significant nearby irrigation.

Setup

1. Calculate and record the volume of the sampling assembly, tubing, vapor probe, and any *permeable* air-, sand-, or dry bentonite-filled annular space around the vapor probe tip.

   One Purge Volume = $\pi * r^2 * L$ = 3.14 x (1/2*ID) x (1/2*ID) * L,

   where ID = tubing or manifold inside diameter and L = length of tubing/manifold/borehole segment.

   - 1/8" ID tubing volume = 2.4 ml/ft,
   - 1/4" ID tubing volume = 9.7 ml/ft,
   - 1/4" OD (0.17" ID) tubing volume = 4.5 ml/ft
   - 2-1/8" auger boring volume = 697 ml/ft * 0.4 = 278 ml/ft (sand) minus tubing volume
   - 2-1/8" auger boring volume = 697 ml/ft * 0.5 = 349 ml/ft (dry bentonite) minus tubing volume
   - 3-1/4" auger boring volume = 1631 ml/ft * 0.4 = 652 ml/ft (sand) minus tubing volume
   - 3-1/4" auger boring volume = 1631 ml/ft * 0.5 = 816 ml/ft (dry bentonite) minus tubing volume

Sample Purge Volumes

Item	One (1) Purge Volume (approx)	Three (3) Purge Volumes	Ten (10) Purge Volumes
¼" ID tubing (10 ft)	100 ml	300 ml	1,000 ml
¼" ID tubing (10 ft) with 6" dry bentonite and 6" sand, inside 3-1/4" diameter auger boring	830 ml	2,500 ml	8,300 ml
¼" ID tubing (10 ft) with 1 ft dry bentonite and 1 ft sand, inside 3-1/4" diameter auger boring	1,550 ml	4,650 ml	15,550 ml

2. Wear latex or nitrile gloves while handling sampling equipment. Change gloves whenever a new sample is collected and after handling leak-check compound.
3. Replace the vapor probe cap with a closed Swagelok valve. Connect the sampling manifold to the vapor probe, sample Summa canister and vacuum pump using Swagelok fittings and stainless-steel, nylon, or Teflon tubing. Check all fittings for tightness (do not over-tighten).
4. Close all valves. Record pre-test vacuum reading on the Summa canister.

Shut-In Check

1. Open valve on vapor sampling manifold and open 3-way valve #1 so the vacuum pump of the purging assembly can evacuate the vapor sampling manifold assembly (keep valves #2 and #3 closed to the Tedlar bag/vacuum chamber of the vapor screening assembly) (**Figure 4**). Start the vacuum pump. Do *not* open #1 valve to the probe assembly, or the valve on the sample Summa canister. Allow manifold/tubing vacuum to stabilize at approximately 10" Hg.
2. Stop the vacuum pump, close 3-way valves #2 and #3 (to allow shut-in testing of vapor sampling manifold), and conduct a shut-in test by waiting at least **5 minutes** (if using 150 inches of water gauge) or **10 minutes** (if using 30 inches of mercury gauge). Monitor manifold vacuum gauge to test for leaks. If the vacuum decreases, rectify the leak before proceeding.

Purge, Flow and Leak Check

1. **Calculate purge volume and duration.** Do *not* over-purge. Purge volumes should be determined in one of the following ways:

   a) For vapor sampling in support of sensitive human health risk assessments for regulatory review, a step-purge test should be conducted at a "worst case" sampling point, **using 1, 3 and 10 purge volumes** (including tubing, sampling assembly and annular space) to determine the appropriate volume that yields the highest target compound concentration.

   b) For collecting samples from depths of 5 feet or less, or if step purge tests yield no detectable target compounds, use a default purge of approximately **3 purge volumes** (including tubing, sampling assembly and annular space).

   c) For semi-permanent wells subject to frequent sampling, **purge 1 volume** only of the tubing and manifold volume (not including the dry bentonite or sand pack section) after waiting at least **2 weeks** following the previous sampling event.
2. Place leak-check enclosure over vapor probe and seal to ground using hydrated bentonite or weather stripping.
3. Introduce helium gas into the leak-check enclosure and monitor with the helium gas analyzer until it reads between 20% and 30% helium.
4. **Conduct purging.** Start vacuum pump and open 3-way valve #1 (and 3-way valves #2 and #3) so the vacuum pump can evacuate the probe. Do *not* over-purge. Closely monitor the flow on the rotameter and the vacuum on the vacuum gauge. For most samples flow should be limited to 150mL/min or 200 mL/min maximum. Flow rates greater than 200 mL/min may be used when purging times are excessive, such as for deep wells with larger-diameter tubing. However, a vacuum of 100" of water or less must be maintained during sampling whenever a higher flow rate is used. If the vacuum remains below approximately 7" Hg, then sufficient flow is present to collect a representative sample (Cal/EPA 2012) and continue purging for the planned purge duration.

5. If the probe-side vacuum exceeds approximately 7" Hg, then insufficient flow may be present to collect a representative sample and this condition should be noted. (Evaluate probe integrity or consider re-installation of probe, especially if probe installed in coarse-grain material). **To sample soil gas under low flow conditions, follow this alternate sampling method** derived from Appendix D, Cal/EPA 2012. Make a reasonable attempt to purge one purge volume (as defined above), but as a minimum purge one volume of the sampling assembly, tubing, and probe. After purging, open sample Summa canister until sampling manifold vacuum threshold is achieved, then close Summa sample valve until probe vacuum dissipates. Repeat this sampling procedure as necessary to sufficiently fill the sample Summa canister. Alternatively, consider installing a soil gas probe with a larger probe annulus space, or employing passive soil gas sampling methods.
6. **Pre-Sample Vapor Screening.** To pre-screen soil vapor, open valves #2 and #3 of the vapor screening assembly to route vapor into the Tedlar bag within a vacuum chamber (iron lung). Partially fill the Tedlar bag (and return valves #2 and #3 to purging position). Monitor the rotameter for changes in flow while filling the Tedlar bag. Check bag with the helium gas analyzer to screen probe vapors for leakage (indicated by presence of helium). If helium concentration in bag is below 1% then continue sampling. If helium concentration in bag is above 1%, then discontinue sampling and check for leaks around the probe. The probe may need to be repaired or re-installed. Additionally, check the Tedlar bag for contaminants using the PID for qualitative contaminant assessment (optional). For tight soil formations, consider skipping the pre-sample vapor screening or conducting screening as initial probe purging.
7. When purge duration complete and ready to discontinue purging, close 3-way valve #1 so that the probe is connected to the sampling manifold, and then stop the vacuum pump.
8. Record helium reading for leak-check enclosure about each minute during purging and sampling.

Sample Collection

1. **Opening Sample Canister.** Once a helium reading of at least 20% has been reached, open sample canister valve. **Sampling takes approximately 5 minutes for a 1-liter Summa canister** (at 150 ml/min sampling flow rate).
2. Close sampling canister valve when vacuum decreases to 5" mercury. Do *not* allow vacuum to fall below this range.
3. **Post-Sample Vapor Screening.** After sampling, open 3-way valve #1 so that the vapor screening assembly is connected to the probe, turn on the vacuum pump, and open 3-way valves #2 and #3 to partially fill the Tedlar bag within the vacuum chamber (iron lung). When Tedlar bag is sufficiently filled, return valves #2 and #3 to purging position. Check Tedlar bag for indication of sampling leakage using the helium gas analyzer. If helium concentration is below 1% then sample is sufficiently representative. If helium concentration is above 1%, then the sample may not be sufficiently representative; the probe may need to be repaired or re-installed and re-sampled. Additionally, check the Tedlar bag for contaminants using the PID for qualitative contaminant assessment (optional).
4. **Shroud Sample.** To confirm helium meter readings, collect one shroud sample per day to analyze for percent helium. Connect the shroud sample Summa canister and manifold to a port near the bottom of the shroud and open the canister valve at the beginning of sampling. Close sampling canister valve when vacuum decreases to 5" mercury. Do *not* allow vacuum to fall below this range. Disassemble sampling assembly, and cap (or remove and restore) vapor sampling point.

5. **Analyses.** Fill out chain-of-custody form for analysis for **chemicals of concern (i.e. TO-15)**, and for **leak-check compound** for at least 10% of samples. Analyze all samples for **percent oxygen** by ASTM D1946-90**.** Additionally, samples may be analyzed for **percent methane and carbon dioxide** by ASTM D1946-90 when in support of sensitive human health risk assessments for regulatory review. Include final vacuum reading and serial numbers of canister and flow restrictor on chain-of-custody form.
6. For vapor sampling in support of sensitive human health risk assessments for regulatory review, collect at least one *duplicate* sample per site per sampling event from the sampling point with the anticipated highest vapor concentrations. The duplicate sample should be collected by attaching a fresh sample canister following collection of the initial sample. If a new manifold is used, follow the same purging and sampling procedures used for the original sample. If the same manifold is used, collect a sample without further purging, using the same sampling procedures used for the original sample.

Decontamination and Decommissioning

1. Use a decontaminated sampling manifold and new tubing for each sample location. Return equipment to laboratory for decontamination.
2. Backfill any open soil vapor probe holes with bentonite slurry or Portland cement and cap with concrete or other surface material to match the area.
3. To retain the soil gas probe for future sampling, cap the Swagelock fitting and cover the probe with a small vault or other protective device.

Glossary of Terms & Qualifier Definitions

Client: Pangea Environmental Svcs., Inc.
Project: 2920 Shattuck
WorkOrder: 1612616

Glossary Abbreviation

%D	Serial Dilution Percent Difference
95% Interval	95% Confident Interval
DF	Dilution Factor
DI WET	(DISTLC) Waste Extraction Test using DI water
DISS	Dissolved (direct analysis of 0.45 µm filtered and acidified water sample)
DLT	Dilution Test (Serial Dilution)
DUP	Duplicate
EDL	Estimated Detection Limit
ITEF	International Toxicity Equivalence Factor
LCS	Laboratory Control Sample
MB	Method Blank
MB % Rec	% Recovery of Surrogate in Method Blank, if applicable
MDL	Method Detection Limit
ML	Minimum Level of Quantitation
MS	Matrix Spike
MSD	Matrix Spike Duplicate
N/A	Not Applicable
ND	Not detected at or above the indicated MDL or RL
NR	Data Not Reported due to matrix interference or insufficient sample amount.
PDS	Post Digestion Spike
PDSD	Post Digestion Spike Duplicate
PF	Prep Factor
RD	Relative Difference
RL	Reporting Limit (The RL is the lowest calibration standard in a multipoint calibration.)
RPD	Relative Percent Deviation
RRT	Relative Retention Time
SPK Val	Spike Value
SPKRef Val	Spike Reference Value
SPLP	Synthetic Precipitation Leachate Procedure
ST	Sorbent Tube
TCLP	Toxicity Characteristic Leachate Procedure
TEQ	Toxicity Equivalents
WET (STLC)	Waste Extraction Test (Soluble Threshold Limit Concentration)

Analytical Qualifiers

NOTES: - STLC and TCLP extractions require 2 days to complete; therefore, all TATs begin after the extraction is completed (i.e., One-day TAT yields results in 3 days from sample submission).

- MAI assumes that all material present in the provided sampling container is considered part of the sample - MAI does not exclude any material from the sample prior to sample preparation unless requested in writing by the client.

MAI clients MUST disclose any dangerous chemicals known to be present in their submitted samples in concentrations that may cause immediate harm or serious future health endangerment as a result of brief, gloved, open air, sample handling by MAI staff. Non-disclosure incurs an immediate $250 surcharge and the client is subject to full legal liability for harm suffered. Thank you for your understanding and for allowing us to work safely.

* If metals are requested for water samples and the water type (Matrix) is not specified on the chain of custody, MAI will default to metals by E200.8.

Please provide an adequate volume of sample. If the volume is not sufficient for a MS/MSD a LCS/LCSD will be prepared in its place and noted in the report.

CASE NARRATIVE

Laboratory number:	**285519**
Client:	**Pangea Environmental**
Location:	**2920 Shattuck Ave**
Request Date:	**01/27/17**
Samples Received:	**01/27/17**

This data package contains sample and QC results for five soil samples, requested for the above referenced project on 01/27/17. The samples were received cold and intact.

TPH-Purgeables and/or BTXE by GC (EPA 8015B):
No analytical problems were encountered.

TPH-Extractables by GC (EPA 8015B):
Matrix spikes QC870801,QC870802 (batch 243973) were not reported because the parent sample required a dilution that would have diluted out the spikes. No other analytical problems were encountered.

Volatile Organics by GC/MS (EPA 8260B):
No analytical problems were encountered.

Semivolatile Organics by GC/MS (EPA 8270C):
Matrix spikes QC870616,QC870617 (batch 243929) were not reported because the parent sample required a dilution that would have diluted out the spikes. No other analytical problems were encountered.

PCBs (EPA 8082):
All samples underwent sulfuric acid cleanup using EPA Method 3665A. All samples underwent sulfur cleanup using the copper option in EPA Method 3660B. No analytical problems were encountered.

Metals (EPA 6010B and EPA 6020):
No analytical problems were encountered.

CASE NARRATIVE

Laboratory number:	**285556**
Client:	**Pangea Environmental**
Location:	**2920 SHATTUCK AVE**
Request Date:	**01/30/17**
Samples Received:	**01/30/17**

This data package contains sample and QC results for three water samples, requested for the above referenced project on 01/30/17. The samples were received cold and intact.

TPH-Purgeables and/or BTXE by GC (EPA 8015B):
No analytical problems were encountered.

TPH-Extractables by GC (EPA 8015B):
No analytical problems were encountered.

Volatile Organics by GC/MS (EPA 8260B):
B-5-GW (lab # 285556-003) was diluted due to foaming. B-3-GW (lab # 285556-002) had pH greater than 2. No other analytical problems were encountered.

Semivolatile Organics by GC/MS (EPA 8270C):
No analytical problems were encountered.

PCBs (EPA 8082):
All samples underwent sulfuric acid cleanup using EPA Method 3665A. All samples underwent sulfur cleanup using the copper option in EPA Method 3660B. No analytical problems were encountered.

1. Did cooler come with a shipping slip (airbill, etc) YES (NO)
Shipping info

2A. Were custody seals present? .... ☐ YES (circle) on cooler on samples ☒ NO
How many Name Date
2B. Were custody seals intact upon arrival? YES NO N/A
3. Were custody papers dry and intact when received? (YES) NO
4. Were custody papers filled out properly (ink, signed, etc)? (YES) NO
5. Is the project identifiable from custody papers? (If so fill out top of form) (YES) NO
6. Indicate the packing in cooler: (if other, describe)

☐ Bubble Wrap ☒ Foam blocks ☐ Bags ☐ None
☐ Cloth material ☐ Cardboard ☐ Styrofoam ☐ Paper towels

7. Temperature documentation: * Notify PM if temperature exceeds 6°C

Type of ice used: ☒ Wet ☐ Blue/Gel ☐ None Temp(°C) 5.5°C

☒ Temperature blank(s) included? ☒ Thermometer# 4 ☐ IR Gun#

☒ Samples received on ice directly from the field. Cooling process had begun

8. Were Method 5035 sampling containers present? YES (NO)
If YES, what time were they transferred to freezer?
9. Did all bottles arrive unbroken/unopened? (YES) NO
10. Are there any missing / extra samples? YES (NO)
11. Are samples in the appropriate containers for indicated tests? (YES) NO
12. Are sample labels present, in good condition and complete? (YES) NO
13. Do the sample labels agree with custody papers? (YES) NO
14. Was sufficient amount of sample sent for tests requested? (YES) NO
15. Are the samples appropriately preserved? (YES) NO N/A
16. Did you check preservatives for all bottles for each sample? YES NO (N/A)
17. Did you document your preservative check? (pH strip lot#) YES NO (N/A)
18. Did you change the hold time in LIMS for unpreserved VOAs? YES NO (N/A)
19. Did you change the hold time in LIMS for preserved terracores? YES NO (N/A)
20. Are bubbles > 6mm absent in VOA samples? (YES) NO N/A
21. Was the client contacted concerning this sample delivery? YES (NO)
If YES, Who was called? By Date:

COMMENTS
11 Did not receive amber container for TPH-d/m.

Dear Mike Erving,

Thank you for your request. We have searched our records and have no records that respond to your below request for:

2900-2920 Shattuck Avenue
Berkeley

If you have any questions or concerns, please call or e-mail me.

Sincerely,

Rochele Henderson

OWNER/BUILDER
I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code, or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).
☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvements is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale).
☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law).
☐ I am exempt under Sec. _____, B.& P.C. for this reason _____

BUILDING PERMIT APPLICATION

I hereby affirm (check one):

☒ LICENSED CONTRACTOR'S DECLARATION. I am licensed under provisions of Chapter 9 (commencing with Sec. 7000) of the Business and Professions Code, and my license is in full force and effect.
License No. 340885 Classification C10

☒ OWNER-BUILDER DECLARATION. I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code): Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500.00).

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code): The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvements is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code): The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contract(s) licensed pursuant to the Contract's License Law).

I am exempt under Sec. _____, Business and Professions Code, for this reason:

WORKER'S COMPENSATION DECLARATIONS (Sec. 3800 LAB.C.)
(check one):

☐ I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workers Compensation Insurance, or a certified copy thereof.

Policy No. _____ Company _____

☐ Certified copy is hereby furnished.

☐ Certified copy is filed with the City of Berkeley Building Division

☒ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

☐ The permit is for $100.00 (valuation) or less.

NOTE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Worker's Compensation provisions of the Labor Code, you must comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY (Sec. 3097, Civil Code)
I hereby affirm that there (check one)

☐ is ☐ is not a construction lending agency for the performance of the work for which this permit is issued.

Lender's Name _____

Lender's Address _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all City ordinances and State laws relating to building construction, and hereby authorize representatives of the City of Berkeley to enter upon the above-mentioned property for inspection purposes.

I also agree to waive, indemnify and hold harmless the City and it's agents against all liabilities, judgments, costs, and expenses which may in any way accrue against said agency in consequence of the granting of this permit.

OWNER/BUILDER
I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law Chapter 9 (commencing with Sec. 7000) of Division 3 of the Business and Professions Code, or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

[X] I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvements is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale).

[ ] I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law).

[ ] I am exempt under Sec. B & P.C. for this reason

Donald B. Mott 5/5/88
Signature Date

WORKERS' COMPENSATION
I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workers' Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.).
Policy # Company Name
[ ] Certified copy is hereby furnished.
[ ] Certified copy is filed with the city building inspection department.
Signature Date

(This section need not be completed if the permit is for one hundred dollars ($100) or less.)
I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.
Signature Donald B. Mott Date 5-5-88

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

LENDER
I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).
LENDERS NAME
LENDERS ADDRESS

APPLICANT
I CERTIFY THAT I HAVE READ THIS APPLICATION AND STATE THAT THE INFORMATION GIVEN IS TRUE AND CORRECT. I AGREE TO COMPLY WITH ALL LOCAL ORDINANCES AND STATE LAWS RELATING TO BUILDING CONSTRUCTION AND I MAKE THIS STATEMENT UNDER PENALTY OF LAW. I HEREBY AUTHORIZE REPRESENTATIVES OF THIS CITY/COUNTY TO ENTER UPON THE ABOVE MENTIONED PROPERTY FOR INSPECTION PURPOSES. NOTICE: THIS PERMIT WILL EXPIRE BY LIMITATION IF WORK IS NOT STARTED IN 180 DAYS OR IF WORK IS ABANDONED FOR MORE THAN 180 DAYS. DO NOT CONCEAL OR COVER ANY CONSTRUCTION UNTIL THE WORK IS INSPECTED AND THE INSPECTION IS RECORDED ON THE BACK OF THE JOB COPY OF THIS PERMIT. ALL INSPECTION REQUESTS ARE REQUIRED 24 HOURS IN ADVANCE OF THE INSPECTION.

Hello,

I have not received any return to compliance certification or documentation for the violations found during my inspection on 3/16/18.

Just a heads up the deadline is today and we usually give an extra 5 days prior to sending out a Notice of Violation.

Let me know if you need any help returning to compliance.

Best,
Viviana Garcia

Attached please find pictures of labels with start dates. We wrote in the start dates based on our research of the last pickup date and added 3 days to a week as an estimate for when waste was next deposited in the barrels. Please note that the one empty barrel does not yet have a start date. Please let us know if you need anything further from us. Thanks, Don Worth, Model Garage, Inc.

Total Aggregate Quantities Stored or Handled at This Facility

(1) The row heading "Hazardous Materials" requires a sum of *all* amounts reported on the Chemical Description pages, including data reported for hazardous wastes. (2) Please don't leave any quantity box blank; if the total number for a particular category is zero, enter 0. (3) If additional programs should be billed (CalARP, APSA, etc.), place an X in the box under the program name.

Quantities Summarized:

Chemicals	CY2017	CY2017	CY2017	Last Reported	FY2018 Permit
	LIQUID	**SOLIDS**	**GASES**		
Total number of all chemicals:	10	-	5		15
Total number of waste chemicals:	5	-			
	GALLONS All liquids	**POUNDS** All solids	**CU. FT.** All gasses		
Hazardous Materials: *ALL* Chemicals. Sum of *all* Box 218s—Max. Daily Amt	858	-	758	HMPB3	HMPB3
Hazardous Wastes: *ONLY* Wastes. Sum of *all* Box 219s— Annual Waste Amt	2,884	-		HWG3	HWG3

CalARP			Tiered Permit			APSA	
Program 1	Program 2	Program 3	Conditionally Exempt	Conditionally Authorized	Permit by Rule	< 10,000	≥ 10,000
Undergrnd Stor. Tanks		**Acute HW**	**Inert Gas**	**Etiologic**	**Radiologic**	**Nano**	**EPCRA**

Hazardous Materials Business Plan (HMBP) Certification Statement

For Dept Use Only – Log In/Date Stamp

RECEIVED
MAR 0 2 2009
TOXICS MGMT. DIVISION

I. IDENTIFICATION

FACILITY ID # 158 CAD # 093459485

BUSINESS NAME (Same as Facility Name or DBA-Doing Business As) 3
THE MODEL GARAGE, INC.

BUSINESS SITE ADDRESS 103
2920 SHATTUCK AVE.

CITY 104 BERKELEY | CA | ZIP CODE 105 94705

II. CERTIFICATION STATEMENT

Check the appropriate boxes below and sign the certification statement.

ENTERED IN DMS
MAR 04 2009

☐ INITIAL SUBMITTAL: This new HMBP is being submitted for the following:
- ☐ New facility
- ☐ Change of ownership
- ☐ Change of business address

☐ ANNUAL CERTIFICATION: I have personally reviewed the HMBP currently on file with your agency, dated _____, and hereby certify, *under penalty of perjury*, that:
- The information contained in the most recent HMBP submission is complete, accurate and up to date.
- A copy of the facility's most current Business Owner/Operator Identification page is being submitted with this certification form.
- The facility has not begun handling any hazardous materials/hazardous wastes that are not currently listed on the most recently submitted Hazardous Materials Inventory forms.
- There have been no significant changes (100% increase or decrease) in the quantities of any previously reported hazardous materials/hazardous wastes as reported on the most recently submitted Hazardous Materials Inventory forms.
- The facility's annual waste amounts reported on the most recently submitted Hazardous Materials Inventory forms are accurate and expected to be the same in the next year.
- This certification is <u>not</u> being made to meet annual inventory submission requirements of EPCRA. (EPCRA requires complete annual submission of the inventory, United States Code Title 42, Section 11022).

☒ CERTIFICATION OF CHANGES/REVISIONS: This is to certify that the HMBP has been reviewed and revisions, amendments and/or additions are necessary and are being submitted with this document. The following areas of the HBMP are affected:
- ☐ Entire HMBP revision
- ☐ Business Activities page
- ☐ Business Owner/Operator Identification page
- ☒ Hazardous Materials Inventory
- ☐ Facility Site Plan/Storage Map(s)
- ☐ Emergency Response Plan/Contingency Plan
- ☐ Other (Specify): _____

I hereby certify, under penalty of perjury, that the information contained in this Hazardous Materials Business Plan is, to the best of my knowledge, true and correct. I understand that I will be required to show proof of compliance during any facility inspection conducted by City, County, State, or Federal authorities. I understand that whenever there are changes in address, ownership, business name, or operations (closure, addition of undisclosed hazardous materials or hazardous wastes, and/or contingency planning provisions), a notification of such must be made to Toxics Management Division within 30 days of the change.

UNIFIED PROGRAM CONSOLIDATED PERMIT AND REGISTRATION
City of Berkeley Toxics Management Division

CONDITIONS:

In order to maintain this Consolidated Permit and Registration, the permittee/registrant must comply with the following:

273. This permit is subject to all applicable local, state and federal ordinances, laws, statutes, codes, rules and regulations relating to the storage, handling, generation and disposal of hazardous materials and/or hazardous waste.

274. This permit is not transferable. Any permit or registration issued to a particular person or for a designated place, operation, purpose or object shall not be valid for use by or for any other person, place, operation, purpose or object.

275. The permittee/registrant shall retain this permit at its facility, immediately available upon request by an inspector or the hazardous materials manager.

276. The permittee/registrant shall notify the Toxics Management Division within 30 days of any changes in the operation of the facility that may affect the permit, or changes of the owner or operator.

277. The permittee/registrant shall pay an annual fee as designated each year, and all applicable state surcharge fees.

278. The permittee/registrant shall authorize representatives of the Toxics Management Division to enter the facility for inspection purposes to ascertain compliance and cause correction of any violation of the Unified Program Permit/Registration Conditions and of any applicable ordinances, codes, laws, statutes, rules, or regulations.

279. The permittee/registrant shall take all necessary steps to ensure the discovery, containment and clean up of any confirmed or unconfirmed unauthorized release of any hazardous material/hazardous waste and shall notify the Toxics Management Division of such unauthorized release if the release or threatened release presents or may present a significant threat to human life, property or the environment.

280. For hazardous materials sites, at least 45 days prior to the closure of a regulated unit or the facility, the permittee/registrant will submit a closure application to the Toxics Management Division addressing the appropriate removal of all hazardous materials and hazardous wastes from the facility.

Failure to comply with any of the foregoing conditions may result in revocation of this permit and/or a penalty assessment.

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page.

Does your facility…		If Yes, please complete these pages of the UPCF….
A. HAZARDOUS MATERIALS Have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES ☐ NO 4	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION
B. REGULATED SUBSTANCES Have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release Prevention Program (CalARP)?	☐ YES ☒ NO 4a	Coordinate with your local agency responsible for CalARP
C. UNDERGROUND STORAGE TANKS (USTs) Own or operate underground storage tanks?	☐ YES ☒ NO 5	UST FACILITY (Formerly SWRCB Form A) UST TANK (one page per tank) (Formerly Form B)
D. ABOVE GROUND PETROLEUM STORAGE Own or operate ASTs above these thresholds: Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	☐ YES ☒ NO 8	NO FORM REQUIRED TO CUPAs
E. HAZARDOUS WASTE		
1. Generate hazardous waste?	☒ YES ☐ NO 9	EPA ID NUMBER – provide at the top of this page
2. Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	☐ YES ☒ NO 10	RECYCLABLE MATERIALS REPORT (one per recycler)
3. Treat hazardous waste on site?	☐ YES ☒ NO 11	ONSITE HAZARDOUS WASTE TREATMENT – FACILITY ONSITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit)
4. Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES ☒ NO 12	CERTIFICATION OF FINANCIAL ASSURANCE
5. Consolidate hazardous waste generated at a remote site?	☐ YES ☒ NO 13	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION
6. Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned onsite?	☐ YES ☒ NO 14	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION
Generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (20 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	☐ YES ☒ NO 14a	Obtain federal EPA ID Number, file Biennial Report (EPA Form 8700-13A/B), and satisfy requirements for RCRA Large Quantity Generator.
Household Hazardous Waste (HHW) Collection site?	☐ YES ☒ NO 14b	See CUPA for required forms.
E. LOCAL REQUIREMENTS		
1. Use or store hazardous materials or hazardous wastes in combined (aggregate) quantities equal to or greater than 55 gallons for liquids, 500 pounds for solids or 200 cubic feet for compressed gases?	☒ YES ☐ NO 15	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION (OES 2731) OR SPREADSHEET
2. Use or store any quantity of etiological agents, radioactive materials or perchlorate materials?	☐ YES ☒ NO 15	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION (OES 2731) OR SPREADSHEET
3. Below E.1. thresholds above, but generate any quantity of hazardous waste?	☒ YES ☐ NO 15	HAZARDOUS WASTE GENERATOR REPORTING PACKET
4. Generate any quantity of Universal Waste (mercury containing devices, non-empty aerosols, electronic devices, fluorescent tubes, batteries, dental amalgam wastes, etc.)?	☐ YES ☒ NO 15	SEE THE UNIVERSAL WASTE REPORTING REQUIREMENTS PAGE FOR INSTRUCTIONS
5. Treat any quantity of photochemical waste on-site (x-ray and photo imaging processors)?	☐ YES ☒ NO 15
